We understand that the EC Council's deadline for submission of the Commission's proposals for budget and CAP reforms is June 30, 1981. However, the Commission has already indicated its thinking on ways to reform the CAP without jeopardizing the basic principles of Community preference, common prices and common financing. The "open-ended" use of the intervention system to support markets is cited as the main cause of CAP problems. The Commission considers direct income support policies, differential pricing, national financing and production quotas as being disruptive solutions.

As alternatives, the Commission recommends that the cost of surplus production in excess of certain basic levels be shared by the producers. It is suggested that this basic principle of producer co-responsibility be introduced in virtually all sectors and be applied either through direct levies, reduction of the market support price or reduction of direct production aids. The Commission is also considering a new approach to the Community's external agricultural trade policy on both the export and import sides. This could mean that the EC will rely more heavily on subsidized exports and on increased import protection to solve surplus problems.

EC POLICIES ON GRAIN EXPORTS

It appears, for example, that the EC has adopted an increasingly aggressive wheat export policy despite assurances to the U.S. that it would carefully monitor its exports and exercise restraint in exporting to markets sensitive to the United States, including the PRC and Latin America.

In December 1978, the wheat industry filed a Section 301 complaint against the EC for using export subsidies to gain "more than an equitable share of world export trade" in wheat in violation of GATT Article XVI. In June 1979, Director General Villain met with former Assistant U.S. Trade Representative Jim Starkey to discuss this issue.

Mr. Villain indicated that, to the maximum extent politically feasible, he would attempt to manage the EC's export policy on wheat in a manner so as to avoid disrupting sensitive U.S. markets. This was interpreted by U.S. officials as a clear signal that the EC would cooperate with the United States. During the next marketing year (1979/80), it appeared that the EC exercised restraint, and while EC wheat shipments increased from 8.0 to 9.8 metric tons, the Community's share of the world market only increased by 0.2 percentage points. This restraint was identified by U.S. officials as the appropriate justification for termination of the 301 complaint on wheat.

Almost simultaneous with the termination of the complaint, however, the EC wheat exports increased. In the 1980/81 marketing year, EC exports of wheat and flour are expected to reach 13.7 million metric tons, a dramatic increase of almost 4 million metric tons above shipments during the previous year. In addition, the EC is expected to expand its share of the world market from 11.3 percent to 14.7 percent (compared with a 6.8 percent share in 1978). U.S. officials have expressed concern to EC officials several times during this period and have been told repeatedly that they would attempt to manage the problem.

We terminated the 301 complaint on the basis of EC assurances of cooperation. In the meantime, the EC clearly has expanded its wheat export sales, in some cases into "sen-

sitive markets". The French negotiated a 3-year agreement with China to export 500,000–700,000 metric tons of wheat annually, despite earlier suggestions that such sales would not be made. Moreover, the EC authorized wheat exports to Latin America, a sensitive U.S. market, totaling nearly 200,000 metric tons this year.

In addition, the United States has had pending for five years a 301 complaint against the EC for its export subsidies on wheat flour. GATT Article XXII Consultations held in February 1977 and again in October 1980 were inconclusive. Subsequent bilateral consultations have yielded no progress in resolving the issue. The EC's commercial world market share in wheat flour has increased through the use of export subsidies over the past 20 years from an average of 29 percent to 75 percent while the U.S. share has fallen from 28 to 11 percent over the same period.

The United States terminated its Section 301 wheat complaint based on what we believed were good faith assurances. If a more moderate policy is not adopted by the Community, we will be forced to consider overriding previous understandings and possibly challenging the EC grain export subsidy program in its entirety.

The United States also places great importance on resolving the wheat flour issue. We hope to resolve the matter bilaterally to avoid further pursuit of the issue in GATT. I would welcome assurances that EC wheat flour export subsidies will not continue to be used in a manner to displace U.S. exports.

EC POLICIES TOWARD IMPORTS OF SOYBEANS AND VEGETABLE FATS AND OILS

During the Dillon Round of multilateral trade negotiations in 1962, the United States requested and received from the European Community a zero binding on soybeans and soybean products. Zero binding means that the European Community agreed to bind in the General Agreements on Tariff and Trade (GATT) that it would not impose any duty and/or quota on imported soybeans or soybean products. At the time of the duty binding, the European Community was buying less than $100 million of soybeans annually and thus placed very little value on granting the U.S. the zero binding. The U.S. was interested in acquiring the binding because it came at a time when the European Community was establishing the CAP which imposes a system of variable levies on imported agricultural products so as to raise the import price of such products up to the domestic price of similar European grown commodities.

Today the EC zero binding for soybeans and soybean products is extremely important to American agriculture. Total U.S. exports of soybeans and soybean products to the European Community in 1980 totaled almost $3.8 billion, about 45 percent of total U.S. soybean exports. Without the zero binding it is almost certain that U.S. soybean exports to the EC would have been much less. The Europeans have used soybeans both as a feed component and as a source of oil for producing margarine and shortening. Typically, the Europeans have imported soybean meal duty-free and mixed it with manioc (cassava) to produce a dairy and poultry feed equal or superior in feed value to that produced from European grown grains. However, because the soybeans and cassava are imported duty-free, the feed produced from them is much less expensive than the feed produced from European grown grains which are supported at high levels.

I am aware that some Europeans blame duty-free soybean and cassava imports for a surplus of EC grain. Such a surplus necessitates the EC subsidizing at a high cost the export of their grain in world markets. In addition, the soybean oil produced from processing these soybeans is used to produce margarine, shortening, and cooking oils which compete with EC-produced butter. The EC blames such competition for the large buildup of butter stocks within the EC. Also, dairy herds in Northern Europe (the Netherlands, Denmark, and West Germany) are fed using the soybean-cassava feed, and thus, can produce dairy products more efficiently and economically than they can with the higher priced European grains. I am told that the French feel that this higher production is a cause of the overproduction of butter.

Over the past two decades, the EC has considered taxing oil bearing materials. The most recent tax proposal surfaced in the fall of 1980 during the Community's discussions of measures which would be necessary in view of Spanish accession. France even proposed the imposition of a variable levy on oilseeds. The U.S. would retaliate should the EC impose a vegetable oil tax. Any actions which will impair the zero duty on soybeans and soybean products and impact on U.S. exports of oilseeds and products will lead to severe trade repercussions.

FEED GRAIN SUBSTITUTES

In the past five years, the U.S. export market for feed grain substitutes has taken an increasingly large share of U.S. production, from 15 percent in 1975 to over 30 percent in 1980. The EC is the major market for U.S. exports of feed grain substitutes (including corn gluten feed, citrus pulp, sugar beet pulp, distillers, dried grains and milling by-products). The value of these shipments to the EC totalled $500 million in 1979 and $600–700 million in 1980. The EC is concerned that imports of feed grain substitutes, particularly corn gluten feed, will continue to grow as the United States increases its production of high fructose corn sweetener and ethanol from corn. The technology of high fructose production is such that even with increased fructose output (which is highly unlikely given high sugar prices), corn gluten production will increase. Also, the Reagan Administration has given a low priority to gasohol production by significantly reducing funds and tax credits in this area.

Price disparities between corn gluten feed and domestic corn in the U.S. and in the EC are a major reason for increased U.S. exports to the community. Currently, corn gluten feed in the United States is priced roughly 25 percent above U.S. domestic corn prices, while the price of corn gluten feed in the EC is as much as 20 percent below EC corn prices. Consequently, European feed manufacturers have continued to import lower cost corn gluten. This has brought pressure in the Community to consider proposals for unbinding the duties on corn gluten feed and other feed grain substitutes to further protect their grain producers.

The duties on all of the feed grain substitutes, with the exception of the brans (milling by-products), are bound in the GATT between zero to six percent. The United States will not allow the GATT bindings on feed grain substitutes to be impaired. Such a course of action by the EC would require payment of compensation, based on historical trade levels; the larger the trade volume, the more compensation would be owed. Action by the Community affecting feed substitutes would be met with retaliatory action by the United States.

IMPLEMENTATION OF THE MTN HIGH-QUALITY BEEF QUOTA

During Multilateral Trade Negotiations (MTN) the EC granted the U.S. a levy-free quota for 10,000 metric tons of high quality beef. U.S. beef exports under the quota totalled 941 tons in 1980. Thus far, for 1981, import licenses have been issued to Member States for 1,015 metric tons. These relatively low volumes reflect the fact that U.S. high quality beef is still a relatively unknown product in the EC market, and to some extent are because of the EC license issuing process. U.S. market development programs have been underway to increase demand for U.S. beef within the Community.

Canada has continually sought access to this quota and recently won a GATT decision enjoining the EC to grant Canada access to its EC high quality beef market. The U.S. has received written and oral assurances from the EC that the 10,000 MT quota is reserved exclusively for the U.S. Despite these assurances, the EC beef management committee is reported to be considering a proposal which would grant Canada access to the U.S. quota.

The United States would view allocation of a portion of our quota to Canada as an impairment of the beef concession and as an unraveling of the package. The U.S. would of necessity need to redress the balance of the US/EC MTN package.

I wish to assure the Assembly that I understand the concerns of farmers, especially small farmers, in the European Community. I am a small farmer myself, by American standards: I own and operate a 60 acre farm in South Dakota. I know how hard it can be to cope with shifting market forces, but most farmers around the world share my belief that they are better off in the long run with less government intervention in agricultural markets.

My comments are intended to elicit a joint effort to resolve economic differences in ways which will contribute to mutual economic prosperity and a stronger alliance.

Let us commit ourselves to a renewed effort to liberalize our agriculture markets.●

A NEGOTIATED SETTLEMENT IN EL SALVADOR

● Mr. KENNEDY. Mr. President, it has been nearly 5 months since the United States resumed military assistance to the junta currently governing El Salvador, and 5 months since our former Ambassador, Robert White, first spoke out publicly against this tragic and mistaken policy of seeking a military solution to the crisis in that country. Today the violence continues unabated.

A military solution to the strife would not only increase the level of violence in El Salvador, but would increase the pressures for more American military advisers in that country. And yet neither the administration nor the Salvadoran Government has been willing to pursue what clearly are promising avenues to resolve the civil strife. Both have rejected the proposals for mediation and negotiation made by the Presidents of Mexico and Venezuela, the Secretary General of the OAS, and by the Socialist International—proposals which could bring an end to the thousands of killings and injuries being borne by so many innocent men, women, and children in this small, strifetorn country. Supported by the United States, the Salvadoran Government holds out a dim hope of elections in the future, while pursuing a chilling military solution in the present.

Ambassador White has continued to speak out for better policies toward El Salvador. He writes in yesterday's Washington Post that the failure to enter into negotiations poses the grave risk that the Christian Democratic elements still participating in the junta—elements which have demonstrated their commitment to serious social and economic reforms in El Salvador—will be forced to leave the government. No one wants to see this happen, and yet by refusing even to consider the possibility of talks with the

opposition—which includes moderate Christian and Social Democrats—the Salvadoran Government risks ending up a situation even worse than the present military deadlock.

It will not be for lack of eloquent and urgent voices from our allies and from the churches if this greater tragedy befalls us. While the present opportunities are available, I urge the Reagan administration to reconsider its adamant opposition to negotiations and explore—quietly or openly—every diplomatic avenue to ending hostilities in El Salvador now. Elections can still be an appropriate outcome of a process of dialog, and the present suffering can be ended.

Mr. President, I ask that Ambassador White's important and incisive article in the June 9 issue of the Washington Post on the pressing need for negotiations in El Salvador be printed at this point in the RECORD.

The article follows:

EL SALVADOR: WHY NOT NEGOTIATE?

(By Robert E. White)

The poverty of this administdation's policy toward El Salvador becomes clearer every day. The government of El Salvador is going nowhere. The violence continues. The reforms have stopped. The economy is foundering. The extremes are gathering strength. Yet the only response from this administration has been to discourage diplomatic initiatives from friendly governments, to spin tall tales about massive arms shipments from Nicaragua and to point the Salvadoran military toward search and destrov missions against campesino towns suspected of containing guerrillas.

To a government pleading for economic assistance to carry out its reform programs, we have provided unneeded armaments. To a people crying out for an end to the violence, we have furnished unwanted military advisers. To moderate civilian and military leaders trying desperately to contain the slaughter practiced by the security forces, we have given an abandonment of our human rights policy and a justification for government-sponsored terrorism. To friendly governments seeking to encourage a negotiated solution, we have trumpeted unsupportable charges of a "textbook case of indirect armed aggression by communist powers." And to world leaders who believed that the United States had finally learned that counterrevolution is not an adequate response to a people determined to transform their country, we have responded with Cold War rhetoric.

If U.S. policy toward El Salvador continues to exclude a political solution to that country's tragic civil war, the inexorable result will be to drive the moderate element—the Christian Democrats—from the government. This has long been the objective of the economic elites that regard the commitment of the Christian Democrats to profound reform as far more dangerous than the threat posed by the guerrillas of the far left.

The Reagan administration has thrown its weight behind a military solution to the Salvadoran tragedy. This has forced the Christian Democrats to equivocate regarding their long and strongly held position in favor of a negotiated solution to the conflict, and threatens their ability to govern. Two public examples that bear witness to the Christian Democrats' commitment to negotiation come to mind.

In October 1980, the bishop of San Salvador, Arturo Rivera y Damas, speaking in the name of the entire episcopate, offered to mediate between the government and the Democratic Revolutionary Front (FDR). While the FDR turned its back on the bishop's initiative, the government immediately accepted the mediation offer. A few weeks later, at a ceremony in the headquarters of the Organization of American States, Foreign Minister Fidel Chavez Mena stated unequivocally the government's willingness to "meet with all groups and sectors at the negotiating table."

It is important to be clear on this essential point. The Christian Democrats want to enter into negotiations with the FDR. It is the Salvadoran military that opposes any accommodation with the left, preferring instead to kill them with the assistance of our arms and our military advisers. Unless the United States uses its influence in favor of negotiation, the Christian Democrats have no choice but to temporize. They are not powerful enough to move the military toward a political solution without the solid backing of the United States. The Christian Democrats' only hope is that the nations of Western Europe and this hemisphere will persuade the United States to adopt a more responsible and humane course.

It is not only the Reagan administration that treats the Christian Democrats as expendable. Leaders of the FDR have persistently underestimated the importance of the Christian Democrats. FDR President Guillermo Ungo has spoken contemptuously of President Napoleón Duarte and other party leaders, describing them as nothing more than a facade for repression. This is both factually wrong and morally unfair. Men such as junta member José Antonio Morales Erhlich and Minister of Planning Atilio Vieytez, as well as Duarte and Chavez Mena are authentic democrats committed to a new deal for their country. More than the others, perhaps, Duarte may be tempted to use every device available to stay in office even after any real hope of transferring power from the military to the civilian institutions of the country has disappeared.

Ultimately, however, Duarte is a disciplined Christian Democrat. Should the party decide to leave the government, he will comply. And there is solid evidence of a sentiment building within Christian Democracy that the party can expect no support from the Reagan administration and would do well to leave the government in order to salvage what they can of its reputation. When Minister Atilio Vieytez said publicly that, while he did not dress in olive drab, he was as much a revolutionary as any guerrilla, he spoke for the great majority of the party.

The government of El Salvador contains worthy people, both uniformed and civilian. It also contains some of the most brutally repressive military in the world. Although the FDR counts many committed democrats in its ranks, it also contains armed guerrillas led by Marxist-Leninists who are guilty of unacceptable violence. It may be that any negotiation would both drive hard-line military elements into opposition to the government and induce some Marxist-led guerrilla groups to break away from the FDR. Both results should be welcomed. The repressive elements of the military, which regularly torture and kill, constitute a fatal weight around the neck of the government. The FDR must also decide which route it favors—negotiations, guarantees and elections, or a continuation of armed struggle. Each side must face the reality that it contains extremist elements which cannot be assimilated.

In a recent message to his conferees, the director general of the Jesuits, Pedro Arrupe, said, "Even when Christians recognize the legitimacy of certain struggles and do not exclude revolution in situations of extreme tryanny that have no other solution, they cannot accept that the privileged method for ending struggle is struggle itself. They will rather seek to promote other methods of social transformation calling for persuasion, witness, reconciliation."

Profound words. World leaders who profess Western values should indeed prefer negotiation over violence. It is therefore discouraging that the Reagan administration has set its face against a political solution for El Salvador. If it continues to follow this course it will alieniate not only the Western community of nations but also the crucial civilian component of the government of El Salvador. For the Christian Democrats are not only tough, pragmatic politicians, they are also idealists who have more in common with much of the FDR leadership than they do with those whom professor Thomas J. Farer eloquently and correctly condemned as "an alliance of corrupted soldiers, industrialists and landowners [who] would rather fight to the last worker, peasant, politician and priest than accept reform." ●

THE 75TH ANNIVERSARY OF THE FEDERAL MEAT INSPECTION ACT

● Mr. HUDDLESTON. Mr. President, June is the 75th anniversary of passage of the 1906 Federal Meat Inspection Act. I am pleased to bring the anniversary to the attention of my colleagues.

At the turn of the century, an overseas perception that the United States had a severe animal health problem was seriously interfering with exports of U.S. meat. Exports had only begun to be significant in the 1880's.

The 1906 Act required inspection before and after slaughter to detect signs of disease. This was a novel idea at the time, with unknown and far-reaching implications.

Veterinarians were able to detect animal diseases by closely examining animals before slaughter and by looking at the carcass and internal organs after slaughter. Thus, they were able to prevent meat from diseased animals from being sold to United States or European shoppers. But they also began to diagnose unrecognized diseases. Diagnosis is the first step towards prevention.

Inspection became an important tool in controlling or eradicating animal diseases. Animal health and inspection programs in the Department have always worked closely over the years. For neither program would achieve its major objective without the support of the other.

Producer education is also an important component of improving animal health and preventing diseased meat from reaching consumers.

Today, less than one-half of 1 percent of all animals inspected at slaughter must be condemned for disease or other unwholesomeness. I think that this statistic alone shows USDA's success in modifying the inspection program to meet the demands of the future, while staying true to the basic concept of inspection—preventing adulterated or mislabeled meat products from reaching consumers. I hope that my colleagues will join me in congratulating the Department on 75 years of solid service. ●

INTERNATIONAL ORDER OF ST. HUBERT

● Mr. HAYAKAWA. Mr. President, I take this opportunity to comment on the fine work being done worldwide in the fields or enlightened sportsmanship and game conservation by the ancient and

nonsectarian International Order of St. Hubert.

This order was founded as a society of hunters in 1692 by Count Franz Anton Sporck in what was at that time the Empire of Austro-Hungary. The order is named after Saint Hubert, born November 3, 670 A.D. in the Ardennes Forest which lies astride the Franco-Belgian border. His birthday is celebrated by sportsmen throughout the world, and the emblem of the order is a familiar sight all over Europe. At the end of World War II, the order was restituted by Dr. Albert Messany who became grand master of the international organization.

In early November of every second year, the officers and members of the order from Europe and North America gather in Grace Cathedral in San Francisco to honor their patronage and refresh their dedication to the principles of conservation and sportsmanship.

The first American grand master, George U. Wood of Orinda, Calif., passed away on the first day of 1980. His last wish on behalf of the order was that it be recognized in the official publication of the Congress of the United States.

The by-laws of the order provide that the seat of the order shall be where the grand master resides. The present grand master is Karl C. Weber, K.G.O. of San Francisco. He and other distinguished officers of the International Order have asked that George Wood's wish be carried out. It is my honor to inscribe these words in the CONGRESSIONAL RECORD, and to establish that California will again welcome the members from around the world at their meeting in San Francisco in November.●

MILITARY SOLUTIONS ARE NOT ALWAYS THE BEST SOLUTIONS

● Mr. BIDEN. Mr. President, while the shape of the new administration's foreign policy is by no means clear, that policy appears to include a tendency to favor military solutions over diplomatic ones, as in the case of El Salvador.

This course, we are told, is needed to correct impressions of American weakness around the world and accurately reflects the will of the American people, as it was expressed in last November's election.

A recent public opinion survey, however, strongly suggests that the American public is of a different mind.

The survey, conducted in March by the Roper Organization for the Committee for National Security, does indicate strong support for increased military spending.

But the survey also indicates that it is wrong to assume that this support for greater military spending can be translated into a mandate for a more bellicose foreign policy.

In the survey, which polled a nationwide sample of 2,000 persons in face-to-face interviews, respondents were asked the following question:

Do you think we should emphasize the military more and rely less on diplomacy and economic tools, or do you think we should maintain our current military strength and put greater stress on economic and diplomatic measures?

Forty-eight percent favored maintaining current military strength and putting more stress on economic and diplomatic measures. Only 41 percent favored the opposite approach.

Even among those who supported increased military spending, more than a third—38 percent—favored a greater stress on economic and diplomatic measures.

The administration would do well to take the views expressed in this survey into greater account.

None of us question the need for a strong defense to insure our national security. But, in an increasingly troubled and complex world it is wise to remember that military solutions are not always the best solutions, and that the American people, because of their good, plain commonsense, are often more mindful of that fact than some of their leaders.●

HUMAN RIGHTS

● Mr. HATFIELD. Mr. President, I wish to share with my colleagues two articles written by Congressman DON BONKER, chairman of the House Foreign Affairs Subcommittee on Human Rights and International Organizations. He demonstrates with powerful logic that a foreign policy which reflects genuine concern for the rights of individuals is not simply moralism, but rather an essential component of a coherent national security perspective.

It is becoming fashionable to assert that we cannot afford to place human rights at the forefront of foreign policy considerations. Congressman BONKER argues that we cannot afford to abandon them. Congressman BONKER recognizes the need for careful and thoughtful application of human rights standards in an effort to maximize effectiveness, rather than to score international debate points. I associate myself with the views espoused in these fine articles, and I submit them for the RECORD.

The articles follow:

[From the New York Times, Dec. 22, 1980]

SERVING HUMAN RIGHTS

(By DON BONKER)

WASHINGTON.—I hope that President-elect Ronald Reagan's statement that "all of us in this country are dedicated to the belief in human rights" and his warning to South Korea not to execute Kim Dae Jung, the opposition political leader, will signal authoritarian regimes everywhere that he will not tolerate their odious policies.

Yet speculation grows daily about the fate of human rights in the incoming Reagan administration. Many are counseling him publicly to undo the human-rights policy that was born of Congressional initiatives and that has been an integral part of foreign policy.

The peril of such advice is the possibility that it will be misinterpreted around the globe. Repressive regimes already are boasting that they will no longer be judged by the United States' standard of democracy and human decency. To abandon our human-rights policy would be a terrible blow to freedom everywhere. In a turbulent world, the forces of liberty are desperately struggling for survival. Dictatorial regimes, whether friend or foe, reject the concept of a free and open society. They uphold values that are as inimical to our country's long-term national interests as those of our avowed enemies.

Human-rights violators do not make reliable allies, as is evidenced by the Soviet Union's close relations with Argentina and Bolivia, both with hardline right-wing regimes. The era of simpler times, when brutal dictatorships were tolerated as long as they professed anti-Communism, has passed.

Our history has shown that we stand for more than expediency and strategic interests in pursuing our global objectives. By maintaining a strong human-rights policy, as President Carter has, we show ourselves responsive to the yearnings of human beings for dignity and freedom. Countries should be put on notice that if they expect our aid, they cannot engage in political executions, torture, and other monstrous practices.

It is in our self-interest to work for long-term stability in the third world if we are to achieve our political and economic goals. The alternative is to find ourselves at the mercy of dictators. Our recent experiences have demonstrated that we gain only the enmity of the people who are the victims of repression.

It has never been lack of weapons, but rather internal discord and disregard of basic rights that threaten repressive governments, and often our security interests. It was not our human-rights policy that brought about the downfall of Shah Mohammed Riza Pahlavi in Iran; nor did it precipitate the exit of Anastasio Somoza Debayle of Nicaragua and Emperior Haile Selassie of Ethiopia. Rather, it was the lack of even a minimal level of decency and justice in those nations and our uncritical support of such governments that has estranged us from successor regimes.

The advocacy of human rights is the moral imperative in our foreign policy that sets us apart from the Soviet Union. As the beacon of liberty around the world, our nation must pursue policies that help to shape a more decent world. Dare we do less?

Despite its shortcomings, supporters and critics agree that our human-rights policy has saved lives, brought about the release of political prisoners, reduced torture, and given hope to those who remain oppressed.

Still, much needs to be done. Summary executions continue. The number of disappeared and missing persons is close to 30,000 worldwide, and brutality in many countries is the norm rather than the exception.

We in the 96th Congress held numerous hearings on human-rights violations covering both Communist and non-Communist nations. Witness after witness testified that whenever the United States supported improvements in human rights, the situation changed for the better. With these hearings we promoted a human-rights policy that has integrity and that can be applied fairly.

Furthermore, the Congress stands especially proud of its human-rights efforts. Virtually all of the human-rights initiatives have come from the Congress, with broad bipartisan support—for example, by law we have established the human-rights bureau in the State Department, the annual State Department report on human-rights conditions in every country, and the cutoff of economic and military aid to repressive regimes.

As long as there is hunger, unemployment, disease, repression, and the absence of peaceful change, our ultimate goal of a true peace cannot be achieved. As the next President, Mr. Reagan is among the few in history privileged to promote justice through human rights, a goal that is strikingly reminiscent of what the Prophet Isaiah

admonished us to do 3,000 years ago: "Stop all wrongdoing. Remove all evil. Learn to do good. search for justice, help the oppressed."

[From the Christian Science Monitor, Feb. 25, 1981]

HUMAN RIGHTS: WILL REAGAN LEARN FROM CONGRESS?

(By DON BONKER)

WASHINGTON.—Any attempt to dismantle or ignore our traditional commitment to human rights will be met with firm resistance in the Congress. Judging from recent statements coming from the Reagan administration, it wants to demote human rights and concentrate instead on terrorism. Secreary of State Haig's public statements about international terrorism as an alternative to human rights make no sense. Terrorism is a human rights violation, be it a hijacked plane in West Germany. Red Brigade attacks in Italy, or state-sponsored torture in Latin America. He will have to define terrorism more carefully. For example, how does one distinguish between insurgencies that have a just cause, such as our own War of Independence, and the indiscriminate violence which plagues the world from time to time?

The new administration is obviously convinced that Jimmy Carter's alleged foreign policy failures were due, in part, to his commitment to human rights. These, however, are faulty assumptions, as Mr. Reagan and his advisers will soon discover.

A refresher course might be in order for those who are anxious to dismantle American human rights policies.

First, while the former President's clarion call raised the issue on the global scale, it was really Congress which laid the groundwork for our human rights policy.

As far back as 1973 Congress began limiting bilateral, and later multilateral, assistance to countries that persisted in a systematic pattern of gross violations of fundamental human rights. By amending the Foreign Assistance Act of 1961, the Congress mandated by law that all future administrations must enforce human rights policy. Also, specific legislation cut off aid to Chile, Argentina, Cuba, Uganda, Vietnam, Cambodia, and Zaire. In appropriations bills, Congress instructed our representatives to international financial institutions to vote against loans to countries which violated human rights unless such assistance was directed to serving the "basic needs of the impoverished majority."

It was Congress that required the State Department to publish annual country reports on human rights practices. Initially, the reports were only for countries receiving US military aid, but they were later extended to all 153 nations.

The position of assistant secretary for human and humanitarian affairs—the in-house advocate for human rights issues in the Carter administration—was also created by Congress.

In a variety of other ways, Congress has made explicit its concern for human rights, ranging from the so-called Jackson-Vanik amendment which linked freedom of emigration to East-West trade, to inclusion of a human rights curriculum in international military education and training programs.

Second, human rights is not an exclusively American issue. There now exists an international consensus that recognizes basic human rights and obligations owed by all governments to their citizens. We are signatories to the Universal Declaration of Human Rights; the International Covenant on Civil and Political Rights; the International Covenant on Economic, Social, and Cultural Rights; and other international and regional human rights agreements. The U.S. also helped to create and has actively participated in a number of organizations which promote and monitor adherence to international human rights standards, including the United Nations Commission on Human Rights and the implementation of the Helsinki Final Act, now in session in Madrid. Our persistence in freeing Russian dissidents and unifying families and our attention to the problem of disappearances have put all repressive regimes on the defensive. What will be our future role at these sessions under an administration that wants to deemphasize human rights?

Third, there is in this country, as well as abroad, growing support for human rights causes. Our allies look to us for leadership on human rights issues and in conjunction with us have started to develop their own policies.

Despite its shortcomings, supporters and critics agree that our human rights policy has saved lives, brought about the release of political prisoners, reduced torture, and given hope to those who remain oppressed.

The Reagan administration is well advised to carefully weigh public support for human rights, as well as our long-term best interests, before attempting to weaken the policy.

In the end, the administration will come to realize that our commitment to human rights is precisely what distinguishes us from the Soviet Union. Americans do care about individual liberty and freedom, and strongly believe in expanding these fundamental rights to all the people of the world.●

M. DWAYNE YOST RECEIVES WINTHROP ROCKEFELLER AWARD FOR DISTINGUISHED RURAL SERVICE

● Mr. HUDDLESTON. Mr. President, a young Kentuckian was recently honored for his outstanding contribution to the provision of quality and affordable housing for lower income families. On May 13, 1981, M. Dwayne Yost, of Manchester, Ky., was awarded one of two $10,000 Winthrop Rockefeller Awards for Distinguished Rural Service. As executive director of the Kentucky Mountain Housing Development Corp., Dwayne Yost has for nearly a decade struggled to improve the quality and availability of housing in rural Clay and Jackson Counties, Ky.

The awards, considered the most prestigious of their kind in the Nation, were presented by Vice President GEORGE BUSH, who praised Yost "for his leadership and vision as an entrepreneur, developing housing construction techniques and building suitable and affordable home for rural people in East Kentucky * * * and his commitment to rural people."

As a former pastor and mission director for the Church of the Brethren, Yost began building homes in 1973. Since 1978, Kentucky Mountain Housing has been the second largest producer of new homes in eastern Kentucky. In this coal-producing area, housing priced under $25,000 accounts for 75 percent of the demand. Under his leadership, Kentucky Mountain Housing has built affordable homes for 110 rural Kentucky families, most of whom earn $5,000 a year or less and live in an area marked by a shortage of housing.

In addition to new home construction, Yost has worked for major repairs—top to bottom reconstruction—on 85 homes and lesser repairs on more than 500 others. For the small-scale repairs, church volunteers do the work while skilled carpenters and semi-skilled trades trainees do the major jobs. The trades trainees are later assisted in finding other jobs in the community. Yost estimates that between 30 and 40 have been placed in local jobs outside Kentucky Mountain Housing.

Dwayne Yost has been a catalyst, drawing the bits and pieces—funding support, expertise, manpower—together so that local rural people can take the initiative in making that next step improving their own lives. This has been no easy task and does not promise to get any easier in the future.

For example, in 1975 Yost built a house for a family with four daughters. The small farm where the family lived brought in about $1,200 a year. The house was built using low-cost construction techniques, keeping monthly payments to a minimum at about $40, or roughly a third of the family income. But the house did not have enough furniture and the children needed better clothes, so the father began thinking about another source of income. By putting to use electronics training he had obtained during his military service, he started a radio and television repair service, building a workshop in the back of the house. Now, the family income is between $7,000 and $8,000.

Yost has also been a leader in developing building techniques suitable for rural areas and the income levels of a rural market. When one of his early experiments, a "stack-sack" method, had its insulation rejected by the Farmers Home Administration, Yost turned to the school of architecture at the University of Kentucky and other sources for advice on design, engineering, and construction efficiency in more traditional frame homes. A recent project emphasizing local building techniques and supplies produced a three-bedroom house that cost the family $10,000. Yost is continually looking for improved technology, such as a newly approved septic system, that would make previously unusable land buildable.

Funds for Yost's building program have come from a variety of church denominations in addition to his own, including Presbyterian and Methodist groups, the Commission on Religion in Appalachia, and the Christian Appalachian project, sponsored by the Roman Catholic Church. Other financial resources have included the Kentucky Housing Corp., a State construction financing agency with bonding authority. In addition, Kentucky Mountain Housing has received support from the Daniel Boone Development Council in Manchester; the Federation of Appalachian Housing and Human Economic Appalachian Development (HEAD) in Berea, Ky.; and the Appalachian Regional Commission and the Housing Assistance Council in Washington.

Financing for the homes came from the Farmers Home Administration (FmHA) subsidy loans where interest rates escalate as the family's income increases. Most eastern Kentucky families do not qualify for regular FmHA loans and many have incomes too low even for the subsidy program. But so far, not one family has defaulted on a loan for a house built by Kentucky Mountain Hous-

ing. A few have fallen behind briefly, but with financial counseling also provided by the corporation, all families have been able to catch up.

Yost has worked with a variety of local, State, and Federal agencies, frequently advocating more flexible rules to meet the unique requirements of housing development throughout Appalachia. For example, Federal guidelines on minimum construction standards, he contends, have been developed generally to protect urban and suburban consumers and have pushed construction prices beyond the means of many rural people, particularly those in eastern Kentucky.

Nonprofit housing corporations in other parts of eastern Kentucky have borrowed Yost's techniques as have groups in southwestern Virginia and eastern Tennessee. Adaptability to other rural areas and the potential for long-lasting impact are among factors considered by the independent panel of judges making the award selections. Innovation is also regarded as important. The nominees must have made at least one specific contribution through a project or program that affects a rural area or areas, in addition to responding to a national or regional problem.

I applaud the National Rural Center and the Winthrop Rockefeller Charitable Trust, sponsors of the grant program, for honoring and encouraging individual leadership in local communities and in the academic community. I know I speak for all Kentuckians in extending to Dwayne Yost both my congratulations for receiving this award and my gratitude for his efforts toward improving rural housing.●

MARY EASTWOOD, DEDICATED CIVIL SERVANT

Mr. STEVENS. Mr. President, I wish to take this opportunity to commend a truly dedicated and talented civil servant, Mary Eastwood. For the past 1½ years, Ms. Eastwood has served in the capacity of the acting Special Counsel to the Merit Systems Protection Board. This past Friday, a permanent Special Counsel was sworn into office. For the first time since its establishment in 1979, the Office of the Special Counsel will have a permanent head. Unfortunately, the Office has been plagued since its establishment with problems extraneous to itself. The Office has received a great deal of criticism. What has been overlooked, however, are the accomplishments of a non-political, dedicated civil servant who has headed an office frought with political problems. Ms. Eastwood took over the reins of the Office when the prior administration's nominee became subject to a Senate investigation. At that time, the Office was barely operating. Now it not only has a talented and aggressive Washington Office but it has opened field offices in 7 other cities.

The Office of the Special Counsel has a fairly large congressional mandate to root out prohibited personnel practices, protect whistleblowers, and prosecute reprisals. Under Ms. Eastwood's tutelage, the Office requested numerous stays of personnel actions in which most were granted and prosecuted a number of sensitive cases in which their were alleged political reprisals. Almost 2,000 cases of some kind were received by the Office in 1980. The Office was able to close over 1,500 of them.

Although I feel the Office will be able to function more smoothly with a permanent head, it is clear that Ms. Eastwood has done an outstanding job in her capacity as its temporary leader. It is not often that our career public servants are singled out for recognition. In this case, it is deserved.

COMMUNIST INTERFERENCE IN EL SALVADOR

● Mr. LEVIN. Mr. President, last February 23 the administration issued with much fanfare a State Department white paper titled Communist Interference in El Salvador.

The document was used by the administration to support its contention that the Soviet Union was actively engaged in a major effort in El Salvador that would be contrary to the best interests of the United States. The white paper also served as the justification for increased military and economic aid for El Salvador.

Administration officials visited several capitals in Western Europe, using copies of the white paper as evidence to gain support for the administration's policies.

Now, some 4 months after the white paper was issued with the full backing of this Government, serious questions have been raised about its accuracy in two lengthy analyses of the document appearing in the Wall Street Journal and the Washington Post.

In an interview quoted by the Wall Street Journal, the official responsible for the report, Mr. Jon D. Glassman, says portions of the report are "misleading," and "over-embellished," and that there are "mistakes" and "guessing" included in it.

According to the press, administration officials acknowledge that errors may have crept into the report, but insist its conclusions are sound. The State Department reportedly is preparing a rebuttal to the articles about the white paper.

Mr. President, I ask that the two articles to which I referred, "Apparent Errors Cloud U.S. 'White Paper' on Reds in El Salvador" from the Wall Street Journal of June 8 and, "White Paper on El Salvador Is Faulty" from the Washington Post of June 9, be placed in the RECORD at the conclusion of my remarks.

The articles follow:

[From the Wall Street Journal, June 8, 1981]

APPARENT ERRORS CLOUD U.S. WHITE PAPER ON REDS IN EL SALVADOR

(By Jonathon Kwitny)

WASHINGTON—The State Department's now-famous white paper "Communist Interference in El Salvador," which was issued on Feb. 23, has served the Reagan administration well as the launching pad for its anti-Soviet foreign policy.

The anonymous authors of the eight-page document displayed no false modesty in declaring in its preamble: "This special report presents definitive evidence of the clandestine military support given by the Soviet Union, Cuba and their Communist allies to Marxist-Leninist guerrillas now fighting to overthrow the established government of El Salvador."

Bearing copies of the report, State Department emissaries visited the principal capitals of Western Europe and elicited statements of support from most of them. Domestically, too, the white paper, said to be based on 19 captured guerrilla documents, was accepted as fact by most of the nation's press, and there were numerous follow-up stories quoting administration spokesmen on their plans for countering the allegedly growing military power of the Salvadoran guerrillas. Within days, the National Security Council announced it had approved plans to provide the tiny country with $25 million of additional military aid and $40 million of economic assistance.

ADMISSIONS OF "MISTAKES"

With this kind of track record for the white paper, it is surprising, therefore, to hear Jon D. Glassman, who is given the major credit for its existence, describe parts of it as possibly "misleading" and "over-embellished." In a three-hour interview in his new office just one floor below Secretary Alexander Haig's at State Department headquarters, policy planner Glassman freely acknowledges that there were "mistakes" and "guessing" by the government's intelligence analysts who translated and explained the guerrilla documents, which were written in Spanish with code names.

The white paper says that the 19 documents prove El Salvador is a "textbook case of indirect armed aggression by Communist powers." But a close examination of the documents the State Department has brought forward indicates that, if anything, Mr. Glassman may be understating the case in his concession that the white paper contains mistakes and guessing.

Several of the most important documents, it's obvious, were attributed to guerrilla leaders who didn't write them. And it's unknown who did. Statistics of armament shipments into El Salvador, supposedly drawn directly from the documents, were extrapolated, Mr. Glassman concedes. And in questionable ways, it seems. Much information in the white paper can't be found in the documents at all. This information now is attributed by the State Department to other, still-secret sources.

The shortcomings of the white paper don't necessarily invalidate the Reagan administration's policy of providing more support for El Salvador's ruling regime—a policy that apparently had been decided upon well before the white paper was issued. A close reading of the white paper indicates, instead, that its authors probably were making a determined effort to create a "selling" document, no matter how slim the background material.

A LOSS OF CREDIBILITY?

Few deny that Marxists are active in the El Salvador rebellion or that they have received at least some training and supplies from Communist countries overseas. But the month-by-month arms buildup, of almost blitzkrieg proportions, described in the white paper with such emphatic detail and precision, may lose credibility with Mr. Glassman's admissions that he doesn't know who wrote some of the allegedly captured documents on which the white paper is based.

In fact, the dire circumstances described in the white paper seem to have little bearing on what has subsequently happened in El Salvador this year. Far from being overwhelmed by the power of imported Soviet arms, the Salvadoran government put down a desperate rebel offensive in January; reporters on the scene say the guerrillas still are able to operate freely in large parts of the country, but that there haven't been successful large-scale attacks indicating big new arms supplies.

Mr. Glassman, then deputy chief of the political section of the American embassy in

Mexico City, was sent to El Salvador last January on a special mission to find and analyze guerrilla documents. He says he sent back to Washington some 80 pieces of material, comprising about 200 pages. Although only 19 of the documents were cited as background in the Feb. 23 white paper, the rest of the papers, plus other material, are expected to provide background for another State Department white paper, which officials say will be released shortly.

CONCLUSION DEFENDED

Mr. Glassman and other State Department officials strongly defend the conclusions that were reached in the original white paper. "We possibly never again will have such an intimate insight into the development of guerrilla movement and its gathering of financial and military support," Mr. Glassman says.

But the 37-year-old career diplomat, who was promoted after his success in finding the documents, concedes that problems arose almost immediately after the white paper and its documents had been distributed by the State Department. A message came from the El Salvador government, he says, declaring, in effect, "You guys have made some mistakes." Among them, he says, was the misidentification of an alleged guerrilla leader whose code name Mr. Glassman thought he had broken.

"We completely screwed it up," he now says, referring to the attribution of the document. A list of weapons and other equipment supposedly going to El Salvador from Vietnam, Ethiopia, Bulgaria, Czechoslovakia, Hungary and East Germany was compiled by alleged guerrilla leader Ana Guadalupe Martinez, the white paper analysis says. But apparently she had nothing to do with it. The document itself—the most prominently featured document in the white paper—bears the name "Ana Maria." The Salvadorans say the list was really drawn up by Ana Maria Gonzalez, who belongs to another group, according to Mr. Glassman. But he adds, "This was the Salvadorans guessing. They don't know either. I could be right."

The white paper was more certainly wrong, Mr. Glassman indicates, in attributing to Shafik Handal the authorship of an account of an arms-soliciting trip last summer to the Soviet Union and six other Communist countries. Mr. Handal is secretary general of the Salvadoran Communist Party and is also identified as the emissary who made the trip. (The trip report itself refers to the emissary simply as "the comrade.") Mr. Glassman acknowledges that the report couldn't have been written by Mr. Handal, because from the context the author clearly write from Cuba after Mr. Handal himself had left.

Mr. Glassman says that he doesn't know who wrote this report, which is central to the white paper. He concedes that the wording precludes authorship of the document by a known Salvadoran Communist representative in Cuba.

No such uncertainty was evident in a Feb. 6 story that ran at the top of page one of the New York Times, which quoted from the trip report as a first-hand account and said that the emissary was "believed to be" Mr. Handal. The leak, more than two weeks before the white paper was issued, didn't come from the State Department, Mr. Glassman says, but probably came from one of the friendly Latin American governments that had seen an advance copy. In fact, Mr. Glassman adds, the leak caused government officials to rewrite parts of the white paper "to make it different from Juan de Onis (the Times reporter who wrote the story). It caused the government a lot of hard work," he says.

WHO WROTE DOCUMENT C?

The white paper also says Mr. Handal wrote another document—two pages of handwritten notes called Document C. The notes don't contain Mr. Handal's name or any date or identification, but the white paper says that they are notes "taken during an April 28, 1980, meeting of the Salvadoran Communist Party." The notes, however, appear to be written in at least two different handwritings, making them difficult to ascribe to one author. Mr. Glassman says the handwriting looks different to him, too, and adds, "The change people writing on them. At a lot of the meeting things (notes of meetings), different people are writing it." Nevertheless, in four places the white paper quotes the words as Mr. Handal's own.

Also in question is the most widely publicized statistic in the white paper—the amount of arms that it said were proved to have been delivered to the insurgents. The second paragraph of the white paper says, "From the documents it is possible to reconstruct chronologically the key stages in the growth of the Communist involvement." It then lists as the fourth such stage "the covert delivery to El Salvador of nearly 200 tons of . . . arms, mostly through Cuba and Nicaragua." But nowhere in the documents is there any mention of 200 tons.

Mr. Glassman says, "That (200 tons) comes from intelligence based on the air traffic, based on the truck traffic. In other words, it doesn't come from the documents."

A BIT OF EXTRAPOLATION

He says that secret intelligence observation showed increased air traffic between Cuba and Nicaragua late last year. This was presumed to be arms shipments for El Salvador, he adds, because new arms cropped up in an unsuccessful rebel offensive in mid-January of 1981. He says that part of the estimate of the truck shipments into El Salvador was based on extrapolating the cargo-hauling potential of several trucks that were listed in "Document N," attached to the white paper. This document, an undated, unsigned and barely legible hand-scrawled sheet, lists four trucks, three of which apparently are still to be bought or built, along with the initials of four guerrilla groups and some purported tonnage numbers, totaling 21, under the headings "sea," "air" and "land."

Another frequently quoted statistic in the white paper is that "the series of contacts between Salvadoran Communist leaders and key officials of several Communist states . . . resulted in commitments to supply the insurgents nearly 800 tons of the most modern weapons and equipment."

The 800-ton figure also represents an extrapolation, Mr. Glassman says. He says he multiplied 130 (the tonnage of arms one document says are stored in Nicaragua) by six to arrive at "nearly 800."

EXPANDING ON ARAFAT

Oddly enough, "Document I," which provides the rationale for this extrapolation, seems largely given over to complaints by the unidentified author about the ineptitude of guerrilla leaders in even finding a meeting place, and the *slowness* of arms deliveries from outside El Salvador. The document purports to be the minutes of a meeting of three men, said to be the "Guerrilla Joint General Staff." The State Department translation of the minutes includes a date at the top, Sept. 26, 1980, which isn't on the document, and only the first page of an unknown number of pages was distributed. The key paragraph follows:

"It contradicts military reality to discuss percentages of arms when barely four tons of the 130 warehoused in Largos (believed to be a code word for Nicaragua) have been brought into the country. These four tons have been in intermittent supply and the material now in Lagos is only equivalent to one-sixth of all the material obtained that the DRU (the Unified Revolutionary Directorate, a group of leftist organizations) will have eventually concentrated in Lagos."

Other major assertions in the white paper seem questionable. One is that on July 22, 1980, Yasir Arafat, the Palestine Liberation Organization leader, met Salvadoran guerrilla leaders in Managua, Nicaragua, and gave "promises (of) military equipment, including arms and aircraft."

Mr. Glassman acknowledges that the only mention of Mr. Arafat in the documents is an aside in parentheses, which says. ". . . . on the 22nd there was a meeting with Arafat."

This reference is contained in an unsigned report, "Document G," in the context of much complaining that a delegation of Salvadoran leftists was cold-shouldered and otherwise insulted on a visit to Nicaragua for the anniversary celebration of that country's revolution. Mr. Glassman says that the white paper's report of Mr. Arafat's promises to the Salvadorans came from other, secret intelligence.

As another example, the white paper quotes a report allegedly prepared by Mr. Handal as saying, "In reference to a unification of the armed movement, he (Mr. Handal) asserts that 'the idea of involving everyone in the area has already been suggested to Fidel himself.'" An obvious reference to Cuban Premier Fidel Castro.

SOVIET AID: A PLANE TICKET

"I think that could be a misleading statement," Mr. Glassman concedes, noting that in the context of the document, the idea that had been suggested to "Fidel" was getting various Communist parties in Central America to cooperate. The discussion, however, appears to be about labor unions.

At another point, the white paper says that Salvadoran guerrilla leaders formed a unified front "as a precondition for large-scale Cuban aid," Mr. Glassman acknowledges that there is nothing to that effect in the documents, but he says, "This comes from the Nicaraguan situation where they (the Salvadorans) saw that the Cubans wanted that (a unified front)."

The only concrete instance of Soviet aid delivered to the Salvadoran rebels reported in the 19 documents was an airplane ticket from Moscow to Vietnam for one guerrilla, presumably Mr. Handal. Whoever was writing the documents complained frequently that various countries, particularly the Soviet Union, were footdragging in procuring and transporting arms.

Mr. Glassman, however, contends that recent captures of arms in El Salvador indicate that the Soviets made good on promises of deliveries. He says that American-made arms, found in an El Salvador-bound truck intercepted in Honduras in late January, have been traced by their serial numbers to a shipment delivered to Vietnam during the American presence there. He says that this was the first known appearance of such weapons outside Vietnam and that this proves that weapons, said to be promised in the documents, were actually delivered.

RAIDING AN ART GALLERY

"In my mind, the Russians cooperated fully," he says, and the guerrillas' complaints were "ill-founded."

How Mr. Glassman came upon the documents makes a tangled tale itself, with several versions extant. Mr. Glassman says that William Bowdler, then assistant secretary of state for Latin American affairs, called him on Jan. 14 from Washington and told him that because of the guerrilla offensive that had begun Jan. 10, the department thought that there might be some captured documents to account for where the arms were coming from. Some 15 or 20 documents had been discovered the previous November and had been turned over by the Salvadoran ministry of defense. Mr. Glassman was to be temporarily assigned from Mexico City to the job, according to the State Department, because then-Ambassador Robert White, in El Salvador, had said he was too shorthanded to handle the assignment.

The November documents were said to have been captured in a raid on an art gallery owned by Mr. Handal's brother. They had already been sent to Washington, analyzed and their contents reported to various U.S. embassies, including Mr. Glassman's in Mexico City, Mr. Glassman says. Among these documents was the report on the arms-soliciting trip believed to have been taken by Mr. Handal, and one other document of the 19 that were later released on Feb. 23, he says.

Mr. Glassman says he flew to El Salvador within a couple of days of getting Mr. Bowdler's instructions. He says that he went straight to the Salvadoran minister of defense but was told that the only documents available were the ones already delivered in November. Says Mr. Glassman, "I know from our own bureaucracy and other bureaucracies that what is found down below doesn't always get passed up the chain of command." So he says he went to several other agencies—the national guard, the treasury police and, finally, the national police, where he was shown a new pile of documents.

"Fortunately for us," Mr. Glassman says, "just a few days earlier, they had captured a Venezuelan correspondent, a journalist, who was bringing in money for ERP (a guerrilla group) and by following him were able to capture the ERP propaganda commission as a whole, meeting in a house." The owner of the house denied involvement but was persuaded to tell police of other locations mentioned by people on the propaganda commission, Mr. Glassman says.

One such location was a grocery store owned by a known leftist. There, police found a false wall, behind which were a mortar, some shells, and more documents in a plastic bag and a suitcase, according to what Mr. Glassman says the police told him. He says he thinks the documents were kept there because the guerrilla coalition consists of four groups, "none of which fully trusts the others," so that records must be maintained.

NEWS FOR AN AMBASSADOR

About 15 of the 19 documents released on Feb. 23 came from the grocery store, Mr. Glassman says. After receiving them, he says, he went to Col. Jaime Abdul Gutierrez, the vice president of El Salvador, and asked for a further search. Other documents were turned up, and two or three of them were included in the batch released on Feb. 23, he says.

Mr. White, the former U.S. ambassador to El Salvador, takes issue with Mr. Glassman on several points. He denies that he asked for outside aid from Washington to help with the documents. "Captured documents were not uppermost in my mind. We were dealing with a final offensive and a general strike situation," Mr. White says.

He expresses incredulity at Mr. Glassman's story of the discovery of the second batch of documents. "All of this is news to me," he says. "It strikes me as unlikely that I would not have heard this story before—this business about following a Venezuelan and finding this wall and breaking it down."

He also says that Mr. Glassman was pointed to the documents by Col. Eldon Cummings, American military group commander at the embassy, who already knew they existed and where, Col. Cummings, in a separate interview, agrees. Mr. Bowdler and Luigi Einaudi, the State Department official who supervised the analysis of the documents, also say they were aware of the new documents well before Mr. Glassman's trip.

Mr. White was removed as ambassador in late January after policy differences with the Reagan administration and has since become a senior fellow at the Carnegie Endownment for International Peace. So it is perhaps understandable that he has a poor opinion of the Feb. 23 white paper—"bizarre, tendentious, tries to prove more than the evidence warrants."

His feeling about the documents is almost equally harsh. "The only thing that ever made me think that these documents were genuine was that they proved so little," he says. He concedes that he is a great skeptic when it comes to captured documents, adding. "It was unthinkable that the documents on the Handal raid would have been sort of lying around the national police station for several weeks. It would have been normal procedure for the authorities of El Salvador to share with us any intelligence discovery that took place.

Nevertheless, Mr. White believes that it's possible, as the white paper says, that Mr. Handal did visit Moscow and other Communist capitals, that some "semi-outlaw governments," such as Vietman, Ethiopia and Libya gave support to the Salvadoran rebels, and that the leaders of Cuba and Nicaragua did "sit down with" the Salvadoran insurgents and "talk strategy and tactics."

Mr. Glassman says that once the documents were in his hands, one of the first things he did was to satisfy himself that they were genuine. There was the possibility that the Salvadoran military might have fabricated them or that they had been planted by the Central Intelligence Agency.

Says Mr. Glassman, "I submitted all of the documents to them (the CIA), and I asked, 'Did you fabricate any of the documents, or is there any indication they were fabricated by anyone else?' And the answer was no to both."

In defending the white paper's documentation, Mr. Glassman even expresses an opinion very close to that of Mr. White—that the shortcomings of the documents indicate that they are genuine "and dispove the fabrication argument."

[From the Washington Post, June 9, 1981]

WHITE PAPER ON EL SALVADOR IS FAULTY

(By Robert G. Kaiser)

The State Department's white paper on El Salvador, published in February, contains factual errors, misleading statements and unresolved ambiguities that raise questions about the administration's interpretation of participation by communist countries in the Salvadoran civil war.

The white paper was the first significant initiative from the Reagan administration in the field of foreign policy.

The document, and the supporting evidence described as "incontrovertible," were taken by administration emissaries to many countries of the world last winter.

When the white paper was published, the major news media tended to accept the document at face value, but it has subsequently been challenged in several analyses, primarily by individuals and journals critical of American policy in El Salvador. Yesterday, The Wall Street Journal added its reservations in a front-page story that said the white paper was flawed by errors and guesses.

The Journal's article prompted a statement from the State Department yesterday defending "the conclusions of the white paper," without replying to specific criticisms.

The Washington Post has been conducting its own inquiry into the white paper and the captured documents on which it was based. The inquiry was initiated to determine whether the evidence released by the State Department actually supported the department's sweeping conclusions.

This was a textual analysis, not an attempt to determine the extent of communist involvement in El Salvador, which cannot be determined from Washington.

The Post's inquiry indicates that on several major points, the documents do not support conclusions drawn from them by the administration. On other points the documents are much more ambiguous than the white paper suggested. Many of the documents contain no identifying markings whatsoever, though the State Department gives them concrete indentifications.

In one key document, the State Department dropped a sentence from its translation into English, which undermines the department's characterization of the document.

The documents released by the State Department were only a small portion of the total found in two "caches." Both were found by police in San Salvador, one in November behind an art gallery, the second in January behind a false wall in a grocery store. Other documents from the same sources made available to The Post by the State Department actually contradict or differ substantially from the picture of the Salvadoran insurgency that is painted in the white paper.

Some of the broad conclusions in the white paper were simply not supported by the documents released with it. For example, the white paper made a much-publicized accusation that nearly 200 tons of arms had been delivered covertly to El Salvador, mostly through Cuba and Nicaragua. There is no concrete evidence to support this claim in any of the documents released with the white paper.

Some critics have charged that the documents were forged, but their evidence is essentially circumstantial, and the documents carry such meager identification that it would be hard to say just what had been forged if they were made up. The inconsistencies between the documents and the white paper do not prove that the white paper's conclusions are wrong, but they do raise questions about those conclusions and how they were reached.

The most substantial of the documents published with the white paper was a partial account of a trip purportedly taken by Shafik Handal, secretary general of the small Salvadoran Communist Party, which is part of the front of opposition groups now backing the guerrillas in the civil war.

Last summer, according to the document, Handel visited Moscow, Hanoi, the major East European capitals, Addis Ababa and Havana. The purpose of his trip was to line up donations of arms and equipment for the Salvadoran rebels, according to the captured document.

In the book of documents the State Department released with its white paper, this one was described as an "excerpt of report on trip to the socialist countries . . ." by Handal. The document carries no identification of any kind, nor any signature, but its contents do describe a trip taken by an unnamed "comrade" who was apparently seeking military aid for the Salvadoran rebels.

The white paper, in summarizing this document, makes it appear that Handal wrote it. In the book of documents released with the white paper, this document is not attributed to any specific author. A quick reading might suggest that it was produced by someone close to Handal in the Salvadoran communist party. But the one sentence in the Spanish original (also released by State), which the department dropped in its English translation of the document, seems to confirm numerous other hints within the document that it was written by a Cuban.

The dropped sentence comes at the end of a paragraph describing what is purported to be Handal's visit to Ethiopia last July. The document says the Ethiopians promised to contribute arms to the Salvadoran rebels, listing types of weapons. The last sentence says that this cargo of arms "will leave in our ship the fifth of August."

Since the Salvadoran rebels have no Navy of their own, it is unlikely that this was written by Handal or one of his associates. The State Department indirectly acknowledges that the document in question was written in Havana by translating its many references to "here" as meaning Cuba.

If this was a Cuban report on Handal's

trip, why was it found in a cache of rebel documents in Salvador? This would seem to be a significant point, but the State Department ignored all questions about the origins of this untitled, unsigned document.

The white paper makes Handal's trip around the Soviet bloc, Vietnam and Ethiopia sound like an idyllic journey on which the traveler always got what he wanted (mostly arms, uniforms and equipment). Summarizing this document, the white paper recounts Handal's two visits to Moscow, one in early June and the other in late July. As the white paper notes, on the second visit Handal raised an issue that had come up earlier in his travels—whether the Soviets would provide aircraft to transport arms that Vietnam planned to donate to the Salvadoran rebels.

In the white paper's summary, this is how that is described: "Before leaving Moscow, Handal receives assurances that the Soviets agree in principle to transport the Vietnamese arms."

The document itself tells a different story. According to it, Handal was repeatedly frustrated in Moscow, and reported his frustration candidly to whomever wrote the document. A senior Soviet communist party official told Handal, the document says, that, "In principle, there is opinion in favor of transporting the Vietnamese weapons, but there has been no approval on the part of the leadership organs."

Handal, apparently angry, "made known through other channels his disagreement with the . . . lack of decision concerning the requests for assistance."

After two more weeks without a reply from Moscow, the document says, Handal began "expressing concern as to the effects that the lack of decision by the Soviets may have, not only regarding the assistance that they themselves can offer but also upon the inclination of the other parties of the European socialist camp to cooperate. . . ."

Neither this nor any other document released by the State Department indicates that the Soviets ever did provide the requested air transport. And this document is the only one that linked the Soviets directly to the Salvadoran civil war.

The white paper also suggests that the account in this document of Handal's visit to Hanoi (which, the document says, the Russians suggested and financed) plus the later capture of U.S. M16 rifles that could be traced back to Vietnam demonstrated conclusively that Vietnam was providing weapons to the Salvadoran guerrillas.

The evidence presented, however, does not confirm this. According to this document, Handal was promised a wide variety of arms in Vietnam, but the M16 assault rifle—the basic weapon used by American infantrymen in the Vietnam war—was not on the detailed list given in the document.

The M16s in question were found in a truck that was captured in Honduras en route to El Salvador, according to the State Department. "Approximately 100 M16 rifles, some of which were traceable to Vietnam," were found in the truck, the department said. Why only "some" could be traced to Vietnam was not explained.

On another point in this document, the white paper says: "The Soviet official [who dealt with Handal in Moscow] ask[ed] if 30 communist youth currently studying in the U.S.S.R. could take part in the war in El Salvador." In fact, the document says, it was Handal who asked the Soviets to give military training to 30 youths then studying in Moscow who wanted to fight in the war, a request the Soviets approved after repeated prodding.

Another document in the collection is described as a "trip report" recounting a visit by Salvadoran rebels to Managua, Nicaragua, last summer. The white paper draws on this document to describe a meeting between the Salvadorans and Yasser Arafat, leader of the Palestine Liberation Organization. "Arafat promises military equipment, including arms and aircraft," according to the white paper.

The document, however, includes only this parenthetical reference: ". . . On the 22nd there was a meeting with Arafat." There is not a single word in the document about Arafat promising arms and aircraft. Nor is there any information in the white paper about where the PLO might acquire aircraft to donate to the Salvadoran rebels.

One handwritten document in the batch is described by the State Department as notes on an April, 1980, meeting of the Salvadoran Communist Party written by the same Shafik Handal. On the face of it this is an implausible description; even to an amateur eye, it is obvious that the document is written in two distinctly different handwritings. The document contains no reference to Handal or to a meeting of the Communist Party, and is not dated.

According to the State Department's translation of this document, its author says it is necessary to "put the party on a war footing." In fact the author of this part of the document did not use the phrase for war footing ("estado de guerra") but refers instead to a state of struggle or dispute ("estado de pelea"). The translation quotes the author as saying that the attitude of the socialist camp "is magnificent." He adds: "We are not yet taking advantage of it." In fact, though, the word "yet" does not appear in the original Spanish.

Another questionable translation appears at the end of another unsigned. undated document headed "Logistical Concepts," which outlines plans for intensified rebel activity inside El Salvador (among other things). According to the State Department's translation, the document ends with this sentence: "This plan is based on there being an excellent supply source in Lagos (said to be a code name for Nicaragua)."

In fact, this document ends with this Spanish sentence: "Este plan partiria de que exista una real fuente de abastecimiento en Lagos." This is a conditional construction that should be translated: "This plan is based on the supposition that there exists a real source of supplies in Lagos," or "This would be the plan if there is a real source of supplies in Lagos." The State Department removed this conditional sense, and changed the word "real" to "excellent."

Besides the documents published with the original white paper. the State Department's El Salvador working group allowed two Washington Post reporters to leaf through a batch of other documents captured in the same caches, including full versions of documents that were excerpted for release earlier. Read together with the documents released originally, these others draw a picture that differs in significant ways from the one in the white paper. These documents portray a guerrilla movement that is chronically short of arms and scrounging for more of them.

For example, among the documents released by the State Department is one described as an excerpt from a report on a meeting of the Salvadoran Unified Revolutionary Directorate (DRU), the leading body of the guerrilla movement. In the book of released documents it is dated Sept. 30, 1980, though the original (made available by the State Department later) is dated Aug. 30. In the English translation of the excerpt provided by State, the date is Sept. 1.

Whatever the right date, the short excerpt released by State is a list of weapons that Salvadoran communist party's "secretary general" [Handal] reported had been shipped to them by Soviet-bloc countries, which are said to be arriving in Nicaragua on Sept. 5. This is an impressive list of military hardware and supplies, including the weapons purportedly promised to Handal in Vietnam, Ethiopia and Eastern Europe.

Curiously, the list of weapons coming from Vietnam seems to be describing the same shipment listed in the report on Handal's trip discussed abcve; most of the items listed are the same on both lists. But inexplicably, this one differs on many details. For example, the trip report list said Vietnam offered 15,000 7.62 mm. cartridges for M30 and M60 machine guns; this second document says 480,000 such cartridges are coming from Vietnam.

In any event, the State Department included this small excerpt from a much longer document in its book of documents released with the white paper. It is obviously a list of equipment that Handal says is coming to Nicaragua for the Salvadoran rebels.

The full version of this document includes another section about the difficulties the rebels are having getting arms out of Nicaragua. It paints a picture that contradicts flatly the impression left by this other list. (This section was not released publicly, though it was made available to reporters who asked to see more of the captured documents.) Here are some excerpts:

"With regard to bringing weapons from Lagos [described by State as the rebels' code name for Nicaragua]:

"(a) The E.R.P. [The Popular Revolutionary Army in Salvador] has made two serious attempts and the F.S.L.N. [the ruling Sandinista front in Nicaragua] has stood in its way for reasons which in the opinion of the E.R.P. are subjective and at times wrong.

"The E.R.P. has air, water and land resources and is ready to make two trips per week.

"One reason for not using the maritime route is that the F.S.L.N. [the Sandinistas] says that the E.R.P. should not touch its shores; the E.R.P. agreed to stay out at sea but even this did not work.

"The F.S.L.N. [Sandinistas] claimed that by land the weapons the E.R.P. would bring in would be too few (it was 200 rifles). It also said that it would no longer allow the F.P.L. [the Farabundo Marti Popular Liberation Forces, the largest rebel group in El Salvador] to bring weapons by the methods it has been using.

"(b) The P.C. [presumably the Communist Party] has reported that it cannot bring in large quantities but that it can bring in small quantities. . . ."

In other words, the State Department selected for public release a section of a document listing large quantities of arms due to arrive in Nicaragua, according to the report of the man alleged to have arranged for their shipment. Another section of the same document reporting on the actual troubles the rebels were having bringing arms into El Salvador was not selected for public release.

The contention of the white paper that the Salvadoran rebels were enjoying the benefits of "nearly 200 tons" of communist-supplied arms and materiel is not supported anywhere in these documents, and is implicitly refuted by many of them. In document after document there are reports of rebels short of arms, or looking for ways to buy arms, or exhorting comrades to produce home-made arms, or plotting to kidnap wealthy Salvadorans thought to have access to private arsenals.

Document number 48 in the State Department's files (not released with the white paper) is described as a war plan of the Farabundo Marti Peoples' Liberation Front, described by State as "the coordinating board" of the principal leftist guerrilla groups. The document anticipates a military campaign that would last from Nov. 25 to Dec. 10 of last year. The document says it should be possible to bring 30 tons of arms into the country during November to prepare for this, but that the campaign could go forward even with less.

This document, dated Nov. 18, listed these guerrilla needs as of that time: 1,000 automatic rifles, four 50-cal. machine guns, 16 30-cal. machine guns, six M79 grenade launchers—in other words, modest needs in-

deed compared to the huge numbers of weapons emphasized in the white paper.

Document 83 in the State Department's files, unsigned and undated, is a description of arms and equipment available to the guerrillas. The file copy includes this notation from a U.S. government official who read and evaluated it: "From this," the American wrote, "it would appear they had only 626 weapons for more than 9,000 men." This document was omitted from the collection released to the press with the white paper.

The heart of the white paper is the accusation that "over the past year, the insurgency in El Salvador has been progressively transformed into a textbook case of indirect armed aggression by communist powers through Cuba."

This is a characterization that the Salvadoran government does not accept; on a recent visit to Washington, the foreign minister, Fidel Chavez Mena, said the war in his country was first of all an internal conflict, and secondarily an arena for the East-West contest.

The idea that the war in El Salvador is an internal, factional struggle does not appear in the Reagan administration's white paper. The anti-government guerrillas are described as part of the Salvadoran "extreme left"; and the white paper ignores the moderate elements, including former government ministers who belonged to the Christian Democratic Party of President Jose Napolean Duarte, who have joined the guerrilla cause.

Instead of the civil struggle described by Salvador's own government, the white paper perceived "a textbook case of indirect armed aggression by communist powers through Cuba."

TAX CUTS: THE FULL 3 YEARS

Mr. SYMMS. Mr. President, there has been a lot of talk in recent weeks about the "Reagan Revolution." Although the President has really not done all that much as yet, his rate of success is phenomenal, and he has so clearly established a new course of public affairs that the epithet "Reagan Revolution" is fully justified.

The budget resolution adopted overwhelmingly by both Houses of Congress points the direction. And yet, Mr. President, unless the essential points of the Reagan program are maintained, all the balanced budget resolutions in the world will not save us. We desperately need to keep before us the two critical elements that really constitute the "Reagan Revolution."

And what are those two points? They are cuts in the marginal rates of taxation and the consolidation of categorical programs into block grants. Today I would like to say a word or two about the tax cuts.

President Reagan has proposed an across-the-board tax cut of 10 percent per year for the next 3 years. This is the classic Kemp-Roth, "supply-side" tax cut. Its function is to make savings and investing (which are two sides of the same coin to economists) more attractive, and thus revitalize the economy.

There is evidence that such a tax cut would in fact make saving more attractive, and thus make more money available to the entrepreneur, the individual at the cutting edge of economic progress. For instance, Dr. Charls Walker, writing in the Washington Post last Monday, cited a survey conducted by Gallup in August of 1980, in which 40 percent of those surveyed said they would save most of a 10-percent tax cut. It is true that 41 percent said they would spend the money, but since a good part of that "spending" would be for debt repayment, which is economically the same as saving, since it is not spending for consumption, the figures are somewhat misleading. Dr. Walker then cites a survey from March of this year in which 82 percent of those surveyed said they would use about half of the money obtained from a Kemp-Roth type tax cut for savings or debt repayment.

The point is, Mr. President, that cuts in marginal tax rates offer the only way out of a tax-and-spend economy such as our current one. We cannot tax our way to a healthy economy, and we cannot spend our way out of stagflation. We must restore incentives, and that is what the President's proposal is designed to do.

Over in the other body there is a lot of talk about 1-year tax cuts and 2-year tax cuts. In my opinion, Mr. President, that simply will not do. Investors, entrepreneurs, risk-takers have to have certainty. They need to be able to plan well into the future. A 1- or 2-year tax cut does not permit that kind of planning, and so should be unacceptable to us and to the President.

The President should stand firm for the full 3 years of across-the-board cuts in marginal tax rates. And we should stand with him. I ask that the article I referred to by Dr. Charls Walker be printed in the RECORD. I hope all my colleagues will take the opportunity to study his powerful case for the 3-year tax cuts.

The article follows:

WHY THE TAX CUT WILL MAKE US SAVE

(By Charls E. Walker)

When the House Ways and Means Committee meets to "mark up" the administration's tax cut bill, the central question relating to the proposal to cut individual tax rates by 30 percent over the next three years will be the impact on individual decisions to save. The press and many in the public seem to believe that since the rate reductions will affect individuals, and since individuals are consumers, most of the increase in disposable dollar income will be spent on consumption, thereby strongly increasing inflationary pressures. But supporters of the "10–10–10" tax cut maintain that individual savings will rise markedly and help provide for noninflationary financing of the federal deficit.

Both logic and experience support the administration view.

Just who will benefit most from the cut in tax rates? Middle-income taxpayers, defined not in the statistician's image of $20,000 per year in median family income, but in their own image of perhaps $15,000 to $50,000 a year. These families pay 59 percent of all federal individual income taxes and would receive 61 percent of the tax cut. These are families that save, with the amount of saving rising sharply as income levels rise. They are the people who have saved in the past and now hold hundreds of billions of dollars in savings in banks, savings and loan associations, credit unions, savings bonds, money market funds and other forms.

It is ridiculous to charge that these middle-income Americans are going to devote all or most of any tax reduction to spending on consumption. In fact, a recent survey by W. J. Fitzgerald, Inc., indicates that, on balance, families below the $15,000 income level are net dissavers, their consumption spending exceeds disposable income, with the shortfall made up by cashing in on past savings or going into debt. This means that at income levels above $15,000, net saving must be sufficient to offset the dissaving at lower income levels in order to result in a net saving rate for all consumers of 5 to 6 percent, the U.S. average of recent years. Since the tax cut is to affect mainly these higher income taxpayers, the amount of the tax cut that will be saved can be several times higher than indicated by the current saving rate.

How much higher? This depends on the marginal saving rate, or how much of each extra dollar of disposable income received is saved. Common sense tells us that marginal saving rates rise with income, but from what base and how steeply? Writing in 1971 on the basis of 1960–61 survey data, economist Ralph Husby estimated that the short-run marginal saving rate (i.e., the immediate response) was 67 percent among families with the lowest incomes, gradually increasing to 82 percent at the $41,500 level (the income levels are adjusted to reflect 1980 dollars). According to the Husby analysis, long-run marginal saving rates are lower than short-run rates, ranging from 16 percent in the lowest bracket to 55 percent in the highest. Still, the 16 percent bottom-bracket long-run marginal saving rate was more than twice the level of the average savings rate in the early 1960s, when the survey was conducted.

Personal saving out of the 1964–65 Kennedy-Johnson tax cut was fully consistent with the Husby conclusions. With a 30-percent cut in the lowest bracket rate, 15 to 18 percent for middle-income taxpayers and 23 percent for the highest income taxpayers, the Kennedy-Johnson tax reduction was weighted more toward low-rate savers and dissavers than is 10–10–10. Still, that tax cut had a very big impact on individual saving, with the average personal saving rate rising from 5.4 percent in 1963 to 6.7 percent in 1964 and 7.1 percent in 1965. Comparable results with the Reagan tax proposal would provide an increase of more than $25 billion in personal savings in 1982 and upward of $40 billion in 1983.

Critics maintain that today's expectations of high inflation have blunted incentives to save. This "spend now" philosophy, they argue, drove the individual saving rate to a low of 4.7 percent in the first quarter of 1981 and will surely prevent any repetition of the 1963–65 experience, when prices were rising at less than half the current rate.

The answer to this criticism is that fear of inflation, if indeed it does cause lower saving, is certainly not the only factor. Of at least equal—if not greater—importance is the increasing tax burden on middle-income Americans as they move up to higher tax brackets and are hit with steep marginal rates. To the extent that this tax burden is the culprit, 10–10–10 carries its own solution to the problem of the low saving rate. Middle-income taxpayers will have more disposable income from which to save and will also get a significantly higher after-tax return on each additional dollar that is saved.

Insight into current attitudes toward saving can be found in recent public opinion polls. In August 1980, the Gallup organization asked people what they would do with a 10 percent reduction in their income tax bills, spend it or save it? Forty-one percent said they would spend most of it; 40 percent said they would save most of it.

But, in fact, that question was poorly worded. Few individuals realize that the act of saving is really a negative act; it is the act of not spending on consumption. Debt repayment is saving. Opinion Research Corporation asked people in late March: "If your tax rates were reduced by 30 percent over three years, would you spend all of the money, or would you save some of it or use it to repay debt?" Fully 82 percent of the respondents said they would save some of the money or use it to repay debt, compared with only 15 percent who would spend it all. Those who

said they would save some of the money also said they would save (on the average) almost half of the proceeds of the tax cut.

This response is fully consistent with the range of short-run marginal saving rates as estimated by Husby. Moreover, to the extent the prospect for cutting the inflation rate is recognized by the public, higher saving rates can be expected. In addition, there are strong pressures in Congress to shape the tax bill even more toward stimulation of individual savings. Discussions between congressional leaders and administration officials point to retention of the multi-year approach but with perhaps a five-point cutback in the total size of the marginal rate reduction from 30 to 25 percent. As a trade-off, strongly pro-saving provisions might be added, including immediate reduction in the top individual rate from 70 to 50 percent on investment income, a further substantial cut in the capital gains rate, and some type of savings incentive especially attractive to middle-income taxpayers.

In this way, two important goals would be served. The pressing social and economic need to reduce the impact of "bracket creep" on tax-battered middle-income Americans would be met. At the same time, maximum stimulation of individual saving would be obtained, and the tax cut would in significant part "pay for itself" by helping to finance the federal deficit.

LT. GEN. JAMES D. HUGHES

● Mr. INOUYE. Mr. President, Lt. Gen. James D. Hughes, one of the U.S. Air Force's most experienced tactical commanders, is retiring after 35 years of active commissioned service. For the past 3 years, General Hughes has served at Hickam Air Force Base, Hawaii, as Commander in Chief of Pacific Air Forces.

In this position he has been the air component commander of the Pacific Command—the largest of the U.S. unified commands with an area of responsibility encompassing 2½ million square miles, 35 nations, and some 2 billion people.

General Hughes was born on July 27, 1922, in Balmville, N.Y., and was graduated from the U.S. Military Academy in 1946. He flew combat in fighter aircraft during the Korean war and again during two tours of duty in Southeast Asia. During his career, he has served in a wide variety of assignments: As a combat fighter pilot; commander of tactical flying units, including the Tactical Air Command's 9th and 12th Air Forces; as a staff officer at major command headquarters in Europe and the Pacific; and as a senior military adviser in the Nation's Capital at the White House and Pentagon.

He served as Armed Forces aide to the Vice President of the United States from 1957 to 1961 and as military assistant to President Richard M. Nixon from 1969 to 1972.

General Hughes is a graduate of the National War College and earned a masters degree in international affairs from the George Washington University in 1966. An Air Force command pilot who has flown more than 6,000 hours in a wide variety of aircraft, he has flown every type of modern jet fighter including the Air Force's newest fighter aircraft, the F–15 Eagle, the F–16 Fighting Falcon, and the A–10 Thunderbolt II.

During his 3½ decades of service, General Hughes has served four tours of duty in the Pacific theater. His most recent assignment as Commander in Chief of PACAF has been his first Pacific assignment during peacetime.

His decorations and awards include the Distinguished Service Medal with two oak-leaf clusters, Distinguished Flying Cross with one oak-leaf cluster, Bronze Star Medal, Air Medal with nine oak-leaf clusters, Air Force Commendation Medal with one oak-leaf cluster, Purple Heart, Distinguished Unit Citation emblem with two oak-leaf clusters, Air Force Outstanding Unit Award ribbon, Republic of Korea Presidential Unit Citation, Republic of Korea Order of National Security Merit Gugseon Medal, the Republic of Vietnam Gallantry Cross with palm, and the Most Noble Order of the Crown of Thailand (First Class-Knight Grant Cross). He is a recipient of the Order of the Sword, the highest honor that may be bestowed upon a commander by his noncommissioned officer corps.

On June 1, 1981, Hawaii Governor George R. Ariyoshi presented the State's highest award, the Hawaii National Guard Medal of Merit, to General Hughes for his personal role "in making the Hawaii Air National Guard comparable to units in the Pacific Air Forces and one of the best Air National Guard organizations in the Nation."

I am extremely proud to recognize the distinguished accomplishments of General Hughes, the Pacific Command's senior air component commander. Through 3½ decades of service to his nation, his leadership has left an indelible imprint on the readiness posture of our Nation's tactical air forces.●

ISRAEL HAD NO OTHER CHOICE

● Mr. D'AMATO. Mr. President, I rise to address the matter of the recent air strike against the Iraqi nuclear plant near Baghdad.

I do not believe Israel had any other choice but to destroy the Iraqi atomic reactor. This bomb factory would have produced an atomic bomb capable of the destructive force which leveled Hiroshima. It was not an atomic reactor to produce energy. It was the means for Iraq to threaten the sovereign State of Israel—a nation dedicated to the principles on which this nation was founded. Israel has sworn its allegiance to us. It is our only true ally in the Middle East; it is the friend in the Middle East we should support.

The Israeli raid on Iraq was an act of self-defense, nothing more. The Israeli Government showed restraint in attacking the plant before nuclear fuels were in the reactor, and at a time when most of the plant's workers were away from that area. It was an act to prevent even bloodier and more destructive aggression by the Iraqis.

The United States and the rest of the free world should be more understanding of Israeli's act of self-defense. Not only has it protected itself from possible annihilation, it has prevented the entire Middle East from moving into a war it might not survive.

I agree that the spread of nuclear arms in any area of the world is a vital security matter. The spread of nuclear technology in the Middle East is even more critical. While the United States and Russia balance their nuclear capabilities with the fear of each other's power, no such balance could be struck in the Middle East. If Iraq and then, possibly Libya, possessed nuclear weapons, we might witness the second holocaust.

The question is, how do we stop the spread of nuclear arms in the Middle East?

Ideally, these types of missions should not be necessary. Unfortunately, this is a less than ideal world. We must face cold, hard realities. We have allies in this world and we have enemies who would like to annihilate our allies.

Israel faced the facts. It knew that the Iraqi plant would soon be producing the elements that could cause Israel's destruction. Israel knew there were risks, but realized all that could be lost through inaction.

It is time now for the United States to face facts. When will we see the difference between friend and foe and act accordingly? We should no more consider cutting off arms supplies to Israel than we should sell AWACS aircraft to Saudi Arabia. The sooner we face facts, the sooner we will regain the respect of those nations who may be questioning the depth of America's commitment to its allies.

Mr. President, the Israeli air strike was done at a time that minimized the damage to civilians, in fact to the entire world community. It was an act of prevention, not aggression.●

SENATOR SPECTER ADDRESSES SHAKLEE DISTRIBUTORS

● Mr. SPECTER. Mr. President, on the afternoon of April 4, I had the great pleasure of addressing 10,000 Shaklee distributors in Philadelphia, the majority being from Pennsylvania.

One of the most striking things about these distributors is that they are largely made up of those groups who often have the greatest difficulties breaking into the American business system. They are women, family members, senior citizens, and minority citizens. They market nutritional, household, and personal care products from their homes.

Mr. President, never have I encountered such an enthusiastic and receptive audience of American small businesspeople. The experience reaffirmed my faith and confidence in American small business.●

U.S. MULTIFIBER ARRANGEMENT

● Mr. HEINZ. Mr. President, I bring to my colleagues' attention a recent statement by the AFL–CIO Executive Council concerning renewal of the U.S. Multifiber Arrangement (MFA). I have also

included a copy of my letter on the same topic to U.S. Trade Representative William E. Brock, which was signed by 21 of my colleagues.

Renewal of the MFA is one of the most important trade policy issues that Congress will face this year. Thousands of American jobs are now being lost due to increasing import levels. Immediate changes are needed in the MFA in order to reduce the current onslaught of foreign products and I support the recommendations made by the AFL–CIO in order to accomplish these objectives.

These concerns must be addressed now through a coherent, aggressive negotiating strategy. A strong, united position is required in order to achieve our goals, preserve American jobs, and resolve this important trade policy issue for American industry.

I ask that the statement by the AFL–CIO and my letter to Trade Representative Brock appear at this point in the RECORD.

The statements follow:

STATEMENT BY THE AFL–CIO EXECUTIVE COUNCIL

International trade in textiles and apparel continues to have a severe adverse impact on American workers. Thousands of jobs are lost as imports pour into the U.S., swamping the already depressed domestic industry.

Last year the U.S. deficit in textile and apparel trade was more than $4 billion. Imports of some apparel products now exceed American production of these products. The future does not bode well if import levels continue to climb 8 percent annually, while the U.S. market grows at only 1 to 2 percent annually. For 1978 alone, an estimated 614,000 job opportunities were lost domestically from both direct and indirect import effects—nearly one-quarter of the number of jobs in the fiber/textile/apparel industry.

Apparel and textile workers who lose their jobs are among the hardest of the unemployed to retrain and place in new occupations. Most are women or members or minority groups and first generation immigrant groups who have particular problems finding jobs under the best of circumstances. Further, the Reagan Administration has proposed substantial cuts in the already inadequate Trade Adjustment Assistance program.

The majority of jobs in the textile and apparel industry have been preserved by an international agreement which regulates trade in these products, the Multifiber Arrangement (MFA). The MFA was negotiated in 1973 and renewed in 1977, with 50 importing and exporting nations becoming party to the agreement.

U.S. workers had looked forward to some easing of the import problem when the MFA was renewed and the Carter Administration announced a new Textile/Apparel Policy. But the MFA and the bilateral quota agreements negotiated under it have not been successful in containing the relentless surge of imports. New suppliers are adding to the already high quotas of the major Asian exporting nations.

Changes must be made in the MFA to reflect the different situation American workers are experiencing today. Improvements must be made to reflect the cumulative effect of imports on domestic textile and apparel production.

The United States must do more than just maintain the existing Multifiber Arrangement if the textile and apparel industry is to survive. We specifically recommend the United States government adopt the following policies in its upcoming negotiations on a renewed MFA and bilateral agreements:

The renewed MFA should regulate imports in line with changes that occur in domestic production of the importing countries. The previous mandated growth rate of 6 percent annual increase in imports should be modified to reflect the 1 to 2 percent actual growth rate American industry is experiencing.

Imports of specific products should be controlled in their entirety, not on a piecemeal basis.

In order to meet the needs of truly developing countries, nations with fully industrialized textile/apparel production, which already have an overwhelming portion of the U.S. market, should be held to no growth in quota.

In order to curb the instability of year-to-year surges in imports, flexibility provisions in the MFA must be eliminated. Quotas should reflect actual trade levels rather than be provided automatic escalators.

The MFA should be expanded to cover all apparel products, not just those made of cotton, wool or synthetic fiber.

U.S. SENATE,
COMMITTEE ON FINANCE,
Washington, D.C., April 30, 1981.

Hon. WILLIAM E. BROCK,
U.S. Trade Representative,
Washington, D.C.

DEAR BILL: We believe the successful renewal of the Multifiber Arrangement (MFA) is one of the most important trade policy challenges we face this year. Over the long term hundreds of thousands of jobs in all regions of the country depend on our ability to negotiate an MFA and the bilaterals that follow it that provide for orderly and restrained entry of foreign products.

We are confident both you and the President share this goal, but we have a growing concern at the slow pace of development of our policy and our negotiating tactics. We note that a number of members of the Senate Finance Committee have also become increasingly concerned over the way our trade policy professionals approach negotiations and the extent to which they are outmaneuvered by their more experienced colleagues. (This issue was raised in some detail at the recent Finance Committee hearings on your budget.)

The MFA negotiations, soon to get underway, provide a challenge to our negotiating skills that we can't afford to ignore. It is absolutely essential that we make a serious effort to tie import growth more closely to the level of growth of the domestic industry, and that to the extent we show more flexibility with regard to imports, we show it to the genuine lesser developed countries and not Hong Kong, Korea, and Taiwan, which presently account for 62 percent of our apparel imports and cannot be considered developing countries by any standard.

It is also critical that we present a strong front against efforts by the European Community to restrain further our textile/apparel exports. These exports are a real opportunity for growth for our industry after sustained deficits with EC nations in the past.

Unquestionably a nation rarely fully achieves all its goals in an international negotiation as complex as this one, but that fact makes it even more critical that we enter the process with a coherent, aggressive, and united position based on extensive interagency discussion and close meaningful consultation with the private sector. Going into a negotiation with a modest objective, such as simple renewal of the existing agreement, is, we fear, the best way to achieve a less than modest result which will be unacceptable to the Congress and the industry and embarrassing to our negotiators.

We urge you and your staff to use the remaining time available before the negotiations get fully underway to develop a strong and coherent position that reflects the commitment of the Reagan Administration to insist on reciprocity in negotiations and to aggressively defend the interests of American industry.●

REMEMBERING BRAVE JURI

● Mr. HEINZ. Mr. President, I bring to my colleagues' attention a recent article from the Christian Science Monitor on the death in a Soviet labor camp of Estonian human rights activist Juri Kukk. This brave and courageous civil rights leader died at the age of 40, as the result of a 4-month hunger strike.

Kukk could no longer accept the Communist propaganda statements and died for his faith in freedom. His death has increased social and political tension in Estonia and offers a dramatic illustration of the serious problem we now face in the human rights area.

The public must be made aware of this official brutality and must join us in showing our strong and united criticism of such human rights violations. I believe this article helps to vividly demonstrate these atrocities and to raise public concern for this most important issue. Therefore, I ask that the article appear at this point in the RECORD.

The article follows:

REMEMBERING BRAVE JURI

(By David K. Willis)

LONDON.—At home I have a pair of gloves, thin, brown, ordinary. They are not mine. They belonged to a hero, one of the bravest men I have ever met.

Now I cannot return them. Their owner has just passed on, in a Soviet prison camp, in the Gulag Archipelago, in the frozen northern plain of Russia, in the region of Murmansk.

This article is written in his memory: a mild, slightly built, unassuming, intelligent, and honest man called Juri Kukk. He died because his eyes were opened to the kind of totalitarian control the KGB and the Communist Party exercise in the Soviet Union in his beloved homeland of Estonia.

For many years he worked quietly as an inorganic chemist in Estonia. For 12 years he was even a member of the Communist Party. But he spent a year studying at an institute just outside France (1975–76), and when he returned home, he was a different man.

I met him first in the depths of a dreary winter (1979–80) in an icy, deserted Moscow park. It was so cold we could hardly stand still. I invite him, and his colleague Mark Niklus, back to our apartment, gave him some tea, listened to his quiet determination and his courage.

He is not so well known as Andrei Sakharov or Anatoly Shcharansky. He won no Nobel prizes or world headlines. To me, he epitomized the unshakeable faith of an individual in freedom. Eventually, he died for that faith on March 27, 1981. He was 40.

His funeral, such as it was, was attended by his wife Silvi, five friends, and 25 KGB agents in the bleakness of Vologda, 400 kilometers east of Leningrad. His grave bears no name, just his prison number—23781. His widow has no photograph of it; KGB agents tore away the camera a friend used at the funeral, and exposed the film.

Juri told me he could no longer accept communist propaganda statements when he returned from France. The party said life in Estonia was wonderful: his own eyes told him it was the opposite. He felt he could no longer remain a member of the party. He wrote a brief note to local party headquarters, resigning. He thought it was a mere formality, and that he could live and work as before.

He was thunderstruck to come home one day and find Silvi had been visited by men

in plain clothes who bullied her by saying he would be put into a psychiatric ward unless he withdrew his resignation. Persecution increased. The more it did, the more unyielding he became. He lost his teaching job.

Eventually he joined forces with another dissident, Mark Niklus, who had been battling the authorities since graduating from the university.

Niklus, a square, burly, passionate man with darting eyes and nervous manner of one always watching for the KGB, was with Juri when we met in the park. Both spoke good English. Both described conditions in Estonia, nationalist rallies, and a statement Niklus had signed the previous year calling for Baltic independence.

Later they gave me copies of statements signed by Baltic dissidents opposing the Soviet invasion of Afghanistan and supporting a boycott of the Moscow Summer Olympics of 1980. They wanted me to quote them.

The last time I met Juri was when I drove him in my car along the Sadovoye ring road. Three minutes after leaving the car he was picked up by the KGB and held for three days without being charged.

Sent back to Tartu, he telephoned me from a public booth to say how astonished he had been at the sight of the KGB flouting normal rules of detention. He had been thrown in a cell with drunks. A statement attesting to his answers had been signed by two 'witnesses' whom he later discovered in the cell with him—prisoners plucked out of jail to sign a statement they knew nothing about.

He was deported from Moscow for staying in the city longer than three days (technically an offense) even though he would have been home in time if he had not been detained.

A month later he was arrested in Tartu. Silvi and his small son and daughter were distraught. The children were shouted at, victimized by schoolmates while teachers stood by, watching.

Eventually Juri was charged with disseminating fabrications defaming the Soviet system. Niklus was arrested on a more serious charge April 29.

For months the KGB tried to force Estonian doctors to certify Juri mentally deranged. They refused, The KBG incarcerated him in the notorious Serpsky psychiatric institute in Moscow. He went on a hunger strike. So did Niklus.

From Jan. 5 to 8 in Tallinn, capital of Estonia, both men were tried together. Both refused to speak. At the end, Juri bowed to Silvi and promised to continue his hunger strike, then in its 41st day.

He was sentenced to two years in a labor camp (Niklus, a second offender, received 10 years and five more of internal exile). On March 27 this year, Juri succumbed in the Gulag, still refusing food, still fighting for the ideals the Soviet states denies.●

THE PEANUT LORDS

● Mr. LUGAR. Mr. President, two excellent articles in the Atlanta Constitution reveal that our present peanut support system is a feudal system which benefits a restricted class of peanut "lords" who inherited the allotments which one must hold in order to produce peanuts. It does not protect the farmer because he must pay for the right to grow peanuts and because restraints on production take away the incentive to compete for growing world and domestic markets. It does not help the American consumers because it drives up domestic prices. And it does not help feed the hungry of the world because of the restraints on production and the lower price support for exports than for domestic production.

Peanut allotments were created by the Government in 1938. Today, the person who farms an acre of peanuts is usually not the person who holds the allotment. The Agriculture Department estimates that about 70 percent of peanut acreage is leased. Those who lease this land have to pay not just for the land that they need; they must also pay for the allotment. The articles give examples of the exorbitant prices that are often paid for allotment leases. A 1977 USDA study shows that about 90 percent of the value of a typical lease is for the allotment, not for the land. Leasing the allotment adds about 20 percent to the lessee's total cost of production.

The peanut support program also drives up the cost of peanuts to the consumer. This happens for three distinct reasons. First, the higher production costs due to the allotment system are reflected in higher prices to the consumer. Second, restrictions on production and high quota loan rates set the market price of peanuts higher than they would be under free competition. Third, artificially high domestic prices encourage the use of severe import restrictions which drive prices up even further. During the recent drought, imported peanuts were not available when they should have been to ease the pressure on domestic prices. Peanut butter is now a luxury item instead of a potential food for the world.

I will introduce an amendment to the farm bill to reform a system which benefits neither the farmer nor the consumer and which is counterproductive to the U.S. interest in world trade.

Mr. President, I submit for the RECORD the two articles to which I have made reference.

The articles follow:

[From the Atlanta Constitution, Apr. 2, 1981]

PEANUT "LORDS" GO TO THE BARRICADES

(By Henry Eason)

WASHINGTON.—For decades in the South, rural mothers have shrewdly advised their daughters to marry a man with a peanut allotment. "Like gold in the bank," the saying goes.

But the very system that created a special class of peanut farmers is under heavy attack by free market advocates in the Reagan administration, by peanut butter and candy manufacturers, and by small peanut farmers who pay dearly to rent from allotment owners.

The "allotment lords," as critics of the federally sheltered peanut-growing industry describe those who own the only land on which peanuts may be grown, have long walked tall in peanut-growing states like Georgia, Florida, the Carolinas, Texas, Virginia, and Oklahoma.

In years of favorable weather, peanuts have been one of the richest cash crops an American farmer can raise, with their proliferating use as a food supplement to meat and their expanding world market.

In response to the collapse of so many farms during the Depression, the federal government acted in many ways to bolster American agriculture. One of the major programs protected those who farmed certain crops by designating that those crops could be grown only on specifically allotted acres.

More than a million acres of land were earmarked as peanut-growing land. Those who owned the land were given acreage allotments—10 acres to this farmer, 100 acres to that one and so on.

But as the original allotment owners have died or quit farming since they were granted their allotments in the 1930s, increasingly peanuts have been grown by farmers who have had to lease allotment acreage from original peanut farmers.

Recent Agriculture Department estimates show that 70 percent of all peanut farmers are renting the land they use to raise peanuts at $300 to $400 an acre yearly. That is as much as four times more than it costs to rent an acre of land to grow other crops.

A substantial number of allotment holders also raise peanuts, and they reap much larger net profits than the unendowed peanut land renters, because they can deduct the hefty land rents from their overall cost of production.

It is a system described as "feudalistic" and "monopolistic," and in Congress this year, it will come under greater assault than ever before, with predictions that it will fare worse than in 1977, when the "peanut program" was reinstated by only a three-vote margin.

This week, Agriculture Secretary John Block angered members of Congress from peanut-raising states by proposing that the allotment system be abolished, beginning in January 1982.

"We would like to see the United States become more competitive in the production and export of peanuts," open-market booster Block said, he further expressed concern that the program actually worked against most peanut growers, and he described it as needlessly complicated.

Arguing the case of the peanut-allotment renter before a congressional peanut hearing several weeks ago, farmer Gene Miller, from Lumpkin, Ga., pleaded for the abolition of allotments, production quotas and government pricing and called for the "free float" of peanuts on the national and world market.

"The farmer who planted the seed, prayed for rain, labored beyond belief, paid the production costs (including the excessive annual rent for allotment acres) . . . fought the onslaught of insects as well as fungus and mold, sweated out multitudinous losses that can occur at harvesting and finally struggled to market with his crop, is the forgotten man in the peanut program," Miller said.

"In Georgia," Miller continued, "certain remnants of the feudal system remain in effect, wherein middlemen in the peanut business have gained control of many of the allotment acres in an area. They then dole out these allotments to the dirt farmer, charging him through the nose, and implying rather strongly that he better bring his harvested crop back to the dispenser of alloted acres.

"Of course, along with such feudal systems comes the sale of fertilizer and lime, farm supplies, seeds and other agri-supply items, all tied in to the allotment provider," Miller said.

"It is indeed a feudalistic land system. It has been referred to as a government-anointed monopoly," Peanut Butter and Nut Processors spokesman James Kalback recently testified before the Senate Agriculture Committee.

Critics maintain that the major peanut lobbies, whose testimony does not usually highlight the allotment-cost problem, are strongly influenced by allotment owners and do not represent those who must rent their land.

Emmett Reynolds, a leader in the National Peanut Growers Group, strongly defended the program before the Senate Agriculture Committee, but his testimony did not call attention to the inflationary aspects of the allotment rental system, a major concern of small landless farmers.

Arguing the case of the 70 percent of peanut farmers who must rent land, National Confectioners Association spokesman James Mack, whose group wants lower peanut prices, said the big peanut interests have intimidated the renting farmer.

"These actual farmers, in contrast to the

allotment owners, realize that if they should come to Congress and complain about the allotment system and that if (the system) were not repealed, it is likely that they would not be able to rent allotments next year," Mack contended.

Rep. Charles Hatcher, D-Ga., whose southwest Georgia district grows more peanuts than any other area in the nation, has vowed to fight abolition of the allotment system to the bitter end.

Hatcher acknowledged in an interview, "You may have trouble defending it (the allotment system) logically, but, as I say, this is based on experience—not necessarily logic."

Hatcher maintained that the protective allotment and poundage quota system has become so interwoven in the whole American method of raising peanuts that abolishing it would be severely disruptive.

Furthermore, he asserted, if the federal peanut program is scrapped, you're going to have large corporate farmers, large individual farmers replacing the thousands of small farmers who have an allotment."

Secretary Block argued that peanut farmers should be able to grow their crop on any land they wish, and indicated that the result would be far greater production at less cost, based on the free enterprise theory.

Hatcher countered, "I told (Block) it's a shame to disrupt—my parochial interest is southwest Georgia—it's a shame to disrupt the economy down there simply to meet some philosophical need he has.

Rep. Bo Ginn, D-Ga., whose brother and other relatives are allotment owners and raise, store and market peanuts, also indicated that he will fight to preserve the allotment system.

Ginn acknowledged that peanuts are "a protected crop," adding that there are "problems with it" and that, "there is some cost to the taxpayer." He also conceded that allotment owners have an advantage over renters.

But he predicted that the short-order abolition of the allotment system would mean a "calamity" for the peanut industry for the next several years, coming right on the heels of the horrendous 1980 drought that laid heavy debt burdens on the common farmer.

He acknowledged that "land rents have become exorbitant" but stressed "I'm just afraid that if we take all controls off and everybody grows peanuts that wants to grow them, there will be such a tremendous amount of growth so rapidly that it will be a calamitous situation."

ALLOTMENTS ARE COSTLY PART OF ANNUAL GAMBLE OF GEORGIA PEANUT FARMING

(By Robin Schatz)

DAMASCUS.—A farmer is always part gambler, betting his own sweat and money against the vagaries of the weather and the marketplace. And this year T. C. Hunt and his two sons are gambling big on their peanut crop.

By the second week in April—at least two weeks earlier than usual—Hunt and his sons, Terry and Gary, will start planting their 400 acres of peanuts, praying that a late cold spell won't hit the rich peanut belt of southwest Georgia and rot the seed peanuts in the ground. At $75 an acre for seed peanuts, the stakes are high.

But if Early County, the top peanut-producing county in Georgia, is favored with mild nighttime temperatures after planting and the men tote and lay irrigation pipes in marathon 18-hour days to combat the scorching summer heat, then the crop may survive the critical 50–100 day period. The Hunts just might be lucky and get their crop to market by Sept. 1, early enough to command the high prices that have resulted from last year's disastrous drought and subsequent peanut shortage.

The Hunts were fortunate last summer, having planted their crop late, and were able to contract their peanuts at $700 a ton, while many other farmers were committed to previous contracts at the government support price of $455 a ton.

Nevertheless, the Hunts only managed to break even last year, as has been the case for the past four years. Indeed the limited success has been enough to make 28-year old Gary Hunt, a graduate in agriculture from the University of Georgia, wonder if he made the right decision when he entered the family farming business.

The costs of fertilizer, diesel fuel, chemicals and land rental fees all keep going up, but the bank notes don't go away. In 1979, senior Hunt paid out $104,000 in loan interest payments and for land rental. A John Deere tractor he bought for $40,000 last year now sells for $52,900. The family uses about 700 pounds of fertilizer a day, and it's now running $212 a ton.

"We've got all kinds of insects here, but none that will go into the bank and eat up them notes," T. C. Hunt joked.

An old, sagging white farmhouse, which belonged to Hunt's grandfather and is reduced now to a storage building, stands across the street from Hunt's brick ranch house. The old building is a testament to the family's long farming tradition.

Hunt, 50, has always lived in the quiet farm community of Damascus, except during three years of service in the Korean War. His wife Roberta also grew up on a Damascus farm.

While Gary and Terry Hunt, who are both married to teachers, have joined their father on the farm, a third son chose to work for a telephone company. The couple also has two daughters, one who is married and working in Albany, and another who is a 10th-grader.

The Hunts, like most of the farmers in Early County, are leery of the government's plans to alter or abolish farm programs, particularly those pertaining to peanuts. The federal government provides price supports for peanuts and limits the amount of land on which they can be farmed.

Since the "allotment" system was established in 1938 by President Franklin D. Roosevelt, the right to grow peanuts has been controlled by those who hold the "allotments," but in many cases those allotments have passed on to a third generation—descendents who may no longer farm the land. Nationally, 70 percent of all peanut allotments are rented to farmers, usually at premium prices.

The Hunts own about 300 acres of land, including about 72 acres of peanut allotments, but they supplement that with about 700 acres they rent from other landowners in the area to grow corn, soybeans, wheat as well as peanuts. It's hard to find land for sale, particularly with a peanut allotment on it, and even when the land is available, most farmers can't afford the interest rates to buy it, Hunt said.

While the Hunts pay about $25 to $30 an acre to rent general cropland, peanut- allotment land commands as much as $200 or $250 an acre in Early County for non-irrigated property, and as much as $275 for irrigated land. Last year, Hunt had to negotiate rentals with 13 different landlords, and each year the competition for the land, and particularly, that with peanut allotments, is repeated. In recent years, farmers from neighboring counties have been coming into Early and bidding high prices for allotment land.

But peanut allotments are a sensitive topic in peanut country. Few farmers criticize the program, despite the fact they must pay top dollar to rent that land.

On a mild spring day, as clouds of fertilizer rise around the tractors in a cornfield which has already been seeded, Hunt and his two sons contemplate the future for peanut farming. An old cocker spaniel, looking the part of a faithful agricultural mascot with a faded blue bandana around its neck, stays close to the men.

Hunt's family has always farmed peanuts. But for the family to stay with peanuts, Hunt said, the government must raise its price support—now only $455 a ton, less than the cost to produce the peanuts. "We're, hoping to stay in the peanut business, provided they raise the price," said Hunt.

Despite the high costs of renting land, Hunt said the allotment program should not be abolished.

Hunt said he can't blame the landowners for charging so much for peanut allotments. "I probably would do the same thing," he said.

"We don't mind paying the rent if we can get a good price per ton. If the peanut program is turned loose everyone is going to be growing peanuts," he said.

Only a few miles from Hunt's farmhouse, Early County Commissioner Liston Radney has a flower shop he runs as a hobby. But he receives a major share of his income from renting out his 3,500 acres of farmland, including 400 acres of peanut allotments, some of which he inherited and the rest which he bought up over the years.

Radney had a sharecropping arrangement on his land for years, forming partnerships with farmers who worked the land for him and operating his own peanut dryers. But he started renting out the allotments about 11 years ago for $75 an acre. Now he receives $175 per acre or 25 percent of the gross income, whichever is more.

In Radney's opinion, the high price landowners charge for the peanut allotments is fair. "The landowner doesn't set the price. The farmer sets the price," Radney said. "If I'm offered $150 an acre, and somebody offers more, naturally I'm going to let the man have it who will pay me the most."

If the system is abolished, Radney said, "it will shoot the hell out of the economy of southwest Georgia."

But another peanut farmer, Fletcher Thompson, who also owns a Pontiac dealership in nearby Blakely, questions whether doing away with the allotment system would really hurt the peanut business.

"I think it would help as many as it would hurt," he said.

The small farmer, said Thompson can't produce enough peanuts on a small plot of land to break even, and therefore is compelled to rent more allotment land.

(NOTE: 400 acres x $175 per acre annual allotment rental equals $70,000 per year.) ●

TEMPORARY EXCLUSION OF FOREIGN FISHING SUPPORT VESSELS FROM INTERNAL WATERS OF ALASKA

Mr. STEVENS. Mr. President, at the desk is a bill I introduced last Thursday, which I asked be held. I ask unanimous consent that the Senate proceed to the consideration of the bill at this time.

The PRESIDING OFFICER. The bill will be stated by title.

The assistant legislative clerk read as follows:

A bill (S. 1337) to provide for the temporary exclusion of foreign fishing support vessels from the internal waters of Alaska.

The PRESIDING OFFICER. Is there objection to the present consideration of the bill?

There being no objection, the Senate proceeded to consider the bill.

Mr. STEVENS. Mr. President, this bill will relieve an emergency situation affecting the vast fishing resources in my home State of Alaska.

Alaska's processor preference statute

was declared unconstitutional in the Federal District Court of Anchorage several weeks ago. The court found exclusive State regulation of foreign processing vessels an overreach of State power in foreign commerce. Invalidation of the longstanding Alaska statute has left waters landward of the baseline free of any regulation for foreign processing vessels. While I would prefer to have regulation of Alaska's internal waters within the State's exclusive province, the recent court action requires that we act quickly to include limited Federal participation in the process.

The bill which I offer today provides a brief period of Federal involvement in this important State matter that will allow the State to continue its role as primary regulator of its internal waters. The bill keeps the decision within the office of the Governor of Alaska. That decision is then reviewed by the Secretary of Commerce to insure that no prejudicial regulation of foreign nations is effected by the Governor's decision.

We intend the Secretary's review to be limited to the question of equal treatment of foreign nations; and because of the need for a timely decision, for the Secretary to delegate his decision to the Alaska director's office of the National Marine Fisheries Service. We intend this approval process to fall under expedited review, and that it not be considered a formal rulemaking so that regulatory review proceedings are not triggered.

This bill follows enforcement provisions of the Magnuson Fishery Conservation and Management Act, but is not in any other manner connected with that act.

Mr. President, I have stated that I requested that this measure be held at the desk so that we may effect expedited review of it. The bill has been cleared by the distinguished chairman and ranking minority member of the Commerce Committee for floor consideration.

Mr. President, I ask unanimous consent that the name of the distinguished chairman of the Committee on Commerce, the Senator from Oregon (Mr. PACKWOOD), be added as a cosponsor of the bill.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. STEVENS. Mr. President, I yield to my colleague from Alaska.

Mr. MURKOWSKI. Mr. President, today the Senate is considering S. 1337, a bill introduced by Senator STEVENS and myself to provide for the temporary exclusion of foreign fishing support vessels from the internal waters of Alaska. This legislation will provide temporary relief to a difficult situation occurring at this moment in my State of Alaska. I ask that the Senate act expeditiously on this measure given the urgency of the commercial fishing activity in Alaska, currently ongoing.

Mr. President, this legislation simply addresses the issue of processing capacity for Alaskan fishery resources. Currently in Alaska sufficient domestic processing capacity exists to handle the expected level of harvested fish. The need for foreign processing assistance is unnecessary for the year 1981. This bill is necessary to insure that the domestic processing industry is able to fully utilize the entire Alaskan fishery resources. In this manner jobs for Alaskans and the sound tax base provided by the industry will be preserved.

Mr. President, this legislation reinforces the Governor of Alaska's flexibility of controlling access to the State's internal waters. If, at some point, additional processing capacity is necessary, the Governor of Alaska, under this bill, will have the authority to invite foreign processors into Alaska. The Governor's office has used this flexibility wisely in the past and I see no reason to believe that it would not be used wisely in the future pursuant to this bill.

Mr. President, I emphasize that this bill in no way will affect the Magnuson Fishery Conservation and Management Act of 1976. The only similarity with that landmark legislation is the penalty section of S. 1337. I do not intend, in introducing this bill, to have the Department of Commerce's role in the Alaska seafood industry altered in any way. The Secretary of Commerce will be given the authority to approve the Governor of Alaska's decision, should the Governor deem it necessary for foreign intervention. This bill should not be interpreted as a fishery ruling alteration to the Department of Commerce or any other portion of the executive branch.

Mr. PACKWOOD. Mr. President, the legislation which we are introducing today addresses a situation which, if allowed to continue unchecked, could dramatically affect the U.S. seafood processing industry, and lead to severe reduction in employment, capital investment, and export benefits provided by that vital industry nationwide. While the specific geographical areas of concern at this moment are the inland waters of Alaska, there is no question that the issue at hand and the Federal response thereto will have an immediate and direct impact on the entire U.S. seafood industry from New England to the south Atlantic States, the Gulf of Mexico, and the entire west coast. We feel strongly, therefore, that a prompt but firm Federal response is warranted, particularly in view of the rapidly approaching salmon season.

A number of foreign vessels have recently been purchasing herring from fishermen in Alaskan inland waters and depriving American seafood processors of product which the U.S. processors clearly have the capacity to process. The legislation we are introducing today will prevent a reoccurrence of this situation during the upcoming salmon and crab seasons.

This situation is possible due to the fact that the Magnuson Fishery Conservation and Management Act of 1976, which was designed to assist both the U.S. harvesting and processing industries, has been interpreted in such a way that neither Federal or State control is recognized over fishing activities in inland waters. Until now, States have attempted to exercise control over these waters which lie inside the territorial sea.

In the case of Alaska, the State anticipated that a large herring run would exceed the domestic processing capacity. Thus the State allowed a group of fishermen to contract with a Japanese cooperative to deliver fish directly to Japanese vessels in the inland waters. This herring would simply be frozen on board, and transported back to Japan.

Several months later, as the herring season drew closer, the State reassessed the desirability of this proposal in view of increased American processor capacity and new biological data regarding the anticipated size of the herring run. Assured that the U.S. processors could handle the harvest, Alaska withdrew permission for the Japanese to enter inland waters to participate in this project. This action was challenged in court, where the right of the State to regulate foreign harvesting and processing in the inland waters was questioned.

The Federal District Court ruled that State regulation of foreign processing and other fishing support activities in the inland waters is in violation of the U.S. Constitution. As a result of that decision, and an informal opinion of the National Oceanic and Atmospheric Administration that the FCMA does not assert Federal authority over those inland waters, it now appears that those inland waters are not subject to any U.S. control with regards to processing and other fishing support activities. Neither State or Federal jurisdiction is recognized.

This is an absolutely unacceptable situation. It was certainly not congressional intent to create a "no-mans land" in these inland waters. I believe the NOAA opinion in question is contrary to the legislative intent of Congress when we enacted the Fishery Conservation and Management Act in 1976, and again when we amended the act in 1978 and 1980. Our intent has been and continues to be to create two legal regimes. First, the 197-mile U.S. fishery conservation zone in which foreign harvesters and processors are allowed to enter only if the U.S. industry does not have sufficient capacity to take advantage of specific resources. Foreign vessels must apply for and receive permits and agree to abide by U.S. quotas and other laws and regulations set by the regional fishery management councils and the Federal Government. The second regime exists in waters of State jurisdiction including the 3-mile territorial sea and inland water. In this area, foreign harvesting, processing, or fishing support activities at sea is prohibited.

The immediate impact of this legislation will be to assure that any harvesting, processing, and fishing support activities by foreign vessels in State waters, including those inside the base line, shall not take place without the consent of both the State of Alaska and the Secretary of Commerce.

However, further analysis of this situation is clearly warranted. It is our commitment to address the issue of flexibility in State or Federal regulation of foreign fishery activities in all waters within 200 miles of our shores. We will investigate factors which allow foreign ventures to offer substantially higher prices to American fishermen that the American shore-based processors can offer, as well as the dependability of those foreign markets for the U.S. fishermen.

In the meantime, it is imperative that both Congress and the administration send a strong message to foreign nations that any foreign fishing, harvesting, or

fishing support activities in our waters will be subject to U.S. fisheries jurisdiction and will be regulated in the best interests of the U.S. fishing industry. With the upcoming salmon season in mind, foreign nations should understand that processing and other fishing support activities by foreign nations will not be immune from State or Federal oversight.

At our request, the U.S. Coast Guard has stepped up its surveillance and enforcement of foreign processing and fishing activities. The Department of State has informed the Japanese and other governments of congressional concern. The Department of Commerce is reviewing its policy in this area at the highest levels, and with the introduction of this legislation it is our expectation that policies and opinions will be rapidly reassessed.

This initiative enjoys bipartisan support in the House and Senate. As evidence of this, I ask that unanimous consent for four letters expressing the need for prompt Federal action be printed in the RECORD.

There being no objection, the letters were ordered to be printed in the RECORD, as follows:

U.S. SENATE,
COMMITTEE ON COMMERCE,
SCIENCE AND TRANSPORTATION,
Washington, D.C., May 7, 1981.

Hon. MALCOLM BALDRIGE,
Secretary, Department of Commerce,
Washington, D.C.

DEAR MAC: Recently I have become aware of a highly objectionable situation which, if allowed to continue, could dramatically effect the U.S. seafood processing industry, and lead to severe reduction in employment, capital investment and export benefits provided by that vital industry.

A number of Japanese vessels have entered not only the U.S. 200-mile Zone, but the Territorial Sea and inland waters of the State of Alaska. They are currently purchasing fish from fishermen in those inland waters and depriving American seafood processors of product for which they easily have the capacity to process. As an original sponsor of the Fishery Conservation and Management Act of 1976, I can firmly assure you that this activity by foreign vessels is absolutely contrary to the legislative intent of Congress when we enacted the FCMA in 1976, and again when we amended the Act in 1978 and 1980. Our intent has been and continues to be to create two legal regimes. First, the 197-mile U.S. economic zone, in which foreign harvesters and processors are allowed to enter only if the U.S. industry does not have sufficient capacity to take advantage of specific resources. Foreign vessels must apply for and receive permits and agree to abide by U.S. quotas and other laws and regulations set by the Regional Fishery Management Councils and the Federal government. The second regime exists in the Territorial Sea and inland waters of the state. In this area, foreign harvesting and processing is absolutely prohibited. With regard to both regimes, it was our intention that the term "at sea" means *any* water, including any waters within the baseline, and internal waters.

I strongly urge you to move quickly to conform your policies and opinions to the FCMA and Congressional legislative intent as expressed in this letter. As Chairman of the Senate Committee on Commerce, Science and Transportation Committee, I will move very rapidly to introduce legislation to amend the FCMA to reaffirm our original legislative intent. I have been informed that similar initiatives are being prepared in the House of Representatives. I have requested the Coast Guard to exercise its surveillance and enforcement powers, and the Department of State to inform the Japanese government of Congressional concern. I congratulate you, Joe Wright and Sherman Unger, on your attention to this urgent matter and urge continued concerted action to apply which will result in the prompt departure of the offending vessels from U.S. waters. You have my firm support for such action.

Cordially,

BOB PACKWOOD.

U.S. SENATE,
COMMITTEE ON COMMERCE, SCIENCE,
AND TRANSPORTATION,
Washington, D.C., May 12, 1981.

Hon. MALCOLM BALDRIGE,
Secretary, Department of Commerce,
Washington, D.C.

DEAR MAC: Recently we became aware of a volatile situation regarding foreign ships purchasing herring directly from U.S. fishermen and thus depriving U.S. shore-based processors of product which they easily have the capacity to handle.

The impact of this situation is beginning to be felt around the country, as processors on all coasts are becoming wary of unforeseen and unregulated competition from foreign countries even within sight of the American on-shore processing plants. The need to protect our processors, however, must be balanced by the ability to retain flexibility to maximize American utilization of fish within the 200-mile fishery conservation zone. Because the Magnuson Fishery Conservation Management Act does not presently provide this flexibility, it will be necessary to give the Act careful legislative review.

We are agreed, however, that a strong message must be sent to all foreign countries, especially in regards to the salmon season. We do not want any competing foreign vessels in the inland waters, territorial seas, or fishery conservation zone during the upcoming salmon season and are requesting you to issue whatever opinions and policy statements are necessary to assure that those ships do not enter our waters for purposes of harvesting, processing or activities in support of fishing.

We think that a strong statement from your office to be delivered both by the Commerce and State Departments to all interested foreign nations will have the desired effect. We urge you to move quickly to provide notice to any and all foreign countries that unpermitted and unregulated boats will not be tolerated in U.S. waters.

Cordially,

BOB PACKWOOD,
TED STEVENS,
FRANK MURKOWSKI.

U.S. HOUSE OF REPRESENTATIVES,
COMMITTEE ON MERCHANT MARINE
AND FISHERIES,
Washington, D.C., May 13, 1981.

Hon. MALCOLM BALDRIGE,
Secretary, Department of Commerce,
Washington, D.C.

DEAR MR. SECRETARY: We recently learned of the presence of Japanese fishing vessels receiving United States harvested fish from United States vessels within waters of the State of Alaska. These vessels are then transporting the fish through the territorial sea and the U.S. Fishery Conservation Zone to foreign ports. We consider this activity contrary to the legislative intent of Congress under the FCMA. Congress enacted the FCMA with the clear intent of managing U.S. fish stocks in a manner that would promote the full development of the U.S. fish harvesting and processing industries. Thus, it was provided in section 307 of the FCMA that:

It is unlawful—

(2) for any vessel other than a vessel of the United States, and for the owner or operator of any vessel other than any vessel of the United States, to engage in fishing—

(A) Within the boundaries of any state; or

(B) Within the Fishery Conservation Zone, or for any anadromous species or Continental Shelf fishery resources beyond such zone, unless such fishing is authorized, and conducted in accordance with, a valid and applicable permit.

This commitment was reaffirmed with the passage, last year, of the American Fisheries Promotion Act. Clearly, we never contemplated that the FCMA would be applied in a manner that would leave an area extending from the coastline to the baseline of the territorial sea as one within which the FCMA prohibition on foreign fishing would not apply.

In addressing this issue, the first question is what constitutes fishing under the FCMA. Section 3(10) of the FCMA defines "fishing" as:

(A) The catching, taking, or harvesting of fish;

(B) The attempted catching, taking or harvesting of fish;

(C) Any other activity which can reasonably be expected to result in the catching, taking or harvesting of fish; or

(D) Any operations at sea in support of, or in preparation for, any activity described in subparagraphs (A) through (C).

The Secretary of Commerce has promulgated regulations defining "any operations at sea in support of" the activities described in paragraphs (A) through (C) to include the processing, including freezing, of fish or fish products and the transferring or transporting of fish or fish products.

There is no question that the foreign vessels receiving fish from U.S. vessels at sea are engaged in "fishing". The next logical question is what "at sea" includes. To interpret the language of the statute to preclude its application to internal waters landward of the baseline of the territorial sea is obviously inconsistent with the intent of Congress to foster the development of the U.S. fishing and processing industry. The prohibition on foreign fishing "within the boundaries of any state" clearly applies "seaward of the coastline of the United States" (H. Rep. 94–445, p. 72) to the outer boundary of the Fishery Conservation Zone. The internal waters of a state are "seaward of the coastline". Therefore, foreign fishing operations in internal waters are prohibited.

We believe it is essential that you conform the Department's policies to the intent of Congress in this matter and that you advise the Department of State and the Coast Guard of this policy at the earliest possible date.

Thank you for your attention to this matter.

Sincerely,

JOHN B. BREAUX,
Chairman, Subcommittee on Fisheries and Wildlife Conservation and the Environment.

EDWIN B. FORSYTHE,
Ranking Minority Member, Subcommittee on Fisheries and Wildlife Conservation and the Environment.

CONGRESS OF THE UNITED STATES,
HOUSE OF REPRESENTATIVES,
Washington, D.C., May 15, 1981.

Hon. MALCOLM BALDRIGE,
Secretary of Commerce, U.S. Department of Commerce, Washington, D.C.

DEAR SECRETARY BALDRIGE: During the past two weeks you and your staff have been approached by representatives of the U.S. fishing industry regarding a rather unique situation that is occurring in the Alaskan herring fishery. I would appreciate your consideration of some of the problems involved and a possible solution.

As you know, the State of Alaska has maintained for some time the authority to selectively allow the entrance of foreign sea-

food processing vessels into the State's internal waters. This authority has been used when domestic seafood processors were unable or unwilling to process the fish harvested by U.S. fishermen in any particular season.

Prior to this year's herring season, a group of Alaskan fishermen petitioned the Alaska Board of Fisheries to allow the entrance of a number of Japanese vessels to receive gillnet harvested herring. Their reason for doing so was the failure of U.S. processors to provide a market for those fish in the 1980 season. The Board at first granted that request and then, at a subsequent meeting, reversed its decision. As a result, the fishermen asked for judicial relief which was granted when a Federal judge determined that the State had no power to allow selective entrance of foreign vessels for economic reasons.

The U.S. processors then suggested that Section 307 of the Magnuson Fisheries Conservation and Management Act prohibited the entrance of foreign processing vessels. However, Department of Commerce definitions of the term "fishing" only include processing when such operations are conducted "at sea," and this latter term did not include State internal waters.

You are now being asked to redefine the term "at sea" to indicate that it means "not on land." If this is done, further entrance of foreign processors will be disallowed pending future modifications of the MFCMA. While this would obviously benefit the U.S. processing industry, and as a result would be of some benefit to U.S. fishermen who rely on those processors, it would prevent the State of Alaska from exercising any flexibility in resource management and would cause fishermen to be locked in to one set of processors. Further, the Congress clearly included the term "at sea" in the definition section of the MFCMA and it should be left to the Congress to appropriately modify the law.

I would suggest instead that the following course of action be taken. It is my understanding that the Federal Government has sufficient power under existing law to expel foreign nationals if the need arises. Given that the herring fishery is nearly completed, I see no reason to use this power at this time. However, I do feel that the Department, along with the Department of State, should notify foreign nations indicating a desire to bring their vessels into internal waters that the law will be used to have their nationals expelled. This will provide a safety factor for U.S. processors and fishermen and will give the Congress sufficient time to find a permanent solution to the problem which will satisfy the various needs identified.

I would urge your consideration and adoption of this positive solution to a complex problem. Further, I can assure you that I will bring all of my efforts to bear on finding a permanent solution that takes into account the needs of processors, fishermen, and the State of Alaska.

The PRESIDING OFFICER. The bill is open to amendment. If there be no amendment to be proposed, the question is on the engrossment and third reading of the bill.

The bill was ordered to be engrossed for a third reading, was read the third time, and passed, as follows:

S. 1337

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled,

PROHIBITION

SECTION 1. During 1981, no vessel, other than a vessel of the United States, may engage in processing or fishing support activities in internal waters of the State of Alaska, unless—

(a) the Governor of Alaska determines the extent to which United States fish processors will not have adequate processing capacity or will not utilize such capacity, in specified internal waters of Alaska and determines the period of time during which United States processors lack such capacity; and

(b) the Secretary of Commerce concurs with the Governor's determination, and authorizes the transfer of fish to foreign vessels in the internal waters of the State of Alaska.

DEFINITIONS

SEC. 2. (a) The term "internal waters" means waters landward of the baseline from which the territorial sea is measured.

(b) The term "United States fish processors" means facilities located within the United States for, and vessels of the United States used or equipped for, the processing of fish for commercial use or consumption.

(c) The term "vessel of the United States" means any vessel documented under the laws of the United States or registered under the laws of any State.

PENALTIES

SEC. 3. Any foreign vessel, and any owner or operator of any foreign vessel, that engages in processing or fish support activities while such foreign vessel is in the internal waters of the State of Alaska, without authorization by the Secretary of Commerce pursuant to section 1, shall be subject to the following:

(a) A civil penalty, not to exceed $25,000 for each violation; and

(b) Forfeiture to the United States of any fishing vessel (including its fishing gear, furniture, appurtenances, stores, and cargo) used, and any fish taken or retained, in connection with such violation.

The procedures, presumptions, and jurisdictions specified in sections 1858 and 1860 of title 16, United States Code, shall apply to any civil penalties assessed or forfeitures carried out under this Act.

Mr. STEVENS. Mr. President, I move to reconsider the vote by which the bill was passed.

Mr. MURKOWSKI. I move to lay that motion on the table.

The motion to lay on the table was agreed to.

TIME AGREEMENT—S. 921, VETERANS' HEALTH CARE

Mr. STEVENS. Mr. President, we have a time agreement on Calendar No. 113, S. 921, the veterans' health care bill.

I ask unanimous consent that on Monday, June 15, at 2 p.m., the Senate proceed to the consideration of Calendar No. 113, S. 921, the veterans' health care bill, under the following time agreement:

Two hours on the bill, equally divided between the chairman of the Veterans' Affairs Committee and the ranking minority member.

One hour, equally divided, on amendments in the first degree; 30 minutes, equally divided, on amendments in the second degree; 20 minutes, equally divided on any debatable motion, appeals, or points of order, if such are submitted to the Senate.

Also, that the agreement be in the usual form, with the following exceptions:

One and a half hours on the Cranston printed amendment No. 58, extending GI eligibility for certain Vietnam veterans, to be equally divided.

One and a half hours on the Cranston printed amendment No. 59, dealing with agent orange, to be equally divided.

Thirty minutes on the Proxmire printed amendment No. 53, dealing with GI life insurance.

Provided, that all amendments be called up and debated on Monday, June 15, with the exception of the Proxmire amendment identified above; that any rollcall votes ordered in connection with the veterans bill occur back to back, to begin at noon on Tuesday, June 16.

Provided, further, that the Proxmire amendment be debated on Tuesday, June 16, prior to the noon rollcall votes, if any are ordered.

The PRESIDING OFFICER. Is there objection? The Chair hears none, and it is so ordered.

ORDER FOR STAR PRINT—REPORT NO. 97–94

Mr. STEVENS. Mr. President, I ask unanimous consent that there be a star print of report number 97–94 in order to correct Government Printing Office errors.

The PRESIDING OFFICER. Without objection, it is so ordered.

ORDER TO PRINT "A SENATE VIEW: LATIN AMERICA AND THE REAGAN ADMINISTRATION" AS A SENATE DOCUMENT

Mr. STEVENS. Mr. President, during the period of February 7–15, 1981, Senator THAD COCHRAN led a delegation that included Senators PELL, PRESSLER, WILLIAMS, and BURDICK to Brazil, Argentina, Peru, and Panama. Senator COCHRAN and the other members of the delegation have written a report of the trip that reflects well the constructive purpose of their travel. I ask unanimous consent that the report entitled. "A Senate View: Latin America and the Reagan Administration," be printed as a Senate document.

The PRESIDING OFFICER. Without objection, it is so ordered.

EXECUTIVE SESSION

Mr. STEVENS. Mr. President, I ask unanimous consent that the Senate go into executive session to consider nominations on the Executive Calendar under "New Reports," including those nominations placed on the Secretary's desk.

There being no objection, the Senate proceeded to the consideration of executive business.

The PRESIDING OFFICER. The nominations will be stated.

DEPARTMENT OF JUSTICE

The assistant legislative clerk read the nomination of Robert A. McConnell, of Arizona, to be an Assistant Attorney General.

Mr. THURMOND. Mr. President I am pleased today to recommend Mr. Robert A. McConnell for the position of Assist-

ant Attorney General for the Office of Legislative Affairs in the Department of Justice.

After earning his law degree at Arizona State University in 1970, Mr. McConnell served in Washington as Legislative Assistant for Congressman John J. Rhodes. Upon returning to Arizona in 1973, Mr. McConnell continued to prove himself to be a dedicated and accomplished lawyer. For 2 years he practiced law with the firm of Sparks, Siler, and McConnell. In 1975, he went into private practice and then in 1978 became a partner in the firm of Steiger, Helm, Kyle, and McConnell.

Mr. McConnell is well known as a man of integrity and courage and I am confident he will continue to use his abilities in a dedicated and skillful manner. I therefore urge my colleagues to support the nomination of Mr. Robert A. McConnell for the position of Assistant Attorney General for the Office of Legislative Affairs in the Department of Justice.

The PRESIDING OFFICER. Without objection, the nomination is considered and confirmed.

The assistant legislative clerk read the nomination of Francis Anthony Keating II, of Oklahoma, to be U.S. attorney for the northern district of Oklahoma.

The PRESIDING OFFICER. Without objection, the nomination is considered and confirmed.

The assistant legislative clerk read the nomination of David L. Russell, of Oklahoma, to be U.S. attorney for the western district of Oklahoma.

The PRESIDING OFFICER. Without objection, the nomination is considered and confirmed.

DEPARTMENT OF STATE

The assistant legislative clerk read the nomination of Carleton S. Coon, Jr., of New Hampshire, to be Ambassador Extraordinary and Plenipotentiary of the United States of America to the Kingdom of Nepal.

The PRESIDING OFFICER. Without objection, the nomination is considered and confirmed.

The assistant legislative clerk read the nomination of Ronald DeWayne Palmer, of Maryland, to be Ambassador Extraordinary and Plenipotentiary of the United States of America to Malaysia.

(By request of Mr. STEVENS, the following statement was ordered to be printed in the RECORD:)

● Mr. HAYAKAWA. Mr. President, I chaired the committee's hearing on the President's nomination of Mr. Palmer to be Ambassador to Malaysia on June 1.

I questioned Mr. Palmer extensively. His responses demonstrated his keen perception and profound knowledge of the issues confronting the Malaysian Government. He also demonstrated his broad grasp of U.S. interests not only in Malaysia but also in the Southeast Asian area as a whole.

Mr. Palmer has a distinguished record of service to our Government both in Washington and abroad.

He has served in our Embassies in Jakarta, Kuala Lumpur, and Manila, in addition to service in Copenhagen.

In Washington, he has served as an intelligence specialist; in the Executive Secretariat of the Department; as the Deputy Director for Philippine Affairs; and as the senior officer in charge of career development for the Foreign Service.

He performed in an outstanding fashion as our Ambassador to Togo for 2 years.

In addition, he is fluent in the Malaysian language.

The administration has asked informally that we expedite his confirmation in order that he may be on the scene by the time of Secretary Haig's visit with ASEAN ministers in Manila later this month. I urge a favorable vote on the confirmation of Ronald D. Palmer.●

The PRESIDING OFFICER. Without objection, the nomination is considered and confirmed.

OVERSEAS PRIVATE INVESTMENT CORPORATION

The assistant legislative clerk read the nomination of Craig A. Nalen, of Florida, to be president of the Overseas Private Investment Corporation.

The PRESIDING OFFICER. Without objection, the nomination is considered and confirmed.

COMMODITY CREDIT CORPORATION

The assistant legislative clerk read the nominations of Richard E. Lyng of Virginia, Frank W. Naylor, Jr., of California, and Mary Claiborne Jarratt, of Virginia, to be members of the Board of Directors of the Commodity Credit Corporation.

The PRESIDING OFFICER. Without objection, the nominations are considered and confirmed en bloc.

NATIONAL OCEANIC AND ATMOSPHERIC ADMINISTRATION

The assistant legislative clerk read the nomination of John V. Byrne, of Oregon, to be Administrator of the National Oceanic and Atmospheric Administration.

The PRESIDING OFFICER. Without objection, the nomination is considered and confirmed.

DEPARTMENT OF COMMERCE

The assistant legislative clerk read the nomination of Bernard J. Wunder, Jr., of Virginia, to be Assistant Secretary of Commerce for Communications and Information.

The PRESIDING OFFICER. Without objection, the nomination is considered and confirmed.

NOMINATIONS PLACED ON THE SECRETARY'S DESK

The assistant legislative clerk proceeded to read sundry nominations in the Department of State placed on the Secretary's desk.

Mr. STEVENS. Mr. President, I ask unanimous consent that the nominations placed on the Secretary's desk be considered and confirmed en bloc.

The PRESIDING OFFICER. Without objection, the nominations are considered and confirmed en bloc.

Mr. STEVENS. Mr. President, I ask unanimous consent that it be in order to reconsider the vote by which these nominations were confirmed en bloc.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. STEVENS. Mr. President, I move to reconsider the vote by which these nominations were confirmed en bloc.

Mr. ROBERT C. BYRD. Mr. President, I move to lay that motion on the table.

The motion to lay on the table was agreed to.

LEGISLATIVE SESSION

Mr. STEVENS. Mr. President, I ask unanimous consent that the Senate return to the consideration of legislative business.

The PRESIDING OFFICER. Without objection, it is so ordered.

ORDER OF PROCEDURE

Mr. STEVENS. Mr. President, it is my understanding there are two special orders in the morning.

The PRESIDING OFFICER. The Senator is correct, Senators NUNN and BRADLEY.

RECESS UNTIL 9:15 A.M. TOMORROW

Mr. STEVENS. Mr. President, if there be no further business to come before the Senate, I move, in accordance with the order previously entered, that the Senate stand in recess until 9:15 a.m. tomorrow.

The motion was agreed to; and at 8:02 p.m., the Senate recessed until tomorrow, June 11, 1981, at 9:15 a.m.

NOMINATIONS

Executive nominations received by the Senate June 10, 1981:

COUNCIL ON ENVIRONMENTAL QUALITY

W. Ernst Minor, of Ohio, to be a Member of the Council on Environmental Quality, vice Robert H. Harris.

NATIONAL AERONAUTICS AND SPACE ADMINISTRATION

June Gibbs Brown, of Virginia, to be Inspector General, National Aeronautics and Space Administration, vice Eldon D. Taylor, resigned.

IN THE AIR FORCE

Gen. Bryce Poe, II, U.S. Air Force, (age 56), for appointment to the grade of general on the retired list pursuant to the provisions of title 10, United States Code, section 8962.

The following-named officer under the provisions of title 10, United States Code, section 8066, to be assigned to a position of importance and responsibility designated by the President under subsection (a) of section 8066, in grade as follows:

To be general

Lt. Gen. James P. Mullins [redacted] FR, U.S. Air Force.

IN THE ARMY

The following-named officer under the provisions of title 10, United States Code,

on 3066, to be assigned to a position of ɔrtance and responsibility designated by ?resident under subsection (a) of section , in grade as follows:

To be lieutenant general

l. Gen. Nathaniel Ross Thompson, Jr., xxx-xx-... U.S. Army.

TERNATIONAL ATOMIC ENERGY AGENCY

chard T. Kennedy, of the District of mbia, to be the Representative of the ed States of America to the Internationtomic Energy Agency, with the rank of assador.

CONFIRMATIONS

xecutive nominations confirmed by Senate June 10, 1981:

NATIONAL OCEANIC AND ATMOSPHERIC ADMINISTRATION

ɔhn V. Byrne, of Oregon, to be Administɔr of the National Oceanic and Atmosɔic Administration, vice Richard Asher ık, resigned.

DEPARTMENT OF STATE

ɹrleton S. Coon, Jr., of New Hampshire, a ɔign Service officer of class 1, to be Ambassador Extraordinary and Plentipotentiary of the United States of America to the Kingdom of Nepal.

DEPARTMENT OF COMMERCE

Bernard J. Wunder, Jr., of Virginia, to be Assistant Secretary of Commerce for Communications and Information, vice Henry Geller, resigned.

COMMODITY CREDIT CORPORATION

Richard E. Lyng, of Virginia, to be a Member of the Board of Directors of the Commodity Credit Corporation, vice James H. Williams, resigned.

Frank W. Naylor, Jr., of California, to be a Member of the Board of Directors of the Commodity Credit Corporation, vice Malcolm Rupert Cutler.

Mary Claiborne Jarratt, of Virginia, to be a Member of the Board of Directors of the Commodity Credit Corporation, vice Carol Tucker Foreman.

The above nominations were approved subject to the nominees' commitment to respond to requests to appear and testify before any duly constituted committee of the Senate.

DEPARTMENT OF JUSTICE

Robert A. McConnell, of Arizona, to be an Assistant Attorney General, vice Alan A. Parker, resigned.

OVERSEAS PRIVATE INVESTMENT CORPORATION

Craig A. Nalen, of Florida, to be President of the Overseas Private Investment Corporation, vice J. Bruce Llewellyn, resigned.

DEPARTMENT OF JUSTICE

Francis Anthony Keating, II, of Oklahoma, to be U.S. Attorney for the Northern District of Oklahoma for the term of 4 years, vice Hubert H. Bryant, resigned.

David L. Russell, of Oklahoma, to be U.S. Attorney for the Western District of Oklahoma for the term of 4 years, vice Larry D. Patton, resigned.

DEPARTMENT OF STATE

Ronald DeWayne Palmer, of Maryland, a Foreign Service officer of class 1, to be Ambassador Extraordinary and Plenipotentiary of the United States of America to Malaysia.

DEPARTMENT OF STATE

Foreign Service nominations beginning Kenneth W. Plummer, to be a Foreign Service officer of class 2, a Consular Officer, and a Secretary in the Diplomatic Service of the United States of America, and ending James T. Kelley, of Virginia, to be a Secretary in the Diplomatic Service of the United States of America, which nominations were received by the Senate and appeared in the CONGRESSIONAL RECORD of May 20, 1981.

EXTENSIONS OF REMARKS

THE 36TH ANNUAL WORLD TRADE CONFERENCE IN CLEVELAND, OHIO

HON. DENNIS E. ECKART
OF OHIO
IN THE HOUSE OF REPRESENTATIVES

Wednesday, June 10, 1981

● Mr. ECKART. Mr. Speaker, I would like to draw my colleagues' attention to the provocative remarks of Mr. Lionel H. Olmer, Under Secretary for International Trade at the U.S. Department of Commerce, on the occasion of the 36th Annual World Trade Conference in Cleveland, Ohio, which I was also able to attend.

The 36th Annual World Trade Conference was very well attended and proved to be benefical for all participants and our community.

REMARKS BY LIONEL H. OLMER, UNDER SECRETARY FOR INTERNATIONAL TRADE, U.S. DEPARTMENT OF COMMERCE

I am very pleased to be here today as part of your 36th Annual World Trade Conference.

I commend the businesses of this great city and State for their dedication to the values of export development. Cleveland is the headquarters of some of the largest corporations in America and is the home of many internationally oriented businesses. You contribute to a rich flow of innovation and productivity which benefit the entire nation.

In the age of Christopher Columbus, mapmakers would label unknown lands with the warning, "Here there be dragons." For too long, many U.S. firms viewed trade opportunities in the same way: Here there be dragons . . . well if not dragons exactly, at least ferocious regulations, jungle business practices, and strange and exotic languages. Meanwhile, the American domestic market was comfortable, homey and well-explored.

Today, I want to talk about the imperatives for change and of new opportunities in foreign trade—opportunities perhaps as rich as those which Columbus faced, but with far less risk.

I want to share with you my thoughts on the nature of our problems in international trade, and how government and business can work together to improve our Nation's economy.

First on our trade agenda is to help improve the international competitiveness of U.S. industry out of recognition for the basic relationship between domestic policies and international performance.

Second, we believe that the world trading community must adopt and function according to rules of fair trade—those which have been established and some which need to be framed. Rules should extend to areas which have up to now been avoided, such as the services industries, within which I include banking, insurance, construction and investment.

We have sometimes pursued domestic goals which did not take into account the effect of our policies on your ability to compete overseas. And sometimes our policies sent confusing signals to our trading partners. The new Administration is committed to changing this.

You know, in the past 18 years there have been a half dozen major studies under White House sponsorship to develop new initiatives for export by identifying what the Government needed to do to encourage international trade. The first of these reports was submitted at a time when the United States enjoyed a favorable balance of trade and only two Government imposed disincentives to export could be found. Last year, in the latest study on the same subject, the President's Export Council submitted a list of 15 major disincentives and our trade balance was $32 billion in the red! There need be no greater testimonial to President Reagan's commitment to "get the Government off the backs of the people!" We need no more studies to turn around our international competitiveness.

Before I outline our action plan, here is the background against which we must work.

The international competitive position of the United States has steadily declined for more than two decades. In 1960, for example, the U.S. share of world trade in manufactured goods was 25 percent. In 1980, it was 18 percent. If it had remained close to 25 percent, our last year's oil bill of $80 billion would have been reduced by nearly a third and our trade deficit would virtually be eliminated.

The result of this decline is that over the past four years we have accumulated a trade deficit of $100 billion.

Yet there has been some recent improvement in our trade position. Exports, for instance, have grown by 20 percent in the last 2 years. Good news like this leads some people to believe we have turned the corner and that our international competitive position is in good shape.

I cannot agree with this optimistic view. The fact is that a great part of the recent trade improvement has stemmed from devaluation of the dollar, 2 years ago, which cheapened our export prices. And our sluggish economy reduced the demand for imported goods. Both of these are short-term developments, and can change quickly. For example, as recently as 1975, we enjoyed a trade surplus of $11 billion. This evaporated into a deficit of $6 billion just 1 year later. In other words, a $17 billion shift in the short span of 1 year. We can not let short-term appearances obscure recognition of our long-term decline in international competitiveness.

Moreover, when we look at our trade situation with Japan, this 20-percent improvement in exports provides small comfort. In the view of many, we've become a "developing nation." We send the Japanese agricultural products and raw materials and Japan sends the U.S. finished goods. Our total trade imbalance with Japan in 1980 was about $9 billion but in terms of manufactured products alone it was $21 billion!

The growth of U.S. productivity in manufacturing has lagged behind that of our competitors for at least 20 years. Recently, it has fallen even lower. From 1960 to 1973, it grew about half as fast as the average for our 10 major competitors. From 1973 to 1979 it averaged less than one-third that of our competitors. And in 1980 it was close to zero.

What makes this even more worrisome is that we predict slow growth in the world economy over the next decade. This means that many countries will want to expand exports—and will be reluctant to accept imports—in the years ahead. It means that international competition is going to get tougher than ever before. Not only is there less growth, there will be more nations struggling to pay for raw materials and energy through participation in export sales. We are beginning to face serious competition from newly industrialized countries in basic manufacturing and high technology as well. We will simply have to do better merely to keep up.

This interaction between the world economy and trade will require close international cooperation on both fronts. The challenge before us is to improve economic performance while managing a world trading system that is undergoing fundamental change.

The erosion of our competitive position is the result of years of inconsistent and contradictory policies pursued without regard for the fact that our domestic and international economies are mirror reflections of one another.

There is no merit in the Government's effort to tell U.S. business to raise its export consciousness while, at the same time, adopting regulatory and tax policies which stifle the very incentives necessary to pursue export opportunities. This Administration believes that trade is essential to our domestic economy and that a strong domestic economy will enhance our competitive position internationally.

President Reagan's Economic Recovery program consists of a number of mutually reinforcing proposals designed to turn our economy around and improve the ability of U.S. firms to compete internationally. These proposals rely on market forces and the inherent strengths in our economy. It is based on change in Government spending, taxation, monetary policy and regulation.

First, we have proposed, and the Congress has thus far cooperated in approving, significant cuts in Government expenditures.

Second, we have proposed reductions in personal taxes to provide an incentive for greater savings by consumers and to enable more productive business investment.

We also have proposed a new corporate tax strategy. Let me describe what others do in this area to dramatize how disadvantaged U.S. businessmen are relative to their foreign competition.

Japan leads the world in the application of robotics technology and in the number of industrial robots in use—10,000, compared to 3,500 in the United States. A major reason is that tax incentives, loan guarantees and leasing arrangements are provided by government for the development and application of this revolutionary innovation.

Another example is depreciation. The Japanese Government provides a first-year writeoff of 25 percent which, when combined with normal depreciation, allows com-

panies to write off as much as 45 percent of the cost of machinery and equipment in the first year of use.

Japan is not alone . . . Germany, France and Great Britain each have similar programs.

If we can get passage of President Reagan's tax program, and with your support we will, U.S. industry will benefit from an accelerated depreciation for capital investments and an investment tax credit. Under the provisions of the accelerated cost recovery system, for example, equipment purchased for research and development can be written off in three years rather than five. Overall, the Administration's proposals will grant U.S. firms the equivalent of a 40 percent writeoff in 1 year and over 70 percent in 2 years.

Third, investment will be stimulated by a stable and rational growth in the money supply and by minimizing government intervention.

The Reagan program also includes a commitment to eliminate unnecessary and excessive Government regulations. For example, we seek to change certain environmental and safety regulations, to ease product-labeling requirements, to speed up the decontrol of natural gas prices, and to streamline the licensing of nuclear powerplants.

In addition to burdensome regulations which inhibit productive enterprises, we are evaluating measures to improve our ability to export, such as by reducing the negative effects of a number of U.S. laws and regulations.

But before you surmise that I place too great an emphasis on the wonders which economists can create for us, let me tell you what transpired at a recent May Day parade in Moscow. Chairman Brezhnev, observing the rolling display of powerful weapons and the thousands of marching soldiers, noticed one platoon which stood out from all the others—uniforms of better material and fit, shining brass buttons, spiffy helmets. He didn't understand and he turned to his Defense Minister and said, "Marshal Ustinov, who are those people and why are they different from all others?" The Marshal replied, "Comrade Brezhnev, they are economists." And Brezhnev, with utter astonishment marking his voice, said, "What are economists doing in the midst of our combat troops?" The Defense Minister answered, "You would be surprised at the damage they can do!"

The international business community has long been troubled by the Foreign Corrupt Practices Act. Incidentally, note how artful the title of this act is, so as to imply that anyone who's against it, if for bribery; indeed, it passed Congress unanimously in 1977. The problem is that there is a lack of precision and clarity in the law. Thus, prospective exporters are scared off from even trying to enter world markets, and others avoid involvement because of uncertainties in the law. We are particularly concerned about the provision which makes it a crime to pay a commission to your agent in a foreign country if you had "reason to know" that any part of the commission would be passed on as a bribe.

For example, if a small businessman in Wichita hires an agent in Ouagadougou, and pays him a standard commission, our Kansan stands in jeopardy if that agent contributes any portion of his commission to a foreign political party or candidate, and if "reason to know" could be attributed to the U.S. businessman. We must clear this up—our friend can't afford to hire a $200,000 a year Wall Street lawyer to interpret the uncertainty for him . . . nor to defend him against a Justice Department criminal charge

A network of legal and regulatory roadblocks established for domestic purposes has for years stood in the way of establishing export trading companies in the United States. Other countries—most notably Japan, but also including West Germany, France and Hong Kong—have long since recognized the need to involve their medium and smaller size companies in foreign trade. Indeed, the sixth largest exporter in the United States is none other than Mitsui, one of Japan's largest trading companies. The Commerce Department has taken the lead in support of the export trading company legislation now before the Congress; it passed the Senate by 94 to 0 and is now being reviewed in the House of Representatives. When enacted, which I believe will happen this year, the legislation will modify banking regulations and provide antitrust exemption to companies which will be capable of providing a full range of export services to businesses of all sizes.

At the Commerce Department, we have undertaken a thorough review of all regulations affecting the business community and have established ourselves as the focal point in the government for your concerns. We are prepared to listen—and what's more important—to respond to your concerns. We believe that any regulation that turns American business away from the world marketplace, or that makes a U.S. manufacturer uncompetitive in international trade can't be all good—and we want to hear about it from you.

I said earlier that our trade policy should mirror our general economic philosophy. And that International business must be as free as possible of governmental restraints and policies which distort the operation of free enterprise. We will follow this approach at home and will cooperate with other governments to preserve the partnership and principles embodied in the treaty on tariffs and trade to which over 100 nations are signatory.

The U.S. maintains the freest, fairest, most open market in the world. In the vast majority of cases, foreign producers have access to our market on the same terms and conditions available to domestic firms. We expect similar treatment from our trading partners. I have no illusions that this will come overnight. However, I do know that perseverance and a working relationship between government and industry can produce results.

We will continue to support efforts to implement the Tokyo Round of Multilateral Trade Negotiations (MTN). The agreements are a significant step in the liberalization of international trade. Success will help to promote trade, and equally important, to prevent backsliding toward protectionism.

We must also address a number of subjects on which agreement was not reached during the Tokyo Round. For example, the trade distorting effects of subsidies, such as export credits at 3½ percent interest, must be remedied. We calculate that last year, roughly $3 billion was spent by governments to subsidize exports. (Incidentally, France accounted for about half of this total.) These subsidies represent wasted expenditures in economic terms. While we seek to negotiate these items fairly, we will bear in mind that our open market system should not be converted into a weapon used to disadvantage our domestic industries.

The international community must address the question of trade in services. In the past 30 years, this area of trade has increased at an extraordinary pace, reflecting the trend in the advanced economies of the world. However, the international rules and procedures developed since World War II do not, for the most part, apply. We anticipate that future growth in this area will be very substantial. It must not be hindered by artificial barriers. Our trading partners do not yet show much enthusiasm for this undertaking, but we will press on.

We must also address the relationship between trade and investment policies. Often, investment policies have a greater effect on trade than do tariffs or nontariff barriers. For example, subsidy programs, research and development assistance, and government outlays to promote regional development—are being used increasingly to our disadvantage.

We will work with our trading partners to prevent these policies from becoming permanent export subsidies or functioning as import protection devices.

Although we hope that we can deal with these issues within a multilateral framework, we recognize that there will be occasions when it is preferable to seek resolution bilaterally. The case of Mexico provides a good example. Total bilateral trade with Mexico has grown from $4.7 billion in 1972 to $27.6 billion in 1980—a growth rate of 25 percent per year. The size of this trade account is bound to create tensions which must be solved by the partners themselves out of an awareness that it is in the self interest of each to do so. Mexico has become our third largest trading partner, but is not yet a member of the international system of rules known as the GATT. We hope that Mexico will find the GATT system to its advantage, or at least will adopt these standards as it seeks to pursue rapid and efficient economic development. President Reagan is personally committed to strengthening our relationship with Mexico and we are prepared to do so by the most effective and practical means available.

I've described to you today an ambitious program for export development. Clearly, the greater burden for making it a success rests with the business community. But the Government needs your help to create the environment essential to progress.

One source of counsel available to the Government are the private sector advisory committees, composed of over 500 representatives of companies active in international trade. We have a Trade Advisory Center in the Commerce Department to manage these committees and respond to complaints about unfair trade practices of other governments. I encourage you to take advantage of this office.

I would like to close by reading a short paragraph from President Reagan's proclamation at the start of World Trade Week.

"Trade stimulates competition, stirs our creative energies, rewards individual initiative and increases national productivity. Among nations, it speeds the exchange of new ideas and technology."

"As products made in this country compete successfully in world markets, we contribute to the strength and stability of our dollar, the expansion of our industry and fuller employment of our labor force."

Thank you very much.●

ROSE SCHWARTZ REPORTS ON SENIOR CITIZEN INTERN PROGRAM

HON. WILLIAM LEHMAN
OF FLORIDA
IN THE HOUSE OF REPRESENTATIVES

Wednesday, June 10, 1981

● Mr. LEHMAN. Mr. Speaker, never has the congressional senior citizen intern program, held this year from May 11 through May 15, had more significance for our elderly. And, never have the issues of concern to our elderly been as deeply felt as they are now.

Hearing the questions put to our colleagues and Government officials by our elderly, one recognizes quickly that the days of friendly persuasion by the elderly segment of our populace are no longer with us. Rather, the tones are of grave concern and awareness, demanding to know what the issues are and how those issues affect their lives.

Our 1981 intern, Mrs. Rose Schwartz from Fairways South condominium in Hallandale, Fla., who was accompanied by her husband, Jack, forwarded to me a copy of the report she submitted to interested groups in our district on her findings with the program. The report is a fine example of how informative and enlightening the program is to our senior citizens. The program is significant not only for our constituents, but also for us legislators who have that 1 week in May to get such a good cross section of views on senior citizen issues.

For the benefit of the many congressional readers, I would like to share Mrs. Schwartz' report by having it inserted in the CONGRESSIONAL RECORD.

MRS. SCHWARTZ'S RETURN FROM WASHINGTON

Whereas Mr. Smith went to Washington, Rose Schwartz returned from Washington. And, in so doing, requests to tell you all about it. So, sit back and relax—because you can be assured that your Government is interested in you as a Senior Citizen.

As an introduction, I was appointed by our Congressman, Bill Lehman, to attend the 1981 Congressional Senior Citizen Intern Program in Washington, D.C., from May 11 to May 15.

From the very first day to the very last day, I became involved in every seminar, every meeting and every detail concerning and covering the entire program. Senators, Congressmen and other administrative directors spoke to us in detail in regard to legislation affecting the elderly . . . the Senior Citizen, if you will.

The program covered housing, government, transportation, health insurance, and long term care for the older American. Social Security, social security and more social security! There are counsels for retired teachers, retired federal employees, and etc. Not a single area has been overlooked.

We were addressed by Congressman Claude Pepper—81 years of age—as well as many other important government people in all age brackets. Claude Pepper sets a very good example for all senior citizens. He is highly regarded and respected. He is constantly displaying and awakening an awareness of the still good capabilities of the older American. And, for those who desire it, there should be employment available to us in many areas of industry. Efforts are being made to eliminate mandatory retirement or at least advance retirement to 68 years of age. Due to greater longevity, the senior citizen represents a large voting block and is being reckoned with. Today we represent 25 percent of the voting population in Florida. So, all our Representatives in Washington are taking special interest in our way of life. On that note, here is an interesting statistic: As of the year 1978, the population of persons 65 years of age and over in Florida was 1,520,000—third to New York State and California. It is no doubt much higher now in 1981.

Senator Chiles of Florida has a bill pending that would eliminate mandatory retirement because it is now illegal in the private sector to force workers to retire solely because they have reached age 70. He is also attempting to remove the earnings limitations for those over 65. Instead of the government collecting $1.00 for every $2.00 earned over the limit of $5,500, or whatever the figure might be increased to, this same bill is attempting to eliminate the payroll tax for those over 65. This would give the employer an incentive to hire and consider older workers.

There are innumerable more movements going on in Washington for the betterment of senior citizens. Again, I have to tell you that we should all be pleased to know that we have our legislators working in our behalf. As for our present generation of people—all of us here—we have really nothing to fear that will affect us in obtaining our little income every month—namely, social security. However, what we all can do is write, write, and continue to write to our Senators and Congressmen so that we can be heard. If you feel that you have something to say—write and tell your neighbors and friends to do the same. You would be amazed at how effective your voice in Washington is.

Interspersed between seminars, I was required to spend some time at Congressman Lehman's office. The purpose of this was to see government in action—from the inside. I was given assignments and actually became part of the staff. You would be amazed to know how much detail is required of each staffer, and all under the qualified eye and supervision of the Congressman. Hundreds of pieces of mail are received every day and they must be answered. The telephones are constantly ringing. Besides the daily duties of committee meetings, the Congressman has to speak to groups who invite him here in Florida, has to attend Congress, plus keep in touch with all the office details. It is unbelievable!

The point is, don't think your congressman or senator is not performing for you. Again I must impress upon you the importance of your vote. Your vote is extremely valued, but make it work for you.

I was very proud to be appointed to attend this conference, and I let them all know that I am a resident of Fairways South of Hallandale, Florida.●

INDIANA'S ECONOMY: PROBLEMS AND SOLUTIONS

HON. LEE H. HAMILTON
OF INDIANA
IN THE HOUSE OF REPRESENTATIVES

Wednesday, June 10, 1981

● Mr. HAMILTON. Mr. Speaker, I would like to insert my Washington Report for Wednesday, June 10, 1981, into the CONGRESSIONAL RECORD:

INDIANA'S ECONOMY: PROBLEMS AND SOLUTIONS

The economic problems of Indiana were explored in a Congressional hearing that I recently chaired in Indianapolis. Everyone recognizes that the health of the national economy will have a profound effect on the health of Indiana's economy, but Hoosiers should not sit back to see what happens at the national level. There are things to be done here at home, and the 13 witnesses who appeared at the hearing—representing state government, business, academia, labor, and agriculture—suggested a variety of options.

Although not all the witnesses agreed on all points, there was much unanimity in their testimony on the state's economic troubles. Several panelists said that the dependence of the Hoosier economy on steel and automobiles is at the heart of the state's woes. Also, the recovery of the steel and auto industries from recessions in recent years has been complicated by increased imports, aging plants, and the high costs of energy, labor, financing, and government regulation. These factors have worked to undermine the competitive position of Hoosier products.

Witnesses noted that efforts to widen the state's economic base have been hampered by a lack of industrial investment. Without such investment, it has been difficult for small, high-technology firms—those which have the brightest prospects for growth—to become established in Indiana. In addition, testimony confirmed that the limited links between researchers and entrepreneurs in the state have not been sufficient to promote the smooth transfer of new technologies from universities to business. Another problem is Indiana's insufficient interest in its public facilities, such as highways, sewers, water systems, and schools. Indiana ranks forty-seventh in the nation in total public expenditures per capita, a level of spending that may have kept Indiana's communities from attracting and supporting new industry.

Still other causes of Hoosier economic problems were discussed during the hearing. According to several witnesses, the federal government must take some of the blame on account of overly burdensome regulations and geographically biased initiatives. Other panelists emphasized Hoosier unemployment, which has resulted from increased imports and the loss of jobs to other states. Auto workers in particular are suffering great hardship, and young people in Indiana do not have enough jobs waiting for them when they graduate from secondary school.

Indiana's agricultural sector was the hearing's final focus. Witnesses testified that Hoosier farmers are caught in a tight squeeze because of inflation, which is also driving up the price of land and setting consumers against farmers. In addition, the witnesses said that federal regulation is direct-

ing farm research unnecessarily, and they spoke out against the grain embargo.

When discussion turned from problems to solutions, the witnesses again showed broad agreement with one another. They went well beyond general advice—restrain the growth of federal spending, reduce the burden of federal regulations, cut taxes for businesses and individuals, get interest rates down, and take steps to revitalize the country's basic manufacturing industries—to recommend very specific measures tailored to the needs of Indiana. Representatives of business and state government argued that Indiana should reduce its dependence on the steel and auto industries by diversifying into other areas. They described a state program to stimulate investment in small business, and they contended that the university and the private sector should undertake more joint research. Other suggestions for economic development included continued but restricted use of industrial revenue bonds and a major effort to improve programs of job training.

The economists at the hearing strongly endorsed the view that Indiana must be more serious about its public facilities. They underscored the fact that the state cannot be economically healthy if its roads, bridges, ports, and hospitals are ailing. With their analysis of the uneven effects of the revenue sharing program, the academic witnesses stressed the idea that the federal government must not discriminate against older states, like Indiana, whose populations are not growing rapidly. They were in agreement with others that Indiana should do more to get the full economic benefit of its fine universities.

Trade unionists and agricultural experts rounded out the hearing with their remedies for the labor and farm sectors of the state's economy. The trade unionists called for a curb on imports of automobiles and a "local content" law that would require foreign automakers to build plants in America. They also requested more assistance for workers who have lost jobs to imports and larger tax incentives for industries that need added investment. The farm experts saw four ways to assist agriculture: control the effect of inflation on the farmer's costs and returns, prohibit embargoes, hold down government regulation of the farm sector, and take steps to slow the loss of the state's prime farmland.

Developing an integrated approach to the economic development of Indiana is a complex task that requires a high degree of cooperation between the private sector and local, state, and federal officials. The economic future of the state depends on the success of the effort. On the basis of these recommendations, I am taking many specific steps to address Indiana's economic problems. I will describe those steps in another newsletter.●

"CALL TO CONSCIENCE" CONGRESSIONAL VIGIL

HON. RON WYDEN

OF OREGON

IN THE HOUSE OF REPRESENTATIVES

Wednesday, June 10, 1981

● Mr. WYDEN. Mr. Speaker, we sit today under a dome of democracy. We are free to discuss and take action on any issue we deem important.

The people of the Soviet Union do not have a dome such as this. They are not free to discuss the issues which they desire. If they choose to discuss issues which are forbidden by the Soviet Government, they are subject to arrest—and worse.

On May 17, during a meeting of a history and Jewish culture seminar that he was leading, Eugeny Lein was arrested along with all those present. After a few hours all were released except for Mr. Lein.

On April 20, he was charged with article 190-1, circulating lies against the Soviet state. No trial date has been set.

Eugeny Lein was a top-ranking mathematician until he applied to emigrate to Israel in 1978. He was refused permission to emigrate on the grounds of secrecy and from that day until his arrest he had been forced to work as a watchman and a private tutor.

His wife was a prized chemist. Now she is jobless.

I stand here under this dome in order to bring attention to his case. But he is not alone. Hundreds of Soviet Jews await permission to emigrate. And hundreds of Soviet Jews are wasting away in Soviet prisons, detained for no legitimate reason.

The persecution of Soviet Jews must cease. Eugeny Lein must be released from prison and be allowed with his wife, Irina and their two young children to emigrate to Israel. The Jews of the Soviet Union have been persecuted for too long a time to allow this outrage to continue.●

SUPPORT NEEDED FOR THE GUARD AND RESERVES

HON. ROBERT T. MATSUI

OF CALIFORNIA

IN THE HOUSE OF REPRESENTATIVES

Wednesday, June 10, 1981

● Mr. MATSUI. Mr. Speaker, in our efforts to improve the status of our national security, and to do so in the most economical fashion possible, one area which I think merits special attention is the National Guard and Reserves. For years now, the Guard and Reserves have been treated like a poor relation by most of the services. There may be no more false economy in our approach to defense spending.

My friend Maj. Gen. Frank Schober, who commands the California National Guard, put the case very well in a recent column in the Sacramento Union. I insert General Schober's piece in the RECORD.

GUARD NEGLECTED

(Today's column is by Maj. Gen. Frank J. Schober, Jr., Commanding General, California National Guard.)

In the debate on the issues involved in our national defense policy, one factor stands out, unchanged, unchallenged and neglected in the swirl of controversy over programs, strategy and budgets. That factor is the status and future of America's National Guard and Reserves which represents the majority (55 percent) of our defense forces.

Concern over the readiness of the Guard and Reserves is relatively new for Americans. Up until the 1970's, the Guard with its state emergency role and the other military reserves were not taken very seriously by planners and policy makers and were funded penuriously by Congress. The Secretary of Defense Laird, faced with a declining budget and dwindling support for a large standing armed force adopted the policy for the Guard, Reserves and Actives to be thereafter considered a tri-partite equally treated, equally funded "total" force. By the clear terms of the Laird Memorandum the Guard and Reserves would no longer be treated as forces supplementary to a potential conflict, they would be considered essential complementary forces.

Those who call themselves developers in the Pentagon, the war planning staffs, took the Laird Memorandum seriously. By the mid 1970s none of the regular U.S. armed forces, save perhaps the Navy could go to war without the mobilization of the combat and combat support forces of the Guard and the Reserves. What followed the plans however was not action but inertia. To this date they have not been backed up by budgetary support.

As might be expected the various services fared differently under the Laird Memorandum. The Naval Reserve has been largely ignored by the Navy, with their planners viewing the Reserves as a resource competitor, if not a dangerous pariah. Their answer to the budget contraints of the Carter years was to cut Reserves back. The Air National Guard and Air Reserves, on the other hand, have fared relatively well under the Laird memorandum. Their equipment is sufficient if not the latest. Their logistics and administrative support by the regular Air Force make them capable of going to war.

The Army Guard has been given instead a remarkable "Catch 22" puzzle to work with. The Deputy Secretary of Defense for Manpower and Reserve Affairs admitted as much in 1978 when he told the Adjutants General of the 50 states in convention, "I realize its 'Catch 22' but what can we do? You won't get more equipment until your training readiness gets better and your training readiness won't get better until you get more equipment."

Until Congress makes the Laird Memorandum a reality by allocating America's Guard and Reserves more than five percent of the defense budget to support the 55 percent burden they now carry of the nation's defense mission, neither the Actives nor the Reserves will be properly prepared to defend out country.

Mr. Speaker, I believe that the upgrading of our Guard and Reserves is a necessary and efficient move at this time, and I am very pleased to see the extensive attention that the Armed Services Committee gave to this matter in the fiscal 1982 defense authorization bill whch they reported recently.●

DAVIS-BACON'S TIME HAS PASSED

HON. TOM HAGEDORN

OF MINNESOTA

IN THE HOUSE OF REPRESENTATIVES

Wednesday, June 10, 1981

● Mr. HAGEDORN. Mr. Speaker, I am pleased to bring to my colleagues' attention the excellent Washington Post article of June 4 in which James T. McIntyre, Director of the Office of Management and Budget under President Carter, calls for the repeal of the Davis-Bacon Act.

Once again, here is a case of a former opponent of repeal, a Cabinet member of a Democratic administration, who has seen the light of reason and has followed it. As more and more people are becoming acquainted with the facts of the harmful effects of Davis-Bacon on construction costs and on the economy as a whole, it is no surprise that more and more support for repeal of this outdated law is the result.

Mr. McIntyre's realization that "administrative tinkering" is no solution to the negative effects of this act is a point which I hope will be well-taken by my colleagues who are resisting outright repeal. Short-term reform will not solve the inherent problems. The Davis-Bacon Act is an extremely inflationary law which adds billions of dollars unnecessarily to Federal construction spending each year, not to mention its broader economic impact, and the American taxpayers are picking up the tab. I believe that repeal of this economically disastrous law is long overdue, and in light of the serious efforts to reduce Federal spending and curb inflation, it should be obvious that we cannot afford to continue this waste and abuse. To do so is unreasonable, and I suggest irresponsible as well.

Therefore, I recommend the following article by Mr. McIntyre to you and I hope that you will agree that repeal of Davis-Bacon is a must.

DAVIS-BACON'S TIME HAS PASSED

(By James T. McIntyre)

The Post's editorial "A Leaner Davis-Bacon" [May 28] made the same mistake I did when I was director of the Office of Management and Budget.

Rather than face the politically harder, but wiser, choice of scrapping the law altogether, the editorial viewed the flaws of this 50-year-old statutory relic as capable of correction by administrative tinkering.

We tried and failed to move the bureaucracies to tighten the law. Surprisingly, this new bold President, who is attacking the budget with fervor only former directors of OMB can fully appreciate, seems to be headed in the same direction—toward merely cosmetic changes. This administration's position on Davis-Bacon undercuts any notion that it is serious about halting inflation's gallop.

Davis-Bacon, lest we forget, is that 1931 statute that requires contractors for federally-funded construction projects to pay the "prevailing wage." In fact, more often than not, Davis-Bacon means that workers on those many projects often are paid the *highest* wage paid anywhere in the region. And the amounts involved are not peanuts. The federal construction budget is approximately $32 billion this year.

A major thrust of The Post's editorial was the impact that repeal of Davis-Bacon could have on labor unions. But this is falling into that old familiar trap of seeing the issue only in the union versus non-union context.

Rather, Davis-Bacon should be considered in light of its economic effects as well as its objectives. Originally, the act was intended to discourage non-local contractors from successfully bidding on government-financed projects by hiring cheap labor from outside the project area, thus disrupting the prevailing local wage structure. At the time the act was passed, there were no minimum wage laws, no unemployment compensation provisions or other statutes, such as the National Labor Relations Act, which protect the compensation or terms and conditions of employment of construction workers. Since the Davis-Bacon Act was passed, Congress has enacted numerous laws, including a general minimum wage law, to protect the wages and working conditions of construction workers. In addition, Congress has subsequently enacted procurement laws protecting the government from "unreliable contractors."

Studies and estimates (by the General Accounting Office, the Congressional Budget Office and the president's Council of Economic Advisers) on the unnecessary costs of Davis-Bacon abound. There is little quarrel with the conclusion that Davis-Bacon results in unnecessary costs. The only disagreement concerns the extent of the waste.

The evidence is so compelling that for the first time in my memory The Wall Street Journal and The New York Times have editorially agreed on a major economic issue, and each has called recently for the repeal of Davis-Bacon.

The hills are full of horror stories. A recent GAO study concluded that application of Davis-Bacon unnecessarily increased the total construction cost of Washington's Metro system 6.8 percent, resulting in an added cost of about $149 million to the taxpayers. The GAO survey of Montgomery County, Md., found that the "prevailing wage" rates were higher than average rates paid on similar private construction in the same locality.

In recent oversight hearings before the Senate Labor subcommittee, one witness testified that in Hagerstown, Md., the going rate for plumbers is about $6.40 an hour. But plumbers on a federally funded sewage treatment project will make double that because the government has somehow determined that the "prevailing wage" in that area for plumbers is $12.86 an hour.

The GAO, which issued a comprehensive report on Davis-Bacon in 1979, and urged its repeal, concluded that the act is not susceptible to practical and effective administration. I agree. Consider the task assigned to the secretary of labor. He must be able to determine (and maintain current figures on) "prevailing wages" for more than 3,000 counties for at least 19 trades. That's 57,000 wage determinations. Multiply that figure by the four different types of construction (building, residential, heavy and highway) and the number of potential wage determinations geometrically increases to 228,000. There is simply no cosmetic change available that would allow administrators to do "a better job of determining actually prevailing local wages," as the editorial proposed.

I am not suggesting that construction workers should be penalized simply to save federal construction dollars. What I am suggesting is that taxpayers should not be penalized by a federal agency requiring that wage rates on federal construction projects be higher than the actual rates on similar private construction in the same locality. It is also obvious that the federal wage-floor artificially increases all construction wages. That is one major reason the full inflationary impact is so difficult to determine.

From a budgetary point of view, by repealing Davis-Bacon requirements, either the government can get more construction for the $32 billion it is planning to spend in fiscal year 1982 or it can get the planned amount of construction for less money.

This is one of those categories of waste and abuse that the American people clearly want to correct. Now is the time to give a decent burial to a statute that is not only unworkable and economically harmful but also whose time has passed.●

THE WAY THE SOVIETS LOOK BACK ON THE POGROM

HON. STEPHEN J. SOLARZ

OF NEW YORK

IN THE HOUSE OF REPRESENTATIVES

Wednesday, June 10, 1981

● Mr. SOLARZ. Mr. Speaker, I would like to call to the attention of my colleagues a disturbing problem facing Soviet Jews. Mr. William Korey, of B'nai B'rith International, in a moving article in the Wall Street Journal, eloquently recaptures the Polish pogroms of the 1880's and describes the present disappointing Soviet treatment of these traumatic incidents. The word "pogrom" which technically means "destruction" or "riot" became adopted as a definition which meant violence against Jews.

The Soviet Union has reinterpreted the history of the pogroms in officially sanctioned historical works, and has refused to refer to these major incidents of oppression and exploitation of the Polish-Jewish community with the importance and respect that is traditionally due.

This account serves to illustrate an additional dilemma facing Soviet Jewry today. Their continuing struggle and plight concerns not only the Jewish community but the civilized world as well.

Mr. Speaker, I insert the article in the RECORD.

[From the Wall Street Journal, May 27, 1981]

THE WAY THE SOVIETS LOOK BACK ON THE POGROM

(By William Korey)

It was almost exactly 100 years ago that the Russian word "pogrom" entered into the lexicon of international discourse. Technically meaning "destruction" or "riot," the term came to stand for violence against Jews. Peasantry in the Ukraine, encouraged

by emissaries from St. Petersburg aristocracy calling for the "people's wrath" to "be vented on the Jews," wrought what a contemporary Russian writer then called "unending torture" against that religious and ethnic minority.

Elizavetgrad, a town of 32,000, was the starting point for the pogrom on April 15, 1881. The wave of killings, rape and pillage spread quickly to hundreds of other towns, to the largest cities of Berdichev and Kiev and, by the end of the year, to Warsaw; 20,000 Jews were made homeless, 100,000 ruined and Jewish property valued at $80 million destroyed.

Of striking relevance is how this devastating trauma of bigotry, which at the time was condemned by civilized society in the West, is being treated now in official Soviet literature. The evidence is scarcely encouraging.

From the 1960s onwards, the landmark 1881 pogrom episode has all but been plunged down history's "memory hole," to borrow Orwell's terminology. References to it in Soviet history textbooks used in elementary and high schools is fleeting, if mentioned at all.

Neglect was followed in 1974 by the beginning of a radical re-interpretation. A prominent Minsk writer, Vladimir Ya. Begun, in a newly published work, "The Creeping Counterrevolution," widely endorsed in the Soviet media, offered a justification of the Czarist pogroms. He contended that anti-Semitic pogroms "can occur as the spontaneous reaction to the oppressed strata of the toiling population to their barbarous exploitation by the Jewish bourgeoisie."

An extraordinarily dismaying passage, if scarcely Marxist or Leninist, followed: "We do not grieve today if our fathers, grandfathers and great grandfathers, in their distress and want, treated their oppressors disrespectfully regardless of whether they were native or alien by blood."

Begun's views are highly regarded in various Kremlin circles. His more recent book, "Invasion Without Arms," a diatribe against Jews, was published in 1977 in an extraordinary edition of 150,000 copies with a second edition of 50,000 copies appearing in 1980. A key military indoctrination journal has urged the use of this work as part of the ideological training of recruits in the armed forces.

Even more authoritative is a new work by Lydia A. Modzhorian titled "Zionism as a Form of Racism and Racial Discrimination." She is a prominent legal scholar who has played a key role in internal debates of the prestigious Soviet Academy of Sciences which dealt with Zionism and World Jewry.

The officially authorized 240-page work, released in late 1979, refers to the pogroms as merely "so-called outbursts of anti-Semitism" which were "artifically exaggerated and widely used by Jewish entrepreneurs and rabbis. . . ." In her view, the "excesses" against Jews were not based upon religious or ethnic consideration but rather were "a reaction to the exploitation to which the broad masses were subjected in capitalist enterprises."

Modzhorian claims that it was the Jewish-dominated press of Czarist Russia who had dubbed the uprisings as "anti-Semitic pogroms," when the "bosses were Jews." When the "bosses" happened to be Christians or Moslems, the word used was merely "revolt."

The current Soviet interpretation of the 1881 pogroms echoes, to a remarkable degree, the official Czarist explanation of the time. Count Nikolai P. Ignatyev, the Minister of Interior, told Czar Alexander III, in a memorandum dated August 22, 1881, that the pogroms were caused by "the Jews' injurious activities" toward the peasants. That view was similar to one held by the Narodnaya Volya, the radical populist intellectual group which at the time praised the pogroms against the "kikes" who "rob" and "cheat" the peasant and who "drink his blood."

The 1881 pogrom triggered a Jewish emigration movement that ultimately took on vast proportions. One hundred years later, the anti-Semitism that prompted and justified the pogromist mentality has returned to press ever more urgently and insistently for emigration from the Soviet Union.●

TRIBUTE TO IRWIN MEMORIAL BLOOD BANK

HON. JOHN L. BURTON

OF CALIFORNIA

IN THE HOUSE OF REPRESENTATIVES

Wednesday, June 10, 1981

● Mr. JOHN L. BURTON. Mr. Speaker, my brother Phil Burton and I are privileged and pleased today, June 11, 1981, to salute the Irwin Memorial Blood Bank of the San Francisco Medical Society as it celebrates its 40th anniversary.

Irwin was founded in the spirit of "people helping people" by the San Francisco Medical Society on June 17, 1941. It was the first nonprofit, medically sponsored, community blood bank in the United States. Forty years of service, rendered in the spirit of assisting others, has resulted in volunteer blood donations of nearly 3 million pints of blood.

In the last 40 years Irwin's thriving services have expanded in response to a growing public need. True to its commitment to help others, Irwin meets all the blood needs of patients in San Francisco, Marin, Napa, Solano, Shasta, Siskiyou, Modoc, and Trinity Counties. The needs of this vast region are readily met by volunteers ranging in age from 17 to 66 and representing all walks of life.

Irwin should be commended for its quest for innovation. Irwin pioneered the first mobile blood collection, developed the concept of blood donor credit for people who give in advance of need and conducted some of the earliest studies on white cell antibodies, among other community activities.

To continue its pursuit to assist others, the Irwin Memorial Blood Bank provides numerous services, other than its primary function of blood provision. The Irwin's tissue typing service, investigative laboratory, and educational services to technologists and other professionals provide invaluable service to the community.

It is our belief that the Irwin Memorial Blood Bank of San Francisco has a 40-year record of distinguished service. Therefore, it is with great pleasure that we take this opportunity to recognize the achievements of the Irwin Memorial Blood Bank. Since 1941, Irwin has continued its pledge to promote "people helping people."●

CARDINAL'S DEATH MARKS END OF AN ERA

HON. HENRY J. NOWAK

OF NEW YORK

IN THE HOUSE OF REPRESENTATIVES

Monday, June 8, 1981

● Mr. NOWAK. Mr. Speaker, with the death of Stefan Cardinal Wyszynski, Poland and Eastern Europe have lost one of the their most stalwart voices for human rights and freedom. I am sure my colleagues join in paying tribute to the work of Cardinal Wyszynski in Poland and throughout the world for human rights.

In October of 1978, I had the opportunity and the distinct privilege of being a member of the official delegation to the investiture in Rome of Pope John Paul II. At that time I had the opportunity to meet with Cardinal Wyszynski, the Primate of Poland.

Cardinal Wyszynski has been a moving force in Polish affairs since 1924, when he was ordained to the priesthood. When the Nazis first invaded Poland in 1939, they imprisoned much of the clergy, but then-Father Wyszynski was spared and became a resistance leader and organized clandestine church meetings.

His role was bolstered by the faith of most Poles, who saw the church as a symbol of Polish nationalism, and by fear of intervention by the Soviet Union. This materialized in 1948 with the sweeping antireligious campaign marked by the confiscation of church property and arrest of clergymen including Cardinal Wyszynski, who was placed under house arrest. He declared publicly that he would oppose any attempt to interfere with the religious freedom of Poland.

In reference to these events, Pope John Paul II stated:

> It is a faith that always went forward and never wavered. You faced prison and hardships. Everything stood against you, but the good of the people always came first.

More recently, the cardinal met with Lech Walesa in September of 1980 and gave his full support to the independent union and its sister group, the farm union, but careful to remind them of the danger if they pushed the Government too far.

The cardinal was a firm believer in gradual change as the only possible means by which prosperity would be achieved. The rare combination of support for legitimate demands and stressing the need for Christian values helped strengthen the ties between

the Catholic Church and the Polish people.

Cardinal Wyszynski's influence and credibility in his church and among his people were strong enough to restrain militants as they tried to push Walesa and Communist Party leader Stanislaw Kania in opposing directions. Cardinal Wyszynski became arbiter between the independent labor movement and the Communist Party leaders.

The massive outpouring of support from his fellow Poles is a tribute to the spiritual strength of the Polish people, a vast majority of whom are practicing Catholics in an atheistic state.

Recently the Buffalo Evening News quoted PAP, the official Polish news agency, as saying of Cardinal Wyszynski:

The great Polish patriot whose beacon was the motto that to know how to unite and not break apart is the supreme wisdom, a man particularly sensitive to the moral needs of society who saw the needs for cooperation with the state in the name of the patriotic unity of the nation and its spiritual and material well being.

Stefan Cardinal Wyszynski has made a place for himself in the history of not only Poland but also of the world. While he is now a part of that history, his life and principles will continue to inspire and guide Poland and her people as they look to the future.

Mr. Speaker, at this point in the RECORD, I would like to insert the following editorial from the June 6, 1981, Am-Pol Eagle of Buffalo, N.Y., which capsulizes Cardinal Wyszynski's contribution to peace and stability in Poland.

CARDINAL'S DEATH MARKS END OF AN ERA

An era of determined leadership has come to an end in Poland. Stefan Cardinal Wyszynski, the man who led the Polish people if not the Polish nation, through three decades of turbulence died last week after a long illness. He was 79 years of age.

It has only been a few years since the world has become fully aware of the impact Cardinal Wyszynski had on the Polish nation. The elevation to the papacy of his close personal friend, Karol Cardinal Wojtyla, and the fight of the Polish people for human rights over the past year are the events which made Cardinal Wyszynski an internationally known figure. Yet, his contributions to peace and stability in Poland have spanned three decades and are clearly the most significant factors in the development of the Polish nation and the Catholic Church under Communist rule.

It was Cardinal Wyszynski who kept the Catholic Church flourishing in the face of strong Communist opposition, particularly during the Stalinist era of the early 1950's. It was also Cardinal Wyszynski who realized from the lessons of Hungary and Czechoslovakia that violent confrontation with the Communist regime would only result in the needless shedding of Polish blood and bring the intervention of the Soviet Union. The delicate balance he maintained as Primate of Poland, leading the deeply devout Polish people, is what shaped the Polish nation into what it is today.

There is little doubt that the victories won by Solidarity over the past year would not have been possible without the strength of the Catholic Church and the leadership of Cardinal Wyszynski. The Primate is now gone but his deeds will live on forever.●

IMPROVING UNITED STATES RELATIONS WITH MEXICO

HON. CLAIR W. BURGENER

OF CALIFORNIA

IN THE HOUSE OF REPRESENTATIVES

Wednesday, June 10, 1981

● Mr. BURGENER. Mr. Speaker, the distinguished President of the United Mexican States, His Excellency Jose Lopez Portillo, left our Nation's Capital yesterday, June 9, after what appears to be lengthy and productive discussions with President Reagan and other high administration officals. All reports indicate we may well be entering a new, desperately needed, and dramatically improved relationship with our neighboring country to the south. As President Lopez Portillo stated so emphatically, genuine mutual respect is the only foundation upon which to build a solid and mutually advantageous relationship. I firmly believe that under President Reagan's leadership, we have begun to build such a foundation. One of the most serious problems between our two countries is illegal immigration. This problem has been virtually ignored by the Congress and previous administrations. This problem cries out for solution. I have introduced comprehensive legislation on this subject in this the 97th Congress, as well as in several Congresses past but have never even been given the privilege of a public hearing before the committee of jurisdiction in the House.

On Friday, June 5, 1981, one of California's leading daily newspapers, the San Diego Union, published a most timely and thought-provoking editorial on this subject entitled "Orderly Immigration." The editorial, in its entirety, follows my remarks and I commend it to all readers of the CONGRESSIONAL RECORD who seek an orderly and humane solution to this great problem.

[From the San Diego Union, June 5, 1981]

ORDERLY IMMIGRATION

After some years of drift and uncertainty, the United States appears finally to be ready to confront the immigration issue, a problem that is simultaneously one of the most pressing and perhaps the most neglected on the national agenda.

The Reagan administration's decision to push for immigration reform is supported by widespead concern in Congress and across the country. A Gallup Poll last November showed 91 percent of the public believes we should "make and all-out effort to stop" illegal immigration. And small wonder. An estimated 500,000 to 1 million entered illegally last year; illegal aliens in this country are estimated to number between 3 and 6 million. In addition, total legal admissions of immigrants in 1980 exceeded 800,000—almost double the annual average during the last decade.

Beyond the challenge of these unassimilated millions, as those of us who reside in borderlands know better than others, is the human tragedy of immigrants being preyed upon by thieves and smugglers and, in some cases, being exploited in U.S. sweatshops. The only way to minimize such suffering and extortion is to bring jobs and immigrants together within a legalized framework.

When President Carter's tentative immigration initiative was stymied by the combined opposition of hardliners on the one hand who demanded a closed door, and those on the other hand who opposed almost any reform, he appointed the fact-finding Select Commission on Immigration and Refugee Policy headed by the Rev. Dr. Theodore M. Hesburgh, president of the University of Notre Dame. After two years of work, the Commission issued its findings and recommendations last March.

The Reagan administration has wisely used the report as a foundation upon which to construct its own national immigration policy. The President's Task Force on Immigration and Refugee Policy, headed by Attorney General William French Smith, recently completed its assessment of the Select Commission's report and has just made its summary recommendations to President Reagan. Some of these changes are already incorporated in pending congressional legislation on immigration, which is entitled the Immigration and National Security Act.

Mr. Reagan has not announced which of these recommendations he intends to promulgate as U.S. immigtation policy. He is delaying out of deference to Mexican President Jose Lopez Portillo, who will meet with him in Washington next week. The immigration issue is certain to be a major subject of discussion.

Despite the absence of an official announcement at this time, reliable advance reports provide an outline of the administration's forming immigration policy. There are six broad proposals:

Strengthen the Border Patrol, which has only 2,100 agents stationed along the 2,000-mile border, and no more than 400 on duty at any one time. The long-neglected Immigration and Naturalization Service would also be provided with a complete computer system.

We have long favored this reinforcement about which there can scarcely be any debate.

Grant amnesty for undocumented aliens on a two-tiered basis: Those who have lived permanently in the United States for at least five years prior to January 1980 could remain as permanent aliens. Temporary-worker status would be granted those residing here for at least three years.

We believe aliens who elect to stay should take steps toward naturalization; the others would depart when their temporary status expires.

We are convinced there is no recourse to general amnesty for undocumented aliens who have settled here; few Americans could countenance the uprooting and deportation of millions of persons from this country.

Make workers responsible for proving their legal status. Those who use false documents could be punished. Counterfeit-resistant Social Security cards would be one of

the work-identifications for all workers. Such a card can be very effective.

Penalize employers of four or more employees who knowingly and willfully hire illegal aliens. They would be subject to civil fines of $500 to $1,000 for each illegal alien so employed. Moreover, the Department of Labor would more strictly enforce laws covering worker rights, including minimum wage and other benefits.

Although punishment for employers is one of the most controversial of these recommendations, it has solid support from the Select Commission and in Congress through pending legislation. The Task Force report states that without employer sanctions, there is no chance of illegal worker control short of sealing the U.S.-Mexican border, which alternative has no rational support.

Institute a pilot guest-worker program to admit 50,000 temporary workers annually for stays of up to nine months.

We favor this plan because it is at least a step in the right direction. But the suggested number appears to be unrealistic. Why not let the number of guest workers be flexible, subject to the jobs that need to be filled in this country?

Double the legal immigration from Mexico and Canada from 20,000 to 40,000 persons a year. But this expansion would be within an overall limit of 420,000 immigrants a year, plus a limit of 50,000 refugees unless Congress and the President agree to accommodate more because of an emergency.

We favor this proposal.

One part of the proposed quota reshuffling would eliminate the current visa preference for brothers and sisters of U.S. citizens; these visas would go instead to independent Mexican and Canadian citizens under their expanded quotas.

It seems to us this careful synthesis of immigration reform could be a basis for an orderly, humane approach that offers some semblance of legalized order over a currently uncontrolled immigration situation. At the same time, it is sufficiently generous and flexible in its amnesty provisions to avoid the coloration of repression. We believe these recommendations, therefore, conform with President Reagan's recent statement to Mexican editors that our "border should be a meeting place and not a line separating us."●

SOVIET ENERGY AND THE FUTURE OF THE WEST—PART II

HON. JOHN LeBOUTILLIER

OF NEW YORK

IN THE HOUSE OF REPRESENTATIVES

Wednesday, June 10, 1981

● Mr. LeBOUTILLIER. Mr. Speaker, on Tuesday, June 9, 1981, I inserted into the Congessional RECORD the first part of an advanced copy of a forthcoming article soon to appear in Policy Review, a quarterly journal published by the Heritage Foundation. Entitled "Soviet Energy and the Future of the West," authors Steven C. Goldman and Wayne A. Schroeder underscore the critical importance of Soviet energy developments to Western security and set forth a positive realistic approach to Western energy needs. Part II of that article follows:

THE LURE OF THE PERSIAN GULF

The Soviet Union has had a traditional geopolitical interest in the Persian Gulf which transcends the current world energy crisis. Ever since the days of Peter the Great, Russia has sought access to warm water ports in that crossroads region. Given the growing importance of this area to Western economies in recent times, its strategic value to the Soviet Union has certainly increased. Indeed, the political and economic leverage that would be available to Moscow if they could control or "Finlandize" a key portion of the oil producing Near East could be substantial. U.S.S.R. dominance in that region would enable them to tear apart the Western alliance by having the U.S. and its allies compete for Soviet manipulated oil supplies. In short, the Soviets need no domestic energy crisis to be profoundly interested in this area. Although a domestic oil crunch may make the region marginally more attractive, the key issue regarding security of the Gulf must be seen in the context of the credibility of the Western deterrent and not in terms of energy equipment sales.

The Soviet Union has consistently sought to expand its power and influence in areas where Western resistance is preceived to be low and indigenous opposition to be relatively weak. Soviet penetration of the Near East and adjacent areas has been successful where the U.S./Western security network was insufficient. Recent examples include Angola. Afghanistan, Ethiopia, and South Yemen. However, Moscow has traditionally avoided a direct confrontation course with the U.S. or its allies in areas it knows we consider essential to our security—the areas they are fully persuaded we will defend.

Misunderstandings regarding our intentions have yielded sorry results in the past. The most noteworthy example is in the case of Korea when Secretary Acheson noted that the country was outside the U.S. defense perimeter. It did not take long for the Soviets to pick up on this mistake and ask their North Korean puppets to attack the South. Once the Soviets discovered that the U.S. was prepared to defend South Korea, they disassociated themselves from the conflict as quickly as possible and left Kim Il-sung and the Communist Chinese with the task of fighting the United States. On the other hand, incidences of firm U.S. resolve to prevent Soviet or proxy intervention have often been successful. The clearest recent example was in the 1973 October Middle East war when former President Nixon put U.S. military forces on worldwide alert given the prospect of a Soviet intervention. The purpose of the alert was served and the Soviets did not enter into the foray.

Given the strategic importance of the Near East, it is absolutely imperative that the U.S.S.R. does not get the false impression that the oil producing states are soft spots, ripe for probing. Selling the U.S.S.R. energy technology and equipment, with the hope that this may keep it sated, could actually give the Soviets the impression that we are unwilling or unable to defend our vital interests by other means.

U.S. efforts to extract a quid pro quo from Moscow in return for expanded trade and technology transfers have been unsuccessful. This approach has not served to promote East-West interdependence nor has it served to moderate Soviet geopolitical behavior. Instead, we have witnessed a relentless Soviet arms build up, Soviet strategic penetration of the Near East and Africa as well as the invasion of Afghanistan. A U.S. decision to retain past export policies will only serve to convince the Kremlin that America is not serious about defending its position in the world when its security interests are threatened. Conversely, a change in our export policies would constitute a firm display of U.S. resolve. The Soviets have limped along under very unfavorable conditions in the past and can face an oil crisis at home if they are persuaded that the costs of imperialist policies in the Persian Gulf are higher than the costs of enduring an energy squeeze which many countries are facing.

APPROACHES TO OPEC

The U.S. should not mislead itself into believing that the oil producing states of the Persian Gulf have any affinity for us. However, rather than meekly accepting a subservient role and earning their contempt as so many Western leaders have done, it should be possible to deal with them on the basis of mutual self-interest: "the enemy of my enemy is my friend." For too long, Western leaders in general, and U.S. officials in particular, have adopted the attitude that the oil producers hold all the trump cards and that the West must passively accept its subordinate position, unable to influence circumstances or events. This attitude must change. It is imperative that the oil-consuming states of the West persuade the oil-producing states of the Persian Gulf that cooperation is essential to withstand the common threat. In order to succeed in this diplomacy, we must adopt an activist posture.

First, we should emphasize to the oil producing states that the Soviet Union (whom many of them consider to be a loathsome "godless" regime) represents the chief threat to their security. Western nations have never interfered with their religious practices and have been paying fantastic oil bills without threats or coercion.

Second, we should emphasize that the U.S.S.R. has a strong interest in expanding its power in the region and is already taking advantage of every opening available. Unless the Western countries are able to increase their military deterrent in the region, the day may soon come when the Soviets will feel bold enough to attempt a direct intervention. As Soviet energy problems become more severe, the oil producing Persian Gulf will become an even more attractive target than it currently is. Once under Soviet domination, it will be virtually impossible for anyone to dislodge them. The Afghanistan experience should indeed be sobering.

Third, the Persian Gulf states cannot defend themselves against the U.S.S.R., regardless of the amount of military hardware the West may provide them. The Soviets would easily win any battle against Gulf oil producing states fighting alone. The only way to deter the Soviet Union is to make it obvious that a confrontation in the Persian Gulf would involve the West.

Fourth, since the oil producing states need the West as much as we need them, it does not make sense for them to adopt pricing policies designed to bankrupt those who are protecting the area from Soviet intervention. If Western economies are in dire conditions, they will not be able to increase military budgets to the extent necessary to deter the looming Soviet threat. Therefore, pricing policies which will undermine Western economies do not serve the long term interests of the oil producing countries. Indeed, it is the health of the Western

economies and our ability to pay that gives OPEC oil the value it currently commands.

WILL SOVIET SHORTAGES AFFECT WORLD MARKETS?

The impact of the coming Soviet oil production decline upon the world market should not be dismissed, but neither should it be overstated. The U.S.S.R.'s ability to make substantial oil purchases on the world market will be severely circumscribed because of hard currency shortages and limited quality products for barter. The Soviets will be compelled to cope with their oil problems by reducing their consumption growth and/or reducing exports to their CMEA clients. (By 1985, it can be expected that Soviet oil sales to hard currency markets will be severely curtailed or perhaps eliminated regardless of Western technology transfer policy. Therefore, the direct impact of a Soviet oil shortage on our allies who currently purchase U.S.S.R. petroleum should not be a consideration. Their dependence on Soviet oil will be minimal at that time.)

Almost half of Soviet hard currency earnings are currently generated by oil sales. In 1978, the U.S.S.R. sold 1.2 MMB/D for hard currency and received $5.7 billion of total earnings of $13.2 billion. In 1979, the U.S.S.R. reduced its oil sales for hard currency to under 1 MMB/D but increased its earnings to about $9 billion of a total of $19.5 billion receipts. The U.S.S.R. was a price taker rather than a price setter and able to increase its profits due to OPEC price increases. Without this hard currency flow, Moscow's financial position would be severely strained. As they continue to experience problems in their oil industry, the Soviets will be forced to make very difficult allocation choices between domestic consumption, concessionary exports to CMEA partners and exports for hard currency. Under almost any reasonable U.S.S.R. oil production/consumption scenario for the coming decade, it seems clear that the U.S.S.R. will be compelled to phase out oil exports to the West because their domestic requirements and the minimum needs of their CMEA clients will have to come first. Without this hard currency flow, the U.S.S.R. will not be in a favorable position to purchase large quantities of OPEC oil at market prices. Although the Soviets profit from OPEC price increases today, the day will soon come when this will not be the case.

During the 1970s, the Soviet Union increased its oil consumption from 5.15 MMB/D to about 8.6 MMB/D and not once during this period did their annual consumption decline (see Table 2). Since the Soviets do not have a significant private transportation sector (as we do in the United States), their discretionary use of oil is more limited, as is their potential for conservation. Indeed, oil has been primarily used to fuel the Soviet industrial base and provide for the almost theological principle of economic growth. During the 1980s, the U.S.S.R. will not be able to continue the oil consumption trend established in the previous decade. (If they did, they would consume almost 11 MMB/D by 1985.) Given the limited oil output that they will have available domestically, coupled with their constrained hard currency position, it is quite possible that Soviet oil consumption will not increase at all during the 1980s. Such a scenario will help create substantial economic and social difficulties for the U.S.S.R., a prospect that is not inimical to Western interests.

SOVIET OIL PROSPECTS

The Five Year Plan for 1981-1985, which has recently been released, projects that U.S.S.R. oil production will increase from the present level of about 12.0 MMB/D to 12.4-12.8 MMB/D by 1985. This projection indicates that the U.S.S.R. is expecting a significant deceleration of its oil production growth. (During the 1976-80 period, Soviet oil production increased from 10.39 MMB/D to the 1980 level of about 12 MMB/D.) However, it should be pointed out that the Soviets have not had a good record in recent times of fulfilling their official oil targets. The 1980 target was originally pegged at 12.8 MMB/D but was revised downward to 12.1 MMB/D.

During the next five years, many Western analysts believe that Soviet oil production will peak and possibly decline unless they quickly discover new fields near existing infrastructure. (Inexpensive and easily accessible sources West of the Urals are being rapidly depleted and the Soviets must now look to West Siberia to compensate for the declining output of other regions and provide additional increments to increase overall national production.)

Although the U.S.S.R. may indeed have substantial additional oil resources in West Siberia and elsewhere, it seems likely that major new discoveries will be in permafrost regions and offshore areas. The Soviets have at times referred to Siberia as a "raft floating upon a sea of oil." However, even if this is the case, massive investments and huge front-end capital outlays will be required to exploit this elusive oil treasure chest. The long-term prospects for Soviet oil are uncertain. The prospects for the early and mid-1980s are not good.

Table 2.—U.S.S.R. oil consumption

	Million b/d
1970	5.15
1971	5.46
1972	5.92
1973	6.33
1974	6.79
1975	7.20
1976	7.55
1977	7.90
1978	8.30
1979	8.60
1980[1]	9.00

[1] Preliminary.

Source: CIA International Energy Statistical Review, March 31, 1981, p. 25.

If we assume that U.S.S.R. oil production in 1985 will be about 10 MMB/D and that the Soviets are able to hold oil consumption at 1980 levels (about 9 MMB/D), this would leave them with an export capacity of about 1 MMB/D. Given the high priority that the Kremlin places on the political reliability of its CMEA partners, most, if not all, of this excess would probably go to them. And this would represent a significant decline in level of oil deliveries the CMEA countries are currently obtaining from the U.S.S.R. As former CIA Director Stansfield Turner noted, "There will be strong pressure to force Europe to share the oil shortage . . ." Other plausible scenarios could be devised in which consumption/production patterns are marginally altered. But in any event, the Soviet oil picture is not bright. The prospects for Eastern Europe are even dimmer, because they are already oil importers.

As noted previously, we do not wish to completely dismiss the impact of the Soviet oil crisis upon the world market. Surely, the Soviets will seek to use their available financial resources to purchase petroleum if the crunch becomes extreme. They will no doubt seek to expand gold and arm sales. However, given the prospect of evaporating oil revenues, it is difficult to envision a scenario in which they will be major competitors with the West for OPEC oil on market terms.●

CONGRESSIONAL VIGIL FOR SOVIET JEWRY

HON. MARTIN O. SABO

OF MINNESOTA

IN THE HOUSE OF REPRESENTATIVES

Wednesday, June 10, 1981

● Mr. SABO. Mr. Speaker, it is an honor to participate in the congressional vigil for Soviet Jewry. The predicament of the Soviet Jews in Russia is one for which we, as Americans, have great compassion. The search for freedom is the cornerstone of our great Nation.

I call to your attention the plight of Abe Stolar, a retired translator from Moscow, his wife, Gita, and their son, Mikhail.

In May 1975, Abe Stolar and his family applied for and received exit visas. They sold their apartment and shipped all of their belongings to Israel. On their way to board the aircraft leaving the Soviet Union, they were stopped. Their visas were rescinded on the pretext that Gita Stolar had been doing secret work in her capacity as a chemical engineer. When they returned to Moscow the local housing authority put them in an unfurnished apartment belonging to someone else. They are now faced with the possibility of eviction. Only after continued fighting were their pensions returned 1 year later.

In the past 6 years Abe Stolar and his family have lived without proper clothing, beds or bedding, and the documents essential for life in the U.S.S.R. Stolar's rights as a disabled war veteran have been denied. The Soviets refuse to register his family as aliens with the right to live and work, and also refuse to make any statement as to why they are still denying the Stolars their visas, 7½ years after Gita Stolar stopped working.

In August 1980 Abe Stolar wrote:

Talk of my wife's "secrecy" as the reason for holding us is not valid, since she has already been retired seven and a half years; their advertised limit for keeping people of top secrecy is five years. The place where my wife worked confirmed that she had not been doing secret work. Without that confirmation we could not possibly have received exit visas. Moreover, we were officially told that my wife's secrecy would be lifted, so that we could leave, in June 1977. Even after that, we are held hostage.

The story of Abe Stolar is not uncommon. It is my hope that with our continued efforts the Stolar family may soon be allowed to emigrate to

Israel. I am committed to their endeavor and I urge my colleagues to join me in support of that goal.●

DEFER JUDGMENT ON MIDEAST SITUATION

HON. PHILIP M. CRANE

OF ILLINOIS

IN THE HOUSE OF REPRESENTATIVES

Wednesday, June 10, 1981

● Mr. PHILIP M. CRANE. Mr. Speaker, the situation in the Mideast has become considerably more tense as a result of events over the weekend. I rise to suggest that my colleagues defer any judgment of the actions taken by any of the participants in that lamentable and unsettled conflict. Surely, all reasonable men of good will pray for an early and satisfactory resolution of differences in that troubled part of the world.

As Americans, and in particular as Members of Congress, we have a responsibility to avoid precipitous judgments or actions as the result of Israel's attack on the Osirak nuclear reactor near Baghdad.

I, for one, am somewhat distressed at the instant analysis and offhand verdicts rendered by many armchair critics around the country. Of particular concern is the assertion that Israel was not justified in taking the actions which it did.

I join my friend and distinguished colleague from New York, Mr. KEMP, in suggesting that officials in the administration may not yet have sufficient information to reach such a conclusion.

Mr. Speaker, I would suggest that before we attempt to make any judgments, we stop to consider the circumstances which confront Israel, and reflect on what our decision may have been had we been faced with similar circumstances.

I note with considerable interest the remarks of Senator CRANSTON, of California, a member of the other body's Committee on Foreign Relations. Mr. CRANSTON stated in a news interview following announcement of the raid, that his committee had information which led them to believe the Iraqi facility in question was designed and built for the purpose of producing nuclear arms and, further, that it was expected that the Iraqis would be capable of producing such weapons before the end of the year. Such intelligence information, if correct, would be of vital concern to every nation which has an interest in avoiding the introduction of nuclear weapons into that part of the world. One would also expect it to be of immediate and vital concern to both Iran and Israel, the latter having been publically designated by Iraqi President Saddam Hussein as the target for that facility's product. In short, based on available evidence, there is little question about the capabilities of the Osirak reactor.

Moreover, Mr. Speaker, Iraq signed the Nuclear Nonproliferation Treaty, a solemn international agreement which she willfully violated when she committed herself to this course. In addition, therefore, to her rejection of negotiations in favor of armed force, when she aggressively invaded Iran without warning, she demonstrated an equally cavalier disregard for solemn treaty obligations among the community of civilized nations by seeking to develop a nuclear capability with the stated bellicose intention to use it against the State of Israel.

Mr. Speaker, in calling for all of us to maintain an open mind in assessing the Israeli action, I would only ask my colleagues to reflect back on the events of October 1962, when President Kennedy had obtained information about rapid progress in the construction of facilities for basing offensive nuclear missiles in Cuba. There is no dispute that those missiles were to be directed at the United States. After assessing available intelligence data, President Kennedy and his advisers made a decision to take decisive military action to remove that threat before the missiles became operational. The risk of confrontation with the Soviet Union, which could have led to a full nuclear retaliatory response by the United States, existed. Who would argue that this dangerous preventive step was not in the best interests of the United States?

Mr. Speaker, it is not my purpose to analyze in detail every facet of this situation. I am sure that over the next few weeks we will be subjected to all manner of analysis and argument over the purposes and consequences of this action. One would only hope that as this debate proceeds all of us will objectively evaluate the circumstances and the choices facing Israel, our most reliable ally in the Mideast. One should also keep in mind the history surrounding Israel's struggle for peaceful existence and legitimate recognition by its neighbors. In this way, all of us may gain a deeper understanding of, and make a constructive contribution to the resolution of, this crisis.●

THE 20TH ANNIVERSARY OF AMNESTY INTERNATIONAL

HON. DON BONKER

OF WASHINGTON

IN THE HOUSE OF REPRESENTATIVES

Wednesday, June 10, 1981

● Mr. BONKER. Mr. Speaker, this month marks the 20th anniversary of Amnesty International. Those of us who believe that the human rights of all individuals, no matter where they live, is precious and must be protected and defended at all costs can feel great satisfaction in celebrating this anniversary.

Amnesty International is one organization that has succeeded in helping over 15,000 prisoners of conscience in the last 20 years. In a recent column for the Washington Post, Coleman McCarthy wrote:

* * * this is one group that can be counted to remain fiercely outspoken on the advocacy of human rights. Its fervor on behalf of political prisoners in jails in a list of countries from Albania to Zambia isn't likely to rise and fall into styles of boldness one year and "quiet diplomacy" the next * * * It is a tireless and invaluable friend of people who are jailed, abducted, tortured, or executed because their governments object to their way of thinking.

Amnesty International, which was awarded the Nobel Peace Prize in 1977, is one of the world's few organizations that brings people together to confront successfully tyrants, repressive regimes, and oppressors, no matter their stripe.

Next Monday evening at the Jefferson Memorial, Amnesty International U.S.A. plans to issue a "Declaration of Conscience and Commitment." This declaration is to remind all governments of their responsibility to protect persons from imprisonment for political and other beliefs. It is also intended to protect all persons from torture or other cruel, inhumane, or degrading treatment as long as these individuals have neither used nor advocated violence.

I commend to the attention of my distinguished colleagues Coleman McCarthy's column, "A 20-Year Vigil Against Terror," and the text of Amnesty International's Declaration of Conscience and Commitment.

A 20-YEAR VIGIL AGAINST TERROR

(By Colman McCarthy)

In 1968, when I was writing occasional articles for The New Republic, the magazine's editor, Gilbert Harrison, asked me for a piece on Amnesty International. He said he had only a general idea of its purposes but knew nothing of the specifics and that probably few of the magazine's readers knew either.

It was an accurate assessment. Amnesty, then only seven years old, was a tiny organization with little money, few staff workers and even less prominence. Its office in Washington was a chaotic cramming of secondhand file cabinets, piled-up mail and bookshelves sagging with dossiers sent from the organization's headquarters in London.

On the wall, amid the clutter, was a dangerous document, one that, if you were to call a crowd and read out loud on the main street corner of any of several dozen world capitals, might land you in prison: the United Nations' Universal Declaration of Human Rights.

Amnesty International is 20 years old this week, an anniversary worth celebrating because this is one group that can be counted on to remain fiercely outspoken on th advocacy of human rights. Its fervor on behalf of political prisoners in jails in a list of

countries from Albania to Zambia isn't likely to rise and fall into styles of boldness one year and "quiet diplomacy" the next. In the 13 years since I first visited an Amnesty office, nothing I have learned about this organization has changed my first impressions. It is a tireless and invaluable friend of people who are jailed, abducted, tortured or executed because their government objects to their way of thinking.

The founder of Amnesty was Peter Benenson, a British lawyer who wrote an article for the London Observer in 1961 calling for public support in the creation of a group that would write letters to governments that were holding prisoners of conscience. Today's Amnesty officials call that "an amazing ambition."

But the vision took. People joined. Money came in. In 1970, Amnesty's international budget was about $100,000. It employed 19 staff workers and was in 27 countries. By 1980, its budget had grown to $4 million, its staff to 150, and it was in 39 countries. The winning of the Nobel Peace Prize in 1977 was a boon for the group's visibility, but by then the group was well known by every government that depends on repression to keep itself in power.

In 20 years, Amnesty has become much more than a collection of mere letterwriters. Its 2,200 volunteer groups may come to the aid of political prisoners in any of a dozen ways: legal assistance to the prisoners, financial support to their families, monitoring trials, publicizing cases of torture, conducting vigils in front of embassies or prisons and sending reliable information to the London headquarters for the organization's annual report.

These reports are a library of horror. There are "corrective labor colonies" in the Soviet Union for political dissenters. Amnesty says it "still has not heard of a single case in which a Soviet court has acquitted anyone charged with political or religious offenses." In Uruguay, which has at least 1,500 political prisoners, "insulting behavior" is a crime. In 1978, Amnesty received reports of Uruguayan "prisoners having to pay up to three U.S. dollars to cover the cost of each day spent in prison." In South Africa, there is "a commitment to greater ruthlessness in dealing with real or perceived enemies of the state." Vietnam has many thousands held in "reeducation camps."

With the suffering so global and incalculable, Amnesty is almost forgetful about taking credit for its successes. In the 1980 report, it is only on the next to the last line of the last page that we learn that from May 1979 to April 1980, 1,729 prisoners who had been monitored by Amnesty groups were released.

In the United States, Amnesty is occasionally criticized for being selective: being tougher, say, on Botha of South Africa than on Castro of Cuba. The charges are unfounded. Amnesty's impartiality is impeccable. The group is esteemed because it has deftly avoided politics while at the same time defending and comforting the victims of politicians.

DECLARATION OF CONSCIENCE AND COMMITMENT

(Issued by Amnesty International U.S.A., at the Candlelight Gathering, Jefferson Memorial, June 15, 1981)

PREAMBLE

The thirty articles of the Universal Declaration of Human Rights provide that everyone has the right to life, liberty and security of person, to equality before the law without discrimination, to a fair and public trial, to be presumed innocent before proven guilty, to freedom of movement, to freedom of thought, conscience and religion, to freedom of opinion and expression, and to freedom of peaceful assembly. It declares that no one shall be held in slavery, no one shall be subjected to torture or to cruel, inhuman or degrading treatment or punishment and that no one shall be subjected to arbitrary arrest, detention or exile. The declaration also establishes that everyone has the right to a nationality, to marry, to own property, to take part in the government of his or her country, to work, to receive equal pay for equal work, to receive just and favorable remuneration, to enjoy rest and leisure, and to have an adequate standard of living and education. The declaration further stipulates that everyone has the right to form and join trade unions and the right to seek asylum from persecution.

Of particular concern to Amnesty International are the following four articles of the Universal Declaration of Human Rights:

Article 5. No one shall be subjected to torture or to cruel or degrading treatment or pusnishment.

Article 9. No one shall be subjected to arbitrary arrest, detention or exile.

Article 18. Everyone has the right to freedom of thought, conscience and religion; this right includes freedom to change his religion or belief, and freedom, either alone or in community with others and in public or private, to manifest his religion or belief in teaching, practice, worship and observance.

Article 19. Everyone has the right to freedom of opinion and expression; this right includes freedom to hold opinions without interference and to seek, receive and impart information and ideas through any media and regardless of frontiers.

Although many nations have incorporated the different articles of the declaration into their national legislation, it is primarily a statement of principles with an appeal to "every individual and every social organization" to promote and guarantee respect for the freedom and rights it defines. It was never the intention that member states of the United Nations should formally ratify the Universal Declaration of Human Rights. Membership in the United Nations is, however, often considered to be an implicit acceptance of the principles of the declaration. Furthermore, one-third of the world's governments are now legally bound to respect and promote human rights through their ratification of the international human rights Covenants which are the elaboration of the declaration in treaty form. It should also be noted that under the Charter of the United Nations, member states are pledged to take joint and separate action to promote universal respect for, and observance of, human rights and fundamental freedoms. This is a legal obligation. The declaration is an authoritative statement of what those human rights and fundamental freedoms are.

In this twentieth anniversary year of Amnesty International, our members continue to participate as individuals within the structure of our worldwide movement working for individuals elsewhere in the world whose rights under Amnesty International's limited mandate have been violated.

We rededicate ourselves to the basic human rights found in the Universal Declaration of Human Rights and to the specific mandate of Amnesty International. Let us call on our friends and neighbors, our families and our professional colleagues; let us call on all citizens of the United States of America to join us in pledging agreement and action to protect and defend the human rights of every individual wherever they may be.

DECLARATION OF CONSCIENCE AND COMMITMENT

We call upon local, state, and national governmental officials to work for the release of colleagues—and all other persons—who are imprisoned for their political beliefs, provided they have neither used nor advocated violence;

We call upon religious leaders and members of their congregations to help in ending imprisonment or assassination of those of any faith because of their beliefs or their attempts to foster non-violent social change and equality;

We call upon professional associations and their members to speak out on behalf of their colleagues—and all other persons—who are arbitrarily detained in prison or mental institutions because of their professional activities, such as defending unpopular causes, protesting torture, or freely speaking and writing their opinions;

We call upon trade unionists to support workers—and all other persons—who are kidnapped, tortured or executed because of their efforts to organize for economic advancement and equality;

We call upon members of the business community to assist those engaged in commerce—and all other persons—who are being imprisoned on the basis of their political or economic opinions;

We call upon teachers and students at all educational levels to work on behalf of their colleagues—and all other persons—imprisoned for exercising their right of intellectual inquiry. We also call upon teachers and students to foster an awareness of human rights in schools and universities.

And we call upon every individual to undertake the commitment to work for the release of those imprisoned because of their political, religious, or other conscientiously held beliefs or by reason of their ethnic origin, sex, color, or language, provided they have neither used nor advocated violence; to advocate fair and early trials for all political prisoners; to seek the abolition of the death penalty; and to eliminate torture or other cruel, inhuman or degrading treatment or punishment in any circumstance.●

CARTER TYREE PARK

HON. WILLIAM LEHMAN

OF FLORIDA

IN THE HOUSE OF REPRESENTATIVES

Wednesday, June 10, 1981

● Mr. LEHMAN. Mr. Speaker, on June 6, a very special park was dedicated in North Miami Beach. The Carter Tyree Park is named after the son of Mr. and Mrs. William Carter Tyree. It is more than a memorial to a beloved son. It is a gift of beauty to the entire community.

After the North Miami Beach City Council agreed to name the park after his son, Bill Tyree and his family put in long hours of work to make the park as beautiful as possible. The following article from the Miami Herald describes this labor of love, and by in-

serting it into the CONGRESSIONAL RECORD, I hope to express my own gratitude and admiration for their work.

[From the Miami Herald]

JOKE BLOSSOMS INTO SPECIAL PARK

(By Pamela Noel)

William Carter Tyree and Hazel Fazzino had a standing joke.

"Mr. Tyree used to tease me about the little parks and things that I always wanted [to name after people]," said Fazzino, a North Miami Beach resident.

On Jan. 13, William Carter Tyree's 32-year-old son and namesake, died at home in his sleep of a heart attack.

Not long afterward, Fazzino went before the North Miami Beach City Council members, told them about the joke and Tyree's loss and asked that they name a park after him.

"I was really upset when his son passed away," said Fazzino, who has known the elder Tyree for 18 years. "I had thought this would be a great memorial that Bill could have and see and treasure."

The council agreed to name after Tyree a small piece of land that sits in front of First Baptist Church of North Miami Beach, 1490 NE 162nd St., where Tyree is a deacon.

But there was something else in Tyree's heart.

He asked that the park be named instead after his late son, William Carter Tyree Jr.

Everyone always called the elder Tyree Bill. The younger was known as Carter. "We were like two peas in a pod," said Tyree, who lives at 1332 NE 157th St.

Two weeks ago, a new redwood sign went up proclaiming the triangular-shaped land sandwiched between NE 15th Avenue, NE 162nd Street and Miami Drive, as Carter Tyree Park.

"I thought it was real nice for them to show that much respect for me," Tyree said of the council.

After the council gave him the park, Tyree made a promise.

"When I get through with this park," he told the council, "it's going to be the prettiest one in North Miami Beach."

Turning the park from a sand- and weed-filled lot into a blooming shrine in honor of his son, became a labor of love for Tyree, 62 and Florence, 59 his wife of 41 years.

Even Tyree's 10-year-old grandson, Johnny, and 80-year-old mother-in-law, Ruby Irene Mears, pitched in, hauling flowers and digging holes.

The city put new sod on the ground, paved a walkway through the small park and planted eight black olive trees for shade. But it was Tyree who toiled over a triangular-shaped garden of blooming dianthus plants, some of which are used to form the initials C. T. He planted the petunias, sea grape shrubs, croton, marigolds and periwinkles to thrive in the noonday sun.

Every day people stopped to ask what he was doing. On Saturdays especially, they stopped to watch and compliment. Some offered to help.

Now, four months and $500 later, Carter Tyree Park is nearly finished.

"It's too bad people can't get interested enough to have more things like this," said Tyree.

On June 6, the four remaining Tyree children, friends and other relatives, will gather at the park for dedication ceremonies.●

REMEMBERING BRAVE JURI

HON. JAMES J. HOWARD

OF NEW YORK

IN THE HOUSE OF REPRESENTATIVES

Wednesday, June 10, 1981

● Mr. HOWARD. Mr. Speaker, as you know, Juri Kukk, an Estonian dissident, died recently in the Soviet Union. Juri Kukk was an enlightened, courageous man, a credit to the nation of Estonia, and an inspiration to all who have ever struggled to uphold and protect basic human liberties. In recognition of Mr. Kukk, I believe it is appropriate to enter into the CONGRESSIONAL RECORD an article by Mr. David K. Willis that appeared in the May 6, 1981, issue of the Christian Science Monitor:

REMEMBERING BRAVE JURI

(By David K. Willis)

LONDON.—At home I have a pair of gloves, thin, brown, ordinary. They are not mine. They belonged to a hero, one of the bravest men I have ever met.

Now I cannot return them. Their owner has just passed on, in a Soviet prison camp, in the Gulag Archipelago, in the frozen northern plain of Russia, in the region of Murmansk.

This article is written in his memory: a mild, slightly built, unassuming, intelligent, and honest man called Juri Kukk. He died because his eyes were opened to the kind of totalitarian control the KGB and the Communist Party exercise in the Soviet Union and in his beloved homeland of Estonia.

For many years he worked quietly as an inorganic chemist in Estonia. For 12 years he was even a member of the Communist Party. But he spent a year studying at an institute just outside France (1975–76), and when he returned home, he was a different man.

I met him first in the depths of a dreary winter (1979–80) in an icy, deserted Moscow park. It was so cold we could hardly stand still. I invited him, and his colleague Mart Niklus, back to our apartment, gave him some tea, listened to his quiet determination and his courage.

He is not so well known as Andrei Sakharov or Anatoly Shcharansky. He won no Nobel prizes or world headlines. To me, he epitomized the unshakeable faith of an individual in freedom. Eventually, he died for that faith on March 27, 1981. He was 40.

His funeral, such as it was, was attended by his wife Silvi, five friends, and 25 KGB agents in the bleakness of Vologda, 400 kilometers east of Leningrad. His grave bears no name, just his prison number—23781. His widow has no photograph of it: KGB agents tore away the camera a friend used at the funeral, and exposed the film.

Juri told me he could no longer accept communist propaganda statements when he returned from France. The party said life in Estonia was wonderful: his own eyes told him it was the opposite. He felt he could no longer remain a member of the party. He wrote a brief note to local party headquarters, resigning. He thought it was a mere formality, and that he could live and work as before.

He was thunderstruck to come home one day and find Silvi had been visited by men in plain clothes who bullied her by saying he would be put into a psychiatric ward unless he withdrew his resignation. Persecution increased. The more it did, the more unyielding he became. He lost his teaching job.

Eventually he joined forces with another dissident, Mark Niklus, who had been battling the authorities since graduating from university.

Niklus, a square, burly, passionate man with darting eyes and the nervous manner of one always watching for the KGB, was with Juri when we met in the park. Both spoke good English. Both described conditions in Estonia, nationalist rallies, and a statement Niklus had signed the previous year calling for Baltic independence.

Later they gave me copies of statements signed by Baltic dissidents opposing the Soviet invasion of Afghanistan and supporting a boycott of the Moscow Summer Olympics of 1980. They wanted me to quote them.

The last time I met Juri was when I drove him in my car along the Sadovoye ring road. Three minutes after leaving the car he was picked up by the KGB and held for three days without being charged.

Sent back to Tartu, he telephoned me from a public booth to say how astonished he had been at the sight of the KGB flouting normal rules of detention. He had been thrown in a cell with drunks. A statement attesting to his answers had been signed by two "witnesses" whom he later discovered in the cell with him—prisoners plucked out of jail to sign a statement they knew nothing about.

He was deported from Moscow for staying in the city longer than three days (technically an offense) even though he would have been home in time if he had not been detained.

A month later he was arrested in Tartu. Silvi and his small son and daughter were distraught. The children were shouted at, victimized by schoolmates while teachers stood by, watching.

Eventually Juri was charged with disseminating fabrications defaming the Soviet system. Niklus was arrested on a more serious charge April 29.

For months the KGB tried to force Estonian doctors to certify Juri mentally deranged. They refused. The KGB incarcerated him in the notorious Serpsky psychiatric institute in Moscow. He went on a hunger strike. So did Niklus.

From Jan. 5 to 8 in Tallinn, capital of Estonia, both men were tried together. Both refused to speak. At the end, Juri bowed to Silvi and promised to continue his hunger strike, then in its 41st day.

He was sentenced to two years in a labor camp (Niklus, a second offender, received 10 years and five more of internal exile). On March 27 this year, Juri succumbed in the Gulag, still refusing food, still fighting for the ideals the Soviet state denies.●

REPLACE INTERIOR SECRETARY WATT

HON. RICHARD L. OTTINGER

OF NEW YORK

IN THE HOUSE OF REPRESENTATIVES

Wednesday, June 10, 1981

● Mr. OTTINGER. Mr. Speaker, when one has been as intimately involved with the environmental movement, as I have been, the actions of

Secretary of the Interior Watt take on a special meaning. I find it hard to recall when our Nation's environment has had to face such a ruthless official foe.

I join with the Sierra Club's enumeration of the following assaults Mr. Watt has made upon the environment:

Gutted the Council on Environmental Quality—leaving it a mere shadow, with a staff of a half-dozen or so;

Rescinded Carter's order restricting the export of hazardous materials;

Stated his intent to allow oil and gas production on wildlife refuges and wilderness areas;

Advocated turning urban national recreation areas over to the states;

Applauded the administration's decision to virtually abolish the Land and Water Conservation Fund which is used to acquire park lands—Mr. Watt also opposes new national parks and wants Congress to redirect this fund into park management;

Approved directives to the Park Service to allow snowmobiles in Sequoia National Park, in violation of its own regulations;

Opened offshore areas to oil and gas leasing that had been excluded by the Carter Administration after lengthy public hearings;

Gathered around him in the Administration a group of top level appointees who exemplify his reckless disregard for the environment;

Told a group of park concessioners that if they had problems, he would get rid of the problem or the personality, whichever is quicker;

Ordered the Office of Endangered Species to suspend some proposed endangered species listings;

Advocated bypassing the legitimate lawmaking process, instead using the budget process. ("We will use the budget system to be the excuse to make major policy decisions," he said);

Urged the Administration to sabotage the Law of the Sea treaty;

Abolished the Heritage Recreation and Conservation Service;

Dropped negotiations with Canada over a treaty on migratory caribou;

Said he would change National Park Service policy regarding management of boating in the Grand Canyon and in virtually the same breath said, "There is no way you could get me on an oar-powered raft.";

Interfered with Bureau of Land Management (BLM) efforts to control overgrazing on the public lands;

Tried to take the congressional prerogative of deciding which of the BLM areas under consideration for wilderness should not be protected;

Weakened policy on protecting BLM areas under study for wilderness;

Postponed action on environmental provisions of the Alaska Lands Act while emphasizing accelerated development of oil and gas production provisions;

Said, "The Department of the Interior * * * must be * * * the Amicus for the minerals industry in the court of Federal policy making";

Fired about 30 Interior Department attorneys who were doing essential work on protecting federal lands and resources;

Pushed for funding cuts for the Fish and Wildlife Service, which will cripple its programs;

Suspended efforts to enforce the acreage limits on federal water project recipients;

Supported the acceleration of new water project construction in the West; and

Abolished the Tahoe Federal Coordinating Council.

Clearly, these offenses will have far-reaching ramifications for the ecological health of our Nation for generations. He has already done irreparable damage—he must be stopped. Secretary Watt has little regard for our precious environmental resources. He does not see the exploitation of our air, water, and land for monetary gain as an injustice.

If we are to protect our resources and our future, we must speak out against this man. It is for this reason, then, that I will be calling upon my colleagues in the House to join with me in a petition to President Reagan urging him to dismiss Mr. Watt and to resist moves that embody his policies.

Friends of the Earth, an organization with matchless credentials in working toward preserving our environment, has begun to circulate the petition printed below. I urge my colleagues to join me in endorsing this effort, as well as putting your name along with mine on the congressional petition to President Reagan.

DEFEND OUR RESOURCES—REPLACE INTERIOR SECRETARY WATT

A PETITION TO THE CONGRESS OF THE UNITED STATES

We petition you under the First Amendment of the Constitution to protect our nation's environment by seeking the dismissal of Secretary of the Interior James G. Watt. He is undermining conservation goals supported by a vast majority of the American people. He is seeking to ignore decades of legislation designed to protect natural resources. Our heritage of national parks, wilderness areas, refuges, rivers, wildlife, and desert lands is coming under systematic attack, and Secretary Watt is the Administration's principal advocate of these destructive policies.

We firmly support the policies this country has developed for managing the protection of our natural resources; they need to be strengthened, not weakened. We risk losing our natural heritage unless Mr. Watt is dismissed. Please make his removal your highest priority and resist legislation embodying his policies.●

GLEANED CROP CONTRIBUTIONS TO CHARITABLE ORGANIZATIONS

HON. LES AuCOIN

OF OREGON

IN THE HOUSE OF REPRESENTATIVES

Wednesday, June 10, 1981

● Mr. AuCOIN. Mr. Speaker, today I am introducing legislation which aids individuals who have a particularly hard time coping with high food prices—yet does so without creating a costly Federal bureaucracy. The bill makes a significant contribution to providing a healthy diet for the low income, elderly, and disabled by offering a tax advantage to farmers who donate gleaned crops to charitable organizations.

Individuals on fixed incomes do not have much money to spend on food. They are forced to keep within a tight budget.

Food prices rose 10 percent during 1980. Senior citizens spend more than 30 percent of their budget on food. A typical low-income family of four makes $14,000 but spends 31 percent of that on food. This is hardly enough to maintain a nutritious diet and pay other bills at the same time.

Where is assistance going to come from? Government aid is not always adequate. The food stamp program and other nutrition programs are facing severe budget reductions. Gleaning is one answer for help. Tax incentives encourage farmers to participate in gleaning to get the food to the truly needy.

This legislation amends the Internal Revenue Code to offer farmers a 10-percent tax credit against their income taxes for contributions of crops to charitable organizations.

Tax incentives currently are available for corporations but not for the small farmer. Farmers had this advantage until 1969 when Congress acted to limit the deduction to the costs that he incurred in the production of the crop. However, contributions of needed goods declined with the passage of the 1969 Tax Reform Act and Congress gave this advantage to corporations, but not individual farmers. It is now time to give farmers similar treatment.

Similar legislation has been adopted by Oregon and several other States. Its aim, and its result, has been the creation of gleaning and food redistribution programs throughout the country.

Gleaning is the process of hand harvesting crops left behind after mechanized harvest or which remain unharvested because of adverse marketing conditions. A large quantity of this food now rots in fields and orchards when it could be taken and distributed to needy, individuals. Crops which can be readily gleaned include all fruits, vegetables, berries, and nuts.

The success of gleaning programs has been tremendous. In Oregon, for example, over 1 million pounds of produce were gleaned in 1980 and distributed to more than 13,000 individuals. Not only were low-income people the recipients of this food but so were approximately 5,000 senior citizens and handicapped individuals.

This legislation has bipartisan support. Joining me as original cosponsors are my colleagues Congressmen AUSTIN MURPHY, RON WYDEN, NEWT GINGRICH, TONY COELHO, WILLIAM LEHMAN, DALE KILDEE, DANIEL AKAKA, and JIM WEAVER. In the other body,

Senator MARK HATFIELD is introducing a similar bill and we are working together to see that the House and Senate act during this Congress to encourage our Nation's farmers to donate gleaned crops to charitable organizations.

It also enjoys the backing of several hunger organizations. Bread for the World and the Second Harvest Food Bank is supporting my bill as well as the Oregon Gleaning Consortium, the Maryland Food Committee Inc., and the California Grey Bears. I am expecting to hear from other groups soon.

I urge my colleagues to support this tax incentive. It encourages farmers across the Nation to give food assistance to the needy. Not only will the hungry be helped but so will the farmers.●

PERSONAL EXPLANATION

HON. L. A. (SKIP) BAFALIS

OF FLORIDA

IN THE HOUSE OF REPRESENTATIVES

Wednesday, June 10, 1981

● Mr. BAFALIS. Mr. Speaker, I wish to take this opportunity to note that due to an illness in my family I was unable to be present for five recorded votes taken early Tuesday afternoon. Had I been present, I would have voted for the Chair's approval of the Journal; for the suspension of the rules and passage of both H.R. 3240, National Telecommunications and Information Administration authorization, and H.R. 3239, Federal Communications Commission authorization; for the House to resolve itself into the Committee of the Whole House for consideration of H.R. 3462, Department of Justice authorizations; and for the amendment to H.R. 3462, offered by the gentleman from Texas (Mr. COLLINS) which prohibits the use of agency funds authorized under this legislation to enforce school busing.●

TRIBUTE TO SOL AND TAMARA GOLDSTEIN

HON. TOM LANTOS

OF CALIFORNIA

IN THE HOUSE OF REPRESENTATIVES

Wednesday, June 10, 1981

● Mr. LANTOS. Mr. Speaker, today I wish to pay tribute to an outstanding American who over the years has exemplified the finest traditions of courage, hard work, and generosity of our national spirit.

Sol Goldstein made his way to freedom during World War II and led the dangerous life of an underground guerrilla fighter in the struggle against the Nazis.

He came to this great country in 1948. Imbued with the traditional virtues of hard work, ethical conduct, and community service, Sol succeeded in building a full life for himself and for his family; a model business enterprise which provided good jobs for hundreds; and an honored place in his community as a philanthropist of national stature.

His fighting spirit as a guerrilla is still very much part of his makeup. His outstanding leadership frustrated the plans of a new generation of Nazis in his beloved Skokie, Illinois—an act for which all freedom-loving men and women acknowledge a debt to him. It was appropriate that the President of the United States should honor Sol in the White House for his dedication to the principles of freedom and justice on this planet.●

EL SALVADOR: WHY NOT NEGOTIATE

HON. GERRY E. STUDDS

OF MASSACHUSETTS

IN THE HOUSE OF REPRESENTATIVES

Wednesday, June 10, 1981

● Mr. STUDDS. Mr. Speaker, there is probably no more irresponsible aspect of the administration's policy toward El Salvador than its complicity with the Salvadoran military in resisting negotiations with the opposition. The shortcomings of this aspect of our policy were discussed eloquently by former Ambassador to El Salvador, Robert E. White, in an article in yesterday's Washington Post. I recommend it highly to my colleagues and ask that it be reprinted here.

[From the Washington Post, June 9, 1981]

EL SALVADOR: WHY NOT NEGOTIATE?

(By Robert E. White)

(The writer, former ambassador to El Salvador, is a senior associate at the Carnegie Endowment for International Peace.)

The poverty of this administration's policy toward El Salvador becomes clearer every day. The government of El Salvador is going nowhere. The violence continues. The reforms have stopped. The economy is foundering. The extremes are gathering strength. Yet the only response from this administration has been to discourage diplomatic initiatives from friendly governments, to spin tall tales about massive arms shipments from Nicaragua and to point the Salvadoran military toward search and destroy missions against campesino towns suspected of containing guerrillas.

To a government pleading for economic assistance to carry out its reform programs, we have provided unneeded armaments. To a people crying out for an end to the violence, we have furnished unwanted military advisers. To moderate civilian and military leaders trying desperately to contain the slaughter practiced by the security forces, we have given an abandonment of our human rights policy and a justification for government-sponsored terrorism. To friendly governments seeking to encourage a negotiated solution, we have trumpeted unsupportable charges of a "textbook case of indirect armed aggression by communist powers." And to world leaders who believed that the United States had finally learned that counterrevolution is not an adequate response to a people determined to transform their country, we have responded with Cold War rhetoric.

If U.S. policy toward El Salvador continues to exclude a political solution to that country's tragic civil war, the inexorable result will be to drive the moderate element—the Christian Democrats—from the government. This has long been the objective of the economic elites that regard the commitment of the Christian Democrats to profound reform as far more dangerous than the threat posed by the guerrillas of the far left.

The Reagan administration has thrown its weight behind a military solution to the Salvadoran tragedy. This has forced the Christian Democrats to equivocate regarding their long and strongly held position in favor of a negotiated solution to the conflict, and threatens their ability to govern. Two public examples that bear witness to the Christian Democrats' commitment to negotiation come to mind.

In October 1980, the bishop of San Salvador, Arturo Rivera y Damas, speaking in the name of the entire episcopate, offered to mediate between the government and the Democratic Revolutionary Front (FDR). While the FDR turned its back on the bishops' initiative, the government immediately accepted the mediation offer. A few weeks later, at a ceremony in the headquarters of the Organization of American States, Foreign Minister Fidel Chavez Mena stated unequivocally the government's willingness to "meet with all groups and sectors at the negotiating table."

It is important to be clear on this essential point. The Christian Democrats want to enter into negotiations with the FDR. It is the Salvadoran military that opposes any accommodation with the left, preferring instead to kill them with the assistance of our arms and our military advisers. Unless the United States uses its influence in favor of negotiation, the Christian Democrats have no choice but to temporize. They are not powerful enough to move the military toward a political solution without the solid backing of the United States. The Christian Democrats' only hope is that the nations of Western Europe, and this hemisphere will persuade the United States to adopt a more responsible and humane course.

It is not only the Reagan administration that treats the Christian Democrats as expendable. Leaders of the FDR have persistently underestimated the importance of the Christian Democrats. FDR President Guillermo Ungo has spoken contemptuously of President Napoleon Duarte and other party leaders, describing them as nothing more than a facade for repression. This is both factually wrong and morally unfair. Men such as junta member José Antonio Morales Erhlich and Minister of Planning Atilio Vieytez, as well as Duarte and Chavez Mena are authentic democrats committed to a new deal for their country. More than the others, perhaps, Duarte may be tempted to use every device available to stay in office even after any real hope of transferring power from the military to the civilian institutions of the country has disappeared.

Ultimately, however, Duarte is a disciplined Christian Democrat. Should the party decide to leave the government, he will comply. And there is solid evidence of a sentiment building within Christian Democracy that the party can expect no support

from the Reagan administration and would do well to leave the government in order to salvage what they can of its reputation. When Minister Atilio Vieytez said publicly that, while he did not dress in olive drab, he was as much a revolutionary as any guerrilla, he spoke for the great majority of the party.

The government of El Salvador contains worthy people, both uniformed and civilian. It also contains some of the most brutally repressive military in the world. Although the FDR counts many committed democrats in its ranks, it also contains armed guerrillas led by Marxist-Leninists who are guilty of unacceptable violence. It may be that any negotiation would both drive hard-line military elements into opposition to the government and induce some Marxist-led guerrilla groups to break away from the FDR. Both results should be welcomed. The repressive elements of the military, which regularly torture and kill, constitute a fatal weight around the neck of the government. The FDR must also decide which route it favors—negotiations, guarantees and elections, or a continuation of armed struggle. Each side must face the reality that it contains extremist elements which cannot be assimilated.

In a recent message to his confreres, the director general of the Jesuits, Pedro Arrupe, said, "Even when Christians recognize the legitimacy of certain struggles and do not exclude revolution in situations of extreme tyranny that have no other solution, they cannot accept that the privileged method for ending struggle is struggle itself. They will rather seek to promote other methods of social transformation calling for persuasion, witness, reconciliation."

Profound words. World leaders who profess Western values should indeed prefer negotiations over violence. It is therefore discouraging that the Reagan administration has set its face against a political solution for El Salvador. If it continues to follow this course it will alienate not only the Western community of nations but also the crucial civilian component of the government of El Salvador. For the Christian Democrats are not only tough, pragmatic politicians, they are also idealists who have more in common with much of the FDR leadership than they do with those whom professor Thomas J. Farer eloquently and correctly condemned as "an alliance of corrupted soldiers, industrialists and landowners [who] would rather fight to the last worker, peasant, politician and priest than accept reform."●

OPPOSED TO SALE OF AWACS TO SAUDI ARABIA

HON. BARBARA MIKULSKI

OF MARYLAND

IN THE HOUSE OF REPRESENTATIVES

Wednesday, June 10, 1981

● Ms. MIKULSKI. Mr. Speaker, I rise to express my strong opposition to the administration's proposed sale to Saudi Arabia of AWACS and various pieces of advanced equipment for the F-15 jet fighters.

First, I am very disturbed that this sale represents a breach of a solemn promise that our Government gave. In 1978, when the United States originally sold the F-15 jets to Saudi Arabia, our Government promised that no sale of offensive equipment to Saudi Arabia would ever be made. This promise was made not only to the State of Israel, but also to the Congress. In my view, a promise made is a promise kept. By breaching our commitment, we would be putting into doubt any other commitments our Government has given in the past or will make in the future.

In addition, I am very concerned about the threat this sale represents to the security of Israel. This equipment would, for example, be a vital new asset in any pan-Arab attack against Israel, giving the Arab nations far broader offensive capabilities. It is my sincere hope, Mr. Speaker, that the administration will reverse its decision on this vital issue.●

STATEMENT ON INTRODUCTION OF H.R. 3794—LEGISLATION TO AMEND THE INTERNAL REVENUE CODE OF 1954, TO PROVIDE INCENTIVES FOR EMPLOYEE STOCK OWNERSHIP PLANS

HON. SAM GIBBONS

OF FLORIDA

IN THE HOUSE OF REPRESENTATIVES

Wednesday, June 10, 1981

● Mr. GIBBONS. Mr. Speaker, on behalf of myself and Mr. FRENZEL, I have introduced a bill, H.R. 3794, titled the Expanded Ownership Act of 1981. This bill represents a bipartisan attempt to bring out the best in our free enterprise system.

Private property is the cornerstone of the American way of life, yet few Americans own an appreciable ownership stake in the productive might of the U.S. economy. The incentives in this bill are designed to strengthen our free enterprise system by making it possible for more Americans to own a personal stake in that system.

In a July 1974 speech to the Young Americans for Freedom, Ronald Reagan pointed to the historical precedent for a policy of expanded ownership and warmly endorsed the uniquely American opportunity that such a policy represents:

> Over one hundred years ago, Abraham Lincoln signed the Homestead Act. There was wide distribution of land and they didn't confiscate anyone's already owned land. They did not take from those who owned and give to others who did not own. It set the pattern for the American capitalist system. We need an Industrial Homestead Act . . . I know that plans have been suggested in the past and they all had one flaw. They were based on making present owners give up some their ownership to the nonowners. Now this isn't true of the ideas that are being talked about today. Very simply, these business leaders have come to the realization that it is time to formulate a plan to accelerate economic growth and production and at the same time broaden the ownership of productive capital. The American dream has always been to have a piece of the action.

A policy of expanded ownership can reinvigorate our free enterprise system by insuring that more Americans will experience the interest and the incentive of ownership. Tax incentives currently under study are designed to encourage increased productivity through increased investment. Those incentives are important. However, we should supplement those incentives with incentives for those who will build, operate and maintain those investments.

Not surprisingly, this policy has broad bipartisan support. For example, Hubert Humphrey explained his support of expanded ownership in a letter to the editor of the Washington Post not long before his death:

> Throughout my career as a public servant, I have viewed full employment as a top priority goal for this country. And I continue to do so. But I recognize that capital, and the question of who owns it and therefore reaps the benefit of its productiveness, is an extremely important issue that is complementary to the issue of full employment. I see these as twin pillars of our economy: Full employment of our labor resources and widespread ownership of our capital resources. Such twin pillars would go a long way in providing a firm underlying support for future economic growth that would be equitably shared.

In order to encourage American business to utilize ownership-broadening financial techniques, the Internal Revenue Code now contains incentives for the establishment of employee stock ownership plans—more popularly known as ESOP's.

After studying this ownership issue and examining various techniques for expanding ownership, the Joint Economic Committee concluded in its 1976 annual report:

> To provide a realistic opportunity for more U.S. Citizens to become owners of capital, and to provide and expanded source of equity financing for corporations, it should be made national policy to pursue the goal of broadened capital ownership.

With enactment of the Tax Reduction Act of 1976, Congress made clear its interest—

> • • • in encouraging employee stock ownership plans as a bold and innovative method of strengthening the free private enterprise system which will solve the dual problems of securing capital funds for necessary capital growth and of bringing about stock ownership by all corporate employees.

Several States have also shown an interest in expanded ownership by enacting legislation to encourage the use of ESOP financing. Maryland, Michigan, Minnesota, and New Jersey, now have laws favorable to ESOP's. Similar legislation was recently introduced in Delaware, Massachusetts, and Virginia.

California, Georgia, Indiana, Iowa, Maine, New Jersey, New York, and

Pennsylvania, have all provided financial and other assistance for ESOP buyouts of companies. In addition, Federal assistance to ESOP companies over the past 7 years has included loans and loan guarantees from a variety of Federal agencies.

More recently, the Small Business Development Act of 1980 encouraged the Small Business Administration to provide financing for ESOP companies. ESOP's were also made a condition of Federal financial assistance to Conrail, the Chrysler Corp., and others.

These State and Federal initiatives represent a return to incentive economics. In the case of economic development policy, the ESOP provides a way to get more bang for the buck from increasingly scarce development dollars. It also creates the circumstances in which an assisted company is more likely to survive.

In terms of motivation, the merit of an ESOP-targeted economic policy can be easily summarized: ownership counts. It summons up a common determination to succeed. It creates a climate wherein a unity of interest and incentive can emerge. If a company succeeds, its success is widely shared, and its eventual success or failure is placed in the hands of those upon whom its success or failure will largely depend.

This bill continues this Federal support of expanded ownership by providing additional incentives for companies to finance their growth and their transfers in ownership in such a way that employees will own a stake in the companies for which they work. Commonsense suggests that as we enact incentives for new productive investment we should simultaneously enact incentives designed to tap the productive energies of those who will be working with that new capital.

AN OWNERSHIP APPROACH TO PRODUCTIVITY

Although increased productivity has a generally positive ring to it, for the average hourly employee increased productivity suggests that the company—and its stockholders—will benefit at his or her expense—for example, through speedups or through job insecurity due to automation. Louis Harris conducted a nationwide poll several years ago for the National Commission on Productivity on the attitudes toward productivity among 1,578 American families. The key finding indicated that over 70 percent of hourly wage earners felt that management and stockholders benefited a great deal from increased productivity, while less than 20 percent felt that wage earners themselves benefited.

It will be difficult to create a climate conducive to productivity gains unless employees are rewarded and not penalized for increased productivity. The commonsense inference is clear: When employees themselves become stockholders, their attitudes toward productivity will change. Thus, if we are looking to get the highest return from incentives for new capital investment, those incentives should be coordinated with incentives for employees stock ownership.

Several recent surveys of companies with employee ownership have disclosed a consistent pattern of increased productivity. For example, a 1977 report on employee-owned companies by the Survey Research Center at the University of Michigan found that companies with a substantial degree of employee ownership are more profitable than comparable, conventionally owned firms. They also found that the more equity the employees own, the more profitable the company.

In a similar finding, a 1980 survey of 229 ESOP companies by the Journal of Corporation Law at the University of Iowa School of Law disclosed that the productivity of ESOP companies is higher than the national average. In addition, a study of employee-owned plywood cooperatives in the Pacific Northwest found that their average output exceeded industry productivity levels by more than 30 percent.

As the 97th Congress turns its legislative attention to productivity-oriented tax incentives, we should remember the close correlation between productivity and employee ownership. Just as the company with employee ownership will have an advantage over a conventionally owned competitor, so too should the U.S. economy enjoy a competitive advantage with a national policy of expanded capital ownership.

WHOSE PRODUCTIVITY?

The benefits of Government-stimulated economic growth have traditionally trickled down through higher wages, expansion in the number of jobs, and the availability of increased tax revenues to fund expanded social programs. Unfortunately, the long-term direct benefits of this growth accrue to a surprisingly small percentage of Americans.

For example, research by the Joint Economic Committee as part of its 1976 ownership study disclosed that 50 percent of the market value of individually owned corporate stock in the United States is held by just 1 percent of the U.S. population, and 6 percent own more than 80 percent.

Similarly, 1 percent of Americans receive 47 percent of all dividends. The committee also cited a 1972 study indicating that 55 percent of American households have a net worth of less than $10,000, and 12 percent—or 1 in every 8—have a net worth of $1,000 or less.

These findings are supported by a more recent study conducted by Martin Feldstein at the National Bureau of Economic Research. This study provides what is perhaps the most disturbing indictment of the current state of our private property economy. Dr. Feldstein and his colleagues found that for the majority of American families, their most important wealth is now their entitlements under our pay-as-you-go social security system.

U.S. tax policy should operate so as to be more supportive of our private property approach to economic matters. It is a shortsighted strategy for our private enterprise system to so structure its affairs that the most important wealth held by the bulk of Americans is a promise that their children will be taxed on their behalf. Our long-term tax strategy should not be one that leaves most Americans dependent for their subsistence on a system under which they give to each other under Government duress or take from each other with Government assistance.

The drift in the direction of ever-increasing Government transfer payments simply must be reversed. In 1960, these payments to individuals totaled 26.4 percent of total budget outlays; by 1980, they had skyrocketed to more than 50 percent; $27 billion were paid out in 1960; by 1980, these costs had risen to more than $284 billion.

During the past 20 years, our population has increased by only 23.3 percent. The Federal budget, however, has risen 528 percent. One of every six working Americans is currently employed at taxpayer expense, and the Labor Department reports that during 1979, one out of every three new jobs was created in the public sector. In 1960, the Federal Government's payroll was less than $13 billion; it is now $75 billion.

Reversing these trends will not be an easy task. As a modest first step, this bill suggests that the private sector be encouraged to finance its capital requirements in such a way as to promote the economic self-sufficiency of an everexpanding number of American households.

The best way to reduce Government spending over the long term is to reduce the need for Government spending. Thus, this bill suggests that as we enact incentives for expansion of the Nation's investment base, we should also enact incentives for expansion of the Nation's ownership base.

PRIVATE SECTOR SOLUTION

If we are to have a self-sustaining economic system and one in which Government plays only a minor role, the private sector must itself begin to play a greater role in promoting the economic independence of American households.

The American people need and deserve a chance to own a stake in the American economy—and economy of their own making. President Reagan's analogy to the Homestead Act is par-

ticularly apt. One hundred and twenty years ago, agricultural land was our most important form of productive capital and the Federal Government took steps to insure that a broad base of Americans had an opportunity to own a capital estate.

Those willing to work the land for a 5-year period could own it. The incentives in this bill parallel that precedent. For example, employees generally earn their vested interest in their stock in an ESOP by working with a company for a period of years.

The Homestead Act analogy is appropriate for another reason as well. The United States, more than any other Nation, recognizes the indisputable interplay between economic rights and political rights.

At present, pay is badly outpacing productivity. Nevertheless, this inflationary bias is understandable as most Americans are left in the untenable position of having only their increasingly depreciated labor as the capital with which they provide input into—and derive income from—the economy.

This bill has as a major goal the encouragement of a second source of income—an income from productive capital to supplement that from one's labor. The idea is to begin to provide an opportunity for more Americans to provide for themselves while also beginning to bring our outtake system more in synch with the realities of our input system.

SETTING AN EXAMPLE OF WORKABILITY

A tax policy supportive of expanded ownership could also have a positive effect on our relationship with other nations. Unfortunately, in many parts of the world capitalism is portrayed simply as an economic system in which a nation's productive wealth is concentrated in the hands of a privileged few.

We need a working model of just what we would propose for other nations. Capital ownership is a socially created opportunity. It is the institutions of society that determine who will be the owners of productive capital that has yet to be created. Such ownership, however, is an opportunity historically reserved for a relative few. That is due to the simple fact that new wealth is largely a function of existing wealth.

Current law encourages corporations to retain their earnings for reinvestment rather than pay them out to shareholders as dividends to be taxed at unearned income rates. Instead, shareholders generally hope to realize an increase in value of their stock on a later sale and be taxed at that time at more favorable capital gain rates. The corporation's retained earnings, in turn, are generally used to generate, or acquire, new capital—capital which, of course, will be owned by preexisting shareholders.

Similarly, the deductibility of interest encourages corporations to use either borrowed funds or various debt instruments for financing a substantial portion of the balance of their capital needs. As with the use of retained earnings, the previous owners become the new owners. The other principal source of corporate financing has been funds generated internally through the use of depreciation deductions, investment tax credits, and the like. For the most part, new capital is financed either with such internally generated cash flow or with borrowing repaid out of cash flow. From an ownership point of view, the result is the same.

New equity issues now play only a minor role in the financing of new capital. According to Federal Reserve Board figures, corporate equities accounted for only 0.89 percent of total funds raised in the United States by nonfinancial sectors during 1979. For the entire 1970's, equities represented a mere 3.7 percent of new capital.

For the most part, people cannot afford capital ownership. Most working Americans owe rather than own; they accumulate debts rather than wealth. Daily economic survival, not savings and investment, is their main concern; and the less our technologically advanced economy needs their labor, the less able they are to save their way to capital ownership. Inflation, of course, further penalizes their thrift.

A LEGISLATIVE PROGRAM OF EXPANDED OWNERSHIP

At present, the Internal Revenue Code encourages the use of employee stock ownership plans through the availability of tax credits and tax deductions. The tax credit-type ESOP permits corporations to claim an additional 1 percent—an 11th percent—investment tax credit provided the company uses its tax savings to invest in company stock for its employees through a specially defined ESOP. In addition, a sponsor company may claim up to an additional one-half percent credit to the extent employees contribute a matching amount of cash to the plan. This type of ESOP has proven to be particularly popular among major capital-intensive corporations.

ESOP's are also used more directly as a technique of corporate finance. Through the use of a tax-exempt trust, ESOP financing offers sponsor corporations certain tax incentives and cost reductions not available under traditional methods of finance. The ESOP also enables employees to acquire ownership of productive capital in a tax-free manner during their employment while incurring tax only on their ownership incomes—received in the form of dividends—and on their stock when removed from their ESOP trust accounts.

The ESOP traces its origins to the Revenue Act of 1921 which first granted tax-favored status to stock bonus and profit-sharing plans as a method for U.S. companies to attract and retain qualified employees. It is worth noting that it was not until 5 years later that Congress granted similar tax-exempt status to pension plans. Although the ESOP has many of the same legal characteristics as more traditional defined benefit-type pension plans, the ESOP's primary purpose is not to serve as a retirement vehicle but, rather, to serve as a means by which employees can earn an ownership stake in the company for which they work.

The ESOP is not simply another means for encouraging retirement savings. Instead, what Congress created with the ESOP is a socially improved technique of corporate finance that also serves as a new type of employee benefit. Thus, as a tax-qualified plan for providing employee benefits—in the form of employer stock, an ESOP must meet many of the basic requirements of the Employee Retirement Income Security Act of 1974—for example, nondiscriminatory participation, vesting within a reasonable period, reporting and disclosure, etc.

The term "technique of corporate finance" refers to the "leveraged ESOP", an ESOP that uses borrowed funds to purchase employer stock, with the employer—or a related party—guaranteeing repayment of the loan. In a 1953 revenue ruling, the Internal Revenue Service sanctioned this type of leveraging by a stock bonus plan, thus laying the legal groundwork for the leveraged ESOP.

The first known use of ESOP financing, pioneered by Louis Kelso, involved an employee buy-out of a chain of California newspapers that was threatened with a takeover by a major chain in 1956. But only in the last few years has the business world at large become aware of this innovation.

Suppose, for example, that corporation X wants to build a new plant costing $10 million. With traditional debt financing, the company would borrow the $10 million, provide adequate guarantee of repayment to satisfy the lender, use the borrowed funds to build the plant, and then apply the profits from the new plant to repay the loan.

The ESOP adds a third element to this transaction—an ESOP trust. The trust borrows the money; in addition, the corporation guarantees to the lender that it will make periodic payments to the ESOP trust sufficient to amortize the loan. It is this guarantee collateralizing the loan that puts the logic of corporate finance to work for a company's employees.

The ESOP trust then uses the borrowed funds to acquire newly issued

employer stock, and the corporation uses the funds to build the new plant. As the new plant generates profits, corporation X makes payments to the trust which are used to repay its obligation to the lender. If all goes well, the employees' stock will pay for itself—over the term of the loan—out of the earnings generated by the plant.

The payment schedule from the company to the ESOP trust may differ very little from the payment schedule that would have existed with the lender under conventional debt financing. Also, the corporate obligation is generally the same whether or not ESOP financing is used. There is one significant difference, however. With conventional debt financing, interest payments are deductible for tax purposes whereas amounts attributable to repayment of principal are not. Employer contributions to the ESOP trust, on the other hand, are fully deductible, including those applied by the trust to the repayment of loan principal.

Consequently, where corporation X uses the ESOP as its financing vehicle, it may—within limits—repay its indebtedness—both interest and principal—in pretax dollars. Assuming a 50 percent effective tax rate, corporation X would need to gross $20 million to repay the $10 million principal with conventional debt financing. With ESOP debt financing, however, the corporation need gross only $10 million to repay the principal with pretax dollars through its ESOP.

By enabling a company to expense its capital investment, the ESOP lowers the sponsor company's taxable income and increases its available working capital; and the same dollar that finances the company's capital requirements also finances an employee benefit in the form of employer stock.

After purchase, the stock is held in an escrow account for allocation to employees' ESOP trust accounts as the loan is repaid. In no sense is this a gift of productive capital to employees; rather, the capital is paid for out of the future flow of earnings that the new capital itself generates. As the already-rich know so well, the new capital's productiveness generally pays for itself. The ESOP participants, however, also earn their ownership interest in the company through the ESOP's vesting schedule—which generally allocates stock to employees' accounts based on a combination of length of service and relative compensation.

The ESOP can also be used—with or without leveraging—as an in-house market for the sale of stock held by the shareholders of a closely held company. For example, suppose the sole shareholder of corporation Y wants to begin to convert his shares to cash over a period of years in contemplation of retirement. The corporation could contribute cash each year to its ESOP and the ESOP could use the cash to purchase shares from the owner. Should the owner wish to sell out before the ESOP trust has adequate funds to pay him, the ESOP could borrow the money to pay the owner with the corporation guaranteeing the loan.

Similarly, an ESOP can be used to refinance existing debt, finance mergers or acquisitions, and accomplish divestitures or spinoffs. For example, at his confirmation hearing before the Senate Finance Committee, Treasury Secretary Regan explained how Merrill Lynch & Co. used an ESOP to divest itself of the Lionel-Edie Co. Rather than sell the company to someone else, the former chief executive explained:

> We used employee stock ownership, letting them buy it, and they have prospered as a result of that. I am definitely in favor of that.

THE ATTRACTIVENESS OF ESOP FINANCING

Under current law an employer has only a very limited incentive to utilize the leveraged ESOP. In large part, this is due to the fact that the interest expense of a leveraged ESOP is included in determining an employer's maximum deduction limitations under code section 404(a) and, equally importantly, in determining the amount that may annually be released from escrow and added to participants' ESOP accounts under code section 415.

The effect of these two limitations is to subject ESOP financing to an unintended limitation, and a limitation that has grown increasingly restrictive with today's high-interest rates. Thus, this bill removes these limitations as they apply to the interest expense incurred in connection with an ESOP's leveraged acquisition of employer stock.

An argument could be made that where an ESOP is used to finance an employer's capital growth the deduction limitation should be based solely on the company's capacity to service the debt. The result of such a change would be to rechannel corporate profits—that would otherwise have gone into the corporate income tax base—into productivity increases in the private sector while also broadening the base of private property ownership among productive workers.

The amendment recommended in this bill should prove to be beneficial for two important reasons. First, this change brings these ESOP-related Internal Revenue Code provisions more closely into alinement both with congressional intent and with the Reagan administration's announced purpose to encourage expanded ownership. Present law undermines this purpose.

Second, this change directly addresses a problem concerning the relationship of employee ownership to productivity and profitability. In most cases, ESOP's own only a small percentage of the sponsor company's stock. However, the Survey Research Center at the University of Michigan found in their 1977 study of employee ownership that the most important correlation between ownership and profitability is the percentage of company stock owned by employees—the more equity owned by the employees, the more profitable the company.

If these plans are to be effective motivators and significant contributors to productivity and profitability, we should encourage companies to permit employees, through the use of leveraged ESOP's to acquire substantial blocks of employer stock. If ever that is to be possible, however, these amendments must be enacted so as to make our tax laws more appropriate when applied to the use of ESOP's as a financing tool.

This bill also suggests an additional encouragement for employers to utilize ESOP financing. Under current law, an employer is permitted to contribute and deduct up to 15 percent of covered compensation to an ESOP each year. This 15-percent limitation is the same as applies to traditional stock bonus plans and profit-sharing plans—the basic building blocks of employee benefit law upon which the ESOP was modeled when first fully incorporated into the Internal Revenue Code in 1974.

When an ESOP consists of a combination stock bonus plan and money purchase pension plan, the 15-percent deduction limitation is increased to 25 percent. In order to utilize this 25-percent limit, however, an employer must include a pension element as part of the ESOP which, in turn, calls for ongoing contributions by the employer, even though such contributions may no longer be required to retire the ESOP's indebtedness.

This required combination of different types of plans serves as a substantial disincentive to employers who might otherwise be attracted to the ESOP as a financing vehicle. In addition, this requirement forces an employer to maintain two separate accounts for each employee and imposes additional reporting, bookkeeping, and other related administrative burdens.

To remedy this situation, this bill permits an ESOP company to contribute to the plan and to deduct an amount up to the 25-percent limitation—to repay an ESOP loan, but without the required inclusion of a money purchase pension plan.

In addition, this bill makes a related change in the treatment of stock that is forfeited by employees who leave before they are fully vested in their account balances in an ESOP. Under current law, the amount that may be contributed to a leveraged ESOP is di-

rectly limited by the percentage-of-pay limitations of code section 404. In addition, the contribution is indirectly limited by the operation of code section 415—which limits the amount that may annually be added to each employee's account under the plan.

The section 415 limitation—the lesser of 25 percent of pay or $41,500 adjusted for cost-of-living increases—roughly parallels the 25-percent-of-pay deduction limitation of section 404. Amounts that cannot be added to employees accounts—due to the limitation of section 415—cannot be contributed and qualify for a deduction under section 404. The problem results from the fact that the section 415 limitation includes both employer contributions and forfeitures. In the context of ESOP financing, this inclusion of forfeitures reduces the amount that a plan sponsor might otherwise be permitted to apply to the repayment of an ESOP loan on a tax-deductible basis.

The effect of current law is to introduce a great deal of uncertainty into the planning of ESOP financing transactions. This uncertainty discourages ESOP lending and otherwise frustrates congressional intent in encouraging the use of ESOP's as a technique of corporate finance. Thus, this bill provides that the allocation of forfeitures of stock acquired with the proceeds of a leveraged ESOP loan will not be subject to the section 415 limitations. As under current law, the allocation of such forfeitures must not discriminate in favor of employees who are officers, shareholders, or highly compensated.

This bill also provides an incentive for corporations to acquire their stock for employees on a nonleveraged basis. Under present law, a corporation can claim an annual deduction of up to 15 percent of pay for contributions to a stock bonus plan or a profit-sharing plan—or to any combination of such plans. Under this bill, an employer would be permitted to contribute up to 25 percent of pay to any combination of such plans, provided that the additional 10 percent is used to acquire employer stock.

PROMOTING AN OWNERSHIP INCOME

This bill also provides a tax deduction to corporations for the amount of cash dividends they distribute currently on stock held in employees accounts in an ESOP:

Or which are used to repay stock acquisition indebtedness of an ESOP. This provision converts taxable corporate income into either taxable dividend income for employees—to supplement their paychecks;

Or a more rapid rate of accumulation by employees of individual capital estates. Such dividends would qualify for the $200 partial exclusion from income of code section 116—$400 in the case of a joint return.

As mentioned earlier, studies indicate a strong correlation between employee ownership and employer profitability. This provision provides ESOP companies with a means by which such increased profitability can be made to reach the firm's employee-owners in the form of an ownership income. This payout of the fruits of corporate productivity will introduce a new dimension to employee compensation in the United States. As Ronald Reagan explained in advocating this approach in February 1975, "An ever-increasing number of citizens thus would have two sources of income—a paycheck and a share of the profits."

By making more working Americans dividend-receiving capitalists, this provision will foster a better appreciation of the function of productive property in our private enterprise system. That appreciation should, in turn, support a better understanding of the costs and the tradeoffs of Government programs.

This approach also helps to insure that the employees, on whose behalf the stock is being acquired, will receive a fuller payout of the earnings of the capital underlying their stock. This is particularly important during the period that the ESOP trust is paying for the stock.

Behind this approach lies a rationale suggesting that our tax system's bias against property and in favor of income redistribution should gradually be phased out. Under present law, the corporation income tax dilutes by approximately half the property incomes of present stockholders. When that income becomes available to stockholders in the form of dividends, the Federal Government then levies a second tax on the remainder.

In effect, Government is a partnership-in-profit with the private corporation—to the extent of the corporate income tax. The expanded ownership approach suggests that as more Americans become partners-in-profit with America's private sector, Government's stake in that profit—via the corporate income tax—should gradually be phased out and the tax instead levied only at the individual level. This provision achieves that result to the extent that a corporation is owned by its employees via an ESOP and either pays out its earnings on a current basis to its ESOP participants or applies those earnings to repay ESOP indebtedness.

This provision should also help companies to attract equity capital. Many small corporations do not pay dividends, or pay them only on an irregular basis. An ESOP generally must hold the best class of common stock issued by the corporation—including the best dividend rights. Thus, the deductibility of dividends on the stock held by the ESOP should be an inducement for the sponsor company to establish a policy of regularly declaring dividends. This policy should benefit not only existing stockholders—including those whose shares are held by the ESOP—but also should make such stock a more attractive investment to others.

This bill also defers taxation on the first $25,000 of any lump-sum distribution from an ESOP, provided the distributee has been a participant in the plan for at least 3 years. This provision is intended to recognize the fact that far too few working Americans are able to accumulate a capital estate of any size.

The effect of present law is illogical when applied to the taxation of ESOP's. Although our tax laws are intended to promote personal capital accumulation through the use of ESOP's, those same laws generally require that a portion of this accumulation then be sold to pay taxes due on the stock when distributed. The alternative is to roll over the stock—or the proceeds—into an individual retirement account—and be subjected to its complexities and restrictions. Thus, this modest deferral of tax on the first $25,000 of capital accumulated through an ESOP is meant to further promote the economic self-sufficiency that such plans are intended to bring about. The distributee would be subject to tax when the stock is later sold, and dividends distributed in the interim would also be taxable upon receipt.

STRENGTHENING THE TAX BASE

This bill also provides that a qualified employee stockownership plan and trust shall have the tax characteristics of a charitable organization for estate, gift, and income tax purposes. This is intended to encourage affluent taxpayers to make gifts to qualified ESOP trusts in order to reconnect the ownership of capital with a broader base of private individuals.

At present, a wealthy stockholder who has built a substantial estate is faced with a dilemma. If he tries to give it away or leave it by bequest, the Federal Government ends up with the bulk of it. Often, the only alternative is to make a donation to a public purpose foundation. Even though this stockholder may wish to leave a substantial portion of his or her wealth to the employees who helped to create that wealth, our current tax laws make such an event highly unlikely.

Consequently, at a time when American capitalism desperately needs more capitalists, we find enormous amounts of private wealth being socialized in such foundations. Clearly these foundations provide a valuable public service. However, we should question the logic of a private property system that has so arranged its incentives that a taxpayer wishing to leave his business to the employees who helped to make him wealthy is in-

stead forced by our tax laws to place the bulk of that great wealth either in Uncle Sam's coffers or in a public purpose foundation.

One of the best public purposes to which such wealth could be put is to connect more of our working population to productive, income-generating assets. At present, we provide a substantial tax incentive for disconnecting productive capital from private ownership—by placing it in foundations; we should give that same tax incentive for individuals willing to donate their wealth to connect capital to a broad group of private individuals.

This is not meant to suggest that foundations do not perform an important function. Quite the contrary; they play a crucial role and, in many cases, fill a void that might otherwise need to be filled at taxpayer expense. What it is meant to suggest is that the options now open to a wealthy person are too limited. If he or she wishes to leave personal wealth to such a foundation, that is as it should be. We should applaud that decision, and out tax laws should continue to offer an incentive to make such gifts and bequests.

But the fact that a person is not encouraged to leave a business to those who helped to build it is not as it should be. That we force the socialization of such wealth is not as it should be. That is a shortsighted strategy from a tax philosophy point of view, and one that serves to further sap the already waning strength of capitalism—the same capitalism that has enabled such foundations to prosper all these years.

As for this Nation's many fine public purpose foundations, which hopefully will enthusiastically support this provision, they would do well to recall the advice of Henry Ford II on his retirement from the Ford Foundation in 1976. At that time, he observed:

> The Foundation exists and thrives on the fruits of our economic system. The dividends of competitive enterprise make it all possible. A significant portion of the abundance created by U.S. business enables the Foundation and like institutions to carry on their work. In effect, the Foundation is a creature of capitalism—a statement that, I'm sure, would be shocking to many professional staff people in the field of philanthropy. * * * Perhaps it is time for the trustees and staff to examine the question of our obligations to our economic system and to consider how the Foundation, as one of the system's most prominent offspring, might act most wisely to strengthen and improve its progenitor.

Certainly there can be no more logical successors to ownership of a company than the employees who helped to build and develop it. They generally have the experience, the interest, and the commitment to carry on the operation. This provision would encourage that type of succession. The tax benefits would be denied, however, where any part of the contribution or bequest is allocated under the ESOP to the taxpayer, to members of his family, or to any person owning more than 25 percent of the company's stock. In addition, allocations could not discriminate in favor of employees who are officers, shareholders, or highly compensated.

This provision is also designed to strengthen the tax base. Government would lose no tax revenues since contributions to charitable organizations are already exempt from tax and profits from donated income-producing property are generally accumulated tax-free within such organizations. In addition, assets left to charity are forever lost to our tax system.

By permitting an individual to leave his property to an ESOP, we are moving not only to strengthen the connection of working Americans to productive capital but also to assure that these amounts will remain within the Federal tax system. Further, these amounts will be taxable to employees who receive a distribution from the ESOP. Thus, in an era when most tax legislation results in a revenue loss, this provision should result in a revenue gain.

AN ENCOURAGEMENT TO SMALL BUSINESS

This bill also provides that where the owner of a small business sells the company to his employees through either an ESOP or a worker-owned cooperative and, within 18 months, reinvests the proceeds of the sale of the stock in another small business, the tax on the proceeds would be deferred until the newly acquired stock is sold. This provision would have a very minor impact on Federal revenues but could have a very major impact on the ability of small businesses to continue as independent enterprises.

Current law provides a strong incentive for a business owner to transfer ownership of his company to a larger, more established company for a tax-free exchange of stock. On the other hand, where that owner sells or liquidates his business, he must pay capital gain tax on the proceeds.

The effect of present law is to encourage economic concentration and to divert funds from investment and innovation and into mergers and acquisitions. The Federal Trade Commission (FTC) has jurisdiction over proposed mergers or acquisitions which may be anticompetitive. It is encouraging to note that as the FTC staff analyzes assertions of the failing company defense, they are increasingly asking companies if they have considered selling their plants to employee groups instead of to competitors.

Another effect of present law is to encourage the disappearance of small and independent businesses, even though these firms have been shown to be the most innovative, growth-inducing, and job-creating sector of the economy. For example, a National Science Foundation study found that small companies are 24 times more innovative per research dollar than companies employing 10,000 or more employees. In a related finding, the U.S. Department of Commerce reports that innovation accounted for 45 percent of the Nation's economic growth from 1929 to 1969. In addition, a 1979 study from the Massachusetts Institute of Technology found that firms with under 500 employees generate 86.7 percent of all new jobs in the United States.

It would be to the Nation's advantage for our tax laws to encourage investment in small, innovative companies. The present trend toward concentration can only serve to further decrease the competitiveness of the U.S. economy, and thereby further erode its vitality and creativity. Thus, this provision provides a mechanism whereby a business owner can sell to his employees at no financial disadvantage when compared with a tax-free exchange of stock with another company. By creating this alternative, we can preserve the continuity of many small businesses.

While the incentive to sell to established firms is one cause of the decline of independent businesses, the lack of investment capital is another. This provision would open up a new source of funds for existing small businesses because a seller must reinvest the proceeds in another small business within 18 months in order to qualify for the tax benefits of this provision.

Moreover, this provision could prevent some small companies from closing simply for lack of a buyer. Many small, but profitable, companies are liquidated for just this reason—for example, to create estate liquidity.

This provision is designed to encourage the sale of companies to their employees through either ESOP's or worker-owned co-ops. To qualify, a worker-owned cooperative must be a nonprofit organization doing business on behalf of its members. In addition, it must meet the definition provided in section 105(a) of Public Law 95-351 and in the eligibility and priorities policy section of the National Consumer Cooperative Bank—that is, 70 percent of its shares owned on the basis of one share and one vote per member.

This bill also provides that the executor of an estate may transfer an estate's tax liability to an ESOP by transferring stock of the estate to an ESOP, provided that the sponsor company guarantees payment of the estate tax and agrees to pay that tax over a period of years.

Thus, this provision enables an ESOP to be used as a financing vehicle to acquire stock from an estate with the Treasury, in a sense, acting as the lender. Whereas the charitable organi-

zation status for ESOP's—discussed above—reduces the estate tax by reducing the size of the taxable estate, this provision reduces the estate tax liability by an amount equal to the value of stock transferred to the ESOP.

In order to make this assumption of liability both attractive and feasible, this provision adopts the approach of Internal Revenue Code sections 6166 and 6166A relating to the extension of time for payment of estate tax where an estate consists largely of an interest in a closely held business. These code provisions are designed primarily to make it possible to keep a business enterprise intact where the death of one of the owners of a business results in the imposition of a relatively heavy estate tax.

Without these provisions permitting the payment of estate tax on an installment basis, heirs might otherwise be forced to break up a business or sell it to some larger business enterprise in order to pay Federal estate tax. This problem is particularly burdensome for estates in which a substantial portion of the assets consist of stock in a closely held business or other illiquid assets.

Thus, although these two provisions of existing law do not remove any Federal estate tax liability, by spreading out the period over which the estate tax may be paid, it becomes possible for the estate in most cases to be paid for out of the earnings of the business—or at least provides the heirs with time to obtain funds to pay the estate tax without upsetting the operation of the business.

This bill adapts this approach to the concept of employee ownership via ESOP financing by relieving the estate of tax liability to the extent that stock is transferred to an ESOP and the employer guarantees payment of the estate tax. If the estate qualifies under code section 6166, there may be up to a 5-year deferral of principal payments, with up to 10 annual payments permitted after the deferral period. Interest on the deferred tax attributable to the first $1 million in valuation of the business is 4 percent. Interest on the balance is at the usual rate under code section 6621—approximately 90 percent of the prime rate. Allowing this reduced interest rate for a limited amount of tax is intended to reflect the problems that small businesses have in generating enough income and cash flow to pay interest at a normal rate and amortize the principal amount of the estate tax liability. If the estate qualifies under code section 6166A, interest is at the section 6621 rate and payments must be made in 10 annual installments, with the first payment payable at the time the return is filed.

In addition to providing a stimulus to employee ownership, this provision should be particularly helpful in enabling small businesses to continue in operation as independent enterprises. As the Committee on Ways and Means stated in their 1958 rationale for the original deferral of tax provision, "this provision is particularly important in preventing corporate mergers and in maintaining the free enterprise system."

OTHER ESOP AMENDMENTS

This bill also addresses a problem of great concern to financial institutions that desire to establish ESOP's. Under present law, in order for a company to utilize the leveraged ESOP, it must provide its plan participants with a put option on any shares distributed where such shares are not readily tradable. This requirement insures that plan participants will have a ready market for their shares upon distribution.

In most situations, this requirement presents no major problem. In the case of banks and similar financial institutions, however, both State and Federal law generally prohibit the redemption or purchase of their stock. Thus, application of the put option requirement to these potential ESOP companies serves as a substantial barrier to their adoption of ESOP's. This bill retains the put option requirement as it applies to stock distributions from ESOP companies. However, in order to make ESOP's attractive to banks—while also protecting employees' interest—this bill relieves banks and similar financial institutions of the put option requirement provided participants have the right to receive a cash distribution equal to the value of their shares.

This bill also provides that where a corporation—by its charter or by-laws—limits ownership of its outstanding securities to current employees, distributions from the plan may be made in cash—that is, without the necessity of providing the participant with the option of demanding stock as his or her form of distribution. This provision enables an employee-owned company to keep its stock owned solely by current employees, those whose efforts can have the most direct effect upon the economic success of the company. This provision also provides a source of stock that may be acquired on behalf of new employees.

In addition, this provision can protect an employee-owned company from inadvertently going public. Current law treats stock in an ESOP as held by a single shareholder. Each individual who receives a distribution of stock, however, is counted as an additional shareholder, and, should the number of shareholders reach 500 or more, the company may be required to file a registration statement and meet certain reporting requirements of the Securities and Exchange Act of 1934.

In addition, this bill makes the changes necessary to insure that an ESOP may be established by a subchapter S corporation. Under current law, such a corporation could not establish an ESOP—due to the general prohibition against the stock of such corporations being held in trust. This bill provides an exemption from that general prohibition in the case of ESOP trusts. In addition, in order to insure that such a corporation will not lose its subchapter S status due to distributions of stock to employees thereby increasing the number of shareholders beyond permissible limits, stock distributed by ESOP's sponsored by such corporations would be disregarded in determining the number of shareholders.

This bill also makes two other changes relating to the put option requirement as it applies both to ESOP's and to other types of plans. The first change corrects a technical error made in the Miscellaneous Revenue Act of 1980. That act was intended to permit a tax-qualified stock bonus plan to distribute cash to a participant entitled to a distribution, subject to the participant's right to demand that benefits be distributed in the form of employer stock.

In addition, if such a stock bonus plan provides for cash distributions and if stock which is distributed is not readily tradable on an established market, the participant was to have had the right to require the employer to repurchase the stock. Due to an erroneous cross-reference, the 1980 amendment incorporated the cash distribution option, but omitted the put option requirement. This bill corrects that error by incorporating the correct cross-reference and also provides that for purposes of this requirement, the definition of employer securities means any securities of the employer held by the plan—because the definition of qualifying securities for purposes of a stock bonus plan is not as restrictive as that for ESOP's.

The second change alters the nature of the put option requirement as it applies to both leveraged ESOP's and stock bonus plans maintained by employers whose stock is not readily tradable. Under current law, if such an employer distributes stock, or desires to distribute cash from one of these plans and the participant instead demands that the distribution be made in the form of stock, that participant must be given a put option requiring the employer to repurchase the stock at any time within the next 6 months. Alternatively, the ex-employee can elect to wait until that 6-month period lapses and, instead, exercise the put option at any time during a 3-month period in the next plan year—following notification of the next valuation of the stock.

The current requirements of this put option provision not only create a disincentive for the establishment of ESOP's, they also may inadvertently operate to the disadvantage of plan participants. This is because the length of the current put option requirement—6 months, plus a possible additional 3 months—creates grave uncertainties for employers as to their liquidity requirements needed to provide for the exercise of such options. Consequently, employers are required to commit sums of cash that might more productively be put to other purposes—thus detrimentally affecting the value of the participants' stock.

This bill modifies the put option requirements by shortening the put option period to an initial 60-day period followed by another 60-day period in the next plan year—following notification of the next valuation. Thus, the employee continues to get the benefit of choosing to await a second valuation, but the value of the stock will no longer be as adversely affected by requirements which force the employer to commit funds for as long a period—to provide for the repurchase liability.

Also, in operation the 6-month put option period of current law may inadvertently operate to the detriment of employees by lulling them into missing their opportunity to sell the stock and roll over the proceeds—or a portion thereof—into an individual retirement account (IRA) on a tax-free basis. In order to take advantage of the opportunity for a tax-free rollover, the rollover must be accomplished within 60 days of the distribution. By shortening the put option period to 60 days, this provision makes the put option operate in conjunction with—and in support of—the rollover period.

This provision also protects an employee's ability to control the tax consequences of his or her distribution of benefits. A participant receiving a lump-sum distribution of cash from one of these plans is generally entitled to 10-year averaging, provided he or she has 5 years of participation in the plan. Depending on the participant's tax circumstances, however, it may be advantageous to instead qualify the distribution for capital gain treatment, which requires a distribution in the form of employer stock. Thus, where the plan offers cash, the employee can take cash and qualify the proceeds for 10-year averaging. If capital gain treatment is preferred, the employee instead can insist on a distribution of stock, sell the stock back to the company and qualify the distribution for treatment as capital gain. With either form of distribution, the employee would have the option of delaying taxation with a tax-free rollover of the proceeds—or a portion thereof—into an IRA.

This bill also makes a needed change affecting the unique distribution requirements of tax credit employee stockownership plans—TRASOP's. When the TRASOP was created in the Tax Reduction Act of 1975, Congress adopted a policy that stock in the plan should not be distributed to a participant until 84 months following the date it was acquired. Exceptions were provided, however, in the case of separation from service, death, or disability. Unfortunately, in creating these exceptions we failed to take into consideration the constant acquisition and divestiture of subsidiaries and divisions which occur among major U.S. corporations—many of which have established such plans.

When a corporation disposes of a subsidiary, a division, or a division unit, it makes no sense to require the corporation's tax credit ESOP to continue to hold assets for these former employees. The employees now work for another employer, and continued ownership of their former employer's stock no longer carries with it the motivational benefits which arise from employee ownership. In addition, the tax credit ESOP, and the corporation which established it, must continue to incur needless recordkeeping and other administrative expenses for these former employees.

To resolve this problem, this provision would permit a tax credit ESOP participant's benefit to be distributed, irrespective of the 84-month requirement, if the subsidiary, division, or division unit by which the participant is employed is sold or transferred by the controlling corporation to another corporation which becomes his or her direct or indirect employer as a result of such transaction.●

CONCURRENT RESOLUTION ON IRAQI NUCLEAR REACTOR BOMBING

HON. EDWARD J. MARKEY

OF MASSACHUSETTS

IN THE HOUSE OF REPRESENTATIVES

Wednesday, June 10, 1981

● Mr. MARKEY. Mr. Speaker, I would like to insert in the RECORD two editorials from the Baltimore Sun and the Wall Street Journal which give us some thoughtful perspective on the bombing of the Iraqi nuclear reactor by Israel. Violence in any form is deplorable. However, worldwide condemnation of Israel's actions is premature. Iraq wanted a nuclear reactor to build a nuclear bomb. The intended target of that bomb was Israel. The safeguards of the Nonproliferation Treaty and the International Atomic Energy Agency would not have prevented Iraq from developing nuclear explosives. When France and Italy sold weapons-grade nuclear material and technology to Iraq, Israel was backed into a corner. The onus of responsibility must lie with the French who contracted to supply Iraq with a research reactor and 70 kilograms of 93 percent highly enriched uranium, a weapons grade material. I am introducing today a concurrent resolution, Mr. Speaker, which I am printing in the RECORD which calls on the President to:

First, urge France and Italy not to resupply Iraq with sensitive nuclear technology.

Second, impose no economic or military aid sanctions against Israel.

Third, examine and reasses U.S. nonproliferation policy.

Fourth, determine the adequacy of international safeguards.

If any Member wishes to cosponsor this resolution, I urge them to call my office at 5-2836 and speak to Nancy O'Malley.

[From the Wall Street Journal, June 10, 1981]

MOURNING THE BOMB

An atom bomb for Iraq, we have learned in the last 24 hours, has become the latest great cause celebre of world opiniondom. Various governments, including our own, and a lot of pundits have been busily condemning Israel's raid on Iraq's nuclear reactor. Our own reaction is that it's nice to know that in Israel we have at least one nation left that still lives in the world of reality.

What is going on here: Iraq, awash in cheap crude oil, wants a big nuclear reactor. It rebuffs French suggestions to give up the original design and substitute one that does not need weapons-grade uranium. It has been buying raw uranium, which is not suitable for use in reactors, but dandy if you want to use the reactor to breed plutonium for weapons. Faced with this evidence, the conclusion of world opinion has been—everything's OK, Iraq has signed the nuclear non-proliferation treaty.

This kind of silliness has a mysterious power to blind most who man foreign ministries, think tanks and editorial sanctums. Of course Iraq was building a bomb. Of course its intended target was Israel. Of course, given the Iraqi reputation for political nuttiness reaffirmed again in its starting a war with Iran, its atom bomb would also have been a danger to all its neighbors. We all ought to get together and send the Israelis a vote of thanks.

Israel, which is assumed to have its own atom bomb but not to have conducted a test explosion, was not acting out of some abstract concern with nonproliferation. It was pursuing its own national interest, and in its timing also no doubt Prime Minister Begin's political interest in the impending elections. Its pre-emptive strike was strong medicine.

This would not have been necessary, though, if the reality that marked the Israeli decision had been present in the United States' non-proliferation policy this last decade or so. These efforts more or less went out the window when the U.S. refused to take sanctions against India's "peaceful nuclear device," exploded in violation of an agreement with the U.S. After this show of irresolution, the U.S. could hardly expect to persuade, say, the French to pass up sales to Iraq. Soon the whole non-proliferation ques-

tion was lost in the fog of international negotiation.

To give the worriers about Israel their due, there is always reason to be concerned that any military act could prove to be the spark in the tinderbox of the Middle East. But we have been under the impression that the Middle East wasn't a very peaceful place even before last Sunday. People were being blown up on the beaches of Beirut and in the redoubts of western Iran. To judge the extent of the silliness, notice that among the governments objecting is Iran, locked in war with Iraq. Is there any reason to doubt that there were sighs of relief in the Saudi palaces on learning that Iraq won't have a bomb soon.

Being concerned about the peace of the Middle East does not make it necessary to be easily deceived about the necessary components for peace. Without a doubt, the ability of Israel and Egypt to come to terms has contributed mightily to that end, and President Carter's role in aiding that agreement was a major foreign policy achievement. But Lebanon has become a madhouse and the Soviet Union, through its surrogate, Syria, seems intent on keeping it that way to keep the Middle East pot boiling.

In such a situation, it is not entirely implausible for the United States to send a shuttle diplomat to try to damp down the passions and seek out possibilities for a modus vivendi. But the best chances for peace, to the extent they exist, depend far more heavily on balance of power perceptions in the area itself.

The Israelis are not infallible, but their security for 33 years now has depended on making careful power judgments. They know that their best chances for avoiding bloodshed lie in frequently reminding their neighbors that they are strong and that their wishes are not to be taken lightly.

The Israeli approach to non-proliferation is limited and direct. But their outlook on the world and on what it takes to earn the world's respect offers a few lessons we ourselves could profitably learn.

[From the Baltimore Sun, June 9, 1981]

MIDEAST'S NUCLEAR NIGHTMARE

Despite public denunciations of Israel for its attack on Iraq's nuclear research facility, many nations must be privately thankful that Baghdad has been set back in its bid for regional dominance. Iraq is a menace. It is a menace to Iran, having invaded that country a year ago. It is a menace to Saudi Arabia, which has clashed repeatedly with Baghdad over the use of oil power. It is a menace to Syria, its feud with Damascus only temporarily mended because of the situation in Lebanon. Above all, is it a menace to Israel—the stated target of Iraq's threatened nuclear capability.

Of course, the Middle East is too volatile a region for a military strike to be taken lightly. The United States is correct in condemning Israel's use of American-made jets despite restrictions on the use of such equipment in "offensive" operations. Washington has invested too much in the Camp David peace process, and it has too much at stake in insuring the flow of Persian Gulf oil, to acquiesce in this bellicose move by Israel. Prime Minister Menachem Begin may have seriously compromised U.S. senators who were prepared to oppose the Reagan administration's plan to supply AWACS surveillance aircraft to Saudi Arabia.

Yet justified as the U.S. criticism of Israel may be, France must bear the onus for its highly irresponsible course of suppling a 70-megawatt research reactor to Iraq. Under the Paris-Baghdad agreement, France was to supply 70 kilograms of 92-percent enriched uranium. This is weapons-grade material. When France, under U.S. pressure, tried to get Iraq to accept a new fuel enriched to only 10 percent, Baghdad dismissed the offer. And France, eager as ever to placate its Mideast oil suppliers, quickly went along.

Dean Fischer, the State Department spokesman, made much of the fact yesterday that Iraq had adhered to its commitments as a signatory of the Non-Proliferation Treaty and International Atomic Energy Agency safeguards. But this ignores the political leverage Iraq would gain if it became the first Arab nation with the potential to build nuclear weapons. And it ignores the warning in a Brookings Institution study last year that "nations can possess nuclear explosive materials without violating the NPT-IAEA safeguards."

With the Israeli strike at Iraq, the world has entered a new nuclear phase. This was the first time something nuclear had been directly involved in hostilities since American atomic bombs fell on Japan. The fact that the something nuclear was the target rather than the projectile is beside the point. Israel, one of the most beleaguered of nations, saw the Osirak reactor as the possible source of its destruction. Believing that, Israel took action to preclude the nightmare prospect of having to use its nuclear weapons to survive.

There are many lessons in this grave affair. One is that a country like Israel, with its very being at stake, will act when confronted with a nuclear threat. Another is that nuclear-supplier countries, such as France, should be more careful in the future about supplying nuclear facilities to a country that can provoke severe regional reactions. Still another lesson is that nuclear facilities are inviting targets not only to unfriendly governments but to terrorist groups, especially terrorist groups operating in unstable countries.

All nations should come out of this experience more determined than ever to strive for tighter controls over the spread of nuclear weapons. The initiative—and the example—must come from the superpowers. So long as the United States and the Soviet Union continue to pike up nuclear arsenals, smaller nations will be tempted to follow suit as they pursue regional ambitions.

House Concurrent Resolution —

Whereas Israel is a key national security ally of the United States;

Whereas Iraq, despite huge oil reserves, purchased a 70 megawatt nuclear reactor from France which uses substantial amounts of highly enriched uranium as fuel;

Whereas Iraq purchased from Italy highly sensitive plutonium separation technology;

Whereas both highly-enriched uranium and plutonium can be used directly to manufacture nuclear weapons;

Whereas the President of Iraq has made public statements implying that nuclear weapons could be used against Israel; and,

Whereas the crucial issue facing the United States is not whether Israel did or did not commit a technical violation of our arms sale agreement, but the real issue is the consequence of the spread of nuclear weapons technology throughout the world: Now, therefore, be it

Resolved by the House of Representatives (the Senate concurring), That it is the sense of the Congress that—

(1) the President should urge the governments of France and Italy not to sell sensitive nuclear technology or material to Iraq to replace the reactor and equipment destroyed by Israel's action of Sunday, June 7, 1981;

(2) the Congress should impose no economic or military aid sanctions against Israel in response to the June 7 action;

(3) the President should reexamine the nuclear non-proliferation policy of the United States and should establish prohibitions on the export of nuclear technology or material which can be used to make atomic weapons; and

(4) the President should determine the adequacy of the international system of safeguards to give timely warning in the event of diversion of nuclear material to military purposes.●

SENATE COMMITTEE MEETINGS

Title IV of Senate Resolution 4, agreed to by the Senate on February 4, 1977, calls for establishment of a system for a computerized schedule of all meetings and hearings of Senate committees, subcommittees, joint committees, and committees of conference. This title requires all such committees to notify the Office of the Senate Daily Digest—designated by the Rules Committee—of the time, place, and purpose of the meetings, when scheduled, and any cancellations or changes in the meetings as they occur.

As an additional procedure along with the computerization of this information, the Office of the Senate Daily Digest will prepare this information for printing in the Extensions of Remarks section of the CONGRESSIONAL RECORD on Monday and Wednesday of each week.

Any changes in committee scheduling will be indicated by placement of an asterisk to the left of the name of the unit conducting such meetings.

Meetings scheduled for Thursday, June 11, 1981, may be found in the Daily Digest of today's RECORD.

MEETINGS SCHEDULED

JUNE 12

9:00 a.m.
*Office of Technology Assessment
The Board, to hold a business meeting on pending business matters.
EF-100, Capitol

9:30 a.m.
Finance
Taxation and Debt Management Subcommittee and Energy and Agricultural Taxation Subcommittee
To hold joint hearings on the taxation of commodity straddle transactions, and on S. 626, proposed Commodity Straddles Tax Act.
2221 Dirksen Building

Judiciary
Security and Terrorism Subcommittee
To continue hearings to explore the origin, direction, and support tactics of terrorism, focusing on alleged past Soviet involvement in international terrorism.
2228 Dirksen Building

10:00 a.m.
Environment and Public Works
Water Resources Subcommittee
To hold hearings on proposals to provide for the development of ports and harbors and inland waterways in the United States, including S. 809, S. 68, S. 202, S. 576, S. 828, and S. 1094.
4200 Dirksen Building

Judiciary
Separation of Powers Subcommittee
To resume hearings on S. 158, establishing a congressional finding and declaration that human life begins at conception.
6226 Dirksen Building

Joint Economic
Monetary and Fiscal Policy Subcommittee
To hold hearings on U.S. monetary and fiscal policy.
5110 Dirksen Building

1:30 p.m.
Select on Intelligence
To hold a closed briefing on intelligence matters.
Room S-407, Capitol

2:00 p.m.
Energy and Natural Resources
Energy and Mineral Resources Subcommittee
To hold hearings on S. 1343, providing for the sale of strategic petroleum reserve fixed maturity certificates to offset the Federal Government's expense of filling the reserve.
6226 Dirksen Building

Environment and Public Works
Water Resources Subcommittee
To continue hearings on proposals to provide for the development of ports and harbors and inland waterways in the United States, including S. 809, S. 68, S. 202, S. 576, S. 828, and S. 1094.
4200 Dirksen Building

JUNE 15

9:00 a.m.
Appropriations
*Defense Subcommittee
To resume closed hearings on proposed budget estimates for fiscal year 1982 for the Defense Establishment, receiving testimony on defense intelligence programs.
S-406, Capitol

Labor and Human Resources
*Employment and Productivity Subcommittee
To resume hearings on employment and training programs in the United States, focusing on objectives of employment and training policy and the relationship between Federal, State, and local governments in the funding, design and administration of employment and training programs.
4232 Dirksen Building

9:30 a.m.
Commerce, Science, and Transportation
To resume hearings on S. 898, proposed Telecommunications Competition and Deregulation Act.
235 Russell Building

10:00 a.m.
Environment and Public Works
Environmental Pollution Subcommittee
To resume oversight hearings on the implementation of the municipal wastewater treatment construction grants program of the Clean Water Act, and to hold hearings on S. 975, revising and extending for 1 year certain provisions of the Federal Water Pollution Control Act, and on other related proposals.
4200 Dirksen Building

Judiciary
To resume hearings on monopolization and competition in the telecommunications industry, and on related proposals.
2228 Dirksen Building

1:00 p.m.
Judiciary
Separation of Powers Subcommittee
To resume hearings on S. 158, establishing a congressional finding and declaration that human life begins at conception.
2228 Dirksen Building

4:00 p.m.
Conferees
On section 303 of Senate amendment No. 10, permitting the nomination of a Surgeon General who may be more than 64 years of age, of H.R. 31, proposed Cash Discounts Act.
Room to be announced

JUNE 16

9:00 a.m.
Governmental Affairs
*Civil Services, Post Office, and General Services Subcommittee
To hold hearings on S. 1224, stengthening and clarifying the congressional franking law.
3302 Dirksen Building

9:30 a.m.
Agriculture, Nutrition, and Forestry
Rural Development, Oversight, and Investigations Subcommittee
To hold oversight hearings on the implementation of the Emergency Petroleum Allocation Act, focusing on the energy needs of agriculture, rural America, and the food and fiber processing industry.
324 Russell Building

Banking, Housing, and Urban Affairs
International Finance and Monetary Policy, and Securities Subcommittees
To resume joint hearings on S. 708, clarifying the intent and modifying certain provisions of the Foreign Corrupt Practices Act of 1977.
5302 Dirksen Building

Commerce, Science, and Transportation
To continue hearings on S. 898, proposed Telecommunications Competition and Deregulation Act.
235 Russell Building

Labor and Human Resources
*Labor Subcommittee
To hold hearings on S. 1182, improving the administration of the Longshoremen's and Harbor Workers' Compensation Act by removing certain inequities, reducing incentives for fraud and abuse, and assuring immediate compensation benefits and competent medical treatment for injured employees.
4232 Dirksen Building

10:00 a.m.
Budget
Business meeting, to review reconciliation proposals of standing Senate committees as required by H. Con. Res. 115, the First Congressional Budget Resolution.
6202 Dirksen Building

Energy and Natural Resources
To hold hearings on the nominations of Daniel N. Miller, Jr., of Wyoming, to be an Assistant Secretary of the Interior for Energy and Minerals, Richard Mulberry, of Texas, to be Inspector General, Department of the Interior, Shelby T. Brewer, of Maryland, to be an Assistant Secretary of Energy for Nuclear Energy, and J. Erich Evered, of Nevada, to be Administrator, Energy Information Administration.
3110 Dirksen Building

Environment and Public Works
Water Resources Subcommittee
To hold hearings on S. 810, proposed Inland Waterway User Fee Act.
4200 Dirksen Building

2:00 p.m.
Environment and Public Works
*Nuclear Regulation Subcommittee
To hold oversight hearings on the implementation of the Uranium Mill Tailings Act.
410 Russell Building

2:30 p.m.
Special on Aging
To hold oversight hearings to review short-term financing issues of the social security system.
5302 Dirksen Building

JUNE 17

8:30 a.m.
Commerce, Science, and Transportation
To hold hearings on the nomination of Alan Green, Jr. of Oregon, to be a Federal Maritime commissioner.
235 Russell Building

9:00 a.m.
Appropriations
Defense Subcommittee
To resume hearings on budget estimates for fiscal year 1982 for the Defense Establishment, receiving testimony from public witnesses.
1223 Dirksen Building

Commerce, Science, and Transportation
Surface Transportation Subcommittee
To hold hearings on certain provisions providing for the transfer of Conrail freight lines to private sector railroads and the transfer of Conrail commuter operations to Amtrak, of S. 1100, proposed Northeast Rail Service Act (pending on Senate calendar).
5110 Dirksen Building

9:30 a.m.
Governmental Affairs
To hold hearings on the nominations of Warren R. King, Reggie B. Walton, and Richard S. Salzman, each to be an Associate Judge of the Superior Court of the District of Columbia, and James A. Belson, to be an Associate Judge of the District of Columbia Court of Appeals.
1224 Dirksen Building

Labor and Human Resources
*Labor Subcommittee
To continue hearings on S. 1182, improving the administration of the Longshoremen's and Harbor Worker's Compensation Act by removing certain inequities, reducing incentives for fraud and abuse, and assuring immediate compensation benefits and competent medical treatment for injured employees.
4232 Dirksen Building

Veterans' Affairs
To hold hearings on the substance of S. 266, implementing procedures and guidelines for the interagency sharing of health resources between the De-

partment of Defense and the Veterans' Administration.
412 Russell Building

10:00 a.m.
Commerce, Science, and Transportation
To hold hearings on the nomination of James M. Beggs, of Missouri, to be Administrator of the National Aeronautics and Space Administration.
235 Russell Building

Energy and Natural Resources
Public Lands and Reserved Water Subcommittee
To resume hearings on S. 842, proposed RARE II Review Act.
3110 Dirksen Building

Environment and Public Works
Environmental Pollution Subcommittee
To resume oversight hearings on the implementation of the municipal wastewater treatment construction grants program of the Clean Water Act, and to hold hearings on S. 975, revising and extending for one year certain provisions of the Federal Water Pollution Control Act, and on other related proposals.
4200 Dirksen Building

Governmental Affairs
To hold hearings on S. 1249, providing tools and incentives to the Federal Government in its efforts to collect debts owed the United States.
3302 Dirksen Building

2:00 p.m.
*Environment and Public Works
To hold hearings on the prospective nomination of Nunzio J. Palladino, of Pennsylvania, to be a Member of the Nuclear Regulatory Commission.
4200 Dirksen Building

JUNE 18

9:00 a.m.
Commerce, Science, and Transportation
To hold oversight hearings on the implementation of the Motor Carrier Act (Public Law 96-296).
235 Russell Building

Labor and Human Resources
Employment and Productivity Subcommittee
To resume hearings on employment and training programs in the United States, focusing on objectives of employment and training policy and the relationship between Federal, State and local governments in the funding, design and administration of employment and training programs.
4232 Dirksen Building

9:30 a.m.
Agriculture, Nutrition, and Forestry
Rural Development, Oversight, and Investigations Subcommittee
To resume oversight hearings on the implementation of the Emergency Petroleum Allocation Act, focusing on the energy needs of agriculture, rural America, and the food and fiber processing industry.
324 Russell Building

10:00 a.m.
Environmental Public Works
Water Resources Subcommittee
To resume hearings on S. 621, authorizing funds for the development of certain water resources projects, and to review existing water resources policy and water problems.
4200 Dirksen Building

Governmental Affairs
To hold hearings on proposed legislation expanding the Inspectors General Act of 1978 to include certain departments and agencies within the Federal Government.
3302 Dirksen Building

Judiciary
Separation of Powers Subcommittee
To resume hearings on S. 158, establishing a congressional finding and declaration that human life begins at conception.
6226 Dirksen Building

2:00 p.m.
Environment and Public Works
Water Resources Subcommittee
To continue hearings on S. 621, authorizing funds for the development of certain water resources projects, and to review existing water resources policy and water problems.
4200 Dirksen Building

2:30 p.m.
Special on Aging
To hold hearings on the subject of early retirement and its implications for social security.
6226 Dirksen Building

JUNE 19

9:00 a.m.
Commerce, Science, and Transportation
To resume hearings on S. 898, proposed Telecommunications Competition and Deregulation Act.
235 Russell Building

Labor and Human Resources
Employment and Productivity Subcommittee
To continue hearings on employment and training programs in the United States, focusing on objectives of employment and training policy and the relationship between Federal, State and local governments in the funding, design and administration of employment and training programs.
4232 Dirksen Building

Select on Intelligence
To hold a closed briefing on intelligence matters.
Room S-407, Capitol

10:00 a.m.
Environment and Public Works
Transportation Subcommittee
To resume hearings on S. 841 and S. 1024, bills authorizing funds through fiscal year 1986 for the construction and safety of Federal highways.
4200 Dirksen Building

Judiciary
Criminal Law Subcommittee
To hold hearings on S. 691, strengthening the laws for the criminal infringement of a copyright involving the reproduction or distribution of phonorecords, motion pictures, or audiovisual works.
5110 Dirksen Building

JUNE 22

10:00 a.m.
Commerce, Science, and Transportation
Communications Subcommittee
To hold oversight hearings on the role of the rural telecommunications system in America.
235 Russell Building

Environment and Public Works
To resume oversight hearings on the implementation of the Clean Air Act.
4200 Dirksen Building

1:30 p.m.
Environment and Public Works
Environmental Pollution Subcommittee
To resume oversight hearings on the implementation of the municipal wastewater treatment construction grants program of the Clean Water Act, and to hold hearings on S. 975, revising and extending for one year certain provisions of the Federal Water Pollution Control Act, and on other related proposals.
4200 Dirksen Building

JUNE 23

9:30 a.m.
Commerce, Science, and Transportation
To hold hearings on S. 49, S. 879, and S. 1151, bills extending the period of daylight savings time.
235 Russell Building

Labor and Human Resources
Aging, Family, and Human Services Subcommittee
To hold oversight hearings on the role of the Federal Government in family planning programs of title X of the Public Health Services Act.
6226 Dirksen Building

Labor and Human Resources
Labor Subcommittee
To resume hearings on S. 1182, improving the administration of the Longshoremen's and Harbor Workers' Compensation Act by removing certain inequities, reducing incentives for fraud and abuse, and assuring immediate compensation benefits and competent medical treatment for injured employees.
4232 Dirksen Building

10:00 a.m.
Environment and Public Works
To continue oversight hearings on the implementation of the Clean Air Act.
4200 Dirksen Building

Governmental Affairs
To resume hearings on S. 1080, improving and modifying the Federal regulatory process, and other related measures.
3302 Dirksen Building

Rules and Administration
Business meeting, to mark up Senate Resolution 20, providing for television and radio broadcasting of Senate Chamber proceedings, and other legislative and administrative business.

To resume hearings on S. 1103, authorizing funds through fiscal year 1986 for elementary and secondary education programs, and providing educational support at the State and local level.
4232 Dirksen Building

SENATE—*Thursday, June 11, 1981*

(Legislative day of Monday, June 1, 1981)

The Senate met at 9:15 a.m., on the expiration of the recess, and was called to order by the President pro tempore (Mr. THURMOND).

PRAYER

The Chaplain, the Reverend Richard C. Halverson, LL.D., D.D., offered the following prayer:

Let us pray.

Almighty God of love whose plan for history is to unite all things in Christ, we pray for the unity of our people. We do not ask for uniformity with its leveling process that reduces everything and everybody to the lowest common denominator. We ask for true unity with its bountiful diversity, in which each person finds individual fulfillment in the community of love. Give us unity like the symphony with its variety of instruments, its many different notes which produce the grand harmony. Give us the unity of the tapestry with its threads of every color woven into one masterful design.

Help us to find this unity in the Senate. Help us to appreciate each other, to honor our differences—even the differences which are in opposition—but out of which come the synthesis of truth and action that represents the maximum response of our corporate power and influence.

Help us serve one another, to love one another. We pray this in the name of Him who was incarnate love. Amen.

RECOGNITION OF THE ACTING MAJORITY LEADER

The PRESIDENT pro tempore. Under the previous order, the acting majority leader is recognized.

TRIBUTE TO THE CHAPLAIN

Mr. STEVENS. Mr. President, I am sure all the Senate is grateful to our Chaplain, Reverend Halverson, for his guidance at the beginning of each session. I am particularly pleased to have his prayer this morning because it is most meaningful to Members of the Senate as we now approach a period where there is going to be, I think, great division among us.

THE JOURNAL

Mr. STEVENS. Mr. President, I ask unanimous consent that the Journal of the proceedings to date be approved.

The PRESIDENT pro tempore. Without objection, it is so ordered.

ORDER FOR ROUTINE MORNING BUSINESS

Mr. STEVENS. Mr. President, I ask unanimous consent that following the recognition of the two leaders under the standing order and the special orders for Mr. NUNN and Mr. BRADLEY, there be a period for the transaction of routine morning business not to extend beyond 10 a.m. during which Senators may speak therein for a period not to exceed 3 minutes.

The PRESIDENT pro tempore. Without objection, it is so ordered.

Mr. STEVENS. Mr. President, I reserve the remainder of our time.

RECOGNITION OF THE MINORITY LEADER

The PRESIDENT pro tempore. The Senator from West Virginia.

MARILYN COURTOT, ASSISTANT SECRETARY, U.S. SENATE

Mr. ROBERT C. BYRD. Mr. President, effective June 6, 1981, Marilyn Courtot became Assistant Secretary of the Senate. I am pleased that the present Secretary of the Senate has recognized her ability and experience by appointing her to this top Senate staff position.

Ms. Courtot was hired in 1973 to help modernize the offices under the Secretary and improve the services they provide to Senators. In the last 8 years, she has lent her considerable analytical and administrative talents to this task. She has been instrumental in developing the automated legislative information system, expanding the bill status telephone query service of the Senate Library, and designing and implementing the very educational staff seminars which address various important aspects of the Senate.

I commend Mr. Hildenbrand on his wise selection for the position of Assistant Secretary of the Senate, and I extend every good wish to Ms. Courtot as she pursues her new responsibilities.

I yield to Mr. PROXMIRE such time as he may require.

Mr. PROXMIRE. I thank the Democratic leader.

SENATOR LUGAR AND UAW SAVE JOBS, HOLD DOWN PRICES

Mr. PROXMIRE. Mr. President, in last night's Washington Star, Germond and Witcover described how labor union members and a U.S. Senator saved several hundred jobs in an automobile plant in South Bend, Ind. It was a tribute to the remarkable willingness of the workers at that plant, to the labor union to which they belonged, and to one of our ablest U.S. Senators, DICK LUGAR. The message of that column should not be lost on us. Many Americans fear that the wage-price spiral makes ever-worse inflation inevitable and with it the decline of some of America's most vital industries, particularly the automobile industry. The members of the United Automobile Workers in South Bend and Senator LUGAR showed that we do not have to surrender to this gloomy prospect. The Germond-Witcover column tells the story of how Senator LUGAR's timely and forceful intervention did the job. I ask unanimous consent that it be printed in the RECORD.

There being no objection, the article was ordered to be printed in the RECORD, as follows:

WHEN A UNION TRIED TO GET A CUT IN PAY

(By Jack W. Germond and Jules Witcover)

SOUTH BEND, IND.—About 17 years ago this industrial city in northwest Indiana was shattered economically by the collapse of the Studebaker Corp. as a major auto maker. More than 20,000 jobs were lost in the demise of an enterprise that had been born here and had dominated the city's economy. It was a punishing experience the the city has never been able to forget.

That is probably one of the reasons that South Bend has just witnessed a unique demonstration of labor-management conciliation between the city's chief remaining employer, the Bendix Corp., also founded here about 50 years ago, and Local 9 of the United Auto Workers.

Union offers of sacrifice—including a voluntary pay cut for all UAW members in South Bend—have cushioned the human impact of an increasingly commonplace industrial development: the relocation of a plant from the high labor-cost "Frost Belt" to the lower-cost "Sun Belt."

Although Bendix denied that any pay cut was ever formally offered and rejected even the idea, the firm did adjust its relocation plans, saving several hundred jobs in South Bend. It guaranteed retraining and relocation of all UAW members involved in other parts of the sprawling Bendix complex here.

The highly dramatic offer of a voluntary pay cut, and the wide publicity it stimulated, clearly affected the political climate and put heat on Bendix from some unexpected quarters.

Perhaps the most unique element was the spectacle of a business-oriented Republican senator, Richard Lugar, siding with the union and pressuring the employer to make accommodations. Union officials are convinced that this and other political pressure persuaded Bendix, which has lucrative defense contracts, to work out the concessions.

John M. O'Hare, director of industrial relations for Bendix, denies that pressure was reason, but another Bendix official, David Taylor, calls the agreement "the first of its kind to our knowledge in collective bargaining."

And, although particular local conditions existed here that facilitated it, the negotiation could show the way for other companies

and unions in the beleaguered industrial North to at least temper the lure of lower-cost Sun Belt economic environments.

Bendix two months ago told the union that intolerably high labor costs here were dictating relocation of a brake assembly plant.

The union, to Bendix's surprise, countered with an astonishing offer: if Bendix would reconsider relocating the plant, the members would be asked to absorb the full labor-cost savings that Bendix might achieve by the transfer. Although moving the plant might eliminate at most 900 jobs, the union plan was for all 35,000 UAW workers at the Bendix complex here to take a pay cut. The union estimated the company would be saving $3,400 per year per worker.

Lugar, learning of the informal offer, wrote to William Agee, the Bendix president, urging acceptance. "The national fight against inflation would be served," Lugar wrote, "if there were more recognition that wages and benefits must occasionally be restricted in bad times, just as they should increase in good times."

Bendix, turning aside the idea of a voluntary pay cut, argued in effect that it would be subsidizing an unprofitable plant with money from employees working at profitable Bendix plants and thus not solving the basic problem of a facility that couldn't make it on its own.

Joe Burkus, president of Local 9 during the negotiations, says the company's attitude toward the voluntary pay cut proved that Bendix really just wanted to get the plant out of the union environment altogether. "They just wanted to move," he said. "If they were looking for relief, they would have grabbed it. We really put the monkey on their back."

But Bendix's O'Hare says there was no sense keeping a plant in South Bend that was just "withering," and that it was significant in the end that Local 9 recognized that fact and cooperated to minimize the human impact. The voluntary pay cut, while never implemented, was also significant, O'Hare says, as a symbol of labor's willingness to make sacrifices to help management cope in a time of economic difficulty.

Whether other unions in Frost Belt cities threatened with plant relocations will be willing to make similar gestures is an open question. Taylor says, "the Studebaker experience has had a lingering effect on the psychology of South Bend" that may make the situation here unusual.

But the loss of Northern industrial jobs through relocation to the South is increasingly widespread, and the only hope may be greater labor-management conciliation of this sort—helped along perhaps by political pressure.

A PRAGMATIC CASE FOR RATIFICATION

Mr. PROXMIRE. Mr. President, the Genocide Convention offers the ideal opportunity to combine idealism with some very realistic benefits. Ratification would help put to rest the mischievous accusations of Russian diplomats that this country somehow condones genocide.

Furthermore, ratifying the convention could only improve our often-troubled relations with the Third World. It would buttress our moral position in dealing with the nations of Latin America, Africa, and Asia—many of whom have already ratified the treaty.

Finally, the implementing legislation, by enabling us to try our nationals at home, would strengthen our case for extradition of U.S. nationals charged with genocide abroad.

The ratification of the Genocide Convention is exactly the symbol we need today—enhancing our image abroad while furthering our own interests.

In fact, such action would be in perfect harmony with the "hard-nosed pragmatism" of the current administration. The Reagan administration's support for ratification was made clear by Secretary Haig in his confirmation hearings and is an indication, of course, of the support of the Reagan administration for the genocide treaty.

Mr. President, now, more than ever, we should ratify the genocide convention. I urge my colleagues to take action quickly.

I thank the Democratic leader.

Mr. STEVENS. Mr. President, I yield back the remainder of the leader's time on this side.

The PRESIDENT pro tempore. Time has been yielded back on the majority side.

Mr. ROBERT C. BYRD. Mr. President, I suggest the absence of a quorum on my time.

The PRESIDENT pro tempore. The clerk will call the roll.

The legislative clerk proceeded to call the roll.

Mr. BRADLEY. Mr. President, I ask unanimous consent that the order for the quorum call be rescinded.

The PRESIDING OFFICER. Without objection, it is so ordered.

ORDER OF PROCEDURE

The PRESIDING OFFICER. The Chair advises the Senator that, under the previous order, the Senator from Georgia (Mr. NUNN) was to be recognized first for not to exceed 15 minutes, following which the Senator from New Jersey was to be recognized for not to exceed 15 minutes, and, at no later than 10 o'clock, under the previous order, the Senate would go into executive session to proceed to the consideration of Calendar No. 2.

Mr. STEVENS. Will the Senator yield?

Mr. BRADLEY. Yes.

Mr. STEVENS. Mr. President, may I inquire of the Senator from Georgia how much time he requires under the special order? Does the Senator intend to use his special order this morning?

Mr. NUNN. Mr. President, I shall take whatever time is available and put the remainder of my remarks in the RECORD. I do not want to hold up other business. I probably could summarize my remarks in 2 or 3 minutes.

Mr. STEVENS. Mr. President, may I inquire which Senator wishes to proceed with the special order first? Does the Senator from Georgia have any objection to the Senator from New Jersey proceeding?

Mr. NUNN. No, Mr. President, I was not fully aware what time I was supposed to begin this morning. I shall defer to the Senator from New Jersey and to the Senator from Alaska as to what the schedule will be.

EXTENSION OF ROUTINE MORNING BUSINESS

Mr. STEVENS. Mr. President, I ask unanimous consent that the period for routine morning business be extended until 10:15 and that Senators may speak therein for not to exceed 15 minutes.

The PRESIDING OFFICER. Without objection, it is so ordered.

EMERGENCY PREPAREDNESS ACT OF 1981

Mr. BRADLEY. Mr. President, the most pressing aspect of energy policy today is preparation for the disruptions in our oil supply that are virtually inevitable over the next decade. Ironically, this aspect of energy policy has been neglected, even though three relatively small disruptions—the Arab embargo in 1973, Iran in 1979, and the Iran-Iraq war in 1980—have had terrible consequences for our standard of living and for economic growth. The latest turmoil in the Middle East only underscores the need to prepare. The best way to prepare for oil supply disruptions is to stockpile oil in advance. My longstanding advocacy of the strategic petroleum reserve reflects this concern about preparedness. But, Mr. President, what happens if a disruption occurs before our reserves are sufficient? We will face two unappealing choices: Rapidly rising oil prices or Government price controls and allocations.

Today Senator PERCY and I are introducing the Emergency Preparedness Act of 1981 in an attempt to avoid a return to ineffective price controls and allocations. Under our approach, we would rely on market forces to distribute scarce supplies and determine prices, but we would also provide Federal financial aid to citizens during the disruption. If the supply disruption is so large that it threatens national security, and the President feels he must allocate oil supplies, he can do so by invoking authority he already has under the Defense Production Act of 1950 or under the Energy Policy and Conservation Act of 1975.

With our plan, the 1980 windfall profit tax would be augmented so that additional revenues, which would come from the price increase that will be inevitable during a disruption, could be recycled back into the economy. At the same time, income transfer payments would increase to low-income individuals. The President also would reduce income and payroll taxes so that taxpayers would have more income to deal with the higher prices. Increased Government revenues from the windfall profit tax—a significant disruption would increase revenues on the order of tens of billions of dollars per year—would offset lower Government revenues from income and payroll taxes.

In addition, the President would draw on windfall profit tax revenues to provide emergency block grants to State Governors. Each Governor would be required to distribute these funds to local governments to maintain essential public services such as police and fire protection. The Governors also could use this money for other priority activities which are unique in their State. In other words, a rise in oil prices will cause personal hardship and economic damage, but it will also provide the Government with the resources to offset a portion of the negative effect.

The recycled funds would be allocated under a formula proposed by the President and approved by the House and Senate. At the outset of a disruption, both Houses of Congress would have to give their approval before the plan could be implemented.

Adoption of this plan would send a clear and true signal to the Nation, that signal being: Prepare for rising prices during an oil supply disruption. If Americans get that message, they will have real incentives to make arrangements that are best suited for their individual needs. The public has not had such incentives in the past because people have been assured that the Government would intervene with price controls and allocation rules and take other steps to help powerful and important groups in the event of a disruption. Although such measures did not work well at all, people expected them to be effective and therefore saw little, if any, need to take preparatory action of their own.

Furthermore, our plan would respond to concerns about equity during a disruption by increasing the windfall profit tax and by assuring that the revenues are recycled to taxpayers and to low-income individuals. In so doing, we can partially offset the harmful effects of rising prices without removing the incentives to prepare for disruptions.

Mr. President, what is the alternative to this plan? It is some form of price controls coupled with gasoline rationing and Government decisions about who gets oil. After 10 years of controls, can it really be said that they protected the poor from rising prices? No. We have seen price controls cannot stop price increases. By relying on price controls to assist the poor, we fool ourselves. But others benefited: Specifically, the politically powerful who were able to mold the regulations to their advantage. Our bill would assist the poor directly with financial aid.

More troubling, however, is that the threat or promise of price controls reduces individual incentives to prepare for disruptions. Furthermore, price controls encourage oil consumption during a disruption and discourage production of alternatives for imported oil. Price controls send false and damaging signals to the economy that oil is not scarce, that conservation is not needed, and that alternative sources of energy are unimportant. As a result, world oil prices would be driven still higher, and our allies would again be enraged.

On top of these disadvantages, we all know that price controls are nearly impossible to remove after they are in place. The temporary controls imposed in 1971 were extended in 1973, again in 1975, and will finally expire next September.

Now we must choose between a market approach and a regulatory approach. Clearly, neither option will work perfectly. The Nation will suffer under either option. But, in my opinion, one of these options is clearly better than the other.

Mr. President, again, instead of relying on Washington to allocate scarce supplies and try to combat rising prices, I say we should have the Federal Government provide financial protection for middle- and low-income citizens and essential public services while we let the market determine oil prices and the distribution of supplies. By taking this course, we will not be encouraging consumption just when we want to discourage it; we will not be discouraging energy production just when we want to encourage it; we will not boost world oil prices just when they are rising rapidly anyway; we will not alienate our allies just when cooperation is most essential; and we will not add to confusion in the market just when panic is already a possibility.

Three times in the last 8 years, we have seen what happens when Washington tries to control prices and allocate oil supplies. We know our oil supplies can be interrupted again at any time. We now have an opportunity—indeed, I say an obligation—to make sure that we do not repeat past mistakes. It is time to chart a new course.

I ask unanimous consent that the full text of the Emergency Preparedness Act of 1981, with accompanying summary sheet, and a supporting article by Robert Hall and Robert Pindyck in the June Technology Review, be printed in the RECORD.

There being no objection, the material was ordered to be printed in the RECORD, as follows:

S. 1354

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled,

SECTION 1 (a) SHORT TITLE.—This Act may be cited as the "Emergency Preparedness Act of 1981"

(b) TABLE OF CONTENTS.—

Sec. 1. Short title; table of contents
Sec. 2. Statement of findings and purposes
Sec. 3. Definitions
TITLE I—STANDBY REVENUE RECYCLING AUTHORITY
Sec. 101 Standby recycling authority
Sec. 102 Approval of Proposed Standby Plan
Sec. 103 Implementation of the Approved Standby Plan
Sec. 104 Reimbursement to States
Sec. 105 Expiration
TITLE II—USE OF THE STRATEGIC PETROLEUM RESERVE
Sec. 201 Crude Oil Access
Sec. 202 Amendments to the Strategic Petroleum Reserve Plan
TITLE III—INVESTIGATIONS AND REPORTS
Sec. 301 Tax incentives for oil storage
Sec. 302 International cooperation in preparedness for supply disruptions.

STATEMENT OF FINDINGS AND PURPOSES

SEC. 2 (a) Congress finds and declares that—

(1) disruption in the supply of imported oil are likely during the next decade;

(2) such emergencies will disrupt normal petroleum market operations; standby sources of supply of crude oil, such as strategic stockpiles, should be used to mitigate the potential for market turmoil;

(3) if oil stockpiles are unavailable or insufficient to fully offset the reduction in oil available to the world oil market, oil prices will rise, possibly rapidly and to high levels;

(4) without compensating action, such high prices will create severe economic dislocations and individual hardships;

(5) if Federal action is not taken to ameliorate these economic consequences of disruptions, individual states may be compelled to implement differing, perhaps less efficient emergency programs;

(6) severe oil supply disruptions constitute a threat to public health, safety and welfare which can most effectively, efficiently, and equitably be dealt with through prompt fiscal action by the executive branch of Government; and

(7) no emergency program will be able to avoid entirely the market disruptions and personal hardships that will accompany a petroleum supply disruption; however, prompt fiscal action by the executive branch of Government will reduce individual hardships and economic dislocations more effectively than other mechanisms used in the past.

(b) The purpose of this Act is to grant the President of the United States authority during severe supply disruptions of crude oil to recycle Federal tax revenues to U.S. residents and State governors for further distribution. The authority granted under this Act shall be exercised only for the purpose of minimizing the adverse effects of such supply disruptions on the nation.

(1) "United States" means the several States, the Commonwealth of Puerto Rico, the District of Columbia, and the Trust Territories of the United States.

(2) "State" means the 50 States, the Commonwealth of Puerto Rico, the District of Columbia, or the Trust Territories of the United States.

(3) "severe petroleum supply disruption" means a reduction in the volume of oil available to the world oil market which the President determines—

(A) is the primary cause or is likely to be the primary cause of a 20 percent increase in the world price of petroleum products over a 3-month period; and

(B) is having or can reasonably be expected to have a major adverse effect on public health, safety or welfare or the national economy. A severe petroleum supply disruption exists only as long as either the world price of petroleum products remains above the pre-disruption level or the volume of oil available to the world oil market remains below the pre-disruption level.

(4) "to recycle Federal tax revenues" means to rapidly return to the economy the increased revenues of the Federal Crude Oil

Windfall Profit Tax of P.L. 96-223, or other disruption-related, increased Federal revenues, that the President determines have resulted or are likely to result from a severe petroleum disruption.

(5) "refined petroleum products" means gasoline, kerosene, distillates (including Number 2 fuel oil), liquid petroleum gases, refined lubricating oils, diesel fuel, and residual fuel.

(6) "world price of petroleum products" means a weighted average of spot and contract prices as reported in several world marketing centers as determined by the President.

TITLE I—STANDBY REVENUE RECYCLING AUTHORITY

STANDBY RECYCLING AUTHORITY

SEC. 101. (a) Not later than one hundred and eighty calendar days after the date of the enactment of this title, the President shall submit a proposed standby plan to Congress which when implemented will permit the President to recycle Federal tax revenues both to state governors for further distribution and to residents of the United States.

(b) The proposed standby plan under subsection (a), to the maximum extent practicable, shall provide for—

(1) economic efficiency in all sectors of the economy;

(2) the mitigation of extreme personal hardship caused by the severe petroleum supply disruption;

(3) the national defense and other essential services for the public;

(4) the protection of public safety, health and welfare;

(5) the prompt recycling of Federal tax revenues commencing as soon as practicable after the President determines the existence of a severe petroleum supply disruption;

(6) assurances that each resident of the United States is eligible for assistance under this title;

(7) procedures by which the President would ensure that highest priority is given to the enforcement of anti-trust statutes that will guard against anticompetitive practices during severe petroleum supply disruptions; and

(8) the fulfillment of international treaty obligations.

(c) The plan providing for the recycling of Federal tax revenues shall use a combination of emergency distribution of funds to state Governors for further distribution, emergency changes in withholding rates, reductions in payroll taxes, additions to Social Security and Supplemental Security Income payments, or other distribution mechanisms that the President elects to address the objectives listed in (b). The proposed standby plan shall provide guidelines for state governors and instructions for the Attorney General of the United States to ensure the objectives listed in (b) are met. Reasonable accounting and auditing procedures shall be established. The proposed standby plan shall be developed in consultation with State Governors and with the benefit of public participation.

(d) The emergency distribution of funds to each state Governor shall enable each Governor, to the maximum extent practicable, to mitigate the effects of higher oil prices on low-income or otherwise disadvantaged people; public health, safety and welfare activities in the state; essential public services in the state; economic efficiency; people experiencing extreme personal hardship; and other priority activities in the state as determined by the Governor.

(e) The proposed plan shall specify the formula by which the recycled Federal tax revenues will be distributed to the economy. To avoid disproportionate burdens on any one sector, income group, or region, the formula shall be designed to give priority to those individuals or regions who are most adversely affected and least capable of absorbing higher oil prices. The percentages of total recycled Federal tax revenues to be distributed to each of the following categories shall be specified in the proposed plan: individuals via lower Federal income tax withholding rates, individuals via other Federal payments, each state governor for further distribution to essential public services, each state governor for further distribution to low-income or otherwise disadvantaged people, and other categories specified by the President.

(f) The proposed plan shall include adjustments and simplifications to the Crude Oil Windfall Profit Tax, P.L. 96-233, that would eliminate the tax on oil discovered during and after the severe supply disruption and that would increase the tax rate on the incremental revenues resulting from the supply disruption. The adjusted tax shall apply to all oil flowing from wells in production prior to the disruption. In formulating the proposed plan, the President shall consider exempting from the windfall profit tax oil stored prior to the disruption.

APPROVAL OF PROPOSED STANDBY PLAN

SEC. 102. (a) The proposed standby plan transmitted to the Congress pursuant to section 101(a) shall bear an identification number and shall be transmitted to both Houses of Congress on the same day and to each House while it is in session.

(b) No such standby plan may be considered approved for purposes of section 103(a) of this title unless between the date of transmittal and the end of the first period of 60 calendar days of continuous session of Congress after the date on which action is transmitted to each House, each House of Congress passes a resolution described in subsection (d)(2).

(c) For the purpose of subsection (b) of this section—

(1) continuity of session is broken only by an adjournment of Congress sine die; and

(2) the days on which either House is not in session because of an adjournment of more than 3 days to a day certain are excluded in the computation of the 60-calendar-day period.

(d)(1) This subsection is enacted by Congress—

(A) As an exercise of the rulemaking power of the Senate and the House of Representatives, respectively, and as such it is deemed a part of the rules of each House, respectively, but applicable only with respect to the procedure to be followed in that House in the case of resolutions described by paragraph (2) of this subsection; and it supersedes other rules only to the extent that it is inconsistent therewith; and

(B) With full recognition of the constitutional right of either House to change the rules (so far as relating to the procedure of that House) at any time, in the same manner and the same extent as in the case of any other rule of the House.

(2) For purposes of this subsection, the term "resolution" means only a resolution of either House of Congress the matter after the resolving clauses of which is as follows: "That the ———— approves the standby plan numbered —— submitted to the Congress on —, 19—.", the first blank space therein being filled with the name of the resolving House and the other blank spaces being appropriately filled.

(3) A resolution once introduced with respect to the standby plan shall immediately be referred to a committee by the President of the Senate or the Speaker of the House of Representatives, as the case may be.

(4)(A) If the committee to which a resolution with respect to the standby plan has been referred has not reported it at the end of the 20 calendar days after its referral, it shall be in order to move either to discharge the committee for further consideration of such resolution or to discharge the committee from further consideration of any other resolution with respect to such standby plan which has been referred to the committee.

(B) A motion to discharge may be made only by an individual favoring the resolution, shall be highly privileged (except that it may not be made after the committee has reported a resolution with respect to the standby plan), and debate thereon shall be limited to not more than 1 hour, to be divided equally between those favoring and those opposing the resolution. An amendment to the motion shall not be in order, and it shall not be in order to move to reconsider the vote by which the motion was agreed to or disagreed to.

(C) If the motion to discharge is agreed to or disagreed to, the motion may not be renewed, nor may another motion to discharge the committee be made with respect to any other resolution with respect to the standby plan.

(5)(A) When the committee has reported, or has been discharged from further consideration of, a resolution, it shall be at any time thereafter in order (even though a previous motion to the same effect has been disagreed to) to move to proceed to the consideration of the resolution. The motion shall be highly privileged and shall not be debatable. An amendment to the motion shall not be in order, and it shall not be in order to move to reconsider the vote by which the motion was agreed to or disagreed to.

(B) Debate on the resolution referred to in subparagraph (A) of this paragraph shall be limited to not more than 10 hours, which shall be divided equally between those favoring and those opposing such resolution. A motion further to limit debate shall not be debatable. An amendment to, or motion to recommit the resolution shall not be in order, and it shall not be in order to move to reconsider the vote by which such resolution was agreed to or disagreed to.

(6)(A) Motions to postpone, made with respect to the discharge from committee, or the consideration of a resolution and motions to proceed to the consideration of other business, shall be decided without debate.

(B) Appeals from the decision of the Chair relating to the application of the rules of the Senate or the House of Representatives as the case may be, to the procedures relating to a resolution shall be decided without debate.

(e) If either House rejects a resolution described in subsection (d)(2), the President shall transmit to the Congress a revised proposed standby plan within 30 days of the rejection. The revised proposed standby plan shall be approved or rejected following the procedures of this section. The President shall continue to submit revised plans following the procedures of this section until a proposed plan is approved by both Houses of Congress.

IMPLEMENTATION OF THE APPROVED STANDBY PLAN

SEC. 103. (a) The President may implement the standby plan approved under section 102 whenever the President determines that a severe petroleum supply disruption exists and only with the passage of joint resolution authorizing a specific amount of Federal tax

revenues to be recycled. In the event of a severe petroleum supply disruption the President shall transmit evidence of the determination called for in the preceding sentence and a request for a joint resolution that specifies the amount of Federal tax revenues to be recycled according to the approved standby plan to both Houses of Congress on the same day.

(b) No such joint resolution may be considered approved for purposes of subsection (a) unless between the date of transmittal and the end of the first period of 6 calendar days of the date on which such action is transmitted to such House, each House of Congress passes the joint resolution described in subsection (d)(2).

(c) If the Congress is not in session the President may call the Congress into emergency session.

(d)(1) This subsection is enacted by Congress—

(A) As an exercise of the rulemaking power of the Senate and House of Representatives, respectively, and as such it is deemed a part of the rules of each House, respectively, but applicable only with respect to the procedure to be followed in that House in the case of joint resolutions described by paragraph (2) of this subsection; and it supersedes other rules only to the extent that it is inconsistent therewith; and

(B) With full recognition of the constitutional right of either House to change the rules (so far as relating to the procedure of that House, at any time, in the same manner and to the same extent as in the case of any other rule of the House.

(2) For purposes of this subsection, the term "joint resolution" means only a resolution of Congress as follows:

"The President is authorized to implement the plan submitted by the President and approved by Congress under the procedures of Section 102 of the Emergency Preparedness Act of 1981. The President is authorized to recycle no more than $—— over the twelve-month period beginning on the date of enactment of this joint resolution." The blank in the joint resolution will be filled with the amount of Federal tax revenues to be recycled over the twelve-month period beginning on the date of enactment of the joint resolution but the President shall not recycle revenues in excess of the amount of incremental Windfall Profit Tax revenues, or other disruption-related increased Federal revenues, collected during and as a primary result of the severe petroleum supply disruption.

(3) A joint resolution once introduced shall immediately be referred to the Committees on House Ways and Means, House Energy and Commerce, Senate Finance and Senate Energy and Natural Resources by the President of the Senate or the Speaker of the House of Representatives, as the case may be.

(4)(A) If the committee to which a joint resolution has been referred has not reported it at the end of 2 calendar days after its referral, it shall be in order to move either to discharge the committee from further consideration of such joint resolution or to discharge the committee from further consideration of any other joint resolution which has been referred to the committee.

(B) A motion to discharge may be made only by an individual favoring the joint resolution, shall be highly privileged and debate thereon shall be limited to not more than 1 hour, to be divided equally between those favoring and those opposing the joint resolution. An amendment to the motion shall not be in order, and it shall not be in order to move to reconsider the vote by which the motion was agreed to or disagreed to.

(C) If the motion to discharge is agreed to or disagreed to, the motion may not be renewed, nor may another motion to discharge the committee be made with respect to any other joint resolution.

(5)(A) When the committee has reported, or has been discharged from further consideration of, a joint resolution, it shall be at any time thereafter in order (even though a previous motion to the same effect has been disagreed to) to move to proceed to the consideration of the joint resolution. The motion shall be highly privileged and shall not be debatable. An amendment to the motion shall not be in order, and it shall not be in order to move to reconsider the vote by which the motion was agreed to or disagreed to.

(B) Debate on the joint resolution referred to in subparagraph (A) of this paragraph shall be limited to not more than 10 hours, which shall be divided equally between those favoring and those opposing such joint resolution. A motion further to limit debate shall not be debatable. An amendment to, or motion to recommit the joint resolution shall not be in order, and it shall not be in order to move to reconsider the vote by which such joint resolution was agreed to or disagreed to.

(6)(A) Motions to postpone, made with respect to the discharge from committee, or the consideration of a joint resolution and motions to proceed to the consideration of other business, shall be decided without debate.

(B) Appeals from the decision of the Chair relating to the application of the rules of the Senate or the House of Representatives, as the case may be, to the procedures relating to a joint resolution shall be decided without debate.

(e) The procedures described in (a) and (b) above may also be initiated by either House of Congress. If the President vetoes the measure so initiated, the Congress may attempt to override the veto in the usual manner.

(f) The President may recycle revenues in addition to those initially requested under the procedures described in this section by submitting an additional request using the same procedure.

REIMBURSEMENT TO STATES

SEC. 104. The President may reimburse any State for expenses incurred by such State in preparation for or execution of responsibilities delegated to such State at its request by the President under this title.

EXPIRATION

SEC. 105. The provisions of this title shall cease to have effect on the date of expiration of the Windfall Profit Tax, P.L. 96-223.

TITLE II—USE OF THE STRATEGIC PETROLEUM RESERVE

CRUDE OIL ACCESS

SEC. 201. Within three months after the date of enactment of this title, the President shall submit to Congress a report describing the advisability of competitive sales from the Strategic Petroleum Reserve to ensure emergency access to crude oil for particularly affected refiners in lieu of a standby crude oil allocation program. The study shall examine competitive sale or auction procedures, determination of eligible participants (for example, whether refiners serving rural or agricultural regions should receive priority in the competitive sale or auction), volumes to be made available for competitive sale or auction, minimum volumes of Reserve to be maintained as necessary for wartime mobilization, and the use of the Reserve to meet international obligations.

AMENDMENTS TO THE STRATEGIC PETROLEUM RESERVE PLAN

SEC. 202. Within six months after the date of enactment of this title, the President shall submit an amendment to the Strategic Petroleum Reserve plan, in accordance with Section 154 of Puolic Law 94-163, that would incorporate any procedures recommended by the study called for in Section 201.

TITLE III—INVESTIGATIONS AND REPORTS

OIL STORAGE TAX INCENTIVES

SEC. 301. Within six months after the date of the enactment of this title, the President shall submit a full and detailed report on the advisability and alternative means of (1) reducing the tax liability of persons who draw down oil reserves during oil supply disruptions, and (2) providing tax or other incentives for the construction of private-sector oil storage facilities and the maintenance of increased private-sector oil reserves.

INTERNATIONAL COOPERATION

SEC. 302. Within six months after the date of the enactment of this title, the President shall submit a full and detailed report on the manner in which oil stockpile and demand restraint measures have been and may be coordinated among some or all allies and trading partners.

FACT SHEET: S. 1354, EMERGENCY PREPAREDNESS ACT OF 1981

CONCEPT

Instead of controlling oil prices and attempting to allocate oil supplies during petroleum supply disruptions, this bill would allow market forces to distribute oil supplies; it would offset the negative effects of higher oil prices by quickly recycling the unanticipated government revenues collected from the existing windfall profits tax. Rising oil prices have the same economic effect as an increased excise tax on oil; this bill would offset this effective tax increase with a tax reduction. It would reduce Federal income tax withholding rates to maintain a portion of consumer spending power, thus offsetting the depressing effect on the economy caused by higher oil prices. Also, the bill would recycle revenues to state governors for further distribution to people who are especially hard hit by higher prices and to essential public services such as police, fire and health services. Other existing revenue distribution mechanisms are also authorized for use.

STUDIES

The President is directed to evaluate three additional emergency preparedness options. First, the Strategic Petroleum Reserve could be used to provide access to crude oil, instead of a crude oil allocation scheme; an amendment to the SPR plan to this effect is requested. The second option would provide tax incentives to increase oil storage prior to a disruption. Finally, internationally coordinated stockpiling and emergency demand restraint measures would be investigated.

BACKGROUND

At the outset of the first oil supply disruption in 1973, the vestiges of President Nixon's wage and price controls were still in place. One month after the 1973 October war the Congress passed the Emergency Petroleum Allocation Act of 1973 which extended and expanded the price controls and allocations that were in place. These controls were again extended by the Energy Policy and Conservation Act of 1975 and remained in place until January 28, 1981 when President Reagan removed them. The standby authority to impose price controls and allocations and the authority to ration gasoline expire on September 30, 1981. Under the Energy Policy and Conservation Act of 1975 the President already has the authority to allocate oil supplies if necessary to meet international obli-

gations. Under the Defense Production Act of 1950 the President already has the authority to allocate oil supplies if it is necessary to promote the national defense.

SECTION-BY-SECTION ANALYSIS: S. 1354. EMERGENCY PREPAREDNESS ACT OF 1981

Sec. 1.—Short title and table of contents:

Sec. 2.—Findings and purposes:

Sec. 3.—Definitions:

TITLE I—STANDBY REVENUE RECYCLING AUTHORITY

Sec. 101.—Standby Recycling Authority:

Subsection (a) of this section requires the President to propose a standby plan to Congress which, when implemented under section 103, will provide for the rapid recycling of Federal tax revenues both to state governors (including Puerto Rico and the District of Columbia) for further distribution and to individuals residing in the United States. This plan would be independent of and prepared prior to any particular supply disruption.

Subsection (b) sets forth the objectives to be achieved by the plan under subsection (a) including protection of public health, safety, and welfare and the national defense; maintenance of essential public services; and economic efficiency. In addition, proposed plan would be available to assist all residents of the U.S. and would commence as soon as practicable after the President determines the existence of a severe petroleum supply disruption. Measures are called for to ensure against antitrust violations and to meet international obligations.

Subsection (c) sets forth the revenue distribution mechanisms available to the President to meet the objectives in subsection (b). Mechanisms include emergency distributions of funds to state governors (including Puerto Rico, the District of Columbia and U.S. Trusts and Territories), emergency changes in withholding rates, additions to Social Security and Supplemental Security Income payments, or other distribution mechanisms that the President elects. The plan shall be developed in consultation with the Governors and the public.

Subsection (d) describes the role of the state Governors. The emergency block grants will enable each Governor to mitigate the effects of higher oil prices on low-income or otherwise disadvantaged people, essential public services, people experiencing severe personal hardship, and other priority activities in the state as determined by the Governor.

Subsection (e) requires the President to include in the proposed plan the formula by which revenues would be recycled.

Subsection (f) requires the President to include in the proposed plan adjustments and simplifications to the Crude Oil Windfall Profits Tax that would eliminate the tax on oil discovered during and after the severe supply disruption and that would increase the tax on all oil flowing from wells in production prior to the disruption.

Sec. 102.—Approval of Proposed Standby Plan:

The President's proposed plan shall be approved only with the affirmative vote of both Houses of Congress. This section sets forth expedited procedures to be used for Congressional review.

Sec. 103.—Implementation of the Approved Standby Plan:

Subsection (a) of this section authorizes the President to implement the standby plan only when he determines that a severe petroleum supply disruption (defined in Section 3) exists or is imminent and only after the joint resolution described below is passed by both Houses.

Subsections (b) through (f) describe the procedures that would be used to determine how much money would be recycled during a supply disruption. Specifically, the President or either house of Congress could initiate the action and would specify the amount of money to be recycled over the year following the determination of a severe supply disruption. A joint resolution containing the amount of money to be recycled would be required.

Sec. 104.—Reimbursement to States:

This section authorizes the President to reimburse any State for expenses incurred by such State while preparing for or executing responsibilities delegated to the State under this title.

Sec. 105.—Expiration:

The provisions of this title would expire on the date of expiration of the Windfall Profit Tax.

TITLE II—USE OF THE STRATEGIC PETROLEUM RESERVE

Section 201 directs the President to evaluate the auction of the Strategic Petroleum Reserve to particularly affected refiners in lieu of a standby crude oil allocation program. Section 202 calls for an amendment to the SPR plan incorporating the results of this evaluation.

TITLE III—INVESTIGATION AND REPORTS

This title directs the President to prepare two reports to Congress on the following subjects:

1. oil storage tax incentives
2. international cooperation on stockpiling and demand restraint measures.

OIL SHOCKS AND WESTERN EQUILIBRIUM

(By Robert E. Hall and Robert S. Pindyck)

Energy prices rose dramatically in the 1970s, contributing to the chronic problems of inflation and economic stagnation plaguing so many countries. The odds are good that world energy prices will continue to rise during the next 20 years. What will this mean for economic policy and performance in the industrial nations?

World oil prices could be sharply and unexpectedly accelerated by political turbulence in some of the major oil-producing countries, as we saw recently with Iran. Indeed, none of the major oil-exporting countries are bastions of stability, and the possibilities for supply cutoffs are numerous. Any country in the Persian Gulf, including Saudi Arabia, may face political upheaval that could reduce or even terminate its production of oil. While the likelihood of another Mideast war has decreased, this possibility cannot be ruled out and would almost certainly lead to major production cutbacks by Arab exporters. Military intervention by major powers could likewise lead to a supply cutoff.

Of course, the future of energy prices is highly uncertain, in part because of the inherent instability of the world oil market. It is conceivable, for example, that the world price of oil could fall in real terms over the next 20 years, or rise only slowly. From 1974 to 1978, the economic objective of maximizing long-run revenue seemed to dominate the setting of OPEC prices, and recent analysis indicates that a return to such a policy over the next two decades could lead to real oil prices lower than today's levels. Or the OPEC cartel could break apart, leading to competitive oil prices well below current prices. Also, major new reserve discoveries and unexpected production increases in countries such as Mexico could help to push down oil prices.

But all in all, industrialized countries must be prepared to face further increases in oil prices, and thus increases in the cost of energy in general. These increases may be gradual, but more likely they will be sharp and unexpected as in 1974 and 1979. The consequences can be severe, particularly if the shocks occur when these countries are already suffering from serious problems of inflation, unemployment, and reduced economic growth. Do rising prices necessarily imply an era of sharply reduced economic growth, greater unemployment, and increased inflation? Does it mean serious balance-of-payments problems for the oil-importing countries, and will it lead to destabilization of the international monetary system?

The answers to these questions depend largely on the kinds of economic and energy policies the industrialized countries adopt, both now and in response to future price shocks. With the proper policies, the impact of future energy price increases will be significant but far from catastrophic. Indeed, the challenge facing the industrial nations during the next two decades will be to absorb the necessary costs of rising energy prices without incurring additional unnecessary costs. If they can meet this challenge, energy prices will not threaten their economic prosperity.

DIRECT AND INDIRECT EFFECTS

Rising energy prices have two distinct effects on an industrial economy. First, they reduce the total real national income available for domestic consumption and investment. When energy consumers pay more in real terms to foreign energy producers, their real incomes must fall; even the best economic policy cannot change this.

Whenever goods consumed directly or used in production become more costly to import or produce, the total goods available for consumption in the economy are reduced. It does not matter whether a cartel raises its monopoly price or domestic energy sources become more expensive. In either case, the higher cost of energy will mean a lower real national income, which in turn means lower real wages, profits, and consumption levels. Furthermore, this reduction in income would occur even if the economy were kept close to full capacity.

Second, if energy price increases are rapid and unexpected they create sever inflation, high unemployment, and low investment. This adjustment effect cannot be eliminated but can be reduced significantly through proper economic policy. With the wrong policies, however, these problems may far exceed the direct effect and become a serious threat to economic growth and stability. This adjustment effect led to the inflationary recessions in all the major countries of the Organization for Economic Corporation and Development (OECD) following the 1973–74 shock and appear to be following the 1979 shock as well.

Adjustment problems occur because most modern economies exhibit rigidities in prices, the use of inputs to production, and wages. For example, prices of goods other than energy do not fall rapidly to reflect changes in relative scarcity, and industries cannot quickly shift inputs to production in response to new energy prices. Perhaps most important, real wage rates often fail to fall quickly to the lower equilibrium level consistent with higher energy prices and reduced national income. Labor prices itself out of the market, and full employment becomes uneconomical.

LOSS IN REAL INCOME

If energy prices rise slowly and steadily, the effect is to depress the level and growth rate of real national income. The size of this effect depends on the role of energy in the economy, both as a fraction of GNP and the ability of consumers and producers to conserve energy when it becomes more expensive. If the share of energy as a fraction of GNP is very small, then even a large price increase will have only a small effect on real income. Alternatively, if the demand for energy is highly price-elastic—if it is easy for households and industries to consume less

energy as prices rise—the impact is again small, even if energy's share is large.

The share of energy as a fraction of GNP varies among the OECD countries, ranging from a low of about 8 percent in Canada and the United States to a high of about 10 percent in Japan. These cost shares limit the extent to which an energy price increase will depress real national income. If there are no possibilities for substitution away from energy, a 10 percent rise in the price of energy would reduce real national income by about 0.9 percent in the United States and about 1.1 percent in Japan. The greater the potential for substitution, the smaller are these effects. Based on emerging estimates of the elasticity of energy demand (-0.6 overall) and current energy shares, we have calculated that for the OECD as a whole, a 10 percent increase in energy price would lead to approximately a 0.8 percent reduction in real national income.

What are the implications for the OECD economies over the next two decades? Suppose that the price of energy in real terms were to rise smoothly for the rest of the century at an annual rate of 5 percent. Oil would sell for nearly $100 per barrel in today's dollars in the year 2000—a price that many view as a "backstop" at which oil could be economically replaced by nonconventional energy sources.

Over the next two decades, this hypothetical 5 percent annual increase in energy prices would depress real national income growth in the OECD by about 0.4 percent per year, a 10 percent reduction in the projected 4 percent annual growth rate. Real national income would still rise at an annual rate of around 3.6 percent, although large variations would result from differences in productivity growth and accumulations of savings and capital.

Losses in real income brought about by expensive energy will add to social tensions everywhere, particularly in the United States and Britain, where the loss of 0.4 percent per year in real income growth would constitute a far larger fraction of total growth than in the OECD as a whole. But overall, the loss should be manageable. Of course, this assumes a world free from surprises relating to energy or anything else.

The situation may be more favorable in countries with domestic energy resources. In nations that produce their own energy at very low cost, rising world price of energy would have little direct effect, and nations that export energy produced at low cost will benefit from the shifts in the terms of trade. Among the OECD countries, only Britain and Norway are anywhere close to this favorable position. On the other hand, a nation that produces its own energy at a cost equal to the world price is in no better position than an importing nation, because the labor and other resources devoted to energy production deprive the nation of goods and services exactly as if the energy were imported. Thus, the production of expensive synthetic fuels in the United States will not provide an economic buffer against rising energy prices.

ADJUSTING TO PRICE SHOCKS

The painful experiences of the 1970s taught us that energy prices may rise in sharp, unexpected jumps rather than along the smooth, predictable path that could be accommodated without serious dislocation. Therefore, to prepare to cope with future oil shocks, we must understand the mechanisms by which a sharp jump in energy prices destabilizes an economy.

The first effect, likely to be a major problem in most OECD nations, is generally a burst of price and wage inflation. Less well-appreciated, but in many respects more costly, is the decline in real output growth that typically results from the price shock and that may last for a number of years.

There is no fundamental economic law stating that prices in general must rise when the relative price of one commodity rises. Prices of other commodities could just as well fall, and would if there were no rigidities and equilibrium could easily be restored. But experiences of the 1970s revealed that not only do other prices fail to fall when energy becomes relatively more expensive, but they actually rise in most countries. This reinforcing of energy price shocks by sympathetic increases in other prices is one of the most serious obstacles to smooth adjustment.

For example, inflation would have increased by only 2 to 4 percent from 1973 to 1975 had the effects of energy shock been limited to direct increases in production costs and the prices of energy consumed directly. However, the energy shock also induced increases in wages and other non-energy costs. As a result, almost every major OECD nation had inflation far in excess of 2 to 4 percent. Among the seven major OECD nations, only Germany kept inflation within the benchmark—its rate rose from 6 percent in 1970 to 1973 to only 6.5 percent from 1973 to 1975. The United States was close with 5.1 extra percentage points. Inflation jumped by 6.3 points in Canada and France, 9.2 in Japan, 11.5 in Italy, and 12.7 in Britain. (Figures for inflation are based on the implicit consumption deflator, more uniformly defined among countries than the cost-of-living index.)

A predominant factor in the conversion of an energy price shock into general inflation is wages. Most advanced economies have difficulty making the necessary adjustment to the lower real wage rate necessitated by higher energy prices. The problem is simple: workers would rather not hear that real wages must fall. Again, the example of 1973 to 1975 is particularly instructive. Wage inflation worsened in every major OECD nation except Germany. The acceleration of wage rates was relatively mild in the United States—wage inflation worsened by only 1.9 percentage points during that period. Japan saw an increase of 4.7 percentage points; in Canada, France, and Italy, wage inflation accelerated by 5 to 10 percent; and Britain's wage inflation worsened by 10.1 percentage points. Explicit and implicit mechanisms that automatically link wages to prices create this unfortunate upward pressure on wages. The problem is worsened by the practice of indexing wages to the cost of living, which results in a severe inflationary spiral.

From 1973 to 1975, only Germany escaped this price-wage spiral, which was severe in the United States, Canada, and France and even worse in Japan, Italy, and Britain. This illustrates an important principle: there is no immutable relationship between dependence on imported energy and domestic inflationary effects of a world energy shock. From 1973 to 1975, Germany, heavily dependent on imported energy, had by far the least worsening of inflation, while the United States, the least dependent, was in the middle and the other important OECD energy producer, Britain, had the worst experience.

ENERGY AND REAL OUTPUT

An energy price shock will affect real output, substantially impeding GNP growth for several years. The major OECD economies experienced more or less synchonous recessions in 1975, and the prospects for similar contractions in 1980 to 1981 are strong. The total economic cost of the recession created by the adjustment to suddenly higher energy prices may be as large, or even larger, than the cost of the higher energy prices themselves over the indefinite future, even though the recession lasts only a few years.

The real output level of modern industrial economies is vulnerable to energy price shocks for a number of reasons. Foremost is the inability of an economy to return to equilibrium quickly at a new—and lower—real wage level. Higher real wages mean that employment will fall after a shock as firms lay off workers rather than take losses, and this will mean a drop in real output. Furthermore, sudden changes in input prices create uncertainty about the profitability of private investment. Together with the high interest rates that accompany a suddenly higher price level, this can produce a slowdown in investment demand. Consumption demand will also fall immediately and permanently because of depressed expectations about future real incomes. In the longer run, export demand from energy producers should offset declines in domestic demand, but the experience of the 1970s showed that this process takes quite some time.

Because of the strong interactions among the major OECD economies, the recessionary impact of an energy shock within any single economy is substantially larger than a purely domestic shock of the same magnitude. The business cycles of the OECD nations were out of synchrony before the 1970s, and when the German economy contracted in 1966, it was saved from deeper recession by the booming U.S. economy. By contrast, from 1973 to 1975, all the major OECD economies went into recession in a strikingly uniform way. Neither the magnitude of the inflationary burst set off by the energy price shock nor the degree of dependence on imported oil entirely explains the reduction in real GNP growth in each economy. The mildest recession was in France, where real GNP growth dropped from 5.5 percent from 1970 to 1973 to 1.8 percent from 1973 to 1975, a decline of 3.7 percentage points. Germany dropped by 4.7 percentage points even though it escaped the inflationary explosion in France and elsewhere. The United States had close to the worst recession, losing 5.9 percentage points of real growth and experiencing a contraction in GPN, in spite of its relatively favorable inflation rates and energy endowments. Because of the tight linkage of the OECD through mutual trade, future energy shocks will have relatively uniform effects on the GNP of all OECD nations.

MONETARY MODERATION AND FISCAL RESTRAINT

Sharp increases in the price of energy create a serious dilemma for economic policymakers. The resulting combination of higher inflation, higher unemployment, and lower real output is the worst of all possible worlds. The only effective policy tool for controlling inflation in the longer run is stabilization of the money supply. On the other hand, monetary expansion, or "accommodation," is one of the more effective ways to offset the impact of the shock on employment and real GNP. However, raising the rate of growth of the money supply seems only an academic possibility in countries determined to limit the excessive inflation of the past 15 years. From 1973 to 1975, monetary acceleration took place only in Canada and Italy, and even there it was very modest.

On the other hand, several OECD nations severely curtailed monetary growth from 1973 to 1975 in an effort to offset the inflationary effect of the energy shock. The most extreme case was Britain, where growth of the money supply fell an astonishing 13 percentage points from 1973 to 1975 from its 1970–to–1973 average. Japan also drastically applied the monetary brakes. Significantly, the country with the smallest increase in inflation, Germany, did not reduce (or increase) its rates of money growth; it simply maintained a policy of moderate money growth. The conclusion is that monetary policy should be smooth and predictable to provide a stable economic environment, and should not be used to offset the inflationary effect of an energy shock.

Fiscal policy presents another dilemma in the aftermath of an energy shock. On the

one hand, there is pressure to lower individual tax rates to make up for the loss in real income brought about by higher energy prices. But even without tax cuts, government revenues decline in real terms because higher prices for imported energy, combined with diminished levels of economic activity, will reduce the real tax base. There may also be pressure on government to spend more to stimulate demand and counteract recession.

Higher government deficits are likely to follow an energy shock for a number of years and do not by themselves present any serious economic problems. However, fiscal policymakers should recognize that higher energy prices will decrease real national income. It is impossible to maintain real growth in government expenditures and cut taxes enough to maintain real growth in consumption when the total resources available for domestic purposes have been reduced by higher energy prices. Although budget deficits are sensible during the recession that immediately follows an energy shock, the growth of revenues must be large enough so that it eventually finances the growth of expenditures. If the government chooses to keep expenditures in real terms at preshock levels, then tax increases, not decreases, will be needed sooner or later. With constant tax rates, government expenditures must share in the decrease in real national income. Thus, any increases in expenditures and reductions in taxes that follow an energy price shock should be small and temporary.

POLICY PRESCRIPTIONS FOR A PRICE SHOCK

Although it is impossible to eliminate the inflationary and recessionary impact of an energy price shock, four economic policies can ameliorate that impact. First, governments should not respond to energy price shocks in a knee-jerk fashion by sharply contracting monetary and fiscal policy to prevent the inevitable inflationary burst. Unfortunately, this happened in 1974 and is one of the reasons that many countries experienced such deep recessions in 1975. Some additional inflation is unavoidable in the aftermath of an energy price shock, and severe monetary contractions will only reduce GNP and employment while having little effect on inflation.

Second, when real income falls after a price shock, it is important that the tendency to increase government spending be avoided. The size of the government's share in GNP should be determined by broad social and economic considerations, and reductions in real national income should be spread evenly across all sectors of the economy, including the government. Otherwise government budget deficits can grow out of control, leading to still further inflation and a more than proportionate drop in real income outside the government sector. In countries with substantial domestic energy production, higher energy prices may greatly increase government revenue either through direct income from nationalized energy production or through increased tax revenues from private producers. These revenues should be used to reduce other taxes, not swell government's role in the economy.

Third, special temporary incentives should be used to stimulate investment in the aftermath of an energy price shock because sharp energy price increases can seriously depress investment demand, retarding GNP growth for years. Investment credits, accelerated depreciation, and their equivalents are a good way to stimulate short-term investment in a socially effective way. In the longer term, policies that encourage investment also offset inflation somewhat by adding to productive capacity and thus increasing aggregate supply.

Fourth, are cost-reducing tax policies, which operate to lower prices and raise output by reducing the costs of production. In effect, they introduce the short-run flexibility that modern economies seem to lack and are ideal for offsetting higher energy prices and the resulting recessions. However, effective options for cost reductions are limited.

Reductions in payroll and value-added taxes are the leading candidates. Their effectiveness has been demonstrated in reverse by the recent British experience of raising indirect taxes just before the 1979 energy shock (undertaken with the laudable objective of lowering income taxes). An increase in payroll or commodity taxes has the same effect as an energy price increase—a price-wage spiral—and much of Britain's current high inflation is attributable to this action. Thus, a payroll or commodity tax cut is the natural antidote for an energy price increase.

Unfortunately, such a tax cut is limited by the size of existing taxes and requires difficult and extensive modifications in fiscal institutions in many countries. This is especially true in the United States, where the only federal tax of this type, the Social Security payroll tax, is earmarked for a single purpose.

In summary, increased inflation and reduced levels of real income and output are inevitable after an energy price shock, but economic policies can soften the blow. Such policies should include moderate growth in the money supply, restraint on government spending and budget deficits, investment incentives, and, where possible, reductions in payroll and commodity taxes.

PREVENTING ENERGY SHORTAGES

Major energy shortages can have a much more severe impact on an industrial economy than large increases in energy prices. By restricting the production of other goods and creating supply bottlenecks throughout the economy, energy shortages can cause considerable economic damage. Would sharp cuts in OPEC production lead to significant shortages?

Barring a major war with wide-spread disruption of oil shipments, shortages are almost impossible in the world oil market. As long as some oil is being produced, any country can import as much as desired by offering a high-enough price. Indeed, the very function of the world oil market, particularly the spot market, is to let prices equalize supply and demand.

Likewise, it is impossible for an oil embargo by the Arab (or any other) members of OPEC to cause an energy shortage. The oil-producing countries can determine the quantity of oil they produce, but they cannot dictate where that oil will ultimately be shipped, so an embargo cannot be effective against any single country or group of countries. The Arab oil embargo against the United States and the Netherlands from 1973 to 1974 had virtually no impact on those countries' imports. Although an embargo may achieve political objectives, it results only in production cutbacks and reduces the oil available to all importing countries. Importing countries then compete for supplies, driving up the price of available oil until demand falls. The problem arises from the sharp increase in prices, not from the possibility that oil might be unavailable.

Even though shortages have not occurred in the world market and are unlikely, shortages at the retail purchase level are a distinct possibility. The United States has had the worst experience by far of all the major OECD nations, with serious gasoline lines in many parts of the country both in 1974 and 1979; minor shortages have also occurred in Canada and Britain. The other major OECD countries escaped this problem, even though some are far more dependent on imports than the countries that experienced shortages.

Retail shortages result from government attempts to hold fuel prices below market-clearing levels. Government involvement per se does not create shortages—for example, the government of France is much more involved in petroleum refining and distribution than the United States. But government price controls inevitably lead to shortages. Such controls, combined with government misallocation of regional supplies, created the gasoline lines in the United States. In Europe and Japan, where gasoline prices rose to market-clearing levels, no such problems occurred. Similiarly, the United States was plagued by natural gas shortages during the 1970s as a result of federal controls on wellhead prices.

The lesson from the American experience is clear. The United States has now removed all price controls on crude oil, and interstate natural gas markets will be largely deregulated by 1985. Unless such controls are revived during periods of rapid increases in energy prices, repetition of shortages is unlikely. The most important component of energy policy, particularly for the United States and Canada, is a commitment to the permanent elimination of price controls on energy markets.

STRATEGIC RESERVES

Another important component of energy policy is the implementation of strategic oil reserves. Reserves are not needed to prevent shortages—shortages will not occur in the absence of government controls. But we have seen that sharply rising energy prices cause much more damage than slowly rising ones, and strategic reserves can smooth out price increases in the wake of a major production cutback.

Strategic reserves are most effective when implemented multilaterally. When any country releases its stockpile, it adds to the supply of oil in the world market and thereby reduces the world price. If the United States released a stockpile in the wake of a crisis, its imports of oil would fall, but the impact on world oil prices—those faced by American consumers—would be minor. In that case, the benefits of stockpiling might not be worth the cost to the U.S. But if most or all of the major OECD nations maintained large stockpiles of oil that under international agreement flowed into the market during a major production cutback, this would significantly reduce any sharp price increases and resulting economic damage.

Finally, the impact of energy shocks can be reduced through taxation. Energy taxes reduce overall energy dependence, thereby mitigating the potential economic impact of sudden increases in world energy prices, and can be used to help finance reductions in payroll and commodity taxes. Like strategic reserves, energy taxes can be most effective when imposed multilaterally. Just as the OPEC cartel exercised monopoly power by coordinating cutbacks in oil production, so the OECD countries can exercise monopsony power with concerted action to reduce energy demand. Such use of taxes would not only reduce vulnerability to energy price shocks but would also create downward pressure on world energy prices.

THE INTERNATIONAL FINANCIAL SYSTEM

There is a pervasive fear that growing surplus by the oil-exporting countries—which imply growing trade deficits for the importing countries—impede the recycling of petrodollars and make exporting countries less willing to hold financial assets in lieu of in-ground oil reserves. OPEC and other oil exporters face three possibilities for spending their petroleum revenues.

First, they can purchase goods produced by oil-importing nations. In the aftermath of the 1973-to-1974 oil price increase, OPEC surprised its major customers by rapidly converting payments into goods and services. Second, producers can purchase marketable financial claims upon the oil importers.

OPEC members, especially the Arab nations, have accumulated large volumes of U.S. government obligations and other readily marketable financial instruments, and most OECD countries already produce such instruments in large volume. Finally, OPEC can make direct investments in the oil-importing countries.

If their need for imports were limited, OPEC countries would take a good part of the proceeds from the sale of oil in the form of direct investments or financial claims upon other economies, and the importing nations would run large balance-of-trade deficits. This would be a healthy accommodation to the circumstances that would not strain the international financial system or individual economies if importing nations recognized that trade deficits were inevitable and desirable.

Unfortunately, there is an irrational tendency in some countries to view trade deficits, even if temporary, as threatening to economic health and stability. This puts pressure on governments to adopt "beggar-thy-neighbor" tariffs and quotas in an attempt to export the deficits to other countries. The result is a useless stifling of world trade and further unnecessary reductions in national incomes.

A second problem arises if oil producers begin to lose faith in the financial obligations of their customers. Currently the OPEC nations are accumulating claims upon the rest of the world (primarily OECD countries) at a rate approaching $100 billion per year. Although this is a small fraction of the growth of financial instruments in OECD markets each year—in 1980 the United States alone will create over $60 billion in further government obligations—OPEC members may well question the wisdom of putting so much wealth in a form susceptible to expropriation.

This would create a bias in favor of taking immediate delivery of goods produced by the OECD, the solution to the first round of oil price increases, or, worse, storing wealth as oil in the ground. The inability of the OECD to guarantee the security of OPEC investments creates an incentive to limit oil production and further raise prices. And resulting higher prices can lead to still further concern about investment security.

Therefore, the threat is not within the international financial system, which can easily provide the assets OPEC wants. Rather, OPEC may decide it does not want assets or goods and so further reduce oil production. Convincing OPEC that financial obligations will be honored should be an important policy of the OECD nations.

PLIGHT OF THE DEVELOPING COUNTRIES

Although we have focused on Western industrial economies, we cannot ignore poorer nations. They are likely to face particularly severe problems from rising energy prices, creating both moral and economic problems for industrial nations.

Our analysis of the direct effect of higher energy prices on real income applies with even greater force to the less-developed countries (LDCs). Evidence suggests that LDCs will be less successful than industrial nations in offsetting higher energy costs because their potential for substitution away from energy is smaller. Thus, the reduction in real income growth caused by rising energy prices will be greater and much more significant in countries where a large fraction of the population lives near the margin of subsistence.

A more immediate problem is the LDCs' accumulation of debt to large banks. Energy-dependent nations typically pay for OPEC oil at least in part with financial claims rather than exports of goods and services, particularly following a sharp rise in prices. Because the LDCs do not have readily marketable government or private debt instruments, they are more limited in financing trade deficits.

In the past decade, large banks have acted as intermediaries by providing loans to LDCs and issuing their own reliable instruments in the international credit market. But this process may soon end as the risk of these loans increases. OPEC may invest directly in projects in the LDCs, an activity that has accelerated recently, but this cannot be counted on. As a result, the LDCs cannot run large chronic trade deficits indefinitely. They will be forced to substantially limit oil imports and reduce real output, or they will have to increase exports of commodities and goods. The increase in oil prices in 1973 raised the aggregate account deficit of the non-OPEC LDCs from $10 billion to $35 billion by 1975. This figure fell to $22 billion in 1977 but reached about $70 billion last year. The impact on GNP growth in the LDCs has been limited at the cost of major increases in external indebtedness, which may seriously restrain future GNP growth.

This means that industrial nations should be willing to run large trade deficits so that the LDCs can finance oil imports through exports, but there will also be a need for increased direct aid. We should not expect to depend on the current pattern of extending loans that may never be repaid. Instead, the high-income nations of the OECD must carefully consider and act on the growing disparity in world real income levels, a disparity exacerbated by rising energy prices.

Energy prices are likely to continue to rise in real terms, possibly in sharp and unexpected bursts as in 1974 and 1979. This will no doubt impose significant costs on industrial economies in reduced growth in real income and output and higher rates of inflation and unemployment. In countries with growing political pressures to increase military and social-welfare expenditures while reducing taxes, these costs will be particularly stressful. But these costs should be manageable, even if energy prices triple in real terms over the next two decades. The challenge to industrial economies will be to adopt economic and energy policies to prevent these costs from becoming larger than necessary.

The adjustment to future energy price shocks will be considerably eased if economic policies include moderate money growth, fiscal restraint, investment incentives, and one-shot reductions in payroll and value-added taxes. Multilateral development of strategic reserves and taxes on energy can further ease adjustment. Barring a major war, shortages of oil or other fuels need not occur if energy policies are based on maximum price flexibility rather than artificial price controls. The recycling of petrodollars can also continue smoothly as long as importing countries recognize that temporary trade deficits are inevitable, and they maintain the credibility of their financial obligations. Finally, wealthier nations should recognize that rising energy prices will create special problems for poorer nations, which may require increased assistance.

Unfortunately, most governments have yet to accept these facts and adopt these policies. The costs of further delay may be considerable.

Mr. PERCY. Mr. President, I am pleased to cointroduce with my distinguished colleague from New Jersey, Senator BRADLEY, the Emergency Preparedness Act of 1981—the Bradley-Percy bill. It is a privilege for me to join my name in a bipartisan effort with a Senator who already has a well-deserved reputation as an outspoken and responsible leader on energy security issues. He and his excellent staff have brought creative, nonsense ideas to this forum on a number of occasions. In this case, I am proud to cointroduce a legislative plan which Senator BRADLEY and I both believe constitutes a new and realistic approach to combating the severe economic effects of a future crude oil supply disruption.

While the United States has made significant strides in curbing its appetite for imported oil, we are still dependent on foreign sources and must therefore continue to take steps to insure our national energy security. With President Reagan's bold move to decontrol oil prices, the development of a free-market-oriented energy policy began to take shape. It was an important first step in the direction of energy independence.

But our Nation remains vulnerable to petroleum supply disruptions, an event which appears increasingly likely given recent developments in the Middle East. Such supply disruptions have serious economic effects, the most obvious being soaring oil prices. We cannot afford to be complacent. In the long term, we are investing in new technologies which may some day make the entire world less vulnerable to oil shocks. But until that day comes, we must develop policies which see the world as it is—simple and effective policies which use existing institutions and authorities to the extent possible. We must remain as prepared for energy emergencies as we are for the other dangers that exist in the world.

We have tried gas rationing plans, price controls, allocations schemes, and other regulatory approaches, and I—together with many of my colleagues here in the Senate—have come to the view that these approaches simply do not work. Last year, as ranking Republican on the Permanent Subcommittee on Investigations, and this year as chairman of the Energy Subcommittee of Governmental Affairs, I have chaired hearings on a variety of these issues. From what I have learned, I am convinced we can no longer afford unworkable, bureaucratic approaches to coping with the economic problems associated with oil disruptions.

The Bradley-Percy bill breaks from the tradition established by the Emergency Petroleum Allocation Act and related legislation. It does not seek to control the market and move private oil supplies by Government fiat. This bill is founded on the belief that I consider central to the mandate and philosophy of the new administration—that the free market is generally superior to Government regulatory programs. Yet this bill does not propose a totally hands-off, laissezfaire approach to energy emergencies. Senator BRADLEY and I realize that in the event of a major supply disruption, the absence of compensating action by the Federal Government could result in a severe blow to the economy.

I am as worried about the prospect of $100-a-barrel crude as anyone in this Chamber. Last month, I chaired a hearing at which Frank Zarb, former Administrator of the Federal Energy Administration, warned that future supply disruptions could easily push the price of gasoline as high as $10 per gallon in today's dollars. This would be terrible. However, we must not fall into the trap of believing that price controls and allocation schemes are the answer.

It is my view that these programs only exacerbated the effects of shortages and

have caused us to pay more today for crude oil than we otherwise would. This does not mean that we have no means by which we cannot actively combat price increases. I support the standby availability of emergency demand restraint measures, and I would like to see the administration and the Congress seriously consider standby programs for emergency oil import fees or tariffs, or an emergency tax/rebate plan for gasoline and perhaps other petroleum products.

Last year I cosponsored legislation with Senator JOHNSTON which would have authorized a standby gasoline tax. I still support this measure, but I do not sense much support for its passage. For now, we must make a realistic appraisal of existing conditions and use those authorities which are already in place. This is what this bill does.

The Bradley-Percy bill does contain what I consider to be a potentially very effective measure for preventing or alleviating crude oil price increases. We direct the President to prepare a drawdown plan for the strategic petroleum reserve to reduce the likelihood that refiners who might otherwise have limited access to crude oil would go to the "spot market" and contribute to the chaotic world market situation which has led in the past to the price escalation we are trying to prevent. With the current administration having acted so boldly and effectively to buy additional oil for this Reserve, we are starting to accumulate enough of a stockpile to enable us to use it—fairly soon, if necessary—as a major tool for combating price increases.

The creative and effective use of the strategic petroleum reserve can serve other purposes, as well. We cannot ignore the risk of spot shortages, especially in rural or agricultural areas, during time of emergency. The reserve provides a means by which consumers in all regions of the country—particularly the Nation's farmers—can have confidence that they will have adequate supplies. I want to assure the farmers in Illinois and across the Nation that I would not support this bill if I suspected that it would in any way jeopardize crude supplies going to the agricultural sector.

If this bill becomes law, I have complete confidence that the Reagan administration would draft a drawdown plan in close consultation with Secretary Block and representatives of agricultural associations throughout the Nation. Neither I—nor, I firmly believe, a majority of my colleagues in the Senate—would ever approve a plan which did any less.

I also believe that the proper use of the strategic reserve in time of shortage can help maintain the competitive nature of the domestic refining industry by making crude oil available to nonintegrated refiners unable to secure contract agreements in time of shortages. Many of these refiners are farmer owned and operated cooperatives which, in time of shortage or glut, play a key role in meeting the energy needs of farmers and other rural Americans. Farmer energy cooperatives presently produce almost half of all on-farm fuel requirements.

In addition, these refiners, many of which have invested millions of dollars to upgrade facilities in order to run heavier and more sour crudes, supply rural areas which might otherwise be seriously underserved. By insuring that these refiners have access to strategic reserve oil in time of shortage, the Bradley-Percy bill will prevent farmer co-ops from having to rely on the bureaucratic decisionmaking and cumbersome procedures that have been associated with earlier shortages.

At the same time as I cointroduce this bill, I would like to join Senate Resolution 139 as a cosponsor. This resolution, submitted by Senator ANDREWS, observed that "it is the sense of the Senate that the continued access of farmer-owned oil refining cooperatives and independent oil refining businesses to crude oil at reasonable prices must be assured during petroleum disruptions."

I originally did not cosponsor this resolution because its language implied that these small and independent refiners might be singled out for special treatment in a regulatory environment. Access to crude at "reasonable prices" raises the possibility of price controls, which I would not support. The reference that "access—must be assured" raises the possibility of a Federal allocation program for private oil supplies, which I also would not support. I have since learned that Senator ANDREWS intended these terms to be applied in their broader contexts. Because I share the basic policy objective of this resolution, I will cosponsor it.

The other important provision in this bill is its proposal for recycling additional windfall profit tax revenues that would be associated with a run-up in the price of crude oil during an emergency. Even with an effective strategic petroleum reserve drawdown policy, we have to be prepared for this contingency. The windfall profit tax gives us a means for recycling a major part of these price increases for the benefit of the public. During and after a shortage, revenues derived from the windfall profit tax would rise dramatically, whether or not the Government takes any action. The Bradley-Percy bill gives the administration the authority to develop a plan for distributing those extra revenues to combat the effects of a shortage.

The standby plan, to be prepared by the President and approved by both Houses of Congress, would provide that these tax receipts be turned over to State governments for maintenance of essential public services and distribution of funds to those especially hard hit by higher oil prices. The President could also propose temporary reduction in the withholding rates on Federal income taxes or other measures which could alleviate the effects of higher oil prices on citizens throughout the Nation.

A related provision of this legislation asks the President to recommend to the Congress changes in the windfall profit tax that would be implemented only in the event of a very severe oil supply disruption. Many Illinoisans are in the oil producing industry, and I have always worked to insure them a fair return on their investment. I am especially concerned about royalty oil producers who do not, as a general matter receive a very large return on their wells. We in the Congress have worked hard to find a fair middle ground on the subject of the windfall profit tax—and this bill does nothing to alter the present situation.

What this bill does address is the way the Nation would respond to a potentially devastating jump in the price of crude oil—to as high as $100 per barrel, for example. I know Illinois oil producers well enough to be confident that, if the price of crude oil suddenly tripled during a global emergency, they would not be comfortable watching their incomes triple while other Americans endure grave economic hardships. At the same time, an emergency situation would require a maximum effort to pump as much additional domestic oil as possible. The bill proposes that oil discovered during and after the shortage be totally exempted from the tax. We need a balanced approach to emergency tax policies. The Bradley-Percy bill asks the administration to propose such a balanced approach to the Congress as part of its standby plan.

Mr. President, we must now choose between competing strategies designed to cope with the grave dangers and economic hardships which a severe petroleum supply disruption could entail. I believe that the old "solutions" were not solutions at all and may have even exacerbated our problems. The creation of regulatory bureaucracies has been demonstrated to be a mistake. We must embark on a new approach, one that is simple and—above all—workable.

The Bradley-Percy bill incorporates a reliance on the free market to determine price and allocate crude oil resources while at the same time providing for the lessening of personal hardship, the maintenance of agriculture and other essential economic activities, and the continuation of an unimpaired national defense and other public services. No emergency plan will function perfectly or run as smoothly as its originators intended, but in this bill we have a program that will work far better than the legislation it is intended to replace.

I urge my colleagues to join in this bipartisan plan and support the Emergency Preparedness Act.

RECOGNITION OF SENATOR NUNN

The PRESIDING OFFICER. The Senator from Georgia (Mr. NUNN) is recognized.

PEACETIME SELECTIVE SERVICE REGISTRATION: IMPROVEMENTS IN EQUITY OR COMBAT CAPABILITY?

Mr. NUNN. Mr. President, the issue of registration of young men for selective service is under active consideration by both the executive and judicial branches.

Newsweek recently reported that President Reagan ". . . is almost certain to let the authority for draft registration expire."

I hope this report is inaccurate.

It would require a direct Presidential order to cease registration. Any such decision would seriously weaken our Na-

tion's ability to both deter and respond to national emergencies.

Peacetime registration has significantly improved our ability to meet mobilization requirements and thus is a vital component of military preparedness and conventional deterrence. Army Chief of Staff Shy Meyer has testified this year that registration—

> Has saved 72 critical days in providing trained military personnel to sustain our fighting forces in an emergency.

I find it difficult to believe that any President so deeply committed to improving our national security as President Reagan would intentionally take an action to seriously weaken our defense capability. A decision to stop peacetime registration would undermine our overall national security. It would render suspect our commitment to our allies and would warm the hearts of Soviet military planners.

Before making a decision, I hope the President will consult directly with his top military advisers, and those who have studied this for a long time, especially the Joint Chiefs of Staff.

The issue of registration is also under review by the Supreme Court where a ruling is expected this session.

I was priviledged to attend the session in the Supreme Court on March 24 when the issue of whether the ongoing registration of only draft-age young men is constitutional was argued. The Justices exhibited great interest in the issue before them vigorously questioning both counsel. The Court clearly recognized the importance of their ruling in this case.

I do not want to belittle this constitutional debate or to demean the role of our judicial process. Both are very significant. But while we wrestle with whether the current registration system is unconstitutionally discriminatory, we should not forget that the Soviet military machine is not an equal opportunity employer.

Unfortunately, Mr. President, many discussions of registration focus on the wrong issues and suggest the wrong criteria for judging the need and justification for the registration of only men. There are really three major questions that demand straight answers:

First, is registration needed?

Second, should only men be registered?

Third, is it constitutional to register only men?

The answers will help to clarify why registration has profound implications for our Nation's security and freedom and thus should be allowed to proceed as required under the current law prescribed by Congress.

IS REGISTRATION NEEDED?

Is peacetime registration needed? Yes, because without registration this Nation faces an impossible task in meeting our wartime mobilization requirements. Without it, Mr. President, a major element of our conventional deterrence is AWOL.

The Department of Defense itself, in a December 1978 report on the All-Volunteer Force, has candidly assessed the importance of an effective mobilization capability:

> If deterrence fails and a major conventional war continues beyond the initial engagements, the ability to rapidly mobilize, train and arm these previously untrained personnel may be the difference between victory and defeat or between staying conventional or being forced to shift to the awful specter of international nuclear war.[1]

And Gen. Lew Allen, Air Force Chief of Staff, has said:

> The United States needs to have, in being, a system which will provide a continuous inventory of potential inductees for mobilization . . . The national security risk associated with a weak Selective Service System is significant.[2]

The existence of an effective standby draft apparatus has always been a fundamental assumption underlying the All-Volunteer Force, which was never intended to go it alone in the event of mobilization. But in 1979, when the Senate Armed Services Committee began to consider the need to resume registration, we found that it would have taken 7 months after Congress authorized the resumption of induction for the first draftee to arrive in combat. By that time, the question of reinforcements might very well be an academic one.

In the absence of registration, Selective Service had developed a so-called postmobilization plan for rapid registration and induction after the declaration of an emergency. But investigation revealed that such a plan was at best wishful thinking, and at worst a cruel hoax. Mr. President, experience with registration has confirmed that relying on such a plan would anchor our mobilization capabilities in quicksand.

Yet, in 1979, despite the unanimous recommendation of the Joint Chiefs of Staff, and House and Senate Armed Services Committee reports favoring legislation to resume registration, the administration opposed that resumption and no legislation was enacted. Then, in his January 1980 state of the Union address, President Carter had a change of mind; he decided to resume registration and requested Congress to appropriate the necessary funds. The funds were appropriated and peacetime registration of draft age young men resumed in July 1980.

Mr. President, it is clear that peacetime registration is the only mechanism which will provide for the speedy delivery of the inductees needed for combat replacement and augmentation in a national emergency. No one is claiming that peacetime registration is a panacea; manpower shortages and other mobilization problems still are very large. But the fact is that, as Army Chief of Staff General Meyer recently noted:

> Peacetime registration has saved 72 critical days in providing trained military personnel to sustain our fighting forces in an emergency.[3]

SHOULD ONLY MEN BE REGISTERED?

Now let me turn to my second question: Should only men be registered?

In 1980, President Carter also recommended that women be registered, essentially based on equity arguments and on his administration's prophecy of the Supreme Court's attitude toward the constitutionality of a male-only system. This issue of registering women had been duly deliberated by the Armed Services Committees of both the House and Senate in 1979. And the Senate Armed Services Committee had specifically rejected the idea, long before the Soviet invasion of Afghanistan, long before the hostage crisis in Iran, and long before the Carter declarations on the Persian Gulf.[4]

Again in 1980, the Manpower and Personnel Subcommittee of the Senate Armed Services Committee, after hearings specifically focused on the registration of women, rejected the idea. The full Armed Services Committee agreed and set forth in detail the basis for the decision, including comprehensive "specific findings" which eventually were adopted by the entire Congress.

Mr. President, Congress concluded that women should not be required to register only after hard study of all the critical facets—military needs, constitutional implications, sociopolitical ramifications—of that issue. The congressional decision was not based on some stereotypical notions about the roles of men and women. Rather, there were two essential reasons for registering only men. First and foremost, Congress concluded that the Nation should register men because if induction is required, we will need people for combat, a requirement women cannot satisfy. Second, there are important societal reasons for not registering and drafting women.

CONGRESSIONAL JUDGEMENTS HELD ERRONEOUS

As I am sure many of my colleagues are aware, these sound and considered judgments on the issue of registering women were challenged in the Federal courts. The named plantiffs, including at least one male subject to the revitalized registration process, argued that refusing to register women unconstitutionally discriminated against men, in violation of the equal protection component of the fifth amendment to the U.S. Constitution. Just before the initial phase of registration was to start last July, a panel of three Federal district court judges in Philadelphia, having conducted their own review of much of the evidence underlying Congress decision, agreed with plantiffs' contention. Based on their review, the panel concluded that Congress' judgments were wrong and that our national defense would best be served by a registration and induction system which includes women.

Mr. President, the implications of this ruling are indeed profound. If upheld by the Supreme Court, America, in effect, would have fought four wars in this century with unconstitutional manpower policies. More importantly, Congress affirmative constitutional powers to raise, maintain, and regulate armies in support of our national security would be severely hamstrung. For these reasons, I am compelled to reiterate again today Congress reasons for not requireing women to register and to set forth why I believe that congressional decision was constitutional.

Footnotes at end of article.

THE PRIMARY MILITARY NEED DURING MOBILIZATION IS FOR COMBAT-ELIGIBLE PERSONNEL

Let me repeat that the focus of our efforts was, and must be, to determine the most efficient and effective way to supply the military personnel that would be needed in time of emergency. This is a critical distinction which unfortunately has been lost on the lower court and other critics of congressional judgments on this issue. We are not talking about some new social program or theory to be experimented with. We are talking about the Nation's ability to respond in war to needs that affect—in literally the most serious way—our Nation's survival.

Of course, the congressional decision to require only men to register was in no way intended to denigrate the tremendous contribution many women have made to our peacetime volunteer forces. And I certainly expect that many women volunteers would contribute to our military forces during wartime, just as they have done in the past.

But the fact is, Mr. President, that during a national emergency, the main military need would be for combat-eligible inductees for the infantry, armor, artillery, and other close combat forces. Women are banned from these positions by law and policy and cannot fill this primary military need, unless, of course, the Supreme Court also rules the combat exclusion unconstitutional.

Furthermore, the needs of military flexibility require combat-eligible individuals in combat support and combat service support positions who are available to rotate into combat positions. We cannot fill up these support units with combat-ineligible women without adversely affecting our war fighting capability. Thus, with this primary need for combat-eligible personnel in mind, our training bases, particularly in the early stages of a war, must concentrate on combat skills training. Moreover, current law requires that inductees be selected "in an impartial manner" from those registered.[5] An induction system that provided 50 percent men and 50 percent women to the training commands in the event of mobilization would be a military disaster and an administrative nightmare.

Nor would the need for women during wartime be so large that volunteers could not fill the bill. The services testified that they are getting all the women volunteers they currently need. The Navy, with a strength of over 520,000, has calculated that based solely on combat requirements and the need for rotation, the most women that could be utilized in the Navy would be 45,000. Indeed, a statement of concern about having too many women has very recently come from the Army, which has actively been recruiting women volunteers, in part because of its inability to attract a sufficient number of men. But now according to Army Deputy Chief of Staff General Yerks, and I quote:

> We are starting to get some really hard data, really hard data, on the impact of females on our force. . . . We have seen indications in readiness reports and so forth that there may be some really adverse impacts on readiness.[6]

In summary, Mr. President, registration plays a major role in our Nation's ability to mobilize our combat and other forces in response to an emergency. Those who argue for the registration of women on the grounds of equity are substituting a farfetched theory that cannot practically be implemented for a real military need essential to our national security.

Let me also add, Mr. President, that Congress specifically reaffirmed the wisdom of the exclusion of women from combat in deciding against the registration of females. Although the prohibition against women in combat has not been challenged in the present case before the Supreme Court, a Court decision, now or in the future, that the combat exclusion is unconstitutional would effect a sweeping change in or national security policy. The inevitable result would be an erosion of support for the military strength of our Nation.

THERE ARE IMPORTANT SOCIETAL REASONS FOR NOT CHANGING MALE-ONLY REGISTRATION AND INDUCTION

Mr. President, as I have outlined, the Nation's military needs during an emergency provide the primary and most compelling reasons for not registering women. But Congress also found that there are important societal reasons for not changing our present male-only system of registration and induction. Human beings cannot be stereotyped into neat little classifications solely on the basis of sex. History records the deeds of men like Mahatma Ghandi as well as Attila the Hun. History also records the deeds of women like Mother Theresa and Joan of Arc. Without a doubt there are vast differences among women as well as men. Again, the question is who should be required to fight for the Nation? Surely this is a social issue of the highest order, with sweeping implications for our society.

No one can seriously contend that drafting women, whether in peacetime or in time of emergency, would not impose unprecedented strains on family life, in addition to those on military capability. A draft occurring in time of emergency would produce unpredictable, but most probably adverse, public reactions to the fact of female conscriptions. Thus, drafting large numbers of women could seriously undermine the resolve of the Nation to support the mobilization process.

To be more specific, how would questions of deferments and exemptions be handled? Does providing equity mean identical exemptions based on hardship, physical ability, sole surviving sons, and so forth?

Those who advocate registering women for the draft must accept the inevitable consequences of such a policy, during an emergency mobilization. For example, take the case of a young family with two young children. Under such a system a letter arrives from the U.S. Government ordering that young mother to active duty and denying her any kind of exemption based on hardship or dependents because the father will be left at home to care for the children. Does anyone seriously believe the American people will support such a system? I was, and remain, convinced that they will not. I am confident that the vast majority of the Congress would agree with that assessment.

I am also confident that if we ever change that concept Congress will soon be notified by irate constituents all over this country that they have not subscribed to that new theory.

Thus, Mr. President, those who base the case for the registration of women on principles of equity ignore the fact that their theory has no practical, equitable application. They also ignore the broad implications for our society as a whole which would occur during the strained atmosphere of mobilization.

Some have suggested that although all women should be registered, only a handful actually should be inducted in an emergency. But if we were trying to choose this course, is it not probable that a court which finds that the Constitution compels the registration of men and women equally would then find constitutionally suspect any justifications for inducting only a token number of women in an emergency? How is the equity, which is the aim of the advocates of an equal registration system, achieved by a system wherein a vastly larger number of men than women are actually called to duty? Indeed, at least one of the Supreme Court Justices voiced a concern for precisely this scenario during oral argument.

But the practical import of these societal misgivings goes far beyond merely determining whether women will or will not be registered. The Supreme Court is really deciding whether we will have registration at all. Of course, the Court can depart from all past American experience and declare male-only registration unconstitutional. It cannot, however mandate Congress to pass a bill requiring male and female registration. My reading of Congress makes it clear to me that there will be no female registration, whatever the Court decides. Most Americans do not support the registration and induction of women and Congress will not force such a program on an unsympathetic populace. Thus the Supreme Court decision is not simply another "equal rights" interpretation. The resolution of this registration issue will affect the ability of the United States to mobilize for years to come. Should the Supreme Court affirm the lower court decision, Congress may well be, on the one hand, legally and, on the other hand, politically incapable of meeting its specific responsibilities to provide for the military needs of the Nation. It could be impossible to shape a mobilization system consistent with the legal ruling and public support.

The country then would have to rely on a volunteer force not only in peacetime, but also in war, a result never intended even by the strongest proponents of an All-Volunteer Force. And it

Footnotes at end of article.

should also be clear from the problems we now have with the quality and quantity of our current peacetime All-Volunteer Force that the Nation will not be able to rely on such a volunteer system for very long in the future, even in peacetime.

IS IT CONSTITUTIONAL TO REGISTER ONLY MEN?

Mr. President, having addressed the first two of my opening questions, let me now turn to the third—is it constitutional to register only men?

For the benefit of my colleagues, a detailed treatment of the various legal questions involved in this issue can be found in a very thoughtful law review article recently written by John Roberts, former associate dean of the Yale Law School and the recently appointed dean of the Wayne State University Law School. Dean Roberts also was general counsel to the Senate Armed Services Committee for 3½ years, during which time he was intimately involved in the full range of issues surrounding registration. Anyone interested in the constitutional questions involved in the Supreme Court case should read this article by a legal scholar and military expert.

Mr. President, I ask unanimous consent that Dean Roberts' article be printed in the RECORD at the conclusion of my remarks.

The PRESIDING OFFICER (Mr. ARMSTRONG). Without objection, it is so ordered.

(See exhibit 1.)

Mr. NUNN. Mr. President, the constitutionality of a male-only draft registration scheme is not a matter of first impression in the Federal courts. On 12 different occasions, courts at various levels of the Federal judicial system have found male-only registration and induction to be fully consistent with the constitutional guarantees of equal protection under the law. But new constitutional standards for analyzing the propriety of purportedly gender-based discrimination have evolved in the Supreme Court since these earlier decisions. Indeed, one of the questions argued before the Court in the present case focused on what standard the Congress should be held to in exercising its responsibility to raise and maintain armies. I respectfully submit that whatever standard the Supreme Court deems appropriate, Congress action on this issue passes constitutional muster.

Mr. President, I believe the judicial review of legislative decisions is an essential part of the system of checks and balances which protects the integrity of our constitutional guarantees. But the Federal courts have recognized that there are areas where wide latitude is due the Congress in the exercise of its affirmative responsibilities. Congress powers to raise, maintain and make rules for the regulation of our land and naval forces is one area where prudent, but not unbridled, deference to congressional judgments is a long judicial tradition.[7]

A good example is Schlesinger against Ballard,[8] a decision of particular pertinence here since it also involved a congressional judgment tied largely to restrictions on using women in combat. In that case, the Supreme Court rejected an equal protection challenge to statutory provisions which provided that male naval officers were subject to mandatory discharge for failing twice to be promoted within approximately 10 years of service, while female officers were afforded 13 years to obtain equivalent promotions. The differential treatment was based on the fact that female officers had less opportunity for promotion than did their male counterparts because women were excluded from combat duty. Mr. President, the Supreme Court concluded that Congress had acted rationally and cited Congress "broad constitutional power" to raise and regulate armies and navies, emphasizing that "the responsibility for determining how best our Armed Forces shall attend to" fighting and insuring readiness for fighting wars rests with the Congress, and not the courts.[9]

Deference is even more apropos here, where Congress action is so centrally related to military preparedness. As the Supreme Court has noted on another occasion, when asked to exercise regulatory responsibility over the activities of a specific military unit, deference to the judgements of the coordinate branches is especially warranted with respect to:

> The complex, subtle, and professional decisions as to the composition, training, equipping, and control of a military force.[10]

Moreover, this judicial deference to congressional decisions in the military context has been shown even when those decisions limit in some way fundamental freedoms guaranteed under the Constitution, such as freedom of speech [11] and freedom of religion.[12] And the relevance of all these precedents cannot be discounted on the ground that persons called upon to register are merely civilians. For registration and induction are interlocked, and the Supreme Court has recognized Congress compelling interest in maintaining an efficient and workable draft system.[13]

Mr. President, I would not presume to suggest what measuring rod should be used to gage the constitutional propriety of Congress decision not to register women. The Federal courts of appeals which previously have considered this question have looked to whether Congress structuring of the system was "rationally related to a legitimate State purpose" and have uniformly found that standard to be satisfied.[14] In my view, the tradition of deference to Congress judgments in this area would argue that this standard continue to be applied.

However, as I noted briefly before, recent Supreme Court decisions have been elucidating a more demanding test to measure the constitutionality of differences in treatment based on gender—a test which the lower court applied in concluding that male-only registration was unconstitutional. That stiffer standard requires that:

> Classification by gender . . . serve important governmental objectives and . . . be substantially related to achievement of those objectives.[15]

Of course, Congress decision here primarily was based on combat eligibility, not gender. Therefore, there is a strong argument that the stiffer test does not apply at all. But even if the stiffer constitutional test is to be applied in some form, since registration and the draft are inextricably intertwined, the constitutionality of male-only registration must be determined by reference to whether such registration serves substantially to satisfy the Nation's emergency conscription needs.

Mr. President, I strongly believe that the precise legislative record built by Congress on this issue unequivocally satisfies even the more demanding constitutional benchmark. Contrary to the picture painted by those contesting the constitutionality of our decision, Congress examination of whether women should be registered and drafted was lengthy, thorough and comprehensive. It is preposterous to suggest, as some have, that Congress decision on this issue was contrived or somehow uninformed and unintended. Over the course of 2 years, the question was discussed, debated, and decided in both the House and Senate, in both the Armed Services Committees of those two bodies and in both the pertinent subcommittees thereof. Indeed, in 1980 the Subcommittee on Manpower and Personnel of the Senate Armed Services Committee rejected registration of women by a vote of 5 to 2; the full committee by a vote of 12 to 5; and the full Senate by a vote of 51 to 40.[16] The main elements of our findings, which I reviewed earlier, should serve to remind my colleagues of the multifaceted, military-related rationale behind our judgments.

I have also pointed out that Congress was concerned about continued political support for registration as a whole if that system included women. This is a factor which was fitting and appropriate for the Congress to take into account. Indeed, the Supreme Court has stated that when it comes to important public policy decisions:

> The appropriate forum for their resolution in a democracy is the legislature.[17]

Certainly, Mr. President, the question of who should be required to fight for the Nation and how best to accomplish that end is a social issue of the highest order, with sweeping implications for our society. The strains placed on family life by the drafting of women, whenever it might occur, and the unpredictable public reaction to the fact of female conscription properly contributed to Congress judgment that such conscription would not enjoy public support and, therefore, women should not be registered or drafted. And these are the types of social factors that the Supreme Court recently has intimated are permissible for legislators to consider.[18]

CONCLUSION

As I have noted before, it is really in this last conclusion that the true implications of this decision lie. For without public support for an induction system which includes women, it will be impossible for Congress to fashion a mechanism which meets the criteria of any court decision, in effect, requiring such an inclusion. The country essentially would be left without an effective mobilization capability, a vulnerability which

Footnotes at end of article.

clearly would not be in our national interest. The Supreme Court is being asked to replace a congressional judgment with a farfetched theory of equity that is not equitable and cannot practically be implemented. Those practical problems are problems that would have dire consequences for our national security.

Mr. President, let me say in conclusion, that whatever the precise state of the evidence before it, it is the Congress that is specifically charged with the power to raise and maintain armies and thus help protect our national security. And where Congress exercises that affirmative power judiciously, in reasoned fashion, its conclusions should be given due deference. For well-informed, factually based congressional judgments about statutory classifications are not the stuff of which unconstitutional laws are made.

I thank the Senator.

EXHIBIT 1

I. INTRODUCTION

In a modest ceremony at the White House on July 2, 1980, President Carter signed a Proclamation reinstituting draft registration for 19- and 20-year-old men.[1] That act may have brought to a close the first phase of the post-Vietnam period in American history, and represents the ending of a complex political and social process. The period from the chaotic withdrawal of American forces from Saigon in April 1975 to July 1980 was characterized by strong anti-military feelings on the part of many citizens and by the rather hasty implementation of plans for an all-volunteer military.[2] By the latter part of 1979, however, many of those feelings which ran so high at the end of the most unpopular war in American history had subsided. Members of Congress and others spoke increasingly of the problems of the all-Volunteer Force, particularly its failures to maintain a sufficient level of quality among new recruits and to provide adequate volunteers for the reserve forces.[3] Many Americans were again willing to talk openly of using American military power abroad. While the President and his chief military and civilian advisors at first maintained staunch opposition to resuming draft registration, the Soviet invasion of Afghanistan led the administration to support registration as a sign of American strength and of the will to protect its worldwide interests.[4]

Conscription, of which registration is the first and necessary step, has always called forth opposition in American society.[5] It has been attacked as involuntary servitude in violation of the thirteenth amendment to the U.S. Constitution, assailed as contrary to the religious and moral precepts of some citizens, accused of fostering foreign involvements by providing a limitless ready pool of men to be sent overseas, and characterized as class-conscious and racist in the application of the various exemptions and classifications which help decide who will actually serve.[6] The current debate over the wisdom and legality of registration, however, has revolved to a significant extent around a relatively new issue—whether women should, or constitutionally may, be excluded from compulsory service. Unthinkable as it may be to many World War II veterans and to members of Congress who have served continuously since the 1940's and 1950's, the issue of whether compulsory military service shall remain a burden imposed only on young men is important to many Americans, and cannot now be avoided.

It was therefore inevitable that the plan to resume registration during the week of July 21, 1980, at post offices all over America, would be immediately challenged in the federal courts. Ironically, the vehicle for this challenge was not a case filed in early 1980, as it became apparent that Congress and the President were finally of the same mind about registration; rather, it was a Vietnam-era case that had been kept alive since 1971.[7] The plaintiffs in *Goldberg* v. *Rostker*[8] had originally attacked the Selective Service System on several grounds, including the failure to include women. The Court of Appeals for the Third Circuit dismissed all claims except the equal protection one,[9] and eventually a three-judge court was convened to hear that issue. On July 1, 1974, the three-judge court, with Judge Rosenn dissenting, denied the Government's motion to dismiss.[10] The authority to draft young men expired, however, on July 1, 1973, and President Ford ended registration by proclamation on March 19, 1975, putting the lawsuit into a state of suspended animation.[11] When discussion of renewing registration began in 1979, the case again became active, and with the congressional appropriation of funds and Presidential action to resume registration, it moved quickly to decision

The three-judge court in Philadelphia decided *Goldberg* v. *Rostker* on July 18, 1980, late Friday afternoon, with registration of the first group of eligible men scheduled to begin on Monday, July 21. It ruled that male-only registration was unconstitutional and permanently enjoined the operation of the Selective Service System.[12] In its opinion, the court first disposed of the justiciability arguments, finding that the case was not moot and that the requirements of standing and ripeness had been met.[13] The court next reviewed the various equal protection tests, concluding that the so-called "middle-tier" test of *Craig v. Boren*[14] was applicable. The opinion went on to discuss in detail the proffered justifications for excluding women from registration, noting that: "If the purported justifications do not support this exclusion, or . . . are invalid as a matter of law, or . . . are contradicted by Congress' own actions or the overwhelming evidence in the record, then we will be required to declare the discriminatory statute unconstitutional."[15] The main portion of the opinion centered around the Government's argument that the exclusion of women from combat roles and the primary need for combat personnel in a time of military mobilization justifies the sole reliance on men in the Selective Service System.[16] The court responded by quoting from congressional testimony and other evidence that women are extensively used in the military services in peacetime,[17] that they can play an important role even in mobilization,[18] and that in any case large numbers of men who would be drafted would not be employed in combat.[19] Based on the assumption that the draft would be selective as to women, the Philadelphia court concluded that incorporating women into the pool of registrants would increase, not decrease, the flexibility of manpower management in time of crisis.[20] The court thus held that the purported justifications set forth by the Government did not meet either prong of the *Craig* test—a male-only draft did not serve important governmental interests and it was not substantially related to the achievement of any legitimate objective.[21]

Immediately after the announcement of the court's opinion, the government sought out the Circuit Justice for the Third Circuit, Justice Brennan; the next day, from his summer home on Nantucket Island, the Justice granted a stay of the order of the three-judge court, pending appeal to the Supreme Court.[22] Registration of men went forward as planned. Thus the stage was set for another act in that peculiarly American drama—the resolution of major social and political questions through judicial review by the Supreme Court.

This article will place the constitutional question into its factual and legal context, and will suggest a framework for deciding the issues. It will attempt to show that the legal issue is more complex than the *Goldberg* opinion indicated; involving not only the recent doctrinal development in the area of gender-based discrimination, but also the cases involving the special application of fundamental rights in the military or national defense context. It will attempt to analyze the conflicting factual claims and policy considerations upon which the justification for excluding women from registration and conscription rests, and will suggest that the proper stance for the courts is one of deference to the judgment of Congress. Finally, the article will suggest a possible disposition in the Supreme Court based on

Footnotes at end of article.

a modification of the *Craig* equal protection standard.

II. JUSTICIABILITY

The registration case had for some years been held in a state of dormancy by the Philadelphia three-judge court. The fundamental reason for this, of course, was that after 1975 there was no requirement to register and the Selective Service System itself was an inactive organization. The Government continued to argue that the case was not justiciable, despite the announcement by the President, during his State of the Union message in January 1980, that he intended to revitalize the registration system,[23] and despite the congressional consideration of special appropriations for registration [24] during the briefing and argument stages of the case. Justice Department lawyers argued that the various plaintiffs could not be drafted, and therefore could suffer no actual injury, since induction was barred by law.[25]

As briefing and argument in the case continued through the Spring of 1980, however, the Government's justiciability arguments became weaker. Congress passed a joint resolution providing registration funds,[26] and the President reinstituted registration,[27] thus removing any doubt that young men would actually be required to register. Similarly, individuals subject to the requirement to register in July 1980 were named as class members, making it clear that at least some of the plaintiff class would be liable for prosecution for failure to register. The three-judge court rejected all of the Government's justiciability arguments, resting most strongly on the existence of criminal penalties for failure to register and on the desirability of deciding the constitutional questions involved in advance of an actual emergency mobilization.[28] Although the Government conceded all the justiciability issues in its Jurisdictional Statement to the Supreme Court,[29] these issues loom as possible means of sua sponte escape for the Supreme Court, should the Justices decide that they do not wish to address the merits of a gender-based draft registration system. Therefore, they will be discussed briefly before turning to the merits.

A. Standing

Like the other elements of justiciability, standing is less a rigid doctrine than a series of general principles. The requirement focuses on the characteristics of the litigant, and is grounded on the "cases and controversies" requirement of the Constitution.[30] The Burger Court is perceived by many as having "revived standing as a formidable obstacle to judicial review." [31] Recent decisions require not only the constitutionally mandated injury-in-fact, defined as a distinct and palpable injury, but also a fairly traceable causal connection between the claimed injury and the challenged conduct.[32]

It seems clear that members of the class of plaintiffs in *Goldberg* do have a sufficient stake in the outcome of the controversy to be granted standing. With the reinstitution of registration, some of the plaintiffs are actually required to register, and face criminal penalties for failure to do so.[33] While they cannot at the moment be drafted, the criminal sanction and the burden of registering seem sufficient to satisfy traditional standing requirements. Recognizing, moreover, that challenges to underinclusive statutes present special problems of standing, the Supreme Court has in the past stated that "the burden alone is sufficient to establish standing." [34] Since the Selective Service Act itself imposes these burdens, and enjoining it would relieve the plaintiffs of them, causation is not a problem.

B. Ripeness

Ripeness is closely related to standing and is an even more slippery concept. Unlike standing, the ripeness inquiry focuses on the controversy itself, and is essentially a doctrine that controls the timing of judicial review.[35] A controversy is not ripe when the court perceives that the acts of the parties have not yet created the concrete likelihood of harm that requires judicial intervention.[36] At base, ripeness also rests on the constitutional requirement that there must be actual cases and controversies in order to invoke the article III judicial power.[37] It reflects the desire of the framers that judicial resources be conserved for cases that actually require resolution, and particularly their fear of advisory opinions.[38]

The cases on the ripeness doctrine seem to establish three tests. First, whether the positions of the parties are such that there is an actual and not a hypothetical clash of interests.[39] Second, whether the facts are sufficiently clear to convince the court to decide the case rather than waiting until a further stage of the controversy.[40] And third, whether there are other reasons which militate in favor of judicial intervention.[41]

The *Goldberg* court rejected the Government's contention that the case was not ripe, based on the actual requirement to register and the criminal penalties for not doing so.[42] It also observed, as to the third aspect of ripeness outlined above, that there were compelling reasons for deciding the constitutional question of male-only registration at that stage.[43] If, as initially advocated by the Government, the issue was litigated only after induction was actually authorized or begun, the important constitutional questions might be adjudicated during a period of mobilization, leaving in doubt at a most crucial point the government's power to induct.[44] The *Goldberg* court had no trouble concluding that the positions of the parties were truly adversarial, and that no new facts would arise between registration and actual induction to materially alter the legal issues.[45] The Supreme Court, based on its precedents, is likely to agree.

C. Political question

A potentially more serious justiciability problem is posed by the political question doctrine. Though the doctrine has been invoked by the Supreme Court rarely since *Baker* v. *Carr*,[46] in 1962, the political question inquiry is still important, as it defines the separation of powers between the legislative and executive branches on the one hand, and the judiciary on the other.

It certainly can be argued that the power to raise and support armies is granted exclusively by the Constitution to the Congress, and that therefore its chosen methods lie outside the ken of the federal courts. Similar decisions have been rendered by the Supreme Court on issues that involved the President's powers over the conduct of foreign affairs, and the constitutional guarantee to the states of a republican form of government.[47] It is a disturbing notion, however, that certain parts of the Constitution are completely outside the power of the federal courts, and the doctrine has not been expansively employed. It was argued by the Government in *Goldberg*, and rejected by the three-judge court.[48]

The best recent illustration of the use of the political question doctrine is *Gilligan* v. *Morgan*,[49] a case which is particularly relavant to the registration issue. *Gilligan* involved the efforts of a group of plaintiffs to prevent a recurrence of the Kent State tragedy. They asked that a federal court impose "continuing regulatory jurisdiction over the activities of the Ohio National Guard," [50] and particularly over its training. The Court found this to be the classic occasion for invoking the political question doctrine, since the administration of the National Guard was a federal and state executive responsibility, and not suitable for judicial decisionmaking.[51] It stressed that no issue of liability for specific wrongs or violation of constitutional rights was involved in the case, only the fear that the Guard would do so in the future.[52] Reflecting the separation of powers roots of the political question doctrine, the Court said:

It would be difficult to think of a clearer example of the type of government action that was intended by the Constitution to be left to the political branches directly responsible—as the Judicial Branch is not—to the elective process. Moreover, it is difficult to conceive of an area . . . in which the courts have less competence. The complex, subtle, and professional decisions as to the composition, training, equipping, and control of a military force are essentially professional military judgments, subject *always* to civilian control of the Legislative and Executive Branches. . . . It is this power of oversight and control of military force by elected representatives and officials which underlies our entire constitutional system. . . .[53]

On balance, invoking the political question doctrine is probably not the best resolution in *Goldberg*. Plaintiffs are arguing that their rights to equal protection under the fifth amendment have been violated; they are not abstractly challenging the administration of the Selective Service System. It is the clash of constitutional provisions—equal protection and Congress' power to raise and support armies—and not the conflict between political branches and the judiciary, that creates the core issue requiring resolution. The best way to resolve that clash is not to declare that equal protection rights cannot be judicially enforced in this context. The Court should, however, recognize the special powers and competence of Congress, and therefore give deference to congressional factfinding and reasoning when applying the appropriate equal protection standard.[54]

III. THE DEVELOPMENT OF AN EQUAL PROTECTION STANDARD

Assuming the Supreme Court opinion addresses the merits of the gender-based discrimination argument, *Goldberg* v. *Rostker* may well take its place as one of the most important cases decided by the Court under the equal protection clause. Before turning to the legal arguments and the issues of military policy involved in the Philadelphia registration case, it is necessary to review the development of the so-called "middle tier" standard for judging gender-based discrimination that has emerged since 1970. Against the backdrop of that development, the special approach advocated in this article for cases like *Goldberg* will become clearer.

As the above brief summary of the three-judge court opinion indicates, the judges did not consider male-only registration a difficult case, but rather one directly controlled by *Craig* v. *Boren* [55] and the related line of gender-based equal protection cases. As Justice Brennan noted in the brief opinion accompanying the stay order, however, the equal protection standard in such cases is not quite clear-cut.[56] There is a good deal of irony in the fact that the stay decision fell to Justice Brennan, who has written the Court's opinions in almost all the major gender-based discrimination cases, and also in the fact that he granted the stay, despite his consistent and articulate opposition to gender-based laws. In answering the question whether there is a "fair prospect" that a majority of the Court will conclude that the decision of the three-judge court below was erroneous [57] Justice Brennan recognized that the state of the law in this area is not without confusion and ambiguity:

In the past, the standard of review to be applied in gender-based discrimination cases has been a subject of considerable debate, compare *Schlesinger* v. *Ballard*, with *Craig* v. *Boren*. And my Brethren's application of the standard upon which we have finally settled in a context as sensitive as that before me cannot be predicated with anything ap-

Footnotes at end of article.

proaching certainty. Nonetheless, it does seem to me that the prospects of reversal can be characterized as "fair." [58]

A. Developments before Craig v. Brown

The equal protection clause was not a major weapon for striking down state or federal legislation in the pre-Warren period of Supreme Court history.[59] During the 1960's, however, the equal protection argument came alive as one of the principal elements of constitutional litigation. Generally, the Warren Court began to demand a far greater measure of congruence between means and ends in legislative action. It developed a two-tier approach to these problems. In most subject matter areas, the Court tested a particular law having differential impact on persons similarly situated under the old permissive test: if a rational legislative basis could be conceived for the distinction, the requirements of equal protection were satisfied. But the Court also developed a second test, much less permissive, in which the relation between legislative ends and means was reviewed with "strict scrutiny." This new test was applied by the Court to certain suspect classifications, such as race, or where the legislative scheme affected certain fundamental rights.[60]

Professor Gunther has ably described the complicated changes in the law of equal protection that have developed under the Burger Court.[61] The Court has developed an additional "middle-tier" test in gender-based cases, rejecting the permissive "rational basis" test but stopping short of classifying gender as a suspect classification and thus subject to "strict scrutiny." These recent cases have produced major changes in federal and state law concerning gender-based distinctions, and have spawned considerable doctrinal confusion.

Recent cases and commentaries often allude to *Reed* v. *Reed* [62] in 1971 as the birthplace of the middle-tier test.[63] As with so many "seminal" cases, rereading the case today leaves one somewhat puzzled at its reputation as the intellectual progenitor of the modern gender-based equal protection doctrine. *Reed* involved an Idaho statute granting a preference for male over female executors in the administration of estates. In striking down the statute on equal protection grounds, the Court did not spell out with particularity the standard it was using. While noting that the fourteenth amendment does not "deny to States the power to treat different classes of persons in different ways," [64] the Chief Justice, for a unanimous Court, asked whether the difference in treatment of men and women "bears a rational relationship" to a legitimate state objective.[65] While the Court seemed to be applying the old rational basis standard and not a new middle-tier test, it did find that the statute in question violated the equal protection principle, because its only justification was to avoid controversy and accelerate the selection of an executor. Perhaps foreshadowing the developments in the law that later purport to rest on the shoulders of *Reed*, the Court quoted from a 1920's case for the proposition that the legislative classifications must bear a "fair and substantial relation" to the end sought.[66]

While the rationale in *Reed* may not have been well developed, the disposition certainly suggested that there were cases where a "rational" reason for a gender-based distinction would not be sufficient; moreover, the fact that the Court had finally struck down a state law because of gender-based discrimination indicated that something extraordinary was happening.

The next significant case was *Frontiero v. Richardson* [67] in 1973, but a coherent middle-tier standard still did not emerge. *Frontiero* involved benefits for dependents of military service members. Under the then-current law and regulations, a male service member could claim his wife as a dependent without proof of her dependency, while a female service member was required to prove that her husband was actually dependent on her income. There was no legislative history to give a purpose to this distinction. The Government conceded that males had probably been exempted from a showing of dependency merely for administrative convenience, since female dependents were generally dependent in fact while male dependents were not. Justice Brennan, writing for a plurality of the Court, explicitly found that sex was a suspect classification, and that the Government's justification fell considerably short of the requirements of strict scrutiny. Four other Justices agreed that the distinction could not survive equal protection attack, but expressly refused to hold sex a suspect classification and thus to apply the strict scrutiny test; Justice Rehnquist dissented.

Two things are significant about the opinions in *Frontiero*. First, the Court did not articulate a clearly different standard for judging gender-based discrimination cases, though it again seemed to be applying a stricter standard of some sort. Second, since the Court stressed that it found no arguable government justification other than administrative convenience, *Frontiero* did not indicate how the Court would react to gender distinctions that have a strongly articulated policy basis.

In 1974, *Kahn* v. *Sheven* [68] introduced further doctrinal confusion. Florida had for many years given property tax exemptions to widows but denied them to widowers. Rejecting a widower's equal protection challenge, the Court upheld the law, distinguishing *Reed* and *Frontiero*. In those cases, said Justice Douglas, the distinction between men and women had been made solely for administrative convenience. Florida, by contrast, was attempting to assist widows who face an inhospitable job market marked by sex discrimination.[69] Thus, the purpose was remedial and it did not fall afoul of the equal protection theory of *Reed* and *Frontiero*. The Court also noted that states have a special leeway in enacting tax legislation and classifying persons for tax purposes, implying that the Court would given additional deference to legislative decisions in that substantive area. [70] Nonetheless, as critics were quick to point out, the case was a troublesome one. [71] How far may a state go to compensate for disadvantages inherent in society? The question obviously raises the same difficult and divisive issues as the racial affirmative action cases. The opinion also ignored what advocates of equal rights for women have always regarded as the most serious defect in "protectionist" legislation—that it stigmatizes women as inferior and incapable of caring for themselves, and thus perpetuates society's structure of discrimination.[72] In practical terms, the *Kahn* opinion did not indicate how the remedial purpose of the legislation can excuse the overbreadth of the classification: applying the exemption to many women who do not in fact need help.

The Court's next major opportunity to deal with these issues was *Stanton* v. *Stanton*,[73] in 1975. A divorced woman challenged Utah's age of majority statute, which defined adulthood as eighteen-years-old for females and twenty-one for males, because it allowed her former husband to end support for their daughter at age eighteen instead of three years later. The Court found the statute unconstitutional, again without deciding whether sex was a suspect classification and without articulating a new middle-tier standard.

Another case of major doctrinal importance during 1975 was *Schlesinger v. Ballard*,[74] also significant because it is one of the few major equal protection opinions that have dealt with military issues. The case concerned a challenge to the military promotion system which allowed women officers to remain four years longer than men after failing to be promoted a second time. The suit was brought by a male officer on equal protection grounds, and, on the authority of *Frontiero*, a three-judge federal court invalidated the provisions involved,[75] concluding that the only justification offered was administrative convenience. The Supreme Court, however, disagreed. Without being explicit about the standard it was applying, the Court found sufficient justification for differential treatment of men and women in military promotions. The distinction rested on the fact that promotion opportunities were different for men and women because of the exclusion of women from combat duty. Thus, the extra time available for final promotion of women made up in some measure for the limitations on career opportunities imposed by the combat restrictions.[76]

Significantly, Justice Brennan dissented, repeating his argument that sex should be a suspect classification and questioning the logic behind the majority's holding. It was particularly strange, he noted, to justify one act of gender-based discrimination (differential time to promote) by a second and more pervasive discriminatory policy (prohibition on women in combat positions).[77]

The Court returned to the themes of *Kahn* in a 1975 social security case, *Weinberger v. Wiesenfeld*.[78] In *Wiesenfeld*, the Court, with Justice Brennan writing for the majority, again looked to the purpose and effect of a clearly discriminatory rule—one allowing greater social security benefits for women—and found the remedial justification wanting. Justice Brennan thus followed *Frontiero* and not *Kahn*. A close reading of the opinion indicates that the Court may have in fact been retreating from *Kahn* by applying a different standard of proof for determining legislative purpose.[79] While the Government's proof of a reasonable purpose to compensate women for discrimination in the marketplace is at least as good as in *Kahn*, the Court seemed skeptical as to whether this was in fact the goal Congress had in mind, regardless of the effect. Perhaps *Kahn* and *Wiesenfeld* are simply irreconcilable; at least the latter opinion signals a harder look at discriminatory statutes that purport to have a "good" effect on the status of women.

B. Craig v. Boren

The middle-tier analysis finally emerged in 1976, in *Craig v. Boren*.[80] Like *Stanton*, *Craig* involved different ages of majority for males and females, this time in the context of Oklahoma's law allowing the sale of 3.2 beer to males at age twenty-one and females at age eighteen. Justice Brennan found his majority and wrote for the Court, articulating a special separate standard to govern sex discrimination cases. Reviewing *Reed* and its progeny, Justice Brennan perhaps overstated the clarity of the Court's doctrinal development over those intervening five years: "To withstand constitutional challenge, previous cases establish that classification by gender must serve important governmental objectives and must be substantially related to achievement of those objectives." [81]

While the Court accepted the state's purpose—to improve traffic safety—it found that the statistical relationship between age, sex and drinking on the one hand, and traffic accidents on the other, was insufficiently established.[82] The appropriate standard for judging the statistical evidence is not clearly explained, and indeed, after a lengthy discussion of the evidence, none of which was considered in the legislative history of the provision, the Court concluded that statistical analysis, while helpful, "is in tension with the normative philosophy that underlies the Equal Protection Clause," and thus must be kept in proper perspective.[83]

Footnotes at end of article.

Craig v. Boren completed the process begun with *Reed* in 1971. A majority of the Court had now articulated an equal protection standard for gender-based discrimination cases. The standard begun with *Reed* and fully developed in *Craig*, however, left some important questions unanswered. Although it was clear that the intermediate standard differed from the old "rational basis" standard, the extent of that difference was not yet apparent.

C. Post-Craig Developments

Two 1977 cases illustrate the problems that remain even after *Craig*. *Califano v. Goldfarb*,[84] another in the line of cases presenting the dependency issue first raised in *Frontiero*, again rested on the need to probe Congress' actual purposes, and found them wanting. It also contained a confusing discussion of whether the law discriminated against women, whose earnings produced smaller benefits for their deceased husbands; or against men, who were forced to present proof of actual dependency.[85] *Califano v. Webster*[86] showed that life remained in the *Kahn v. Shevin* line of cases, in which provisions are upheld on the ground that they are remedial. A provision of the Social Security Act which results in higher payments for female wage earners upon retirement was upheld because it was designed to compensate women for job discrimination, and not based merely on "archaic and overbroad generalizations" about women's role in society.[87] Again, the Court did not deal with the larger issue of stigmatizing women, nor did it seem troubled by the fact that by no means all of the wage earners who benefited from the statutory favoritism were actually discriminated against.

Without belaboring this brief review of the Court's odyssey in search of a coherent doctrine for gender-based discrimination cases, three of the most recent cases deserve mention. *Orr* v. *Orr*,[88] in 1979, struck down Alabama's alimony law because it allowed such payments to be made only to women. Justice Brennan asked whether gender was an accurate proxy for need in the divorce situation, but found that no such proxy was necessary, since hearings were already held in each case to probe the circumstances of each spouse and individualized determinations were therefore feasible.[89] Perhaps signalling an acceptance by the Court of the more generalized justification for striking down gender-based distinctions, Justice Brennan commented: "Legislative classifications which distribute benefits on the basis of gender carry the inherent risk of reinforcing stereotypes about the 'proper place' of women and their need for special protection." [90]

A more difficult case to understand is *Personnel Administrator* v. *Feeney*,[91] which the Court concluded was not a gender-based discrimination case at all. The Court upheld Massachusetts' absolute lifetime preference for veterans in state hiring practices, despite the fact that 98 percent of all veterans in the state were male and the scheme indisputably made it most difficult for women to obtain state employment. After reviewing past cases, and noting that a law which overtly or covertly preferred males over females in public employment would require "an exceedingly persuasive justification," the Court concluded that the law was simply not gender-based.[92] It was designed to help veterans, and thus excluded a large number of nonveteran males and included a small number of veteran females.

An aspect of *Feeney* which may be relevant to the registration case is that the Court gave no real consideration to the fact that the discriminatory effect of the veterans' preference was due in part to gender-based discrimination in the military service. This issue also skirted in *Ballard*, will come up again in the registration litigation since excluding women from the registration system was justified by Congress on the basis of another set of gender-based distinctions—the restrictions that keep women out of combat positions in the military.

The most recent excursion by the Court into the gender-based discrimination thicket is *Wengler* v. *Druggists Mutual Insurance Co.*[93] As in so many earlier cases, at issue was a statutory scheme which automatically allowed benefits to widows, while insisting that men prove actual dependence on a deceased wife's earnings. The Court's opinion did not contain any new discussion of the *Craig* standard, but illustrated some of the other perplexing problems arising in this line of cases. Like *Califano* v. *Goldfarb*, *Wengler* was viewed by the Court as involving simultaneous discrimination against both men and women. Finding such double-edged discrimination, of course, makes it extremely difficult for the state to justify the law. Moreover, the Court repeated its earlier statements that simply describing a benign purpose—here, to assist widows with death benefits while assisting only those widowers who are actually in need—is not enough.[94] Two other requirements must be met—proof of actual legislative intent and factual proof that the distinction or presumption underlying the law is valid.[95] Neither was found in *Wengler*.

D. Summary—The New Equal protection standard

The cases show considerable support for Justice Brennan's remark that the Court's handling of an equal protection case "in a context as sensitive" as draft registration is not altogether predictable.[96] They show, without question, a progressively greater willingness to strike down laws which discriminate against women, whatever the doctrinal formulation used. They also show an increasing demand that the actual purposes of the legislature be probed, not just the post-hoc rationalization presented by counsel. There is undoubtedly a growing requirement, moreover, that supposed justification for discriminatory treatment be supported by factual evidence of the relationship between means and ends. On the other hand, the Court still betrays substantial confusion about the level of factual proof required, particularly where the law involved has a benign remedial purpose, and remains fixed to some extent on the traditional analysis of whether a provision actually discriminates against one sex or the other. It does not seem fully inclined to accept the proposition that any law drawing a gender line is unconstitutional because it relegates women to second-class status, regardless of a motive to "protect" or "compensate." Finally, the Court seems ready to grant a greater measure of deference in areas of special state or federal legislative responsibility—*e.g.*, state taxation, military affairs, and immigration.[97] The questions to be asked are now clear: does the provision serve an important governmental interest, and is the means chosen substantially related to that interest? The answers, however, are rarely self-evident. The treatment of the emerging equal protection doctrine and the "answers" provided by the three-judge court in *Goldberg* v. *Rostker* will be examined in a later section.[98]

E. Lower court consideration of the draft and equal protection

The doctrinal development in the field of gender-based discrimination is a striking manifestation of how quickly the nation's attitudes about the position of women in society have changed. In fact, the question whether women may constitutionally be excluded from the Selective Service System is not one of first impression; it was decided by eight district courts and five courts of appeals during the Vietnam and post-Vietnam period, 1968 to 1976.[99] Ordinarily, the chances of the Court reversing so formidable and varied a line of cases would be slight. The rapid development of the intermediate standard of review in sex discrimination cases, however, has made the Vietnam line of cases a very doubtful resting place. Not one was discussed or even cited by the Philadelphia court, though they do stand as direct support for the proposition that the exclusion of women from the registration is constitutional.

The opinion in *United States* v. *St. Clair* [100] is typical. The district court evidently applied a rational basis test, noting that Congress excluded women "presumably because they are still regarded as the center of home and family life." [101] Continuing in this vein, Judge Bonsal concluded that men have traditionally had the responsibility for fighting wars, and that "Congress followed the teachings of history that if a nation is to survive, men must provide the first line of defense while women kept the home fires burning."[102] No specific legislative history supporting a male-only draft was cited, as indeed there was none in 1968.

In a Louisiana case two years later, Judge Rubin avoided the stereotypical characterization of women's role, but rested on deference to Congress and its judgments about how best to meet the defense needs of the nation through conscription.[103] His equal protection analysis was also based on a rational basis standard. For Judge Rubin, the then-current debate about the fairness of certain draft exemptions, the lottery system, and other policy questions underscored the political nature of the issue:

> This debate underlines the fact that the question of whom to call up is essentially a political one, and that the political process is now specifically focused on it.
>
> But the wisdom of the legislative definition of the manpower pool is not a matter for a court to rule on. Congress is constitutionally permitted to draw rational distinctions in deciding from whom to require military service, according to its own evaluation of the nation's needs, military, civilian and societal.[104]

In *United States* v. *Yingling* [105] in 1973, the court noted that the Supreme Court opinions in *Reed* and *Frontiero* [106] showed a change in the test used for gender-based laws under the equal protection clause. *Frontiero* was interpreted as meaning that administrative convenience cannot be the sole reason for the gender-based distinction, but the court concluded that more than administrative convenience was involved in the exclusion of women from registration and conscription.[107] A 1974 Wisconsin case dealt more fully with the emerging equal protection cases, but still concluded that a gender-based registration and draft system was constitutional.[108] The court found the personnel regulations at issue in *Frontiero* easily distinguishable from the more fundamental policy issues involved in the draft, where the government's interest is very strong:

> The power of Congress to raise an Army is sui generis. The exercise of that power, through the selective service laws, has deprived citizens of the most profound of human and constitutional rights. . . . Yet, the government interest is so extremely urgent that courts must show the greatest deference to congressional judgment. National security, in its true sense, is at stake.[109]

Only one case during this period held the gender-based draft system unconstitutional.[110] It is noteworthy, however, that it is the most recent district court decision, as well as the most complete, reviewing the historical attitude of paternalism toward women and noting that women are often disadvantaged by it. The court quoted, and disapproved of, the language from *St. Clair*

Footnotes at end of article.

regarding women's stereotyped role, and reasoned that women will never be equal until they are asked to share equally in the burdens of citizenship.[111] The decision, which was grounded on a finding that gender was a suspect classification, was later reversed.[112]

The court of appeals opinions on the issue of a gender-based registration are likewise cursory. In the earliest opinion, *United States v. Fallon,* [113] the Seventh Circuit in 1969 attempted to define precisely the governmental interest served by the Selective Service System. Alluding to the wide variety of classifications and deferments in the law, including the exclusion of women, the court said that "Congress was entitled to consider factors which would both maximize the efficiency and minimize the expense or raising an army and minimize the disruption of what were considered important civilian functions." [114] The court, clearly applying a "reasonable basis" test, found sufficient justification for the exclusion of women from the system.

Opinions in the First and Tenth Circuits, in 1971 [115] and 1973 [116] respectively, gave short shrift to the sex discrimination issue. They seemed to be applying a rational basis test, and there was very little discussion of the factual basis for exclusion of women.

In *United States v. Baechler,*[117] the Fourth Circuit, in a per curiam opinion, also applied the rational basis test. It seemed to find, in the arguments about the different physical abilities of women and the restrictions on their combat role, a sufficient reason for excluding them from the draft system:

Considering the nature of the demands of military service we cannot say that Congress had no rational basis for the distinction based on sex. While it is true that women may and do perform vital services in the armed forces of the United States, and their physical and mental capabilities are valued contributions on the nation in both peace and war, these characteristics and accomplishments do not create a constitutional obligation upon the Government to subject them to call equally with men.[118]

In summary, the courts that considered the constitutionality of excluding women from registration and conscription from 1968 to 1976 found the issue, by and large, to be an easy one. Except for the single district judge who found the law unconstitutional and was reversed on appeal, most of these judges applied a rational basis test in their equal protection analysis, and had no difficulty concluding that the Government had met that burden. None was decided after *Craig v. Boren,* and those decided after *Frontiero* distinguished it. It is, however, too easy to say that these decisions predated the *Craig* intermediate standard of review and are therefore not relevant today. One district judge recognized that the standard was changing,[119] and a reading of the opinions leave one with the strong impression that most would have been decided the same way under the new intermediate standard of review then under development by the Supreme Court. The dominant theme of these cases is deference to the judgment of Congress as to the best way to provide personnel for military service. It is this same deference that seems lacking in the three-judge court's analysis in *Goldberg* and it may yet be the principal issue on appeal of that case to the Supreme Court during the 1980 term.

IV. APPLYING THE EQUAL PROTECTION STANDARD

The opinion of the Philadelphia three-judge court did not linger over the choice of an equal protection standard. It rejected the contentions of the Government that a "rational relationship" test would be appropriate because of the nature of the governmental interest in national defense. It also rejected the arguments of the plaintiffs that sex is a suspect classification or that registration involves a fundamental interest, either argument leading to the application of a "compelling governmental interest" or strict scrutiny test. The court instead chose the middle ground of the *Craig v. Boren* standard, advocated in the alternative by the plaintiffs, which it characterized as the "important government interest" test.[120] The more difficult task is to apply that standard to the registration situation.

A. Defining the gender-based discrimination

In trying to unravel the complexities of the equal protection test, with its inevitable subjectivity about the relationship between means and ends, it is important to keep in mind precisely what sort of discrimination is involved. Excluding women from registration does not "burden" them in the old-fashioned sense reflected in *Craig* or *Reed.*[121] Women are not deprived of a societal benefit by the law. Nor is the question of access to military service as a career an issue. Though the point is often overlooked, exclusion from registration does not impinge in any way on the access of women to a military career, since they may continue to volunteer and serve even in a mobilization situation. Because they are free to participate voluntarily in the activity in question, unlike the situation in most of the earlier equal protection cases, it is even difficult to make the argument that women are being relegated to a position of second-class citizenship.[122] If there is any stigma attached, it arises from the exclusion of women from combat service, not from being freed from conscription. The "burden" here, if there is one, falls on men—exclusion of women from the system makes it more likely that any particular man will be drafted because the registration pool is smaller. Interestingly, registering and drafting women in large numbers, while it might reduce the chances of a particular man being called, probably would increase the chances of a particular male inductee actually going into combat and getting killed or wounded, since fewer rear echelon jobs would be open to men. In any event, in constitutional terms the issue is a narrow one—whether compulsory entry into the service in a time of emergency may be restricted to men.

B. The governmental interest in draft registration

The *Goldberg* court was not careful to separate the two parts of the *Craig* test, but rather treated them as a single standard. Nonetheless, it is analytically helpful to distinguish the two steps—isolating the governmental interest involved and judging the appropriateness of the means chosen to attain the end.

As the above review of the equal protection cases shows,[123] determining whether an important interest is involved usually is not the crucial part of the analysis. Even in cases like *Craig* where the law was struck down, the more difficult task was substantiating the appropriateness of the means. The problem with the first part of the Craig test is more often ambiguity in the legislative purpose, or a disparity between the stated purpose and the legislative history. It is important, however, to understand the governmental interest involved, not as a legal technicality to be satisfied, but rather as a prerequisite to the reasoned analysis of the relationship between means and ends which is at the heart of the equal protection issue. In the case of draft registration, it is arguable that the Goldberg court did not in fact understand the congressional purpose behind reinstitution of male-only registration, and that this misunderstanding was an important factor in skewing its final constitutional conclusions.

1. Legislative history revisited

Legislative history is the key to the first part of the Craig test. It is essential for courts to have a clear idea of what the Congress intended in order to judge its actions. In this report, the Goldberg court went seriously astray, and did not seem to have before it the full legislative history. The Goldberg opinion seems to rely, as the source of the congressional justification for the exclusion of women, on an informal report of a single subcommittee—Senator Nunn's Subcommittee on Manpower and Personnel of the Senate Armed Services Committee.[124] In fact, the legislative history is much more extensive, and established a stronger and clearer congressional purpose.[125] The court quoted extensively from a draft report released to the press by the Nunn Subcommittee in April 1980, and drew from that report the congressional arguments that it found so unconvincing.[126] The court did not, however, note that the report was formally adopted by the subcommittee and later revised, enlarged, and adopted by the full Armed Services Committee as part of its larger report on the fiscal year 1981 military authorization bill.[127] In short, what the Goldberg court treated rather deprecatingly as the preliminary view of a subcommittee was in fact the formally adopted view of the full committee. The final committee report, moreover, contained a revised justification not addressed by the court. The Goldberg court thus divined the congressional purpose and justification for the exclusion of women from registration without considering some elements of Congress' analysis.[128]

Second, the court seemed unaware that the question of excluding women from registration was debated on the floor of the Senate during the summer of 1980, though the floor debate occurred before oral argument and decision in the case. During the debate over the supplemental appropriation necessary to fund the July 1980 registration Senator Kassebaum, along with Senator Levin and others, made a substantial effort to amend the bill to require registration of both men and women; that effort failed.[129] The full Senate also adopted without debate the Armed Services Committee's statutory provision adding authority to begin registration by transferring funds from the Department of Defense, along with the crucial report language on the registration of women.[130] Thus, there was clear Senate endorsement of the report of the Armed Services Committee, rejection on the floor of an effort to include women in registration, and a positive decision to begin registration as necessary in the national interest. In weighing the congressional interest in this vital matter, the court did not deal with any of these facts, and may indeed have been unaware of them.

Third, the court did not mention House action rejecting the proposal that women should be registered along with men. A subcommittee of the House Armed Services Committee addressed the matter and reaffirmed the Congress' consistent opposition to registration of women; the Appropriations Committee also rejected efforts to include women, and a floor amendment to require registration of both sexes was defeated by voice vote on April 22, 1980.[131]

Because the congressional articulation of purpose and the strength of congressional commitment to the challenged policy are crucial to any consideration of the constitutionality of male-only registration and conscription, the Philadelphia court's failure to fully consider the legislative history is curious. In addition, after the court's decision, the House-Senate conferees on the military authorization bill addressed the question in conference committee. The conferees specifi-

Footnotes at end of article.

cally adopted the Senate's findings on the registration of women, making them the formal findings of the entire Congress.[133]

2. Determining the congressional purpose

We have seen that the full legislative history on the draft registration issue may not have been adequately analyzed by the Goldberg court. But what of the merits of this issue? What was the congressional purpose? On an elementary level, the purpose of the Military Selective Service Act and of registration procedures is to protect our national security by ensuring a strong military establishment. But such a statement is too general to be of much use in constitutional analysis. It is necessary to dig deeper to understand fully the congressional purpose.

As the resumption of registration became a viable possibility during 1979 and early 1980, members of Congress who were convinced of the wisdom of a male-only system were very concerned over the lack of legislative history to support that policy. The Senate Armed Services Committee, for example, concluded after its 1979 hearings and after research on the issue by the Congressional Research Service, that the legislative history of past draft laws did not provide a defensible justification for the decision to exclude women.[134] It is a commentary on how significantly our ideas about women in society have changed that the need to explain why the draft was limited to men simply had never occurred to earlier congresses. Recognizing the possibility that the courts would apply a heightened standard of scrutiny to such an obviously gender-based classification, the committee set about to establish the basis for its conclusion, which it strongly felt was the conclusion of the Congress as a whole and a majority of Americans as well.[134] Hence the extensive 1979 and 1980 hearings and the effort to articulate the reasoning behind a male-only draft. As noted above, the Nunn subcommittee, the Senate Armed Services Committee, the Senate, and the Congress itself attempted to clarify their intent not only by a general discussion of its reasoning and the facts supporting it, but also by the adoption of specific findings on the question of registration and induction of women. It may be helpful to the analysis to reprint those findings in full.

SPECIFIC FINDINGS

(1) Article I, section 8 of the Constitution commits exclusively to the Congress the powers to raise and support armies, provide and maintain a Navy, and make rules for the Government and regulation of the land and naval forces, and pursuant to these powers it lies within the discretion of the Congress to determine the occasions for expansion of our Armed Forces, and the means best suited to such expansion should it prove necessary.

(2) An ability to mobilize rapidly is essential to the preservation of our national security.

(3) A functioning registration system is a vital part of any mobilization plan.

(4) Women make an important contribution to our national defense, and are volunteering in increasing numbers for our armed services.

(5) Women should not be intentionally or routinely placed in combat positions in our military services.

(6) There is no established military need to include women in a selective service system.

(7) Present manpower deficiencies under the All-Volunteer Force are concentrated in the combat arms—infantry, armor, combat engineers, field artillery and air defense.

(8) If mobilization were to be ordered in a wartime scenario, the primary manpower need would be for combat replacements.

(9) The need to rotate personnel and the possibility that close support units could come under enemy fire also limits the use of women in non-combat jobs.

(10) If the law required women to be drafted in equal numbers with men, mobilization would be severely impaired because of strains on training facilities and administrative systems.

(11) Under the administration's proposal there is no proposal for exemption of mothers of young children. The administration has given insufficient attention to necessary changes in Selective Service rules, such as those governing the induction of young mothers, and to the strains on family life that would result from the registration and possible induction of women.

(12) A registration and induction system which excludes women is constitutional.[135]

It is apparent from a reading of the committee report and hearings, as well as from the relevant floor debate, that the court did not grasp Congress views on this issue. Congress saw the proposal to begin registration as a way to strengthen our mobilization capability, not as a peacetime adjunct to the All-Volunteer Force.[136] It saw registration and the draft as inseparable parts of a single process, designed to supply needed manpower in time of emergency. Congressional concern was much colored by the revelations about current shortages of volunteers for combat assignments, combat-related shortfalls in the reserves, a disastrous 1978 mobilization exercise, and a general concern that the country had no real Selective Service System capable of functioning should it be needed.[137]

By contrast, the court seemed to view registration and possible conscription simply as an extension or supplement to the volunteer services, not as an emergency manpower system primarily designed to supply combat forces.[138] Thus, the court continually emphasized the important role played by women in the present volunteer army and the increasing number of women in all the services. In fact, Congress shares the view that women are an important element of our military services, are making vital contributions to our security, and should continue to do so.[139] That point was simply seen as irrelevant to the issue at hand. Congress focused not on the proper role of women in the peacetime volunteer army, but rather on the most efficient ways to supply the soldiers, sailors, marines and airmen that would be needed in an emergncy. The court's extraordinary comment about congressional purposes can be seen as a fundamental misunderstanding of what had happened:

> It is difficult for us to accept the inconsistent positions of Congress. Congress has continuously allocated funds for the increase of the number of women in the armed services, in both absolute terms and as a percentage of total forces. There can be no doubt that the experience of women in the volunteer army has been a success story. . . .
>
> It is incongruous that Congress believes on the one hand that it substantially enhances our national defense to constantly expand the utilization of women in the military, and on the other hand endorses legislation excluding women from the pool of registrants available for induction.[140]

Quite to the contrary, the congressional view is clearly that encouraging the use of women in the volunteer army and expanding opportunities for career advancement of women are not inconsistent with an all-male draft, but merely reflect different policies with different purposes. The court failed to grasp the point that regardless of the present heavy use of women in the All-Volunteer Force, Congress was postulating a mobilization scenario in which the mix of skills of draftees would be different from those of former volunteers—much more heavily weighted toward combat skills.

Moreover, the *Goldberg* court seemed at times to isolate registration from conscription in a way that is logically and practically impossible. While the judges rejected as illogical the argument that the constitutionality of registration can be analyzed separately,[141] they insisted at several points in the opinion on excluding any consideration of policy concerns like equal induction and the validity of the combat restrictions—issues which are inextricably caught up with the validity of all-male registration itself.[142]

As to the first part of the *Craig* test, then, it is reasonable to criticize the Philadelphia court on several grounds. It inadequately analyzed the legislative history, confused the voluntary peacetime force with the differently oriented mobilization system, and unfairly characterized general congressional attitudes about women in the military.

C. The congruence of means and ends

The meat of the *Craig* test is whether the means chosen by Congress to attain its important governmental objective are "substantially related" to the attainment of that objective. To answer that question, it is necessary to ask why Congress chose the particular means at issue—male-only draft registration—to attain the emergency mobilization capability that was so urgently sought. It is important, therefore, to examine each of the reasons Congress gave for its choice of male-only registration, and the *Goldberg* court's treatment of those reasons.

1. Requirements for combat personnel in mobilization

In examining the justifications proffered by Congress, the Government correctly placed great emphasis on the need for combat replacements in a mobilization scenario and the consequent flexibility given to the services by the fact that the draft pool contained only men.[143] The court responded to this in several ways. First, it noted that in the past only a small percentage of military personnel actually engaged in combat. Second, the court asserted that women can be used in a draft scenario, as they presently perform a variety of military tasks. Finally, the court reviewed the requirements of the Defense Department, to be filled by the Selective Service System in time of mobilization, which call for drafting about 80,000 women along with 570,000 men, concluding that there is no justification for excluding women from the pool. The court summed up by simply disagreeing with the Congress that a male-only pool would give the personnel managers added flexibility.[144]

There is no dispute about the facts on the most general level—most of those needed in mobilization are combat replacements—but not all conscripts go into combat. It is necessary, however, to look more closely at the record, for there is additional evidence that the need for combat replacements in a mobilization scenario is more important than the opinion of the court indicates. Most significantly, the court does not mention the fact that the Defense Department's mobilization plan does not call for the drafting of any women at all in the first sixty days, because of the need for large numbers of combat replacements.[145] Moreover, the 80,000 women to be utilized in the first 180 days would be drafted only if volunteers are not available. The large majority of those needed, and those called, would have to be men in order to fill the need for additional combat personnel.[146]

Throughout the Senate hearings, witnesses testified that the primary need during a mobilization scenario was for men in order to enlarge combat units and replace casualties. Senator Cohen, an opponent of registration but an advocate of including women if registration were to be instituted, questioned William Clark, Principal Deputy Assistant Secretary of the Army for Manpower:

Footnotes at end of article.

Senator COHEN. Does it necessarily follow that if you have a draft that all of those who would be drafted would be put into a combat role, or would some be assigned to support roles that you talked about?

Mr. CLARK. Some would certainly be assigned to support roles. But your immediate and very evident demand is going to be first to fill up the kinds of units that have to be deployed early, with an added demand for the replacement of casualties.[147]

Senator Nunn asked a similar question of General Bronars, the Marine Corps personnel chief:

Senator NUNN. General Bronars, what proportion of people drafted in the Marine Corps in case of a mobilization would be for combat skills?

General BRONARS. Assuming that the draft was designed to sustain force levels and that personnel were drafted for a 2-year period, the vast majority of drafted personnel would be used in skills such as the combat arms, requiring the least amount of training time.[148]

The court ignored an additional factual point of considerable importance to its analysis of the primary need for combat personnel. Throughout both the House and Senate manpower hearings for the fiscal years 1980 and 1981, there is considerable testimony about shortages of combat personnel in the present volunteer environment.[149] In a volunteer system, where recruits have a choice of skills, recruiting for combat skills is very difficult, despite special bonuses. As a result, many existing units are very short of combat personnel.[150] The same is true of the reserves, where the Army is short up to 500,000 personnel in the Individual Ready Reserve, the principal pool for immediate augmentation of existing units.[151] When the Army tested its mobilization system, in a 1978 exercise called Nifty Nugget, major deficiencies in combat personnel were revealed.[152] Although the figures were initially classified, they were eventually released and included by Senator Nunn in the hearing record:

[I]f an emergency occurred, the Army indicates that it would not have sufficient combat manpower in combat units. I can now reveal the extent of the problem for some skills: 90 days after a mobilization occurred, the Army would only be able to fill: 52 percent of its infantry positions . . . 73 percent of its artillery positions . . . and 28 percent of its armor positions. . . .[153]

These facts indicate that the need for combat personnel in mobilization is a more complex problem than the court realized. Not only is the major need in a mobilization scenario for combat replacements, but that need is exacerbated by the fact that the foundation on which mobilization builds—active and reserve units and individual reserves—is woefully short on combat manpower. This analysis helps to understand the need felt by Senator Nunn and others to concentrate on combat skills in reinstituting draft registration.

2. Manpower utilization and flexibility

Another argument addressed in detail by the Senate Armed Services Committee and argued by the Government in the Philadelphia case is that the need for combat-capable personnel in mobilization is increased by the necessity to rotate noncombat personnel into combat units and by the possibility that a number of combat support personnel may be drawn into combat inadvertently, thus limiting the number of women assigned to those units. In other words, the figures on percentages of combat and noncombat jobs (roughly 43% of all personnel "slots" are in combat skills[154]) do not give a true picture of the military's ability to utilize women. The court, however, seemed to rest on the fact that there are plenty of noncombat jobs and that there is, therefore, no justification for excluding women from the pool.[155] The difficulty with such an argument is that it views the armed services in a static state, with so many soldiers in combat jobs and so many in combat support and service support units. This is unrealistic, as the following exchange from the Senate hearings indicates:

Senator JEPSEN. Historically, in the Army where most draftees would serve, the distinction between combat and noncombat jobs is quickly lost on the mobile battlefield.

Personnel in noncombat units are often asked to be combat replacements and combat support. Combat service support units often find themselves ordered to accomplish combat missions where combat units are not available.

Doesn't this mean that there is a limit to the number of women who can safely be assigned to combat units, to any units?

Mr. DANZIG. Yes: there is a limit to the number of women who can be assigned to units and the support base because the military must be responsive, not only to the number of men who actually are needed in combat at any given moment, but also those who may be needed in the future because of rotation or whatever.[156]

As the Armed Services Committee report points out, there should be sufficient noncombat males in the services to allow the usual rotation.[157] Given the combat restrictions, moreover, the services will try to avoid placement of women in combat support positions where they are more likely to be engulfed in combat. There was, in fact, considerable testimony in the Senate hearings that the fluid nature of the battlefield makes that problem somewhat greater now than it was in World War II.[158]

The Government argued that these two requirements—rotation from combat to noncombat jobs and insulation from combat on a mobile battlefield—meant that using only men in a mobilization scenario would increase the flexibility of military manpower management.[159] In the Philadelphia case, the court addressed only the first of these requirements, and placed great emphasis on the point that exclusion of women would *decrease*, not increase, such flexibility. The court's reasoning again shows its limited understanding of the actual justifications for a male-only mobilization system:

Defendant's main argument may be summarized as follows: women cannot fill all positions in the armed services, especially combat positions; in a time of mobilization the primary need of the military services will be in combat related positions and in support position personnel who can readily be deployed into combat; therefore, in order to maximize the flexibility of personnel management, women should be excluded from the MSSA.[160]

Admitting that the immediate need in mobilization would be for combat troops, the court then constructed its own scenario, in which the availability of women would improve flexibility:

[M]ale inductees cannot be moved into basic combat positions until after twelve to fourteen weeks of training, and considerably more for highly skilled combat positions; the only immediate deployable source of combat trained manpower would be existing male military personnel on non-combat assignments; the immediately deployable male military personnel are, to a substantial degree, in positions where they do clerical and typing work, nursing and other similar jobs which in the civilian work force are disproportionately filled by women; the pool of female registrants would have a strong concentration of skills not largely available among the pool of male registrants; thus inducted women would be moved into non-combat jobs with little or no training and release men for immediate deployment into combat. Inducted women could complete the work left undone by the combat deployment of the men in non-combat units.[161]

Several points should be made about this scenario. First, of the noncombat males who can be transferred into combat jobs in an emergency, quite a small proportion are in clerical, typing or nursing work. Second, the court assumes that women could step into these jobs, even if they did predominate, with little training: a proposition for which there is no support in the record. In fact, combat training takes less time than most noncombat training, not more as the court assumes.[162] Noncombat billets which are crucial in mobilization are not clerical, but are in communications, engineering, transportation, maintenance, and other areas where civilian men are at least as well qualified as women and have the added advantage of being combat-deployable later.[163] Most significantly, however, the court's rationale is strikingly inconsistent with a primary justification given by Congress for a male-only draft—the court's scenario would quickly result in most of the noncombat jobs being taken by women and the combat jobs taken by men. Congress made a conscious policy choice, based on its constitutional power to raise and support armies, that it did not want individuals to remain in combat without adequate rotation into noncombat units. With the possible exception of nurses, where there are few men available in the civilian pool, the conclusion is inescapable: the flexibility of having all the inductees capable of performing combat or noncombat jobs is significantly greater, over a longer period of time, than the court concluded.

3. Women in combat

A major factor in the congressional analysis of registration was undoubtedly the issue of women's role in combat and its implications in a mobilization scenario. As indicated above, advocates of male-only registration and conscription felt that the 1979 and 1980 hearings had clearly established the primary need for combat replacements in an emergency situation, in contrast to the mix of skills needed in the normal peacetime accession system. They reasoned that in light of that fact, and the legal and policy restrictions against women in combat, the registration and conscription system should therefore be limited to men. Underlying that reasoning, of course, was a congressional belief that the combat restrictions are reasonable and valid. Congressional efforts to make these restrictions more workable and less of an impediment to career advancement for women are not inconsistent with that view, but merely reinforce it; for in each case Congress reaffirmed the basic policy against use of women in combat.[164]

The restrictions placed on women serving in combat positions in the American armed services play an important role in the justifications put forward by the Congress for excluding women from the registration and induction system. It is necessary, therefore, to examine the scope of those restrictions and their logical implications for our legal analysis.

Contrary to popular belief, the actual legal restrictions on women in combat do not cover all the services. There is a specific provision excluding women from certain types of Navy ships expected to engage in combat,[165] and the statutes governing the Air Force contain a provision prohibiting women from serving on combat flying missions.[166] By contrast, the Army provisions are not based upon statute, but upon consistent tradition, policy, and regulation.[167] The notion that women should not intentionally engage in combat is not new, nor is it an exclusively American idea. Of the more than seventy nations that have conscription in some form, only ten conscript women, and none place women in combat jobs.[168]

The definition of "combat" has never been

Footnotes at end of article.

clear, but the core meaning of the word seems to involve physical proximity with the enemy rather than merely performance of functions that may involve killing or being killed.[169] For example, the Air Force assigns women officers to duty as strategic missile officers. These officers would fire missiles at targets inside the Soviet Union in time of war, but the Air Force does not categorize that job as a "combat" assignment despite the obviously greater chance of killing and being killed in a strategic nuclear exchange.[170]

As Americans have increasingly begun to rethink their traditional notions of what women can and cannot do, the argument that women could not be successful frontline riflemen, artillerymen, and tank drivers has come under increasing criticism.[171] While these restrictions have their basis in physiological differences between men and women, they are also based on a deep-seated belief that fighting should be restricted to men, and upon doubts as to the actual performance of mixed units in the field. There is very little credible evidence to establish the latter argument one way or the other.[172]

Few courts have considered the constitutional validity of the prohibition of women in combat positions. The Supreme Court, in *Schlesinger v. Ballard*, noted as a fact that these restrictions resulted in different career opportunities for men and women in the Navy, without so much as a hint that the underlying restrictions themselves might be invalid.[173] The most extensive discussion of the matter was in a district court case, *Owens v. Brown*.[174] Judge Sirica there invalidated the old statutory provision concerning women on Navy ships, which did not distinguish between combat and noncombat sea duty. But he took care to make it clear that he was not calling into question the right of the Congress and the President to restrict the use of women in combat positions:

[N]othing in this decision is meant to shape the contours of Navy policy concerning the utilization of female personnel. As the Court has noted in deciding the merit of plaintiff's claims, there remain many unanswered questions about the effects of full sexual integration that may well convince military authorities that women members should be excluded from shipboard combat assignments, or even from permanent assignment to some non-combat positions, or for that matter, from all shipboard duties until such time as the vessels are properly equipped and crew members properly trained to accommodate their female counterparts.[175]

In light of the long line of cases in which the Supreme Court has deferred to congressional and military judgment about matters involving entry into the armed services, control of military reservations, and internal discipline,[176] it would seem highly unlikely that the Supreme Court would ever invalidate the combat restrictions. They involve judgments about military effectiveness that come perilously close to the actual deployment of forces and internal management of the armed services, and they represent a policy judgment too strongly held and fundamental to most Americans for the Court to interfere.

The interesting logical question, assuming that the combat restrictions are valid, is what consequences flow from that conclusion. Military witnesses testified before the Nunn subcommittee that women now comprise about 9% of the armed services, that the figure would increase to 12% or so in the next five years, and that 20–25% was probably the maximum that could be effectively utilized.[177] The latter fact, not mentioned by the Philadelphia court, is a consequence of the need to have some flexibility in the employment of personnel between combat and noncombat jobs; if all potential noncombat jobs—roughly 57% of all individual job assignments in the peacetime army [178]—were occupied by women and thus those service members could not be rotated into combat during an extended emergency, the Army would find itself, in the words of the Senate Armed Services Committee Report, divided into "two groups—one in permanent combat and one in permanent support." [179] Presumably then, if the combat restrictions themselves are valid, other restrictions that are based on them, but also clearly discriminatory, could be justified. For example, if the 20–25% limit of women were to be reached, it would be constitutional to exclude women from voluntary enlistment, or at least severely curtail enlistment. One might also argue that the validity of the combat restrictions would support a differential draft of the kind advocated by the Carter administration and supported by the plaintiffs in *Goldberg*. Thus, the argument would go, because there are restrictions on the utilization of women in combat units, and admittedly more combat replacements are needed in mobilization, it is permissible to draft large numbers of men and small numbers of women, despite the obvious equal protection arguments raised. In any event, admitting the validity of the combat restrictions exerts a strong logical pull away from the result in *Goldberg*.

Recognizing the doctrinal problem, the plaintiffs in *Goldberg* were somewhat unclear as to whether the combat restrictions themselves were unreasonable and invalid.[180] The ACLU legal and policy memoranda take the same ambiguous line.[181] The Philadelphia court, perhaps recognizing that the Supreme Court would be even more unlikely to strike down such restrictions than to invalidate a male-only draft, skirted the issue.[182]

4. The problem of unequal induction

Another major factor in the Congress' decision to limit the registration and draft system to men was the conviction that equal induction of men and women would be extremely undesirable, and that it was more likely to be required by a court if registration were opened to women.[183] Senators Warner and Nunn reepatedly expressed the fear that if Congress were to register both men and women, creating a new legislative history in favor of equal treatment, and then were to authorize a draft which was largely composed of men, the federal courts would strike it down and create the intolerable situation of an equal-numbers draft.[184] That fear, and the belief that an equal-numbers draft would be disastrous militarily, played a major role in congressional reasoning. It was an argument that the Philadelphia court did not see fit to address in detail, calling it irrelevant,[185] although its arguments about flexibility assume a selective draft of women.[186]

The Senate Armed Services Committee criticized the administration for espousing the goal of equality but then advocating a plan that would subject at least six times as many men as women to the draft: "It has been suggested that all women be registered, but only a handful actually inducted in an emergency. The committee finds this a confused and ultimately unsatisfactory solution.

"First, the President's proposal does not include any change in section 5(a)(1) of the Military Selective Service Act, which requires that the draft be conducted impartially among those eligible. Administration witnesses admitted that the current language of the law probably precludes induction of men and women on any but a random basis, which should produce equal numbers of men and women. Second, it is conceivable that the courts faced with a congressional decision to register men and women equally because of equity considerations, will find insufficient justification for then inducting only a token number of women into the Services in an emergency. Indeed, it is hard to see how the equity which is the aim of advocates of an equal registration system is achieved by a system under which a vastly larger number of men than women would actually be called to duty. If the Congress were to mandate equal registration of men and women, therefore, we might well be faced with a situation in which the combat replacements needed in the first 60 days—say 100,000 men—would have to be accompanied by 100,000 women. Faced with this hypothetical, the military witnesses stated that such a situation would be intolerable. It would create monumental strains on the training system, would clog the personnel administration and support systems needlessly, and would impede our defense preparations at a time of great national need." [187]

The Senate's grave concern was based on testimony concerning the effects of a draft that required equal numbers of men and women to be chosen, or put another way, a draft system that was purely random from among a male *and* female population and which would therefore bring in approximately equal numbers of each gender. Service personnel chiefs and their civilian superiors testified that induction of equal numbers in a mobilization situation would be disastrous.[188] If the Army needed, for example, 570,000 combat-capable replacements during the first six months, as is projected for the most frequently used NATO conventional war scenario,[189] an equal induction would also bring in 570,000 women, the vast majority of whom could not be usefully employed. Training bases would be overburdened, and separate housing and other arrangements for such a large influx of women would simply be unavailable. All experts seem to agree that such a result would be unworkable, and would endanger the mobilization itself at the very time when a smooth-working and efficient system is most needed.

The equal induction problem must be taken into account as a practical matter because the Congress considered it an important reason for not registering women. But the equal induction argument is also relevant from a doctrinal standpoint. It is tempting to argue that while the combat restrictions and differential inductfon are constitutionally valid, excluding women from registration for the same reason is not. But the reasoning is not self-evident. One could sensibly conclude, as Congress has done, that the combat restriction can serve to support both the validity of differential induction and the exclusion of women from registration (since it would be difficult to register just *some* women), and that since so few women will be needed in mobilization it is rational to confine the draft to the primary group needed. And it is well to keep in mind that there is no issue here of whether women should serve at all, only whether they should be compelled to serve in a situation where they are excluded from performing the principal function required at that time.

Recall, too, that the mobilization plan calls for one-sixth women over the first six months of mobilization, if needed, but no women at all in the first two months. The court rests on and uses this mobilization plan to support its reasoning,[190] but does not explain how one can conclude that male-only registration is invalid, while a male-only induction in the early weeks is valid.

What the disagreement between the Philadelphia court and Congress may come down to, if one accepts the assumptions that Congress did, is that there is a constitutionally significant difference between imposing a burden on men six-times more frequently than on women at the induction stage, and imposing it on men entirely at the registration stage. From a policy standpoint, Con-

Footnotes at end of article.

gress simply did not see the two as significantly different.

5. The military need to draft women

Many members of Congress emphasized the fact that there was no military need to draft women. All witnesses testified that in their military opinion there was a sufficiently large pool of men available to make drafting women militarily unnecessary. As the court quote properly pointed out, that is not strictly relevant to resolution of the constitutional issue.[191] It is, however, relevant to an understanding of what members of Congress saw as their major role—not to redress some abstract inequality of status between men and women, but rather to discharge, along with the President, the constitutional responsibility for national defense. Particularly in the House military personnel subcommittee, the prevailing attitude was an unwillingness to experiment with women in the draft system when there was no military need to take on that added and uncertain burden.[192]

6. Unresolved social problems

In trying to understand the congressional point of view on this volatile issue, it is also important to keep in mind that social, political, and moral considerations also played a role. Congress saw the issue as a complex of military, social, and political concerns not all capable of reduction to factual propositions. There was concern that it was foolish to begin registration of women, with all its symbolic importance and its historical break with precedent, without confronting hard questions about exemptions and deferments for women. What would happen, Senator Nunn asked of administration witnesses, if a family consisted of a young mother, a young father, and small children, and the mother received a draft notice but the father did not? [193]

Was the nation ready for that outcome? Would the drafting of young women in an emergency where thousands of soldiers were dying in a NATO of Middle East clash affect the nation's will to protect its interests? What would the political effects be? All of these questions had no answers, because of the historical exclusion of women for the system, and there is a strong thread running through the congressional deliberations that the majority was not willing to experiment in a situation where our national security would be at stake.

7. Political and tactical considerations

Finally, a consideration in Congress' decision to authorize only the registration of males was the fear that President Carter's proposal to register both men and women would doom the registration issue itself. This surfaced occasionally in the hearings, where Senator Nunn expressed the view that the issue of registration of women would divert the Congress from the registration issue itself, send the wrong signal to our allies and adversaries, and harm our security.[194] It was also mentioned by Congressman Montgomery during House hearings, in a passage quoted in the court's opinion.[195] It is arguable that if the choice had been registration of men and women on the one hand, or no registration on the other, the Congress in 1980 would have voted down registration. In light of the strong view of the administration and many members of Congress that registration was urgently needed to repair a major defect in the country's ability to protect itself, the practical political considerations were an important motive. In fact, the administration itself ceased to press for registration of women when it saw that such an effort could result in defeat or indefinite delay of the larger issue of registration.[196] In light of Congress' affirmative constitutional responsibility for national defense, this factor should have been given some weight in the constitutional analysis, but was not alluded to by the Philadelphia court.

D. Judging Congress' Policy Choice by the Craig Standard

We have now seen that a cogent argument can be made that the *Goldberg* court misconceived the purpose behind Congress' decision to reinstitute registration. We have also reviewed the reasons for the congressional choice. Some of those reasons, like the problem of unequal induction, the unresolved social problems and the practical political considerations, were not addressed by the court at all. Others—like the need for combat replacements and the flexibility issue—involve conflicting evidence and require for adequate judgment, some expertise in military problems. Even assuming these reasons are well understood, it is a major thesis of this article that a court, in applying the *Craig* test to draft registration, should proceed with a healthy dose of deference to the legislature.

Deference to the judgment of Congress was not a major theme of the three-judge court's opinion in *Goldberg*.[197] Yet it is almost certainly going to be a major concern of the Justices when the case is argued before the Supreme Court, as is shown by the emphasis on the issue in the Government's jurisdictional statement [198] and by the Court's treatment of similar issues.[199]

1. The argument for deference

It is not enough to apply the *Craig v. Boren* standard [200] to male-only registration without recognizing the substantially different problems it presents. An obvious reason why more deference should be given to Congress' weighing of the arguments and Congress' view of the facts concerning mobilization is that we are here dealing with an issue—who shall be compelled to serve and perhaps die in defense of the country—which is not only a fundamental political question, but also a matter given over by the Constitution to the affirmative power of Congress.[201] It is thus vastly different from the contexts of the other major gender-based discrimination cases, which involved social security benefits, tax exemptions, dependency benefits, pregnancy leaves, ages of majority and similar classifications applied to men and women who were fundamentally similarly situated.[202] Here, we are concerned with Congress' constitutional duty to raise and support armies, whereas in none of the major equal protection cases has an affirmative power of Congress been directly implicated.

The strength of congressional feelings on the provision in question should also be taken into account. Even using the *Craig v. Boren* approach, it is extremely important to ask how strongly the legislative view is held. Since the equal protection analysis is very subjective in any case, the degree to which Congress attaches special importance to the policy choice it has made is, and should be, very relevant. In contrast to some of the equal protection cases of the 1970's, cases in which the legislative purpose and the ends the legislature sought to achieve were unclear, here the purposes are clear and the strength of conviction is substantial.

In disposing of the argument for congressional deference in a few sentences, the Philadelphia court reasoned that the deference Congress may be due should come into play not in deciding whether to apply the old rational relationship or the new important governmental interest test, but rather in determining the substantiality of the relationship between means and ends.[203] But the court failed to follow its own advice. It is indeed the wise course to analyze the complicated issues of the need for combat replacements and the conflicting claims for operational flexibility with the knowledge that Congress' constitutional responsibility and its superior experience give it something of an edge. But it is difficult to read the *Goldberg* opinion and not conclude that the judges there, by contrast, substituted their judgment for that of Congress on these issues. The court did discuss the factual evidence, but devoted the bulk of its opinion to quotations from administration spokesmen to the effect that registration of women was desirable.[204] Surely it could not have meant to imply that the executive branch's advocacy of this policy is more significant constitutionally than Congress' rejection of it. In both *Schlesinger v. Ballard* and *Owens v. Brown* the administration had advocated that the policy at issue be reversed; the Supreme Court and Judge Sirica, however, appropriately judged the statute or regulation as it existed and ignored the fact that the executive branch opposed it.[205] Reliance on the opinions of administration spokesmen in preference to the judgment of Congress, moreover, ignores political realities. The year before, all these same spokesmen had opposed registration.[206]

2. Deference in other military cases

The Government argued strongly in *Goldberg* that prior Supreme Court decisions established a special deference for congressional and military judgments in areas with national security implications.[207] The *Goldberg* opinion does not address these cases, but rather dismisses them with the statement that they deal with military discretion or day-to-day military operations.[208] That is an inadequate response to a significant and complex line of cases which stand for the proposition that conflicts between individual rights and national security measures must be resolved with great deference to congressional judgments. The Supreme Court cases that establish a different attitude toward fundamental rights in this context do not all relate to internal management of forces or deployment of troops. Contrary to the assertion of the *Goldberg* court, they clearly involve the entire spectrum of congressional power to *raise* and support armies and to make rules pursuant to that power.[209]

A number of Supreme Court cases have dealt with the problem of how to adjust our attitudes, our fundamental civil liberties in the very different context of a military society. While they involve internal management of the military, they are nonetheless relevant, for they show that even our most fundamental liberties must be balanced against national security needs in certain situations. Putting aside as tangential the cases involving military jurisdiction over civilians, which deal with the question of where court-martial jurisdiction and civilian judicial power intersect,[210] the first important case in the post-war period was *Orloff v. Willoughby*.[211] There, a doctor challenged the power of the United States to draft him under a special doctors' draft and then assign him to duties which, while medically related, did not fully utilize his status as a doctor of medicine and did not entail officer's status. The Court deferred to the discretion of the service as to what particular duties he might be assigned, even though the only statutory basis for inducting him was his medical degree.[212] While the case relates to internal management of the military, the Court's broad language about its lack of expertise to decide such questions, and its special deference to military judgments regarding the proper utilization of personnel, makes it relevant to *Goldberg*.

The Vietnam conflict spawned several cases which raised questions about the nature of civil liberties inside the military services. Perhaps the most significant was *Parker v.*

Footnotes at end of article.

Levy.[213] Doctor Levy was charged with violating the two "general articles" of the Uniform Code of Military Justice [214] and for disobeying a lawful order after he refused to give medical instruction to special forces personnel and counseled black soldiers to refuse to go to Vietnam. Justice Rehnquist, upholding the provisions, reasoned that military society was different from civilian, and a special military customary law had developed that gives service members like Levy notice as to what was "conduct unbecoming." [215] On the more general issue of the application of first amendment freedoms in the military, he said: "While the members of the military are not excluded from the protection granted by the First Amendment, the different character of the military community and of the military mission requires a different application of these protections." [216]

Middendorf v. Henry [217] involved another right deemed fundamental in the civilian world, but which the Court viewed somewhat differently in a military context—the right to counsel. With only Justice Marshall dissenting, the Court held that it should defer to Congress' judgment that counsel not be provided as of right in summary court-martial proceedings.[218] Most recently, the Supreme Court decided consolidated appeals in *Brown v. Glines* [219] and *Secretary of the Navy v. Huff*,[220] both of which involved the right of service members to circulate petitions. Writng for a six-man majority, Justice Powell upheld the validity of regulations which required prior approval by the base commander for the circulation of petitions, emphasizing that certain civil liberties have to be interpreted differently in a military context because of the special needs of discipline and response to command authority.[221]

Even where the rights of those outside the military are affected by military rules, the Supreme Court has exhibited great reluctance to interfere—even when fundamental rights are involved. The most striking example of cases in this category is *Greer v. Spock*,[222] involving the right of Dr. Benjamin Spock to make a partisan political speech within the borders of Fort Dix, New Jersey. The Court upheld a regulation banning partisan speeches, referring most explicitly to the special deference given to the judgment of military authorities and the special application of constitutional freedoms in the military context: "One of the very purposes for which the Constitution was ordained and established was to provide for the common defense, and this Court over the years has on countless occasions recognized the special constitutional function of the military in our national life, a function both explicit and indispensable." [223]

Two major Supreme Court decisions have dealt with issues involving the Selective Service System, and thus are closely analogous to *Goldberg*. They may in fact may be the most revealing clues to the Court's handling of the registration issue. *Gillette* v. United States [225] involved the congressional decision as to which citizens will be granted exemptions from compulsory military service because of conscientious objection to war. Congress had drawn a line between those who object on religious grounds to all wars and those whose religious beliefs forbid them to engage in unjust wars but allow participation in some conflicts.[225] The former were to be granted conscientious objector status while the latter are denied it. This congressional distinction was challenged on grounds that it violated the freedom of religion of those who object on religious and moral grounds to a particular war, in this case the Vietnam conflict.[226] The Court justified the distinction, which to many may seem irrational, on the grounds that Congress has special powers in the area of raising military forces, and a compelling interest in maintaining an efficient and workable draft system.[227] The case is a striking example of judicial deference to congressional judgment in national security affairs, even where the classification made by Congress affects a basic right of citizenship.

The other case was *United States* v. *O'Brien*,[228] the draft card burning case. There, Chief Justice Warren upheld the constitutionality of the law making it a crime to destroy one's draft card, and described Congress' power in a most expansive way:

> The constitutional power of Congress to raise and support armies and to make all laws necessary and proper to that end is broad and sweeping. . . . The power of Congress to classify and conscript manpower for military service is "beyond question." . . . Pursuant to this power, Congress may establish a system of registration for individuals liable for training and service, and may require such individuals within reason to cooperate in the registration system.[229]

Finally, there is *Gilligan* v. *Morgan*.[230] That case, as discussed above, involved a wholesale assault on the concept of military discretion and judicial deference. In rejecting the plaintiff's request to undertake continuous judicial supervision of the Ohio National Guard, the Court went even further than the other deference cases noted above, refusing on political question grounds to address the merits at all.[231]

This catalog of recent decisions is not an exhaustive treatment of the cases discussing the relationship between constitutional protections in the military and civilian contexts. But the cases, none of which are alluded to by the three-judge court in the Philadelphia registration case, do indicate an attitude by a majority of the present Court that even the most fundamental rights must be viewed within the context of Congress' judgment about military necessity. These cases involve interests just as important, socially and constitutionally, as gender-based discrimination—free speech in *Parker v. Levy*, freedom of political activity in *Greer v. Spock*, right to counsel in *Middendorf v. Henry*, freedom to circulate petitions in *Secretary v. Huff*, to mention only a few. While the Court does look at the merits of the constitutional claims in most of these cases, it does so with a special attitude of deference because of the constitutional separation of powers in national security matters. The military-context cases constitute clear support for the proposition that the courts should judge the constitutional issue in the male-only registration case with substantial deference to the judgment of Congress concerning the reasonableness of its choices in the national security area.

3. Deference in equal protection cases

The notion that the applicable equal protection test should be applied, in certain contexts, with a greater measure of deference to congressional findings and reasoning is not a new one. As observed above, deference to the state's affirmative taxing powers was mentioned by the Court as one reason for upholding a Florida tax that applied differently to men and women in *Kahn v. Shevin*.[232] Moreover, the Court has used deference to congressional policy quite recently in an equal protection case. In *Fialla v. Bell* [233] in 1977, the Court relied very heavily on Congress' special powers over immigration and naturalization, despite previous applications of the middle-tier test in cases involving aliens. The analogy to the affirmative powers of Congress is certainly apt. In *Fiallo*, the Court upheld a provision of the Immigration and Nationality Act which grants special status to aliens who are parents of children of U.S. citizens; the law withholds the preference from the natural father of an illegitimate child while giving it to the mother.[234] With Justice Powell writing for the Court, the Justices rested on the traditional extreme deference to congressional decisions about the entry of aliens.[235] They made no real attempt to probe the rationality of the distinction Congress drew in that instance, even though *Fiallo* is a post-*Craig* case.

The most relevant support for deference can be found in *Schlesinger v. Ballard*.[236] The case is significant in several respects. Unlike *Frontiero* it involved important military policy questions, not administrative arrangements or benefits, and thus is arguably closer to the registration case. Indeed, military promotion policy, at issue in *Ballard*, is one of the most fundamental congressional duties in establishing and maintaining an adequate army. Thus, the Supreme Court's finding of sufficient justification for a gender-based difference in *Ballard* may indicate that it may come to the same conclusion in *Goldberg*. It is particularly relevant because the promotion problems at issue in *Ballard* were a direct result of the restrictions against women in combat, and that policy also stands at the root of Congress' decision to exclude women from registration and induction. Second, even though the line of "new equal protection cases" seemed well established by them (albeit without a clear rationale), the majority in *Ballard* did not demand very much in the way of factual support for its finding of sufficient governmental interest. For example, it might well be asked whether there were other means available to compensate for the different work opportunities imposed by the combat restrictions which were less blatantly discriminatory. The Court might also have examined more carefully whether the challenged policy actually benefited women officers.[237] But most importantly, the Court in *Ballard* expressed a special concern for deferring to Congress in judgements about military matters:

> This court has recognized that "it is the primary business of armies and navies to fight should the occasion arise." The responsibility for determining how best our Armed Forces shall attend to that business rests with Congress, and with the President. We cannot say that in exercising its broad constitutional power here. Congress has violated the Due Process Clause of the Fifth Amendment.[238]

Recognizing that *Schlesinger v. Ballard* is a crucial equal protection case for its analysis, the *Goldberg* court made special efforts to distinguish it. First, it noted that the men and women naval officers whose allowable time to be promoted was different were not in fact similarly situated, because the combat restrictions limited the kinds of work women could do and thus their chance of promotion.[239] The difficulty is that precisely the same situation arises in the registration case from those very same restrictions, and therefore it is no ground for distinguishing the cases. The ability to utilize large numbers of women effectively in a mobilization situation is severely limited by the combat restrictions. Second, the court asserts that *Ballard* was decided before *Craig*, and therefore is of questionable validity. It is doubtful that any commentator on the sex discrimination cases which would give much credence to that argument. The *Craig* opinion twice quotes *Ballard* with approval,[240] and *Craig* itself purports to be a restatement and clearer articulation of what had already been established, not a change in the doctrine.[241] The Court has consistently taken the position that its "new" equal protection standard dates not from *Craig* but from *Reed* and *Frontiero*, both decided before *Ballard*. *Schlesinger v. Ballard* may be read to reflect the analysis advocated in this article—it recognizes Congress' special role in raising and supporting armed forces and deciding on

Footnotes at end of article.

their management, and gives deference, within reasonable limits, to Congress' view of the justification for its actions. In fact, since there was substantial disagreement about the purpose and effect of the personnel provisions in *Ballard*, one can make a cogent argument that the registration question is the easier of the two.

4. What is a "Substantial Relationship"?

The standard of proof for constitutional facts which has emerged from the Supreme Court's equal protection cases is neither clear nor consistent. Thus, even if applied with deference to congressional findings, the second, "substantial relationship," part of the *Craig* test does not provide a simple or concise set of guideposts for constitutional decisionmaking. The *Goldberg* court lays out a three-part test by which to judge the sufficiency of Congress' reasons—whether the purported justifications support the exclusion of women, whether the justifications are invalid as a matter of law, and whether they are contradicted by Congress' own actions "or the overwhelming evidence in the record."[242] But these three standards are not drawn from the Court's equal protection opinions, and are certainly too conclusory to be helpful.

Commentators and even members of the Court have pointed out the lack of content to the notion of a "substantial relationship."[243] In *Craig*, as we have seen, the Court demanded a clear statistical relationship between drinking, driving, and the earlier maturity of young women.[244] It did not find that relationship. But the Court's other opinions do not clearly explain what kind of statistical relationship is needed. There is no such requirement, for example, in *Kahn* v. *Shevin*, where certainly not all women needed the protective exemption given them by Florida law,[245] or in *Califano* v. *Webster*,[246] where all women had not suffered the employment discrimination that lay behind higher social security benefits for them. Both of these cases involved provisions that placed a special burden on men, just as does the male-only draft. Even in the *Craig* opinion itself, where the Court performed its most searching statistical inquiry, there is a recognition that mathematical certainty in judging the congruence between a gender class and the legislative purpose is simply not possible. After a complicated review of the statistical evidence, the Court concludes:

> There is no reason to belabor this line of analysis. It is unrealistic to expect either members of the judiciary or state officials to be well versed in the rigors of experimental or statistical technique. But this merely illustrates that proving broad sociological propositions by statistics is a dubious business, and one that inevitably is in tension with the normative philosophy that underlies the Equal Protection Clause. Suffice it to say that the showing offered by the appellees does not satisfy us that sex represents a legitimate, accurate proxy for the regulation of drinking and driving.[247]

There is also a qualitative aspect to the notion of a "substantial relationship." Here too the Court's opinions give insufficient guidance. This is because few of its decided cases involved policies that were clearly articulated or backed by strong legislative conviction. In several of the important cases—Reed, Frontiero and Orr, for example—the Court found no real reason for the gender-based classification except for administrative convenience. Those cases are not particularly useful in analyzing the standard of proof needed where there is an expressed policy basis for the distinction, as in Goldberg. Whatever one might think of the justification for a male-only draft, it surely involved more than administrative convenience, since it is bottomed on the restrictions concerning women in combat.

There is no dispute over the fact that the primary need in a mobilization situation is for combat personnel, and it is also clear that some women could be used, assuming a differential draft. While this article has attempted to show that there is somewhat more evidence to support the congressional judgment than the Goldberg court acknowledged, the question whether there is a substantial relationship between means and ends is certainly not easily resolved. The Court's opinions give very little guidance to a judge in evaluating factual arguments that are conflicting, where Congress has chosen to accept one rational interpretation and to reject another. Yet this is where deference is most clearly to be preferred. Moreover, there is no escape from the fact that application of the Craig test involves some sort of balancing between the state interest on the one hand and the fit between congressional purpose and the gender line drawn on the other. And while factual evidence helps in that balancing process, it should also involve, depending on the precise issue, considerations other than factual and statistical ones. Thus, the social and political issues in the case may prove more important in the Supreme Court than they were below.

5. A lower-middle-tier standard?

The Government's jurisdictional statement to the Supreme Court continues to assert the position it took before the Philadelphia court, that the respect due to congressional powers in the national security area should dictate use of the old rational basis standard.[248] It seems unlikely, however, that the Supreme Court will be willing to turn back the clock in the field of gender-based discrimination. It also seems more reasonable to interpret *Ballard*, perhaps the key precedent, as representing a deferential approach to application of the middle-tier standard, not as a rational basis, pre-Reed case.

Admittedly, adopting the posture advocated here—accepting the applicability of the *Craig* test but applying it with a measure of deference to Congress—would not always give a clear answer. But it defines an attitude on the part of the judiciary in the crucial area of national defense which is more consonant with separation of powers doctrine than is the opinion in *Goldberg* v. *Rostker*. It does not require that Congress' facts and reasoning be immune from scrutiny, but it does counsel a certain respect for clearly articulated findings based on reasonable evidence, even if other conclusions are possible. It recognizes, moreover, a limitation on the skill and experience of judges in dealing with defense issues. While it may further confuse an already confusing set of equal protection standards, such an approach seems well supported by the cases outlined in this section and more conducive to a sensible separation of powers in matters which critically affect national defense. Such an approach does not mean abandonment of the *Craig* standard, because application of the modified test here is supported by a line of precedent for deference in military and national security affairs that will not be present in other contexts.

In retrospect, it appears that the district and circuit judges who adjudicated the equal protection issue during the Vietnam years, before the flowering of the middle-tier standard, were on the right track. They approached the task with a healthy respect for congressional decisionmaking and a recognition of the critical nature of the national security issues involved. Since that line of cases was decided, the Supreme Court has arguably set out a more demanding standard for gender-based discrimination cases, but Congress has also more forcefully and factually explained the reasons for its policy. Following the analysis advocated in this article, the outcome should be the same—upholding the constitutionality of the male-only draft.

V. CONCLUSION

The purpose of this article has been to suggest what, in the author's view, are the real issues in *Rostker v. Goldberg*, and to provide an analytical framework for their resolution. In Section II, we reviewed the various justiciability issues—standing, ripeness, and political question, and concluded that they should probably not be barriers to adjudication of this case on the merits. In Section III we reviewed the general development of equal protection doctrine in the Supreme Court's gender-based discrimination cases, culminating in the middle-tier standard of *Craig v. Boren*. We saw that those cases leave many questions unanswered, and do not provide an easy solution to the problem raised in *Goldberg*. In Section IV, we attempted to isolate the actual purpose behind the congressional decision to reinstitute registration. We also probed the reasons for the policy choice to exclude women, concluding that in several particulars the *Goldberg* court failed to consider or inadequately understood those reasons. Finally, we examined the possibilities of a different approach to the registration issue, applying the *Craig* standard but doing so with special deference to legislative powers in the national security area. The result of upholding congressional action in this case can therefore be doctrinally consistent with earlier equal protection decisions, and at the same time in line with the Supreme Court's resolution of other clashes between fundamental rights and national security considerations.

In a very real sense, *Goldberg* is unique. It is substantially different from recent gender-based discrimination cases, in that it does not involve the exclusion of women from military service, but rather the exclusion from compulsory service in a time of crisis. Indeed, the Philadelphia decision does not represent a major victory for women in their rightful drive for equality, because, as we have seen, they would only be drafted in small numbers in any event and would not be used in combat roles. The true badge of inferiority or second-class citizenship, if one is involved in this case, is the exclusion of women from combat, a restriction that is unlikely to be changed by judicial action. The inexorable and justifiable march of women for full equality in American society can and should proceed even if *Goldberg v. Rostker* is reversed in the Supreme Court.

The issue here is whether the judgment of Congress that good military and social reasons exist for excluding women from registration, reached after careful and serious consideration, should be overturned by the judicial branch. Few questions are more fundamental in a free society than the choice of who should be required to serve in its defense. America's long term interests are surely safer if such decisions are entrusted, with proper safeguards, to the representative branch of government.

[56] Rostker v. Goldberg, 101 S. Ct. 1 (Brennan, Circuit Justice 1980).

[57] Justice Brennan, citing appropriate cases, summarized the standard for granting a stay in these situations as follows: there must be a "reasonable probability" that four Justices will vote to hear the case, the Circuit Justice must be convinced that there is a fair prospect that the majority of the Court will conclude that the decision below is erroneous, there must be a showing of irreparable harm if the stay is not granted, and in a close case the balance of equities must be explored. The Government made a showing that failure to grant a stay would leave the country without a functioning mobilization system, and that the inconvenience suffered by individual men in having to register was not sufficient to outweigh that harm. *Id.* 2.

[79] *Id.* 648. The Court's now celebrated language from *Weisenfeld* is: [T]he mere recitation of a benign, compensatory purpose is not an automatic shield which protects against any injury into the actual purposes underlying a statutory scheme. Here it is apparent both from the statutory scheme itself and from the legislative history . . . that Congress' purpose in providing benefits to young widows with children was not to provide an income to women who were, because of economic discrimination, unable to provide for themselves. Rather, [the statute], linked as it is directly to responsibility for minor children, was intended to permit women to elect not to work and to devote themselves to the care of children. Since this purpose in no way is premised upon any special disadvantages of women, it cannot serve to justify a gender-based distinction which diminishes the protection afforded to women who do work.

[120] Goldberg v. Rostker, No. 71–1480 (E.D. Pa. July 18, 1980).

[121] See notes 62–66, 80–85 and accompanying text *supra.*

[122] Senator Warner, one of the principal Republican supporters of draft registration and of the exclusion of women from the system, had as Secretary of the Navy expanded opportunities for service women. During Senate consideration of the draft issue, he repeatedly made the point that there was a difference between a woman volunteering for military service, knowing that her career opportunities would be affected by the exclusion of women from certain combat-related jobs, and compelling a woman to participate in such a system. Senator Warner saw a problem of constitutional dimensions in compelling women to participate in such service, with its inherent discrimination (assuming, of course, the continuing validity of the combat restrictions). *Senate Manpower Hearings, supra* note 3, at 1686–87.

[123] See notes 62–95 and accompanying text *supra.*

[124] No. 71–1480, slip op. at 26–35.

[125] The Manpower and Personnel Subcommittee first considered the registration issue formally in 1979. It held hearings on S. 109 and reported the bill favorably to the full committee on June 7, 1979. S. 109 would have required the President to begin registration of male citizens on January 2, 1980, and to prepare a full study of classification and exemption standards and procedures. S. 109 was reported favorably by the full Committee on Armed Services on June 19, 1979, but was never voted on by the Senate. Because of the desire of Senator Nunn to discuss on the Senate floor the facts the subcommittee developed on U.S. mobilization capacity, a rare closed session of the Senate was held on September 21, 1979. The threat of a filibuster by Senator Hatfield and other opponents of registration prevented debate on the bill. The Armed Services Committee Report included a recommendation that women not be registered. SENATE COMM. ON ARMED SERVICES, REQUIRING REINSTITUTION OF REGISTRATION FOR CERTAIN PERSONS UNDER THE MILITARY SELECTIVE SERVICE ACT, AND FOR OTHER PURPOSES, S. REP. No. 226, 96th Cong., 1st Sess. (1979); *Hearings on S. 109 Before the Senate Comm. on Armed Services,* 96th Cong., 1st Sess. (1979).

The House also considered the registration issue in 1979, including a provision in the House version of the fiscal year 1980 Military Authorization Bill, H.R. 4040, requiring registration in January 1981. It did not consider the issue of inclusion of women, however. H.R. REP. No. 166, 96th Cong., 1st Sess. 141–43 (1979). The registration requirement was deleted on the House floor, but a provision requiring the President to report on reform of the Selective Service System was adopted by the House-Senate conference committee. *See* CONFERENCE REPORT, DEPARTMENT OF DEFENSE AUTHORIZATION ACT, 1980, S. REP. 371, 96th Cong., 1st Sess. 54 (1979).

After the invasion of Afghanistan, the President reversed his earlier position and called for registration under the Selective Service Act, proposing both additional appropriations for that purpose and a change in the law to allow the registration of women. *See* PRESIDENTIAL RECOMMENDATIONS FOR SELECTIVE SERVICE REFORM, H.R. Doc. No. 265, 96th Cong., 2d Sess. 24–28 (1980) [hereinafter PRESIDENTIAL RECOMMENDATIONS FOR SELECTIVE SERVICE REFORM]. Those issues were considered by the Senate Subcommittee on Manpower and Personnel at hearings on March 19 and April 2, 1980, and the issue arose on other occasions during the subcommittee's regular hearings on the fiscal year 1981 Department of Defense budget request. *Senate Manpower Hearings, supra* note 3, at 1647, 1655–94. After debate on the issue of registration of women, the subcommittee issued a draft report to the press on April 22, 1980. That report was later revised and presented to the full committee during the markup sessions on the fiscal year 1981 defense budget. The committee voted 12–5 on June 3, 1980 to reject the President's proposal to register women and to endorse his request for additional funds to begin registration, incorporating its comments into the Report on the 1981 Defense Authorization Bill. SENATE COMM. ON ARMED SERVICES, AUTHORIZING APPROPRIATIONS FOR FISCAL YEAR 1981 FOR MILITARY PROCUREMENT, RESEARCH AND DEVELOPMENT, ACTIVE DUTY, SELECTED RESERVE, AND CIVILIAN PERSONNEL STRENGTHS, CIVIL DEFENSE, AND FOR OTHER PURPOSES, S. REP. No. 826, 96th Cong., 2d Sess. 154–62 (1980) [hereinafter S. REP. No. 826].

[126] No. 71–1480, slip op. at 23–35.

[127] S. REP. No. 826, *supra* note 125, at 1655–94.

[128] The Government's submissions do not clearly spell out this legislative history. The Senate Armed Services Committee's report was available on June 20, fully one month before the court's opinion was promulgated. S. REP. No. 826, *supra* note 125, at 1. In their brief, plaintiffs make the following statement: "The proposal to open registration to women never got out of subcommittee in either the House or the Senate." Plaintiffs' Reply Memorandum to Defendants' Memorandum Filed June 16, 1980, at 20 n.14, Goldberg v. Rostker, No. 71-1480 (E.D. Pa. July 18, 1980). If that statement, dated June 23, 1980, means that no full congressional committee considered and acted on the question, it was clearly incorrect as of the date it was written.

[129] 126 CONG. REC. S6527-49 (daily ed. June 10, 1980). The debate was complicated by several factors. First, while cloture had been invoked, thus insuring that a vote on the appropriation necessary to begin registration would take place, some Senators voted for the Kassebaum amendment because they perceived that it would stop registration entirely. The form of the amendment did not require the registration of women, but rather prohibited registration of anyone unless women were included. Thus, had the amendment passed, registration would have been prohibited unless Congress passed an amendment to the basic Selective Service law to include women in the system. *Id.* S6544 (remarks of Sen. Nunn).

It should also be noted that while the question of additional funds to allow for registration in the summer of 1980 was an Appropriations Committee matter, the question of amending the law to include women fell under the jurisdiction of the Armed Services Committee. Believing that there was some chance that the Senate Appropriations Committee would fail to report out S.J. Res. 521, providing the registration funds, the Armed Services Committee added a provision onto the 1981 Military Authorization Bill authorizing the transfer of funds from the Department of Defense to Selective Service. This stopgap provision provided an alternative method of revitalizing the Selective Service System; it was not needed after the passage of S.J. Res. 521, and was deleted by the Conferees. *See* CONFERENCE REPORT, DEPARTMENT OF DEFENSE AUTHORIZATION ACT, 1981, S. REP. No. 895, 96th Cong., 2d Sess. 100 (1980) [hereafter S. REP. No. 895].

[130] *See* 126 CONG. REC. S8795-8807, S8855-8905, S9009-9135, S9195-9238 (daily eds. June 28, 30, July 1, 2, 1980).

[131] As in the Senate, the House took up the registration issue in two different forums. The Subcommittee on Military Personnel of the House Committee on Armed Services considered H.R. 6569, the proposal to register women, in hearings held March 5, 1980, and rejected it by a vote of 8–1 on March 6. Markup Session Transcript on H.R. 6569 by the Military Personnel Subcomm. of the House Armed Services Comm. (Mar. 6, 1980) (unpublished, copy on file at offices of WAYNE LAW REVIEW) [hereinafter Markup Session]. It also considered the general issue of registration at its regular hearing on the fiscal year 1981 military authorization request. *Department of Defense Authorization for Appropriations for Fiscal Year 1981: Hearings on H.R. 6495 Before the House Comm. on Armed Services,* 96th Cong., 2d Sess. 143–55 (1980) (Hearings Before the Military Personnel Subcommittee) [hereinafter *Hearings on H.R. 6495*]. The full Armed Services Committee did not consider the question. The House Appropriations Committee reported out the resolution allowing funds for registration without including funds for registration of women. Author's Conversation with Staff Member of House Appropriations Comm., Dec. 2, 1980 (memorandum of conversation on file at offices of WAYNE LAW REVIEW). The question was raised, however, by a floor amendment in the House, and was defeated by a voice vote on April 22, 1980. *See* 126 CONG. REC. H2747 (daily ed. Apr. 22, 1980).

[132] S. REP. No. 895, *supra* note 129.

[133] *See* Memorandum on Constitutionality of an All Male draft to Stuart R. Reichart, General Counsel, United States Air Force, from Stephen Teichler at 25 (May 9, 1979) (copy on file at offices of WAYNE LAW REVIEW).

[134] Plaintiffs argued in their briefs that the legislative history developed by the House and Senate Armed Services Committees in 1979 and 1980, which attempted to articulate for the first time the reasons for exclusion of women from the registration system, should be disregarded—first, because it could not explain what Congress was thinking when it originally passed the Military Selective Service Act in 1940 and later amended it, and second because the recent legislative history was "statutory history on demand, for use in the very lawsuit." Plaintiffs' Reply Memorandum to Defendant's Memorandum Filed June 16, 1980 at 15, Goldberg v. Rostker, No. 71–1480 (E.D. Pa. July 18, 1980). The court did not mention this argument.

While it is true that some of the gender discrimination cases are crucial of post-hoc rationalization for discriminatory provisions, the focus in those cases is on litigation rationalizations, not later reasons given by Congress itself for its earlier action. Then too, it can cogently be argued that Congress was really making a legislative history not to support earlier action, but to justify its present

action rejecting legislative proposals to include women and appropriating enough funds to begin registration of men.

S. R5$. No. 826, supra note 125, at 160–61.

[136] *See, e.g.*, SENATE COMM. ON APPROPRIATIONS, MAKING ADDITIONAL FUNDS AVAILABLE BY TRANSFER FOR THE SELECTIVE SERVICE SYSTEM FOR 1980, S. REP. No. 789, 96th Cong., 2d Sess. (1980); HOUSE COMM. ON APPROPRIATIONS, MAKING ADDITIONAL FUNDS AVAILABLE BY TRANSFER FOR THE SELECTIVE SERVICE SYSTEM FOR 1980, H.R. REP. No. 885, 96th Cong., 2d Sess. (1980); S. REP. No. 826, *supra* note 12, at 154–55; *Hearings on Military Draft Registration Before the Senate Comm. on Appropriations*, 96th Cong., 2d Sess. 16 (statement for the administration by John White); *id.* 27 (statement of General Meyer, Army Chief of Staff); Markup Session, *supra* note 131.

Chairman White of the House Armed Services Committee's Subcommittee on Military Personnel expressed it clearly in his opening statement at the markup session on H.R. 6569, a bill to provide for registration of women:

The issue before us this afternoon is largely a result of the problem that exists in the capacity of the All-Volunteer Force to mobilize for an emergency. This is a problem that needs to be solved. While a major protracted conventional conflict may or may not be a likely scenario, the maintenance of a capability to defend the Nation and protect its vital interests in such a situation effectively deters the likelihood of such a conflict.

With the Selective Service System in its current posture, or even in an upgraded posture—but still dependent on contingency plans that can never be adequately tested—the Nation's ability to mobilize in an emergency and produce sufficient forces to defend itself in a timely manner is not credible.

If this Nation were required to mobilize and engage in a conventional conflict, we would be extremely short of trained personnel in combat skills. The demand for personnel in combat skills is particularly sharp in the early months of such a conflict. The requirement for the Selective Service System to be in an active posture and produce personnel immediately in an emergency is principally to provide combat replacements.

Markup Session, *supra* note 131, at 2.

At the Senate hearings, there was general agreement that the reinstitution of registration was not a mere supplement to the All-Volunteer Force, but rather a measure designed to improve our ability to mobilize in an emergency:

Senator NUNN. I think the registration issue is getting very badly bogged down and misunderstood because the perception—and I think some of it has to be shared, the burden has to be borne by the Administration—is that this is a move being made to strengthen the American military capability in the Middle East. Perhaps the Afghanistan invasion by the Soviet Union lent support to the overall mood to take steps that should have been taken relating to our scenarios in NATO and not scenarios in the Middle East.

Mr. PIRIE. I agree with your interpretation, Senator. Afghanistan was a triggering event. Registration is primarily required for a general mobilization to facilitate that capability and that relates to war with the Soviet Union, primarily in Europe.

Senate Manpower Hearings, supra note 3, at 1268–69.

Mr. Danzig, the other principal Defense Department witness, agreed, stating that: "The purpose of registration is to equip us with information so that if we had a national mobilization, we could move quickly to achieve our wartime personnel requirements with greater effectiveness." *Id.* 1670.

[137] *See Senate Manpower Hearings, supra* note 3, at 1820–21, 1823; *Hearings on S. 428 Before the Senate Comm. on Appropriations*, 96th Cong., 2d Sess. 2187–2274 (1979); *Appropriations Subcomm. Hearings, supra* note 6, at 65. The Selective Service System had been in "deep standby" since 1973, with minimal appropriations and fewer than 100 full-time employees. *See* PRESIDENTIAL RECOMMENDATIONS FOR SELECTIVE SERVICE REFORM, *supra* note 125, at 1, 23.

[145] Director of the Selective Service, Improving Capability to Mobilize Military Manpower 28 (Jan. 16, 1980) (unpublished draft working document on file at offices of WAYNE LAW REVIEW). While the post-mobilization plan called for in that report was later repudiated, the factual requirements for mobilization remain the same. Apparently, Selective Service Director Bernard Rostker also stated the all-male 60-day requirement in his deposition in *Goldberg*. *See* Brief for Defendants on the Standards for Determining Justiciability, Standing, Ripeness, Mootness, and their Applicability to Plaintiffs' Claims at 21, Goldberg v. Rostker, No. 71–1480 (E.D. Pa. July 18, 1980).

[146] An enlightening exchange on this issue, not cited by the court in its opinion, occurred before the Nunn subcommittee between administration witnesses, led by John White, Deputy Director of the Office of Management and Budget and a former Assistant Secretary of Defense for Manpower; and Senator Roger Jepsen of Iowa:

Mr. WHITE. . . . I am not certain I know . . . the precise ratio of men to women that would be necessary in the event of a crisis; but we are on record that, in the event of a draft, our needs are largely for men. In a crisis mobilization, we would need people for the combat arms.

Under the current law and policy, as I am sure you know, women are precluded from those activities, so the dominant requirement in the event of mobilization is for men.

Senator JEPSEN. Talking about registration of women, Harrison Wellford, from your office, testified before this committee that the rate of induction for women as well as men will be determined by military need. Tell me how you are going to do that.

Mr. DANZIG. The calculations we have done suggest the need for some 650,000 people to come through the training centers in the first 6 months after mobilization. We estimate that some 80,000 of those people could usefully be women, that 80,000 slots could be filled by women in that circumstance.

If we had 80,000 women volunteer during that period, we would not need to draft women and we would not. If we had less than 80,000 volunteer during that period, we would induct women if the President's proposal were adopted as law.

Senator JEPSEN. So you are advocating registration of women but, when it comes time to draft, you would not draft them? You said that you would not draft them if they volunteered?

Mr. DANZIG. If we had enough female volunteers, we would not draft women. If we had enough male volunteers, we would not draft men.

Senate Manpower Hearings, supra note 3 at 1828.

[150] House and Senate military manpower hearings for 1979 and 1980 are replete with references to this problem. Assistant Defense Secretary Pirie testified as follows:

Mr. PIRIE. In the Active Forces, for example, the Army is on the order of 19,000 men short.

Mr. WHITE. Nineteen thousand persons short, and you are talking about a registration in order to release 19,000 people. Are those 19,000 already in the service?

Mr. PIRIE. Those are gap billets that are not filled in the Active Army, Mr. Chairman.

Mr. WHITE. What types of jobs are those?

Mr. PIRIE. Where one finds the shortfall predominantly distributed is in the division forces in the United States, Mr. Chairman. They are combat jobs.

Hearings on H.R. 6495, supra note 131, at 152.

[151] S. REP. No. 826, *supra* note 125, at 154.

[156] *Senate Manpower Hearings, supra* note 3, at 1682.

[157] S. REP. No. 826, *supra* note 125, at 158.

[158] General Yerks, the Army's personnel chief, described the problem and its evolution in a colloquy with Senator Nunn:

General YERKS. Our requirements on mobilization—and I bring a mobilization plus 90 reference point because that is generally the shortfall figures that we use at an M–90 plus—we find that of the approximately 300,000—which we say is the shortfall at the present time of pretrained manpower—203,000 of that would be for the combat skills. 203,000 of the 300,000—

Senator NUNN. Approximately two-thirds would be combat skills?

General YERKS. That is correct, sir.

Senator NUNN. What would the other one-third be for?

General YERKS. All other support-related skills.

Senator NUNN. Support skills?

General YERKS. Support, communications, electronics, chemical, law enforcement, administration, food service, and the like.

Senator NUNN. Would those one-third not drafted primarily for combat skills be trained for combat in contingencies?

General YERKS. Yes.

Senator NUNN. General, have we had experiences in the past wars where those that are in support functions inadvertently are brought into combat because of shifts in lines?

General YERKS. Yes.

Senator NUNN. Is that a rare or frequent occurrence?

General YERKS. I would say that in the wars we have seen in recent years, in the Korean war, in Vietnam—the types of warfare that we have experienced since World War II—that that requirement is increasing.

Senator NUNN. What requirement?

General YERKS. The requirement to be able to defend yourself and have some basic combat skills, even in a service support area.

Senator NUNN. So compared to previous wars, you would say we would have the highest need today for people who were not primarily in combat to be trained and able to engage in combat?

General YERKS. Yes.

Senator NUNN. And what is the reason for that?

General YERKS. I think the nature of warfare, sir, where in the Vietnam conflict, for example, where there were no lines. I just feel that that type of warfare requires that everyone have the basic capability to defend themselves in a unit.

Senate Manpower Hearings, supra note 3, at 1390.

[159] Defendants' Trial Brief at 7–8, Goldberg

v. Rostker, No. 71-1480 (E.D. Pa. July 18, 1980).

[160] No. 71-1480, slip op. at 28.

[161] *Id.* 31-33.

[162] *Senate Manpower Hearings, supra* note 3, at 1529.

[163] In 1977, for example, only 17% of Army enlisted personnel and 19% of Army reserve enlisted personnel were listed as serving in clerical skills, and even these skills often require knowledge of sophisticated data processing equipment. M. BINKIN & I. KYRIAKOUPOULOS, YOUTH OR EXPERIENCE? MANNING THE MODERN MILITARY 19, 43 (1979).

An Army paper submitted to the Nunn subcommittee in March 1980 showed that the kinds of skills to be drafted for in a mobilization situation are heavily weighted toward combat and combat support, because of present critical skills shortages. A large proportion of those drafted would have to go into combat or combat support jobs. Of the significant shortfall areas, only 11% are described as administrative, supply and service, or food service jobs. It is for this reason that the Army does not propose drafting women at all for the first 60 days. *Senate Manpower Hearings, supra* note 3, at 1404-05.

[164] *See, e.g.,* SENATE COMM. ON ARMED SERVICES, AUTHORIZING APPROPRIATIONS FOR FISCAL YEAR 1979 FOR MILITARY PROCUREMENT, RESEARCH AND DEVELOPMENT, ACTIVE DUTY, SELECTED RESERVE, AND CIVILIAN PERSONNEL STRENGTHS, CIVIL DEFENSE, AND FOR OTHER PURPOSES, S. REP. No. 826, 95th Cong., 2d Sess. 119 (1978).

[165] 10 U.S.C. § 6015 (1976 & Supp. III 1979). The statute prohibits the assignment of women to duty on ships and aircraft that are engaged in combat missions but allows temporary assignment of women to some types of ships and permanent assignment to noncombat ships, *Id*

[166] 10 U.S.C. § 8549 (1976).

[167] The Army does not assign women to those specialties and units engaged in close combat—infantry. armor, cannon field artillery, combat engineer and low altitude air defense units of battalion size or smaller. PRESIDENTIAL RECOMMENDATIONS FOR SELECTIVE SERVICE REFORM; *supra* note 125, at 20-21.

Additionally, the Marine Corps does not assign women to units whose primary mission is combat, and because of rotational concerns, does not assign more than 10% women to any unit in the Fleet Marine Force. *Id.*

[168] *Senate Manpower Hearings, supra* note 3, at 1671-72. Countries that register and/or conscript women into the armed services are Algeria, Chile, Israel, North Korea, Peru, Romania, South Korea, Union of Soviet Socialist Republics, and Vietnam. *Id.*

Despite the common belief that women in Israel fully share with men the burden of combat service, it is clear that large numbers of women serving in the Israeli armed forces are moved out of combat areas when time permits. They are not intended to participate in combat operations engaging the enemy. *Id.* 1717.

[169] Senator Nunn and administration witnesses attempted at the Senate hearings to clarify the definition of "combat," but without much success. After noting that the administration had expressed its opposition to using women in "close combat," Senator Nunn continued:

Senator NUNN. . . . Is this a new catchword, this "close combat?" Have we qualified the Administration's position so that now you are opposed to women in combat, but you are opposed to women in close combat?
been in use for a while. The Administration is here simply reiterating that the involve-

Mr. DANZIG. Mr. Chairman, this not a new term, close combat. It is a phrase that has ment of women in direct combat situations, hand-to-hand combat, on ships and planes which are directly involved in combat, and so forth, is not something that we intend.

What we are seeking to do is to permit women to do a variety of kinds of things in support functions that relate to the combat area, but that are not combat in themselves.

Senator NUNN. You know the law says "combat."

Mr. DANZIG. Yes, I understand that.

[t]here are a variety of situations which I think clearly fit within the legislation which might be argued to be combat as it is commonly understood by the public at large.

Women, for example, serve in missile silos. The public might think of that as combat. We are simply trying to underscore that that word has itself some considerable ambiguity. I think you are making the same point.

Senate Manpower Hearings, supra note 3, at 1663-64.

The Fiscal Year 1978 Military Authorization Act contained a provision requiring the Secretary of Defense to study the definition of the term "combat" and report to the Congress. Pub. L. No. 95-79, § 303, 91 Stat. 327 (1977). The Department defined the term as "engaging the enemy or being engaged by an enemy in armed conflict.' " *Department of Defense Authorization for Appropriations for Fiscal Year 1979, Part 3—Manpower and Personnel: Hearings on S. 2571 Before the Senate Comm. on Armed Services,* 95th Cong., 2d Sess. 2105 (1978) (statement of John White). The Department also noted that:

"Under current practices, a person is considered to be 'in combat' when he or she is in a geographic area designated as a combat/hostile fire zone by the Secretary of Defense. Members of the armed forces, not in a designated combat/hostile fire zone, may be designated as being 'in combat' by the Secretary of Defense based on specific circumstances and events."

Id.

Thus, the definition is essentially circular. In that same document, and in legislative proposals transmitted to the Congress, the administration proposed to repeal the statutory restrictions on women in combat, leaving the policy against such assignment to administrative determination. *Id.* 2107-08.

[170] *Senate Manpower Hearings, supra* note 3, at 1664.

[183] *Senate Manpower Hearings, supra* note 3, at 1859-62. The possibility of court requiring equal induction was given additional emphasis by a Selective Service System General Counsel Memorandum that asserted that equal induction is constitutionally required. Memorandum from Henry N. Williams, Selective Service System General Counsel to the Director of the Selective Service (Dec. 4, 1979) (unpublished, copy on file at offices of WAYNE LAW REVIEW). The point was also made in an opinion letter furnished to the Nunn subcommittee by three prominent law professors. *Senate Manpower Hearings, supra* note 3, at 1859-62.

[184] *Senate Manpower Hearings, supra* note 3, at 1684, 1686.

Senator WARNER. What we are trying to do is really have our cake and eat it, too, I fear. We are trying to say that we want to treat them equally, men and women, for the purpose of induction in the draft. But then the day they enter military service, we want to practice discrimination.

And the first step of discrimination is that we would only select one out of six inductees as female. Wouldn't that be declared by a court as discriminatory?

That is a very fundamental thing, I say. Let's not open the floodgates by a congressional determination of equality at step 1 for fear that all the rest of the steps through that career will just topple like a bunch of dominoes. *Id.*

[190] No. 71-1480, slip op. at 20.

[191] *Id.* 22 n.13.

[192] *National Service Legislation: Hearings on H.R. 6569 Before the Subcomm. on Military Personnel of the House Armed Services Comm.,* 95th Cong. 2d Sess. (1980); Markup Session, *supra* note 131, at 7.

[193] Section 455(a)(1) of the present Selective Service law requires that selection of those to be inducted occur "in an impartial manner . . . from the persons who are liable for such training and service and who at the time of selection are registered and classified. . . ." 50 U.S.C. app. § 455(a)(1)(1976). At the Senate hearings, administration witnesses agreed that the law as it stands would probably require random induction from among men and women. Director of Selective Service Bernard Rostker took the position that the administration had not considered and was not proposing any special deferments for women:

Senator NUNN. Let's take a 21-year-old male and a 21-year-old female, both of whom are working and they have children. Let's take a hypothetical situation where the mother's name is pulled out of the hat in a lottery system and the father's name is not. In that situation, are you going to draft the mother and leave the father at home, as the father is going to be there to take care of the child?

Dr. ROSTKER. As the law would provide today, that in fact is what would happen.

Senator NUNN. As the law is today, I submit to you that this country will not tolerate that kind of law and that kind of draft. You can talk all you want about theoretical rights, but this administration is not dealing with reality. You are not confronting the difficult questions in peacetime; therefore, we are going to have to confront the difficult questions in wartime if we have it. And we are going to have pure, absolute bedlam in this society.

You are going to be drafting women, not putting them in combat, but putting them in the military service and perhaps leaving their husbands at home to take care of the children. Anyone who thinks this society is prepared for that kind of shock is either operating in a different environment than I am or in a dream world.

Dr. ROSTKER. I would certainly yield to you in that scenario you have just given. But you asked me in fact a broader question over the whole range of exemptions, deferments, and postponements. And that situation . . .

Senator NUNN. Who is thinking about that? Have you thought through that? Has the President thought through that? Is this part of the family policy we have got?

Dr. ROSTKER. We have had discussions. It is not part of the legislative proposal.

Senate Manpower Hearings: supra note 3, at 1691-92. *See also* S. REP. No. 826, *supra* note 125, at 159.

[194] *Senate Manpower Hearings, supra* note 3, at 1843–44. After noting that the President might have picked up support for his registration proposal by stating that he was studying the classification system and would later propose changes, rather than resting on the controversial current classification system, Senator Nunn made much the same point about coupling the registration issue with the role of women in the Selective Service System:

[I]f the President had done the same on the women issue, we might have had the appropriations bill passed. If he had said, "My instincts are that we should register women, but I am going to study this issue as clearly separate from the male issue and we will go ahead with males at this stage and study the female issue."

But, the common impression is that nobody studied the male-female issue in any detail at all. . . . In the hearing we had the other day, it was apparent there were numerous questions that had not been studied.

What you have here is a good step in the right direction which I applaud, but it has been coupled with a procedure that is causing an erosion of support even among people who a year ago would have been willing to mandate registration because of the military need for it.

Senate Manpower Hearings, supra note 3, at 1843–44.

[195] No. 71–1480, slip op. at 38 n.30, *quoting* Congressman Montgomery.

[196] Senator Warner questioned Office of Management and Budget's John White, a chief administration spokesman on the issue, as follows:

Senator WARNER . . . As this bill has progressed or not progressed on the Hill, has there been any change of heart within the administration as to how hard you want to push to continue to have women in the draft?

Mr. WHITE. No; we continue to believe that it is appropriate to register women. At the same time, we are asking that the registration of men get underway quickly. Therefore, while the Congress is deliberating the issue of whether to register women, we would urge the Congress to provide funds for the registration of men immediately. . . .

Senate Manpower Hearings, supra note 3, at 1832.

[197] The court indicated that it had "combed the record and the legislative history for purported justifications for the total exclusion of women from the MSSA, and [found] each proffered justification unconvincing." No. 71–1480, slip op. at 23. Much of the court's opinion consists of quotations from two civilian witnesses in congressional hearings—Richard Danzig, a former law professor with no previous experience in military manpower matters, and Robert Pirie, Assistant Secretary of Defense for Manpower. These were the men, of course, who were assigned the responsibility within the administration for defending the President's position and the court chooses to accept and rely on their opinions while giving no weight at all to Congress' evaluation of the evidence. At the 1979 Hearings in both the House and the Senate, civilian witnesses, including Messrs. Danzig and Pirie, steadfastly opposed registration as unnecessary and counterproductive because that was then the position of the administration.

EXTENSION OF ROUTINE MORNING BUSINESS

Mr. STEVENS. Mr. President, I ask unanimous consent that routine morning business be extended until 10:20 and that the Senate proceed to the consideration of the treaty at that time.

The PRESIDING OFFICER. Without objection, it is so ordered.

BLOCK GRANTS

Mr. SYMMS. Mr. President, I have recently spoken about two essential elements of the Reagan resolution. Those are, of course, marginal rate reductions in the personal income tax rates, and the enactment of the block grants. I believe these are two pillars of Ronald Reagan which are essential, and without them there is really not a Reagan program.

The President is now engaged in negotiations with the other body on the tax cuts, and since that is where tax legislation originates under the Constitution, it is proper that he is doing that.

But we are empowered to deal with the block grants in this body, and, frankly, Mr. President, I am not happy about what I am hearing about the so-called compromises that have been struck in the past few days about the block grants.

Many of us who are new in this body campaigned on the principle that States and local governments were competent to do their own work if Washington would just get out of the way, and the block grant system that Ronald Reagan campaigned on offers us a way to fulfill that

promise. But they must be real block grants, not the same tired categorical programs in a new disguise.

Having a block grant for every categorical program, for instance, as it appears to be happening now is a mockery of the block grant idea. I understand there is a single block grant for the Community Services Administration. If there ever was a program that ought to be folded into a block and left to local government to administer, Mr. President, Community Services is one. I am sure the distinguished Presiding Officer agrees with me on that. It makes no sense at all to consider a separate Community Services block grant.

There are also rumors that the block grant bills being worked out in committee will require the States and cities to file detailed action plans with the Federal Government. If they have to file detailed action plans, Mr. President, that is not a block grant. That is the same tired, uniform, inflexible program we have all campaigned against.

I do not think we were sent here to reenact the same tired old programs that have not worked in the past and have cost the taxpayers billions upon billions of dollars to very little effect in the delivery of the services.

There are similar rumors about requirements that States and local governments maintain their current level of effort. I understand that no one wants the levels of service cut drastically, but that is not going to happen anyway. The States are very different than they were years ago when these programs were first introduced.

Their own social service agencies are in place, they are ready to pick up the slack, they can manage these programs more flexibly, more cheaply, and more responsibly than Washington can, and I think we should not tie their hands in efforts to provide cost-effective service. That is not a block grant.

Mr. President, I understand that it is a messy way to write legislation to write it on the floor of the Senate. I personally would prefer to have the committees do it. But, at the same time, I believe if bills come out of the committees that are unacceptable to the membership of the Senate we should make every effort to rewrite them on the floor. There is no way that many of us are going to be able to acquiesce in a total sellout of the President's program.

I have heard some of my colleagues saying in the cloakrooms and around the Congress in different meetings that these programs are being worked out and compromises are being worked out with the President's people; that the President favors this kind of a categorical program.

Well, Mr. President, I for one do not believe it. I know Ronald Reagan fairly well. I campaigned for him through the 1976 campaign and again this last year, and I have been with him, and I do not believe he has changed his mind.

I have watched him campaign, and he has not told me and he has not told the American people yet that he has changed his mind about block grants. Until he does tell the American people that, I have to believe he is holding firm. If some of his aides are not holding so firm, that is their problem. It may be his problem, too, but I am not going to get into that.

The point is, Mr. President, if unacceptable bills are written, the President is going to need to veto them, and we all know that, and we all know that Ronald Reagan is a President who understands the power of the veto, and he understands that there are enough of us here in the Senate to vote to sustain a veto of the so-called block grants.

I think first and foremost he is a President who understands who elected him and what he was sent here to do. He was not sent here to act as a caretaker President between Democratic Presidents. He was sent here to turn this country around and to institute a system of real block grants as part of that effort; in other words, to make a systematic change in what people expect out of the Federal Government and all the regulations and rules that go with it.

I suggest, Mr. President, that we were sent here for the same purpose and we have to be willing to stand up and to be counted, and if that means writing bills on the floor, then let us do it.

But if it means voting to sustain vetoes, then let us do it, and I am ready to do this, and I know my colleagues, many of them, enough of them, are ready to do it also, and I would encourage the proper committees to see that we do not compromise this very essential pillar of the Reagan program.

I yield back the remainder of my time, Mr. President.

CONCLUSION OF MORNING BUSINESS

The PRESIDING OFFICER. Is there further morning business? If not, morning business is closed.

EXECUTIVE SESSION

1980 PROTOCOL AMENDING THE INTERIM CONVENTION ON CONSERVATION OF NORTH PACIFIC FUR SEALS

The PRESIDING OFFICER. Under the previous order, the Senate will now go into executive session for the purpose of calling up the 1980 protocol amending the Interim Convention on Conservation of North Pacific Fur Seals, Executive S. 96–2.

The Senate, as in committee of the whole, proceeded to consider Executive S, 96th Congress, second session, the 1980 protocol amending the Interim Convention on Conservation of North Pacific Fur Seals, which was read the second time, as follows:

1980 PROTOCOL AMENDING THE INTERIM CONVENTION ON CONSERVATION OF NORTH PACIFIC FUR SEALS

The Governments of Canada, Japan, the Union of Soviet Socialist Republics and the United States of America, Parties to the Interim Convention on Conservation of North Pacific Fur Seals, signed at Washington on February 9, 1957, as amended, hereinafter referred to as the Convention,

Desiring to amend the Convention,

Have agreed as follows:

ARTICLE I

The Convention shall be applied as amended by this Protocol as from the date of its entry into force.

ARTICLE II

In Article V, paragraph 2(e) of the Convention, "twenty-first" shall be replaced by "twenty-fifth".

ARTICLE III

In Article VI, paragraph 1 of the Convention, "except within the territorial waters of another State" shall be replaced by "except within the areas in which another State exercises fisheries jurisdiction".

ARTICLE IV

In Article XI of the Convention, "twenty-second" shall be replaced by "twenty-sixth".

ARTICLE V

In Article XIII, paragraph 4 of the Convention, "twenty-two" shall be replaced by "twenty-six".

ARTICLE VI

1. This Protocol shall be subject to ratification or acceptance. Instruments of ratification or acceptance shall be deposited with the Government of the United States of America as soon as possible.

2. A signatory Government which intends to ratify or accept this Protocol, may notify the Government of the United States of America that it will apply this Protocol provisionally in accordance with its laws and regulations pending fulfillment of domestic constitutional requirements for ratification or acceptance.

3. The Government of the United States of America shall notify the other signatory Governments of ratifications or acceptances deposited and of notifications of provisional application made.

4. This Protocol shall enter into force provisionally on the date on which instruments of ratification or acceptance have been deposited or the notifications of provisional application as referred to in paragraph 2 above have been made by all the signatory Governments. It shall continue in force provisionally until the date on which it enters into force definitively in accordance with the provisions of paragraph 5.

5. This Protocol shall enter into force definitively on the date on which instruments of ratification or acceptance have been deposited by all the signatory Governments.

6. The original of this Protocol shall be deposited with the Government of the United States of America, which shall communicate certified copies thereof to each of the Governments signatory to this Protocol.

IN WITNESS WHEREOF the undersigned, being duly authorized by their respective Governments, have signed this Protocol.

Done at Washington, this fourteenth day of October, nineteen hundred and eighty, in the English, French, Japanese, and Russian languages, each text equally authentic.

The PRESIDING OFFICER. Without objection, the protocol will be considered to have passed through its various parliamentary stages up to and including the presentation of the resolution of ratification, which the clerk will state.

The legislative clerk read as follows:

Resolved two-thirds of the Senators present concurring therein), That the Senate advise and consent to the ratification of the Protocol Amending the Interim Convention on Conservation of North Pacific Fur Seals, between the United States, Canada, Japan, and the Soviet Union, signed at Washington on October 14, 1980. (Executive S, 96th Congress, second session)

The PRESIDING OFFICER. Who yields time?

Mr. STEVENS. Mr. President, I suggest the absence of a quorum.

The PRESIDING OFFICER. Does the Senator from Alaska suggest the absence of a quorum?

Mr. STEVENS. I do.

The PRESIDING OFFICER. On whose time?

Mr. STEVENS. Equally divided.

The PRESIDING OFFICER. Without objection, it is so ordered. The clerk will call the roll.

The bill clerk proceeded to call the roll.

RECESS UNTIL 11 A.M.

Mr. STEVENS. Mr. President, I ask unanimous consent that the Senate stand in recess until 11 a.m. today.

There being no objection, the Senate, at 10:34 a.m., recessed until 11 a.m.; whereupon, the Senate reassembled when called to order by the Presiding Officer (Mr. ARMSTRONG).

Mr. PERCY. Mr. President, today the Senate will consider the protocol amending the Interim Convention on the Conservation of North Pacific Fur Seals. The Interim Convention was signed in 1957 by the United States, Japan, Canada, and the Soviet Union. It replaced an earlier treaty dating back to 1911. The 1980 protocol would extend the Interim Convention by an additional 4 years.

The dual purpose of the protocol, as of the Interim Convention, is to continue the prohibition now being observed by the four governments party to the convention with respect to pelagic or high seas sealing, and to provide a joint research program designed to furnish, as appropriate, sufficient factual data to conserve the fur seal herds of the North Pacific Ocean at a level of maximum sustainable productivity.

The series of North Pacific fur seal treaties are heralded as the first conservation agreements entered into by the United States. There is widespread agreement that these treaties were responsible for saving the North Pacific seal from near extinction.

In 1910, the Pribilof herds numbered only 200,000 animals. Since the original treaty came into force in 1912, the fur seal population has increased to at least 1.7 million. The major reason for this increase was the agreement among the present nations of Canada, Japan, the Union of Soviet Socialist Republics, and the United States to stop harvesting the seals at sea, and to limit land harvest to levels consistent with wildlife management principles.

Pelagic sealing was a wasteful practice in that it had a high struck and lost ratio. Many more seals were lost from the population than were actually retrieved in the harvest at sea. Pelagic sealing also took an inordinately high percentage of female seals, thus further reducing the breeding potential of this population.

The Interim Convention provides for land harvests on the breeding islands of the northern fur seal by the United States and the Union of Soviet Socialist Republics, Canada, and Japan. Each receive 15 percent of the sealskins taken in both harvests. The United States and the Union of Soviet Socialist Republics each retain 70 percent of their respective harvest.

As we all know, there has been a great deal of public outcry concerning the government's Pribilof program. Despite the protection that the Interim Convention provides the seal herds, many people believe that the U.S. Government should not be in the business of killing marine mammals.

During the consideration of the Protocol, a reservation was offered by Senator DODD which would have directed the administration to reduce the fur seal harvest by 70 percent. This reservation was rejected by a vote of 6 to 9 on the grounds that:

The seal herds are not endangered;

The reservation would have an uncertain biological effect on the seal herds; and

The reservation would have an adverse effect on the Aleut communities in Alaska.

It is my understanding that Senator LEVIN was prepared to offer a similar reservation today—a reservation which would have been strongly opposed by Senators STEVENS and MURKOWSKI of Alaska, along with the majority of the Foreign Relations Committee.

Therefore, I wish to complement Senators LEVIN, STEVENS, and MURKOWSKI for their spirit of reasonableness and accommodation in reaching a compromise agreement. The compromise understanding will lay the groundwork for eventual adjustments in the commercial harvest of North Pacific fur seals based on sound scientific judgment.

It will also provide a foundation for the eventual development of alternative sources of employment for the residents of the Pribilof Islands.

I appreciate the efforts that were made in reaching this compromise and urge the Senate to grant its advice and consent to the ratification of the protocol, subject to the understanding proposed by Senators STEVENS, MURKOWSKI, and LEVIN.

Mr. LEVIN. Mr. President, I suggest the absence of a quorum.

The PRESIDING OFFICER. The clerk will call the roll.

The legislative clerk proceeded to call the roll.

Mr. LEVIN. Mr. President, I ask unanimous consent that the order for the quorum call be rescinded.

The PRESIDING OFFICER. Without objection, it is so ordered.

UP AMENDMENT NO. 150

Mr. LEVIN. Mr. President, I ask that the clerk read an amendment at the desk and I ask for its immediate consideration.

The PRESIDING OFFICER. The clerk will report.

The legislative clerk read as follows:

The Senator from Michigan (Mr. LEVIN) proposes an unprinted amendment numbered 150 to the text of the resolution of ratification:

That the Senate advise and consent to the ratification of the Protocol Amending the Interim Convention on Conservation of North Pacific Fur Seals, Between the United States, Canada, Japan, and the Soviet Union, signed at Washington, on October 14, 1980 (Executive S, 96th Congress, 2nd Session), subject to the following—UNDERSTANDING:

It is the understanding of the Senate that appropriate studies shall be undertaken to (1) determine the fur seal feeding habits and food requirements and the at-sea migration and distribution patterns of various age/sex classes of fur seals; (2) determine the impact of any possible adjustments in the size of the harvest on the Pribilof Island residents, the fur seal herd, and the Bering Sea ecosystem; (3) in consultation with the Aleuts, determine the impact of various mutually acceptable alternative sources of employment for Pribilof Island residents on those residents, the fur seal herd, and the Bering Sea ecosystem and possible means of promoting said sources of employment. The results of these studies shall be reported to the Congress by the Administration for referral to the appropriate committees no later than March 1, 1984.

Any alterations in the level of the annual commercial harvest of North Pacific fur seals should be consistent with the development of a stable, diversified and enduring economy for the Aleut residents of the Pribilof Islands. Accordingly, the Senate declares its interest in exploring the appropriateness of, among other possibilities, increasing Aleut control over operation of the harvest consistent with the terms of the Interim Convention.

Furthermore, the Senate declares that: (1) the Secretary of State should continue to strive to conform the Interim Convention with the purposes and policies of the Marine Mammal Protection Act of 1972, as amended, and; (2) the United States may initiate adjustments in the harvest level or the U.S. share thereof providing any adjustments are in conformity with the terms of the Interim Convention, the health of the fur seal herd, and the rights of the Aleut people.

The PRESIDING OFFICER. Under the previous order of the Senate, the Senator from Michigan had been granted permission to offer two reservations. This is in the form of an understanding and would require unanimous consent.

Mr. STEVENS. Mr. President, I ask unanimous consent that it be in order for the Senate to consider such understanding.

The PRESIDING OFFICER. Is there objection to the request? The Chair hears none, and it is so ordered.

Mr. STEVENS. I make such request.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. STEVENS addressed the Chair.

The PRESIDING OFFICER. The Senator from Alaska.

Mr. STEVENS. Mr. President, I am grateful to the Senator from Michigan for the time he and his staff have spent working with me and Senator MURKOWSKI and our staffs to reach an accord on an understanding concerning the ratification of this convention.

The Interim Convention on Conservation of North Pacific Fur Seals has protected the fur seal herd in the North Pacific for the past 24 years. It replaced an earlier convention which dates back to 1911. Under these two conventions, the North Pacific fur seal herd has grown in population over five-fold.

Without this treaty, two of the four member nations of this convention have vowed to return to their pelagic sealing practices of the past.

Rather than a well managed harvest

insuring population maintenance growth, this would lead to uncontrolled sealing on the high seas. Mr. President, such action would wreak a devastating impact on the fur seal population, and bring irreparable harm to the Aleut people in the Pribilofs.

One of the most interesting studies I did in my legal career was to go back and trace the history of pelagic sealing in the case taken to the World Court concerning the actions of the United States and its effort to halt pelagic sealing.

Mr. President, this protocol will allow continuation of a widely recognized successful conservation and management program in the Pribilofs. In addition, this harvest effort provides the major source of livelihood to the Aleut people.

This treaty enforces a controlled and humane harvest that is restricted to the taking of bachelor male seals ensuring a growing and healthy breeding stock.

Mr. President, I would like to clear up a point of misunderstanding about this harvest that bears consideration. Comments have been made to me in the past several weeks about the "inhumane harp seal killing in Alaska." Such statements, although completely ignorant to the facts of this harvest, can be harmful. The Senator should take notice that the harp seal harvest in Canada is a totally different matter from that before us today. The seal harvest in the Pribilofs is closely monitored and controlled by the Federal Government. The fivefold increase in the fur seal population attests to the great success of this management effort.

Mr. President, I intend to support the understanding that Senator LEVIN has introduced. I am happy to yield to my colleague from Alaska at this point.

Mr. MURKOWSKI. Mr. President, I appreciate my colleague, the senior Senator from Alaska, yielding me this time.

I would also like to commend the Senator from Michigan for working so diligently in resolving what has amounted to an amendment to the text of the resolution for ratification.

Mr. President, today the Senate is considering the resolution for ratification of the Interim Convention on Conservation of the North Pacific Fur Seal. I think it is interesting to note that the National Audubon Society considers—and I quote:

> The response of the northern fur seal population to the protection on the high seas, and the controlled harvest in the Pribilof Islands, required by the provisions of the 1911 convention between and among the United States, Canada, Japan, and the Soviet Union, to be one of the outstanding wildlife conversation success stories of the last seven decades.

I have also, as have the rest of my colleagues, received confirmation of the Sierra Club's support of the continuation of the convention as negotiated. I will also add to the RECORD a letter from Secretary of State, Alexander Haig, supporting the convention as negotiated.

Mr. President, I would like to commend the chairman of the Foreign Relations Committee, Senator PERCY, and the committee members for dealing with this measure in a timely manner. Mr. President, the Foreign Relations Committee approved the continuation of the convention unamended, with a unanimous vote of 15 to 0. The committee's decision, made after hearing testimony from every concerned party interested in this convention bolsters the credibility and value of the convention.

As my colleague, Senator STEVENS, pointed out, when the convention went into effect in 1911, the North Pacific fur seal herd numbered approximately 300,000. At that point, Mr. President, extinction seemed imminent. Today, with the help of the convention and controlled harvest, the herds are approaching 2 million seals. The present count is approximately 1.7 million, to be exact. This type of biological rebound rarely occurs in our society today. Clearly, the convention which is responsible for this rebound should be continued.

Mr. President, there has been some confusion on the Pribilof Island fur seal harvest and I would again like to echo the comments of my colleague, the senior Senator from Alaska. The harvest taking place in my home State does not involve any taking of females or baby seals. This type of harvesting is strictly forbidden. The only seals that are taken are the excess bachelor male seals that are not able to be involved in the reproductive process of the rookery. The harp seal harvest in Canada has no relation whatsoever to the fur seal herd in the Pribilof Islands.

Mr. President, I support the further study of the Bering Sea ecosystem to more fully understand the effect of the North Pacific fur seals. The studies currently being carried out by our Government should continue and be extended as necessary. Without these crucial studies we will not be able to ascertain the healthy level of the fur seal herd.

Mr. President, in summary—I urge the Senate to ratify this treaty as a wise and effective means of managing the fur seal herd. It has the unanimous support of the Foreign Relations Committee. If we were not to continue this sound wildlife management vehicle, we will surely be endangering the North Pacific fur seal herd as well as adversely affecting the socioeconomic status of the Pribilof Island people.

Mr. President, I ask unanimous consent that several supporting documents be printed in the RECORD.

There being no objection, the material was ordered to be printed in the RECORD, as follows:

U.S. SENATE,
Washington, D.C.

DEAR COLLEAGUE: Several weeks ago, the Foreign Relations Committee approved an extension of the Interim Convention on the Conservation of North Pacific Fur Seals by a 15–0 vote, after turning back a proposed reservation directing the United States to renegotiate the Convention. The purpose of renegotiation would have been the reduction in the harvest of fur seals by the United States and would amount to a "rejection of the protocol we have proposed for ratification", according to the State Department.

Ratification of the Convention by the Senate is of great importance to Alaska and to the effective management of the fur seal herd, and we urge you to reject any effort on the floor to require renegotiation.

The North Pacific Fur Seal harvest has been identified as one of the most successful conservation and wildlife management programs in the world. In 1912, before the Convention was in place, the herd numbered about 300,000 but today it is about 1.7 million animals. The annual U.S. harvest takes place only on the Pribilof Islands, by the Pribilof people, who have been carrying out this harvest for years. No pups or females are taken, only bachelor male seals. This harvest should not be confused with the Canadian harp seal harvest that has engendered much emotional publicity.

In the absence of a treaty the fur seal herd would be greatly endangered. The treaty prohibits pelagic sealing, which is the taking of seals at sea. This type of harvesting is harmful because it is unregulated and results in many wasteful killings since many seals killed in this manner are unretrievable.

Both the Sierra Club and the National Audubon Society have supported this treaty. And the Administration remains committed to it. We have included copies of letters setting forth this support for your information.

We would be happy to respond to any questions you may have about the fur seal convention and hope that you agree that it is appropriate to ratify it for another four years.

Sincerely,

FRANK H. MURKOWSKI,
TED STEVENS,
U.S. Senators.

NATIONAL AUDUBON SOCIETY,
Washington, D.C., March 15, 1981.

Hon. CHARLES H. PERCY,
Chairman Committee on Foreign Relations, U.S. Senate, Washington, D.C.

DEAR MR. CHAIRMAN: The National Audubon Society wishes to comment on proposed renegotiation of the 1911 international convention to conserve northern fur seals on the Pribilof Islands, Alaska. We strongly support renegotiation of said convention and commend you and your committee for addressing this important issue in international wildlife conservation.

I can summarize our principal points as follows:

(a) National Audubon considers the respone of the northern fur seal population to the protection on the high seas, and the controlled harvest in the Pribilof Islands, required by the provisions of the 1911 Convention between and among the United States, Canada, Japan and the Soviet Union, to be one of the outstanding wildlife conservation success stories of the last seven decades;

(b) We oppose the resumption of pelagic sealing that could occur if the present convention is not renegotiated and, therefore, strongly oppose termination of the convention;

(c) We have a deep concern that renegotiation of the international convention should assure that the interests both of the northern fur seal and of the Native peoples on the Pribilofs, who obtain part of their livelihood through participation in the carefully controlled harvest of surplus 3-to-6-year-old bachelor males, are fully protected; and

(d) We support intensified research to learn more of fur seal population dynamics and behavior and to better assure that the most humane means of harvesting the bachelor males is being applied.

Mr. Chairman, surely it is incontrovertible that the northern fur seal population had sunk to dangerously low levels by the turn of the century, that it was still declining when the Convention was signed, that the Convention was intended to bring an end to pelagic sealing, that it did so, and that the fur seal population has rebounded as a result.

The present harvest is well designed to

take only surplus males. If pelagic sealing were to be resumed, there is no way to limit the harvest at sea to only bachelor males, no practical way to limit the total take. Thus we would be returning to indiscriminate harvesting, including the taking of pregnant females and pups (juveniles of the year). If pelagic sealing were to be resumed, we would also have great difficulty administering any kind of controlled harvest, since pelagic sealing goes on simultaneously, well out at sea, and we could not ensure that the number taken in any one year was not in excess of the population surplus. The seals' migrations take them far beyond the 200-mile zone.

In addition to the need for treaty protection of the seal population, there is a most serious need to provide greater long term protection to the marine environment of the Bering Sea and to the nationally and internationally significant marine bird colonies on the Pribilof Islands. A first step has been the inclusion of critical portions of the Pribilofs in the Alaska Maritime National Wildlife Refuge created by the Alaska National Interest Lands Conservation Act of 1980.

We urge your Committee to explore ways in which existing international agreements can be strengthened, and new agreements forged with Pacific rim countries, to better protect marine waters of the Bering Sea from dangerous pollution and overutilization of resources, particularly fish on which marine birds and mammals rely for sustenance. These are by far the more serious threats to the future welfare of fur seals, as well as of other marine mammals and of seabirds.

I'd appreciate your including this letter in the hearing record on the fur seal treaty. This is a very important conservation issue, and we shall welcome further opportunity to help see it resolved in the best interests of all concerned nations, the proud people of the Pribilof Islands, and the fur seals.

Sincerely,

ELVIS J. STAHR,
Senior Counselor.

SIERRA CLUB,
Washington, D.C., May 12, 1981.

MEMBERS,
Senate Foreign Relations Committee,
Washington, D.C.

DEAR MEMBERS: The Sierra Club endorses a four year continuation of the International Fur Seal Treaty, as negotiated, and would appreciate your support on this matter.

Sincerely,

JOHN A. MCCOMB,
Director of Operations.

RESOLUTION NO. 2

The Sierra Club Alaska Chapter Conservation Committee requests the Alaska Chapter to adopt the following:

Whereas, under the Interim Convention on Conservation of North Pacific Fur Seals, the Pribilof Islands' fur seal harvest has been well-managed for many years, and

Whereas, the Native subsistence use of the fur seals under this management has been successful both for the Native population and for the continued viability of the fur seal population, and

Whereas, abolition or non-renewal of the Convention would allow resumption of the pelagic harvest of the fur seals, which was a major cause of the fur seals' population decline prior to the Convention, thereby endangering both the species' survival and the Native subsistence culture.

Be it resolved that the Alaska Chapter of the Sierra Club supports the renewal of the Interim Convention on Conservation of North Pacific Fur Seals and supports the humane harvesting of the seals by the Pribilof Islanders as guided by the Convention.

Note to Sierra Club Board of Directors:

This resolution was adopted by the Alaska Chapter Conservation Committee on November 18, 1979, Lin Sonnenberg, Chair, at Fairbanks, Alaska.

The resolution was endorsed by the Alaska Chapter at Anchorage, Alaska, on January 14, 1980, to be forwarded to the National Wildlife Committee and Board of Directors.

JAMES K. BARNETT,
Alaska Chapter Chairman.

THE SECRETARY OF STATE,
Washington, D.C., May 11, 1981.

HON. CHARLES H. PERCY,
Chairman, Committee on Foreign Relations, U.S. Senate.

DEAR MR. CHAIRMAN: The Protocol amending the Interim Convention on Conservation on North Pacific Fur Seals, was signed by the United States on October 14, 1980 and will come before the Senate Foreign Relations Committee for approval on May 12, 1981.

The Protocol extends the Convention for four years. The Convention has been in force since 1957, replacing a 1911 agreement, and provides for the protection and management of North Pacific Fur Seal stocks. We believe these agreements have served both our conservation and economic objectives. Under these agreements, the seal population has grown from 300,000 animals around the turn of the century to about 1.7 million at the present time. Further, the Convention prohibits killing seals at sea, a major cause of the earlier depletion. Lastly, the Aleut people on the Pribilof Islands have continued hunting seals under these agreements as they have done since the 1700's; sealing is part of their tradition and provides a subsistence harvest and a major source of their income. Furthermore, I understand the harvesting is conducted as humanely as possible.

A reservation has been proposed which directs the administration to renegotiate the Convention to allow the United States to reduce its harvest by approximately 70 percent. This reduction would purportedly allow the United States to continue its international obligations to Japan and Canada while foregoing its own harvest. It is our view that such an amendment is contrary to the intent of the Convention and runs counter to the will of other party members, which expect the U.S. to harvest a level of seals agreed upon under the terms of the Convention. The reservation is without scientific justification, and Department of Commerce scientists fear such precipitous action could have unforeseen effects on the fur seal stocks. Also such a proposal does not address the issue of the native subsistence harvest, nor the effects such a reduction would have on their lives.

I want to affirm the support of the Administration for the Protocol as negotiated and signed by the United States in October of last year, and my personal commitment to its objectives.

Sincerely,

ALEXANDER M. HAIG, JR.

UNANIMOUS-CONSENT AGREEMENT

Mr. BAKER. Mr. President, I understand that shortly debate on this treaty will conclude and almost certainly before the time allocated under the order has been utilized. I believe the unanimous consent request I am about to put has been cleared by the distinguished assistant leader, by all Members on this side, including the junior Senator from Alaska, and by the minority leader and Members on his side, as well, including the Senator from Michigan.

Mr. President, I ask unanimous consent that the vote on the treaty occur at 12:30 p.m. today. I further ask unanimous consent, Mr. President, and I understand this has been cleared, as well—that immediately after the vote on the treaty a vote occur on the confirmation of Myer Rashish, of the District of Columbia, to be Under Secretary of State for Economic Affairs, without an intervening period, and that that rollcall vote be a 10-minute vote.

Mr. ROBERT C. BYRD. Mr. President, reserving the right to object, and I do not think I will object, as I understand the circumstances, they are as follows:

A vote, without such an agreement, would probably occur shortly. I have a Member who would like to have the vote at 1:30 p.m. today. I have a Member or Members who would not make the vote if it were delayed beyond 12:30. So, being between a rock and a hard place as I have explained it, I think it is best for us to accede to the request.

Otherwise, the vote would occur now and my Member who would otherwise lose a vote by not being able to be here by 12:30 and would not be here until 1:30 would lose in any event.

Having made that statement for the record, Mr. President, I have no objection.

The PRESIDING OFFICER. Is there objection to the request of the majority leader? Hearing none, it is so ordered.

Mr. BAKER. Mr. President, I thank all Senators. I especially thank the minority leader. I would point out to him that it is my understanding that the Senators from Alaska and the Senator from Michigan and others have worked so well together in compromise that, indeed, the unanimous-consent agreement which was entered into earlier, which would provide for approximately 8 hours of debate, has now resolved itself to the place where we will vote momentarily were it not for this agreement.

The minority leader is absolutely correct. I believe the 12:30 agreement is the best accommodation on both sides.

Mr. STEVENS. If the majority leader will yield, I want to be sure that we are consistent with the understanding we have had with our friend from Michigan. His understanding is in the nature of an amendment to the resolution of ratification. I might inquire if the Senator from Michigan wants a vote on the adoption of that by rollcall.

Mr. LEVIN. That will not be necessary.

Mr. STEVENS. So we can adopt that by voice vote and then vote on the treaty. I thank the Senator.

I am mindful of what he told me about the old bulls from Alaska. We have been involved in a reproductive process here today. I am pleased to continue to be involved in that personally.

Mr. BAKER. I know that is a matter of great interest to the distinguished Senator from Alaska, speaking of old bulls, because I understand he is an expectant father.

Mr. STEVENS. That is right.

Mr. LEVIN. Mr. President, first of all I want to thank my colleagues from Alaska, Senators STEVENS and MURKOWSKI, for their cooperation and hard work in

trying to achieve a conclusion to this very, very difficult issue and very emotional issue.

I also want to pay a special tribute to Senator DODD. When the convention came before the Foreign Relations Committee earlier this year, he put forth a tremendous effort and offered a reservation to the convention that was aimed at stopping a major portion of the annual slaughter of the North Pacific fur seals. The American people were extraordinarily well served by his efforts and I am personally indebted to him.

I think my friends know how I feel about this issue. I feel strongly that each year the taxpayers are spending over $3 million to subsidize and operate a slaughter of 25,000 North Pacific fur seals, which no longer serves a legitimate purpose. The question, of course, that I, and those who take a similar position, face is how we can look at alternatives to this procedure.

Mr. President, the critical parts of this amendment to me, in terms of achieving the goal that I seek are really twofold.

First is the provision in the understanding that states that we will look at other means of promoting other mutually acceptable sources of employment for the Aleuts.

This is critical because unless the Aleuts have other employment, the pressure to take seals is going to continue. Indeed, even if there is other employment, the taking of seals may continue, but there is going to be less pressure to do so.

That is why the search for other means of employment, including the fishing alternative and the alternative involving tourism of a bird rookery which exists on those islands, are important alternatives. That is why other efforts are being made in this Congress, indeed today on the House side, to provide commitments to the Aleuts which will help develop those alternatives.

Both of those alternatives are absolutely essential if we are going to take pressure off the slaughter of the seals. That is why that provision in the first paragraph of the understanding, that in consultation with the Aleuts we are going to determine the impact of various mutually acceptable alternative sources of employment for those residents, is such an important provision, and why the language that we added, that we are also going to seek out possible means of promoting said sources of employment, is also important language.

There is other language in here which I want to highlight briefly, and then the rest of the understanding, of course, will speak for itself, as indeed these provisions will.

The other significant language, as far as our goals are concerned, is the declaration by the Senate that the United States may initiate adjustments in the harvest level or the U.S. share thereof, providing any adjustments are in conformity with the terms of the interim convention, the health of the fur seal herd, and the rights of the Aleut people.

We believe that in this regard the statement of the Department of Commerce in their final position paper and discussion topics for the 1981 annual meeting of the North Pacific Fur Seal Commission, is important. That statement is that in their view the United States may forego annually all or a part of its share of the harvest.

That continues to be the position of the Department of Commerce. It is a position which, although not shared by the Secretary of State or the Department of State, is critical to our position that this amendment will allow the goal to be achieved which we seek to achieve, which is less pressure on the herds and the slaughter thereof.

Mr. President, a number of organizations have worked extremely hard to try to reduce and preferably eliminate the slaughter of these seals and the U.S. taxpayer subsidies for the slaughter of seals in Alaska. I want to mention some of those organizations. I cannot tell you that they are going to be satisfied with this understanding.

I know that a number of them have great questions about it and probably will not be satisfied with it, while perhaps others will be satisfied. I want to mention for the Record the organization that have worked so hard to bring public pressure to bear on this issue: American Cetacean Society, American Littoral Society, American Society for the Prevention of Cruelty to Animals, the Center for Action on Endangered Species, Committee for the Preservation of the Tule Ele, Connecticut Cetacean Society, Defenders of Wildlife. Friends of the Sea Otter, Friends of Wildlife, Fund for Animals, Greenpeace Foundation, Center for Environmental Education, Institute for Delphinid Research, International Dolphin Watch/USA, Let Live, Animal Protection Institute of America, and People for the Ethical Treatment of Animals.

One of the great leaders in this effort, of course, is the Humane Society of the United States.

Mr. President, I began my study of this issue with the goal of producing legislation which would require us to end the Government subsidized slaughter of the North Pacific Fur Seal. That is not what this understanding provides. But what it does provide for is very significant. It allows the United States to reduce that slaughter by as much as 70 percent provided that such a reduction is consistent with the terms of the convention, the health of the Fur Seals and the rights of the Aleut people of the Pribilof Islands.

I believe that such a reduction can and should take place. To understand why I have reached that conclusion, it is necessary to look at the history of this convention.

Year ago, when the Alaskan lands were under the control of Russia, the sealing industry constituted a thriving economic resource. Seal skins were in great demand. Throughout the world, nations actively competed for the right to kill seals off the Phibilof Islands in Alaska.

In fact, it was to a significant degree the attractiveness of the sealing industry which motivated the decision of the United States to seek to buy Alaska.

Once that land became one of our possessions, however, we discovered that the sealing industry was in danger. Other nations, in their search for seal skins had adopted, as a primary mode of hunting and killing seals, a practice called pelagic sealing. Pelagic sealing, the killing of seals in the open sea, threatened the very existence of the North Pacific fur seal herds. Inherent to the killing in open sea is the taking of a large number of females and pups. And, as a result of their deaths, the very survival of the herd was threatened.

The United States, in an effort to end this threat, negotiated an agreement in 1911 with the principle sealing nations—Japan and Great Britain and Russia—in which the United States and Russia guaranteed Great Britain and Japan a given number of fur seal skins if, in return, they agreed to end the practice of pelagic sealing. They agreed and our current approach to the slaughter of the seals was initiated.

Under this approach, the U.S. Government hires 80 Aleut Natives of the Pribilof Islands to slaughter seals. For 5 weeks a year, we spend over $400,000 to have the kill seals and skin them. In addition to that $400,000, we also provide over $3 million as part of the Fur Seal Act of 1966, in direct subsidies which go to improving their living conditions, their housing and so on.

But we subsidize more than the Aleuts. In return for the promises made by Japan and now Canada not to kill seals of the open sea, we also give them title to 30 percent of each year's kill, 15 percent each. They contribute no money for the support of the Aleuts. They spend no money to pay their wages. All they do is promise not to kill seals on the open sea and, in return, receive 30 percent of the seal skins taken in the annual harvest.

Now in theory, this may all be defensible. Given the threat that Pelagic Sealing once represented to the continued existence of the herd, it sounds like it may make sense to make these kinds of expenditures in order to prevent their destruction. But the facts are that we no longer need the convention to prevent pelagic sealing. We no longer need to spend this money in order to protect this species.

In 1976, we expanded our territorial claims from 3 nautical miles to 200 nautical miles. And with that expansion, the practice of pelagic sealing lost its economic viability. It simply is no longer profitable to do pelagic sealing because the North Pacific Fur Seals do not move in any large numbers outside of the 200 mile limit.

That was the conclusion of Sidney J. Holt, professor of environmental studies at the University of California Santa Cruz and former senior advisor on marine affairs to the Department of fisheries of the Food and Agriculture Organization of the United Nations. He testified before the House Merchant Marine and Fisheries Committee in April, 1980 and told them that it was his judgment that:

Pelagic sealing, if conducted beyond the extended zones of national jurisdiction, would be prohibitively expenisve and technically quite difficult.

That is why, even though they are not bound by the convention, other nations which could have a sealing industry do not kill North Pacific Fur Seals. The costs of trying to kill them outside the 200 mile limit are simply too great.

But we have retained the Interim Convention. We have continued to spend $3 to $4 million of the taxpayer's dollars each year in an effort to persuade the other signatory nations not to kill seals on the open sea—something they would be convinced of anyway by sheer economics.

We have continued to slaughter tens of thousands of seals year after year under the illusion that somehow, as we beat them to death, we are saving them from a threat that no longer exists.

Now Mr. President, I must confess that I have no love for the act of slaughtering seals. But I must also confess that I am not philosophically or morally opposed to such an act if I believed it was either necessary or economically defensible. But, as I have indicated, there is no "need" to kill seals in order to save them from a worse fate.

And the plain truth is that this convention, and the subsidy it grants to the Aleuts and the other signatory parties, is the very antithesis of an economically defensible activity.

In this age where so much attention is focused on the free market and removing Government subsidies from the private sector, this harvest—this slaughter—of marine mammals is made possible only through Government support. And that, Mr. President, is really what I find indefensible.

I could accept the killing of seals. I can accept continuing Government support programs to make the life of the Aleuts better. But I cannot accept the link between the two. I cannot accept the fact that we subsidize Aleuts to kill seals and that only because of that subsidy are they being killed.

As a nation we have condemned the Canadian slaughter of baby harp seals. As a body, the Senate has gone on record as opposing that slaughter. Yet this Nation and this Senate is engaged in an even more indefensible act when we subsidize the needless slaughter of 25,000 North Pacific fur seals each year.

There is no economic justification for that payment.

There is no ecological rationale for that subsidy.

And there is no moral defense for the killing we sanction through it.

Mr. President, the understanding we are attaching to this protocol is designed to allow this U.S. Government-run and taxpayer-subsidized seal slaughter to be reduced in a reasonable and a fair way.

As the understanding states, such a reduction can be initiated if it is consistent with the terms of the convention, the health of the herd and the rights of the Aleuts. I believe a reduction in the harvest of the U.S. share thereof would, in fact, be consistent with these three goals. Let me discuss each of them.

There are approximately 80 Aleuts who we pay 5 week's wages, $250,000, to run the slaughter. The understanding I offer allows for a gradual reduction.

If any reduction takes place, and as the reduction takes place, I believe that the Aleuts can develop a more diversified and viable economy; one which can become independent of the slaughter. The Aleuts are working now to develop such an alternative economy.

They are engaged in a new commercial fishing venture which offers realistic and long-term employment opportunities to their people and income to their community corporations. They are also taking steps to develop the other natural attractions of the Islands which will be the source of tourism, particularly the bird sanctuary which the Congress has already authorized and should soon fund.

These and other activities are encouraging signs of economic independence. They are signs which I believe the Congress ought to encourage and support. And I am certainly ready to pledge my cooperation in continuing efforts to improve the economy of the region.

Other Members of Congress are also concerned about the Aleut community and are willing to support efforts to diversify it. I again note a portion of a letter from Congressman REGULA of Ohio who wrote to the chairman of the House Interior Appropriations Subcommittee about this issue earlier this month:

> It is my understanding that the Aleuts in the Pribilofs have begun a small boat commercial fishery, which it is anticipated will, in combination with the Refuge and tourism, eventually replace harvesting seals as the primary source of employment on the Islands. The natives expect to utilize the monies received from the government in exchange for these lands to further develop the commercial fisheries and the tourism industry.
>
> I therefore recommend that Congress appropriate $7.5 million in fiscal year 1982's budget to effectuate the contract which has been executed by the parties and previously ratified and authorized by act of Congress. With this money, and the establishment of the refuge, the Pribilof Aleuts will be able to develop an economic basis, other than sealing. They will thus be able to continue as viable economic units when National Marine Fisheries Service completes phasing out its Pribilof Islands program.
>
> As it is my understanding that this contract is supported by all concerned groups it would make a great deal of sense to appropriate the funds, establish the Refuge and develop the alternative economy now.
>
> In that way, the Aleuts will have an opportunity to establish profitable businesses based on foreseeable circumstances by the time the National Marine Fisheries Service phases out the services it provides on the islands.

This confidence about the viability of more diversified economies is also shared by those most directly concerned with the welfare of the Aleuts. In a letter addressed jointly to Senator STEVENS and myself, the attorney representing the Aleuts wrote that—

> With the assistance of the U.S. Government, my clients will take all reasonable steps to diversify the economy of the Pribilof Islands to the end that sealing is no longer the principal source of employment.

Mr. President, I ask unanimous consent that the full text of that letter appear in the RECORD at this point.

There being no objection, the letter was ordered to be printed in the RECORD, as follows:

SMITH & GRUENING, INC.,
Anchorage, Alaska.

Hon. TED STEVENS,
U.S. Senate,
Washington, D.C.
Hon. CARL LEVIN,
U.S. Senate,
Washington, D.C.

DEAR SENATOR STEVENS AND SENATOR LEVIN: This letter is in response to your requests that I write a letter explaining my clients, The Tanadgusix Corporation and the St. George Tanaq Corporation, concurrence with the "Understanding" which will be included in the Resolution of Ratification of the Interim Convention.

My clients understand the philosophical opposition to the harvesting of the Northern Pacific Fur Seal by groups in the United States and the effect that this pressure has on future alterations of the harvest, or the Convention. We understand the pressure for a reduction by many of these groups.

While my clients do not agree with the position of these groups, or to an alteration in the harvest, they do recognize the need to diversify the economic base of the Pribilof Islands so that sealing is not the only source of employment on the islands.

In that light, and as a result of the agreement of the Senate and others to take significant steps to provide the means of diversifying the economy, my clients agree to the Levin Understanding as an amendment to the Resolution of Ratification of the Interim Convention.

We would expect that the future conduct of the harvest would be in accordance with the ecosystem research and based on sound scientific principles. With the assistance of the United States Government my clients will take all reasonable steps to diversify the economy of the Pribilof Islands to the end that sealing is no longer the principal source of employment.

Sincerely,

JOHN ANTHONY SMITH.

Mr. LEVIN. There is, then, Mr. President a significant body of opinion which suggests that a reduction of the harvest or the U.S. share of that harvest can be accomplished in ways which are consistent with the needs of the Aleut residents of the Pribilof Islands.

A second consideration involves the relationship between a reduction in the harvest and the terms of the convention. I believe that the understanding I am offering does not—does not—violate our commitment to provide a given percentage of the skins to the Japanese or the Canadians, which amounted to 7,500 in 1980. We would continue to kill a significant number of seals to meet that obligation.

All my understanding provides is that we need not take those skins to which we are entitled, which amounted to 17,000 in 1980—and we need not kill the seals which would have provided us with those skins.

The Japanese and the Canadians still get the skins they were promised. Our contractual commitment to them is honored for the life of the treaty. But we also, through this understanding, can honor another commitment: A commitment not to needlessly support the slaughter of intelligent animal life.

I would advance three reasons to support my claim that such a reduction is consistent with the convention.

First, the Department of Commerce

believes that we already have—under the terms of the treaty—the right to unilaterally decide what to do with our allotment of seals. We can decide to kill them or we can decide not to. As long as we supply 30 percent of the projected harvest to the Canadians and the Japanese, we have met the terms of the treaty.

Let me quote the statement of the Department of Commerce on that issue. They said in their 1981 final position paper, and discussion topics for the 1981 annual meeting of the North Pacific Fur Seal Commission:

> Should this issue be raised at the Commission meeting, the U.S. response will state that our preliminary view remains that the United States may forego annually all or a part of its share of the harvest. Reduction of the harvest is not contemplated for 1981.

This view has been reiterated as recently as June 8, 1981. Secretary of Commerce, Malcolm Baldrige, in a letter to Mr. Roger Kindler of the Humane Society, wrote that:

> It is and has been our view that it may be possible for the United States to reduce its share of the harvest within the provisions of the interim convention on conservation of North Pacific Fur Seals.

Second, those who suggest that such a reduction would violate the treaty depend on an objection raised to an earlier version of this reservation by the Department of State. Now, Mr. President, that objection really is not persuasive.

The State Department comments on the earlier version of the reservation were not very precise. They wrote then that they believed the reservation was "contrary to the intent of the convention and * * * counter to the will of other party members."

Now Mr. President, I am getting used to dealing with State Department types and the language of diplomacy. They say that the reservation is contrary to the intent of the convention. But that does not mean that the reservation is a violation of the terms of the agreement.

I have been a lawyer long enough to know that there is a big difference between behavior which is argued as being contrary to the intent of a contract and behavior which violates the terms of a contract. The State Department letter, then, is really rather mild—especially when contrasted with the clear position of the Department of Commerce.

But finally, in terms of this question about whether or not the reservation violates the terms of the convention, I think it is important to note that the State Department bases half its case not on the terms of the convention itself but rather on the will of the other party members and their fear that this reservation would be counter to that will. The point is, however, that to the best of this Senator's knowledge, this issue has never been directly negotiated with the other parties. It has, however, been discussed. Let me share with you the report of the Department of Commerce on this discussion:

> During consultations with party governments on the future of the Interim Convention on Conservation of North Pacific Fur Seals in October, 1979, the United States questioned party governments regarding whether or not any party may unilaterally forego its share of the commercial harvest. The party governments noted that such an interpretation of the Convention had never been contemplated, but did not initially oppose this interpretation.

And in the same vein, Mr. President, I fail to see how a decision by the United States not to take its full allotment of the harvest would violate the intent of the convention when the Department of Commerce, as one party to the negotiation of the convention, very explicitly has indicated that it was their intent all along to give the United States the option to take any portion of its allotted share of the harvest.

It is not my intent, Mr. President, to violate the terms of the convention. It is simply my intent to allow the United States to exercise its rights under the terms of the convention and decline to kill or take the skins of all the seals to which it is entitled.

Finally, Mr. President, this understanding requires that any reduction be consistent with the health of the herd. I have already indicated that there is no threat of a return to pelagic sealing. And thus no threat from that quarter of the herd.

But I have sometimes heard those who disagree with me claim that whether or not the slaughter is needed to prevent a return to pelagic sealing, it is needed to allow us to better manage the seal population and protect the other sea life—and the fishing industry which needs that sea life—in the region.

I would begin by suggesting that there is at least something mildly presumptuous about the claim that we need to kill seals in order to protect them—that mankind is in a better position to control and balance nature than nature itself. I find it hard to accept the claim that we need to kill seals in order to save them.

The State Department also joins this argument and suggests that, as a result of the termination of the harvest at St. George Island, there may have been some damage done to the fur seal stock.

They wrote that the termination of the harvest resulted in a reduction in the female and pup population for reasons not fully understood.

Now that is an interesting argument in at least three senses.

First, it is an admission that we do not fully understand the environmental forces which have caused this alleged shift in population. Given that uncertainty, I find it hard to understand the degree of confidence the Department has in the ecological effects it predicts would result from a termination of the slaughter.

Second, the termination of the harvest at St. George was done on an experimental basis—and that experiment is not yet concluded. To that extent the Department is certainly prejudging the results of its experiment and leaping to conclusions.

And, third, I think that conclusion is at least mildly inconsistent with the fear that an end to the harvest would endanger the fishing industry by allowing the fur seal population to grow and consume ever-increasing levels of commercially viable fish. How can a population that is arguably going to be reduced by the ending of the harvest at the same time develop an appetite voracious enough to increase its consumption of fish and endanger that industry? I just do not see how it can happen.

The argument that an end to the harvest would upset nature's balance or impact the commercial fishing industry is, then, one which simply does not have merit.

Mr. President, let me conclude these remarks by emphasizing the main issues I have tried to raise. Essentially I am saying that this slaughter can be phased out without doing real damage to the herds, the Aleuts, the economy of the region, or the terms of the treaty.

And, as importantly, I am saying that this slaughter should be phased out; it is economically inefficient and morally unacceptable. We should help the Aleuts. We can, if we need to, kill seals. But we cannot—and should not—needlessly continue a vicious circle in which we pay Aleuts to kill seals and we kill seals in order to have a reason to pay the Aleuts.

This understanding allows us—if we have the wisdom to make it, as I believe we will—to reduce this slaughter and break out of this circle.

We have an obligation, Mr. President, to treat this Earth and its resources with care and concern. We have an obligation to treat all creatures with compassion. And those are obligations which we have violated and will continue to violate if we perpetuate this needless and wasteful slaughter.

We can develop a diversified economy for the native population of the Pribilof Islands. We can honor our obligations to Japan and Canada. And we can do those things in ways which are consistent with environmental concerns and human compassion.

And I believe that adoption of this understanding allows us to make progress toward achieving those goals.

Finally, Mr. President, let me close these remarks by paying a brief tribute to Jim Callow of my staff. He has worked long hours on this issue and his advice and counsel have proven to be invaluable to me in this effort.

In the same way, I would like to express my appreciation to Mr. Milton Kaufman of the Fund for Animals for his work in coordinating the involvement of the environmental community in this effort.

And finally, I want to thank an old friend, Bill Broder, for his advice and counsel. His suggestions gave me the incentive to carry on in this effort.

Mr. President, again, I thank my colleagues from Alaska. I think we have reached a conclusion here which allows us to move in the direction which I have indicated.

At this time, Mr. President, I yield 5 minutes to my friend from Rhode Island (Mr. PELL) whom we have named as a cosponsor of this amendment.

Mr. PELL. Mr. President, I thank my colleague from Michigan.

Mr. President, I urge the Senate to

give its advice and consent to the 1980 Protocol Amending the Interim Convention on Conservation of North Pacific Fur Seals. The effect of the protocol is to extend for another 4 years the system of protection for and management of the North Pacific fur seal herd.

The Interim Convention, which, in the present form, dates back to 1957 and, in an earlier form, to 1911, has been a model of successful cooperation in the protection and management of migrating species. Under the convention, the nations without seal rookeries—Canada and Japan—share in the controlled harvest of the nations with such rookeries—the United States and the Soviet Union. In return, all powers agree to forego the extremely wasteful practice of pelagic—high seas—sealing. Since 1911, the fur seal population on the U.S.-owned Pribilof islands, which are the major breeding grounds, has increased from 200,000 to 1,250,000.

The North Pacific Fur Seal Convention, in spite of its past successes, cannot be an unchanging and unchangeable document. Circumstances have changed since the original agreement was negotiated in 1911, and indeed, have changed since the present convention was last extended in 1976.

Two important changes deserve comment. First, sealskins are no longer in great demand and hence the harvest is no longer profitable. Since 1970, the total cost of managing the Pribilof island program has exceeded the revenue earned from sealskins.

In 1979, expenditures exceeded receipts by $3,335,789. Second, the adoption of the 200-mile fishing zone has brought much of the fur seal's migration path under the provisions of the Marine Mammal Protection Act and, hence, has sharply reduced the potential damage of resumed pelagic sealing.

In response to these changed circumstances. I supported in committee a reservation offered by Senator DODD to reduce the harvest on U.S.-owned rookeries by 70 percent by instructing the United States not to kill any of its quota. The Dodd reservation would have annually saved 19,000 seals from an uneconomical and cruel slaughter. The reservation did not impinge on Canada's and Japan's share of the harvest and, hence, was entirely consistent with the terms of the Convention. Regrettably, the Dodd reservation was rejected by the Foreign Relations Committee.

I am pleased, however, that a compromise has been worked out between the Senators from Alaska and Michigan, and I look forward to supporting it.

The PRESIDING OFFICER. Who yields time?

Mr. STEVENS. Mr. President, I yield myself such time as I may need. It is my intention that we shall yield back the remainder of our time to my friend from Michigan, in a few minutes.

Mr. President. I think it is important to call the attention of the Senate to the fact that this Interim Convention is in fact the Protocol Amending the Interim Convention on Conservation of North Pacific Fur Seals. It was submitted to the President on October 31, 1980, by our former colleague, former Secretary of State Edmund Muskie.

I ask unanimous consent that the letter of submittal from the Department of State to the President of October 31, 1980, be printed in the RECORD at this point.

There being no objection, the letter was ordered to be printed in the RECORD, as follows:

DEPARTMENT OF STATE,
Washington, October 31, 1980.

THE PRESIDENT,
The White House.

Mr. PRESIDENT: I have the honor to submit to you, with a view to transmittal to the Senate for advice and consent to ratification, the Protocol Amending the Interim Convention on Conservation of North Pacific Fur Seals, between the United States, Canada, Japan, and the Soviet Union, signed at Washington, on October 14, 1980 (the Protocol).

The Interim Convention was signed in 1957; it replaced an earlier convention on North Pacific fur seals dating back to 1911. Under the two conventions, the herds of fur seals have been protected and managed, and the population has increased from 300,000 animals to approximately 1.7 million. The Interim Convention was extended in 1963 and 1969. A 1976 Protocol further extended the Convention and amended it in order to provide greater protection for fur seals. This Protocol extends the Interim Convention for an additional four years, until 1984. It also reflects the four signatory nations' recognition of the extensions of fisheries jurisdictions which have occurred since the entry into force of the 1976 Protocol.

The Interim Convention bans pelagic sealing, which United States scientists consider a wasteful method of harvesting seals. Should the Convention not be extended, the Japanese have indicated they would return to the practice. The Convention also allows the management of fur seal stocks throughout their range. Without it, the United States could manage fur seals within its fishery conservation zone, but would not have any means of control over taking outside the zone. In addition, the Convention allows the continuation of traditional Aleut harvesting of seals for subsistence.

The Department of Commerce has drafted an environmental impact statement on the possibilities of renegotiating the Interim Convention and has concluded that a four-year extension of the present agreement is the course of action which will provide the best protection to North Pacific fur seals throughout their range. The Department of Commerce, which participated with the Department of State in the negotiation of this Protocol, concurs in the view that early ratification of the Protocol is most desirable. I recommend that the Protocol be transmitted to the Senate as soon as possible for its advice and consent to ratification.

Respectfully submitted,

EDMUND S. MUSKIE.

Mr. STEVENS. Mr. President, this is one of the most interesting records in history of an attempt to bring about the controlled utilization of a species. The activities of the United States commenced following the purchase of Alaska from Russia. Prior to that time, the Russians, who had discovered the Pribilofs in 1786, had initiated a very large sealing activity. The resource was practically annihilated by 1834 as the report of the Senate Foreign Relations Committee points out. The Russians then stopped the taking of females and the herds began to increase.

By the time the United States purchased Alaska, the Pribilof fur seal herd had been restored to about 2½ million, according to the records of that time. We are not certain how accurate that count was.

In 1869, Congress set aside the Pribilofs as a special reservation for the seals, but did conduct sealing during the 20-year period that followed under a leasing arrangement that allowed the take of about 2 million seal skins. By 1910, only 200,000 seals were estimated to remain.

In 1911, the first treaty was entered into between our Government and Japan, Russian, and Great Britain acting on behalf of Canada. The success of this treaty has brought us to the point where there are now approximately 2 million seals. The estimate of the department was 1.7 million; I understand that is about 2 years old.

We have discontinued the taking of fur seals on St. George in a controlled experiment that commenced in 1973. It was done with the full consent of the Pribilof people in consultation with the State of Alaska.

In the last 7 years, there has been a rapid increase in the abundance of adult males and a decline in females and pups. It is obvious, I think, to anyone who has studied the past history of this treaty that the scientific management that has been applied to this fur seal herd has, in fact, revived it when it was close to extinction in 1910.

I believe that the State of Alaska and all Alaskans are most interested in securing the approval of the Senate for the extension of this treaty, primarily to assure that this species will be maintained under scientific management principles. We believe that the history of this treaty demonstrates what we have tried to bring about in the management of other species. It is to our sad regret that there are many who will not listen to us as we try to point out that other species could similarly be restored through scientific management. Unfortunately, we have a far different concept involved in the moratorium as far as ocean mammals are concerned right now. But this history demonstrates that when the welfare of the species is our first and foremost goal, the concept of scientific management does work.

Mr. President, I want once again to go on record as stating unequivocally that I think that the history of this program demonstrates that those of us who believe that man has a role in assisting in the preservation of the species such as the fur seal and utilizing a portion of the harvest to benefit mankind, are on the right course as far as wildlife is concerned. Wildlife management, to me, is demonstrated in its finest form in connection with the history of the fur seal treaty.

Mr. President, unless my friend seeks any more time, I am prepared to yield back the remainder of the time on our side.

Mr. CRANSTON. Mr. President, I support the language offered by Senator LEVIN to the resolution ratifying the 1980 Protocol Amending the Interim Convention on Conservation of North Pacific Fur Seals. While the language now be-

fore the Senate stops short of ending the U.S. take of fur seals—and ending that take was the course I advocated as a member of the Senate Foreign Relations Committee—I believe this modification, agreed upon in a spirit of comity by Senator LEVIN and the distinguished assistant majority leader (Mr. STEVENS), represents a significant and hopeful step in how we view the fur seal harvest and the U.S. involvement in carrying out the terms of the treaty.

I think it important to recognize that this language makes possible both a continued stand by the United States against pelagic sealing—that is, killing seals on the high seas—as well as a Senate directive to study fur seal feeding habits, food requirements, and migration and distribution patterns, about which we now have insufficient information. We also recognize the need for alternatives to sealing for the inhabitants of the Pribilof Islands. And we further declare that the Secretary of State should continue efforts to conform the Interim Convention with the purposes and policies of the Marine Mammal Protection Act, and we reiterate the right to adjust the U.S. share of the annual fur seal harvest.

Mr. President, I look forward to the day when we end U.S. involvement in the fur seal hunt. I believe that taxpayer-subsidized seal hunts are inconsistent with the wishes of a majority of Americans. Each year, Members of Congress are bombarded with communications from their constituents in specific reference to the Canadian harp seal hunts carried out under sanctions of that Government. More Americans are becoming aware that in the case of the fur seal, the United States not only sanctions, but pays for a similar slaughter—with taxpayers' money—over which our Government has direct control.

Let me say, Mr. President, that I believe conducting this hunt is an international embarassment to the United States. It clearly lowers our credibility when we push for abolition of other seal hunts—which we do—and where extinction is a far more imminent threat.

I would also point out that the Senate Committee on Foreign Relations has previously expressed its concern about continuing the treaty without modification. In our 1976 report on the treaty, the committee pointed out that with the extension of U.S. jurisdiction out to 200 miles, it was unclear how much pelagic sealing other nations could undertake effectively. The committee urged the State Department to undertake a study of the situation and the possibility of negotiating a bilateral agreement with Canada on pelagic sealing which might be preferable to the present convention. In that report, the committee clearly implied that alternative means to conserve fur seals might be found.

Four years later, we find ourselves in the same quandary that faced us then, and I feel uncomfortable continuing this same arrangement for an additional 4 years without at least some indication by the Senate that we must make progress toward an alternative to the killing of fur seals as an economic base for the Aleuts.

Mr. President, I believe the understanding Senators have reached on this issue offers much to alleviate the concerns expressed by me and by other Senators on the Foreign Relations Committee. I support the language now before the Senate.

Mr. President, I ask unanimous consent to have printed in the RECORD the additional views of Senators on the Foreign Relations Committee in which we discuss the reasons for our support of the original reservation specifying an end to the U.S. take of fur seals. The views provide background to the discussion here today.

There being no objection, the additional views were ordered to be printed in the RECORD, as follows:

ADDITIONAL VIEWS OF SENATORS PELL, BIDEN, SARBANES, ZORINSKY, CRANSTON, AND DODD

During Committee consideration of the Protocol Amending the Interim Convention on Conservation of North Pacific Fur Seals, Senator Dodd offered the following reservation:

"It is the position of the United States that the United States is not obligated to harvest any of the quota of North Pacific Fur Seals assigned to the United States under the terms of the Interim Convention on Conservation of North Pacific Fur Seals. Approval of this Protocol is subject to the condition that the United States not harvest any of its quota of fur seals after January 1, 1981. The Senate directs the Administration to negotiate an arrangement with Canada and Japan so that Canada and Japan will receive sealskins as provided under the terms of Article IX of the Interim Convention on Conservation of North Pacific Fur Seals, except that the total number of sealskins provided annually to Canada and Japan shall be no greater in number than the number they would have received if the United States harvested its quota."

This reservation, which we supported, is similar to one suggested by Senator Levin in a letter to Committee Members (see appendix). The reservation requires the United States, as a condition of extending the Interim Convention on Conservation of North Pacific Fur Seals, to forgo harvesting its 70 percent share of the annual seal kill on the Pribilof Islands. The effect of the reservation would be to reduce the annual seal kill on the Pribilofs from the present level of 26,000 to approximately 7,800. We believe a United States decision not to harvest its quota of seals is entirely consistent with our obligations under the Interim Convention.

We believe United States participation in the annual seal kill is economically unsound, is inconsistent with the management and conservation criteria contained in the Marine Mammal Protection Act of 1972, and serves to undermine efforts to persuade other countries to better protect marine mammals. The Pribilof Island rookeries, which are home to approximately 1,250,000 of the estimated 1,750,000 North Pacific Fur Seals, are administered as a commercial venture by the Department of Commerce. In 1979 the Department of Commerce spent $4,208,600 on the Pribilof Island program, of which $444,000 were direct expenditures on fur seal harvesting and processing. While receipts from sealskins ($842,811) do cover direct costs, they are how far short of covering program costs. (By contrast, in 1960 sealskins earned $3,220,405 while total program costs were only $1,720,402). Thus, at least indirectly, U.S. taxpayers are subsidizing the price of fur coats.

The Marine Mammal Protection Act of 1972 establishes strong standards for protecting and managing marine mammal populations. Were the management goals of this law—i.e., the goal of maintaining the species at optimum sustainable population—applied to the Pribilof Island rookeries, there would be no harvest. By eliminating the United States share of the harvest, we will be following management and conservation practices more in line with the objectives set out by Congress in the Marine Mammal Protection Act.

We share the concern of many Americans over the killing of whales and harp seals. United States Government participation in the seal kill on the Pribilofs strikes us as inconsistent with public and governmental goals in marine mammal protection and certainly weakens our ability to influence other nations.

In its comment on the proposed reservation, the State Department said it "appears to be, in effect, a rejection of the Protocol we have proposed for ratification." We strongly disagree. The Convention is a commercial arrangement allowing the parties without rookeries (Canada and Japan) a share of the land harvest in return for a prohibition on pelagic sealing. Nowhere in the text of the Convention is the United States required to harvest its quota and the proposed reservation explicitly protects the right of the treaty partners to their share.

Furthermore, we note the United States government has stated, both in the September 1980 Final Environmental Impact Statement and the Final Position Paper for the April 1981 annual meeting of the North Pacific Fur Seals Commission, its preliminary view that the United States may forego all or part of its share of the harvest under the terms of the present Convention. The other governments, when questioned on this position, did not object.

We recognize the economic hardships facing the Aleut peoples of the Pribilof Islands, and are concerned about their economic well-being. The Aleuts are a strong and proud people with a long heritage, who have endured a great deal of economic uncertainty. Their fate, now and in the past, has been linked to commercial sealing on their islands. However, this no longer needs to be the case.

Alternative employment opportunities do exist. The rich fisheries of the Bering Sea and the tourist attraction of the soon-to-be established Wildlife Refuge for birds can form the basis for a diversified and enduring economy.

We recognize that, even with a reduction in the seal harvest, Federal expenditures will be essential to provide the Aleuts with necessary services. We do believe that the alternative economies described above provide greater prospects for economic independence than the seal harvest. We hope the State of Alaska and the Federal Government will work with the Aleuts to achieve this independence.

Although the proposed reservation was not accepted by the Committee, we nevertheless supported the Convention of final passage. We believe that resumed pelagic sealing poses a potentially greater risk to the seal populations than the current harvest. We note, however, that the 200-mile fisheries zone provide greater protection to the North Pacific Fur Seals than that which existed at the time of the previous extension of the Interim Convention in 1976. Prior to renewal of the Convention in 1984, we request the Administration provide data on the economic prospects for pelagic sealing outside the 200-mile limit. We also urge the Administration to negotiate with our treaty partners for a reduction in the annual seal harvest.

Mr. LEVIN. Mr. President, I am prepared to yield back the remainder of my time.

Before doing so, I ask unanimous consent that the name of Senator from California (Mr. CRANSTON) be listed as a cosponsor of this amendment.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. LEVIN. Mr. President, I yield back the remainder of my time.

Mr. STEVENS. I yield back the remainder of my time, and ask that the amendment of the Senator from Michigan be considered at this time.

The PRESIDING OFFICER. All time having been yielded back, the question is on agreeing to the amendment of the Senator from Michigan (UP No. 150).

The amendment was agreed to.

Mr. STEVENS. Mr. President, I ask for the yeas and nays on the resolution of ratification, as amended.

The PRESIDING OFFICER. Is there a sufficient second? There is a sufficient second.

The yeas and nays were ordered.

Mr. HEINZ. Mr. President, I rise to support the protocol amending the Interim Convention on Conservation of North Pacific Fur Seals, a treaty which has been in force since 1957. Its ratification will certainly lead to continued protection for the fur seals of the Pribilof Islands.

In the past, I have been a strong advocate of bringing some sensibility to the Pribilof seal harvest program and it is with this in mind that I endorse the protocol as amended by Senator LEVIN.

What Senator LEVIN has proposed is to begin the slow process of getting the Federal Government out of subsidizing the fur seal harvest while still maintaining and strengthening our country's commitment to conducting the harvest in a humane fashion.

This proposal would direct appropriate studies to be undertaken in order to examine the effects of possible changes in the harvest of the Pribilof residents, the ecosystem, the Aleutian economy, and the fur seals themseves. I cannot emphasize enough the importance of adding substantive studies and useful data to the fur seal debate. We need to have some scientific basis on which to make decisions affecting the Pribilof Islands, its people, and the fur seals.

Four years ago, the Senate faced this same issue on the Interim Convention. Then, as now, insufficient information existed on the effects of proposed changes to the treaty. If we expect to make any reasonable modifications to the treaty, we simply must have this information.

The Interim Convention has been responsible for much of the resurgence in fur seal herds over the last 70 years. Our Nation and the other members of the Interim Convention have a right to be proud of this cooperative accomplishment.

However, the United States has an obligation to see that the harvest is conducted humanely under the protection of the Marine Mammal Protection Act of 1972. We owe it to ourselves to encourage Japan, Canada, and the Soviet Union to comply with the principles of conservation and humane treatment of animals which this landmark law mandates.

Furthermore, the subsidization of the seal harvest by the Federal Government is a national embarrassment. During this period of budgetary austerity in our Government, we must make every effort to stop wasteful and unnecessary expenditures.

I am well aware of the importance of the seal harvest to the lives and the economy of the Aleuts and I would not propose to radically alter a tradition which is several hundred years old. However, the Federal Government cannot continue its financial support for this harvest. Our Government cannot afford it and the taxpayers will not stand for it.

The Prilibof seals are one of our Nation's great natural resources. We do have a responsibility for their continued well-being and protection. I look forward to the results of scientific studies on this region and the fur seals and to a rapid yet effective resolution of this problem.

RECESS UNTIL 12:25 P.M.

Mr. STEVENS. Mr. President, I ask unanimous consent that the Senate stand in recess until 12:25 p.m. today.

There being no objection, the Senate, at 11:50 a.m., recessed until 12:25 p.m.; whereupon, the Senate reassembled when called to order by the Presiding Officer (Mr. WARNER).

Mr. CRANSTON. Mr. President, I suggest the absence of a quorum.

The PRESIDING OFFICER. The clerk will call the roll.

The assistant legislative clerk proceeded to call the roll.

Mr. BAKER. Mr. President, I ask unanimous consent that the order for the quorum call be rescinded.

The PRESIDING OFFICER. Without objection, it is so ordered.

The hour of 12:30 having arrived, the Senate will now vote on the resolution of ratification.

The question is on agreeing to the resolution of ratification, as amended, on Executive S, 96th Congress, 2d session, 1980 Protocol Amending the Interim Convention on Conservation of North Pacific Fur Seals.

On this question, the yeas and nays have been ordered, and the clerk will call the roll.

The assistant legislative clerk called the roll.

Mr. STEVENS. I announce that the Senator from Oregon (Mr. HATFIELD), and the Senator from Nevada (Mr. LAXALT), are necessarily absent.

Mr. CRANSTON. I announce that the Senator from Delaware (Mr. BIDEN), the Senator from Connecticut (Mr. DODD), the Senator from Ohio (Mr. METZENBAUM), and the Senator from Nebraska (Mr. ZORINSKY), are necessarily absent.

I further announce that, if present and voting, the Senator from Connecticut (Mr. DODD) and the Senator from Delaware (Mr. BIDEN), would each vote "yea."

The PRESIDING OFFICER. Are there any other Senators in the Chamber who wish to vote?

The yeas and nays resulted—yeas 94, nays 0, as follows:

[Rollcall Vote No. 148 Ex.]

The PRESIDING OFFICER. Two-thirds of those Senators present and voting having voted in the affirmative, the resolution of ratification, as amended, is agreed to.

DEPARTMENT OF STATE

NOMINATION OF MYER RASHISH, OF THE DISTRICT OF COLUMBIA TO BE UNDER SECRETARY OF STATE FOR ECONOMIC AFFAIRS

Mr. PERCY. Mr. President, the Committee on Foreign Relations voted 16 to 0 on April 28 in favor of the nomination of Myer Rashish to be Under Secretary of State for Economic Affairs. The position is an important one in the formation of U.S. policy on international economic matters. The Under Secretary of State for Economic Affairs is the fourth ranking officer of the Department of State, and is responsible for developing the Department's views on international energy policy, international financial affairs, North-South economic relations and trade. The Under Secretary is responsible for preparation for economic summit meetings.

Mr. President, the first economic summit meeting will be held in Ottawa, Canada little more than a month from now. There will be a larger summit meeting in Mexico in October which will focus on North-South relations. In view of these upcoming meetings and all the other pressing international economic issues, it is critical to have Myer Rashish confirmed today for the position of Under Secretary of State for Economic Affairs.

The Committee on Foreign Relations found Myer Rashish to be highly qualified for the position. The Under Secretary for Economic Affairs ought to have a background in economics or business in order to handle the many technical and sensitive international economic

questions which arise. Myer Rashish is a professional economist with a masters degree in economics from Harvard University and extensive experience as a private consulting economist, a government economist, and an academic economist. He has advised several congressional committees, as well as previous administrations, on international economic policy.

The Committee on Foreign Relations found Myer Rashish to be thoroughly familiar with all the major international economic issues. Myer Rashish has the strong support of the Secretary of State and the President. Myer Rashish's views on the issues were found by the committee to be consistent with those of the Reagan administration. Mr. Rashish supports free trade together with a stronger U.S. export effort and greater access to foreign markets; so does the administration. Mr. Rashish believes the private sector should have a larger role in the development process; so does the administration. Mr. Rashish said he would take "a sober, candid, and constructive" view of North-South economic relations; the administration is doing so as well.

Mr. President, based on his fine qualifications for the job, the Foreign Relations Committee urges approval of the nomination of Myer Rashish to be Under Secretary of State for Economic Affairs.

Mr. HELMS. Mr. President, yesterday morning the Foreign Relations Committee held additional hearings with Mr. Myer Rashish, the designated Under Secretary of State for Economic Affairs. The subject matter in question was the pending administration decision on whether or not to sell 100 Caterpillar pipelayers to the Soviet Union.

Mr. Rashish, in the post to which he presumably will be confirmed, has the final authority for making the recommendation to be presented to the Secretary of State in this matter. Indeed, he has already been acting in this position, and, according to the information I have received, has played a significant role in the recommendation which has already been forwarded to the Secretary.

In the hearing yesterday, Mr. Rashish made a pleasant and competent presentation. Unfortunately, he was under restraints by the Secretary of State not to discuss his role in this matter, nor any conversations he may have had with members of the administration, or memoranda he may have approved. I find it discouraging that the administration is invoking the dubious doctrine of executive privilege so early in the game.

One of the reasons I originally raised doubts about the nomination of Mr. Rashish was the fact he was a policymaker whose past policies were more compatible with the Carter administration than with the doctrines which had been enunciated for years and years by Ronald Reagan before he became President of the United States. As a matter of fact, here we have exactly the type of issue which I had in mind when I first raised questions about Mr. Rashish.

The Caterpillar pipelayer sale was first approved in and by the Carter administration, then held up when the grain embargo was imposed. It is my understanding, based upon information which I believe to be accurate, that Mr. Rashish became the advocate in the State Department for making this sale now that the grain embargo is lifted. He was joined by Mr. Robert D. Hormats and Mr. Lawrence Eagleberger in this advocacy.

You might ask, Mr. President, why is Senator HELMS so concerned about these pipelayers and the implications of the sale of them to the Soviet Union at this critical time?

Now the pipelayers become significant in a strategic sense because they increase the Soviet capacity to operate militarily. Moreover, there is a considerable body of expert opinion that the pipelayers could be used to lay coaxial cable for hardened, underground communications networks for military command structures, ABM systems, et cetera. If the Soviets were to build modular structures, premade, hardened with cement, and with the coaxial cable inside a pipe casing filled with cement, they could be laid by the new pipelayers with the same sophistication and delicacy as a natural gas pipeline is laid.

Mr. Rashish stated yesterday that he did not believe the pipelayers would be practical in this application, since they work best on level ground. Of course there is rough terrain in the Soviet Union, but there is plenty of level ground too. I recall, Mr. President, that the American people were told that the Kama River plant would have no military applications, but then we found out that Kama River equipment was used for the invasion and subjugation of Afghanistan.

Moreover, the pipelayers would increase the capability of the Soviet Union to construct gas pipelines to Afghanistan for the continued exploitation of that country. Of course, the Soviets have other pipelayers already. But for major projects, whether of a direct military nature, or for strategic objectives such as the exploitation of Afghanistan, the denial of new pipelayers would require diversion from other high priority projects in the Soviet Union. The denial of the pipelayers would place a strain upon the Soviet overall capability.

Now the distinguished chairman of the Foreign Relations Committee, Mr. PERCY, in whose State the pipelayers are made, has pointed out that the Japanese are prepared to sell such machines made by the Komatsu company. The Soviets already have 547 Komatsu pipelayers, along with about 1,000 Caterpillars.

But this, Mr. President, is significant in itself. Does it not raise the question of what kind of relationship do we have with our allies in this instance Japan? It is not just a question of sales competition, but a question of the survival of the Western nations. We should be using our leverage with the Japanese to secure their cooperation in worldwide actions of a strategic nature. Mr. Rashish yesterday declined to say whether or not discussions were being held with Japan on joint cooperation to deny pipelayers to the Soviet Union.

My friend, the distinguished Senator from Maryland (Mr. MATHIAS), forcefully made the underlying issue clear at yesterday's hearing. I am immensely grateful to him for having done so. I could not agree with my friend from Maryland more on his analysis of this issue, even though we might disagree on the outcome. The point which the distinguished Senator from Maryland made was that we do not have a consistent, underlying foreign policy that would form the basis for making decisions of this type.

We have to decide whether pipelayers are really low technology or not. I do not believe that they represent low technology. But if they were low technology items, denial of the sale would imply a new U.S. policy to inhibit Soviet energy production. Even inaction by the administration while the larger energy implications are being studied would have a major impact, particularly if concerted action with Japan were implemented.

So it boils down to this, Mr. President: if the Caterpillar case is approved, we would be giving a signal to the public and to our allies that the lifting of the grain embargo is leading to an across-the-board liberalization of controls. Since the grain embargo was lifted, we have tried to emphasize to our allies the importance of maintaining and strengthening security controls; we have supposedly been maintaining a no-exceptions policy, expediting review of U.S. proposals to tighten controls on computers, gas turbine engines, and metallurgy.

So it is important, I think, that the case not be approved, and that the Japanese, who seek access to our markets, understand that we truly want a no-exceptions policy in this matter dealing with the Soviet Union in terms of technology and other matters.

It would be interesting, Mr. President, for the Congress to know just exactly what the political-military bureau of state and the policy planning bureau of state had to say in the internal debate on this matter. I cannot believe that any objective analysis of this matter would conclude that the pipelayers could not be used to develop military infrastructure.

Now, I asked Mr. Rashish yesterday if the National Security Council had been consulted about this proposed sale. He said he did not know.

Now, I would hope, Mr. President, that this decision will be taken to the National Security Council before anything is finalized.

I was gratified that the distinguished chairman of the committee, in response to the colloquy between Senator MATHIAS and this Senator from North Carolina, promised that the committee would soon hold hearings on the overall implications of economic policy. The truth is that we do not have a comprehensive policy. We do not know why a grain embargo should be put on or should be lifted. We do not know why we can sell pipeplayers, with military implications, to the Soviet Union, but we cannot sell Government-storage butter that will soon represent a dead loss to the taxpayers.

As the matter now stands, we can sell

the Soviets wheat for their bread but we cannot sell them soon-to-be-rancid butter to butter it. But we can sell them pipelayers that clearly, in the judgment of this Senator, have military implications. There are no principles to guide our planners. And that is the reason the hearings promised by the chairman of the Foreign Relations Committee yesterday morning are so essential.

Mr. President, from the outset, I have tried to argue that our policymakers should be guided by principle. I was one of the earliest supporters of Ronald Reagan for the Presidency, precisely because I admired and respected the principles that he had been espousing for years before that day in 1973 that I made the commitment to him in his home in Los Angeles to support him for the Presidency if, as, and when he should seek the nomination. The years went by. We all remember what happened in 1976.

And then, in 1980, at the convention of the Republican Party in Detroit, I was a member of the platform committee, willing to serve precisely because I felt that it was important that political principles receive close attention and public scrutiny. I worked hard last fall in the campaign to explain those principles as best I could across this country so the people of America could know where the Reagan administration, if it were elected, would stand.

After the election, I became involved in the transition process so that the guidelines for the new administration would be based on the principles that Ronald Reagan has enunciated all these years. And I interested myself in the nomination process for the same reason, as I said earlier.

Mr. President, in the long run, policies are made by people, and the people who make those policies must be carefully chosen. The Caterpillar pipelayer issue is a good example of the way in which policies can be made.

Unfortunately, the restrictions which Secretary Haig placed upon Mr. Rashish just prior to his appearance yesterday morning before the Foreign Relations Committee made it impossible to place upon the record Mr. Rashish's own affirmation about his role in this process. But I hope that the issues which were raised at the hearing yesterday will demonstrate to Mr. Rashish that the supporters of the Reagan administration hope for high standards, and that this must not—must not—be another administration that is just business as usual.

As we have traveled the road through the years from candidate to platform, from platform to campaign, from campaign to transition, from transition to nominations, and now from nominations to new policies, it is vitally important that there be consistency and fidelity. The American people are looking for trust and reliability. They want an end to politics and expediency.

I have said repeatedly that I have not been opposing personalities in the handful of nominations I have questioned. Nor did I expect to defeat the nominees involved. What I was raising were issues, principles, and the future of policy. I hope that the efforts of the Senator from North Carolina have been constructive in focusing on the direction of the Reagan administration, and, subsequently, the direction of our Nation.

The PRESIDING OFFICER. Under the previous order, the Senate will now vote on the nomination of Mr. Myer Rashish.

The question is, Will the Senate advise and consent to the nomination of Myer Rashish, of the District of Columbia, to be the Under Secretary of State for Economic Affairs?

Mr. JACKSON. Mr. President, I ask for the yeas and nays.

The PRESIDING OFFICER. Is there a sufficient second? There is a sufficient second.

The yeas and nays were ordered.

The PRESIDING OFFICER. The clerk will call the roll.

The legislative clerk called the roll.

Mr. STEVENS. I announce that the Senator from Oregon (Mr. HATFIELD) and the Senator from Nevada (Mr. LAXALT) are necessarily absent.

Mr. CRANSTON. I announce that the Senator from Delaware (Mr. BIDEN), the Senator from Ohio (Mr. METZENBAUM), and the Senator from Nebraska (Mr. ZORINSKY) are necessarily absent.

The PRESIDING OFFICER (Mr. MATTINGLY). Are there other Senators wishing to vote?

The result was announced—yeas 91, nays 4, as follows:

[Rollcall Vote No. 149 Ex.]

NOT VOTING—5

Biden	Laxalt	Zorinsky
Hatfield	Metzenbaum	

So the nomination was confirmed.

Mr. BAKER. Mr. President, I move to reconsider the vote by which the nomination was confirmed.

Mr. STAFFORD. I move to lay that motion on the table.

The motion to lay on the table was agreed to.

Mr. BAKER. Mr. President, I ask unanimous consent that the President be immediately notified that the Senate has given its consent to this nomination.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. STAFFORD. Mr. President, on behalf of the majority, I would say that we are about to move some nominations that are cleared on both sides as soon as the minority leader can be on the floor, after which it will be the intent of the Senator from Vermont, as the acting majority leader, to call up S. 63 for immediate consideration, following which we will return to morning business after these matters are completed.

Mr. President, since we are still in executive session, I ask the minority leader if there are any nominations on the Executive Calendar that are cleared on the minority side that could be taken up immediately.

Mr. ROBERT C. BYRD. Mr. President, all nominations on page 2 of the Executive Calendar, beginning with New Reports, have been cleared on the minority side, and if the Senator wishes to proceed en bloc, it would be agreeable on this side.

Mr. STAFFORD. Mr. President, I thank the minority leader, There is a hold on Mr. Enders on this side.

Mr. President, on behalf of the majority, I move that the nominations, with the exception of Mr. Thomas O. Enders, be considered and confirmed en bloc.

The PRESIDING OFFICER. Without objection, the specified nominations are considered en bloc and confirmed en bloc.

Nominations confirmed en bloc are as follows:

DEPARTMENT OF STATE

J. William Middendorf II, of Virginia, to be the Permanent Representative of the United States of America to the Organization of American States, with the rank of Ambassador.

DEPARTMENT OF HOUSING AND URBAN DEVELOPMENT

Antonio Monroig, of Puerto Rico, to be an Assistant Secretary of Housing and Urban Development, vice Sterling Tucker, resigned.

Stephen J. Bollinger, of Ohio, to be an Assistant Secretary of Housing and Urban Development, vice Robert Campbell Embry, Jr.

Stephen May, of New York, to be an Assistant Secretary of Housing and Urban Development, vice Horace Dicken Cherry, resigned.

Judith L. Tardy, of Virginia, to be an Assistant Secretary of Housing and Urban Development, vice William Antonio Medina, resigned.

DEPARTMENT OF COMMERCE

Lawrence J. Brady, of New Hampshire, to be an Assistant Secretary of Commerce, vice Frank Alan Weil, resigned.

COUNCIL OF ECONOMIC ADVISERS

William A. Niskanen, Jr., of California, to be a member of the Council of Economic Advisers, vice George C. Eads, resigned.

STATEMENT ON THE CONFIRMATION OF LAWRENCE J. BRADY, OF NEW HAMPSHIRE, TO BE AN ASSISTANT SECRETARY OF COMMERCE

Mr. DOLE. Mr. President, on May 22, 1981, the Committee on Finance held a hearing on the nomination of Lawrence J. Brady to be Assistant Secretary of Commerce for Trade Administration. As chairman of the committee, it is a privilege and a pleasure to report the committee's decision by a unanimous vote to

report favorably the recommendation of Mr. Brady. I might also note that the Committee on Banking, Housing, and Urban Affairs has also favorably reported this nomination.

Mr. President, the Committee on Finance has reviewed Mr. Brady's financial position, the results of the investigation by the FBI and the report of the Office of Government Ethics. We are confident that there are no problems in any of these areas.

Mr. Brady has been nominated to fill a very important position in the administration. The Assistant Secretary for Trade Administration is the principal officer responsible for Commerce Department investigations of antidumping and countervailing duty complaints, implementation of the steel trigger price mechanism (TPM), and administration of the statutory import, foreign trade zones and industrial mobilization programs. In addition, he will be responsible for developing and implementing policy with respect to U.S. export controls for strategic, foreign policy or short supply reasons as mandated by the Export Administration Act and also for the act's antiboycott provisions.

Mr. Brady has had a distinguished career in public service, providing him with an excellent background and experience for the position to which he has been nominated. He was Acting Director and Deputy Director of the Commerce Department's office of export administration from 1974 to 1980. From 1971 to 1974, he was a senior staff member of the White House Council of International Economic Policy and special adviser for congressional relations. From March 1970 to April 1971 he was senior international economist in the office of international trade, Department of State.

Earlier, he worked in various positions with the U.S. Senate. From 1967 to 1970, he was legislative aide to the late Senator Everett M. Dirksen and simultaneously minority counsel of the Senate Judiciary Subcommittee on Separation of Powers.

From 1963 to 1967, he was a legislative aide to the secretary of the minority, U.S. Senate, and from 1958 to 1963 he was staff assistant to Senator Norris Cotton (R., N.H.).

He received his B.A. in politics and economics from Catholic University, Washington, D.C., in 1962, and has completed all requirements, except the dissertation for his Ph. D. degree, in the fields of international law and relations and international economics.

Mr. President, Mr. Brady is well qualified to serve in this important position. I urge that the Senate approve his nomination.

Mr. STAFFORD. Mr. President, I ask that the President be immediately notified of the confirmations.

The PRESIDING OFFICER. Without objection, it is so ordered.

LEGISLATIVE SESSION

Mr. STAFFORD. Mr. President, I ask unanimous consent that the Senate return to legislative session.

The PRESIDING OFFICER. Without objection, it is so ordered.

STEEL INDUSTRY COMPLIANCE EXTENSION ACT OF 1981

Mr. STAFFORD. Mr. President, I ask unanimous consent that the Senate turn to the consideration of Calendar Order No. 164, S. 63, the Steel Industry Compliance Extension Act of 1981.

Mr. ROBERT C. BYRD. Mr. President, reserving the right to object, and I do not plan to object, I simply want to state for the RECORD that I have run the cloakroom lines twice on this measure, and I did that because it has not cleared the 3-day rule as yet, nor has it cleared the 1-day rule. But I have run the cloakroom lines on this side of the aisle twice, once for 30 minutes and once for 5 minutes. I have received no objections and, therefore, I have no objections.

Mr. STAFFORD. Mr. President, I appreciate the statement of the minority leader.

The PRESIDING OFFICER. The bill will be stated by title.

The legislative clerk read as follows:

A bill (S. 63) to amend the Clean Air Act to provide compliance date extensions for steelmaking facilities on a case-by-case basis to facilitate modernization.

There being no objection, the Senate proceeded to consider the bill which had been reported from the Committee on Environment and Public Works with amendments, as follows:

On page 2, line 3, strike "110", and insert "113";

On page 5, line 11, after "under", insert "this";

On page 5, line 11, strike "113 of this Act";

On page 5, line 13, strike "and";

On page 5, line 18, after "extension", insert the following:

"; and

"'(G) the State in which such source is located does not object to such schedule for compliance."

On page 5, line 23, strike "include", and insert "means";

On page 6, line 21, after the period, insert the following:

In the case of any stationary source for which an extension of compliance or the deferral of expenditure until after December 31, 1982, will result in a modification of the proposed means of compliance involving a significant reduction in employment at an iron- and steel-producing operation, additional capital investments in iron- and steel-producing operations equivalent to the funds referred to in paragraph (1)(B) of this subsection and deferred for such source shall be made at iron- and steel-producing operations in the same community or labor market in which the reduction in employment would occur.

On page 7, beginning on line 15, strike ": Provided, that", and insert "only if"; and

On page 8, line 19, strike "publish notice of such receipt in the Federal Register", and insert the following:

"(i) publish notice of such receipt in the Federal Register,

"(ii) notify the Governor of the State in which the stationary source referred to in paragraph (1) is located, and

"(iii) notify the chief elected official of the political subdivision in which such source is located.

"(B) In any judicial proceeding to establish a schedule of compliance pursuant to the authority of this subsection, the State or local government in which the stationary source is located, or any other person may intervene as a matter of right in such proceeding and judicial decree.

"(7) Notwithstanding any other provision of this Act, Federal judicial decrees or implementation plans under this Act may not be 1985, a schedule of compliance for any source which receives an extension under this subsection.".

So as to make the bill read:

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled, That this Act may be cited as the "Steel Industry Compliance Extension Act of 1981".

SEC. 2. Section 113 of the Clean Air Act is amended by adding the following new subsection:

"(e)(1) The Administrator may, in his discretion, in the case of any person which is the owner or operator of a stationary source in an iron- and steel-producing operation not in compliance with the emission limitation requirements of an applicable implementation plan, consent to entry of a Federal judicial decree, or to the modification of an existing Federal judicial decree, with such person establishing a schedule for compliance for such source extending beyond December 31, 1982, but ending not later than December 31, 1985, on the following conditions:

"(A) the Administrator finds, on the basis of information submitted by the applicant and other information available to him, that such extension of compliance is necessary to allow such person to make capital investments in its iron- and steel-producing operations to improve their efficiency and productivity;

"(B) the Administrator finds, on the basis of information submitted by the applicant and other information available to him, that an amount equal to the funds the expenditure of which would have been required to comply by December 31, 1982, with those requirements of an applicable implementation plan for which such extensions of compliance are granted and whose expenditure for such purposes are being deferred until after December 31, 1982, pursuant to such extensions will be invested prior to two years from the date of enactment of this subsection in additional capital investments in the iron- and steel-producing operations owned or operated by such person, and located in communities which already contain iron- and steel-producing operations, to improve their efficiency and productivity;

"(C) the Administrator and such person consent to entry of Federal judicial decree(s) establishing a phased program of compliance to bring each stationary source at all of such person's iron- and steel-producing operations into compliance with the emission limitation requirements of applicable implementation plans (or, with respect to existing stationary sources located in any nonattainment area for which no implementation plan has been approved as meeting the requirements of part D and subject to implementation plan(s) which do not require compliance with emission limitations which represent at least reasonably available control technology, compliance with emission limitations which represent reasonably available control technology) as expeditiously as practicable but no later than December 31, 1982, or, in the case of sources for which extensions of compliance have been granted, no later than December 31, 1985; such decree(s) shall also contain, at a minimum, (i) requirements for interim controls (which may include operation and maintenance procedures); (ii) increments of compliance sufficient to assure compliance by the final compliance deadlines; (iii) requirement(s) that the amount referred to in subparagraph (B) above, is to be invested in projects representing additional capital investments in the iron- and steel-producing operations owned or operated by such person for the purposes specified in such subparagraph and shall

contain schedule(s) specifying when each such project (or specified alternative project) is to be commenced and completed, as well as increments of progress toward completion; (iv) stipulated monetary penalties covering completion of the air pollution control projects required by the decree, the projects referred to under (iii) above, and such other items as appropriate; (v) monitoring requirements; (vi) reporting requirements (including provision for periodic reports to be filed with the court); and (vii) provisions for preventing increases of emissions from each stationary source;

"(D) the Administrator finds, on the basis of information submitted by the applicant and other information available to him, that such person will have sufficient funds to comply with all applicable requirements by the times set forth in the judicial decree(s) entered into pursuant to subparagraph (C) of this subsection;

"(E) the Administrator finds, on the basis of information submitted by the applicant and other information available to him, that the applicant is in compliance with existing Federal judicial decrees (if any) entered under this section 113 of this Act applicable to its iron- and steel-producing operations or that any violations of such decrees are de minimus in nature; and

"(F) the Administrator finds, on the basis of information submitted by the applicant and other informaiton available to him, that any extension of compliance granted pursuant to this subsection will not result in degradation of air quality during the term of the extension; and

"(G) the State in which such source is located does not object to such schedule for compliance.

"(2) For the purpose of this subsection, 'iron- and steel-producing operations' include means production facilities for iron and steel, as well as associated processing, coke making and sintering facilities. For the purpose of this subsection, 'phased program of compliance' means a program assuring, to the extent possible, that capital expenditures for achieving compliance at all sources owned or operated by such person in iron- and steel-producing operations must be made during the second and each succeeding year of the period covered by the decree(s) in an amount such that at the end of each such year the cumulative expenditures under the decree(s) will be at least equal to the amount which would have been spent if the total expenditures to be made under the decree(s) were made in equal increments during each year of the decree(s). For the purpose of this subsection, 'additional capital investments in iron- and steel-producing operations' means investments which the Administrator finds would not be made during the same time period if extension(s) of time for compliance with clean air requirements were not granted under this subsection. The decree entered into pursuant to subparagraph (C) of paragraph (1) of this subsection shall specify the projects which represent additional capital investment in iron- and steel-producing operations, but may also contain specified alternative projects. The decree may also be modified to substitute equivalent projects for those specified. In the case of any stationary source for which an extension of compliance or the deferral of expenditure until after December 31, 1982, will result in a modification of the proposed means of compliance involving a significant reduction in employment at an iron- and steel-producing operation, additional capital investments in iron- and steel-producing operations equivalent to the funds referred to in paragraph (1)(B) of this subsection and deferred for such source shall be made at iron- and steel-producing operations in the same community or labor market in which the reduction in employment would occur. The owner or operator of iron- and steel-producing operations seeking an extension of compliance under this subsection has the burden of satisfying the Administrator with regard to the findings required in paragraphs (A), (B), (D), (E), and (F). A person which is subject to a judicial decree entered or modified pursuant to this subsection shall not be assessed a noncompliance penalty under section 120 of the Act for any source with an extension of compliance under such decree for the period of time covered by the decrees: *Provided*, that only if such source remains in compliance with all provisions and requirements of such decree.

"(3) Any records, reports, or information obtained by the Administrator under this subsection shall be available to the public, except that upon a showing satisfactory to the Administrator by any person that records, reports, or information, or particular part thereof (other than emission data) to which the Administrator has access under this section if made public, is likely to cause substantial harm to the person's competitive position, the Administrator shall consider such record, report, or information or particular portion thereof confidential in accordance with the purposes of section 1905 of title 18 of the United States Code, except that such record, report, or information may be disclosed to other officers, employees, or authorized representatives of the United States concerned with carrying out this Act or when relevant in any proceeding under this Act. Any regulations promulgated under section 114 of this Act apply with equal force to this subsection subject, however, to any changes that the Administrator shall determine are necessary.

"(4) Nothing in this subsection shall preclude or deny the right of any State or political subdivision to enforce any air pollution requirements in any State judicial or administrative forum.

"(5) The provisions of this subsection shall be self-executing, and no implementing regulations shall be required.

"(6)(A) Upon receipt of an application for an extension of time under this subsection the Administrator shall promptly—

"(i) publish notice of such receipt in the Federal Register,

"(ii) notify the Governor of the State in which the stationary source referred to in paragraph (1) is located, and

"(iii) notify the chief elected official of the political subdivision in which such source is located.

"(B) In any judicial proceeding to establish a schedule of compliance pursuant to the authority of this subsection, the State or local government in which the stationary source is located, or any other person may intervene as a matter of right in such proceeding and judicial decree.

"(7) Notwithstanding any other provision of this Act, Federal judicial decrees or implementation plans under this Act may not be modified to extend beyond December 31, 1985, a schedule of compliance for any source which receives an extension under this subsection.".

SEC. 3. Section 110(a)(3)(C) of the Clean Air Act is amended to read as follows:

"(C) Neither the State, in the case of a plan (or portion thereof) approved under this subsection, nor the Administrator, in the case of a plan (or portion thereof promulgated under subsection (c), shall be required to revise an applicable implementation plan because one or more exemptions under section 118 (relating to Federal facilities), enforcement orders under section 113(d), suspensions under section 110 (f) or (g) (relating to temporary energy or economic authority) or orders under section 119 (relating to primary nonferrous smelters) have been granted, or extensions of compliance granted in decrees entered under section 113(e), if such plan would have met the requirements of this section if no such exemptions, orders, extensions, variances, or decrees had been granted or entered.".

Mr. STAFFORD. Mr. President, the principal author of S. 63 is the very distinguished and most able senior Senator from West Virginia, Senator RANDOLPH.

I am happy to yield to the Senator from West Virginia.

Mr. RANDOLPH. Mr. President, the legislation being considered by the Senate this afternoon is very important to the steel-making industry in the United States. That industry, as we know, has been in difficult times. We are not asking that the Clean Air Act be vitiated for the steel industry. We ask only that on a case-by-case basis certain extensions of deadlines could be given for the specific reason, as the able chairman of our Committee on Environment and Public Works knows, of the modernization within the industry.

The industry has not been reluctant to make these improvements, but the large amounts of money required for both modernization and pollution control have caused the steel industry, so vital to the American economy, not to hesitate, but to go more slowly than we would like.

I do want the RECORD to reflect, as the chairman of our committee has said, the 23 cosponsors of the legislation who are conscious of the need for this measure.

In addition to myself, the cosponsors are Senators HEINZ, GLENN, LUGAR, BENTSEN, BOSCHWITZ, BUMPERS, ROBERT C. BYRD, DANFORTH, DIXON, DURENBERGER, FORD, HATCH, HAYAKAWA, HEFLIN, HUDDLESTON, METZENBAUM, PERCY, PRYOR, QUAYLE, SIMPSON, SPECTER, and SARBANES.

We have in the Senate a steel caucus and at the present time there are some 44 or 45 members of that caucus. We are not in any way replacing any formal committee of the Senate, but we believe that we should bring together those Members of the Senate who come from States in which there are large steel productions because we need to constantly look at the facts, the facts being the importation of Japanese steel into this country and sold here at prices less than we can sell it. But those prices that the Japanese have been selling their products in this country for are, frankly, in many cases less than the actual cost because the Government steps in in Japan and makes up the difference.

So we have been suffering in this country in connection with our ability to produce steel and to sell it in our country because of these importations.

I speak of the administration not politically one way or the other, but we have had this as a matter of real concern. We had a hearing last December in our committee on this subject. The bill, then as now, was supported by the industry, the steelworkers union, environmental groups, and the administration.

We have gone forward this year on the same subject matter. It is in no wise an attempt to release the steel-producing companies from compliance with Clean Air Act goals. It is only on a case-by-case basis, where modernization can take place, to give the opportunity for this stretchout.

We have, during the past, worked with various approaches—the trigger mechanism is one—to try to help the steel industry, so vital to the automotive industry in this country. That is the reason that the action taken in the Senate today, brought to the floor by our realistic chairman of the Committee on Environment and Public Works, reflects the need to act very quickly in a matter of this kind. The House acted on May 28 on a measure similar to this one. There will be no difficulty whatsoever, I believe, in having one or two slight differences adjudicated. But the vote there, in the House, was approximately 322 for the measure and only 3 against.

So, Mr. President, we are bringing something to the floor that has the support of Senators regardless of party, regardless of the sections of the country in which steel is manufactured. This is an American move, an American move based upon the realities.

Mr. President, I am very grateful to the chairman of the committee for calling attention to the fact that I introduced such a bill. That bill, I want the RECORD to show, through the cosponsorship of Republicans and Democrats, reflects a responsible action in the Senate of the United States, as well as, a few days ago, a similar action in the House.

Mr. STAFFORD. Mr. President, I certainly thank the Senator from West Virginia for his excellent discussion of S. 63.

● Mr. HEINZ. Mr. President, I ask unanimous consent that the text of my statement appear in the RECORD during the course of proceedings relating to passage of H.R. 3520, the Steel Industry Compliance Extension Act.

Mr. President, as chairman of the Senate Steel Caucus, I am pleased that the "steel stretchout" has now overcome one of the last remaining obstacles to its hopeful enactment in time to be beneficial in terms of maintaining American jobs in a competitive domestic steel industry.

I urge the House and Senate committees to meet quickly to resolve the differences between the Senate bill and the House-passed version. These are differences more of style rather than substance and should not be allowed to stand in the way of this much-needed relief for the steel industry.

As I testified before the Environment and Public Works Committee back in March, this legislation reflects the recommendations of the Steel Tripartite Committee. It is unique in that it reflects a consensus of the Environmental Protection Agency, the United Steelworkers Union, and the management of American steelmakers that such relief is necessary to maintain employment in a competitive domestic steel industry, and that environmental quality will not suffer as a result.

In fact, the November 1980 Environmental Action reported, "Environmentalists are confident that the plan will not give the steel industry a carte blanche to pollute, but will rather create an orderly process in which companies will be judged on a case-by-case basis."

Rather than granting a blanket extension of Clean Air Act deadlines to steel producers, this legislation grants the EPA Administrator the authority to negotiate consent decrees with individual steelmakers at existing facilities. These consent decrees must include:

First, a schedule of expenditures for plant modernization that could not be undertaken without the stretchout of pollution abatement expenditures;

Second, a schedule of pollution abatement expenditures to insure that clean air goals now set for attainment by December 31, 1982, are met by December 31, 1985;

Third, a finding by the EPA Administrator that environmental quality will not significantly deteriorate in the interim; and

Fourth, monetary penalties for noncompliance with the terms of the consent decree.

I am very grateful that the distinguished chairman of the Environment and Public Works Committee, Senator STAFFORD, has been so accommodating in expediting consideration of this legislation without amendments in advance of the Clean Air Act reauthorization, which probably will not occur until late in the session. The steel industry is unique in terms of the capital shortfall confronting it. Unless a stretchout of pollution control expenditures is available within the next few months, steelmakers will not be able to generate sufficient capital to finance the modernization programs needed to maintain American jobs and the competitive position of domestic producers. This modernization program will not only prevent the domestic market share of American steelmakers from declining further; it will result in cleaner operations.

The massive capital needs of the American steel industry—both to modernize and to comply with Federal pollution control requirements—were the subject of a recent study by Arthur D. Little. That study, commissioned by the American Iron and Steel Institute—forecast annual capital needs of some $7 billion. Of that total, $4.4 billion would be required for modernization and replacement of existing facilities to maintain current levels of capacity. Expansion of production capacity would cost at least an additional $500 million per year.

Compliance with 1982 Clean Air Act mandates will require $1.2 billion in annual capital expenditures, plus an additional $550 million per year in operating costs. Yet despite projected capital needs of $7 billion annually, the steel industry—according to the Arthur Little study—has the capability of generating only $3 to $3.5 billion per year to meet all its capital needs.

The stretchout legislation carefully and specifically addresses the unique capital shortfall problems facing the steel industry. To qualify for the stretchout, a company must have previously entered into consent decrees mandating compliance at all its facilities by December 31, 1982. Because construction to comply with this deadline must begin 1½ to 2 years in advance, capital expenditures that might be diverted for modernization will soon be irrevocably committed.

In closing, I hope that we shall soon see this long-overdue relief enacted in time to be of benefit to American steelworkers and their employers.●

● Mr. STAFFORD. Mr. President, the bill now before the Senate deals with only one industry affected by the Clean Air Act. Specifically, it would allow certain steel facilities up to three additional years in which to comply with some requirements of the Clean Air Act.

I hope that the other interests concerned over various aspects of the Clean Air Act discern the lessons to be learned from this bill and its progress. The bill is relatively simple in both concept and execution.

Moreover, it is supported by four widely disparate interests: The Federal Government, the representatives of steel industry management, the steelworkers union and representatives of an environmental group, the Natural Resources Defense Council.

Such agreement is, in the memory of this Senator, unprecedented. The bill is the product of efforts begun by the Carter administration and, if not explictly endorsed by the present administration, it was not opposed.

In short, this is a bill, with the altogether unprecedented opportunity for rapid, easy enactment.

Despite this, it is now more than 6 months since its original introduction. Enactment into law is still not reality. At least a conference committee yet lies in its path.

It will do well for those who observe congressional review of the Clean Air Act as a whole to learn from this lesson: One simple bill, supported by several groups, the focus of intense attention has already consumed 6 legislative months.

That is not to say that this legislation should require an extended conference or cause a protracted delay. On the contrary, I anticipate that it can be enacted into law very quickly.

But it does illustrate very well the lesson which those new to the legislative process tend to forget or disbelieve: It is agonizingly slow. The more ambitious the undertaking the slower the process.

And, I might add, there is not necessarily any relationship between the quality of the legislative product and the amount of time it consumes. Often, the relationship, if any, is inverse.

In any event, Mr. President, I would like to commend those with whom we have worked on this bill and encourage them to continue in their later efforts the reason and restraint they have exercised most recently. There are still problems to be solved, but they are not insuperable. There are differences between the other body and this Chamber, but they can be worked out, assuming all sides remain reasonable.●

Mr. ROBERT C. BYRD. Mr. President, the Steel Industry Compliance Extension Act of 1981 seeks to balance the capital and energy requirements of our domestic steel industry with long-term environmental goals. The legislation per-

mits the steel industry to comply with the Clean Air Act under a reasonable timetable, and at the same time spurs badly needed modernization efforts in our steel plants.

It is encouraging to note that this stretchout of the compliance deadlines of the Clean Air Act has overwhelming support not only from the steel industry, but from State and Federal regulatory authorities and the environmental community.

I hope that this support signals a recognition of the difficulties that may arise from inflexible regulatory schemes, and the burden that such systems may place on our economy.

Adoption of this measure will provide a shot in the arm to the steel industry, which will be in a much better position to make decisions on how and where to spend its capital. The money saved by deferring expenditures for pollution control equipment is to be invested in plant modernization.

Improvement in the productivity and efficiency of American steel producers will benefit our entire economy to some extent. Almost every region of the country has some steel-making capacity, and steel is important to virtually every industrial segment of the national economy.

Automobile production, construction work, manufacturing, and the production and transportation of coal, oil, and gas are just some of the elements of our economy that are affected by the steel industry.

I strongly support this bill, of which I am a cosponsor, as an appropriate change in the Clean Air Act. Public health is fully protected under the provisions of this bill.

At the same time, the steel industry will be able to better plan its capital investments and better predict the compliance requirements of the Clean Air Act.

I commend my distinguished colleague from West Virginia, Senator JENNINGS RANDOLPH, for his fine efforts in connection with this legislation. As the former chairman, and now the ranking Democratic member of the Committee on Environment and Public Works, he has long espoused the need for balance in environmental legislation.

The current chairman of the committee, the distinguished Senator from Vermont (Mr. STAFFORD) has carried on in that tradition. I commend both Senators for bringing this bill through the Senate expeditiously, and I look forward to working with them in the future.

Mr. STAFFORD. Mr. President, this legislation came out of the Committee on Environment and Public Works unanimously and with 23 cosponsors.

Mr. President, I ask unanimous consent that the Senate agree to the committee amendments en bloc and that the bill be advanced to third reading.

The PRESIDING OFFICER. The question is on agreeing to the committee amendments.

The committee amendments were agreed to.

The PRESIDING OFFICER. The question is on the engrossment and third reading of the bill.

The bill was ordered to be engrossed for a third reading and was read the third time.

Mr. STAFFORD. Mr. President, I ask unanimous consent that the Committee on Environment and Public Works be discharged from further consideration of H.R. 3520, the companion bill, and that the Senate proceed to its immediate consideration.

The PRESIDING OFFICER. Without objection, it is so ordered.

The bill will be stated by title.

The legislative clerk read as follows:

A bill (H.R. 3520) to amend the Clean Air Act to provide compliance date extensions for steel-making facilities on a case-by-case basis to facilitate modernization.

The PRESIDING OFFICER. Without objection, the Senate will proceed immediately to the consideration of the bill.

Mr. STAFFORD. Mr. President, I move that H.R. 3520 be amended by striking all after the enacting clause and inserting in lieu thereof the text of S. 63, as amended by the Senate, and that H.R. 3520 be advanced to third reading and passed.

The PRESIDING OFFICER. The question is on agreeing to the motion of the Senator from Vermont.

The motion was agreed to.

The PRESIDING OFFICER. The question is on the engrossment of the amendment and the third reading of the bill.

The amendment was ordered to be engrossed and the bill to be read a third time.

The bill was read the third time.

The PRESIDING OFFICER. The bill having been read the third time, the question is, Shall it pass?

The bill (H.R. 3520) was passed.

Mr. STAFFORD. Mr. President, I ask unanimous consent that Calendar Order No. 164, S. 63, be indefinitely postponed.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. STAFFORD. Mr. President, I move to reconsider the vote by which the bill was passed.

Mr. MATSUNAGA. Mr. President, I move to lay that motion on the table.

The motion to lay on the table was agreed to.

AUTHORIZATION FOR OFFICIALS OF THE SENATE TO TAKE CERTAIN ACTION

Mr. STAFFORD. Mr. President, I ask unanimous consent that, during the recess of the Senate over until Monday, June 15, 1981, messages from the President of the United States and the House of Representatives may be received by the Secretary of the Senate and appropriately referred, and that the Vice President, the President pro tempore, and the acting President pro tempore be permitted to sign duly enrolled bills and joint resolutions.

The PRESIDING OFFICER. Without objection, it is so ordered.

RECORD OPEN UNTIL 5 P.M.

Mr. STAFFORD. Mr. President, I ask unanimous consent that, until 5 p.m. today, Senators may be able to introduce bills, resolutions and statements, and that committees may be authorized to file reports.

The PRESIDING OFFICER. Without objection, it is so ordered.

EXTENSION OF TIME FOR ROUTINE MORNING BUSINESS

Mr. STAFFORD. Mr. President, I ask unanimous consent that there be a period of not to exceed 30 minutes for the transaction of routine morning business.

The PRESIDING OFFICER. Without objection, it is so ordered.

SENATOR GOLDWATER REPORTS ON THE PARIS AIR SHOW

Mr. GOLDWATER. Mr. President, at 0700 on the morning of June 4, I departed with some members of my staff, the Air Force, and a few personal friends, to visit the Paris Air Show. This is the fourth air show where I have been asked by my President to represent him and report to him on the things that I saw and the matters about which I felt concern.

On the first day that I attended the Paris Air Show, it was my extreme pleasure to meet the new President of France, Mr. Mitterrand. The first thing I did was to extend to him as the official representative of my President, Mr. Reagan's best wishes for a successful tenure of office and added that I felt certain all American people joined in this because of the affection Americans have always had for France.

I was impressed by President Mitterrand. I look forward eagerly to his term of office because I think he is going to prove to be a different kind of President than many observers around the world feel that he might be. He may be inclined a bit toward socialism, but I do not think that inclination will be more than that, just an inclination.

I must compliment the Americans who were responsible for the exhibitions in the International Pavilion. These exhibitions were better done than any I have ever seen. They displayed their manufactured items in such a way that anyone could understand what they were and what they were intended to do.

The exhibits in the U.S. portion of the pavilion were all from America, but there were other American displays in the main portion of the international show and these were outstanding because they showed larger pieces of equipment than the U.S. pavilion was able to handle.

I am not going to try to pick out any one exhibitor who had a better display than others; they were all consistently good and came across well, I think, to the visiting public.

I am appending a list of the exhibitors

79-059 O - 85 - 65 (Pt. 9)

and, while I think I saw all but three or four of them, there may have been a few others that I did not get around to see, but I spent 6 to 8 hours a day for 6 days visiting these displays and visiting the chalets where the American companies were located. The appendix containing the names of the exhibitors will be exhibit 1. Those companies having chalets are shown in exhibit 2. I might explain what the purpose of a chalet is.

An American company or, in fact, a company from any country can purchase space and a chalet from the French, and this is more or less their headquarters where they have meetings for briefing purposes, where they meet for social gatherings, serve lunch, and so forth.

In addition to visiting as many American chalets as I could, I had a nice long visit with the Israelis and observed what they were doing in this whole area.

Now I have to come to the point where I draw some conclusions, and they are not easy to come to, but they are very obvious to me. When I first started attending these shows, it was impossible to find any evidence of real progress among other countries, particularly the European countries.

I will repeat what was told me at the Paris air show following the time we, in our stupid way, canceled development of the SST. One of my foreign friends in the aerospace business pointed his finger at me and said, "I never thought I would see the day when the United States would quit making progress." He then said, "We are going to catch you," and that is the substance of my report.

In every field, starting from the completed aircraft on down to the smallest part, they are showing strong evidence of not only catching us but, in some areas, having passed us.

Avionics, which is a particular field of interest to me, is one in which they are, in some cases, ahead of us; in many cases equal to us, and in other cases showing every evidence of being able to match us, instrument to instrument.

It has not been many years since they started in the forging, casting, and other areas of the metallurgical fields and now their products compare with anything that we make. There are reasons for this which have been touched on by different people in this country over the past several months, so I will not reiterate in too detailed or lengthy a manner.

First of all, we have to realize that in the foreign areas we are competing with firms that are subsidized by their governments from around 45 percent for the manufacturing and to the airlines around 100 percent.

This is only part of the problem, though, because I really do not believe that if the United States nationalized the entire industry, it would help us at this point.

There has to be incentive and our tax system in this country has no way of giving incentive to anyone to build anything or to grow. Until we get the courage in the Congress to really give tax breaks to the people who make our country tick economically, I am afraid we are not going to start making the progress we should.

I am thinking of real tax breaks and even incentives for existing manufacturers and new people interested in getting into the fields, to acquire more money and invest it.

In fact, every billion dollars worth of avionics or aeronautics that we sell overseas or domestically, creates 30,000 more jobs in the United States. This entire industry complex is probably the biggest part of our employment at this time, employing well over a half million people directly and probably that many more people indirectly.

It seems that every country in this world except the United States realizes the importance of turning out engineers and this is best illustrated by the fact that last year over 45 percent of the engineering degrees given in American colleges were given to foreign students.

Now I will quote from a publication of SRI International on the training and utilization of engineers in our country compared to Russia:

> The level of educational attainment of the Soviet population as measured by number of years of training completed has risen from 5.9 years in 1960 to 8.7 years in 1977, and is projected to rise to 9.9 years by 1985. When these data are compared to data for the United States, there is still a significant disparity, especially in terms of percentage of population who have completed higher education (15.4 percent of total population in the United States with four or more years of college as opposed to 6.7 percent in the Soviet Union having completed approximately 5 years of higher education). The distribution of the Soviet population at the higher levels of education, however, is far more heavily skewed toward the scientific and technical fields than is that of the United States, and even at the lower levels of education there is a much greater emphasis on the science and mathematics content of the curriculum than is the case in the United States.
>
> While the United States has a greater proportion of secondary school graduates entering higher educational institutions than does the Soviet Union, attrition rates are much higher. About 80 percent of those admitted to higher educational establishments in the Soviet Union complete their undergraduate education and receive a diploma, whereas only 55 percent of these students who enroll in U.S. colleges go on to receive their bachelor's degrees.
>
> However, in the engineering fields, the Soviet Union graduated almost six times the number of specialists at the undergraduate level as did the United States, a difference which is substantial, even allowing for the probably inferior instruction of approximately one-third of the Soviet engineering graduates who were enrolled in part-time programs.
>
> About 75 percent of Soviet graduate student (aspirant) enrollment is in the science and engineering fields. The percentage of total U.S. master's and doctoral enrollment in these fields has been steadily declining since 1960, and was about 20 percent in 1974.
>
> In 1950 there were approximately the same number of engineers in the United States and the Soviet Union, but by 1974, the U.S.S.R. had over three times as many as the United States. In addition, while there were more than twice as many natural scientists in the United States as in the Soviet Union in 1950, by 1974 this discrepancy had become somewhat less pronounced so that there were only about one-and-one-half times as many natural scientists in the United States as in the Soviet Union. Thus, while in 1950 the total number of natural scientists and engineers combined was about 20 percent greater in the U.S. than in the U.S.S.R., by 1974 the U.S.S.R. had over twice as many natural scientists and engineers as the United States, largely because of the enormous increase in the number of engineers in the U.S.S.R. during this period.

To give the reader a better understanding of how we are drifting down in the total aircraft picture, I will append a table (exhibit 3) of some figures taken from Aerospace, which is the official publication of the Aerospace Industries Association for spring of 1981. Breaking these figures down, we will compare 1984 with 1974 in the different categories of aviation.

In 1974, we sold 332 commercial transports with 227 being sold overseas. In 1980, that figure had climbed to 415, with 237 going overseas. Helicopters found us in our best condition with 828 being sold in 1974, and 420 going overseas, and in 1980, that figure had jumped to 1,272 sales with 659 exported.

In general aviation aircraft, 1974, we sold 14,166 with 4,428 going overseas and in 1980 that had dropped to 1,881 sales with 3,559 being exported.

This brings the total civil aircraft figure in 1974 to 15,326 with exports of 5,598 and in 1980, the total sales 13,691 with total exports 4,434. In those last figures we can see the trend that disturbs many of us who have spent many years of our lives in the aircraft business.

In spite of this downward trend, though, Boeing Aircraft did sell 23 aircraft at the Paris Air Show for $500 million and sales to foreign carriers consisted of one 747, six 757's and sixteen 737's.

However, at the time this was occurring, the A–300 Airbus, and the new model of that craft, were giving strong competition to every American manufacturer except Boeing and, of course, Boeing has dominated this field for more years than we can recite.

Now as to the aircraft shown daily on the flight line and demonstrated in flight, I do not think there is any question but the head of the show was the Bell Helicopter Tilt Rotor which is a concept first thought of by Igor Sikorsky many, many years ago.

Until the great power obtainable in the turbo jets, this vertical takeoff was impossible. There is no question this is a great step forward and while I do not see any great foreign sales emanating from it, I do see a great demand for commuter purposes in our own country.

Also, it has good military applications

in certain areas. Every person in a foreign country I spoke with expressed dismay and concern over the continued inflation going on in the United States.

In military aircraft, I think one would have to say that the F–16 more or less stole the show, although the French Mirage 4000 certainly gave it a good race.

Also, as part of our participation and evaluation at the show, I flew in the Lockheed Alpha Jet—a competitor in the U.S. Navy's advanced trainer aircraft program. The Alpha is currently in use with the French and German military forces.

Later this month, I will be flying the Hawk trainer, built by British Aerospace, and also another competitor for the U.S. Navy selection process.

There are others being built exclusively by U.S. manufacturers but, believe me, the European firms have made great progress. It is a sad comment on the U.S. state of affairs when we have to go abroad for training aircraft and I would like to see that change.

To sum my total reaction to the Paris air show all up, I think the word that comes to me is incentive. Unless we can create a way to give American manufacturers incentive, unless we can find a way to get American labor to increase its productivity and the quality of their products, unless we can overcome the big metal shortage that is looking us right in the face, I am afraid this country is going to see a continued slide in the whole field of aeronautics if we do not get moving.

I would say this was the consensus of every American I visited with over there who looked at the products the way I did, who talked to foreigners and others interested in this specific field.

I wish that I could have come home and made a thoroughly rosy report, but it is not possible to do that with any degree of honesty. So my urging to my President is to get together with the aircraft industry, the avionics industry, and so forth, and determine what specifically he and our Government might do to help create the real meaning of this word, incentive.

In closing, I am going to make this recommendation to the President—that he appoint a committee from industry and other interested parties to explore the possibility of the United States putting on its own air show. The Paris air show has been going on for 68 years, being held every 2 years, and while it has a romantic attachment to everyone, I do believe an air show put on by the United States in a proper location in this country could focus the attention of the American people more exactly on the importance of this industry to the future of America.

Mr. President, I ask unanimous consent to have printed in the RECORD the materials to which I have made reference.

There being no objection, the material was ordered to be printed in the RECORD, as follows:

[1] Drawn from "World airliner census No. 18", Flight International. Dec. 27, 1980. Data as of Dec. 1, 1980.

Mr. GOLDWATER. Mr. President, that constitutes the report that I have turned over to the White House this afternoon, and I thank the Chair very much.

Mr. RANDOLPH. Mr. President, will my able colleague from Arizona yield?

Mr. GOLDWATER. I am glad to yield.

Mr. RANDOLPH. Mr. President, the recommendation is being made to the administration as indicated by the Senator who has just concluded a very valid appraisal of the situation.

I commend him as an individual and as a Senator, but most of all as a knowledgeable American in the field of aeronautics. What he is saying this afternoon I hope will not go unheeded by those who are in important positions of Government.

We must not take an unjustifiable pride in the fact that the Wright Brothers were the first to fly that heavier-than-air craft because there were others throughout the world who at the same time were giving of their skills and imagination really to bring flight into being.

But it is a fact that the United States of America from those earlier days until almost the present has been preeminent in the manufacture of aircraft of all kinds.

And I think there is a justifiable warning in what the Senator has said, knowledgeable as he is in not only aircraft and the uses of aircraft but aerospace as well, that we need to give more attention than we have to these matters which are reflected in his cogent comment.

This is not a pleasantry when I take the floor at this time. This is a belief that is deep within me, that the American people, if they are told the facts, if our leaders of not only Government but industry and American creativity of thought come to the people of our Nation and let the story be known, once again perhaps we will be able to not only stabilize what we have been doing but strengthen these programs with'n the United States of America.

I find increasingly as others find the comments, "We were once the leader in this field and that field, but someone else has moved in and taken it away from us." It is not just a case of pride, and I do not want even that word to be implied, but the realism of the situation calls on an America which through the body politic as well as the thinking of our people is and are alert to some of the dangers, dangers which come from unstable countries and maybe in some cases unfriendly countries. But as we continue to build our defense posture on a positive level, we naturally trust for that long-sought hour when peace and understanding will come to the peoples of the earth.

Again I commend our knowledgeable colleague who has given us now not the negative so much as pointing out that the time is now not later when we should be alerted to this challenge.

Mr. GOLDWATER. I thank my good friend, the senior Senator from West Virginia. I might just say in acknowledging his kind remarks that he probably has done more than any other man in Congress for aviation in this country. He was, I do not like to use the word grandfather—but both of us are getting there—a man who did more to establish our airways, responsible for the aerospace museum here, and he has long been a leader in aviation.

But what the Senator has said is so true. We in America are ahead of the world or we have been ahead of the world because we had Americans who liked to work and invention was the name of the game. Advancement of technology, the desire to go to school and learn something about the skills that made America great have always dominated our lives and now all of a sudden we find that other countries, Japan, Germany, France, Italy, even the Soviets have discovered this secret of America, that you do not get any place in this world without work. I am hopeful that what I have said to our President will be something he will become aware of, namely, we have to give incentives to get these companies going, and we have to give incentives to get money invested in a resumption of research and development in technology.

I have no question but what the United States can lead the world again, but we are not going to lead the world if we just sit back in a nice quiet way and watch the complicated avionics system that we invented and developed being made better, faster, and more dependable in other countries. We are going to see more and more of our airframe business slipping away.

As I say, of course, I may be prejudiced. I have been flying 52 years of my life. But to me the whole future of this country rests on technology, whether it is in flying, avionics, or space.

I think back during my life of the great improvements that have been made. When I started to fly, the airplane I learned in would go 90 miles an hour. Since then—I think it would go about 5,000 feet—and I have since flown at 83,000 feet at over three times the speed of sound. That has all happened in a relatively short life span, and I see no reason for it to end unless the American people continue to be satisfied.

I look at our automobile industry. There is no reason why the Germans and the Japanese should outproduce us. The only reason is we got lazy. We said, "People don't really want a small car. They want a six-passenger car." So the others came in and ran us out of business.

I want to thank my friend from West Virginia for what he said. I have enjoyed reporting to my President on the four air shows I have attended. It is not easy work. It is hard work. But I do not know of a way we can become better acquainted with what the competition is doing than going right there and sticking our noses under the tent.

LEGISLATIVE PROGRAM

Mr. ROBERT C. BYRD. Mr. President, I take the floor at this time to inquire of the distinguished majority leader what the program will be for the remainder of the day and for the early part of next week.

Mr. BAKER. Mr. President, at the conclusion of the business of the Senate today, it is my intention to ask that the Senate stand in recess until 12 noon on Monday next.

Later in the day, I intend to ask unanimous consent that any rollcall votes that

are ordered on Monday go over until Tuesday at noon.

It is my hope that on Monday, June 15, we may be able to take up the reauthorization of the Federal Election Commission. That is not clear as yet. It is a matter that is being worked on between the two sides.

It is anticipated that we will take up the veterans' health care bill under a unanimous-consent order that has already been entered, providing that it will be laid before the Senate at 2 p.m., and there is a time agreement on that measure.

It is also hoped, Mr. President, that on Monday, June 15, we can take up the Veterans' Administration authorization bill as well.

It is expected that on Tuesday, June 16, we will try to go to the Department of Justice authorization bill. We are negotiating now on a time limitation for that bill. For the information of Senators, it appears that the prospects are good that we can obtain an agreement on that bill, on time for debate, with the possible exception of one amendment. If it is necessary to go over and continue the consideration of the Department of Justice authorization bill, we will do so on Wednesday, the 17th.

On June 17, we hope to be able to proceed to the consideration of the State Department authorization bill.

On Thursday and Friday, the 18th and 19th, there are a number of matters we are trying to clear. The Calendar is not yet clear.

Mr. President, it had been my hope that we could go to the reconciliation bill on the 18th and 19th of June. However, I am advised now that the report has not been filed in time to do that without a waiver of the 3-day rule. Since the report to accompany this bill will be more than 1,500 pages, I do not presume to ask the Senate to waive the 3-day rule on that measure. So it appears that we will go to the reconciliation measure on Monday or Tuesday, the 22d or 23rd of June. There is, of course, a 20-hour time limitation by statute on that reconciliation measure when it reaches the floor.

Before we go out for the July 4 recess, Mr. President, I expect that we will take up the farm bill, perhaps on the 24th and 25th of June, and there are miscellaneous bills from the Committee on Environment and Public Works and the Committee on Labor and Human Resources.

Mr. President, that is the outlook for the Senate as I see it at this time. Some of those items are already fixed, and some of them are still in negotiation. If we can complete that schedule of events, we will have accomplished a great deal before we adjourn for the Fourth of July recess.

Mr. ROBERT C. BYRD. Mr. President, I thank the distinguished majority leader.

WHAT FUTURE LIES AHEAD?

Mr. MATHIAS. Mr. President, last Thursday Mrs. Mathias and I had the great privilege of attending the commencement exercises at Harvard University and of seeing our son, Charlie, receive his bachelor of arts degree. It was a moving occasion, deeply rooted in tradition that distilled into a few hours the intellectual ferment of a great university for a full year. The commencement speaker sustained the standards of excellence expected in Cambridge.

In fact, Ambassador Thomas J. Watson, Jr., made a speech that was so pertinent, so thoughtful and so accurate that within 72 hours some of the specific dangers he foresaw were tragically realized in the Israeli raid on Baghdad.

Ambassador Watson expressed a concern that in the widening nuclear arms race there was "the danger that a suspected violation, some unforeseen new technology or a sudden quantitative surge will trigger a desperate response."

On Sunday, this is exactly what happened. Israel, haunted by fear, real, or imagined, triggered "a desperate response." Aside from the violence and tragedy of the event itself, it is still too soon to even assess or estimate the long-range fallout from this act.

Ambassador Watson referred to "the danger that we may further split ourselves from Western allies who fear we lack seriousness about negotiation, whether on SALT or on European Theater Nuclear Forces." Within hours the current edition of the Economist was on newsstands with a lead editorial that begins:

> The relationship between western Europe and North America, alias the Atlantic alliance, is in the early stages of what could be a terminal illness.

But these are only confirmation of the urgency and accuracy of Ambassador Watson's statement. His message was and is far broader and for more compelling for all of us. As he said:

> The time has come for all human beings to realize that we must live together or die together.

Ambassador Watson's advice comes to us weighted by his first-hand experience in the Soviet Union at the very time it launched its brutal invasion of Afghanistan which has since transformed itself into a bloody occupation. Nonetheless, he warns:

> We cannot wait for improved Soviet behavior around the world, or for better U.S.-Soviet relations. Control of strategic arms is not a concession to the Soviets. It must not be linked to irrelevant issues. Those who urge delay take an awesome responsibility on their shoulders.

With the sense of urgency that reading Ambassador Watson's speech inspires, I ask unanimous consent that it be printed in the RECORD.

There being no objection, the speech was ordered to be printed in the RECORD, as follows:

HARVARD COMMENCEMENT SPEECH

(By Thomas J. Watson, Jr.)

WHAT FUTURE LIES AHEAD?

There are many things to be optimistic about. The view from the Kremlin is bleak, with nearly everyone on the Soviet borders hostile. The view from Washington sees mostly friends, admirers, or neutrals. The overwhelming vote in the U.N. on Afghanistan should encourage all of us.

On the other hand, an anthropologist writing the history of the past forty years since the first atomic explosion might well conclude that we human beings have been preparing for our own demise.

Like many extinct species we have had a massive change in our environment. We have finally invented the ultimate weapon and in a mad technological race have connected thousands of them to two buttons—one in Washington and one in Moscow. And with two very slight pressures we can literally do away with the world's two most powerful nations, and leave much of the rest of our planet unfit for human habitation.

Is that our future? The answer hinges on many things. But it hinges above all on us: on the United States' policy on nuclear weapons—on what we and our leaders do about that policy in the days and months immediately ahead. And that is what I want to talk about today.

Let me start out by speaking to today's graduates and those of you who are young.

Throughout the past half century, young people have played many heroic roles. You went to World War II and brought down fascism. You fought and died in the mountains of Korea. Spurred by the challenge of the Russian Sputnik, you made brilliant contributions to American science and engineering, keeping America in the forefront of technology.

You fought heroically in Vietnam. And you worked courageously within the system, joined it in large numbers, became a potent political force, influenced public opinion, and helped bring that tragic war to an end.

We need—and shall always need—this kind of courage and conviction. And especially we need today the courage and conviction of youth to face up realistically to a change of course as a nation—our course on strategic arms control and our whole handling of the nuclear equation.

The hour is late. The imperative of realism and reason is urgent. And we confront many illusions.

First is the illusion of victory—the illusion that one side or the other can start a nuclear war and win it.

Sober common sense analysis will tell anyone that this is impossible. Consider this illusion in its most popular package:

The Soviets launch a surgical first strike and destroy most of our Minutemen and Titan missiles in their underground silos. Thus they leave us few weapons capable of retaliation in kind—of wiping out their remaining underground missiles. And thus they force us to a choice: attack Soviet cities with our submarine missiles and bombers, thereby provoking a counterattack on American cities from Boston to Seattle; or surrender.

What's wrong with this picture? Lots of things. It assumes—against all common sense—that the Soviet leaders, notoriously cautious about security, would bet their total nation on at least four foolhardy all-or-nothing gambles:

The gamble—against all technological likelihood—that their first strike would be essentially perfect—that it would leave few if any Minutemen or Titans to retaliate in kind;

The gamble that we would not use some of our remaining underwater and airborne weapons, nearly three fourths of our total warheads, to attack the thousands of vulnerable military targets in the Soviet Union other than missile silos;

The gamble that when our President learned the Soviet missiles were flying our way he would freeze and do nothing—that he would not send those targeted Minutemen and Titans flying towards Russia's remaining silos before the enemy missiles landed;

And the ultimate gamble: That in desperate retaliation we would not rain down total destruction on Soviet cities, even

though that might mean our own destruction as well.

Make no mistake: That scenario defies all sober analysis. It would be the most risky and ultimately costly gamble in history. By overwhelming odds, the result of any use of nuclear weapons would not be victory. It would be all out war and total destruction. And in the words of President Kennedy, "The living would envy the dead."

The illusion of Soviet preemptive victory has a corollary: the illusion of achievable American superiority—the illusion that like the Red Queen in Through the Looking Glass we can outrace the danger by going "faster, faster;" outproducing the Soviets in nuclear arms; playing a multi-billion-dollar shell game in the desert; hoping that somehow with exotic weapons we can erect a protective umbrella over our country.

So-called nuclear superiority assures no safety—not for the Soviet Union; not for us; because what counts is not superiority but sufficiency—the guaranteed power to destroy the other side under all circumstances. And we both have it.

A quarter century ago Donald Quarles, then Secretary of the Air Force and a wise scientist in a Republican Administration, put it succinctly:

"Beyond a certain point, the prospect is not the result of relative strengths of the two opposing forces. It is the absolute power in the hands of each . . ."

Think of it this way: Would you, if you sat in the Kremlin, attack the United States, even knowing that you could knock out 95 percent of our weapons, but realizing that the remaining five percent could destroy literally the whole Soviet Union?

Would you, sitting in Washington, attack even a smaller country which had only a thousand warheads knowing that if you missed only ten percent they could wipe out a hundred American cities?

You know the answer: There is no safety in numbers. The war planning process of the past has become totally obsolete. Attack is now suicide.

Yet the pursuit of the mirage of superiority persists. And over the years the two superpowers have piled weapon on useless weapon.

In 1945, when we exploded our first atomic bomb at Hiroshima, we had a four-year lead over the Russians. In 1952, when we exploded our first H-bomb, we had a ten-month lead. The Soviet Union closed the gap despite having a country severely torn by the ravages of a war of a ferocity never visited on our country. And it has kept up in the race, despite the burden of a hopelessly inefficient economy, by ruthlessly channeling its resources, and by calling upon the Soviet people for an endless acceptance of sacrifice.

Between us, our two countries now have explosive power equal to a million Hiroshima A-bombs. We have between us some 15 thousand "city killing" weapons—one bomb, one city. Bigger stockpiles do not mean more security. Enough is enough. And we are far beyond that point now.

There is a third illusion, rooted in the belief that nuclear victory is possible and strategic superiority attainable. It is the illusion of nuclear omnipotence—that if we just have more weapons we can use nuclear threats to deter Soviet misbehavior anywhere in the world.

I can think of no quicker prescription for disaster. Our nuclear weapons are useless except for their mission of preventing direct attack on us.

Fourth is the illusion of futility: the illusion that we cannot sign treaties with the Russians because they systematically violate them.

Let us be clear about this: there are major differences between our two countries. Soviet values are diametrically opposed to ours. Contention between us on a global scale is a fact of life. Suspicion is the keynote of our relations.

But having said that, let me add this: on the evidence, the Soviets do keep agreements provided each side has an interest in the other's keeping the agreement; and provided each side can verify compliance for itself.

Look for example at the 1972 Anti-Ballistic Missile Treaty and the Interim Agreement—the two parts of SALT I. The Soviet Union has violated neither. For these treaties do not depend on trust or good will. They depend on cold self-interest and unilateral verifiability.

Fifth is the illusion of benign neglect, the idea that if we just muddle along, in the phrase of Dickens' Mr. Micawber, "something will turn up;" that the current aging Soviet leadership, for example, will soon be replaced by enlightened and reasonable men; that the Soviet system will crumble from within; or that we can indefinitely stall on serious negotiations, let the Soviets cool their heels waiting, and use the intervening time for our own advantage—to arm up.

Let us not delude ourselves. We can take no comfort from all these kinds of wishful thinking.

To be sure, the average Soviet Politburo member today is sixty-nine years old. But I have met many of the possible successors, and I can tell you: I foresee no real change. I do not see the Soviet Union becoming more pro-American. I do not see a revolution around the corner. I do not foresee the demise of the rigid system or the rigid thinking that runs it. And I see no chance that the Soviet leaders will be hoodwinked by protracted negotiations while we try to jump ahead in strategic arms.

Finally, we confront the illusion of softheadedness; that anyone who favors an end to the arms race must be soft on U.S. defense or even soft on Communism. And we confront its corollary: the simplistic formula "arm up and stand firm," though war would mean losses of 50 to 75 percent on each side.

The illusion of softheadedness is thermonuclear McCarthyism. Because the search for a way out of this morass—the search for an avenue of negotiation and survival instead of confrontation and weaponry—has a long and honorable heritage.

That heritage includes Republicans and Democrats; military and non-military leaders, among them some of the greatest and most tough-minded of our time.

It began in 1946 under President Harry Truman with the proposal of a hardheaded financier, Bernard Baruch, for international UN control of atomic energy.

It continued with President Dwight Eisenhower, who in his first major foreign policy address denounced the tragic waste of armaments, and in his farewell message warned against the power of a military-industrial complex.

It includes another great five-star General, Omar Bradley, who nearly a quarter century ago called for the country to turn away from "the search for peace through the accumulation of peril."

That heritage embraces the last legacy of President Kennedy, the nuclear test ban treaty of 1963; the SALT I accords under President Nixon; and the SALT II treaty initiated by President Nixon, continued by President Ford, and completed by President Carter.

SALT II was guided to completion in large part by former Secretary of State Cyrus Vance, who sits on this platform with me today, and for whom I was proud to serve in Moscow. Though the U.S. Senate has not ratified the treaty, it was endorsed by former Secretary of Defense Harold Brown, one of the world's brightest authorities on modern armaments; by General David Jones, head of the joint chiefs of staff; and countless others.

Thermonuclear McCarthyism is a slander against the wisdom of many great Americans.

Against all these illusions, what is the reality? The reality is that thermonuclear war in any form is suicide.

Our imperative is to change our course—to take the only road which offers a viable hope for the future: not a road to unilateral action of any kind, but a road toward the joint continuation of the SALT process; a road to a long series of mutually verifiable treaties.

I know from experience how maddening protracted negotiations with the Russians can be. I know what these negotiations will demand of us: in the words of St. Francis of Sales, "A cup of science, a barrel of wisdom, and an ocean of patience." But we have no choice. Because the longer we drift on without firmly capping the arms race, the graver the dangers we create:

The time has come to realize that our nuclear deterrent is robust under any possible contingency. Let our politicians and arms technicians stop poor-mouthing it.

Above all, the time has come for a new effort to cap the strategic arms race—cap it through a verifiable treaty which gives both sides the security they require.

SALT II offers a good framework. Minor changes could be made at the negotiating table if necessary. But there is little time before technology and pressures on both sides push us into a new and unmanageable spiral.

We cannot wait for improved Soviet behavior around the world, or for better U.S.-Soviet relations. Control of strategic arms is not a concession to the Soviets. It must not be linked to irrelevant issues. Those who urge delay take an awesome responsibility on their shoulders.

Twenty-eight years ago in Sanders Theater across the street, a great American journalist, Elmer Davis, delivered the annual Phi Beta Kappa oration. It was a time of darkness and witch hunts and false accusations. And in calling upon friends of freedom to stand up and fight, he quoted the first book of Samuel, which tells of the fear of the Philistines as they faced a formidable foe.

"Woe unto us!" they said. "Who shall deliver us out of the hands of those mighty gods?" But when they looked around and saw that no one else was going to deliver them, they said to one another: "Be strong, and quit yourselves like men; and fight." And they did, and they saved themselves.

The title of that Phi Beta Kappa oration was: "Are We Worth Saving? And If So Why?" The title of my remarks today might be: "Can We Be Saved? And If So How?"

I have tried to suggest some answers. And despite the somberness of my theme, I remain an optimist.

I regard the first atomic explosion in 1945 as an arrival—a culmination of mankind's long advance in ever greater mastery over the forces of nature.

I regard that explosion also as a watershed; because it signaled man's capability for the first time to destroy himself and the earth he lives on.

But I do not regard that explosion of 1945 as a beginning of the end.

The time has come for all human beings to realize that we must live together or die together.

I believe we have the reason and the realism and the common sense to choose life.

THE FLIGHT TRAINING BENEFITS SECTION OF THE GI BILL

Mr. STEVENS. Mr. President, the Senate Committee on Veterans' Affairs re-

cently considered changes in the veteran's program authority to meet the budget resolution's mandate of a $110 million cut in program authority. I understand that the committee was able to meet and exceed that goal without recommending termination of the authority for flight training benefits.

I am pleased that this was possible and urge the committee, when it goes to conference, to continue to resist efforts to cut flight benefits.

The flight training benefits section of the GI bill has been an important part of the benefits program available to our veterans in Alaska. Alaska is heavily dependent on air transportation to reach the many remote parts of the State. We have an extensive system of air taxi operators and small regional airlines which depend on flight personnel getting their training from outside sources.

The veterans flight training benefits program has provided a valuable source of people for these flying jobs. It has allowed our veterans to break into aviation. The program has also made it possible for men and women working as pilots to improve and expand their skills. This adds both to the individuals career opportunities as well as to the general level of safety in the industry through better trained pilots.

The training program in Alaska has been quite successful. Most of the people who take flight training remain in aviation. At the present time, the majority of the approved flight training schools in the State have 100 percent of their students employed in the same type of work, or closely related work, for which they were trained. This is an indication of the carefulness with which the program is administered in Alaska.

Again, I want to congratulate my distinguished colleague from Wyoming for his skillful training of veterans' programs—achieving the goal of reduced Government size—while at the same time keeping intact the worthwhile programs.

TRIBUTE TO DR. DONALD E. SHAY

Mr. MATHIAS. Mr. President, I greet the retirement of Dr. Donald E. Shay, chairman of the Department of Microbiology, School of Dentistry, of the University of Maryland at Baltimore, with mixed emotions. Certainly, after 37 years of service to the university and the people of Maryland, Dr. Shay's retirement is well-deserved and I rejoice that he now may savor the blessings that only the leisure for contemplation can provide. On the other hand, Dr. Shay's counsel and contribution to the school of dentistry will be greatly missed and I am sorry to see a man of his intellectual distinction leave the university even to retire.

For the past 33 years, Dr. Shay has been chairman of the microbiology department at the dental school. Under his aegis, the department has become one of the largest basic science departments on the campus of the University of Maryland at Baltimore. His official title, however, barely suggests the ambit of Dr. Shay's interests, concern and accomplishment. He is widely published in scientific journals. He is a leader in both national and international organizations concerned with life sciences. And he has held high office in a number of scientific organizations. For example, he has been president of the Maryland Biological Society; of the Maryland Branch of the American Society for Microbiology; of the Baltimore Branch, International Association for Dental Research; chairman of the Membership Committee of the American Academy for Microbiology; and Secretary of the American Society for Microbiology.

But, more than the honors he has received, more than the articles he has written or the conferences he has enlightened, what speaks of the essential man is the record of his involvement in his own immediate community, for what boots it to have world renown, if your neighbors didn't know who you are?

Dr. Shay's neighbors do know who he is and they like what they know. So do the members of Boy Scout Troop 822 where he has been counselor. He has also been a board member at the Linthicum Heights Methodist Church; a member of the advisory committee of the Anne Arundel County Science Fair, and a member of the National League of Families of American Prisoners and Missing in Southeast Asia.

On June 30, when Dr. Shay steps down at the University of Maryland, he will take with him the respect and gratitude of his fellow Marylanders for a lifetime of outstanding service to the community, the Nation and the world. I congratulate him on a job well and selflessly done and I wish him a rich and rewarding retirement.

RECEIPT OF A RESOLUTION FROM THE MISSOURI STATE LEGISLATURE CONCERNING THE POW/MIA TRAGEDY

Mr. THURMOND. Mr. President, as President pro tempore, I would like to bring to the attention of my distinguished colleagues a resolution passed by the House of Representatives in the great State of Missouri concerning a full and accurate accounting and return of all American POW's and MIA's in Vietnam.

It is heartwarming to know that there is a new surge of grave concern across our Nation for a resolution of this tragedy. Time and again, I have urged for our Government to pursue every possible course of action to resolve this serious dilemma. The intransigence of the Communists on this vital issue is intolerable and unacceptable to the free world.

Mr. President, I commend the distinguished members of the Missouri House of Representatives for their strong action and persuasive resolution. It is another significant signal to America that we, as a nation, must relentlessly pursue a solution of this tragedy. I congratulate the Missouri House of Representatives for joining with the legislatures of other States, including South Carolina, to press our Government for action on this issue.

Mr. President, I ask unanimous consent for the Missouri House of Representatives resolution on the POW/MIA tragedy, dated May 20, 1981, to be printed in the RECORD.

There being no objection, the resolution was ordered to be printed in the RECORD, as follows:

MISSOURI HOUSE OF REPRESENTATIVES
RESOLUTION

Whereas, it has now been six years since the end of American involvement in the tragic struggles of Indochina; and

Whereas, the members of the Missouri House of Representatives wish to reaffirm their appreciation to the veterans of that conflict who sacrificed so much, and especially to the families and loved ones of those 2,500 Prisoners of War and Missing in Action who have not returned; and

Whereas, this body encourages all state, county, and local governments throughout this great land to actively support the effort to obtain a full and accurate accounting and return of all of America's Vietnam POW's and MIA's through the use of such devices as letter writing, petitions, and resolutions; and

Whereas, the Missouri House of Representatives also urges the President and Congress of the United States to renew and intensify diplomatic efforts and negotiations with the nations of Southeast Asia on behalf of these missing Americans; and

Whereas, the members of this chamber also appeal to the leaders and people of Vietnam, Laos, and Cambodia to join with them in a cooperative effort to bring an end to this unhappy chapter in the history of modern civilization by demonstrating compassion toward these innocent victims of war and their families;

Now, therefore, be it resolved, That we, the members of the Missouri House of Representatives, Eighty-first General Assembly, First Regular Session, appeal to all Americans and men and women around the world to seek a full return and accounting of all Vietnam era Prisoners of War and Missing in Action; and

Be it further resolved, That the Chief Clerk of the Missouri House of Representatives be instructed to send properly inscribed copies of this resolution to the President of the United States, the Speaker of the United States House of Representatives, the President Pro Tempore of the United States Senate, the Governors of the several states, the Secretary General of the United Nations, and the Governments of Vietnam, Laos, and Cambodia.

HUMAN RIGHTS

Mr. MITCHELL. Mr. President, in the wake of the controversy over the nomination of Dr. Ernest Lefever to be Assistant Secretary of State for Human Rights, suggestions have been made that the Office of Human Rights be abolished.

It has been suggested that the role of Government in furthering human rights is properly included within Government's other responsibilities to the economic, strategic, and trade interests of the Nation.

Concern has been voiced that an Office of Human Rights may, in some way, represent an imposition of uniquely American values on other cultures and other governments. It has even been argued that an Office of Human Rights may, in fact, run counter to our national interest by imposing considerations on policy questions which prevent policies being clearly defined and carried out.

All these reservations about the role of government in enhancing human

rights are grounded in the idea that what a nation's government does is separable from what the nation itself is.

But the actions of a government cannot be separated from the nation itself. We ought not express our misgivings about the complexity of human rights issues in the world today by abandoning the one office in our Government whose stated and single goal is their enhancement.

The history of what our Nation is and stands for illustrates that as long as we remain the United States of America, we can never be unconcerned about human rights.

The United States of America is a great Nation. We have the largest and most productive economy in the world and the most powerful military forces in all of human history.

But the United States was a great Nation long before it possessed economic or military strength. The United States was a great Nation from the moment of its birth, when it contained fewer than 4 million persons clinging to the Atlantic seaboard. Its greatness then was based not on American power, but on American ideals. It still is.

The history of man is, unfortunately, largely a record of oppression.

Here, for what in the sweep of history is but a brief moment, the ideals of liberty, justice and equality of opportunity have become living realities. The people of the world know that. They have known it for two centuries. That is why so many of them have come here and why so many more now try so desperately to reach American shores.

If the source of our appeal were military strength, the Soviet Union would attract a goodly share of immigrants, since it too is a great power. But no boatloads of refugees risk their lives to reach Soviet soil. Indeed, as we pass laws to keep people out, the Communists build walls to keep them in.

Foremost among American ideals is our belief—our faith—in the worth of the individual. No principle is etched more deeply in the American character than that represented in the Bill of Rights: Each individual possesses inalienable rights that are secure from violation by anyone else, including the Government—especially the Government.

For most of mankind, past and present, that has not been true.

We live in a time of danger. The power of the weapons of destruction has increased more in the past half-century than in all the previous millenia of recorded history. At the same time, there is greater willingness to resort to violence to achieve goals, by individuals and by governments. Strikingly, much of the violence and terror engaged in by governments is against their own people. With good reason, many people fear their own governments.

And the governments which inspire the greatest fear are the ones which most loudly proclaim the principle that the repressions of human beings within the borders of a nation state is a matter of little consequence and no legitimate concern to any other nation state. That principle has been endorsed by such nations as the Soviet Union today and Nazi Germany in the past. It echoes in the actions of such murderous regimes as Idi Amin's in Uganda and the Pol Pot regime in Cambodia. It nourishes the contentions of such regimes as Argentina's and Paraguay's, which assert that their treatment of their citizens is no-one's business.

In 1937, the civilized nations of the world met at the French spa of Evian to explore joint action to save the Jews of Germany. No agreement proved possible. The willingness of the civilized world then to placate Hitler's Germany, to ignore the fate of the Jews there, and to play down reports of mass murder in the East made possible the Holocaust, the central most terrible episode in the human experience in this century.

The postwar world recognized that the treatment of citizens within national borders was not the exclusive concern of a nation state or a national government. The postwar world joined together in our own country, under American leadership in San Francisco, and drafted the universal declaration of human rights. Our current human rights statutes stem from that antecedent and seek to further the goal of a humane world.

There is no more compelling commandment in the entire Judeo-Christian tradition than the one which asserts that we are, indeed, our brothers' keepers. To the limited and imperfect degree that governments can carry out that commandment, our human rights statutes represent an honorable, essential expression of what we, as a nation are, and what we, as a nation, should seek to remain.

We cannot be dedicated to the proposition that all men are of equal worth, that all men have equal rights, unless we apply those beliefs to all men—not to the select few who are lucky enough to live in democratic societies and enjoy civil liberties.

Human rights are not divisible. Our tradition, our moral code and everything we know informs us that as long as one of our fellow human beings suffers, we are all thereby diminished.

And human rights are not divisible from those creations of human beings which we call governments. We cannot be and remain humane beings unless our institutions—including our governments—are also humane.

All governments, including our own, respond imperfectly to the challenge of upholding human rights. When that happens, some who call themselves realists contend that government cannot and ought not make moral judgments. They argue that government's sole responsibility is to practical economic and strategic interests. They cite John Quincy Adams, who said that "We are the friends of liberty everywhere, but the custodians only of our own."

That maxim may have been appropriate to a small, new struggling nation in the dawn of the industrial era. But it is surely no measure of our Nation's responsibilities today. Nor does it bear any realistic relevance to the world of the 20th century, where the fates of all nations are inextricably intertwined.

I believe another American President, our first and greatest Republican President, Abraham Lincoln, more truly and more fully expressed the view of Americans today when he said: "Those who deny freedom to others deserve it not for themselves, and, under a just God, cannot long retain it."

This century bears out the truth of that prophetic remark.

Our goal in foreign policy remains, as it ever has, to seek peace, to encourage industry, and to nourish trade between nations. On that basis, America found its prosperity in the past and on that basis will continue to flourish in the future.

And so long as our own future remains so closely tied with other nations of the world, so long must we remain concerned and active in support of the principles which animate our Nation.

Liberty, justice, and democracy are surely our paramount values. They are values sought by ordinary people throughout the world. They are values which are denounced and trivialized and suborned by totalitarian and authoritarian regimes throughout the world. We have an obligation to give voice and action to our determination to protect the true meaning and the practical expression of those values in our world. To do less is to concede to the totalitarian nations that there is liberty in Afghanistan, that justice is served by government goon squads, and that freedom flourishes in the Gulag.

Those are obviously lies, and if we have any national moral obligation whatever, it is to fight the spread of those lies.

We cannot do so if we permit any friendly nation to trade with us, to buy our arms, to entertain our ambassadors and our businessmen while its own agents hunt down and torture and kill their own people. We cannot do so if we will not permit our trade policies to be influenced by the extent of human rights violations in the Soviet Union.

The practitioners of "practical" politics, of politics empty of moral content, argue that any friendly nation ought to be able to buy anything from us. They argue that relations with the Soviet Union ought to be determined solely on the basis of our economic and strategic needs.

That is a view the Soviet Union itself endorses wholeheartedly.

But there is no basis for that view in American policy, in the American Constitution, or in the American tradition.

The American commitment to individual liberty, to personal dignity, to human self-worth stands unalterably opposed to it.

The public debate over the extent and the limits of Government's role in enhancing human rights in the world is today in danger of becoming a confrontation between the proponents of domestic policy differences.

Domestic political differences can and should play a role in setting the terms of our Nation's policies abroad, but they should not dominate the debate.

What is at stake is more important than domestic doctrinal differences: It goes to the heart of what our country stands for.

Are we willing to ignore the barbarities of the totalitarians of the right in order to excoriate the totalitarians of the left? Are we willing to embrace a foreign policy which negates the struggle of individuals in favor of "larger" issues?

In a nation founded and sustained on the inalienable rights of individuals, what larger issue can there be?

Nations, like individuals, are what they do. We cannot assert a love of liberty and look away from repression. We cannot assert respect for humanity and tolerate torture. We cannot and ought not pretend a reverence for the sanctity of the individual and countenance the negation of individuality which is the essence of all totalitarian regimes, left, right, and center.

If our ideals are to have meaning, our Government must act on them. Without practical expression, our ideals are nothing but rhetoric. Unless they are embodied in our policies, they remain lifeless. It is action which gives life to ideals. And to remain true to our ideals as a nation, our National Government must be willing to take action on our principles.

I hope the Senate will have an opportunity to consider this entire issue in more detail in the near future.

THE NEED FOR DEVELOPMENT OF SIMPLER COMBAT AIRCRAFT FOR THE MILITARY

Mr. THURMOND. Mr. President, once again respected leaders in the military area have proposed that this country should move away from reliance on complex, sophisticated weaponry.

As a proponent of a test for the privately developed Enforcer aircraft, and a supporter of less complex and more dependable military equipment, I believe this report deserves careful study by the Defense Department and the Congress.

While I would not agree with all of the recommendations it contains, it certainly deserves consideration in view of the low readiness rates for much of the complex aircraft and other equipment produced by the Pentagon in recent years.

Mr. President, I ask unanimous consent that an article on this subject which appeared in the June 1, 1981 issue of Aerospace Daily under the heading "Report Urges Simpler Combat Aircraft" be printed in the RECORD.

There being no objection, the article was ordered to be printed in the RECORD, as follows:

REPORT URGES SIMPLER COMBAT AIRCRAFT

Critics of the current U.S. military doctrine of firepower/attrition warfare have urged in a new report that the U.S. move away from reliance of complex, sophisticated weaponry.

The report, "Reforming the Military" published by the conservative Heritage Foundation, reflects the thinking of Col. John Boyd and others who have argued that U.S. military forces should be geared toward a maneuverable and flexible style of fighting using simple, adaptable and easily maintained weaponry in relatively large numbers.

In his essay on land-based tactical aviation, Pierre M. Sprey, an engineer and analyst whose work at the Pentagon laid the foundation for Chuck Spinney's "Defense Facts of Life"— a DOD study which has provoked a debate over the need for less complex aircraft—argues that the complexity of aircraft such as the F–15 fighter, E–3A AWACS and the F–111 fighter bomber have lead to low readiness rates and fewer aircraft in the Air Force inventory because of escalating costs.

Sprey also questions the force structure of the NATO air forces, explaining that too many aircraft are designed for attrition warfare/interdiction bombing—"a capability that would have little effect, and certainly no immediate one, on Red armored spearheads thrusting deep into West Germany"—and too few aircraft earmarked for stopping Soviet tanks.

Sprey makes two key recommendations concerning future aircraft procurement.

The first is that procurement of the F–16 "should be emphasized over the F–15. In visual combat, the F–16 has been demonstrated to be the superior aircraft. The poor performance of the Sparrow missile and lack of solution to the IFF (Identification Friend or Foe) problem render the beyond-visual-range mission highly questionable."

REPLACE F–16 WITH SUPERCRUISE FIGHTER

The F–16 should eventually be replaced by what Sprey calls a supercruise fighter, "a single purpose air-to-air fighter designed to maximize surprise, the decisive factor in 80 percent of air kills. It would be intended to cruise at Mach 1.3 to 1.6 instead of the Mach .08 to .09 of every current tactical fighter. To enhance the surprise achieved by superior cruise speed, basic avionics and weapons would be non-emitting and the aircraft's size would be held to less than that of the F–5 . . . The cost would be under $5 million in FY '81 dollars. The weight would be less than 10,000 pounds."

Sprey's second recommendation is that the A–10 should remain in production until a "combined arms fighter" is introduced. "A minimum of 2000 of these aircraft (U.S. plus Allied) would operate as a major combat arm combined integrally with blitzkrieg ground tactics. The aircraft should be the smallest, most maneuverable fighter possible, wrapped around the four-barrel 30mm cannon. Speed should be no more than 400 knots; acceleration should be double that of the A–10 together with a 50 percent maximum G advantage. Cost should be under $2 million in FY '81 dollars, weight under 7,500 pounds."

Sprey also suggests a wide range of changes in aircraft weaponry and components. Among his recommendations:

Replacing the current U.S. F–14/F–15/F–16 gun, which "uses a 1942 round that is the least effective 20mm round in the world."

The introduction of an air-to-air anti-radiation missile (ARM) to eliminate the use of radars, which can be used by enemy pilots as a self-identifying beacon for missiles to home on. "Because the enemy's radar solves the IFF problem this missile would be the only true BVR (beyond visual range) missile available. The missile would be Sidewinder-sized with only earphones (for lock-on tone) needed as fire control." Cost: $20,000.

Development of a snapshoot passive air-to-air missile, "intended to permit locking on the firing in equal or less time than required by a gun." The missile, possibly a Sidewinder variant, would include look-down ability and resistance to combined flare/maneuver countermeasures. A head-on requirement would be eliminated. Cost: $15,000.

Replacing the GAU–8 30mm cannon with a new cannon of larger caliber and higher velocity to deal with possible increased thickness of Soviet armor. One possible candidate would be built around the NATO 35mm round.

Development of a supercruise engine. "Because optimization for supersonic cruise fortunately requires more ramjet-like engines, the supercruise engine would be much simpler and a lower risk than the high cost, trouble-ridden TF30, F100, F101, or F404," according to Sprey.

Simple air-to-air radar warning receiver, which Sprey describes as "the single most important avionics item on the supercruise (or any) air-to-air fighter."

Short-squirt radar with passive angle-tracking. Sprey says "it would be useful to have a simple radar to do wide-band passive angle-tracking on an enemy fighter radar located by the . . . warning receiver and occasionally to take a short-burst range reading on the target in order to decide whether to launch an air-to-air ARM or other missile. The short burst minimizes the chance of alerting the enemy's radar warning receiver and thereby sacrificing the all-important surprise attack."

THE NEED FOR NEW STRATEGIC ARMS CONTROL INITIATIVES

Mr. CRANSTON. Mr. President, I am deeply concerned by the Reagan administration's apparent lack of a clear strategic arms control policy some 5 months into its incumbency. I believe it is very important for our Government to continue to consider arms control as an important component of our national security program. I believe this is especially important in view of the unprecedented peacetime military buildup which the administration has requested—a projected total of $1.448 trillion for defense spending over the next 6 years.

As we consider the future of nuclear arms control, I believe we must think anew on the problems which confront us in our effort to negotiate equitable, balanced, verifiable reductions in the bloated U.S. and Soviet nuclear arsenals. The currently stalled SALT process requires new initiative and creative thought if it is to be moved forward significantly in the foreseeable future.

For this reason, I welcome several recent statements on the SALT process from such scholars as Wolfgang Panofsky, George Kennan and Sidney Drell.

In a January speech on "Science, Technology and the Arms Build-Up", Dr. Panofsky, Director of the Stanford Linear Accelerator (SLAC) wrote:

In the interest of the future of mankind the kinds of practices and forces which have driven the armaments in the world to their current level must not continue . . .

After the first nuclear weapon was detonated in 1945 at Alamagordo, many observers expressed the sentiment that this new weapon would make further wars impossible, and that further buildup of stockpiles of these weapons would not occur. These prophecies have proven false. No strategic doctrine adopted officially by any power has provided a quantitative interpretation of the word coined by Kissinger, "sufficiency." No government has answered the question, When is enough enough? applied to nuclear weapons.

In principle, if there were an accepted answer to the quest for an interpretation of sufficiency, then limitation of nuclear arms could be achieved both through negotiated arms control and through unilateral action. Yet we have not seen a halt in the growth of nuclear stockpiles or the number of deployed nuclear weapons. 50,000 nuclear weap-

ons worldwide are still not "sufficient." I attribute this failure largely to disregard by governmental leaders of generally accepted technical facts on nuclear weapons . . .

To summarize, once nuclear war is initiated by any power, under any doctrine, in any theater, or for any strategic or tactical purpose, the outcome will involve truly massive casualties and devastation, leading to uncalculable effects on the future of mankind. The predictions of Science concerning the effects on large segments of the world's population of large-scale use of nuclear weapons are extremely uncertain . . .

. . . the nuclear arms race is driven by the perception of power rather than by physical realities. Unfortunately, perceptions tend to become political realities, and thus nuclear weapons become symbols of power and strength and trading objects in arms control negotiations. Such a shift of the role of nuclear weapons from threats of massive death and destruction to political tools has denied each nation a rationale for defining what nuclear weaponry is sufficient for its needs. Nuclear weapons cannot compensate for deficiencies in conventional military power. Only a continuing and insistent reminder about the technical realities can form the basis for agreements and unilateral acts leading to lowered limits on nuclear weapons deemed sufficient for national and international security. The present course is set for disaster.

Writing in the winter 1980–81 issue of International Security, Dr. Drell, Deputy Director of SLAC, and Kent Wisner of the Stanford University arms control program offer an idea to simplify the reduction of United States-Soviet nuclear arsenals by introducing the following proposal:

Effective control of long range nuclear arms is an urgent and broadly proclaimed goal for the United States and the Soviet Union. In the interest of international security we must continue efforts to negotiate a treaty that:

Enhances strategic stability based on a balance of highly survivable and secure deterrent forces, and

Initiates significant, timely, and verifiable reductions in the nuclear forces and destructive potential of both nations.

It is evident from the record of negotiations at SALT and of the related public debate during the past decade that progress toward such a goal would be greatly aided if the negotiations could proceed within a framework that is:

Conceptually simple so as to be readily explained and comprehended in the broad public debate;

Highly flexible, allowing the two countries to implement the treaty provisions by taking different steps. Indeed, the very different technological and bureaucratic styles of the U.S. and Soviet Union will necessarily lead them to follow different paths in making selective reductions. While these reductions must be equitable, they may, at the same time, be asymmetric.

In this comment we describe an approach to reducing strategic arms that meets these four requirements. Our proposal is simply to limit the total number of deployed launchers plus reentry vehicles (i.e., warheads and cruise missiles) to 10,000 for each country.

More recently, the Honorable George Kennan outlined his own bold approach to the dilemma which has seen the United States and the Soviet Union producing more and more nuclear arms while feeling less and less secure. Kennan declared the following:

Adequate words are lacking to express the full seriousness of our present situation. It is not just that we are for the moment on a collision course politically with the Soviet Union, and that the process of rational communication between the two governments seems to have broken down completely; it is also—and even more importantly—the fact that the ultimate sanction behind the conflicting policies of these two governments is a type and volume of weaponry which could not possibly be used without utter disaster for us all . . .

I can see no way out of this dilemma other than by a bold and sweeping departure—a departure that would cut surgically through the exaggerated anxieties, the self-engendered nightmares, and the sophisticated mathematics of destruction, in which we have all been entangled over these recent years, and would permit us to move, with courage and decision, to the heart of the problem.

What I would like to see the President do, after due consultation with the Congress, would be to propose to the Soviet government an immediate across-the-boards reduction by fifty percent of the nuclear arsenals now being maintained by the two superpowers—a reduction affecting in equal measure all forms of the weapon, strategic, medium range, and tactical, as well as all means of their delivery—all this to be implemented at once and without further wrangling among the experts, and to be subject to such national means of verification as now lies at the disposal of the two powers.

Mr. President, I believe each of these three statements merits serious consideration and discussion by all of us here in the Congress and by relevant executive branch officials. We must make new departures if we are to break the process of building ever more nuclear weapons—a process which George Kennan describes as being "like men in a dream, like lemmings headed for the sea."

Next week, I will reconvene the informal group of Senators who have met in recent years on a regular basis in my office to discuss strategic arms limitation issues. The speakers for this first session of the "Arms Control/National Security Study Group" for the 97th Congress will be the Honorable Paul Nitze and Dr. Sidney Drell, who will discuss alternative proposals for significantly reducing United States and Soviet nuclear arsenals. For the benefit of my colleagues who will be participating in this session, and for other interested persons, I ask unanimous consent that the full text of the three articles from which I have read be printed in the RECORD and that the text of a May 7 statement of mine before the Senate Foreign Relations Committee be printed as well.

There being no objection, the material was ordered to be printed in the RECORD, as follows:

SCIENCE, TECHNOLOGY AND THE ARMS BUILD-UP, COLLOQUIUM ON SCIENCE AND DISARMAMENT, INSTITUT FRANCAIS DES RELATIONS INTERNATIONALES, PARIS, FRANCE

(By W. K. H. Panofsky)

The arms race, in particular the nuclear weapons competition between the Soviet Union and the United States, threatens the very existence of man's civilization. Yet one must admit, albeit reluctantly, that the nuclear balance between these two powers deserves at least partial credit for the absence of all-out hostilities for the longest period in recent history. But even in the absence of total conflict, the increase of potential devastation and the growth in the number of nuclear weapons states have created tensions which increasingly overshadow all other concerns of mankind. Many hold science, which led to the release of nuclear energy, responsible for this evolution. But others look to science for the tools to reverse this threat to all humanity.

Accordingly, a discussion of the relationship of science and technology to the arms race is timely. I will here only touch upon a topic of at least equal importance—the relation of science and technology to arms control.

A. SCIENCE AND MILITARY DEVICES

The relation of science to war and preparation for war has been what I might call a love/hate relationship throughout recorded history. Let me remind you of the story of Archimedes: In the defense of Syracuse against the Romans, Archimedes reputedly devised numerous instruments of war which contributed materially to delaying Roman entry into that besieged city for many years. When the conquest of Syracuse finally took place in 212 B.C., Archimedes was engaged in "pure" science, drawing circles in the sand in studying basic geometry. When a Roman soldier approached him, Archimedes was reported to have uttered as his last words, "Don't disturb my circles." This story illustrates that scientists wish to be recognized by all, friend and foe alike, for their contributions to pure science, irrespective of whether they also play an important and at times even decisive role in providing armaments to their home country. A vexing conflict between two moral responsibilities of the scientist in relation to armaments emerges: his duty to his fatherland, on the one hand, and his responsibility to prevent the abuse of lethal weapons on the other.

This dilemma is rooted directly in the nature of the scientific process. New science and technology evolve through a long chain: Basic scientific discoveries eventually lead to the development of specific new devices, and finally to their testing, production, distribution and use.

Each of these steps offers different needs and opportunities for control by human institutions. Most scientists and non-scientists would agree that basic science motivated solely by the desire for improved understanding of nature should remain unfettered. I would maintain that, however fallible humans and their institutions may be, decisions on how to live harmoniously with nature and its products will be made more wisely with understanding of the workings of nature than without. Yet once basic new revelations are apparent, applying restraints to their potential fruits, lest they be abused for asocial ends, is difficult. In regard specifically to the military arms control problem, one finds that controls are very difficult to apply to early phases of the development chain. As a practical matter, particularly if "verification" (i.e., policing of an arms control agreement) is to be taken into account, controls can be applied primarily to the test phase of development, on the one hand, and to final deployment actions, on the other.

It has become trite to say that the rate of progress in arms control has been so small that the rate of technological advance of military systems has outpaced the gains of arms control. Yet I would argue that had technological and purely military factors been the only ones in determining the buildup of arms, then arms control efforts might well have stemmed and possibly reversed the buildup of nuclear weapons. In truth it is largely political factors that have made it infeasible thus far for arms control efforts to prevail over the arms buildup.

B. SCIENCE IN RELATION TO OTHER FACTORS DRIVING THE ARMS RACE

Evolution of the tools of war as facilitated by advances in science and technology has aggravated the action and reaction cycles between nations and has led the competi-

tion between offensive and defensive technology systems through successive stages. Yet while such cycles are clearly demonstrable, it appears that the nature of the arms competition is in fact not dominated by such direct causal factors. Examination of the history of the arms race appears to demonstrate that non-scientific factors have preempted what might be logically predicated on technical or even military grounds. For instance, if one observes the arms competition between the U.S. and the Soviet Union, one finds very few instances of demonstrable action-reaction processes. Apparently the decisions by both sides to proceed with arms acquisitions are driven by other forces. What are these?

Let me describe a few factors:

1. It appears clear that in all countries—capitalist and socialist alike—there are strong institutional pressures and interests for augmented armaments by the institutions charged with developing and producing or managing and using such arms. This commonality of pressures for arms expansion within different social systems does not mean that the sources for military expansion are identical, but it makes it indeed difficult to attribute such growth to single factors such as the profit motive, communist or imperialist expansionism, inter-service rivalry, etc., etc. We are dealing here with the institutional inertia, or other manifestations of historical persistence which are inherent in any highly organized human activity. Institutions always find it difficult to produce only a fixed and limited amount of any one commodity; the producer always rationalizes why more of what he can produce is needed.

2. A second driving force in the arms race is what I will call mirror imaging. Rather than reacting to a potential opponent's new military system by implementing specific counter measures, frequently the reaction is "We must have it too." This reaction tends to be relatively uncritical in regard to the technical merit of the item in question. The public rationale given, for instance, among other factors, for the United States to develop an improved hard-silo killer for its missile arsenal is that the Soviets have developed enough striking power to threaten preemptively the U.S. Minuteman silos; yet the public rationale for the U.S. "silo killer" missiles disclaims any intent for a "preemptive" or "first" strike. A "mirror image" response aims to silence the implied threat that the Soviets would receive political advantage and bargaining leverage out of these weapons, unless the U.S. could field a matching threat. Conversely, one of the motives for some Soviet deployment appears to be to "mirror image" the U.S. rather than to countermeasure U.S. moves. For example, the Soviets continue to upgrade the technological complexity of many of their military systems, following the U.S. lead. Yet in so doing they at times inherit the maintenance and reliability problems which have so frequently plagued the U.S. systems in the past.

Very new and frequently spectacular technology is particularly sensitive to this aspect of the arms race. For example, the militarily highly dubious development of particle-beam weapons is largely promoted by the argument that "The other side is doing it," rather than by valid military-technical arguments. The difficulty here is that the political prestige engendered by a perceived technical-military "breakthrough" is simply too valuable a commodity for decision makers to forgo, even if the true military significance is minor or non-existent.

3. Possibly the most serious driving factor in the arms race is the asymmetry of perception, resulting both in uncertainty and fear. Each side in an adversary situation tends to feel insecure and threatened by the technical developments of the opponent, particularly if the technical details are poorly known and if the doctrine under which they are developed is ambiguous. For instance, the claim that the opponent is not only striving for, but has in fact attained nuclear superiority rather than parity is being heard both from U.S. and Soviet spokesmen in the current state of U.S./Soviet relations. Such spokesmen may in fact be sincere, yet both cannot be correct. In fact most discussions on superiority tend to be based on simplistic numerology. Items which are difficult to quantify such as the reliability of allies, asymmetries in geography, access to ocean areas, the length and number of boundaries shared with potential adversaries, make "superiority" an even less tractable quality. As a result the question of "superiority" is one of perception of potential adversaries, rather than objective reality.

As a result of asymmetry of information and interpretation it is not unreasonable that both sides in the current arms buildup feel genuinely threatened. Political leaders at times react to these perceptions by "sabre-rattling," i.e. by proclaiming their military prowess "second to none" in order to reassure their constituencies. At other times, in particular when military appropriations or other allocations of resources are at stake, political leaders emphasize the "gaps" in the armor of their country, i.e. the areas of perceived deficiencies and weakness. Thus the perceived rather than the real military situation greatly affects decisions on the acquisition of military weapons.

4. The development and deployment of arms generally requires very long and frequently uncertain lead times—well over a decade elapses between development for most systems and their completion and final deployment. Thus military needs should be based on a combination of judgment of the opponent's intentions, evaluation of his current status, and on intelligence projections from that base. The validity of these projections and their accuracy are not only impaired by the basic uncertainty in foreseeing future developments and future intentions starting from known current conditions, but also by the ignorance imposed by the secrecy which shrouds these conditions. Thus it is not surprising that judgments as to future defense needs can span a very wide range between "best" and "worst" case projections. This gap is amplified by secrecy, and thus secrecy becomes a major factor in driving the arms race. I challenge national leaders, in particular those of the Soviet Union, to examine critically whether extreme secrecy on technical developments is really in the best security interest of their country, quite apart from the damage such secrecy does to basic human values, and incidentally, to the feasibility of negotiated verifiable arms control.

5. This complaint by a technical person that for the most part political and perceptual rather than technical factors have driven the arms race must in fairness be balanced by the existence of what has been designated as the technological imperative. While a vast number of technical developments are on balance beneficial, there may be a rational assessment that a certain new development, if generally adopted, might result in decreased security for all; the strategically destabilizing influence of high accuracy of ballistic missiles is a case in point. Yet prohibiting or impending the evolution of such a "counterproductive" technology under current conditions is generally infeasible. A development of what J. Robert Oppenheimer called a "technically sweet" military technology is hard to stop, either unilaterally or through negotiated arms control. Unilaterally, the argument "What will we do if the other side gets it first?" tends to prevail. In an arms control negotiation the difficulty to police the evolution of new technology in its infancy is usually a block to agreement, unless very low standards of verification are acceptable, or unless the openness of the societies involved leads automatically to public exposure.

Thus new technology tends to generate its own momentum and unilateral or negotiated control is impeded.

6. There has been much speculation on the escalating role of arms control negotiations on the weapons buildup. I will not discuss this subject here in detail. I would like to conclude, however, that the arms control efforts during the last decade have on balance led to positive results. In particular the SALT I agreement has increased world security and so has the Nuclear Non-Proliferation Treaty. Also the various achievements in less central areas of arms control have certainly made net positive contributions. In addition, the very existence of arms control discussions, even those not leading to positive results, has maintained channels of communication and has permitted exchange of data which, in the absence of such talks, would hardly have been possible.

Despite this net positive assessment of arms control effort, one should also acknowledge the negative by-products of arms control negotiations. The linkage of arms control negotiations to the political process, and in particular the extensive ratification discussions, have given undue political importance to the detailed numbers of military systems, in particular those employing nuclear weapons, which their actual technical performance does not deserve. No analyst could reliably predict a specific dependence of outcome of military conflict on the precise number of nuclear weapons now deployed. Yet as we debate as to who has gained or lost in an arms control agreement the detailed numbers gain undue significance.

It is also true that arms control agreements tend to leave "uncashed bargaining chips" on the table. When a key military system has played a politically important role in the bargaining process in arms control negotiation, then it is politically very difficult to abandon the system after the negotiation, once it has not been possible to ban its deployment as part of the agreement reached. The 54 U.S. TITANS are a case in point. Although the recent accident suggests that it might be advantageous to decommission the U.S. TITAN force, this is politically very difficult since their numbers played a significant role during the SALT II negotiation and in forming the political perception of U.S. Strengths. Similarly, it was a matter of considerable difficulty for the U.S. to discontinue the deployment of those ABM forces permitted under SALT I, however limited their strategic importance may be. The Soviets have not as yet succeeded in doing so, and are in fact putting their ABM deployment around Moscow through a new round of modernization, notwithstanding the limited potential effectiveness of this system.

The domestic debates in the United States and presumably also in the Soviet Union surrounding the arms control negotiating process also related directly to the military buildup. This matter has several diverse aspects: For instance, during the ratification process in the U.S. Senate, the price for a favorable action voiced by some senators was escalation in defense expenditures. Similarly it is maintained that an arms buildup is essential to make it possible to "bargain from strength." E.g. for many years the Soviet Union showed no interest in nuclear arms control until a very substantial nuclear arsenal was at hand.

After the Soviet Union deployed and continues to deploy their mobile and accurate

SS-20 medium-range ballistic missiles targeted against Western Europe, the U.S. proposed to station a number of missile systems which can reach the Soviet Union, on the soil of members of NATO. However, members of NATO were willing to accept these more advanced "Theatre Nuclear Force" only if the U.S. agreed to pursue negotiations with the USSR on limiting such forces.

These examples indicate how interwoven arms control and weapons buildups have become: We are hearing "no arms control unless we first arm," but also "no new arms unless we move to new arms control" voices. While such coupling may represent current political reality, it breeds cynicism among the non-nuclear nations that the efforts of the Soviet Union and the Western Allies are genuine in sealing meaningful and incisive arms control. On technical grounds there is no basis for such linkage: A good arms control agreement increases the security of all participants, irrespective of buildup in areas not controlled by the agreement.

All the above factors, combined with political developments, have led both the Soviet Union and the United States to escalate their nuclear arsenals to the potential of worldwide destruction. I should like to add, however, that the rate of growth of military expenditures of less developed countries is actually higher than those of the two superpowers, and that the fraction of GNP dedicated by some smaller nations to military pursuits is higher than that of the United States, or even that of the Soviet Union.

The two superpowers have at times, driven by the non-scientific, non-technical factors listed above, procured large and expensive systems which are only of marginal value to their security. The MIRV buildup by the United States and then by the Soviet Union is a case in point. Most would agree that the security of both countries would be greater if neither had deployed MIRV. Originally the U.S. decided to develop and deploy MIRVs primarily as a penetration aid against Soviet ARM; yet it is well known that Soviet ARM evolved at a rather slow and irregular pace. Economic arguments (cost per reentry vehicle) also played a role. Even when it became evident that Soviet ARM was not a very effective counter measure against U.S. missiles, U.S. MIRV deployment continued. The U.S. launch-based MIRV missile buildup was then matched and exceeded by the Soviet Union, even though the need for MIRV to penetrate U.S. defenses was clearly absent. Whether the Soviet motive in building up MIRV forces was to "mirror image" the U.S. buildup, or was to threaten preemptive attack against U.S. missile silos, or was simply to lengthen the potential target list, we can only surmise.

There is no doubt that had arms control efforts involving the Soviet Union and the United States led to more incisive results at earlier times, the security of both nations and of the international community would now be greater.

C. STRATEGIC DOCTRINE: LIMITED CONFLICT

There is a further factor which has militated against unilateral or successfully negotiated steps to limit deployment of strategic weapons; this is the vacillation and ambiguity of stated doctrines by the United States and the lack of clarity in the available statements of Soviet doctrine.

All declaration of U.S. strategic doctrine give highest priority to deterring initiation of nuclear war by an opponent by demonstrating to the potential initiator of such war that he faces an "unacceptable" outcome. This highest priority goal has been supplemented during various U.S. Administrations by listing additional objectives. Unfortunately, once strategic doctrine wanders beyond the limited goal of deterring nuclear war it faces severe internal inconsistencies. For instance, U.S. doctrine tends to include provisions aimed at limiting damage, or assuring that U.S. damage be less than that suffered by the adversary, in case deterrence failed. Yet a damage limiting posture tends to contravene deterrence: one nation's measures to limit damage in nuclear war generate the perception by the opponent that such a nation would be more difficult to deter from initiating nuclear conflict. Similarly extending doctrine to the use of nuclear weapons in deterring not only nuclear war but war at all levels projects the image that nuclear retaliation is threatened against even minor, non-nucelar incursion. Such a threat is hardly credible in the face of today's nuclear balance. As a matter of history, military intervention not involving nuclear weapons either by non-nuclear nations or the super-powers have not been deterred. The broadening of doctrine in either direction raises the perceived requirements for nuclear arms, and thus contributes to the arms race.

On the Soviet side the available literature is even less definite as to the priority given to deterrence in strategic doctrine; there are extensive discussions of extended nuclear warfighting sequences. Soviet leaders have made it clear that they are well acquainted with the potential horrors of nuclear war, and both Soviet and U.S. leaders continue to express great doubts whether a limited nuclear war could ever remain limited. Yet the actual development and deployment of hardware on both sides can only have a "rational" basis if its use is anticipated in connection with various limited conflicts, and if limited conflicts can remain confined.

Recently in the U.S. limited use of nuclear weapons has been emphasized more frequently in policy declarations. Part of the basis of this emphasis is "mirror imaging," citing selected Soviet sources on nuclear doctrine, and Soviet weapons deployments. The "straw man" is presented that under past doctrine U.S. leaders would have no choice but to respond to the initiation of nuclear war of some kind either by not using nuclear weapons at all, or by using them in a full-scale counter attack. This situation has never been real.

The so-called MAD (Mutual Assured Destruction) strategy has never existed as such. Rather, the option has always been available to launch parts of the force against a fraction of the listed targets, although the actual implementation of such "flexible" response can be and is being improved. Nevertheless, U.S. leaders and particularly U.S. Secretary of Defense Harold Brown, continue to emphasize that they do not believe that a limited conflict will remain limited. At the same time current doctrine is that the deterrent purpose of U.S. weapons to convince an adversary that "first use" of nuclear weapons in any situation, for any purpose, limited or comprehensive, cannot lead to an outcome favorable or acceptable to the initiator. Rigidly interpreted, such a doctrine might imply that the U.S. should be prepared to fight to "victory" any nuclear war fought for any "limited" goal set by the opponent. More liberally interpreted, this doctrine deviates very little from earlier declarations.

Although currently stated U.S. doctrine implies in fact little significant change in number and kind of weaponry, the frequent public reformulations of strategy give the false impression of truly significant changes in doctrine. This in turn gives the impression that consequently large changes in future military wapons may result from the changed doctrine—an impression that is largely false.

Once nuclear weapons are used at all in war, the ultimate impact is largely uncalculable; therefore the threat faced by mankind due to the advert and buildup of nuclear weapons is largely insensitive to announced military doctrine. This conclusion is not only based on the often-stated belief, which I share, that it is unlikely that "limited" war will stay limited, but also on the actual physical and technical effects of so-called limited exchanges.

Most analyses of limited nuclear war tend to be grossly simplistic in largely ignoring such exchanges. As an example, many studies on the use of nuclear weapons in theatre conflict do not include the effects of targeting errors or intelligence failures in identifying and locating targets. One must remember that when a CEP (Circular Error Probable) is assigned to a weapons system, this means that one-half the rounds will impact outside this error circle, and some of those impact points just might be highly populated areas. Analyses also tend to ignore the fact that in all past wars in Europe a large fraction of the population, and in particular the urban population, did not remain in cities but traveled along roads to other areas. Yet refugee casualties are rarely included in theatre nuclear war considerations. In addition, although some military doctrines discount the value of occupation of cities by troops in localized warfare, the taking of cities has been in fact a major political prize in past wars. Therefore, while the assumption is often made in limited warfare analyses that enemy columns will avoid centers of population, this is apt to be false. On top of all this, civil defense measures and evacuation, so much discussed publicly in the U.S. and implemented on a considerable scale in the Soviet Union, are apt to be highly ineffective, simplistic calculations to the contrary notwithstanding.

All these considerations indicate that the vast volume of discussions and literature on limited uses of nuclear weapons tends to disregard physical reality. No national leader should assume that he can fine-tune the use of nuclear weapons in an actual conflict. This point can possibly best be illustrated by the so-called Neutron Bomb, or more correctly, Enhanced Radiation Warhead, which has played such a large political role in Europe. The Neutron Bomb is considered as a specialized device which minimizes blast while maximizing lethal effects from radiation. In this role it is advertised to be a powerful weapon against the crews of enemy tanks, while minimizing collateral damage to friendly populations, structures, and economic assets of the country where this device is used. Yet under potential use of such a weapon the actual physical differences between the neutron bomb and other nuclear weapons are minimal. Roughly speaking, the 1-kiloton version of the U.S. Lance Enhanced Radiation Warhead produces as much neutron radiation as a "normal" 10-kiloton device would. The blast effect is still equivalent to 1,000 tons of TNT, much larger than any blockbuster of World War II. The lethal radius of the neutrons is significantly dependent on intervening structures, and there is a wide gap between a lethal radiation dose and an instantaneous disabling dose, the latter being about .20 times larger. All these physical factors together with the problems cited above (that is targeting errors, intelligence failures, and the presence of refugees in battle zones) indicate quite clearly that highly specialized use of enhanced radiation type warheads is not all that specialized. The "Enhanced Radiation" of the neutron bomb is unlikely to be exploitable.

The controversy over whether the neutron bomb will lower the nuclear threshold and thus make nuclear war more likely receives substance only if governments assume that the use of such a weapon implies consequences significantly different from the use of nuclear weapons of more usual design. In view of the previous discussion such a conclusion is fallacious.

D. DEFENSE AGAINST NUCLEAR WEAPONS

The escalation in numbers of strategic nuclear weapons by the superpowers and the decrease in stability of the strategic deterrent due to the vulnerability of land-based missile silos to accurate enemy MIRVs, have revived discussion of the need for widely or locally deployed anti-missile defenses. The Soviet Union has carried out more extensive recent development programs than has the U.S., and the Moscow ABM system is in the process of modernization. While current activities are consonant with the provision of the SALT I Treaty, expanded deployments beyond these limits would invalidate the most significant arms control agreement yet enacted by the Soviet Union and the United States.

One firm technical conclusion in the nuclear age is that the outcome of nuclear military conflict is apt to be "offense-dominated" rather than "defense-dominated." Since a single penetrating and exploding nuclear warhead does such an enormous amount of damage, the standards of interception required for defensive systems to be effective must be very high. Formal exchange calculations which compare the cost of defenses against nuclear weapons, be they air defenses or ballistic missile defenses, with the incremental cost required for the offense to cancel the effect of the defense, always show that defensive costs are higher if such calculations are carried out at relatively moderate levels of casualties. There could be specialized exceptions to this general conclusion. For example, defense of very hard-point targets like missile silos may under certain circumstances be militarily effective. However, the conclusion remains valid that, at least in reference to all currently designed systems, ABM is a poor investment for any large-scale strategic exchange, whether targets are economic or military, and is an escalatory component of the arms race.

This negative technical conclusion on the value of anti-nuclear defenses is politically difficult to accept. As a matter of psychological and political necessity, it is unpalatable to leave the homeland undefended; yet the relative impotence of defense is a de facto truth in the nuclear age. Once there is clear recognition that nuclear strategic balance is offense-dominated, an escalating and self-defeating offense-defense competition can be avoided.

E. "SUFFICIENCY"

All studies continue to show that if a large fraction of the 50,000 warheads now stockpiled worldwide—most are more powerful than those two which together killed one-quarter million people in Japan—were used in war, several hundred million people would die and immense suffering would follow. Such studies make a variety of assumptions about targets, shelter, or effectiveness of evacuation. Yet they tend to consider only the "prompt" effects of nuclear weapons—blast and early radiation, combined with radio-active fallout. The casualties induced by delayed consequences—the effect of fires, food deficiency, absence or maldistribution of medical care, societal breakdown, epidemics—are not included; they are omitted as "too difficult to calculate." Some of the long-range effects—ecological imbalances, depletion of the ozone layer, synergistic effects, and the genetics burdens—have been studied, but it is generally agreed that the unknown exceeds the known.

How, in the face of these horrendous facts, have a series of "rational" decisions led to the status quo? What reasoning has led the super-powers to conclude that their nuclear weapons stockpiles and at times even their supplies of weapons-grade nuclear raw materials are insufficient.

In the interest of the future of mankind the kinds of practices and forces which have driven the armaments in the world to their current level must not continue.

Since most of the factors discussed previously which drive the arms race are fundamentally not directly related to science and technology, remedies must be sought largely in the political arena. I would like to defend here the thesis that if the technical and scientific nature of weaponry, and particularly of nuclear weaponry, were more clearly recognized and considered by the political decision makers, then the largely non-technical factors which now drive the arms race would be greatly diminished.

After the first nuclear weapon was detonated in 1945 at Alamagordo, many observers expressed the sentiment that this new weapon would make further wars impossible, and that further buildup of stockpiles of these weapons would not occur. These prophecies have proven false. No strategic doctrine adopted officially by any power has provided a quantitative interpretation of the word coined by Kissinger, "sufficiency." No government has answered the question, When is enough enough? applied to nuclear weapons.

In principle, if there were an accepted answer to the quest for an interpretation of sufficiency, then limitation of nuclear arms could be achieved both through negotiated arms control and through unilateral action. Yet we have not seen a halt in the growth of nuclear stockpiles or the number of deployed nuclear weapons. 50,000 nuclear weapons worldwide are still not "sufficient." I attribute this failure largely to disregard by governmental leaders of generally accepted technical facts on nuclear weapons.

Too often the radically different nature of nuclear weapons and nonnuclear arms is ignored, or at least minimized by some. Conventional wisdom applied to non-nuclear weapons is that you require many more bullets than targets. For ordinary "bullets" this statement is self-evident, since a large fraction of available bullets would in fact not actually be fired in war; of those actually used, a large fraction would miss their intended targets. However, applied to nuclear weapons this homily should be far less persuasive. A nuclear weapon which misses its assigned target still does an enormous amount of damage. Since the principal aim of nuclear weapons acknowledged by all parties is to deter nuclear war, the importance of stockpiled weapons beyond those which might actually be used in a conflict is a matter of political leverage rather than military utility. It is this political role of nuclear weapons, rather than their actual potential utility in warfare, which has prevented the nations of the world from defining nuclear "sufficiency."

F. CONCLUSION

To summarize, once nuclear war is initiated by any power, under any doctrine, in any theatre, or for any strategic or tactical purpose, the outcome will involve truly massive casualties and devastation, leading to uncalculable effects on the future of mankind. The predictions of Science concerning the effects on large segments of the world's population of large-scale use of nuclear weapons are extremely uncertain.

If these facts were emphasized more often and more persuasively, then world leaders might begin to realize that such controversies as employment or non-employment of specialized weapons such as the Neutron Bomb, or the exact numbers of weapons systems permitted under arms control agreement, lack technical or military significance.

This discussion leads to the profoundly pessimistic conclusion that arms control agreements have not been successful in limiting the destructive options of war, in particular those involving nuclear weapons, since so many other forces and processes have in fact amplified the nuclear arms race. This trend must be reversed or else the future will indeed be dim.

Many remedies for this condition have been discussed and will continue to be discussed. Leading the list of remedies must be a conscientious policy decision by the nuclear nations to govern their policies in regard to nuclear weapons by true technical and military circumstances, and to minimize their justification as symbols of prestige and power.

More specific measures following from such policy might be:

1. Sufficiency. Each nuclear nation should analyze its nuclear weapons needs under a strategy solely dedicated to deter initiation of nuclear attacks by others under a variety of assumptions. Such deterrence should retain the option to counter-attack a spectrum of military and economic targets with varying degrees of severity, but not to reply in kind to all possible modes of attack the initiator of nuclear war might choose. Sites which are of limited economic or military value, and those targets which cannot be successfully attacked should be eliminated from the list of possible objectives of nuclear attack. This prescription should result in specifying the number of survivable nuclear weapons "sufficient" for national security, since in the technical sense there is indeed saturation of utility of nuclear weapons.

2. Arms Control. Concurrent with such reexamination of policy and drastically downward revision of required number and kind of weapons, arms control negotiations must be given higher priority than they have been given in the past, or even highest priority in the discussion among nations. This implies that the linkage between arms control issues and other topics of controversy between nations must be minimized. Those arms control measures should be emphasized which improve the security of both sides.

3. Unilateral Action. Based on internal examination, each nuclear nation should consider unilateral steps in decreasing nuclear armament. Among candidate items for such unilateral steps would be cutoff or reduction in the production of weapons-grade, fissionable material and the elimination of clearly redundant weapons and those weapons susceptible to first-strike attack—and therefore only useful for a first strike in themselves.

4. The Technical Nature of Nuclear Weapons. Since the current generation of decision makers in most countries lacks personal acquaintance with nuclear weapons and their effect, a renewed effort should be made within each country and internationally to disseminate fully and publicly technical facts on the nature and destructive effects of nuclear weapons. Such studies should not only emphasize what is known, but also what is unknown. International communication and exchanges among scientists, including those who have contacts with military activities, should be greatly amplified.

The hope that measures such as those listed here might lead to a halt and even reversal in the growing accumulation of nuclear arms is based on the conclusion that the nuclear arms race is driven by the perception of power rather than by physical realities. Unfortunately, perceptions tend to become political realities, and thus nuclear weapons become symbols of power and strength and trading objects in arms control negotiations. Such a shift of the role of nuclear weapons from threats of massive death and destruction to political tools has denied each nation a rationale for defining what nuclear weaponry is sufficient for its needs. Nuclear weapons cannot compensate for deficiencies in conventional military power. Only a continuing and insistent reminder about the technical realities can form the basis for agreements and unilateral acts leading to lowered limits on nuclear weapons deemed sufficient for national and international security. The present course is set for disaster.

[International Security, Winter 1980–1]

A NEW DIRECTION FOR NUCLEAR ARMS CONTROL

BY SIDNEY D. DRELL AND VENT F. WISNER

Effective control of long range nuclear arms is an urgent and broadly proclaimed goal for the United States and the Soviet Union. In the interest of international security we must continue efforts to negotiate a treaty that:

Enhances strategic stability based on a balance of highly survivable and secure deterrent forces, and

Inititates significant, timely, and verifiable reductions in the nuclear forces and destructive potential of both nations.

It is evident from the record of negotiations at SALT and of the related public debate during the past decade that progress toward such a goal would be greatly aided if the negotiations could proceed within a framework that is:

Conceptually simple so as to be readily explained and comprehended in the broad public debate;

Highly flexible, allowing the two countries to implement the treaty provisions by taking different steps. Indeed, the very different technological and bureaucratic styles of the U.S. and Soviet Union will necessarily lead them to follow different paths in making selective reductions. While these reductions must be equitable, they may, at the same time, be asymmetric.

In this comment we describe an approach to reducing strategic arms that meets these four requirements. Our proposal is simply to limit the total number of deployed launchers plus reentry vehicles (i.e., warheads and cruise missiles) to 10,000 for each country.

"L+RV"≤10,000

Three important static measures of effectiveness of strategic forces are the:

1. Numbers of launchers.
2. Numbers of warheads.
3. Throw-weight (or megatonnage).

In addition, there are four critical measures of effectiveness that depend upon the R&D, modernization, and testing programs that each country pursues, as well as on the nature of their deployed forces and on their overall balance. For the individual systems these are the:

4. Accuracy.
5. Reliability.
6. Pre-launch survivability.
7. Ability to penetrate to target.

The SALT II treaty puts equal aggregate limits on the first measure; i.e., numbers of launchers. However, the treaty as signed, though not ratified, constrains the second measure only indirectly by putting a large maximum on the permitted warhead fractionation (14 RVs per SLBM and 10 per ICBM along with a freeze on current force loadings per type of ICBM). The net result is that growing concern remains about criterion (6) for fixed land-based ICBMs. Furthermore, the treaty limits are perceived by some to be unequal because of the larger size of Soviet ICBMs. This concern has led, on the one hand, to broad opposition to SALT II within the U.S. and, on the other hand, to a very complex structure of negotiated provisions that has dulled the overall impact of the treaty and obscured the recognition that the sum total of its provisions are equitably balanced. Evidently, numerical limits on launchers alone provide an inadequate basis for continuing negotiations. Our starting point recognizes the importance of limiting the numbers of warheads directly and more effectively. In particular, by specifying a limit on the total number of "L+RV" we have the important and desirable effect of driving each side away from the automatic choice of the maximum warhead loading per missile or launcher that is physically possible, or permitted by treaty.

Our proposal concerns itself only with the static measures of effectiveness on grounds of simplicity and flexibility in the negotiating process. The value of negotiating limits on qualitative improvements of strategic forces, such as (4) and (5), is widely recognized. Measure (7), in particular, would be assured for missiles as long as the SALT I treaty limiting ballistic missile defenses is in force. However, it seems to us that in the present political and negotiating climate the probability of making timely progress will be enhanced by limiting the scope of issues to simple counting rules which also provide a basis for effective arms control.

One might consider including measure (3), that is limits on throw-weight (or megatonnage, or volume of the missiles and bombers), in our proposal as well. This is both unnecessary and undesirable. It is unnecessary for two reasons. The first reason is that, given the present level of destructive potential in U.S. and Soviet arsenals, the warheads' yields are far less significant measures of effectiveness than are their accuracies which will continue to improve with allowed testing and modernization programs. This is especially true for hard-point targeting, with high accuracies, either already achieved or anticipated, are rapidly making throw-weight and megatonnage almost meaningless indicators of strategic efficacy. The second reason is that the "L+RV" weighting already includes in its count any additional warheads that are deployed in order to exploit a throw-weight advantage. It would also be undesirable to include throw-weight as a parameter in the limits because such a provision would emphasize precisely those differences in technological style and sophistication between the U.S. and Soviet Union that we are seeking to downplay on grounds of simplicity as well as balance. For example, the Soviet Union has deployed its "heavy" SS–18 ICBM with 10 warheads, the same number which the U.S. plans for the new MX missile now being developed. Although the throw-weight of the MX is approximately one-half that of the SS–18s, the MX incorporates the most modern technology and by no rational measure can be judged to be a less effective weapon system than the SS–18. As a consequence, we exclude throw-weight from the "L+RV" counting system because it is neither sufficiently flexible nor simple to meet our initial criteria.

An even simpler proposal than "L+RV" might be to limit only the total number of RVs without accounting for launcher numbers. However, we see this as posing two difficulties:

1. There is little practical difference between a limit on "L+RV" and a limit on RVs alone when comparing highly MIRVed missiles. The difference shows up effectively only in the weighting of single-RV missiles relative to highly MIRVed ones. For example, should one Soviet SS–18 or one U.S. MX with 10 warheads be given equal weight as 10 single-warhead MM II missiles, or should 2 SS–18s or MXs with an "L+RV" weight of 22 be balanced against 11 MM IIs? The later seems to be a more realistic balance of their strategic values. In particular, a single-RV missile has no need for a MIRV bus to carry and dispense the individual warheads to different targets. Therefore, it can devote a larger fraction of its throw-weight to deliverable megatonnage and should be given a higher weighting, as we have proposed by the "L+RV" formula. Furthermore, there is a very much smaller probability that all of a large number of single-RV missiles will fail than there is of one highly MIRVed missile with the same number of warheads. Hence the former deserve greater weight because of this increased insurance against failure.

2. It is a sudden and large wrench from the approach so far at SALT of counting launchers. It may be an eventual goal after achieving an "L+RV" agreement which provides for some continuity with our negotiating record at SALT thus far.

We now describe an example of what could emerge as balanced U.S. and Soviet deployments from our proposal. It is likely that reductions of the magniture suggested here would require the formal or informal agreement by the U.S. and Soviet Union to some corollary limits on theater or "gray area" systems such as the Tu-26 Backfire aircraft, the SS–20 IRBMs, and the U.S. forward-based systems in NATO, but they are ignored in our example for the sake of TWF a requirement (prerequisite) for any significant cuts proposal. Also for continuity we stay below the individual limits of the SALT II treaty, However, our proposal does not require SALT II. It should be stressed that the only purpose of this example is to illustrate the virtues of an arms control agreement which uses "L+RV" as a basis for counting strategic systems. These virtues are, above all:

1. Reductions in the numbers of very highly fractionated MIRV launchers which pose the primary threat against pre-launch survivability of silo-based missiles;
2. Substantial reductions in total throw-weight, numbers of warheads, and numbers of launchers; and,
3. Simplicity.

TABLE 1.—SOVIET UNION

System	Launchers		Reentry vehicles	L+RV total
SS–18	200	(× 10)	2,000	2,200
SS–19 mobile	400	(× 6)	2,400	2,800
SS–17 mobile	100	(× 4)	400	500
New single-RV ICBM	400	(× 1)	400	800
Delta II and III—16 SSBN's	[1] 256	(× 3)	768	1,024
Delta I—5 SSBN's	[2] 60	(× 1)	60	120
Yankee—10 SSBN's	[3] 160	(× 1)	160	320
Typhoon—8 SSBN's	192	(× 7)	1,344	1,536
Long range bombers	140	(× 4)	560	700
Total	1,908		8,092	10,000

[1] SS–N–18.
[2] SS–N–8.
[3] SS–N–6/SS–NX–17.

Table 1 illustrates a possible distribution of Soviet forces under the proposal. The SS–19 and SS–17 may be presumed to be based in a mobile mode. The distribution of SLBMs and SSBNs is only one of many conceivable ways of sizing the sea-based forces to a subtotal of "L+RV"=3000.

Under the "L+RV" formula, the SS–18 would be an extremely "expensive" strategic system (1 launcher plus 10 warheads=11). The 308 "heavy ICBMs" which the Soviets will soon have deployed under the SALT II provisions would put 34 percent of their total allowed "L+RV" in only 308 aimpoints. Such a highly unbalanced deployment would put too large a portion of their force at risk to a preemptive first strike. Clearly, the incentive is to move away from the SS–18 and place greater emphasis on a larger number of launchers that are "cheaper" by these counting rules, such as the SS–19s and SS–17s (1 launcher plus 6 RVs=7 and 1 launcher plus 4 RVs=5, respectively) as well as single-RV missiles. The MIRVed ICBM launchers and RVs in this example (700 and 4800, respectively) comprise 55 percent of the Soviet "L+RV" total but are substantially below the projections under SALT II ceilings of 820 and 5800–6000, respectively (depending on the relative numbers of SS–19s and SS–17s which are deployed). Under an "L+RV" formula the Soviet Union could continue to favor heavily its overall land-based ICBMs for geopolitical, technological, and climatic reasons. At the same time, the Soviet Union would very likely reduce its heavy and highly MIRVed

ICBMs by a substantial amount even without a treaty ceiling requiring them to selectively reduce these forces. In the specific example their total of ICBM MIRVs threatening U.S. ICBM silos is reduced by more than 1000 although the reduction could very well be by a significantly larger amount if their bomber force grows and is loaded with cruise missiles (ALCMs).

TABLE 2.—UNITED STATES

System	Launchers		Reentry vehicles	L+RV total
MM III	350	(x3)	1,050	1,400
MM II	319	(x1)	319	638
MX	150	(x10)	1,500	1,650
Trident-10 SSBN's	[1] 240	(x7)	1,680	1,920
Poseidon-14 SSBN's	[2] 224	(x7)	1,568	1,792
Long range bombers	100	(x4)	400	500
Cruise missile carrier	100	(x20)	2,000	2,100
Total	1,483		8,517	10,000

[1] C-4 or D-5.
[2] C-4.

Table 2 illustrates a possible distribution of U.S. forces under the proposal. The MX could be deployed in either a land-mobile "Linear Grid" or a Smallsub-Underwater-Mobile (SUM) mode.

In the U.S. example we have included the MX deployed in a land-mobile, linear-grid mode and reduced its projected total by 50 missiles, and hence by 23 x 50=1150 shelters or aimpoints. This reduction matches the comparably reduced number of threatening Soviet ICBM MIRVs. (As currently planned, approximately 50 percent of the grid deployment must survive an attack of 2 RVs per shelter.) Although the development of the MX missile itself is moving ahead toward first flight test in 1983, a final decision as to its basing has yet to be made. An alternative of basing the MX at sea on many small, near-coastal submarines (the Smallsub-Underwater-Mobile or "SUM" deployment mode) is still under discussion and is being anayized further, in particular by the Congressional Office of Technology Assessment.

The SUM basing mode would require fewer MX missiles to achieve the same target coverage as the linear grid deployment. This difference is due to the fact that the linear grid deployment is sized for approximately 50 percent survivability against a Soviet attack, whereas the SUM system is designed for 70 percent "at sea" availability of the missiles and submarines. Thus a grid basing mode would be more "expensive" under the "L+RV" restriction since it requires a greater number of missiles (by some 35, for a total "L+RV" count of 11 x 35=385) for an equally survivable deployment. In any case, under an arms control agreement which uses "L+RV" as its basis for limitations, the United States would have a strong lever with which to control the Soviet threat to the linear grid. Without such a control there would be no assurance that such a system, or any land-based multiple protective shelter deployment, would catch up to a Soviet threat that could continue to grow in numbers of RVs capable of destroying hardened missile shelters.

When the two hypothetical force postures in our example are paired against one another, the 1050 MARK 12A warheads on 350 Minuteman III missiles plus 1500 extremely accurate new MX warheads will appear, from the Soviet perspective, as threatening their 700 MIRVed and 300 single-warhead ICBM launch sites. Faced with such a large theoretical preemptive threat to their fixed silos, the Soviet Union would have a very strong incentive to deploy their light ICBMs in a mobile mode also. Hence, in our example, the SS-19s and SS-17s are assumed to be mobile, as allowed by SALT II. An alternative Soviet response could be to give up some ICBMs in exchange for more bombers.

Large aircraft loaded with many air-launched cruise missiles (ALCMs) are "costly" under our counting regime. Thus, in our example the average payload for an ALCM carrier has been reduced from a permitted maximum of 28 to 20 cruise missiles per aircraft. A larger number of ALCMs could be accommodated within our proposal if the MX missiles were deployed in a SUM system rather than in the grid. As noted earlier, fewer MXs would be required in SUM for the same target coverage. Furthermore, SUM will contribute to survivable U.S. megatonnage in proportion to the level of deployment, in contrast to the grid which must be sized to the number of threatening Soviet RVs. Therefore, there would be complete freedom to mix between the levels of ALCM and MX deployments in a SUM basing mode. Although the ALCM force is quite accurate, it is a slowly reacting force and hence not a potential first-strike weapon.

For the purposes of our analysis, the U.S. SSBN fleet is fitted entirely with Trident missiles (I or II) loaded with 7 MIRVs each. The "L+RV" weighting measure, in effect, drives the U.S. away from the highly fractionated Poseidon C-3 (with up to 14 RVs) currently deployed on Poseidon submarines and encourages the SLBM force modernization with Trident missiles.

Overall, the U.S. force posture in our example places less than 20% of its "L+RV" total in any one ballistic missile system. In keeping with a traditional emphasis on sea-based forces, 55% of the American warheads would be based at sea if MX were deployed in a SUM mode (38% if the linear grid is used). The important point to emphasize here is that this counting procedure is flexible enough to allow the different domestic traditions and institutional influences in the United States and the Soviet Union to steer their nuclear weapons programs. At the same time this proposal accomplishes significant reductions as well as limitations on the level of nuclear arms.

This proposal might be viewed as prejudicial against the United States because the U.S. would be reducing its total warheads by a larger number from currently planned totals than the Soviet Union. But a closer look at the nature of the reductions is necessary. Although the U.S. is decreasing greater numbers of reentry vehicles below projected SALT II limits, the Soviet Union is reducing warheads of greater yield. Furthermore, although throw-weight was consciously excluded from the reduction formula, the Soviet advantage in MIRVed ICBM throw-weight is actually decreased, because the missiles which become the most "expensive" under the "L+RV" limit also carry the most throw-weight. Specifically, in our example the Soviet Union would reduce more than 1,800 kilopounds in planned MIRVed ICBM throw-weight, while the U.S. would reduce less than 900 kilopounds. In fact, the U.S. reduction is less than 500 kilopounds if one discounts the 50 MX missiles which the United States would not be demobilizing, but in reality would simply not be building. Thus the numerical reductions of "L+RV" also diminish the Soviet advantage in ICBM throw-weight.

The "L+RV" formula proposed here should be attractive to both the United States and the Soviet Union. The Soviet Union would have a way of making the newest U.S. MX and ALCM deployments very "costly," while the United States would have a way of inducing reductions in the threateningly large and highly MIRVed Soviet ICBM force. And, as shown in our examples, the "L+RV" formula is capable of impressive accomplishments as an arms control measure if it is implemented with reasonable speed; that is, within approximately five years. The most salient of these accomplishments would be substantial reductions on both sides:

1. In the number of MIRVed ICBM warheads threatening the survivability of land-based forces;

2. In the level of planned ICBM MIRVed throw-weight;

3. In the number of deployed launchers that are allowed under the SALT II treaty and in the total number of RVs.

These examples also illustrate that, while achieving this progress, the "L+RV" formula can allow domestic bureaucratic, organizational, and institutional influences to structure stable, though not necessarily identical, force postures.

At its outset, SALT focused on launchers alone. A decade later we now recognize the importance as well as the possibility of including numbers of RVs along with the launchers in a simple and effective treaty. We leave for a later date the consideration of a shift of criteria to embrace other parameters and variables, both quantitative and qualitiative, which may acquire greater importance at much lower levels of force deployments than now under discussion.

ADDRESS BY THE HONORABLE GEORGE F. KENNAN ON THE OCCASION OF HIS RECEIVING THE ALBERT EINSTEIN PEACE PRIZE

SALUTATION

A person would have to be wholly insensitive, or perhaps selfless to the point of saintliness, in order not to be moved by such an honor as the Einstein Foundation is conferring on me today. I am neither of those things; so I am naturally deeply gratified and appreciative. On the other hand, I cannot help but have my doubts as to whether I have fully deserved it. And for that reason I can look on it only as a mark of confidence and of encouragement—encouragement to myself and to a great many other people—encouragement to continue to do what little may be in our power to assure that we of this generation, here and elsewhere, do not, in deference to our military fears, commit the supreme sacrilege of putting an end to the civilization out of which we have grown, the civilization which has made us what we are, the civilization without which our children and grandchildren can have no chance for self-realization, possibly no chance for life itself. This, as I see it, is the task to which the Einstein Foundation has devoted itself. Beside it, all personal considerations ought to fade into insignificance. I am grateful for the opportunity to associate myself publicly with this cause. And I am grateful for the admonition which the award implies: the admonition to neglect nothing—no effort, no unpleasantness, no controversy, no sacrifice—which could conceivably help to preserve us from committing this fatal folly.

What can we do?

Adequate words are lacking to express the full seriousness of our present situation. It is not just that we are for the moment on a collision course politically with the Soviet Union, and that the process of rational communication between the two governments seems to have broken down completely; it is also—and even more importantly—the fact that the ultimate sanction behind the conflicting policies of these two governments is a type and volume of weaponry which could not possibly be used without utter disaster for us all.

For over thirty years wise and far-seeing people have been warning us about the futility of any war fought with nuclear weapons and about the dangers involved in their cultivation. Some of the first of these voices to be raised were those of great scientists, including outstandingly that of Albert Einstein himself. But there has been no lack of others. Every president of this country, from Dwight Eisenhower to Jimmy Carter, has tried to remind us that there could be no such thing as victory in a war fought with such weapons. So have a great many other eminent persons.

When one looks back today over the his-

tory of these warnings, one has the impression that something has now been lost of the sense of urgency, the hopes, and the excitement that initially inspired them, so many years ago. One senses, even on the part of those who today most acutely perceive the problem and are inwardly most exercised about it, a certain discouragement, resignation, perhaps even despair, when it comes to the question of raising the subject again. The danger is so obvious. So much has already been said. What is to be gained by reiteration? What good would it now do? Look at the record. Over all these years the competition in the development of nuclear weaponry has proceeded steadily, relentlessly, without the faintest regard for all these warning voices. We have gone on piling weapon upon weapon, missile upon missile, new levels of destructiveness upon old ones. We have done this helplessly, almost involuntarily: like the victims of some sort of hypnotism, like men in a dream, like lemmings heading for the sea, like the children of Hamlin marching blindly along behind their Pied Piper. And the result is that today we have achieved, we and the Russians together, in the creation of these devices and their means of delivery, levels of redundancy of such grotesque dimensions as to defy rational understanding.

I say redundancy. I know of no better way to describe it. But actually, the word is too mild. It implies that there could be levels of these weapons that would not be redundant. Personally, I doubt that there could. I question whether these devices are really weapons at all. A true weapon is at best something with which you endeavor to affect the behavior of another society by influencing the minds, the calculations, the intentions, of the men that control it; it is not something with which you destroy indiscriminately the lives, the substance, the hopes, the culture, the civilization, of another people. What a confession of intellectual poverty it would be—what a bankruptcy of intelligent statesmanship—if we had to admit that such blind, senseless acts of destruction were the best use we could make of what we have come to view as the leading elements of our military strength! To my mind, the nuclear bomb is the most useless weapon ever invented. It can be employed to no rational purpose. It is not even an effective defense against itself. It is only something with which, in a moment of petulance or panic, you commit such fearful acts of destruction as no sane person would ever wish to have upon his conscience.

How have we got ourselves into this dangerous mess?

Let us not confuse the question by blaming it all on our Soviet adversaries. They have, of course, their share of the blame, and not least in their cavalier dismissal of the Baruch Plan so many years ago. They too have made their mistakes; and I should be the last to deny it. But we must remember that it has been we Americans who, at almost every step of the road, have taken the lead in the development of this sort of weaponry. It was we who first produced and tested such a device; we who were the first to raise its destructiveness to a new level with the hydrogen bomb; we who introduced the multiple warhead; we who have declined every proposal for the renunciation of the principle of "first use;" and we alone, so help us God, who have used the weapon in anger against others, and against tens of thousands of helpless non-combatants at that.

I know that reasons were offered for some of these things. I know that others might have taken this sort of a lead, had we not done so. But let us not, in the face of this record, so lose ourselves in self-righteousness and hypocrisy as to forget our own measure of complicity in creating the situation we face today.

What is it then, if not our own will, and if not the supposed wickedness of our opponents, that has brought us to this pass?

The answer, I think, is clear. It is primarily the inner momentum, the independent momentum, of the weapons race itself—the compulsions that arise and take charge of great powers when they enter upon a competition with each other in the building up of major armaments of any sort.

There are those who will agree, with a sigh, to much of what I have just said, but will point to the need for something called deterrence. This is, of course, a concept which attributes to others—to others who, like ourselves, were born of women, walk on two legs, and love their children, to human beings, in short—the most fiendish and inhuman of tendencies. But all right: accepting for the sake of argument the profound iniquity of these adversaries, no one could deny, I think, that the present Soviet and American arsenals, presenting over a million times the destructive power of the Hiroshima bomb, are simply fantastically redundant to the purpose in question. If the same relative proportions were to be preserved, something well less than twenty per cent of these stocks would surely suffice for the most sanguine concepts of deterrence, whether as between the two nuclear superpowers or with relation to any of those other governments that have been so ill-advised as to enter upon the nuclear path. Whatever their suspicions of each other, there can be no excuse on the part of these two governments for holding, poised against each other and poised in a sense against the whole northern hemisphere, quantities of these weapons so vastly in excess of any rational and demonstrable requirements.

This is nothing new. I am a diplomatic historian. I see this same phenomenon playing its fateful part in the relations among the great European powers as much as a century ago. I see this competitive build-up of armaments conceived initially as a means to an end but soon becoming the end itself. I see it taking possession of men's imagination and behavior, becoming a force in its own right, detaching itself from the political differences that initially inspired it, and then leading both parties, invariably and inexorably, to the war they no longer know how to avoid.

This is a species of fixation, brewed out of many components. There are fears, resentments, national pride, personal pride. There are misreadings of the adversary's intentions—sometimes even the refusal to consider them at all. There is the tendency of national communities to idealize themselves and to dehumanize the opponent. There is the blinkered, narrow vision of the professional military planner, and his tendency to make war inevitable by assuming its inevitability. Tossed together, these components form a powerful brew. They guide the fears and the ambitions of men. They seize the policies of governments and whip them around like trees before the tempest.

Is it possible to break out of this charmed and vicious circle? It is sobering to recognize that no one, at least to my knowledge, has yet done so. But no one, for that matter, has ever been faced with such great catastrophe, such inalterable catastrophe, at the end of the line. Others, in earlier decades, could befuddle themselves with dreams of something called "victory." We, perhaps fortunately, are denied this seductive prospect. We have to break out of the circle. We have no other choice.

How are we to do it?

I must confess that I see no possibility of doing this by means of discussions along the lines of the negotiations that have been in progress, off and on, over this past decade, under the acronym of SALT. I regret, to be sure, that the most recent SALT agreement has not been ratified. I regret it, because if the benefits to be expected from that agreement were slight, its disadvantages were even slighter; and it had a symbolic value which should not have been so lightly sacrificed. But I have, I repeat, no illusion that negotiations on the SALT pattern—negotiations, that is, in which each side is obsessed with the chimera of relative advantage and strives only to retain a maximum of the weaponry for itself while putting its opponent to the maximum disadvantage—have no illusion that such negotiations could ever be adequate to get us out of this hole. They are not a way of escape from the weapons race; they are an integral part of it.

Whoever does not understand that when it comes to nuclear weapons the whole concept of relative advantage is illusory—whoever does not understand that when you are talking about absurd and preposterous quantities of overkill the relative sizes of arsenals have no serious meaning—whoever does not understand that the danger lies not in the possibility that someone else might have more missiles and warheads than we do but in the very existence of these unconscionable quantities of highly poisonous explosives, and their existence, above all, in hands as weak and shaky and undependable as those of ourselves or our adversaries or any other mere human beings: whoever does not understand these things is never going to guide us out of this increasingly dark and menacing forest of bewilderments into which we have all wandered.

I can see no way out of this dilemma other than by a bold and sweeping departure—a departure that would cut surgically through the exaggerated anxieties, the self-engendred nightmares, and the sophisticated mathematics of destruction, in which we have all been entangled over these recent years, and would permit us to move, with courage and decision, to the heart of the problem.

President Reagan recently said, and I think very wisely, that he would "negotiate as long as necessary to reduce the numbers of nuclear weapons to a point where neither side threatens the survival of the other." Now that is, of course, precisely the thought to which these present observations of mine are addressed. But I wonder whether the negotiations would really have to be at such length. What I would like to see the President do, after due consultation with the Congress, would be to propose to the Soviet government an immediate across-the-boards reduction by fifty percent of the nuclear arsenals now being maintained by the two superpowers—a reduction affecting in equal measure all forms of the weapon, strategic, medium range, and tactical, as well as all means of their delivery—all this to be implemented at once and without further wrangling among the experts, and to be subject to such national means of verification as now lie at the disposal of the two powers. Whether the balance of reduction would be precisely even—whether it could be construed to favor statistically one side or the other—would not be the question. Once we start thinking that way, we would be back on the same old fateful track that has brought us where we are today. Whatever the precise results of such a reduction, there would still be plenty of overkill left—so much so that if this first operation were successful, I would then like to see a second one put in hand to rid us of at least two thirds of what would be left.

Now I have, of course, no idea of the scientific aspects of such an operation; but I can imagine that serious problems might be presented by the task of removing, and dis-

posing safely of, the radioactive contents of the many thousands of warheads that would have to be dismantled. Should this be the case, I would like to see the President couple his appeal for a fifty-percent reduction with the proposal that there be established a joint Soviet-American scientific committee, under the chairmanship of a distinguished neutral figure, to study jointly and in all humility the problem not only of the safe disposal of these wastes but also the question of how they could be utilized in such a way as to make a positive contribution to human life, either in the two countries themselves or—perhaps preferably—elsewhere. In such a joint scientific venture we might both atone for some of our past follies and lay the foundation for a more constructive relationship.

It will be said: this proposal, whatever its merits, deals with only a part of the problem. This is perfectly true. Behind it there would still lurk the serious political differences that now divide us from the Soviet government. Behind it would still lie the problems recently treated, and still to be treated, in the SALT forum. Behind it would still lie the great question of the acceptability of war itself, any war, even a conventional one, as a means of solving problems among great industrial powers in this age of high technology. What has been suggested here would not prejudice the continued treatment of these questions just as today, in whatever forums and under whatever safeguards the two powers find necessary. The conflicts and arguments over these questions could all still proceed to the heart's content of all those who view them with such passionate commitment. The stakes would simply be smaller; and that would be a great relief to all of us.

What I have suggested is, of course, only a beginning. But a beginning has to be made somewhere; and if it has to be made, it is best that it should be made where the dangers are the greatest, and their necessity the least. If a step of this nature could be successfully taken, people might find the heart to tackle with greater confidence and determination the many problems that would still remain.

It will be argued that there would be risks involved. Possibly so. I do not see them. I do not deny the possibility. But if there are, so what? Is it possible to conceive of any dangers greater than those that lie at the end of the collision course on which we are now embarked? And if not, why choose the greater—why choose, in fact, the greatest—of all risks, in the hopes of avoiding the lesser ones?

We are confronted here, my friends, with two courses. At the end of the one lies hope—faint hope, if you will—uncertain hope, hope surrounded with dangers, if you insist. At the end of the other lies, so far as I am able to see, no hope at all. Can there be—in the light of our duty not just to ourselves (for we are all going to die sooner or later) but of our duty to our own kind, our duty to the continuity of the generations, our duty to the great experiment of civilized life on this rare and rich and marvelous planet—can there be, in the light of these claims on our loyalty, any question as to which course we should adopt?

In the final week of his life, Albert Einstein signed the last of the collective appeals against the development of nuclear weapons that he was ever to sign. He was dead before it appeared. It was an appeal drafted, I gather, by Bertrand Russell. I had my differences with Russell at the time, as I do now in retrospect; but I would like to quote one sentence from the final paragraph of that statement, not only because it was the last one Einstein ever signed, but because it sums up, I think, all that I have to say on the subject. It read as follows: "We appeal, as human beings to human beings: Remember your humanity, and forget the rest."

STATEMENT OF SENATOR ALAN CRANSTON

I welcome this first opportunity for this committee to learn the views of the Reagan Administration on very important arms control issues.

I have joined Senators Pressler, Pell and Percy in urgently requesting this hearing because of my concern that sensitive defense and foreign policy decisions have been made and are being made by the Reagan Administration with little or no attention being paid to the role of arms control in advancing our national security interests.

The Administration abruptly scrapped the March 25 meeting of the Standing Consultative Commission which monitors SALT compliance. Various Administration officials have issued contradictory statements on the vital question of interim SALT compliance. And decisions have been made on Theatre Nuclear Force reduction negotiations without adequate consultation with this committee—which will of course have to consider ratification of any treaty which emerges from such negotiations. The Administration has also failed to live up to its publicly stated commitment to consult with Senator Pell, Senator Pressler and me on the nominations of the Director of the Arms Control and Disarmament Agency and the chief U.S. arms control negotiator.

These issues need to be discussed and examined.

The Administration is currently embarked upon our largest peace time military buildup in history. The Reagan Administration projects defense spending totalling $1.448 trillion for a six-year total outlay. I for one believe that this enormous defense budget increase—which is inherently inflationary—could represent the greatest threat to the Administration's economic program. Successful arms control efforts could reduce this burden and this threat.

The Administration has no mandate for an arms race. As we move forward with our defense purchases and as the Administration begins to outline its foreign policy, we need to consider carefully the role of arms control in these efforts.

EXPENSES OF OFFICE OF CIVIL RIGHTS

Mr. HATCH. Mr. President, I wish to add a few remarks to the statement of Senator ZORINSKY upon his introduction of S. 1091, of which I am principal cosponsor.

The Office of Civil Rights of the Department of Education is empowered under and charged by the Department of Education Organization Act to oversee the operation of Federal civil rights laws in education. In the pursuit of equal educational opportunity the Office not only investigates complaints referred to it, of which there are some 3,000 annually, but it also initiates on its own, without prior complaints, over 200 wideranging, much more extensive investigations called "compliance reviews." Both complaint investigations and compliance reviews involve considerable expense, including lost time, by the responding institutions. However the Office of Civil Rights has heretofore been constrained in its investigatory activities only by the staff limitations imposed by its own budget. It has not been concerned with the cost of its activities to those it regulates because it has not been responsible for those costs.

As we would expect, therefore, the Office has turned into a spendthrift with regard to the time and resources of our educational agencies and schools. It has become profligate in the information it requires from all schools, whether under suspicion or not; it has become inquisitorial in its compliance reviews, conducting exhaustive searches to try to manufacture, often of the flimsiest materials, a case against the hapless subject. All this it does without the most basic duty to account for the burden it imposes.

S. 1091 is designed to correct these excesses. It does no more than make the Office of Civil Rights responsible for paying the reasonable expenses of complying with its investigations, whether complaint investigations, compliance reviews, or under some other name. I note here that the bill does not provide for reimbursement of the expense of remedial action required of institutions because of the investigations. Thus if the Office desires a volume from each local agency, it can expect to pay for a volume.

As the very healthy result, the Office will be required to view all of its activities on a cost/benefit basis, as it should. Only where it is convinced detailed information is necessary and beneficial will it require the production of same—where it has no reason to believe the information would reveal a violation, it will presumably direct its funds to other investigations deemed more profitable.

The moneys to be used in the payment for these investigatory expenses come straight from the regular appropriation of the Office of Civil Rights—no increased appropriation is necessary.

I ask the support of my colleagues for S. 1091. Its importance lies not only in the restriction of unreasonable regulation and reporting, but in its imposition of fiscal responsibility upon our National Government.

MESSAGES FROM THE PRESIDENT

Messages from the President of the United States were communicated to the Senate by Mr. Saunders, one of his secretaries.

EXECUTIVE MESSAGES REFERRED

As in executive session, the Acting President pro tempore laid before the Senate messages from the President of the United States submitting sundry nominations which were referred to the appropriate committees.

(The nominations received today are printed at the end of the Senate proceedings.)

MESSAGE FROM THE HOUSE

At 2:11 p.m., a message from the House of Representatives, delivered by Mr. Berry, one of its clerks, announced that

the House has passed the following bill, without amendment:

S. 1213. An act to amend title I of the Marine Protection, Research, and Sanctuaries Act, as amended.

The message also announced that the House has passed the following bills, in which it requests the concurrence of the Senate:

H.R. 3239. An act to amend the Communications Act of 1934 to authorize appropriations for the administration of such act, and for other purposes; and

H.R. 3240. An act to authorize appropriations for fiscal year 1982 for the administration of the National Telecommunications and Information Administration.

HOUSE BILL REFERRED

The following bill was read the first and second times by unanimous consent, and referred as indicated:

H.R. 3240. An act to authorize appropriations for fiscal year 1982 for the administration of the National Telecommunications and Information Administration; to the Committee on Commerce, Science, and Transportation.

HOUSE BILL PLACED ON CALENDAR

The following bill was read twice by unanimous consent, and placed on the calendar:

H.R. 3239. An act to amend the Communications Act of 1934 to authorize appropriations for the administration of such act, and for other purposes.

EXECUTIVE AND OTHER COMMUNICATIONS

The following communications were laid before the Senate, together with accompanying papers, reports, and documents, which were referred as indicated:

EC–1350. A communication from the Deputy Secretary of Defense, transmitting, pursuant to law, six reports of violations of the Anti-Deficiency Act; to the Committee on Appropriations.

EC–1351. A communication from the Deputy Assistant Secretary of Defense (Military Personnel Policy), transmitting, pursuant to law, a report on special pay for duty subject to hostile fire for calendar year 1980; to the Committee on Armed Services.

EC–1352. A communication from the Acting Comptroller General of the United States, transmitting, pursuant to law, a report entitled "Improved Work Measurement Program Would Increase DOD Productivity"; to the Committee on Armed Services.

EC–1353. A communication from the Executive Director of the United States Olympic Committee, transmitting, pursuant to law, the calendar year 1980 financial report of the Committee; to the Committee on Commerce, Science, and Transportation.

EC–1354. A communication from the Acting Under Secretary of Energy, transmitting, pursuant to law, the third of the semiannual reports on activities undertaken by the Department of Energy to implement the alternative fuels production portion of the Interior and Related Appropriations Act for fiscal year 1980; to the Committee on Energy and Natural Resources.

EC–1355. A communication from the Acting Comptroller General of the United States, transmitting, pursuant to law, a report entitled "Minerals Management At The Department of the Interior Needs Coordination and Organization"; to the Committee on Energy and Natural Resources.

EC–1356. A communication from the Acting Comptroller General of the United States, transmitting, pursuant to law, a report entitled "The Department of Energy Needs Better Procedures for Selecting a Contractor To Operate Argonne National Laboratory"; to the Committee on Energy and Natural Resources.

EC–1357. A communication from the Acting Administrator of the Energy Information Administration, Department of Energy, transmitting, pursuant to law, the summary volume of Volume Three of the Energy Information Administration 1980 annual report to the Congress; to the Committee on Energy and Natural Resources.

EC–1358. A communication from the Acting Administrator of the Energy Information Administration, Department of Energy, transmitting, pursuant to law, a report entitled "Performance Profiles of Major Energy Producers, 1979"; to the Committee on Energy and Natural Resources.

EC–1359. A communication from the Secretary of the Interior, transmitting, pursuant to law, the second public lands program report entitled "Managing the Nation's Public Lands"; to the Committee on Energy and Natural Resources.

EC–1360. A communication from the Deputy Assistant Secretary of the Army (Civil Works), transmitting, pursuant to law, a report entitled "Projects Recommended for Deauthorization—6th Annual Report"; to the Committee on Environment and Public Works.

EC–1361. A communication from the Acting Comptroller General of the United States, transmitting, pursuant to law, a report entitled "Congressional Action Needed To Provide A Better Focus On Water-Related Research Activities"; to the Committee on Environment and Public Works.

EC–1362. A communication from the Fiscal Assistant Secretary of the Treasury, transmitting, pursuant to law, the Annual Report of the Secretary of the Treasury on the State of the Finances, Fiscal Year 1980; to the Committee on Finance.

EC–1363. A communication from the Acting Comptroller General of the United States, transmitting, pursuant to law, a report entitled "Assessing the Impact of Federal and State Taxes on the Domestic Minerals Industry"; to the Committee on Finance.

EC–1364. A communication from the Acting Comptroller General of the United States, transmitting, pursuant to law, a report entitled "Millions Can be Saved by Improving the Productivity of State and Local Governments Administering Federal Income Maintenance Assistance Programs"; to the Committee on Finance.

EC–1365. A communication from the Acting Deputy Assistant Secretary for Administration of the Department of Housing and Urban Development, transmitting, pursuant to law, a report on the establishment of a new Privacy Act system of records; to the Committee on Governmental Affairs.

EC–1366. A communication from the Acting Deputy Assistant Secretary for Administration of the Department of Housing and Urban Development, transmitting, pursuant to law, a report on the establishment of a new Privacy Act system of records; to the Committee on Governmental Affairs.

EC–1367. A communication from the Secretary of Energy, transmitting, pursuant to law, the results of an investigation of allegations against the Administrator, Southwestern Power Administration, Tulsa, Oklahoma; to the Committee on Governmental Affairs.

EC–1368. A communication from the Deputy Assistant Secretary of Defense for Administration, transmitting, pursuant to law, a report on a new Privacy Act system of records; to the Committee on Governmental Affairs.

EC–1369. A communication from the Acting Comptroller General of the United States, relating to inadequate salary levels, irregular pay adjustments, and distorted pay interrelationships of top Federal employees; to the Committee on Governmental Affairs.

EC–1370. A communication from the Secretary of Defense, transmitting, pursuant to law, the semiannual report of the Inspector General; to the Committee on Governmental Affairs.

EC–1371. A communication from the Chairman of the Council of the District of Columbia, transmitting, pursuant to law, a copy of legislation adopted by the Council and signed by the Mayor; to the Committee on Governmental Affairs.

EC–1372. A communication from the Secretary of Education, transmitting, pursuant to law, the annual report of the Department's freedom of information activities; to the Committee on the Judiciary.

EC–1373. A communication from the Executive Director of the Marine Mammal Commission, transmitting, pursuant to law, the Commission's annual report under the Freedom of Information Act; to the Committee on the Judiciary.

EC–1374. A communication from the Acting Commissioner of Immigration and Naturalization transmitting, pursuant to law, 676 reports on visa petitions accorded third and sixth preference classification; to the Committee on the Judiciary.

EC–1375. A communication from the Secretary of the Smithsonian Institution, transmitting, pursuant to law, a copy of the annual report of the Daughters of the American Revolution; to the Committee on Rules and Administration.

EC–1376. A communication from the Director of the Office of Management and Budget, Executive Office of the President, transmitting, pursuant to law, a cumulative report on budget rescissions and deferrals, dated June 1, 1981; pursuant to the order of January 30, 1975, referred jointly to the Committee on Appropriatioins and the Committee on the Budget.

EC–1377. A communication from the Deputy Assistant Secretary of Defense (Installations and Housing), transmitting, pursuant to law, a report on 12 construction projects to be undertaken by the Air National Guard; to the Committee on Armed Services.

EC–1378. A communication from the Assistant Attorney General (Antitrust Division), transmitting, pursuant to law, a report on a study of the various agreements between Government and private industry under the Defense Production Act of 1950; to the Committee on Banking, Housing, and Urban Affairs.

EC–1379. A communication from the Secretary of Transportation, transmitting a draft of proposed legislation to amend the Federal Railroad Safety Act of 1970 to extend authorization for appropriations; to the Committee on Commerce, Science, and Transportation.

EC–1380. A communication from the Secretary of the Interior, transmitting, pursuant to law, a report on applications by Shell Oil Company and Amax Petroleum Company for refunds of excess royalty payments; to the Committee on Energy and Natural Resources.

EC–1381. A communication from the Secretary of Health and Human Services, transmitting, pursuant to law, an annual report on actions taken to recruit and train Indians for positions which are subject to preference under Indian preference laws; to the Committee on Governmental Affairs.

EC–1382. A communication from the Vice Chairperson of the Merit Systems Protection

Board, transmitting, pursuant to law, the annual report on the study of appeals of Board decisions for fiscal year 1980; to the Committee on Governmental Affairs.

EC–1383. A communication from the Mayor of the District of Columbia, transmitting a draft of proposed legislation to provide for improvements in the local planning process in the District of Columbia, a transfer of authority over certain purely local planning activities to the government of the District of Columbia, and for other purposes; to the Committee on Governmental Affairs.

EC–1384. A communication from the Chairman of the Council of the District of Columbia, transmitting, pursuant to law, copies of legislation adopted by the Council on May 19, 1981; to the Committee on Governmental Affairs.

EC–1385. A communication from the Chairman of the Council of the District of Columbia, transmitting, pursuant to law, copies of legislation adopted by the Council on May 19, 1981; to the Committee on Governmental Affairs.

EC–1386. A communication from the Chairman of the Council of the District of Columbia, transmitting, pursuant to law, copies of legislation adopted by the Council on May 19, 1981; to the Committee on Governmental Affairs.

EC–1387. A communication from the Chairman of the Council of the District of Columbia, transmitting, pursuant to law, copies of legislation adopted by the Council on May 19, 1981; to the Committee on Governmental Affairs.

EC–1388. A communication from the Chairman of the Council of the District of Columbia, transmitting, pursuant to law, copies of legislation adopted by the Council on May 19, 1981; to the Committee on Governmental Affairs.

EC–1389. A communication from the Secretary of the Postal Rate Commission, transmitting, pursuant to law, the annual report of the Commission on their administration of the Freedom of Information Act for calendar year 1980; to the Committee on the Judiciary.

EC–1390. A communication from the Acting Comptroller General of the United States, transmitting, pursuant to law, a report entitled "Cost Cutting Measures Possible If Public Health Service Hospital System Is Continued"; to the Committee on Labor and Human Resources.

EC–1391. A communication from the Administrator of the General Services Administration, transmitting, pursuant to law, a report on the annual report of the Federal Council on Aging for 1979; to the Committee on Labor and Human Resources.

PETITIONS AND MEMORIALS

The following petitions and memorials were laid before the Senate and were referred or ordered to lie on the table as indicated:

POM–179. A resolution adopted by the General Court of the Commonwealth of Massachusetts; to the Committee on Agriculture, Nutrition, and Forestry:

"RESOLUTION

"Whereas, the use of tobacco products by human beings according to indisputable medical evidence directly leads to debilitating and often terminal disease of the users; and

"Whereas, the social costs of such disease caused to said users of tobacco products are reflected in the suffering of those afflicted, their families and their friends; and

"Whereas, the economic costs of such disease caused to said users of tobacco products amount to billions of dollars a year in increased health care costs, decreases in work productivity and other loss due to accident; and

"Whereas, the taxpayers of this Nation through the United States Department of Agriculture are subsidizing the growing of tobacco in an annual amount of at least eighty million dollars a year; and

"Whereas, it is the role of Government of the United States to protect the welfare of all of its citizens physically and economically; therefore be it

"*Resolved*, That the General Court respectfully urge the United States Congress to enact legislation this year to end all Federal subsidies for the growing of tobacco; and be it further

"*Resolved*, That copies of these resolutions be transmitted forthwith by the Clerk of the House of Representatives to the President of the United States, the Presiding Officer of each branch of the Congress, and to each Member thereof from the Commonwealth."

POM–180. A resolution adopted by the House of Representatives of the State of Missouri; to the Committee on Appropriations:

"RESOLUTION

"Whereas, over the next several months Congress will begin considering the consolidation of forty separate health, education, and social service programs into four "blocks" of money to be allocated to the states; and

"Whereas, "Block Grants" transfer money, administrative authority, control over regulations, and the decision-making about allocating funds from the federal government to the state government; and

"Whereas, in addition to this transfer of funds, the Reagan Administration is proposing a twenty-five percent cut in the levels of funding for these programs; and

"Whereas, the Block Grants would replace or reduce funds for many programs which are of direct benefit to the poor, including community health and mental health clinics, fuel assistance for the poor, legal services, adoption and foster care, and aid to local public schools; and

"Whereas, the Block Grants provide funds to the states with very little federal guidance or protection, including no civil rights requirements, no citizen participation requirements, no requirement that states submit applications and nothing requiring formal review by local citizens or state legislatures;

"*Now, therefore, be it resolved* that this Honorable Missouri House of Representatives hereby requests of our United States Congress that the Block Grant appropriations currently being considered by Congress include provisions that shall require open hearings, thorough review by citizens and most importantly formal approval of state legislatures; and

"*Be it further resolved* that all Block Grant programs must include provisions to insure that citizens have full protection and established procedures for appealing illegal or arbitrary actions by governmental agencies; and

"*Be it further resolved* that all Block Grant programs must include provisions that funds shall be administered with strict adherence to the fundamental standards of accountability and openness to the public; and

"*Be it finally resolved* that the Chief Clerk of the Missouri House of Representatives be instructed to prepare properly inscribed copies of this resolution to be transmitted to the Chief Clerk of the United States House of Representatives, the Secretary of the United States Senate, the Majority Leader of the United States Senate, the Minority Leader of the United States Senate, the Speaker of the United States House of Representatives, and to all members of the Missouri Congressional Delegation."

POM–181. A resolution adopted by the Sixteenth Guam Legislature; to the Committee on Armed Services:

"RESOLUTION No. 74

"Be it resolved by the Legislature of the Territory of Guam:

"Whereas, Guam is a U.S. territory strategically situated in the Western Pacific Ocean; and

"Whereas, Guam is directly adjacent to the U.S. Navy's Seventh Fleet Operations area; and

"Whereas, American trade with Asian-Pacific countries now exceeds in value that with Western Europe and this trend is expected to continue making control of the Pacific by the American Navy essential to our economic freedom and our national defense; and

"Whereas, the Pacific Fleet has increasing responsibilities in Southeast Asia and the Indian Ocean which makes relocation of the fleet's ships from the U.S. West Coast a logical, economical, and practical action; and

"Whereas, Guam's capability to accommodate additional forces is also evident in existing naval and military base infrastructure such as harbor facilities including thirty-two deep water major ship berths, eighteen of which have a complete cold iron capability, a large floating dry dock now in operation, compressed air service, electrical power, fresh and salt water connections, shore steam, compressed air service and sewage connections which are all available at the harbor, plus, a modern ship repair facility and skilled work force, a naval supply depot, a naval magazine utilized at present at less than one-third (⅓) its capacity, extensive fuel storage, one of four major Naval Communications Area Master Stations worldwide located on Guam, a naval air station, full personnel support including the world's largest overseas commissary, fifth largest Navy Exchange in the Navy Resale System, modern recreation facilities, including two new gymnasiums opened within the last eighteen months; and

"Whereas, U.S. naval facilities in Guam are presently underutilized resulting in substantial excess capacity at Ship Repair Facility, Naval Hospital, recreation and housing facilities; and

"Whereas, Guam strategically lies within a 1500-mile radius of the Pacific-Asia theater, thus giving-making it a base of operation with an effective striking capability of potential adversaries; and

"Whereas, being America's westernmost territory, making Guam a focal point of military activities is making long term investment in American strength in the Western Pacific not subject to the fickle winds of international politics and foreign governments; and

"Whereas, the Sixteenth Guam Legislature is in support of homeporting of Navy ships on Guam because of the strategic as well as the economic advantages it will bring to the territory and the U.S. Navy, including the savings resulting from utilizing existing facilities, the protection of American balance of payments and the stimulus it will give to Guam's economy; and

"Whereas, homeporting of Navy ships at Guam offers the best guarantee to continuing economic viability of Navy's vital Ship Repair Facility and Regional Naval Medical Center during peacetime, thereby assuming the readiness of these facilities in case of war; and

"Whereas, Guam, as an American territory, offers military personnel and their families all amenities of a progressive American community, including a fully accredited public and private school system, medical personnel specializing in all critical fields, community recreation programs and facilities, employment opportunities for military dependents, the U.S. dollar of common currency, and English as the common language; now, therefore, be it

"*Resolved*, that in view of the current world political and military climate, the Sixteenth Guam Legislature requests that the President, Congress and the Department of Defense consider the distribution of the Pacific Fleet and locate naval resources in the logical location, Apra Harbor in Guam; and be it further

"*Resolved*, that the Commander-in-Chief, U.S. Pacific Fleet, is urged to consider Guam for homeporting of additional ships in the naval facilities available but currently underutilized; and be it further

"*Resolved*, that the Sixteenth Guam Legislature urges the immediate consideration of a plan to homeport an aircraft carrier and such other naval vessels on Guam as required to provide a greater defense posture for the United States in Asia and the Pacific; and be it further

"*Resolved*, that the Speaker certify to and the Legislative Secretary attest the adoption hereof and that copies of the same be thereafter transmitted to the President of the United States; to the U.S. Secretary of Defense; to the U.S. Secretary of State; to the Secretary of the Navy; to all members of the Joint Chiefs of Staff; to all members of Armed Forces Committee, U.S. Senate; to all members of Armed Forces Committee, U.S. House of Representatives; to all members of Foreign Affairs Committee, U.S. Senate; to all members of Foreign Affairs Committee, U.S. House of Representatives; to the Commander, Naval Forces Marianas; to Washington's Delegate, Antonio B. Won Pat, U.S. House of Representatives; and to the Governor of Guam."

POM–182. A resolution adopted by the Central Pacific Conference of the United Church of Christ, relative to the production of chemical weapons by the United States Government; to the Committee on Armed Services.

POM–133. A resolution adopted by the Fourteenth Legislature of the Virgin Islands; to the Committee on Energy and Natural Resources:

Resolution No. 1034

"FOURTEENTH LEGISLATURE OF THE VIRGIN ISLANDS OF THE UNITED STATES

"Whereas H–2 and H–4 aliens (temporary workers and their dependents) have contributed significantly to the development of the Virgin Islands economy; and

"Whereas these aliens were brought to the Virgin Islands at the behest of local businessmen to augment the labor force during a period of rapid economic development in the 1960's and early 1970's; and

"Whereas in the succeeding years these aliens have developed deep ties to the local community, have become taxpayers, and have made many cultural and economic contributions to the Virgin Islands; and

"Whereas many children have been born in the Virgin Islands of these aliens and are citizens of the United States; and

"Whereas despite their many contributions, H–2 and H–4 aliens are denied access to various social services, H–4 aliens are excluded from job opportunities, and all must deal with a multitude of oppressive rules and regulations, living under the constant threat of deportation through no fault of their own; and

"Whereas the "Virgin Islands Nonimmigrant Alien Adjustment Act of 1981", as introduced into the Congress of the United States, seeks to remedy these injustices; and

"Whereas the bill is cost-effective and otherwise financially beneficial to the Virgin Islands in that the costs of legal fees now expended on Suspension of Deportation and other immigration cases would significantly decrease and could be directed elsewhere, costs of certification paperwork and man hours by employers and the Immigration and Naturalization Service would decrease, improved job opportunities for the aliens would be beneficial to the entire economy, and the anticipated costs to the government for litigation over possibly illegal restrictions and regulations would be eliminated; Now, therefore,

"*Be it resolved* by the Legislature of the Virgin Islands:

"Section 1. It is the sense of the Legislature of the Virgin Islands "Virgin Islands Nonimmigrant Alien Adjustment Act of 1981" is justified on both humanitarian and economic grounds and should be given prompt and favorable support.

"Section 2. The Legislature of the Virgin Islands hereby urges the Congress and the President of the United States to adopt the "Virgin Islands Nonimmigrant Alien Adjustment Act of 1981".

"Section 3. Copies of this Resolution shall be forwarded forthwith to the President of the United States, the Vice President of the United States as Presiding Officer of the Senate, the Speaker of the House of Representatives, the Virgin Islands Delegate to the House of Representatives, and members of the House and Senate Judiciary Committees."

POM–184. A resolution adopted by the Sixteenth Guam Legislature; to the Committee on Energy and Natural Resources:

"RESOLUTION NO. 67

"Be it resolved by the Legislature of the Territory of Guam:

"Whereas, Delegate Antonio B. Won Pat has introduced to the 97th Session of the Congress of the United States H.R. 1872, which is an act to waive visa requirements for certain alien visitors to Guam; and

"Whereas, the beneficiaries of this proposed legislation would only be persons temporarily visiting Guam for business or pleasure; and

"Whereas, the passage of H.R. 1872, with certain amendments, would facilitate the expeditious entrance into Guam of tourists from the Asian area in increasing numbers; and

"Whereas, tourism is an industry whose development continues to provide economic stimulus for the territory at a time when the general economic outlook for Guam is not bright; and

"Whereas, tourist traffic to Guam from other Asian destinations helps our visitors to better understand America, Guam being the showcase of American democracy at the doorstep to countries with lesser personal freedoms; and

"Whereas, the stability of the entire trans-Pacific air route is greatly dependent upon increased traffic between Guam and the Republic of the Philippines; and

"Whereas, such visitors pose no threat to national immigration control such visitors cannot easily continue on to the U.S. mainland, Guam not being a designated port of entry to the United States; and

"Whereas, any aliens intending to illegally overstay their stated visit to Guam could not easily do so without almost immediate detection; and

"Whereas, an effective method for Congress to gauge local sentiment on this matter would be to hold public hearings locally by a committee or subcommittee of the United States Congress; and

"Whereas, a case in point is the recommendation, at this point in time, that H.R. 1872 be amended to provide for Guam Only visas or entry permits, rather than no visa at all; now, therefore, be it

"*Resolved*, that the Sixteenth Guam Legislature, on behalf of the people of Guam, hereby respectfully requests that the Congress of the United States hold public hearings on this matter in Guam to determine other possible recommendations that would satisfy the position of Guam and, at the same time, provide safeguards against violations of the U.S. immigration laws; and be it further

"*Resolved*, that the Speaker certify to and the Legislative Secretary attest the adoption hereof and that copies of the same be thereafter transmitted to Delegate A. B. Won Pat; to the Speaker of the House of Representatives; to the members, Committee on Foreign Affairs and Committee on the Judiciary of the House of Representatives; to the President of the Senate; to the members, Committee on Foreign Relations and Judiciary Committee of the U.S. Senate; to the President of the United States; to the Secretary of State; and the Governor of Guam."

POM–185. A concurrent resolution adopted by the Legislature of the State of Texas; to the Committee on Energy and Natural Resources:

"HOUSE CONCURRENT RESOLUTION

"Whereas, The State of Texas has an abundant supply of natural gas, and exploration and development of this plentiful natural resource continues to result in the discovery of additional natural gas reserves; and

"Whereas, When the Congress of the United States enacted the Powerplant and Industrial Fuel Use Act of 1978, it prohibited the use of natural gas as a primary energy source by new "major fuel-burning installations" and certain existing major fuel-burning installations and required the discontinuance after January 1, 1982, of the use of natural gas for certain illuminating purposes; and

"Whereas, These artificial restrictions on marketing natural gas will inhibit the development of new gas production and prevent a stronger reliance on free market forces in determining which fuels should be used; and

"Whereas, These prohibitions, as provided in Sections 202, 302, and 402 of the Act, place a financial burden on Texas industries and many of its citizens, whose reliance on natural gas is greater than any other area of this country; now, therefore, be it

"*Resolved* by the House of Representatives, the Senate concurring, That the 67th Texas Legislature hereby respectfully memorialize the Congress of the United States to repeal the restrictions on natural gas use in Sections 202, 302, and 402 of the Powerplant and Industrial Fuel Use Act of 1978 (42 U.S.C.A. Sections 8312, 8342, and 8372); and, in the case of facilities which remain subject to the Powerplant and Industrial Fuel Use Act of 1978, to establish a new exemption to permit use of natural gas in conjunction with coal for the purpose of environmental compliance; and, be it further

"*Resolved*, That the Texas Secretary of State forward official copies of this resolution to the President of the Senate and the Speaker of the House of Representatives of the United States Congress with the request that this resolution be officially entered in the Congressional Record as a memorial to the Congress of the United States."

POM–186. A joint resolution adopted by the Legislature of the State of Colorado; to the Committee on Energy and Natural Resources:

"SENATE JOINT RESOLUTION NO. 13

"Whereas, Continuing uncertainty of oil supply in the Middle East threatens the strategic and economic security of the United States; and

"Whereas, The national dependence on imported oil has reached an alarming percentage of our total petroleum requirements; and

"Whereas, The enormous oil shale resources in Colorado and Utah can provide a large and secure source of liquid fuel which can greatly offset unreliable foreign supplies; and

"Whereas, The ability to provide for off-

site location of plant sites, processed shale disposal, and other oil shale facilities can enhance efficient resource recovery and sound environmental planning and is in the public interest; and

"Whereas, In order to become more energy self-sufficient and have the ability to produce adequate supplies of petroleum products for our nation, it is essential that the nation's industries be authorized by the Congress of the United States to employ the most efficient technological resource recovery systems available; now, therefore,

"Be It Resolved by the Senate of the Fifty-third General Assembly of the State of Colorado, the House of Representatives concurring herein, That we, the members of the Fifty-third General Assembly of the State of Colorado, do urge the members of the Congress of the United States from the states of Colorado and Utah and the Governors of Colorado and Utah to support the passage of federal legislation to permit the Secretary of the Department of the Interior to grant surface only" uses on federal lands to serve as oil shale plant sites or areas for the disposal of overburden and processed shale and other special uses.

"Be It Further Resolved, That copies of this Resolution be sent to the President of the Senate and the Speaker of the House of Representatives of the Congress of the United States and to each member of the Congress of the United States from the states of Colorado and Utah, to the Governors of the states of Colorado and Utah, and to the Secretary of the Department of Interior."

POM–187. A resolution adopted by the Mendocino County, California Board of Supervisors, urging the repeal of section 301 of the Powerplant and Industrial Fuel Use Act; to the Committee on Energy and Natural Resources.

POM–188. A resolution adopted by the Senate of the State of Colorado; to the Committee on Environment and Public Works:

"SENATE MEMORIAL NO. 1

"Whereas, The United States Army Corps of Engineers is charged with administering the 'dredge and fill' program on the navigable waters of the United States pursuant to section 404 of the federal Clean Water Act of 1977; and

"Whereas, The federal regulations promulgated pursuant to the act provide for regulation of wetlands in direct contravention of clearly expressed congressional intent; and

"Whereas, The Corps' administration of the wetlands program in the state of Colorado has been carried out in such a manner as to constitute an abuse of the Corps' discretionary authority; and

"Whereas, The Corps' officials charged with administering the wetlands program have been arbitrary and capricious in their targeting of specific counties for the enforcement of permit requirements under section 404; and

"Whereas, The Corps' has been reluctant to cooperate with county and local governments in administering the program and has imposed unnecessary and unexplained delays in the issuance of permits; and

"Whereas, The Corps' has been inconsistent in its designations of wetlands and has denied directly affected private landowners and citizens of the state an opportunity to participate in the mapping designations made by the Corps; and

"Whereas, Such mapping of private land constitutes a land use planning decision and as such is an invasion of an area of governmental decision-making traditionally and appropriately reserved for local governments; and

"Whereas, The Corps' has failed to recognize and to exempt from the permit requirements of the program certain statutorily exempt activities; and

"Whereas, This oppressive regulatory activity threatens the state of Colorado's management of its water resources, adversely affects the agricultural, construction, and housing industries in the state and ercdes the rights of property owners in Colorado; now, therefore,

"Be It Resolved by the Senate of the Fifty-third General Assembly of the State of Colorado: That the Congress of the United States is hereby memcrialized to:

"(1) Redefine navigable waters for purposes of the Clean Water Act of 1977 to include only those waters used or susceptible of being used in their natural condition as a means to transport interstate or foreign commerce;

"(2) Eliminate the jurisdiction of the Corps of Engineers over man-made wetlands created as a result of present or past irrigation of the land;

"(3) Restrict the expansion of federal government authority over nonnavigable waters.

"Be it further resolved, That copies of this Memorial be transmitted to the President of the Senate and the Speaker of the House of Representatives of the Congress of the United States and to each member of the Colorado Congressional delegation."

POM–189. A resolution adopted by the American Fishing Tackle Manufacturers Association, supporting President Reagan's program for economic recovery; to the Committee on Finance.

POM–190. A resolution adopted by the Central Pacific Conference of the United Church of Christ, relative to military aid to El Salvador; to the Committee on Foreign Relations.

POM–191. A resolution adopted by the General Court of the Commonwealth of Massachusetts; to the Committee on Governmental Affairs:

"RESOLUTIONS MEMORIALIZING THE CONGRESS OF THE UNITED STATES TO AMEND CERTAIN FEDERAL SOCIAL WELFARE ENABLING STATUTES

"Whereas, the error rate which occurs within the federally funded cash and social assistance programs administered for the benefit of low income persons often results in adjustment or repayments made from the various States to the Federal Government which exceeds the actual rate of error; therefore be it

"Resolved, That the General Court of Massachusetts respectfully urges the Congress of the United States to enact legislation which limits adjustments and repayments owed to the Federal Government to the actual rate of error; and be it further

"Resolved, That copies of these resolutions be transmitted forthwith by the Clerk of the Senate to the Presiding Officer of each branch of the Congress and to the Members thereof from this Commonwealth."

POM–192. A resolution adopted by the City Council of Rialto, California, expressing its support of efforts by the Federal Administration to return powers to local entities and urging a careful implementation of those efforts in ways that will enhance, not further impede, home rule; to the Committee on Governmental Affairs.

POM–193. A resolution adopted by the City Council of Hidden Hills, California, expressing its support of efforts by the Federal Administration to return powers to local entities and urging a careful implementation of those efforts in ways that will enhance, not impede, home rule; to the Committee on Governmental Affairs.

POM–194. A resolution adopted by the D.C. Federation of Civic Associations, Inc., relating to bond issues in the District of Columbia; to the Committee on Governmental Affairs.

POM–195. A resolution adopted by the New Jersey delegates to the White House Conference on Aging, opposing any cuts or reductions in programs that affect the elderly; to the Committee on Labor and Human Resources.

POM–196. A resolution adopted by the Dallas County Court of Commissioners, recommending the continuation of the CETA program; to the Committee on Labor and Human Resources.

POM–197. A resolution adopted by the National Association of the Physically Handicapped, Inc., relative to Department of Transportation regulations on transportation of the handicapped; to the Committee on Labor and Human Resources.

POM–198. A resolution adopted by the Fourteenth Guam Legislature; to the Committee on Labor and Human Resources:

FOURTEENTH LEGISLATURE OF THE VIRGIN ISLANDS OF THE UNITED STATES

"Whereas President Reagan's Administration has proposed the elimination or severe cutbacks in the funding of many social programs, among them programs under the auspices of the Comprehensive Employment and Training Act (CETA); and

"Whereas many Virgin Islanders, most of them young and unskilled, are currently receiving benefits from the affected social programs as well as on-the-job training in programs partially funded by CETA; and

"Whereas CETA and other social programs have had beneficial effects on the Virgin Islands by providing many other job skills with which they become productive, tax-paying members of society and thereby avoid being forced to look to welfare programs for financial aid; and

"Whereas elimination of the CETA and other social training programs would have a severe negative effect, both socially and economically, on the Virgin Islands; Now, Therefore,

"Be it Resolved by the Legislature of the Virgin Islands:

"Section 1. The legislature of the Virgin Islands hereby expresses its concern and strong opposition to any elimination or cutbacks in Comprehensive Employment and Training Act programs and other social programs.

"Section 2. Copies of this Resolution shall be forwarded immediately upon its approval to the President of the United States, the Vice President of the United States as President of the Senate, the Speaker of the House of Representatives, the Virgin Islands Delegate to Congress, the Chairman of the Senate Committee on Labor and Human Resources and the Chairman of the House Committee on Education and Labor.

POM–199. A concurrent resolution adopted by the Legislature of the State of New Hampshire; to the Committee on Labor and Human Resources:

"SENATE CONCURRENT RESOLUTION NO. 7

"Whereas, Public Law 94–142, the federal special education law, mandates that each child receive a free and appropriate public education; and

"Whereas, the costly mandates of Public Law 94–142 have resulted in a projected $6,651,000 deficit in state funds for education of the handicapped for fiscal year 1981; and

"Whereas, the federal government is funding the implementation of this mandate for special education programs with only about 25 percent of the amount proposed in the original federal legislation; and

"Whereas, this is one more example of Congress' increasing state and local taxation by imposing mandates without committing the funds necessary to carry out the mandates; and

"Whereas, this unaffordable burden should not be imposed on the state by the federal government; now, therefore, be it

"Resolved by the Senate, the House of Representatives concurring:

"That the Congress of the United States is hereby urged to immediately pass legislation which will change the federal mandate for special education to provide for the full reimbursement of any federally mandated state expenditures for special education; and

"That copies of this resolution be forwarded by the secretary of state to the President of the United States, the President of the United States Senate, the Speaker of the United States House of Representatives, the Administrator of General Services of the United States and the members of the New Hampshire congressional delegation."

POM-200. A resolution adopted by the General Court of the Commonwealth of Massachusetts; to the Committee on Energy and Natural Resources:

"RESOLUTIONS MEMORIALIZING THE CONGRESS OF THE UNITED STATES TO DECLARE A MORATORIUM ON THE LICENSING OF NUCLEAR PLANTS UNTIL EMERGENCY EVACUATION PLANS ARE DEVELOPED

"Whereas, the dangers to people residing and working in areas in which nuclear plants are located have resulted in said people expressing their great concern, by vote, and otherwise, to the legislators representing said areas, with the dangers to their lives, safety and health created by said plants; therefore be it

"Resolved, That the general court respectfully urges the Congress of the United States to declare a moratorium on the licensing of any nuclear plant until full and complete emergency evacuation plans covering a fifteen mile radius of said plant are developed and approved by the United States office of Civil Defense; and be it further

"Resolved, That copies of these resolutions be forwarded by the clerk of the House of Representatives to the presiding officer of each branch of the Congress and to the members thereof from the commonwealth."

POM-201. A resolution adopted by the General Court of the Commonwealth of Massachusetts; to the Committee on Finance:

"RESOLUTION MEMORIALIZING THE CONGRESS OF THE UNITED STATES TO EXPAND MEDICARE BENEFITS

"Whereas, the First Annual Silver-Haired Legislature of Massachusetts convened at the State House in Boston on August seventeeth, nineteen hundred and eighty; and

"Whereas, the Members of the Silver-Haired Legislature expressed deep concern for elderly persons on fixed incomes who are burdened by the inflated costs of eye examinations, eye glasses, dental care, prescriptions, hearing aids, voice boxes and health examinations; and

"Whereas, the Silver-Haired Legislature voted to urge State and National Government leaders to take appropriate remedial action; therefore be it

"Resolved, That the General Court of Massachusetts hereby urges the Congress of the United States to immediately enact legislation to expand the benefits of the medicare program, so-called, to include benefits to cover the cost of eye examinations, eye glasses, dental care, prescriptions, hearing aids, voice boxes, health examinations and other medical costs not presently covered by medicare; and be it further

"Resolved, That copies of these resolutions be transmitted forthwith by the clerk of the Senate to the President of the United States, the presiding officer of each branch of the Congress and to each member thereof from this commonwealth."

POM-202. A resolution adopted by the General Court of the Commonwealth of Massachusetts; to the Committee on the Judiciary:

"RESOLUTIONS MEMORIALIZING THE CONGRESS OF THE UNITED STATES TO ENACT LEGISLATION CREATING A COMMISSION TO OBSERVE THE 200TH ANNIVERSARY OF THE UNITED STATES CONSTITUTION

"Whereas, the Founding Fathers of this Nation signed the United States Constitution on Monday, September seventeenth, seventeen hundred and eighty-seven; and

"Whereas, the two hundredth anniversary of the signing will be September seventeenth, nineteen hundred and eighty-seven; and

"Whereas, the Congress of the United States is now considering the creation of a national commission to observe the bicentennial of that historic event; and

"Whereas, Massachusetts patriots played a prominent role in fostering the basic values of freedom that resulted in the founding of the United States Constitution; and

"Whereas, preparation for this bicentennial affords the people an opportunity to review these values in historical perspective; and

"Whereas, it is historically appropriate that the Commonwealth of Massachusetts assume its traditional leadership by encouraging the observation of the bicentennial of the Constitution; therefore be it

"Resolved, That the General Court of Massachusetts endorses the enactment of Federal legislation by the Congress of the United States to create a national commission to observe the bicentennial of the United States Constitution; and be it further

"Resolved, That a copy of these resolutions be transmitted forthwith by the clerk of the Senate to the President of the United States, the presiding officer of each branch of the Congress and to each member thereof from this commonwealth."

POM-203. A resolution adopted by the House of Representatives of the Commonwealth of Massachusetts; to the Committee on Banking, Housing, and Urban Affairs:

"RESOLUTIONS MEMORIALIZING THE CONGRESS OF THE UNITED STATES NOT TO DENY FEDERAL FUNDS TO MUNICIPALITIES BECAUSE OF THEIR ADOPTION OF RENT CONTROL

"Whereas, some Massachusetts communities have chosen to adopt rent and eviction controls; and

"Whereas, rent controls are efforts to deal with a lack of affordable and decent rental housing; and

"Whereas, the shortage of such rental housing, aggravated by a rash of condominium conversions, has increased; and

"Whereas, an attempt is being made in the Congress to punish local communities that have adopted rent control by denying them certain Federal housing funds; and

"Whereas, the Massachusetts House has a historic record in favor of home rule; and

"Whereas, the Massachusetts House of Representatives opposes any congressional attempt to punish Massachusetts communities that have adopted rent control; therefore be it

"Resolved, That the Massachusetts House of Representatives respectfully urges the Congress of the United States not to withhold Federal funds from Massachusetts communities because of their adoption of rent control; and be it further

"Resolved, That copies of these resolutions be transmitted forthwith by the clerk of the Massachusetts House of Representatives to the President of the United States, to the presiding officer of each branch of the Congress of the United States, and to each member thereof from this commonwealth."

POM-204. A resolution adopted by the Loma Linda, California City Council, expressing its support of efforts by the Federal Administration to return powers to local entities and urging a careful implementation of those efforts in ways that will enhance, not further impede, home rule; to the Committee on Governmental Affairs.

POM-205. A joint resolution adopted by the Legislature of the State of Colorado; to the Committee on Finance:

"HOUSE JOINT RESOLUTION No. 1017

"Whereas, The Public Employees' Retirement Association of Colorado was created in 1931 to provide reliable retirement benefits to state employees and, since 1944, has also covered most school and municipal employees in this state; and

"Whereas, The Public Employees' Retirement Association submits actuarial valuation reports annually to the General Assembly as well as to the Governor, as required by law, which reports show the Retirement Association to be in sound condition according to accepted actuarial principles; and

"Whereas, Mandatory coverage of state and local employees for Social Security would represent an intrusion by Congress into the fundamental duties of the states and almost certainly would be judged unconstitutional; and

"Whereas, Imposing Social Security coverage on state and local public employees would not solve Social Security's financial problems; and

"Whereas, Any scheme to integrate the Public Employees' Retirement Association benefits with Social Security benefits would result in lower benefits at retirement including the elimination of disability and survivor benefits and cost of living increases, and any such scheme would cost the state approximately an additional $15,000,000 annually; and to maintain at least the present level of benefits would cost $75,000,000 annually; now, therefore,

"Be It Resolved by the House of Representatives of the Fifty-third General Assembly of the State of Colorado, the Senate concurring herein:

"That this General Assembly does hereby urge the Congress of the United States not to pass any legislation requiring mandatory Social Security coverage of state and local public employees.

"Be it further resolved, That copies of this Resolution be sent to the President of the Senate and the Speaker of the House of Representatives of the Congress of the United States, each member of Congress from the State of Colorado, the Chairman of the United States Congress House Ways and Means Subcommittee on Social Security, the Chairman of the United States Congress Senate Finance Subcommittee on Social Security, the United States Secretary of Health and Human Services, Richard Schweiker, and Undersecretary designate of Health and Human Services, David Swoap."

POM-206. A resolution adopted by the House of Representatives of the Commonwealth of Massachusetts; to the Committee on Labor and Human Resources:

"RESOLUTIONS MEMORIALIZING THE PRESIDENT AND THE CONGRESS OF THE UNITED STATES TO MAINTAIN THE CLAIMS AND COLLECTIONS DIVISION, REGION I, DEPARTMENT OF EDUCATION, IN BOSTON

"Whereas, the United States Department of Education through the use of Federal collectors has established an impressive record in the collection of defaulted or delinquent student loans; and

"Whereas, of the more than six hundred thousand guaranteed loans in default over the past four years, nearly ninety per cent have been resolved, and the Federal collectors have returned more than three dollars for every one dollar cost to the taxpayer; and

"Whereas, the Boston regional office has collected approximately $1,371,268.00, an amount which compares most favorably with other regional offices; and

"Whereas, it is proposed to transfer the collections function to the private sector and to consolidate the collection operations from ten to three regions; and

"Whereas, the claims and collections division, region I, in the Boston regional office is not one of those to be maintained and its closing will result in substantial unemployment and hardship to the people of the Commonwealth; therefore be it

"Resolved, That the Massachusetts House of Representatives hereby respectfully requests the President, the Secretary of Education and the Congress of the United States to take the necessary action to maintain the continued operation of the claims and collections division, region I, Department of Education, in Boston; and be it further

"Resolved, That copies of these resolutions be forwarded by the Clerk of the House of Representatives to the President of the United States, to the Secretary of Education, to the presiding officer of each branch of the Congress, and to the members thereof from this Commonwealth."

POM—207. A resolution adopted by the House of Representatives of the Commonwealth of Massachusetts; to the Committee on Labor and Human Resources:

"RESOLUTION MEMORIALIZING CONGRESS TO TAKE THE NECESSARY ACTION TO FUND AND MAINTAIN THE CONTINUED OPERATION OF THE GREATER BOSTON AND OTHER LEGAL SERVICES CORPORATIONS

"Whereas, the Greater Boston Legal Services Corporation has established an impressive record in providing legal aid to the poor and disadvantaged people of the Commonwealth through the use of Federal funds; and

"Whereas, of the more than sixteen thousand cases worked on during the past year, over four thousand have been related to minor children and the elderly; and

"Whereas, over forty per cent of the pending cases deal with housing and family related matters; and

"Whereas, the policy issues of housing, the elderly, and the family are of great national concern and exigency; and

"Whereas, the Massachusetts House of Representatives believes the Federal Government has an important responsibility to ensure the nation's poor access to our justice system under the time honored principle of justice for all; therefore be it

"Resolved, That the Massachusetts House of Representatives hereby respectfully requests the President and the Congress of the United States to take the necessary action to fund and maintain the continued operation of the Greater Boston and other Legal Services Corporations; and be it further

"Resolved, That copies of these resolutions be forwarded by the Clerk of the House of Representatives to the President of the United States, to the presiding officer of each branch of the Congress, and to the members thereof from this Commonwealth.

EXECUTIVE REPORTS OF COMMITTEES

The following executive reports of committees were submitted:

By Mr. PERCY, from the Committee on Foreign Relations:

S. Ex. Res. 1. An original executive resolution providing for the return to the President of the agreement between the Government of the United States of America and the Government of Canada on East Coast Fishery Resources, signed at Washington on March 29, 1979 (Ex. Rept. No. 97-13).

By Mr. TOWER, from the Committee on Armed Services:

Herman E. Roser, of New Mexico, to be an Assistant Secretary of Energy (defense programs);

Russell D. Hale, of Virginia, to be an Assistant Secretary of the Air Force;

Edward J. Philbin, of California, to be Deputy Assistant Secretary of Defense for Reserve Affairs;

George A. Sawyer, of New Jersey, to be an Assistant Secretary of the Navy; and

William R. Gianelli, an Assistant Secretary of the Army, to be a Member of the Board of the Panama Canal Commission.

Mr. TOWER. Mr. President, from the Committee on Armed Services, I report favorably the following nominations: Maj. Gen. James E. Dalton, U.S. Air Force, to be lieutenant general, Admiral Alfred J. Whittle, Jr., U.S. Navy, (age 57) for appointment to the grade of admiral on the retired list, Maj. Gen. Oren E. Dehaven, U.S. Army, to be lieutenant general, Maj. Gen. John W. McEnery, U.S. Army, to be lieutenant general, Rear Adm. James A. Lyons, Jr., U.S. Navy to be vice admiral, Lt. Gen Paul X. Kelley, U.S. Marine Corps, to be general, Lt. Gen. Arthur J. Gregg, Army of the United States (major general, U.S. Army), (age 53), for appointment to the grade of lieutenant general on the retired list, and Maj. Gen. Richard H. Thompson, U.S. Army, to be lieutenant general. I ask that these names be placed on the Executive Calendar.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. TOWER. In addition, in the Regular Army, there are 52 promotions to the grade of colonel and below (list begins with Lowell L. Ballard, Jr.), and in the Navy there are 1,226 chief warrant officers for temporary promotion to the grade of chief warrant officer, W-3, and W-4 (list begins with James D. Abshear). Since these names have already appeared in the CONGRESSIONAL RECORD and to save the expense of printing again, I ask unanimous consent that they be ordered to lie on the Secretary's desk for the information of any Senator.

The PRESIDING OFFICER. Without objection, it is so ordered.

(The nominations ordered to lie on the Secretary's desk were printed in the RECORD of June 1, 1981.)

INTRODUCTION OF BILLS AND JOINT RESOLUTIONS

The following bills and joint resolutions were introduced, read the first and second time by unanimous consent, and referred as indicated:

By Mr. BRADLEY (for himself and Mr. PERCY):

S. 1354. A bill to provide standby authority to deal with petroleum supply disruptions, and for other purposes; to the Committee on Finance.

By Mrs. HAWKINS (for herself and Mr. PELL):

S. 1355. A bill to amend title 28, United States Code, to authorize the Attorney General to acquire and exchange information to assist Federal, State, and local officials in the identification of deceased individuals and in the location of missing children; to the Committee on the Judiciary.

By Mr. WARNER (for himself and Mr. MATSUNAGA):

S. 1356. A bill to amend the Internal Revenue Code of 1954 to allow the energy investment credit for equipment designed to use sailpower on vessels to lower fuel costs; to the Committee on Finance.

By Mr. BENTSEN (for himself, Mr. BOREN, Mr. GARN, Mr. HOLLINGS, Mr. CHILES, Mr. NUNN, Mr. EXON, Mr ZORINSKY, Mr. DECONCINI, Mr. HEFLIN, Mr. HARRY F. BYRD, JR., Mr. COCHRAN, Mr. LONG, Mr. PELL, Mr. HELMS, Mr. DENTON, Mrs. HAWKINS, Mr. EAST, Mr. PRYOR, Mr. SASSER, Mr. JOHNSTON, and Mr. SYMMS):

S. 1357. A bill to amend the Federal Rules of Criminal Procedure to provide consecutive sentencing for felonies committed while on bail for another offense; to the Committee on the Judiciary.

By Mr. SASSER:

S. 1358. A bill to provide benefits under the Uniformed Services Survivors Benefits Amendments to the survivors of the Reverend Clarence C. Adderholdt; to the Committee on the Judiciary.

By Mr. MATSUNAGA:

S. 1359. A bill for the relief of Paul E. Zirkle; to the Committee on the Judiciary.

By Mr. LEVIN (for himself, Mr. ROTH, Mr. BAUCUS, Mr. BUMPERS, Mr. METZENBAUM, and Mr. RIEGLE):

S. 1360. A bill to provide for the formation of regulatory negotiations commissions; to the Committee on Governmental Affairs.

By Mr. HATCH (for himself, Mr. QUAYLE, Mrs. HAWKINS, Mr. DENTON, Mr. EAST, Mr. SYMMS, Mr. HELMS, and Mr. GARN):

S. 1361. A bill to amend title IX of the Education Amendments of 1972 relating to sex discrimination; to the Committee on Labor and Human Resources.

By Mr. HATCH:

S. 1362. A bill entitled the "Voluntary Vitamins Act of 1981"; to the Committee on Labor and Human Resources.

By Mr. HATCH (for himself, Mr. KENNEDY and Mr. HAYAKAWA):

S. 1363. A bill entitled "The Saccharin Study and Labeling Act Amendment of 1981"; to the Committee on Labor and Human Resources.

By Mr. HATCH:

S. 1364. A bill for the relief of Jose Ramon Beltron Alvenda Ostler; to the Committee on the Judiciary.

S.J. Res. 90. Joint resolution designating June 30, 1981, as "National Drug Standards Day"; to the Committee on the Judiciary.

By Mr. THURMOND (for himself, Mr. HOLLINGS, Mr. NUNN, and Mr. MATTINGLY):

S.J. Res. 91. Joint resolution to designate July 1981 as "National Peach Month"; to the Committee on the Judiciary.

STATEMENTS ON INTRODUCED BILLS AND JOINT RESOLUTIONS

By Mr. BRADLEY (for himself and Mr. PERCY):

S. 1354. A bill to provide standby authority to deal with petroleum supply disruptions, and for other purposes; to the Committee on Finance.

EMERGENCY PREPAREDNESS ACT OF 1981

(The remarks of Mr. BRADLEY and Mr. PERCY on this legislation appear earlier in today's RECORD.)

By Mrs. HAWKINS (for herself and Mr. PELL):

S. 1355. A bill to amend title 28, United States Code, to authorize the Attorney General to acquire and exchange information to assist Federal, State, and local officials in the identification of certain deceased individuals and in the location of missing children; to the Committee on the Judiciary.

MISSING CHILDREN ACT

● Mrs. HAWKINS. Mr. President, I am introducing legislation today which will go a long way toward solving one of the most heart-rending problems that faces the families of this Nation. Every year 1.3 to 1.8 million children are reported missing. Many of these are runaways, but I am convinced that many thousands of them are not.

They are, quite simply, victims of crime. And yet, unless the parents can produce evidence that a missing child's safety is in jeopardy, law enforcement officials will not enter information on the missing child into the computer system operated by the Federal Bureau of Investigation.

This situation is alarming and can no longer be tolerated. Too often a child who disappears, a child with no history of running away, is the victim of crime. We have seen it time and time again in Atlanta, and in hundreds of other communities across the Nation. As it works out in practice now, less than 10 percent of the children who disappear each year are entered in the FBI computer. That is not enough.

If a car is reported stolen, a description of it is circulated nationwide almost immediately. Federal law enforcement officials will help find missing horses. Yet we do virtually nothing at the Federal level to report and find missing children.

I am horrified at the number of missing children who are never located simply because they are presumed to be runaways. These are 12-year-olds, with no history of family trouble or of running away. They are not victims of parental kidnapings. They just disappear, later to turn up beaten or murdered; or perhaps they simply remain unfound and untraced.

The legislation I am introducing today, which is identical to a bill already introduced by Congressman PAUL SIMON in the House of Representatives, would require law enforcement officers to enter data into the FBI's computer on any missing children under age 17 who have been missing for 48 hours and who have no history of running away from home. Many missing children do return home of their own accord, and the 48-hour period will keep most of the true runaways out of the computer.

The legislation will also allow use of the computer to help identify bodies. Law enforcement officers find hundreds of bodies every year that are never identified. By cross-matching characteristics of the body with information on the FBI computer, many more identifications should be made than are now being made.

Each year we lose 50,000 children, 50,000 beloved soldiers in our common fight for a better future. This legislation will mandate a nationwide network to unify the search for these lost children.●

By Mr. WARNER (for himself and Mr. MATSUNAGA):

S. 1356. A bill to amend the Internal Revenue Code of 1954 to allow the energy investment credit for equipment designed to use sail power on vessels to lower fuel costs; to the Committee on Finance.

ENERGY INVESTMENT CREDIT FOR EQUIPMENT USING SAILS

Mr. WARNER. Mr. President, I am today introducing a bill with my distinguished colleague from Hawaii (Mr. MATSUNAGA) as cosponsor. Mr. President, I want to say at the outset that the inspiration for this legislation has emanated from this distinguished legislator. It is quite innovative and it may start a historic trend in our country toward helping to resolve the energy problem.

The legislation is aimed at supporting a new technology holding extraordinary promise for improving the fuel efficiency of our cargo and fishing fleets.

Mr. President, as seamen can testify, the power of the wind on the high seas exceeds that of any propulsive force human ingenuity has so far managed to devise; the problem lies in harnessing it.

About 100 years ago, after centuries of successful development, sailing ships lost favor. Their replacements—steam and diesel powered vessels—drew on sources far inferior to the power of the wind but more susceptible to efficient management. Steam and diesel permitted reduced crew sizes at a time when crew costs were the principal expense for ocean transport.

During ensuing years, however, important changes occurred that caused many farsighted marine architects and ocean engineers to reexamine the potential of wind.

On the one hand, fuel costs escalated to the point where they replaced crew costs as the principal operating expense, often exceeding 50 percent of the operating budget for fishing and cargo vessels.

On the other hand, remarkable advances occurred in sail and hull design; in construction materials; in navigation equipment and procedures, such as minute-by-minute information beamed by satellite on wind speed, wind direction, wave heights, the ebbs and flows of transoceanic currents.

Other new developments included sails with the tensile strength of steel and automated winches that permitted 1 or 2 persons to manage sails that had required crews of 10 or 20 or more. The power of the wind was being harnessed with once inconceivable efficiency.

In the process, there gradually emerged a new and extremely promising approach to maritime transport that incorporated motor and wind power in a complementary mode. It came to be called sail-assisted technology. It produced fuel savings of anywhere from 15 to 90 percent, depending on the size and design of the vessel, its range and area of operations, and the equipment employed.

Last year, sail-assisted technology came into its own as a worldwide phenomenon. A major Japanese shipbuilding firm, Nippon-Kokan, launched a 1,400-deadweight-ton sail-assisted coastal tanker. Another Japanese firm, Mitsui, unveiled plans for a 14,000-deadweight-ton sail-assisted towed barge to be used for hauling cargo between Taiwan and Japan.

The Nikolayev Institute of Shipbuilding in the Soviet Union produced a design for a sail-assisted motor vessel and prepared for production.

The Royal Institute of Navigation in London held the first international conference on sail-assisted technology, with delegates in attendance from every corner of the globe. Such widespread interest was not surprising.

In 1980, in the non-Communist world alone, ocean transport consumed more than 4 million barrels of increasingly expensive oil per day.

Mr. President, as fuel costs continue to accelerate, the logic on the side of eventual worldwide deployment of sail power in various combinations with motor power is becoming overwhelming. The only question is: Who will first begin to derive the considerable benefits?

In that regard, no nation can match the potential of the United States. Although other nations have taken the lead in commercial sail, none of them approaches our sophistication in the design of sail equipment.

For instance, I am informed by American naval architects that sails designed for Japanese commercial vessels cannot match the quality and efficiency of those serving American craft.

Unfortunately, our expertise is for the most part focused on the yachting industry. We need to shift that focus to commercial shipping and fishing.

And the sooner the better. The American fishing industry, in particular, faces a fuel crisis that threatens key segments with extinction, notably the shrimp industry. Sail-assisted fishing vessels could eventually cut fuel costs in half.

I can testify to that from first-hand observation and with home State pride, since, in 1980, the first National Marine Fisheries Service grant ever awarded for testing fuel efficiency on a sail-assisted vessel went to a resourceful young tug and fishing boat operator from Norfolk, Va.—Jesse Briggs, of Rebel Marine, Inc. Fuel efficiency on Mr. Briggs' vessel is being monitored by the Virginia Institute of Marine Science.

I have followed the progress of this endeavor. Savings of 40 percent on diesel fuel are being reported. And please keep in mind, we are talking about a technology in its infancy.

Over the long term, sail-assisted vessels could bring new vitality to our fishing industry and ultimately even to our ocean cargo industry.

At present, motor-sail fishing vessels require an initial investment running about 25 percent greater than the cost of a comparably sized diesel-powered vessel.

Although long-term fuel savings make commercial sail vessels a better buy, tightly strapped fishing boat owners lack the capital for that initial investment.

They are thus trapped in a vicious cycle: They must buy vessels burning fuel whose cost is breaking them. A necessary first step for tapping the immediate fuel saving advantages of commercial sail, and for making possible the cost reductions that come with large-

scale production, is to bring that initial investment within reach of boat owners.

I am therefore joining with my distinguished colleague from Hawaii, Senator SPARK MATSUNAGA, in introducing legislation that would amend the Internal Revenue Code to permit a 15-percent tax credit for sail-assisted equipment on new American-made vessels employed in trade or commerce, for a 3-year period, effective January 1, 1981. Also eligible would be sail assist retrofits. In no case would the credit apply to more than 35 percent of the total cost of the vessel.

This measure would really do nothing more than extend the energy tax credit for wind power on dry land to wind power on the high seas.

But it would serve to launch a new technology that could ultimately revitalize our fishing and ocean cargo industries while significantly reducing American dependence on imported oil.

It would make American seaborne commerce more efficient and more self-sufficient. It would open up new prospects for American shipbuilders. It would strengthen free enterprise and reduce the pressure for fuel subsidies. It is in every respect the right thing to do and now is the right time for it.

Mr. President, I ask unanimous consent that the text of our bill be printed in the RECORD at this point.

There being no objection, the bill was ordered to be printed in the RECORD, as follows:

S. 1356

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled, That (a) paragraph (4) of section 48 (1) of the Internal Revenue Code of 1954 (defining solar wind energy property) is amended by inserting "qualified sail-assistance property or" before "equipment".

(b) Section 48(1) of such Code (defining energy property) is amended by adding at the end thereof the following new paragraph:

"(18) QUALIFIED SAIL-ASSISTANCE PROPERTY.—

"(A) IN GENERAL.—The term 'qualified sail assistance property' means equipment which, when installed on a vessel, allows such vessel to be operated solely through the use of wind energy, including, but not limited to—

"(i) masts,

"(ii) standing and running rigging,

"(iii) sails, and

"(iv) deck hardware related to hoisting, trimming, or otherwise controlling sails.

"(B) CONTROLLING QUALIFIED INVESTMENT.—Any qualified investment (within the meaning of section 46 (c) and (d)) which, in connection with the construction or reconstruction of a vessel—

"(i) is attributable to ballast or hull modification necessary to allow the vessel to be sailed using wind energy shall be treated as qualified investment in qualified sail-assistance property, and

"(ii) otherwise constitutes investment in qualified sail-assistance property shall not be treated as investment in such property to the extent such investment (when added to any such investment in connection with such construction or reconstruction for any prior taxable year) exceeds 35 percent of the total qualified investment in such construction or reconstruction.

"(C) VESSEL.—For purposes of this paragraph, the term 'vessel' means any vessel described in subsection (a) (2) (B) (iii).".

(c) The amendments made by this section shall apply to periods after December 31, 1980, under rules similar to the rules of section 48 (m) of the Internal Revenue Code of 1954.

Mr. WARNER. Mr. President, I yield to my distinguished cosponsor and colleague, the Senator from Hawaii (Mr. MATSUNAGA).

Mr. MATSUNAGA. Mr. President, I thank the Senator for yielding.

Mr. President, it is with great pleasure that I join my distinguished colleague from Virginia (Mr. WARNER) in introducing legislation designed to promote fuel efficiency on the high seas through the application of a new and exciting technology.

The potential of sail-assisted technology first came to my attention last July when I conducted hearings in Honolulu, on behalf of the Energy and Natural Resources Committee, on an energy crisis facing our Pacific territories. They had become almost totally dependent on imported fuel whose escalating cost their fragile economies simply could not absorb.

Essential services were being cut back and economic development had come to a virtual standstill. Nowhere was the impact more keenly felt than in the area of surface transportation. With its 2,000 islands scattered over 3 million square miles—an area larger than the entire U.S. continental land mass—the Trust Territory of the Pacific Islands depended on ocean transport the way we depended on land transport for commerce, point to point transportation, distribution of food, fuel, medical supplies.

Ironically, these Pacific islanders were once the world's most daring ocean navigators. But, under our tutelage, they had become hooked on diesel fuel and were finding themselves increasingly isolated as a result.

I introduced legislation calling for a study into the potential application of sail-assisted technology as a means of reducing energy costs for inter-island transportation in the Trust Territory.

Last August, the Energy and Natural Resources Committee held hearings on my bill in Washington. Since these were the first congressional hearings relating to this new technology, I suggested that the occasion be employed to examine the technology as a whole.

Mr. President, the occasion was quite extraordinary. At their own expense, pioneers in sail-assisted technology traveled to Washington from around the country.

They told me they came because this was the first opportunity they had to describe what they were doing at a national forum and explain why it was important. They had felt isolated in their efforts. They were a remarkable group, in the best tradition of this Nation.

Jesse Briggs, of Norfolk, Va., whom Senator WARNER singled out in his remarks, was there. So was C. R. Palmer, up from Houston, an o'l rig operator who had ingeniously mounted two sails, each half the size of a football field, on one of his jackup oil rigs, to achieve significant fuel savings during transoceanic tows.

Down from Norwell, Mass., came Lloyd Bergeson, former general manager of two major shipyards, Quincy and Ingalls, who had established a space age sail technology firm called Wind Ship Development Corp., and was employing sophisticated computer techniques to chart the most favorable trade routes for sail-assisted vessels, in association with Henry S. Marcus, MIT professor of Ocean Engineering and chairman of MIT's graduate program in Shipping and Shipbuilding Management.

Across the continent from Sausalito, Calif., came Hugh Lawrence, an attorney and marine designer who was converting a cargo vessel to take a sail assist for use in the Caribbean trade. They were joined by many others of comparable qualifications and determination. The hearings provided convincing evidence that we were dealing with a technology that had been constrained in its development for far too long, due in large measure to the failure of public and private institutions to grant it legitimacy.

Mr. President, I ask unanimous consent that my opening remarks at those hearings be printed in the RECORD at this point.

I am especially pleased to join my discerning and farsighted colleague from Virginia in introducing this legislation today. It will help open the way to a new era in ocean transport. It will bring a new and boldly promising dimension to the lives of those who link their destinies to the sea.

There being no objection, the statement was ordered to be printed in the RECORD, as follows:

OPENING STATEMENT OF THE HONORABLE SPARK M. MATSUNAGA

Today's hearings will now address S. 2992, a bill which I introduced last month after conducting Energy and Natural Resources Committee field hearings in Honolulu on the disastrous energy crisis confronting the U.S. Pacific territories. And, for background purposes, I would like at this point to submit for the record a statement I delivered on the floor of the Senate when the bill was introduced.

S. 2992 calls for a study of sail-assisted technology as a means of reducing energy costs for inter-island transportation in the Trust Territory of the Pacific Islands. That's a summary description of the bill. A summary description of today's hearing on S. 2992 might be:

"Innovation and Productivity Journey to Washington at Their Own Expense To Be Heard."

I must admit that when I first learned of it, sail-assisted technology hardly seemed worth bringing to the attention of the Congress. But I was intrigued. I asked my staff to investigate the matter. And lo and behold, there emerged a series of personal accounts, from around the nation, that were so refreshing, so filled with promise, so representative of that American ingenuity without which the economic renewal we all seek can only be a reshuffling of spent ideas, that I felt compelled to request a hearing—for them, in Washington. I say for them because the persons involved often seemed so frustrated in their scattered and relatively anonymous efforts. They were frustrated by the absence of a vital element that the federal government holds the power to confer—that is, legitimacy.

Sail assistance for motorized fishing boats and cargo vessels is generally perceived as an exercise in nostalgia rather than the extremely advanced technology it really is. As a consequence, those farsighted entrepreneurs who want to carry the technology forward are having difficulty obtaining private

financing or the federal loan guarantees normally granted for vessel construction. Without financing, they, of course, are unable to build the vessels that will prove their concepts. A few hardy individuals have broken out of that vicious cycle, but not many, and none yet to venture on the cargo vessel scale.

Hopefully the evidence presented by witnesses today will show the need to establish mechanisms for financing certain feasible prototypes—or retrofits—to spur this new technology forward, before the Japanese, who are already moving quickly into this field, leave us behind once again.

One possibility is an energy tax credit for wind power on the high seas that is equal to the tax credit for wind power on dry land. Another is legislation to make it as easy to obtain federal loan guarantees for modern sail-assisted vessels as it is for old-fashioned vessels that run only on diesel fuel, the price of which has increased from $2 a barrel to $37 a barrel during the past decade.

Still another possibility would be to consider developing a program involving working prototypes for the Trust Territory where cargo vessels are small-sized, gusty trade-winds prevail, and fuel costs are having a disastrous impact on a surface transportation system serving an area encompassing 3 million square miles. If successful, and indications are that it would be, this program could usher in a new age of high technology wind ships on the high seas.

Those are specific steps that might be taken on behalf of sail-assisted technology. But in a broader sense, if innovative technologies such as this one are to obtain the legitimacy they deserve, and contribute to the revitalization of the American economy, those at the highest level of government must cultivate a special kind of receptivity.

It is a receptivity to the disparate activities of unique individuals working with day-to-day, down-to-earth problems—such as how to cut the operating costs of a tugboat on the Chesapeake Bay.

Now if that last phrase sounds less ringing, less stimulating and inspiring than phrases such as the reindustrialization of America, or business-labor-government partnership, or post-industrial technology, then, I submit it is time for those at the policy-making levels to reach out to the grass roots a bit more.

The secret of our historically unequalled capacity for innovation and productivity is there, in the vibrantly curious activities of scattered individualists, whom some would call mavericks, or even tinkerers (and I mean that in a deeply respectful sense), and some of whom are gathered in this room today.

When addressing the productivity issue, we in and around government need to listen to them more and to ourselves less. They can tell us, for instance, that the Japanese model for innovation that has become so fashionable in higher circles cannot be duplicated in America without stifling the very spirit which it is meant to awaken, but which may exist in another form.

Japan, operating through culturally inherited procedures of hierarchical consensus, already has launched a sail-assisted coastal tanker of 1600 deadweight tons and next year will launch a sail-assisted towed barge of 12,000 deadweight tons.

But even so, Japanese policymakers can draw upon nowhere near the variety of expertise and imagination in this field as is being generated in the United States through the scattered activities of our intensely individualistic culture.

The challenge to American policymakers is to reach out and turn those activities into an integral part of the policymaking process without overwhelming the stubborn individuality that informs them. To that end, those at the top need to spend more time addressing new technologies on a case by case basis, in depth, drawing into their deliberations those anonymous Americans tinkering away on the fringes, which is to say those advancing on technology's frontier.

In the process, policymakers need to free themselves of the fear of being surprised, especially by simple solutions that by their nature challenge an institutional commitment to complexity on a grand scale.

So I take particular pleasure in welcoming the witnesses for today's hearings on S. 2992. You are, in my view, "the real thing." Without you, the concept of innovation that everyone in Washington is talking about wouldn't exist. The nation's capitol needs to see more of you, to listen more to you, and those of your fraternity.

Mr. MATSUNAGA. Mr. President, once again, I appreciate the sponsorship of this major piece of legislation in the area of energy by my good friend and colleague from Virginia (Mr. WARNER).

By Mr. BENTSEN (for himself, Mr. BOREN, Mr. GARN, Mr. HOLLINGS, Mr. CHILES, Mr. NUNN, Mr. EXON, Mr. ZORINSKY, Mr. DECONCINI, Mr. HEFLIN, Mr. HARRY F. BYRD, JR., Mr. COCHRAN, Mr. LONG, MR. PELL, Mr. HELMS, Mr. DENTON, Mrs. HAWKINS, Mr. EAST, Mr. PRYOR, Mr. SASSER, Mr. JOHNSTON, and Mr. SYMMS):

S. 1357. A bill to amend the Federal Rules of Criminal Procedure to provide consecutive sentencing for felonies committed while on bail for another offense; to the Committee on the Judiciary.

FELONIES COMMITTED WHILE ON BAIL

● Mr. BENTSEN. Mr. President, our current criminal justice system has created an intolerable situation that actually amounts to an incentive to commit a criminal act. Today I am joining with 21 of our colleagues to introduce a bill that will remove that incentive once and for all.

In our current system, when someone commits a crime and is arrested there is a fairly good chance that the offender will be released on his own recognizance or on bail until a trial date has been set. But most offenders do not sit around and patiently wait for their trial. Rather, many of them take this opportunity to go back out into the streets and commit yet another crime. They do this because the courts can, and often do, impose concurrent sentences for both crimes.

Therefore, if the criminals believe that they are likely to be convicted for an offense, they are actually encouraged to go out and commit another offense, knowing that if they are caught and eventually convicted of both crimes, they will only receive one prison term. This "two for one" bargain is an inducement few serious criminals pass up.

I propose to correct this situation by making a simple change in our criminal sentencing procedures. My bill will require that when an offender is convicted of two felonies, one committed while on bail for the other, the judge will impose the sentences consecutively rather than concurrently. This change should make it clear to the criminal that he will not be able to commit two crimes for the penalty of one—each new violation will bring a suitable and additional penalty.

How much crime would be reduced if my bill is enacted into law? One career criminal program indicates that more than 36 percent of the repeat offenders arrested were on bail for previous crimes. If even half of these offenders were discouraged from committing a second offense we could reduce the crime committed by career criminals by better than 15 percent. Other data support the value of this change.

A study of auto theft found that 65 percent of those arrested for auto theft were again arrested for auto theft while on bail; 40 percent of those arrested for larceny were again arrested while on bail; 33 percent were again arrested for robbery and 27 percent for burglary. If we could reduce each of these rates by even 50 percent we would be making tremendous inroads into the problem of ever increasing crime in America.

The sober statistics above indicate that our current system of criminal justice is not discouraging recidivism—it is actually encouraging it. We have an opportunity to make a change in our Federal criminal law which will reduce the rate of crime for Federal offenses and serve as a model for those State legislatures that want to reform their own codes.

Mr. President, I am hopeful that the committee and the Senate will be able to quickly make this change and end this "bargain basement" system of punishing criminals for their repeated violations.●

● Mr. SASSER. Mr. President, I am pleased to be a cosponsor of S. 1357, which can do so much to bring swift and sure punishment to the repeat offender.

Career criminals are the hard core of our national crime problem. They have little regard for the law, and are the ones primarily responsible for rising crime rates.

Crime statistics demonstrate again and again that it is the repeat offender who accounts for the bulk of auto thefts, robberies, and burglaries.

Our system of criminal justice must be swift and sure in meting out just punishment for the criminal. We simply cannot continue to tolerate a situation where these criminals use our bail procedures as a gateway to more crime.

S. 1357 is built on a simple proposition; abuse the bail system and you will pay the consequences. And in these times of increased national concern about crime, that is a proposition worth having in our criminal justice system.

I commend Senator BENTSEN for introducing this bill and I hope that the Judiciary Committee will take immediate action to favorably report this measure.●

● Mr. PELL. Mr. President, I am pleased to join Senator BENTSEN today in cosponsoring legislation I believe will go a long way toward deterring the commission of crimes by offenders who have been released on bail while awaiting trial. One of the most troubling aspects of the crime epidemic which is engulfing America is the number of crimes committed by persons who are on bail for the commission of another offense. It is clear that most offenders do not sit around patiently and wait for their trial; many of them are going out into

the streets and committing other serious offenses.

Senator BENTSEN's bill requires that when an offender is convicted of two felonies, one committed while on bail for the other, the judge must impose the sentences consecutively rather than concurrently. This needed change in the law will end the current practice where all too often the criminal is able to commit two crimes for the penalty of one.

The need for stronger measures to deal with the crime epidemic is evident in every State. In my own State of Rhode Island, crime increased statewide last year by over 7 percent, and, in the city of Providence alone, crime registered a 13.3 percent increase over the previous year. According to the Justice Department, the national increase in crime during 1980 was the biggest jump in a dozen years, and much of this crime was committed by repeat offenders.

Statistics show that 65 percent of those arrested for auto theft were again arrested for the same offense while on bail, and that 40 percent of those arrested for larceny were again arrested while on bail. The practice of concurrent sentences has actually encouraged repeat offenders, because they know that if they are caught and convicted of both crimes, the chances are good that they will receive only one prison term.

This is a difficult time for our law enforcement officials, who truly are our first line of defense for the protection of our families and friends. The public demand for more effective crime control is increasing, just as local budgets are stretched to the bone and limited Federal resources to assist law enforcement are being cut back or eliminated entirely. The best tool we can give to local law enforcement is to strengthen the hand of the prosecutors in their war against the repeat offenders who are responsible for so much of the drain on police and court resources. Senator BENTSEN's bill is an excellent model for the States, and sends a strong message to offenders released on bail. Mandatory concurrent sentences will end the practice of committing two crimes for the penalty of one, and I am pleased to join Senator BENTSEN in cosponsoring this excellent piece of crime prevention legislation.●

● Mr. DECONCINI. Mr. President, I am pleased to cosponsor legislation introduced today by my distinguished colleague from Texas, Senator BENTSEN. The legislation provides for mandatory consecutive sentences for criminals who commit a second felony while awaiting trial for a first. Such a measure is long overdue because of abuses in our judicial system which judges themselves have been reluctant to correct.

The congested condition of our courts and prisons has made long waits for trials commonplace. Criminals are sent back into society either on bail or on their own recognizance. Thus, an unsuspecting population has a horde of criminals in its midst who are essentially free to do as they wish. These released individuals form a cadre of criminals who have had an appalling impact on the overall crime rate. Affirmative measures must be taken to deal with this increasingly intolerable situation.

Punishment, Mr. President, is a deterrent to crime only so long as the criminal is reasonably assured that he or she will be apprehended and, if apprehended, punished. As long as the odds strongly favor either nonapprehension or nonpunishment, there is little incentive for criminal types to adhere to society's rules. Judicial laxness has virtually guaranteed to the criminal on bail that he or she will, in effect, receive no punishment for a felony committed while on bail. The reason for this is simple. Judges are generally inclined to condemn individuals convicted of a second felony while awaiting trial for the first to concurrent sentences. A concurrent sentence is the functional equivalent of no sentence.

The legislation that I join my distinguished friend from Texas in sponsoring would reverse this absurd practice. It would force judges to show the same consideration to the society which supports them as it does to the criminals they are supposed to judge. If an individual were convicted of a second felony while awaiting trial for another, the judge would be forced to impose consecutive rather than concurrent sentences for the two crimes. In other words, Mr. President, the legislation removes the "free ride" that criminals have been enjoying. Under our legislation, they must actually pay the penalty for their crimes.

As the Members of this body are painfully aware, the incidence of crime in America is again on the rise. Much crime is the result of complicated social factors, and quite obviously an intelligent society must attempt to deal effectively and compassionately with the conditions that may spawn antisocial behavior. But there are some causes or encouragements to crime that are within our ability to control and affect. This is one of them. Current practice practically invites the criminal to strike again. Our legislation would, at least, return the odds back to where they should be.

I urge my colleagues on the Senate Judiciary Committee to seriously consider this measure as soon as possible. And I hope the full Senate will pass the matter quickly to help protect the millions of law-abiding citizens who are unnecessarily preyed upon as the result of this type of judicial behavior.●

By Mr. LEVIN (for himself, Mr. ROTH, Mr. BAUCUS, Mr. BUMPERS, Mr. METZENBAUM, and Mr. RIEGLE):

S. 1360. A bill to provide for the formation of regulatory negotiation commissions; to the Committee on Governmental Affairs.

REGULATORY NEGOTIATION ACT OF 1981

● Mr. LEVIN. Mr. President, I am pleased to introduce along with my colleagues, Senators ROTH, BUMPERS, METZENBAUM, and RIEGLE, a bill which encourages and funds the use of a process called "regulatory negotiation."

The current approach to regulatory policymaking has evolved into a very adversarial and litigious process. Affected businesses, interested groups, and the regulatory agencies all tend to adopt conflicting postures during the promulgation and implementation of Federal regulations. It is not surprising that the policies and regulations which result are often considered inappropriate and ineffective both by businesses and interested groups, and that litigation and conflict appear inevitable. The resulting regulatory policy crisis has become so severe that innovative alternatives are needed to encourage a more cooperative and productive process, where as many common positions as possible can be reached and incorporated into the regulations.

One of the most exciting and promising new approaches is a process called "regulatory negotiation." Regulatory negotiation operates on the belief that industry and interested groups can sit down together and, with the aid of a "facilitator", attempt to fashion a consensus in areas of mutual concern. The basic notion is that if responsible people commit to find areas of agreement in a cooperative atmosphere, regulations can be designed which better meet true policy needs—and a lot of needless conflict and delay can be avoided in the process.

The need for such an approach is apparent. Regulations often create a great deal of anxiety among all parties who have a stake in their promulgation and implementation. Businesses often see regulations as limiting their profits and infringing on their freedom to function as they would want. Other interested groups believe that the public welfare will be sacrificed in the regulatory process and that they will not be heard. The regulators themselves are often required to attempt to interpret a broad statute and apply it to very specific circumstances with the result being that they are often unable to please any of the parties involved. Legislators, who thought the problem was solved when they adopted legislation, are faced with a continuing battle during the rulemaking and enforcement process.

In a recent Washington Post interview (February 8, 1981), Irving Shapiro, chairman of the DuPont Co. since 1974, aptly describes the adversarial nature of the current regulatory process:

> It seems to me the starting point is to recognize that the administrator and the industry need not be adversaries. They ought to have a common objective . . . And so I would make the case that if you get rid of the adversary approach and simply say we have a common objective—one as a representative of the public sector, the other as a representative of the private sector—we ought to sit down and talk about how to get from here to there. You very often would wind up with good answers . . . That doesn't happen very often. Instead the system says we must be adversaries . . .
>
> What it is today, really, is an adversary procedure in which you've got single-issue groups on one side pressing the agency, you've got people in the agency pressing for their own viewpoint, and then you've got people in the industry pressing for their viewpoints, and each one is shooting at the other.
>
> Ultimately, you wind up in court and then work out the compromises afterward. And it seems to me perfectly wasteful and silly to say that you have to go through all that agony to do something that you should have been able to do at the beginning.

Attempts to use regulatory negotiation as an alternative have been successful in several areas. The most well-known use of the approach has been the national coal policy project (NCPP).

The national coal policy project was an outgrowth of the recognition that it was important for the United States to shift from oil and natural gas to coal. In order to accomplish this, there had to be a reconciliation of environmental and industrial interests.

At a July 1976 meeting, business representatives and environmentalists endorsed the regulatory negotiation concept and agreed to pursue important coal related environmental and energy policy issues. Initially, neither group was enthusiastic about the potential of such an approach, but both wanted something better. Those who took part did so as individuals—not as company representatives.

The participants used the following principles—called the rule of reason—to resolve differences and to develop workable solutions:

First. Data should not be held from the other side;

Second. Delaying tactics should not be used;

Third. Tactics should not be used to mislead;

Fourth. Motives should not be impugned lightly;

Fifth. Dogmatism should be avoided;

Sixth. Extremism should be countered forcefully—but not in kind; and

Seventh. Integrity should be given first priority.

The Georgetown University Center for Strategic and International Studies (CSIS) served as the neutral meeting place for project participants. It also raised funds and provided administrative support for the project. The project itself was financed by grants and contributions from foundations, Government agencies, and industry. Expenses of participants representing environmental concerns were paid from foundation and governmental contributions.

Five task forces were established to cover coal policy issues: Mining; transportation; air pollution; fuel utilization and conservation; and energy pricing. Each side was equally represented. Each task force was assigned the responsibility for developing recommendations on its issues.

The selection of task force participants and chairpersons was accomplished by each caucus—industry and environmental. These individuals were to be selected based on expertise in the task force's issues, intent to follow rule of reason, and respect of their peers.

The governing body for the project was called the plenary group which consisted of task force cochairmen and vice cochairmen, the national coal policy project cochairmen and the plenary chairman. The duties of the plenary group were: To define the nature and scope; to provide guidance; to review and finally approve task force recommendations; and to resolve task force disputes.

All of the 200 task force recommendations were not unanimously achieved. However, 90 percent were: The really hard issues were debated until consensus was reached, while in a few cases, there was none.

The NCPP report found that the project was very successful in dispelling stereotypes:

> Quite apart from the substance of the recommendations, the project has been valuable in dispelling stereotypes. Those environmentalists who had previously regarded the position of industry on environmental and energy issues as being monolithic and intransigent were rather quickly disabused of that notion. This was largely because of the differing perspectives of the industry members. For example, producers of fuel, regulated utilities, and industrial users of large quantities of energy each tended to have different interests and views on questions of energy pricing.
>
> In a similar fashion, those industrialists who expected the environmentalists to be opposed to economic growth and to the introduction of new technology, and in favor of governmental rather than marketplace decisions on the allocation of resources, were pleasantly surprised to find that their suppositions were incorrect. The environmentalists opposed a pattern of growth that produced a wasteful use of natural resources and an environmental impact which they felt was unacceptable; they did not oppose economic growth in itself. They welcomed new technology that would serve to increase efficiency and reduce adverse environmental impacts and demands on natural resources. They preferred marketplace decisions to economic regulation by government when markets were workably competitive; when this was not the case, or when important (external) environmental and social impacts were not properly valued in the market, the environmentalists were eager to explore methods of influencing the market (as with emission charges) so that the desired goals would be achieved while retaining the advantages of keeping detailed decisions in the private sector.

The report further states:

> We are not proposing that the process of discussion and negotiation in which we have participated should replace the adversary process. Indeed many of the policy recommendations on which we have agreed would have to be implemented through the traditional adversary system; that is, they require action by legislative and judicial bodies . . . there are others that simply do not lend themselves to negotiated agreements . . .
>
> We believe, however, that exclusive reliance on adversarial processes is likely to produce decisions that are less desirable (from the point of view of either of the parties) than those in which a common position serving both interests could have been agreed to in a non-adversarial context.

The coal policy project's recommendations have received agency support by the Office of Surface Mining and the Federal Energy Regulatory Commission. The first has adopted word-for-word project recommendations with respect to bonding concerns and operations. FERC has adopted the coal generation and small power recommendations.

Also, two bills were introduced in May 1980: H.R. 7464 and H.R. 7465, which adopted recommendations that called for the use of incentives to develop pollution control technology and the development of plant siting procedures.

Regulatory negotiation has been tried in the toxic substances area as well. The conservation foundation was involved in this approach during the implementation of the Toxic Substances Control Act.

Specifically, 12 to 14 business persons and environmentalists met to discuss the training of toxicologists; the testing of new chemicals and the prioritizing of what chemicals should be tested, and determining the nature and scope of agency followup on the chemical after it reaches the market.

With respect to the testing of new chemicals, the conservation foundation's committee made four recommendations:

First. That a conceptual framework for a testing program be developed to test chemicals using a tier system;

Second. That all relevant aspects of the potential impacts on human and animal health be tested, starting with inexpensive tests and ending with more complex tests;

Third. That the tests within each tier be required on a selective and necessary basis; and

Fourth. That tier 0—the first tier—should be viewed as a minimal test—therefore, all substances should be tested under the first two tiers at a minimum.

EPA is now developing guidelines—regulations—to effectuate the first recommendation.

In the area of labor relations, regulatory negotiations have emerged as well. For example, the Joint Labor Management Committee for the Retail Food Industry utilized the process to reach an agreement on an OSHA regulation for protective equipment for employees in the meat department of supermarkets. This consensus took several months of hard work, but once labor and management agreed, the two groups were able to reach agreement with OSHA to everyone's satisfaction.

On July 29 and 30, 1980, the Subcommittee on Oversight of Government Management, of which I was then chairman, and the Select Committee on Small Business, of which I am a member, held hearings on the regulatory negotiation approach. We received testimony from representatives of both the private and public sectors who have had specific experiences in regulatory negotiations, including the Georgetown Center for Strategic and International Studies, the national coal policy project, the conservation foundation, and EPA. These witnesses supported regulatory negotiation as a valuable aid to achieving more flexible and workable regulatory policy and suggested ways to strengthen the process.

The bill reflects many of these suggestions.

Essentially, it creates a pilot project to fund and encourage the voluntary formation of regulatory negotiation commissions. These commissions are to be composed of balanced interests representing industry and nonindustry groups, labor, State and local officials or others with a vital interest in the area being reviewed. These commissions are to develop recommendations representing a consensus of the commission participants.

The bill gives the chairman of the administrative conference the responsibil-

ity for administering the pilot project and authorizes the funds necessary to pay the administrative costs of up to 10 regulatory negotiation commissions during fiscal years 1982 and 1983. Specifically, the chairman must announce the availability of grants in the Federal Register. Grants are available for projects in the areas of health, safety, and the environment—when a major law has been enacted but proposed rules and regulations have not been issued; when final rules and regulations have been issued, but are likely to be significantly revised; or when basic statutory changes are contemplated. It is my belief that regulatory negotiations will be most productive at these stages of the regulatory process—that is, before the affected parties have staked out seemingly irreversible positions.

Individuals with an identifiable interest in a regulatory area selected by the chairman can make application for a grant according to the conditions stated in the act. The chairman may approve such application only if there is a reasonable likelihood that negotiation will expand the existing areas of consensus among the affected parties, increase cooperation and develop regulatory policy alternatives.

The chairman also must determine whether a commission has properly balanced representation. If it is determined that a commission is not properly balanced, the chairman may include additional members.

The bill also indicates the manner in which grants may be used as well as the reporting responsibilities of each commission at the completion of its negotiations.

Agency participation is limited to observer status. Observers provide information, but are nonvoting and nonnegotiating participants.

Upon receipt of commission reports, the agency must comment on the report within 60 days.

The national coal policy project and toxic substance activities show that vital progress can result from regulatory negotiation. Yet despite the promise this approach holds, its use has been limited. The failure to use it more stems in part from our traditional reliance on adversarial proceedings and in part from costs involved in the process.

Expanding its use will require some encouragement from the regulators. Private parties need to know that funds to meet the costs of negotiation are available, since many vital public and some industry interests could not otherwise afford to participate, that the Government will take the process' results seriously, and that the negotiations will be fairly and impartially structured so that all points of view can be effectively represented.

The program envisioned in this bill will give the concept the impetus and initial funding it needs and deserves, while at the same time providing a laboratory to refine the process where needed. Moreover, in the next few years, several major regulatory policy decisions will be made in areas such as the impact of air and water quality rules on the steel industry and the more effective regulation of chemical wastes, to name a few. Certainly, the time for a less adversial and more productive approach to regulatory policymaking can be no more urgent than it is now.

I might also note that Congressman PEASE of Ohio has also introduced a companion bill on the House side which is very similar to this bill.

Within the coming weeks, Senator ROTH, my distinguished colleague from Delaware and chairman of the Governmental Affairs Committee, will also be introducing a bill entitled "The Regulatory Procedures Reduction Act of 1981." Our bills do differ in key aspects, particularly on the degree of agency participation in regulatory negotiation, and on the manner in which courts review rules derived through regulatory negotiation.

Senator ROTH and I both share a strong commitment to the concept of regulatory negotiation although we differ on precisely how use of the concept can be best achieved. Senator ROTH and I both believe that an alternative approach to the current purely adversarial process is sorely needed. We view regulatory negotiation as a unique opportunity to foster more effective and appropriate regulations and to reduce conflict and delay in the regulatory process. We look forward to working together and to sharing the leadership needed to further the regulatory negotiation concept.

Mr. President, I ask unanimous consent that the text of my bill be printed in the RECORD, together with articles from the August 23, 1980 Providence Journal Bulletin and the November-December 1980 Bulletin of the American Association of Motor Vehicles Administrators urging that this bill be adopted by the Senate.

There being no objection, the bill and articles were ordered to be printed in the RECORD, as follows:

S. 1360

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled, That this Act may be cited as the "Regulatory Negotiation Act of 1981".

TITLE I—GENERAL PROVISIONS

FINDINGS

SEC. 101. The Congress finds and declares that—

(1) Government regulation of the economy has increased rapidly in recent years due to an increased awareness of the environmental, social, and health effects of a variety of economic practices;

(2) although this increased regulation has commendable purposes, it has frequently resulted in contradictory, inefficient, unjustifiably expensive, and often counterproductive requirements;

(3) unnecessary regulation has reached a level that is having a significant adverse effect on the economy;

(4) ineffective regulation has prevented the attainment of important national goals in the areas of the environment, health, and safety;

(5) some of these problems of Government regulation are attributable to the adversarial process of setting regulatory policy, a process in which the best solutions to problems are often ignored by all sides in a dispute in order to maintain their bargaining positions; and

(6) this adversarial regulatory process frequently ignores the expertise and understanding of people working in the affected areas.

PURPOSE

SEC. 102. The purpose of this Act is to establish a pilot program to encourage the voluntary formation of regulatory negotiation commissions as an alternative to the adversarial process of establishing regulatory policy. Commissions receiving assistance under this Act shall be composed of a balanced representation of industry, public interest groups, labor, State and local officials, or other participants with a vital interest in the areas under consideration by the commission, and shall meet to negotiate recommendations on regulatory policy which represent a consensus of the viewpoints of the participants in the commission.

DEFINITIONS

SEC. 103. For purposes of this Act—

(1) the term "regulatory negotiation commission" means a group formed on a voluntary basis by private individuals and organizations to study one or more regulatory policies which (A) contains representatives of all or most of the major positions on the issues under consideration by the commission, and (B) attempts, through negotiation, to reach recommendations on regulatory policy which represent a consensus of the viewpoints of the participants in the commission;

(2) the term "Conference" means the Administrative Conference of the United States;

(3) the term "Chairman" means the Chairman of the Conference; and

(4) the term "agency" has the same meaning as in section 551(1) of title 5, United States Code.

TITLE II—FUNDING FOR REGULATORY NEGOTIATION COMMISSIONS

PILOT PROJECT AUTHORIZED

SEC. 201. (a) In order to carry out the purposes of this Act, the Chairman of the Conference shall establish a pilot program to make available funds for the creation of five regulatory negotiation commissions to be funded in each of the fiscal years 1982 and 1983. Funds made available under this Act shall be for the payment of administrative expenses of regulatory negotiation commissions, shall remain available without fiscal year limitation, and may be augmented by funds from non-Federal sources.

(b)(1) By April 1, 1982, the Chairman shall announce, through publication in the Federal Register and through notices to appropriate journals, newsletters, and other media, the availability of funds under this Act, and shall take whatever other reasonable steps are necessary to provide notice to the public of such funds. The announcement required by the preceding sentence shall specify the areas of regulatory policy for which applications for funds for regulatory negotiation commission projects will be accepted. The Chairman shall only make funds for such projects for matters pertaining to regulatory policy in the areas of health, safety, and the environment, and for which—

(A) a major law has been enacted, but proposed rules and regulations have not been issued;

(B) final rules and regulations have been issued, but are likely to undergo major revision; or

(C) basic statutory changes are contemplated.

(2) The selection of areas of regulatory policy for regulatory negotiation commission projects under this Act shall be at the discretion of the Chairman and shall not be subject to judicial review.

(c) Individuals and organizations with an identifiable interest in any regulatory area selected by the Chairman under subsection (b) may make an application to the Chair-

man for a funding under this Act. Each such application shall—

(1) be signed by all proposed members of a regulatory negotiation commission applying for funding;

(2) include a description of the regulatory area to be discussed, the need for a regulatory negotiation commission in such area, a proposed membership list for the commission and justification for that list, proposed rules for the operation of the commission, a statement of purpose for the commission, a proposed time period for the completion of the work of the commission, and an organization plan and an agenda for the commission;

(3) contain a written commitment signed by all proposed members of the commission to negotiate the issues under consideration in good faith, and to produce a report on the negotiations within a time period appropriate to the regulatory area under consideration; and

(4) include such other matters as the Chairman may by rule require.

(d)(1) The Chairman shall only approve an application under this Act if the Chairman determines that there is a reasonable likelihood that the regulatory negotiation commission applying for funds under this Act—

(A) is able to produce a report that will significantly expand the existing area of consensus among major affected parties in a regulatory area;

(B) is able to significantly increase cooperation between such parties;

(C) will include a balanced representation of the major affected interests in an area, including business and public interest organizations, in accordance with subsection (e)(1); and

(D) can recommend policy alternatives that will provide significant improvements over existing policy.

(2) A determination of the Chairman under this Act with respect to an application shall be at the discretion of the Chairman and shall not be subject to judicial review.

(e)(1) In determining whether a proposed commission meets the requirements of subsection (d)(1)(C), the Chairman shall consider whether the regulatory negotiation commission applying for funds under this Act contains sufficient representation of the major positions of interest in the area of regulatory policy to be considered by the commission in order that each such interest is able to effectively express its views during the deliberations of the commission. The Chairman may not approve an application for funds under this Act—

(A) in the case of a regulatory negotiation commission which will consider regulatory policy in the area of the environment, unless at least one-third of the members of the commission are representatives of business and at least one-third of such members are representatives of environmental organizations;

(B) in the case of any regulatory negotiation commission which will consider issues relating to the health and safety of workers, unless at least one-third of the members of the commission are representatives of workers; and

(C) the Chairman is satisfied that major interests other than the interests specified in subparagraphs (A) and (B), including, labor, consumer organizations, and State and local officials who have a significant contribution to make to the commission are provided with an adequate opportunity to make such contribution.

(2) In order to achieve a balanced representation of interests in a regulatory negotiation commission, the Chairman may suggest to an applicant for a grant under this Act additional members for inclusion in the regulatory negotiation commission to be supported by such grant. An applicant is not required to include members suggested by the Chairman in the commission and the Chairman may not deny an application under this Act for failure to include any such suggested member unless the Chairman determines that excluding such additional member will substantially impair the ability of the applicant to meet the requirements of subsection (d)(1)(C) and paragraph (1) of this subsection.

(f) Funds made available under this Act may be used—

(1) to employ an administrative director for a regulatory negotiation commission, who—

(A) shall be responsible for the administrative operation of the commission and such other mediative or facilitative duties as the commission finds appropriate;

(B) shall not represent any member of the commission with respect to a particular viewpoint in a regulatory area;

(C) shall be compensated at a rate which is not in excess of $45,000 per year; and

(D) shall not be considered an employee of the Federal Government;

(2) to pay travel expenses and per diem expenses for the administrative director;

(3) to pay all other administrative expenses of the regulatory negotiation commission, including but not limited to expenses for duplication of materials, telephone, postage, clerical assistance, and for printing of commission documents.

(g) Funds made available under this Act shall be used for no other purpose unless expressly authorized by the Chairman.

(h) Each commission receiving funds under this Act shall issue a report at the conclusion of its negotiations outlining areas of consensus, areas of disagreement, and recommendations, and containing any background material the commission may consider appropriate.

(i) Any regulatory negotiation commission receiving funds under this Act may change its membership, rules, or agenda at its discretion if the commission submits each such change to the Chairman for review. If the Chairman determines that any such change will substantially impair the ability of the commission to carry out the purposes of this Act, the Chairman may (1) suggest additional changes to assure consistency with the purposes of this Act, or (2) require the commission to repay the Government any funds provided by this Act which have not been obligated or expended. The Chairman may not require a commission to make repayment under this subsection unless the Chairman determines that efforts to assure consistency with the purposes of this Act have failed.

(j) Any meeting of a regulatory negotiation commission receiving funds under this Act shall be open to the public unless a majority of the commission members vote to close the meeting. All open meetings shall be announced at least 15 days prior to their occurrence in the Federal Register and a record shall be prepared of such meetings.

(k) By April 1, 1982, the Chairman shall issue rules and regulations to carry out the provisions of this section.

GOVERNMENT PARTICIPATION IN COMMISSION NEGOTIATIONS

SEC. 202. An agency shall send an observer to any regulatory negotiation commission requesting an observer. An agency observer shall report to the agency concerning commission activities, shall provide information to the commission, and may make suggestions to the commission. An agency observer may not negotiate regulatory policy positions on behalf of his agency, and the view of the agency observer shall not be considered to represent the formal position of his agency. An agency observer may not be present at a closed meeting of a regulatory negotiation commission.

GOVERNMENT COMMENTS ON COMMISSION REPORTS

SEC. 203. (a) An agency shall comment on the report of a regulatory negotiation commission receiving funds under this section within sixty days after the receipt of such report, except that in any case in which proposed regulations are pending with respect to an issue considered by a commission, any agency shall make such comments within thirty days after the issuance of final regulations with respect to such issue.

(b) Agency comments on commission reports shall be transmitted to all appropriate committees of Congress for potential review and action.

(c) All Federal agencies engaged in the areas of health, safety, and environmental regulation shall assure that the recommendations and reports of any regulatory negotiation commission which is voluntarily established by private parties and is not receiving a grant under this Act are seriously reviewed by the appropriate agencies.

TITLE III—MISCELLANEOUS

EXEMPTIONS

SEC. 301. (a) The provisions of any law or rule relating to prosecution for ex parte communications shall not apply to any communications between an agency of the Federal Government and any regulatory negotiation commission.

(b) Except as may be provided by rule promulgated by the Chairman, the provisions of sections 553 through 559 of title 5, United States Code, and the Federal Advisory Committee Act do not apply to any regulatory negotiation commission receiving funds under this Act or the report of any such commission, the participation of agency observers in any such commission, the response of agencies to the recommendations of any regulatory negotiation commission, and any other function to carry out this Act or regulations promulgated pursuant to this Act.

CONFORMING AMENDMENT

SEC. 302. Section 575(c) of title 5, United States Code, is amended by striking out "and" at the end of paragraph (14), by striking out the period at the end of paragraph (15) and inserting in lieu thereof a semicolon and "and", and by inserting after paragraph (15) the following new paragraph:

"(16) make grants under the Regulatory Negotiation Act of 1981.".

REPORT TO CONGRESS

SEC. 303. By January 1, 1984, and at such other times as he finds appropriate the Chairman shall report to the Congress on the pilot program established pursuant to this Act, including an analysis of the activities of regulatory negotiation commissions supported pursuant to this Act and such recommendations the Chairman finds appropriate for further action to expand the use of such commissions.

AUTHORIZATION OF APPROPRIATIONS

SEC. 304. To carry out the purposes of this Act, there are authorized to be appropriated to the Administrative Conference of the United States such sums as may be necessary.

CONGRESS MULLS A SOUND REFORM TO THE REGULATORY PROCESS

While Congress has been struggling for the past several years with the idea of deregulation, some members are beginning to question the whole regulatory process. Testimony before congressional committees has shown how an agency, created as a watchdog to stop foxes from stealing chickens, can evolve into a fatcat with its own appetite for chickens.

All of this got some congressmen to thinking that someone ought to be watching the watchdog. Out of this line of reasoning has sprung a new bit of jargon—"reg-neg," standing for regulatory negotiation—and a

bill, currently being written by three senators, that could evolve into a governmental reform along the order of sunset legislation and congressional budgetary review.

The senators hope their idea would help prevent the confrontations caused by regulations hatched in bureaucratic cloisters, and laid on industry as a fait accompli. The examples are familiar and legion: The EPA sets new standards of environmental purity. The CAB adopts a new fare schedule, or the FAA adopts a new air safety code. The FDA determines that a chemical substance is carcinogenic, bans it, then changes its mind after industry has spent huge sums developing alternative substances.

Arbitrary changes in regulations and masses of paper work create a pervasive negative attitude within the business community toward government. Billions of dollars are lost to the national economy every year from arbitrary decisions imposed on industries, sometimes justifiably and sometimes not. Millions of man-hours are lost fighting cases through boards of appeal and the courts. And many a firm has had its name irrevocably stigmatized by charges from government agencies which later proved unfounded.

The group of senators hope their new bill will transform the regulatory process from an adversary procedure to a cooperative one. They seek to set up a pilot program of panels in several regulatory agencies. The panels, made up of business, labor and public-sector representatives would have a say in policy direction, checking out proposed new regulations for potential trouble spots and trying to work the problems out before they happen.

The aim is to ensure that regulations are based on objective data rather than on bias or incorrect assumptions, to keep costly paperwork to a minimum, and to work out in advance potential direct conflicts between public policy and private practice so as to eliminate time-wasting and costly litigation later on.

Is this approach practical? A similar system has worked in Japan—admittedly a dissimilar society—and supporters cite a precedent in this country, the National Coal Policy Project.

"Reg-neg" would take deregulation one step forward. Useful as that effort has been, its results are limited because it attempts to dismantle structures already in place. As anyone who has tried to change bureaucratic ways has learned,—including every president in recent memory—bureaucracies are enormously resistant to change. If "reg-neg" can minimize the perceived threat, and therefore the resistance, by working within and as part of the bureaucratic structure, a major cause of the distrust and disillusionment that has grown between the private sector and government might be removed.

It's certainly worth a try. The Senate should pick this one up and run with it.

THE EXECUTIVE DIRECTOR

(By Donald J. Bardell)

The 96th Congress has adjourned, *sine die*, and the bills that it enacted are a matter of record. However, there were some measures that came before the lawmakers during this session—and for a variety of reasons not passed—that seemingly offer considerable merit.

Such is the case, in our judgment, with the concept underpinning the proposed Regulatory Negotiation Act of 1980 (S. 3126), which has become more commonly known among congressional observers as "Reg/Neg."

The purpose of the Reg/Neg bill is to establish a pilot program to encourage the voluntary formation of regulatory commissions as an alternative to the adversarial process of establishing regulatory policy—which currently is so prevalent throughout the federal government.

The proposed legislation would authorize establishment, under the Administrative Conference of the United States, of up to five pilot regulatory negotiation commission projects, in the area of health, safety and the environment for which (a) a major law has been enacted, but proposed rules and regulations have not been issued; (b) final rules and regulations have been issued, but are likely to undergo major revision; or (c) basic statutory changes are contemplated.

These regulatory negotiation commissions would be composed of a balanced representation of industry, public interest groups, labor, state and local officials, or other participants with a vital interest in the areas under consideration by the commission. They would meet to negotiate recommendations on regulatory policy—such as highway and motor vehicle safety, fuel efficiency, and clean air standards—which represent a consensus of the viewpoints of the participants in the commission.

The AAMVA and its state jurisdictional members have long maintained that being limited to commentary on proposed rules and regulations after they are published in the Federal Register—without any opportunity to provide input during their formative stages in the federal agency—tends to set-up an adversial process with respect to the development of virtually all federal rules, regulations and standards.

This places AAMVA and the states—or anyone else petitioning for a change in a proposed federal rule, regulation or standard—in the position of seeming to critically attack and undermine a measure that dedicated federal civil servants, with a measure of expertise in the area in question, have spent hours in developing. On the other hand, the federal agency is placed in a position of "pride of authorship"—to defend the product that it and its staff of experts have developed. Consequently, the adversial process ensues.

The congressional findings embodied in the Reg/Neg bill very perceptively point out: "(This) adversarial regulatory process frequently ignores the expertise and understanding of people working in the affected areas."

Furthermore, the ineffective (or unneeded) regulation that ensues from this adversarial process has often prevented the attainment of important national goals in the areas of the environment, health, and safety, the findings stress.

Our Association suggested a consultative process similar to the concept embodied in the Reg/Neg bill on motor vehicle theft prevention legislation (HR 4178), when we testified at hearings held by the House Committee on Interstate and Foreign Commerce.

In order to ensure a meaningful consultative process in the development of motor vehicle security standards that would have been authorized by the proposed vehicle theft prevention legislation, the AAMVA suggested an amendment that would have directed the Secretary of Transportation to develop a consensus with the named organizations with which the legislation directed him to consult. In addition, the AAMVA further suggested that the Secretary consult with other groups and individuals interested in, or affected by, the motor vehicle theft problem.

Had such a regulation negotiation concept—embedded in the development of a consensus among those impacted—been in effect when the National Highway Traffic Safety Administration promulgated the Federal Motor Vehicle Safety Standards on a uniform Vehicle Identification Number (VIN), it would not have been possible for the federal agency to propose a VIN Standard that was at the time opposed by all 50 states, as well as significant segments of the private sector. This actually was done, despite the fact that state motor vehicle and traffic law enforcement agencies are the principal users of VIN information.

Time constraints in the waning days of the 96th Congress prevented a full consideration of the proposed Reg/Neg legislation by the lawmakers. Consequently, it was not enacted. However, the AAMVA believes that the concept on which Reg/Neg was based is one that is meritorious; and perhaps one for which the time for careful consideration is at hand in the 97th Congress.

If the concept inherent in Reg/Neg can make a significant contribution toward ameliorating the adversarial regulatory process that seemingly is so pervasive in federal/state/private sector relations, the effort will have been well worthwhile.

By Mr. HATCH (for himself, Mr. QUAYLE, Mrs. HAWKINS, Mr. DENTON, Mr. EAST, Mr. SYMMS, Mr. HELMS, and Mr. GARN):

S. 1361. A bill to amend title IX of the Education Amendments of 1972 relating to sex discrimination; to the Committee on Labor and Human Resources.

AMENDMENT OF EDUCATION AMENDMENTS OF 1972 RELATING TO SEX DISCRIMINATION

Mr. HATCH. Mr. President, I rise today to address one of the most abused relationships to be found in our society. I refer to the delicate and complex relationship between the Federal Government on the one hand and State and local institutions on the other. This relationship—expressed by the term "federalism"—is unique in its division of authority and responsibility. It commits to the jurisdiction of the National Government certain specified national concerns and reserves all else to State and local governments or to individuals and private organizations as the case may be.

Over the past 200 years we have come to recognize the wisdom of this arrangement in preserving individual and local governmental liberty during an age devoted to centralization, bureaucracy, and national prescription in nearly every facet of our lives. We have seen the relentless encroachment of Federal statutes and regulations sap our initiative, hamstring our State and local governments and private organizations, and rob us at the national level of that one blessing we must have in order to govern well—the confidence, love, and respect of our people.

Federalism is truly the sail which harnesses the collective energies of our people, but for some time now it has been poorly set to the wind.

The balance which invigorates our Federal system has been disturbed, sacrificed by those whose zeal for what they label goals of national policy overcame their respect for our constitutional constraints. The sixties and seventies saw the ascendancy of these reformers who were so single minded that they advocated the most extreme and tenuous extensions of Federal authority in order to serve their ideals. Theirs was a classic "ends-justifies-the-means" movement, whose slogan was expediency. These decades also recorded the unfortunate compliance of legislators and judges who, in the name of progress, effectively dismantled much of that Federal system.

Finally, however, the people have spoken—it is time for a change, not just in the people who fill positions, but in

the concept of Government in the eighties. It is time to realize that there are some areas, more areas than not, where the Federal Government should not act and where its intervention is counterproductive if not constitutionally unwise. It is time to realize that there are some things, even worthy things, the Federal Government just cannot and should not do, though it could in fact do them through the abuse of its power. Nowhere has the Federal Government's interventionism left a sorrier legacy than in the area of education, a field long considered especially suited for local control.

Says Prof. Joseph Adelson of the University of Michigan in an article printed in the March issue of Commentary, speaking of the loss of discipline in public schools and of their resulting loss of public confidence:

> Perhaps the most important source of the school's diminished authority is the growth—I am tempted to say the cancerous growth—of judicial and bureaucratic intervention, generally at the Federal level. . . . It is an extremely troublesome development, since neither the courts—given their adversarial style—nor the bureaucracies—given their tendency toward Byzantine inefficiency—are the appropriate forum for the discussion or the making of education decisions . . .
>
> In short, all the three branches of Government, and furthermore separate or overlapping or competing units within these branches, take it as their privilege to intervene in education. They do so with almost no regard to the financial costs involved. And once they have done so, their decisions, however erroneous or short-sighted these turn out to be in practice, prove nearly impossible to modify or rescind.
>
> Thus the authority of education—at all levels—is weaker today, far weaker, than any other moment in memory. The schools do not fully govern themselves; they do not freely choose their own goals; they are not guided by their own values.

Indeed our schools often are not guided by any values other than those sanctified by publication in the Federal Register.

On the national level education has departed from basic values. We have indulged in a species of social fanaticism which led us to believe that American society should and could be reshaped in a particular mold by the brute imposition of Federal wealth and power upon local schools, colleges, boards of education, indeed upon individual students and families.

Now is the time to reassess that course. The proud sail of federalism is flapping feebly in the wind, and we feel we drift powerless as the allegiance, the devotion of our citizens for their Government fade.

The Federal Government has a role to play in education: The role of facilitator, support, resource; not the role of headmistress, enforcer, despot. We have before us an opportunity to turn our feet again to the path of reason. I am introducing a bill which makes a limited but significant start in restoring restraint to Federal involvement in education. The subject is title IX of the Education Amendments of 1972, which prohibits sex discrimination in activities which receive Federal financial assistance.

I support the idea that women and girls should receive fair and evenhanded treatment in our schools. But both bureaucratic and judicial interpretations of title IX have wandered far from its original intent; it has become a showcase of Federal intervention at its worst.

Title IX's intent is to prevent Federal funds from being used in an activity characterized by discrimination on the basis of sex.

The authority of the Department of Education to issue regulations and withhold Federal funds is accordingly limited in the statute to the particular program or activity so affected. As has been pointed out by Janet Lammerson Kuhn in perhaps the most careful published analysis of these issues, this "program-specific" approach is clearly indicated by both the language of title IX and by its legislative history and context. ("Title IX: Employment and Athletics Are Outside HEW's Jurisdiction," 65 Georgetown L. J. 49, 67–70 (1976).)

In other words, the interests of the Federal Government in this area flow only as far as its money. As originally reflected in title IX's intent, we here in Congress have no justification in this area for regulating education programs or activities which receive no Federal funds; and it is open to question to what extent we should wisely regulate those activities which do receive Federal moneys.

So far, so good. But the Department of Education and its predecessors, in a protracted pilgrimage to the shrine of social activism, have sought to make title IX the irresistible engine for bulldozing from the school halls of our Nation practically all distinctions based on sex. It has been made an efficient instrument for stamping the rules of statistical equality upon the forehead of every school administrator, teacher, and student in America.

How is this done? The Department of Education has in the past decreed that title IX governs all activities at any school or education institution which in any one of its programs or activities benefits, I repeat, benefits from Federal assistance, or at any school one of whose students receives, for example, a guaranteed student loan. Now where in this Nation is there a school without an activity which does not somehow benefit from Federal assistance under this test?

The possibilities for expanded jurisdiction through these nonstatutory definitions are almost limitless and have been thoroughly explored in the regulations. What facet of federalism, what practice of sound administration, what principle of fairness requires the Federal Government to subject to hundreds of pages of regulations the entire range of activities of a school whose modern language program has received a hundred dollar grant or whose only Federal contacts are the loans extended its students?

Further, the Department of Education has made itself the guardian of sex equity in employment at institutions it regulates, despite the fact that the drafters of title IX intended that this facet of employment be governed by amendments enacted to the Equal Pay Act of 1963, administered by the Department of Labor, and to title VII of the Civil Rights Act of 1964, now administered by the Equal Employment Opportunity Commission. It was never their design that sex equity in the education job market be administered by the Department of Education through title IX as codified at 20 U.S.C. 1681–82. For further elaboration I again defer to Mrs. Kuhn's treatment of this issue in the same article I have cited before (pp. 49–62).

These regulatory results are not required by the statute and are not prudent as a matter of policy. Though we have hope for a modification of these policies under the current administration, abuses of the past will never be conclusively laid to rest without amendment of the act itself. The amendment I propose reforms the regulations and restores reasonable limits to title IX's reach. It has four purposes:

First, to reinforce the "program-specific" nature of title IX's prohibitions, and limit regulations accordingly.

Second, to shift the administrative focus of the law to programs and activities which receive Federal financial assistance, as stated in the statute, and away from financial aid to students. The amendment would dispose of the issues in the Grove City College versus Harris case, currently in litigation, in which the Department of Education has contended that Federal aid to a student is sufficient by itself to subject to title IX all the activities of whatever school he or she decides to attend.

Third, to expressly restrict the scope of the act to those who are or have applied to be students, not faculty.

Fourth, to, for the first time, expressly acknowledge jurisdiction of the act over admissions to institutions conducting one or more federally assisted activities, in order to insure nondiscrimination as to that activity.

This amendment is not intended as an exhaustive overhaul of title IX or its regulations. Though it addresses some of the worst abuses which have developed, there are sure to be other areas that would profit from review as well. Yet, this amendment will serve notice that Congress will not sit idly by while words are placed in its mouth by a verbose bureaucracy. It will save untold dollars and personnel hours taken from education service delivery and diverted to satisfying the unreasonable inquiries and requirements of those who have administered title IX.

It will preserve local and State freedom of action while protecting legitimate Federal interests. It will help restore confidence in the capacity of our National Government to exercise self-restraint. It will begin to dispel from the vital enterprise of education that atmosphere of antagonism and distrust which has impeded cooperation among Federal, State, and local authorities.

It is time to get back to basics: The basics of teaching our youth the essential skills they need to become happy, productive, informed citizens; the basics of encouraging, not stifling that variety and individuality which must enrich our

society if we are to resist the pressures toward enforced conformity and authoritarianism in the name of efficiency which we see in so many other nations.

Title IX is an example of good intentions gone awry. In their zeal to eliminate sex discrimination in education the Department of Education and its predecessors in the past have overstepped their bounds. To quote Mrs. Kuhn in conclusion: "The end of equal educational opportunity does not justify the assumption of legislative functions by an executive department."

Mr. President, I ask unanimous consent that the text of this salutory amendment be printed in the RECORD.

There being no objection, the bill was ordered to be printed in the RECORD, as follows:

S. 1361

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled, That the matter preceding clause (1) of section 901(a) of the Education Amendments of 1972 is amended—

(1) by inserting after "United States" the following: "who is a student";

(2) by inserting "which itself" after "activity";

(3) by deleting "receiving" and substituting therefor "receives"; and

(4) by inserting after "Federal financial assistance," the following: "and no person who has applied for admission to any educational institution or organization conducting for the benefit of its students any such Federally assisted program or activity shall be denied admission to such institution or organization on the basis of sex,";

SEC. 2. Section 901 of the Education Amendments of 1972 is amended by redesignating subsection (c) as subsection (d) and by inserting after subsection (b) the following new subsection:

"(c) In order to carry out the policy of the United States that Federal jurisdiction under this title affecting the policies and practices of educational institutions or other organizations conducting education programs or activities shall not exceed the extent of Federal financial assistance—

"(1) this title applies only to those education programs or activities conducted by an educational institution or organization which programs or activities themselves receive Federal financial assistance which a Federal department or agency is expressly authorized by statute to extend by way of grant, loan, or contract other than a contract of insurance or guaranty; and shall not apply to any education program or activity to which the department or agency is not expressly authorized by statute to extend Federal financial assistance, or which does not itself receive such assistance, regardless of whether: (A) the program or activity is within the same educational institution or organization, or administrative unit or subunit thereof, as a program or activity which does receive such assistance, (B) is deemed to benefit from assistance received by any other such program or activity, or (C) is otherwise related to such a program or activity; and

"(2) nothing in this title shall be construed to make its provisions applicable to any education program or activity of, or to the admissions practices of, any educational institutional or organization because any of its students receives Federal financial aid to assist in financing his or her education, by way of scholarship, grant, loan, wages, reimbursement or otherwise, regardless of whether such aid is received through the institution or organization; except that if the educational institution or organization has substantial responsibility for administering a Federal student aid program and has discretion to determine which students will receive the aid, the institution or organization shall not, unless pursuant to express Federal statutory authorization, discriminate on the basis of sex in the award of aid under such aid program."

SEC. 3. Section 901(d) of the Education Amendments of 1972 (as redesignated by section 2 of this Act) is amended by adding at the end thereof the following new paragraphs:

"(2) For purposes of this title 'Federal financial assistance' means only financial assistance by way of grant, loan or contract other than a contract of insurance or guaranty, extended pursuant to a Federal statute expressly authorizing such assistance, to an education program or activity which itself receives the assistance. Without limitation, 'Federal financial assistance' does not include scholarships, loans, grants, wages or other funds extended directly to students; participation in a program or activity by students who receive scholarships, loans, grants, wages or other Federal student financial aid; or mere consequential effect of Federal financial assistance where the assistance is not received by the program or activity which is deemed to be affected.

"(3) For purposes of this title, 'admission' or 'admissions' means the granting, to applicants, of access to an educational institution or organization and the education programs and activities it offers for the benefit of its students, but shall not include any other program or activity which does not itself receive Federal financial assistance."

SEC. 4. The first sentence of section 902 of the Education Amendments of 1972 is amended by inserting before the period a comma and the following: "and which shall not apply to programs or activities to which the department or agency is not authorized to extend Federal financial assistance by any such statute".

● Mr. QUAYLE. Mr. President, today I am cosponsoring legislation with Senator HATCH which seeks to amend title IX of the Education Amendments of 1972. I am taking this step to protect institutions of higher learning from the zealousness of the Department of Education which has gone beyond the bounds of commonsense.

In 1978, the Department of Health, Education, and Welfare sought to terminate all financial assistance to students attending Hillsdale College in Michigan under the national direct student loan program, BEOG program, the supplemental educational opportunity grant program, and the guaranteed student loan program because the college refused to execute an assurance of compliance with title IX.

An administrative law judge ruling on the case in August 1978, found that although the NDSL, BEOG, and SEOG programs all constituted Federal financial assistance to Hillsdale, the GSL program fell within the exception in title IX for contracts of guaranty. DHEW appealed the decision and an administrative appeals panel reversed the GSL finding and ordered DHEW to withhold funds until a compliance form was signed by the college.

In an effort to have this order revoked, Hillsdale appealed the decision in the sixth circuit, U.S. Court of Appeals, and is awaiting the court's action.

The point at issue here is whether DHEW, now the Department of Education, has jurisdiction over schools simply because students at the school accept Federal financial aid. Schools like Hillsdale have a history of refusing any form of Government assistance for fear that its acceptance would bring them under the regulatory thumb of the Federal Government.

The controversy over whether the Department of Education can apply title IX regulations to schools which do not accept Federal financial assistance but whose students do accept loans and grants continues to be unresolved. It is for this reason that I am cosponsoring this amendment to title IX. The Federal Government's attempts to overregulate must be curbed, and it appears that a statutory remedy is the most direct approach to solving this problem. I hope you will join with Senator HATCH and me in seeing that these inequities are corrected.●

By Mr. HATCH:

S. 1362. A bill entitled the "Voluntary Vitamins Act of 1981"; to the Committee on Labor and Human Resources.

VOLUNTARY VITAMINS ACT OF 1981

Mr. HATCH. Mr. President, one of the corollary rights we as Americans have the liberty of taking for granted, is the freedom to buy vitamins, minerals, and other food nutrients which in more regulated societies are only dispensed through doctors' prescriptions or are banned altogether. This basic American freedom has nonetheless been jeopardized several times during the past few years. The most recent danger came in the form of last year's initial plans by the Food and Drug Administration to regulate vitamins and minerals as over-the-counter drugs.

If labeled or promoted as preventing a vitamin or mineral deficiency, as for example is the case with "One-a-Day" brand vitamins or the other rival vitamin tablets we are able to buy in supermarkets or drug stores, the Federal Food and Drug Administration would have presumably required a doctor's prescription or some other form of market interference before we could purchase our bottles of Geritol or boxes of Total cereal. How ironic it is that at a time when States are making it easier to buy marijuana or alcohol, the FDA would lead a national Hallelujah Trail against our freedom to buy vitamins and minerals.

The most recent sighting of the FDA war against vitamins was on March 16 of last year, the date when the Federal Register published FDA's proposal to regulate vitamins and minerals as I have described it. It is not dissimilar from an FDA proposal issued in June 1962, intended to limit the sale of vitamins and minerals as Rx or prescription only drugs, and to outlaw the sale of vitamins altogether if sold in potencies or combinations FDA has arbitrarily set as too high.

In 1976, the U.S. Congress unanimously voted for the bill which has since been enacted into law as the Wilson-Proxmire Vitamin Act, signed into law

by then President Ford on April 22, 1976. This statute spared us the imposition of FDA's requirement that we purchase vitamins as Rx drugs. But under the FDA regulations last threatened to be promulgated, this law would be circumvented, and we would be forced to purchase vitamins as over-the-counter drugs.

I do confess to taking a few vitamin pills now and then. I will even go further and admit that I am like millions of other American consumers who for various health reasons choose to supplement our diets with a wide variety of vitamins, minerals, and other so-called health foods.

Every reasonable and informed American who cares about health issues appreciates and supports the critical mission of the Food and Drug Administration to preserve the safety and efficacy of pharmaceuticals. But we also recognize that with the excessive proposals such as last season's FDA plan to make it as difficult to get a bottle of vitamins as it is to buy a bottle of pencillin, the agency is shooting itself in the foot. It is fortifying its self-image among all too many Americans as a harasser and belittler of American consumers. In time, the FDA would run the risk of being reviled as the OSHA of the culinary arts.

An FDA plan to tighten up restrictions on the sale and purchase of vitamins and minerals would be excessive. The nature of the marketplace requires some Government guarantees of the safety of the products we buy, but in this case the Food and Drug Administration would have gone beyond the brink.

I have described the worst of it. Now for the good news. One of the brightest days for both consumers and pharmacy people in our country occurred when President Reagan selected as the new Commissioner of the Food and Drug Administration, Dr. Arthur Hull Hayes. A distinguished academic, physician and student of Government, Dr. Hayes is one of the most knowledgeable pharmacological professionals in our country. Having shared conversation with him on several occasions, I additionally commend his practical knowledge of the practical problems daily plaguing American consumers, problems which more often than not have their source traced to previous legislative acts of this distinguished body. To be precise, I am talking about the misdeeds of past Congresses.

Confident as I am in the new administration of FDA under Commissioner Hayes, I am equally certain that we will not be forced to witness the varieties of regulatory imprudence to which I earlier referred. However, knowing that the FDA will soon have the responsibility of reviewing past and pending over-the-counter drug and food nutrient proposed regulations, I solicit the support of my colleagues supporting legislation I am today introducing, entitled The Voluntary Vitamins Act of 1981. Similar to legislation I introduced last year, as S. 2297, my bill leaves no doubt that the Congress intends and recognizes that vitamins, minerals, herbs, and enzymes will be advertised, labeled, promoted and sold as foods for special dietary use rather than as Rx or OTC drugs when sold to consumers by the food supplement and health foods industry to prevent vitamin and mineral deficiency diseases or conditions.

I also encourage Commissioner Hayes to consider the letter and spirit of my bill. His administrative and deregulatory actions if taken would make the need for this legislation unnecessary, and no one would be more delighted than myself. In the meantime, the time for Congress to act is now. Now is the appropriate moment to make clear our legislative intent, and to encourage the FDA through the good offices of its promising new leadership to stay within the policy boundaries set by my legislation. I ask unanimous consent that the text of my legislation be printed in the RECORD.

There being no objection, the bill was ordered to be printed in the RECORD, as follows:

S. 1362

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled, That the Federal Food, Drug, and Cosmetic Act (21 U.S.C. 321 (s)) be amended so that (1) to section 201 (s) shall be added a 6th exemption: "(6) the food itself, a combination of foods, or foods for special dietary use, or the ingredients thereof, unless being used as preservatives or flavors for a food"; and (2) to section 201(g) shall be added the words, "Foods for special dietary use, when offered or employed for purposes as defined in section 411(c)(3) of this act or for preservation or treatment of dietary deficiency conditions shall not be classified as drugs."

By Mr. HATCH (for himself, Mr. KENNEDY and Mr. HAYAKAWA):

S. 1363. A bill entitled the Saccharin Study and Labeling Act Amendment of 1981; to the Committee on Labor and Human Resources.

SACCHARIN STUDY AND LABELING ACT AMENDMENTS OF 1981

Mr. HATCH. Mr. President, the subject of food safety and the problems surrounding the administration of the Food, Drug, and Cosmetic Act have been brought to the attention of the Congress a number of times in recent years. Perhaps no other single issue demonstrated the problems inherent in food safety decisionmaking as vividly as the controversy surrounding saccharin.

The attempted banning of saccharin from the food supply by FDA in 1977 created an immense uproar and resulted in the FDA and the Congress being deluged with an unprecedented volume of mail questioning FDA's ability to make rational food safety decisions. The net result of this public outcry was the unfortunate loss of credibility suffered by FDA and the need for Congress to intervene in the decisionmaking process. Since that time, Congress acted twice (Public Law 95–203 and Public Law 96–345) to assure the continued availability of saccharin to the American public.

I believe that a review of the history of saccharin, the scientific studies conducted and now in progress, and a weighing of the consequences of keeping it on the market, will lead to the inescapable conclusion that saccharin should continue to be available to the American public for at least another 2 years. Thus I am introducing today legislation which would provide for a 24-month extension of the current moratorium on FDA action against saccharin, effective from the date of enactment.

I am pleased to have as initial cosponsors of this legislation, my colleague and the distinguished ranking minority member on the Committee on Labor and Human Resources, Senator Kennedy, as well as the distinguished Senator from California, during whose term on the committee had been very active on this issue, Senator SAM HAYAKAWA. This bill would continue to require the warning statement mandated by the Saccharin Study and Labeling Act (Public Law 96–203) and would allow the American public the option of using saccharin in their foods while at the same time provide the manufacturers of saccharin products with a degree of certainty in developing their marketing strategies.

Saccharin has been surrounded by controversy almost continually since its accidental discovery in 1879 by Dr. Constantin Fahlberg, who was working under the direction of Prof. Ira Remsen at Johns Hopkins University. The initial controversy began with Fahlberg and Remsen themselves over the legal rights to saccharin. Remsen won a moral victory among his peers in the scientific community with an award from the Society of Chemical Industry, while Fahlberg won the legal rights by securing a patent on saccharin in 1895.

Shortly thereafter, saccharin found varied use as a sweetener in canned fruits and vegetables, baked goods and beverages, and is the therapeutic treatment of diabetes and obesity. It also began to stir up debate about its safety. Late 19th century tests in humans showed no apparent effects at daily doses of 5 grams. However, some investigators claimed adverse effects on digestion from saccharin. Then, as now, the primary attention was focused on the claims of adverse effects.

Two of the earliest combatants over saccharin were Dr. Harvey Wiley and President Teddy Roosevelt. Dr. Wiley objected to the use of the name saccharin feeling that it led consumers to believe they were eating sugar. He also considered saccharin-containing foods to be adultered since saccharin, contributing no calories, was clearly not comparable to sugar. Dr. Wiley also objected to saccharin on health grounds. He apparently was quite concerned over reports that sufficiently high levels of saccharin fed over a long enough time resulted in gastrointestinal disturbances.

The war between Dr. Wiley and proponents of saccharin escalated when President Teddy Roosevelt reacted with his timely observation that, "Anybody who says saccharin is injurious to health is an idiot." Dr. Wiley reacted at the time that he had become the first Government official to have his mental incompetency established by official pronouncement.

The saccharin controversy, of course, did not end with President Roosevelt's

pronouncement. In fact, there was hardly a pause before a panel of scientists was established to review the safety of saccharin, an approach not unheard of today. This panel chaired by Prof. Ira Remsen, concluded that although prolonged daily intake of large amounts (especially more than 1 gram) of saccharin could lead to disturbed digestion, daily intakes of up to 300 mg were apparently without effect. Having received this favorable panel report on saccharin, the Federal Government nevertheless promptly issued an order prohibiting the use of saccharin in foods. Before the order was effective, its inconsistency with the panel report was highlighted and effective date of the order was postponed. Saccharin was then referred back to the panel and a second report was issued leading to approval of its use in foods intended for invalids.

Saccharin's use gradually increased in the early 1900's, continuing to grow with the scarcity of sugar at the time of World War I.

During this same period, toxicological attention on saccharin was also increasing with numerous tests in humans as well as a variety of animal species. The results continued to receive differing interpretations but a 1942 editorial in the Journal of the American Medical Association concluded that there was no reason why saccharin could not be used continuously in average sweetening doses for an indefinite period.

Saccharin's use grew significantly during World War II. In 1950 when cyclamates became available, the two sweeteners were used successfully in combination. The first chronic test on saccharin was performed by Dr. Fitts-hugh, et al., in 1948–49 with the conclusion that saccharin was without effect at feeding levels up to 1 percent of the rat diet and was only slightly toxic at the 5-percent level.

The periodic review of saccharin which had been started in 1911 by Teddy Roosevelt was continued in 1955 with a review being made by the National Academy of Sciences. That review concluded that saccharin was relatively nontoxic and that the maximum tolerated dose was at least 1 gram per day. The Academy report also concluded that cyclamates alone or in combination with saccharin were safe for human use.

Consumer demand for low-calorie and noncaloric foods and beverages increased significantly in the early 1960's, as did demand for saccharin and cyclamates. By then the 1958 food additives amendment to the Food, Drug, and Cosmetic Act had been passed and saccharin and cyclamates were classified. The increasing use of the artificial sweeteners led FDA to request another safety review by the National Academy of Sciences in 1967–68. The Academy again concluded that saccharin was safe at levels up to 1 gram daily but recommended additional testing. In 1968 the FAO/WHO Joint Expert Committee on Food Additives—JECFA—set an acceptable daily intake of 5 mg/kg for general consumption and 15 mg/kg for dietetic foods, for saccharin.

With the banning of cyclamates in 1969 saccharin became the only available noncaloric sweetener and FDA once again asked the National Academy of Sciences to review the safety of saccharin. In their 1970 report the Academy again concluded that saccharin was safe but again recommended additional testing.

FDA removed saccharin from the GRAS list in 1972 based on concern over results in a chronic rat-feeding study conducted by the Wisconsin Alumni Research Foundation—WARF. FDA also imposed labeling requirements on saccharin-containing foods, advising consumers that such products should be used only by persons who must restrict their intake of ordinary sweets. Once again FDA asked the Academy to review the safety of saccharin which resulted in still another NAS report in 1974. The 1974 report essentially reiterated the 1970 conclusions but called for specific additional research including a study involving in utero exposure and investigation of the impurities in saccharin.

FDA subsequently decided that a Canadian Government study involving in utero exposure, a single dose level of 5 percent purified saccharin in the diet, and a treatment group exposed to orthotoluenesulphonamide (OTS, the major impurity in commercial saccharin) met the testing recommendations of the NAS. Preliminary results from the Canadian study which became available in March 1977 indicated no effect associated with OTS but showed both benign and malignant bladder tumors in the second-generation male rats consuming 5 percent saccharin. FDA then announced its intention to ban saccharin. Acting Commissioner Sherwin Gardner stated that:

> We have no evidence that saccharin has ever caused cancer in human beings. But we do now have clear evidence that the safety of saccharin does not meet the standards for food additives established by Congress.

In other words. FDA took the position that the Canadian results would not legally permit approval of saccharin under either the Delaney clause or the food additive provision of the act.

FDA's interpretation led eventually to the statutory moratorium (Public Law 95–203) on regulatory action against saccharin and to still another review of saccharin by the NAS, this time mandated by Congress. The NAS reports on saccharin, issued in November 1978, and on food safety policy, issued in March 1979, utilizing the Delaney clause definition of a carcinogen, concluded that saccharin was a weak animal carcinogen but that it should be regulated along with all food additives under a new food safety policy. That new policy would entail consideration of both the risks and the benefits associated with the use of food additives. About a year later the controversy surrounding saccharin was still as great as ever and Congress extended the moratorium against regulatory action.

In order to better understand the science surrounding the saccharin controversy, one must begin by reviewing the animal evidence. The basic problem there is one of definition. If we use the Delaney clause definition that a substance associated with an increased incidence of tumors in animals, regardless of the test conditions, is a carcinogen, then saccharin is indeed a carcinogen albeit a weak one, with an associated risk probably equivalent to something between the risk of death from lightning and the risk of death from an occasional airplane trip. But such a black-and-white definition is not adequate to reflect the many complexities of what we simply call carcinogenesis. Neither does it make good sense from a realistic public health point of view to ignore the clear differences between saccharin and the aflatoxins or nitrosamines, for example, by simply defining each as a carcinogen and letting it go at that.

It has been established that saccharin is not metabolized, does not bind to DNA, does not show other obvious biological activity, does not show any consistent genetic effect and produces chronic effects only in second generation male rats exposed in utero to high doses. I would also point out that it is ironic that saccharin is so innocuous that it can be fed at very high levels. If saccharin were like most other test compounds it could not have been fed at such high levels, there would have been no indications of chronic effects and we would not be here today talking about it. Nonetheless, we do need to know more scientifically about the mechanisms associated with saccharin toxicity (as well as the toxicity of other food ingredients) and one of the primary questions is that of dose dependence.

The questions of dose dependence with saccharin is important because there is considerable suspicion that the effects seen in the in utero, high dose tests were due to the high dose rather than the saccharin itself. This is one of the questions being explored in an industry-sponsored, large-scale rat feeding study. This study is a two-generation study involving 2,500 animals and six saccharin dose levels ranging from 1 percent to 7½ percent in the diet.

This study has been set up in accordance with FDA's good laboratory practices regulations and has been designed to answer some of the questions raised by evaluation of previous studies. The effects of the sodium part of the sodium saccharin molecule are also being assessed as are the effects of the in utero exposure. Preliminary results from this study, which is about half completed, are very interesting. It appears that the higher feeding levels are impacting on food consumption, water consumption, weight gain, urinary pH, urine volume and urine constituents but the lowest dose level (which is still 100–200 times the equivalent normal human exposure) is not. Conceivably, these dose-dependent effects could ultimately contribute to tumor formation.

I am not suggesting that it can be proven that saccharin has a dose threshold below which there are no chronic effects, since scientists contend that it is impossible to prove the existence of a threshold. However, this study could demonstrate that there is a practical threshold below which any risk is prac-

tically negligible. In any event the study will provide data which will permit realistic risk estimates to be made and will contribute to the understanding of the high-dose mechanisms of toxicity. This study will not be completed until after the end of 1982.

Thus, the latest animal results are reassuring with respect to the relative safety of saccharin but the real question is not rat safety, it is human safety. In this connection considerable information has become available in recent months from three new epidemiology studies.

The first and most important of these epidemiology studies is the National Cancer Institute study, the preliminary results of which became available last December. The NCI study, involving about 9,000 subjects in 10 areas throughout the country, looked at the consumption of artificial sweeteners (saccharin and cyclamates) relative to the incidences of bladder cancer. Since the results of this study have been, and continue to be, misinterpreted I would like to try to set the record straight.

First of all, the data showed no association between the incidence of bladder cancer and consumption of artificial sweeteners in the overall study population either for males, or females, or both sexes combined. Further, this lack of association also held even for those persons who had used artificial sweeteners most frequently and for the longest periods of time.

There have been statements by the press and even by some Government officials that the NCI study showed increased risk of cancer with heavy or prolonged use of artificial sweeteners. Such statements are simply not factual. Anyone who examines the results carefully will find subgroups of subjects that have so-called "relative risk ratios" greater than one (which mathematically would indicate an increased risk) as well as those with relative risk ratios less than one (which mathematically would indicate a protective effect against cancer). However, in most cases these risk ratios involve too few subjects to be statistically significant and cannot be interpreted as showing either increased risks or protective effects.

Thus, the NCI study in general is reassuring relative to the human safety of saccharin. Furthermore, two more recent studies, although not as large, reached similar conclusions.

On March 6, 1980, the Harvard epidemiology study of artificial sweeteners was reported in the New England Journal of Medicine. This was a case-control study of 592 patients with lower-urinary-tract cancer and 536 controls in the Greater Boston area. No association between artificial sweetener use and cancer was found for men, or women, or both sexes combined. The authors also noted that—

> Increasing frequency or duration of use of artificial sweeteners was not consistently associated with increasing relative risk.

And concluded that—

> This study suggests that, as a group, users of artificial sweeteners have little or no excess risk of cancer of the lower urinary tract.

The Harvard report was followed a few days later by another study report in Science from the American Health Foundation (AHF). The AHF study involved 367 bladder cancer patients and the same number of matched controls. The authors of this study concluded that:

> No association was found between use of artificial sweeteners or diet beverages and bladder cancer. No dose-response was observed with respect to quantity or duration of use or the two combined. No evidence was found to suggest that artificial sweeteners or diet beverages promote the tumorigenic effect of tobacco smoking.

The NCI study and the two more recent studies brought to 12, the number of major epidemiology studies that have failed to show an association between the use of artificial sweeteners and bladder cancer. In most situations, that would be considered overwhelming evidence, but such is not the case with saccharin, partly because of the political emotionalism involved and partly because of the rigid regulatory framework to which saccharin and other food additives are currently subject.

Dr. Robert Hoover, director of the National Cancer Institute epidemiology study characterized the three most recent studies as follows. He first noted that the results could be interpreted as being consistent with saccharin as a weak carcinogen or on the other hand could also be interpreted as showing no effect. In fact, the results are also consistent with a third possibility, namely that saccharin has a weak protective effect against bladder cancer. I am not pushing saccharin as a cancer preventer; I merely point out the reservations that should be attached to such results.

Those possibilities illustrate the difficulty of once and for all scientifically resolving the saccharin controversy. We would all like black and white answers to food safety questions but unfortunately science rarely comes in other than various shades of grey. Whether saccharin has slightly protective effects, slightly adverse effects or no effects at all apparently cannot be totally resolved by epidemiology and further studies would likely only confirm the mathematical lack of association between usage and bladder cancer, leaving us with the same trinity of possible interpretations. What is clear is that the increase in risk from normal usage of saccharin, if present at all, is indeed small and little if any cause for concern.

The industry-sponsored rat study may answer some of the questions about saccharin but I suspect that we will never have all of the answers. This is equally or even more true relative to other components of foods, be they naturally occurring or introduced by man. We must, therefore, get to the realization that absolute food safety is impossible, for no component of food is without some risk to some part of the population, and base food regulation in a priority way on the type and extent of risk involved. This requires appropriate modification of the FDC Act—a task which I intend to make a priority in this and future Congresses.

For these reasons as well as those enumerated in the Senate the report (96–175) from the Committee on Labor and Human Resources accompanying H.R. 4453, I believe the interest of the public will best be served by allowing saccharin to continue to be marketed for at least another 2 years, during which time the industry study will be completed and evaluated. We in Congress, meanwhile, will have begun our deliberations on updating and revising the Nation's food safety laws to make them more responsive to today's increasingly sophisticated food safety testing technology.

Mr. President, I ask that portions of the Senate report, Calendar No. 765, and my bill, the Saccharin Study and Labeling Act Amendment of 1981, be included in the RECORD immediately following by previous remarks.

There being no objection, the material was ordered to be printed in the RECORD, as follows;

S. 1363

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled, That this Act may be cited as the "Saccharin Study and Labeling Act Amendment of 1981".

SEC. 2. The Saccharin Study and Labeling Act is amended by striking from section 3 "June 30, 1981" and inserting in lieu thereof "twenty-four months after the date of enactment of the Saccharin Study and Labeling Act Amendment of 1981".

PORTIONS OF SENATE REPORT 96–175

I. SUMMARY OF LEGISLATION

H.R. 4453 amends section three of the Saccharin Study and Labeling Act (Public Law 95–203) to extend from May 23, 1979 to June 30, 1981, the prohibitions on actions by the Secretary of Health, Education, and Welfare respecting saccharin.

II. HISTORY OF H.R. 4453

On May 9, 1979, the Subcommittee on Health and Scientific Research held a hearing on saccharin. On July 24, 1979, the House passed H.R. 4453. The measure was referred to the Senate on July 27, 1979, and referred to the Committee on Labor and Human Resources. On September 10, 1979, it was referred to the Subcommittee on Health and Scientific Research. The Subcommittee considered the legislation on April 24, 1980 and ordered it reported to the Full Committee without amendments. On May 8, 1980, the Full Committee considered the legislation and ordered it reported favorably without amendments to the Senate.

III. BACKGROUND OF SACCHARIN ISSUE

Saccharin was first discovered in a Johns Hopkins University laboratory in 1879 and thus has been known for over 100 years. Almost immediately after its discovery, saccharin was the subject of scientific scrutiny for safety. In 1912, saccharin was banned from use in foods. During World War I, reduced sugar supplies prompted the lifting of that saccharin ban. In 1925, after a lengthy lawsuit, saccharin was once again allowed in foodstuffs.

Questions about the safety of saccharin have continued, and numerous scientific "blue ribbon" panels in 1911, 1955 and 1974 recommended maximum daily limits for human consumption.

In February 1974, the Canadian government initiated a two-generation animal study to evaluate the toxicity and carcinogenicity of OTS (orthotoluenesulfonamide), a common impurity found in saccharin, and OTS-free saccharin. The study on saccharin was the third experiment in which rats were exposed to saccharin during their period of

development in the uterus and then throughout their entire life span. The two previous studies, one performed by FDA and the other by the Wisconsin Alumni Research Foundation (WARF), had shown an increased incidence of bladder tumors in male rats, but had left unresolved the question of whether the tumors were caused by saccharin itself or by OTS. The Canadian study was designed to clarify this question by testing OTS by itself as well as by testing purified saccharin containing only minimal amounts of the impurity.

Six groups of 50 male and 50 female rats were included in the study: a control group; 3 groups receiving different dose levels of OTS (2.5, 25 and 250 milligrams per kilogram) per day; a group receiving 5 percent saccharin (2,500 milligrams per kilogram per day) in the diet; and a group receiving 250 milligrams of OTS per kilogram per day and 1 percent ammonium chloride in the drinking water. The doses of OTS incorporated the amount of OTS, ranging from 0.6 to 25 milligrams per kilogram OTS per day, which may have been consumed by animals in the FDA and WARF studies on saccharin. OTS, a weak carbonic anhydrase inhibitor, may have a tendency to produce a slightly alkaline urine, possibly resulting in an increased incidence of bladder stones. Therefore, ammonium chloride was added to the drinking water of one OTS group to prevent this effect by producing a more acidic urine. The rats were observed daily, their weights and food consumption recorded weekly, and 20 males of each generation of controls, saccharin treated, and high-level OTS treated animals with and without ammonium chloride had urine examined a 6-month intervals for microscopic calculi and parasite eggs.

The results of the Canadian study have been evaluated by expert pathologists, including scientists from FDA and other institutions in the United States, Great Britain, and from other European countries, as well as from Canada. The findings indicate that saccharin caused bladder tumors in test animals. Malignant bladder tumors were detected only in the saccharin tested rats, and the difference in incidence between first and second generation males and controls was statistically significant. Three tumors were found in first generation males, eight in second generation males and two in third generation males. In addition, eight benign bladder tumors were observed in saccharin-tested male rats, compared to a total of six benign tumors in the OTS group and one in the control group.

The low incidence of tumors in the animals fed OTS seemed to clearly resolve the earlier speculations, based on the FDA and WARF studies, that OTS and not saccharin may have been responsible for the cancers in the test animals. No evidence of bladder parasites was found in any of the rats. Microscopic crystals were found in the urine, but the distribution did not seem to be related to treatment. Two grossly visible bladder stones were found in rats bearing tumors, one receiving saccharin and the other receiving OTS, while six were found in animals of various groups without bladder tumors. There was no significant increase in bladder tumors in any of the groups tested with OTS.

Based on the Canadian study, on April 14, 1977, the FDA issued a detailed plan for ending the use of saccharin as a general food additive. The proposal included banning its use in foods and beverages, in cosmetics likely to be ingested, and as a non-medical ingredient in drugs. Also proposed was the continued marketing of saccharin as a single-ingredient drug for use by diabetics and others who need to restrict their sugar intake for medical reasons.

The proposed ban evoked a storm of public protest ranging from medical and scientific experts questioning the wisdom of removing saccharin from the marketplace, to some legislators, scientists and industry representatives questioning the validity of the scientific evidence. In addition, various consumer groups wanted "freedom of choice." Others supported the FDA action.

In order to clarify some of these issues, the Senate Subcommittee on Health and Scientific Research met shortly after publication of the proposed ban in executive session with a panel of scientists and representatives of the Office of Technology Assessment (OTA) to discuss the undertaking of a study of the scientific and technical issues surrounding the saccharin controversy.

On June 7, 1977, the Senate Subcommittee on Health and Scientific Research conducted a public hearing on the saccharin issue. Six members of the OTA panel testified at the hearings. Although points were presented where a consensus had been reached (such as the ability of current testing methods to predict whether or not a substance is likely to cause cancer, and that animal testing is valid and reliable in predicting that a substance will produce cancer in humans), there was also a split among the panel members over the FDA proposal to ban saccharin. Three supported the FDA decision, while three others supported continued marketing of the artificial sweetener as a food additive with warning labels.

The OTA panel published its report in October of 1977. In order to assess the current testing methodology, OTA commissioned 12 short-term animal tests to be performed on saccharin. The purpose was to demonstrate to Congress the nature of the tests, the speed in which they could be conducted, and their usefulness in making regulatory decisions. The tests were also conducted to clarify some of the uncertainties regarding the carcinogenicity of saccharin. Positive results in short term tests would support the long-term tests which showed saccharin to be a carcinogen.

At the time of publication of the OTA report, 10 of the 12 studies were completed. Three of the 10 tests for mutagenicity were positive indicating that saccharin is a potential carcinogen. However, the report did indicate that the responses were weak, even with high dose levels of saccharin.

On November 23, 1977, the Saccharin Study and Labeling Act was enacted (P.L. 95-203). The law established a moratorium on the banning of saccharin for 18 months until May 23, 1979; requested the National Academy of Sciences to study the health risks and benefits associated with the consumption of saccharin and the more general issue of national food safety policy; and required warning labels on foods containing saccharin and warning notices about saccharin to be posted in retail food establishments.

The National Academy of Sciences released the first report required by the law on November 4, 1978. This report, "Saccharin: Technical Assessment of Risks and Benefits" was a comprehensive review of the available scientific information on the artificial sweetener. The study reaffirmed the previous conclusions of FDA and OTA that saccharin causes cancer in test animals and that it therefore poses a presumptive risk of cancer to humans.

Three new human epidemiology studies have recently been published. The results of the most elaborate study conducted by the National Cancer Institute and cosponsored by FDA, involving 9,000 people, are now available. Although no increased relative risk of bladder cancer as a whole from the use of artificial sweeteners was detected, certain subgroups showed increased risk:

1. Heavy users of artificial sweeteners, particularly those who consumed both diet beverages and sugar substitutes, showed a 60 percent increased risk of bladder cancer. Heavy use was defined as six or more servings a day of a sugar substitute or two or more eight-ounce diet beverages a day.

2. People who smoked cigarettes heavily and who also made heavy use of artificial sweeteners showed a higher risk of bladder cancer than heavy smokers who did not use artificial sweeteners. Heavy cigarette smoking was defined as more than two packs a day for men and more than one pack a day for women. Study authors noted that saccharin and cyclamates may enhance the cancer-causing effects of heavy cigarette smoking.

3. Those women who normally would be at low risk for bladder cancer, but who consumed sugar substitutes or diet beverages twice or more a day, had a 60 percent greater risk of bladder cancer compared with similar women who never used artificial sweeteners. The risk increased with the amount of artificial sweeteners used.

Based on these data, the authors estimated that low-risk women who never used artificial sweeteners had an estimated yearly rate of about five cases of bladder cancer per 100,000, while similar women who consumed sugar substitutes or diet beverages twice a day or more had an estimated yearly rate of an additional three cases per 100,000.

The authors of the study concluded that while the positive association in the study did not establish a causal link between artificial sweeteners and bladder cancer, saccharin and cyclamate should be regarded as potential risk factors for human bladder cancer, based on the results of this study plus previous experiments in laboratory animals. They added, however, that the possibility could not be excluded that the positive associations found for certain subgroups represented chance variations.

They said the findings of this study appear consistent with the results of animal studies that concluded saccharin was a weak animal carcinogen when given alone and may also enhance the carcinogenic action of other chemicals.

One purpose of the study was to examine the conclusions of previous, smaller studies that found a 60 percent increased risk of bladder cancer among men who consume sugar substitutes. The NCI study did not confirm the 60 percent rate. The investigators said the increased risk of bladder cancer to males in the NCI study, from average use of sugar substitutes, would not exceed 18 percent.

The authors cautioned that further analysis of the preliminary data will be needed to separate with precision the effects of saccharin and cyclamate. Cyclamate was the predominant artificial sweetener used during the 1960's; after FDA banned its use in 1970, saccharin became the only artificial sweetener available in the United States. The authors also noted that the study could not assess the effects of consuming artificial sweeteners during pregnancy or in early childhood.

NCI's study, the largest of its type ever conducted, comprised interviews from March 1978 to June 1979, with more than 3,000 bladder cancer patients and almost 6,000 people from the general population who did not have cancer, but who were similar in age and sex. Three of every four persons in the study were men.

Bladder cancer is three times more common in men than in women, and is more common among cigarette smokers and among workers exposed to certain chemicals on the job.

A second study, published in the New England Journal of Medicine on March 6, 1980 and conducted at the Harvard School of Public Health, involved 592 cancer patients and 536 controls. The researchers said, "This study suggests that, as a group, users of artificial sweeteners have little or no excess risk of cancer of the lower urinary tract."

But they said three interpretations were consistent with the findings: that "the exposures that have been sustained to artificial sweeteners are not carcinogenic for the human bladder"; that "artificial sweeteners are carcinogens but weak enough for their effects to be difficult to perceive"; or that "sufficient time for an obvious carcinogenic effect to appear has not yet elapsed since relatively heavy exposure to artificial sweeteners began in the 1960's."

The third study, conducted by the American Health Foundation, involved 3367 bladder cancer patients and 367 controls. The study found "no association * * * between use of artificial sweeteners or diet beverages and bladder cancer." Although the study's findings did not support the hypothesis that saccharin use causes bladder cancer, the authors state that it is possible that the absence of a demonstrable association may be due to insufficient sample size.

In an editorial in the New England Journal of Medicine, March 6, 1980, Dr. Robert Hoover, director of the Environmental Epidemiology Branch at NCI and author of the NCI–FDA study reported in December, commented on his and the Harvard study:

"The evidence is that little, if any, current bladder cancer is due to the consumption of artificial sweeteners at the doses and in the manner in which sweeteners were commonly consumed in the past. * * *

"The findings of these studies can be interpreted as being consistent with the laboratory (animal) evidence suggesting that saccharin is a weak carcinogen. On the other hand, the findings can also be interpreted as showing no evidence of carcinogenicity. * * * The correct or more prudent interpretation will probably be a matter for conjecture and debate for some time. * * *

"When all the evidence of toxicity is weighed against the lack of objective evidence of benefit, any use (of saccharin) by nondiabetic children or pregnant women, heavy use by young women of childbearing age, and excessive use by anyone are ill-advised and should be actively discouraged by the medical community."

FDA believes that the studies recently reported are consistent with the view, based on animal studies, that saccharin is a weak carcinogen and that saccharin may pose a risk to certain people such as women of childbearing age and children.

IV. HEARING

A hearing on saccharin was held by the Subcommittee on Health and Scientific Research on May 9, 1979. The witnesses appearing before the subcommittee were:

Robbins, Frederick C., M.D., dean, Case Western Reserve University, School of Medicine; T. Colin Campbell, professor of nutritional biochemistry, Cornell University; Emmanuel Farber, M.D., chairman, Department of Pathology, University of Toronto; and Joyce C. McCann, Ph. D., Department of Biochemistry, University of California at Berkeley.

Kennedy, Donald, Ph. D., Commissioner of the Food and Drug Administration, Public Health Service, Department of Health, Education, and Welfare.

Kellen, Robert H., president, Calorie Control Council; Ellen Haas, director, Consumer Division, Community Nutrition Institute; William J. Gill, Ph. D., vice president, research and technical service, Pepsico, Inc.; William B. Schultz, Esquire; Public Citizen Litigation Group, Health Research Group; Grace Powers Monaco, Esquire, the Candlelighters; Fred W. Whitehouse, M.D., president, American Diabetes Association.

Harkins, Robert W., Ph. D., vice president—scientific affairs, Grocery Manufacturers of America, Inc., accompanied by Stephen A. Brown, vice president and general counsel, Grocery Manufacturers of America.

Numerous additional written statements were received for inclusion into the hearing record. Differing opinions on what to do about saccharin were presented.

V. COMMITTEE VIEWS

The Committee believes it is appropriate to extend until June 30, 1981 the moratorium on Food and Drug Administration regulatory efforts to remove saccharin from the market. Under current law, FDA is required to remove from the market any additive that is unsafe or is found to cause cancer in appropriate animal or human studies. Although the process of removing saccharin from the market would take at least 15 months to complete, the Committee's action to extend the moratorium makes it clear that this process should not begin at this time.

Although the Committee believes that the saccharin controversy is an important one, it should not be considered in isolation from overall food safety policy. The Congress should not be asked to intervene in the regulatory process and overrule existing statutes on a product-by-prdouct basis as is currently the case. The Committee believes that if current regulatory statutes do not permit these issues to be fairly resolved, then those statutes should be reexamined.

The National Academy of Sciences has recently reviewed our food safety laws and concluded:

"The law has become complicated, inflexible and inconsistent in implementation. Although complex in itself, the law is inadequate to meet changing and increasing problems of food safety."

The Committee believes that this conclusion in light of the growing number of controversies about individual products argues for a thorough and complete congressional reexamination of the food safety laws. The extension of the moratorium until June 30, 1981 will give the Committee the time to complete such an examination. It is the Committee's intent to reach final resolution on saccharin in its proper perspective as part of overall food safety policy.

The Committee does not intend its action in extending the saccharin moratorium to be interpreted as an endorsement of the view that studies to date have proven saccharin is safe for human consumption. The Committee recognizes that many people, including diabetics and others on special diets, want a no-calorie or low-calorie substitute for sugar and that at the present time saccharin is the only noncaloric substance available. The Committee believes that the American people would prefer an alternative non-nutritive sweetener, that is not subject to so many questions of safety and carcinogenicity. Therefore, the Committee hopes that in the next year industry will make a determined effort to develop a safe alternative to saccharin.

The Committee felt strongly that during the original 18-month moratorium that consumers should be afforded a reasonable opportunity to know which products contain saccharin so that they could make personal judgments concerning its use. The Saccharin Study and Labeling Act, therefore, authorized the Secretary to place warning labels on products containing saccharin and required retail establishments that self saccharin or food containing saccharin to prominently display a notice of the risks to health that may be related to the use of saccharin. This requirement is unchanged and reflects the Committee's continued support of consumer choice in this matter.

VI. COST ESTIMATE

U.S. CONGRESS,
CONGRESSIONAL BUDGET OFFICE,
Washington, D.C., May 9, 1980.

Hon. HARRISON A. WILLIAMS, Jr.,
Chairman, Committee on Labor and Human Resources, U.S. Senate, Washington, D.C.

DEAR MR. CHAIRMAN: Pursuant to Section 403 of the Congressional Budget Act of 1974, the Congressional Budget Office has reviewed H.R. 4453, a bill to amend the Saccharin Study and Labeling Act, as ordered reported by the Senate Committee on Labor and Human Resources on May 8, 1980.

The bill extends to June 30, 1981 the ban on actions by the Secretary of Health, Education, and Welfare to restrict saccharin use. Based on our review, it is expected that no additional cost to the government will be incurred as a result of enactment of this legislation.

Sincerely,

ROBERT D. REISCHAUER,
(For Alice M. Rivlin, Director)

VII. REGULATORY IMPACT STATEMENT

The Committee anticipates that there will be little if any additional regulatory impact because of this legislation. The bill merely extends the original moratorium as enacted under the Saccharin Study and Labeling Act (SSLA) (Public Law 95–203) which expired on May 23, 1979 to June 30, 1981. There are no new labeling or testing requirements in this bill, only the effective date has been changed. Posters and notices will continue to be distributed by the manufacturers of the products or by their trade associations. There may be some minimal costs to industry for additional posters for display in retail stores, however, this should be incurred only where new stores are opened or existing posters need to be replaced because of damage or other similar reasons.

Manufacturers of products containing saccharin will not incur additional expenses related to labeling changes because the basic labeling requirements—prescribed by the law itself (section 4)—are unchanged and have been implemented during the initial moratorium.

VIII. VOTES IN COMMITTEE

Pursuant to section 133(b) of the Legislative Reorganization Act of 1949, as amended, the following is a tabulation of votes in committee:

All members of the Committee voted to favorably report the bill except that Senator Nelson abstained.

IX. SECTION-BY-SECTION ANALYSIS

The bill contains one section.

The bill amends section 3 of the Saccharin Study and Labeling Act (Public Law 95–203) to extend the prohibition on actions by the Secretary of Health, Education, and Welfare, which is provided for in section 3, from May 23, 1979 until June 30, 1981.

X. CHANGES IN EXISTING LAW

In compliance with subsection (4) of rule XXIX of the Standing Rules of the Senate, changes in existing law made by the bill, as reported, are shown as follows (existing law proposed to be omitted enclosed in black brackets; new matter printed in italic):

SECTION 3 OF THE SACCHARIN STUDY AND LABELING ACT

SEC. 3. During the [18-month] period beginning on the date of the enactment of this Act *and ending June 30, 1981;* the Secretary—

(1) may not amend or revoke the interim food additive regulation of the Food and Drug Administration of the Department of Health, Education, and Welfare applicable to saccharin and published on March 15, 1977 (section 1801.37 of part 180, subchapter B, chapter 1, title 21. Code of Federal Regulations (42 Fed. Reg. 14638)), or

(2) may, except as provided in section 4 and the amendments made by such section, not take any other action under the Federal Food, Drug, and Cosmetic Act to prohibit or restrict the sale of distribution of saccharin, any food permitted by such interim food additive regulation to contain saccharin, or any drug or cosmetic containing saccharin,

solely on the basis of the carcinogenic or other toxic effect of saccharin as determined by any study made available to the Secretary before the date of the enactment of this

Act which involved human studies or animal testing, or both.

By Mr. HATCH:

S.J. Res. 90. Joint resolution designating June 30, 1981, as "National Drug Standards Day"; to the Committee on the Judiciary.

NATIONAL DRUG STANDARDS DAY

Mr. HATCH. Mr. President, I am today introducing a joint resolution to commemorate the first 75 years of the Pure Food and Drug Act and to declare June 30, 1981, as "National Drug Standards Day" in honor of the safe and high drug standards provided with the enactment of this law.

Recognition of this act would not be complete without mentioning the great contribution to the work in this area made by the men and women of the U.S. Pharmacopeial Convention.

The first convention assembled here in Washington on January 1, 1920, and in December of that year the first U.S. Pharmacopeia was published. It was the objective of the Pharmacopeia to:

Select from among substances which possess medicinal power, those, the utility of which is most fully established and best understood; and to form from them preparations and compositions, in which their powers may be exerted to the greatest advantage. (Preface of the 1820 Pharmacopeia.)

Through their work tests and assays came about to set standards of strength and purity for drugs. With the enactment of the Pure Food and Drug Act in 1906 the authority for the Pharmacopeia was designated as the body to:

Set standards of strength, quality and purity of medicinal products recognized therein when sold in interstate commerce for medicinal use. (Pure Food and Drug Act of 1906.)

More than 300 elected representatives of medical and pharmacy schools and associations, plus representatives of nearly 2 dozen national scientific organizations and several Federal agencies today participate in the convention.

Drug standards writing is a continuous endeavor requiring the utmost knowledge and laboratory skill. Through hundreds of volunteer physicians, pharmacists, scientists, and other health professionals, the USPC publishes the U.S. Pharmacopeia and the National Formulary every 5 years with regular supplements as required.

In 1960, Dr. Arthur Flemming, then Secretary of HEW, commented on the USPC. He said:

I think that it is fair to say that I do not know of any organization that has a more interesting and a more significant relationship to the government of the United States than your organizations. As a layman, I can't help but take note of the fact that your organization is almost as old as the Union itself.

He further noted that:

The sole objective of the USPC was to assist in safeguarding the health of citizens of our nation, and in so doing, of course, helping to safeguard the health of citizens of all nations.

National Drug Standards Day will help us all, in some small way, give a warm thanks to those who have labored to produce our drug standards.

Mr. President, I ask unanimous consent that the text of my joint resolution be printed in the RECORD.

There being no objection, the joint resolution was ordered to be printed in the RECORD, as follows:

S.J. RES. 90

Whereas the United States Pharmacopeia and the National Formulary, published by the United States Pharmacopeial Convention, Inc., were recognized as containing "official" standards for drugs by the Federal Food and Drug Act of 1906;

Whereas the United States Pharmacopeial Convention, Inc., a nonprofit organization of physicians, pharmacists, and members of other health professions, associations, and governmental agencies, does its primary work of revising and publishing standards for drugs and drug information with the volunteer assistance of hundreds of physicians, pharmacists, and other health professionals;

Whereas such volunteers have freely given of their expertise, knowledge, and time since January 1, 1820, to assure that drug standards and drug information available to the people of the United States are the best possible;

Whereas the Pharmacopeial Convention, Inc. is an outstanding example of what can be accomplished by groups with special interests and expertise to contribute to the health and welfare of our citizens;

Whereas the United States Pharmacopeia and the National Formulary have been valued sources of drug standards and drug information for the drug industry, the Food and Drug Administration, and nearly all governments of the free world, especially since 1906; and

Whereas June 30, 1981, will mark the 75th anniversary of the enactment of the Federal Food and Drug Act of 1906: Now, therefore, be it

Resolved by the Senate and House of Representatives of the United States of America, in Congress assembled, That June 30, 1981, is designated as "National Drug Standards Day" and the President of the United States is authorized and requested to issue a proclamation calling upon Federal, State, and local government agencies, interested groups and organizations, and the people of the United States to observe that day by engaging in appropriate ceremonies, activities, and programs, thereby showing their support of the United States Pharmacopeia and the National Formulary and thanking the hundreds of volunteers who have contributed to the high drug standards of the United States.

By Mr. THURMOND (for himself, Mr. HOLLINGS, Mr. NUNN, and Mr. MATTINGLY):

S.J. Res. 91. Joint resolution to designate July 1981, as "National Peach Month"; to the Committee on the Judiciary.

NATIONAL PEACH MONTH

Mr. THURMOND. Mr. President, I am today introducing on behalf of myself and three of my colleagues a joint resolution which would authorize and request the President to designate July 1981, as "National Peach Month."

I am pleased to have joining me my distinguished colleague from South Carolina, Senator HOLLINGS, and the two distinguished Senators from Georgia, Senators NUNN and MATTINGLY. As I am sure you are aware, peach production is a very important part of the overall agricultural industry in both States.

My purpose in introducing a joint resolution designating July of this year as "National Peach Month" is twofold.

First, I would like to call attention to the nutritional value of this particular fruit and to the importance of a well-balanced diet in general.

As the language of the joint resolution points out, peaches are a very important source of vitamin A, protein, and minerals such as calcium and iron.

Moreover, they are very low in calories, containing approximately 38 calories each. Peaches can and should be, therefore, a nutritious part of any well-balanced diet.

I am hopeful that the programs and activities planned in connection with "National Peach Month" will emphasize this fact and will also stress the need for a balanced diet consisting of foods from each of the basic food groups.

Proper nutrition, together with regular exercise and a sufficient amount of rest is essential to overall physical and mental well-being. This is a regimen which I have always attempted to follow myself, as well as to emphasize its importance to my family and my staff.

My second purpose in introducing this joint resolution is to call attention to an agricultural product which is of economic importance to the States of South Carolina and Georgia and to the Nation as a whole.

Peaches, for example, are our Nation's third largest noncitrus fruit crop in production and value.

Grapes and apples constitute the first and second largest crops respectively. In 1980, the total value of utilized production of noncitrus fruits was $3,319,291,000. Peaches had a value of utilized production of $368,004,000, but were recognized as the No. 1 summer fruit.

South Carolina, I am proud to say, is the second largest producer of peaches in the country, ranking behind only California. In 1980, total peach production was 3.07 billion pounds. California produced 1.96 billion pounds. South Carolina followed with 355 million pounds.

Other States producing significant amounts of this succulent fruit included Georgia at 120 million pounds, New Jersey at 110 million pounds, and Pennsylvania at 105 million pounds.

The remainder of the Nation produced 418.6 million pounds. South Carolina, however, was the largest producer of peaches for the fresh fruit market in the Nation, with case receipts from the sale of this fruit totaling approximately $62,480,000 annually.

This joint resolution has the strong support of the National Peach Council (NPC), a nonprofit association of individual peach producers who belong to NPC either through their State peach councils or as individual members.

NPC, which was organized in 1941, currently has members in all 33 States which grow peaches.

In addition to supporting legislation designating a National peach month, NPC has been working with State councils to have July 1981, declared as peach month in various States.

The following 14 States issued proclamations: South Carolina, Arkansas, Delaware, Georgia, Illinois, Indiana, Kansas, Louisiana, Mississippi, North Carolina, Oklahoma, Virginia, West Virginia, and New Jersey.

I ask unanimous consent that a copy of South Carolina's proclamation on peach month be placed in the RECORD following my remarks, along with a copy of the joint resolution.

There being no objection, the joint resolution and proclamation were ordered to be printed in the RECORD, as follows:

S.J. RES. 91

Resolved by the Senate and House of Representatives of the United States of America in Congress assembled,

Whereas peaches are recognized as the number one summer fruit;

Whereas peaches are harvested in our Nation from May until October, with peak supplies occurring nationally in July;

Whereas public awareness of the need for a well-balanced diet is becoming increasingly evident;

Whereas medical authorities believe that proper nutrition can be a factor in preventing and relieving diseases such as cancer, cardiovascular diseases, and other illnesses; and

Whereas peaches, which contain only thirty-eight calories each, are an important source of vitamin A, protein, and minerals, such as calcium and iron, and can be a nutritious part of any well-balanced diet: Now, therefore, be it

Resolved by the Senate and House of Representatives of the United States of America in Congress assembled, That the President is authorized and requested to designate July, 1981, as "National Peach Month," to call upon the people of the United States to incorporate nutritious peaches into their diets when they are in season, and to call upon interested groups to celebrate this month with appropriate programs and activities that will make the benefits of this succulent fruit and of a well-balanced diet known to the consumers of America.

PROCLAMATION BY GOVERNOR RICHARD W. RILEY ON PEACH MONTH

Whereas, because of its beauty and delectability, the peach is called the Queen of Fruits; and

Whereas, Fresh South Carolina peaches are in good supply, making it possible for all menu planners to use the "Queen of Fruits" for meal and snacktime delights; and

Whereas, South Carolina is the largest producer of peaches for the fresh fruit market in the nation; and

Whereas, peach production is an integral part of our overall agricultural industry with cash receipts totaling approximately $62.4 million annually; and

Whereas, peaches are an important source of vitamin A, protein, and minerals, including calcium and iron, as well as being low in calories, they are an excellent part of any well balanced diet; and

Whereas, the prosperity and well-being of South Carolina are dependent upon cooperation and understanding between two great elements of our society—farmers and consumers.

Now, therefore, I, Richard W. Riley, Governor of the State of South Carolina, do hereby proclaim the month of July, 1981 as: Peach month in South Carolina and urge all citizens to join with me in honoring and enjoying the delicious peach.

ADDITIONAL COSPONSORS

S. 239

At the request of Mr. DURENBERGER, the Senator from Maryland (Mr. SARBANES) was added as a cosponsor of S. 239, a bill to amend the Internal Revenue Code of 1954 to provide a credit against income tax for the purchases of a commuter highway vehicle, to exclude from gross income certain amounts received in connection with the provision of alternative commuter transportation, to provide employers a credit against tax for costs incurred in ride sharing programs and for other purposes.

S. 475

At the request of Mr. DURENBERGER, the Senator from Connecticut (Mr. WEICKER), and the Senator from New Jersey (Mr. BRADLEY) were added as cosponsors of S. 475, a bill to amend the Internal Revenue Code of 1954 to clarify the definition of specially defined energy property for purposes of the investment tax credit.

S. 739

At the request of Mr. DURENBERGER, the Senator from South Dakota (Mr. ABDNOR) was added as a cosponsor of S. 739, a bill to amend the Internal Revenue Code of 1954 to make the investment credit for railroad property refundable.

S. 811

At the request of Mr. DOLE, the Senator from Illinois (Mr. DIXON) was added as a cosponsor of S. 811, a bill to amend the Powerplant and Industrial Fuel Use Act of 1978 to permit local distribution companies to continue natural gas service to residential customers for outdoor lighting fixtures for which natural gas was provided on the date of enactment of such act, and for other purposes.

S. 865

At the request of Mr. PRYOR, the Senator from Kentucky (Mr. FORD) was added as a cosponsor of S. 865, a bill to amend the Small Business Act to provide that any change in regulations affecting the disaster loan provisions of such act shall not apply to applications for disaster loan assistance received before the effective date of the change.

S. 888

At the request of Mr. DURENBERGER, the Senator from Wisconsin (Mr. KASTEN), the Senator from Hawaii (Mr. INOUYE), the Senator from Michigan (Mr. RIEGLE), and the Senator from Maine (Mr. COHEN) were added as cosponsors of S. 888, a bill to provide effective programs to assure equality of economic opportunities for women and men, and for other purposes.

S. 1096

At the request of Mr. KASTEN, the Senator from Indiana (Mr. LUGAR) was added as a cosponsor of S. 1096, a bill to facilitate the ability of product sellers to establish product liability risk retention groups, to facilitate the ability of such sellers to purchase product liability insurance on a group basis, and for other purposes.

S. 1120

At the request of Mr. KASTEN, the Senator from New Mexico (Mr. SCHMITT) was added as a cosponsor of S. 1120, a bill to reduce the amount of funds available to an agency unless the agency has reduced waste, fraud, and abuse to the maximum extent feasible or demonstrates that no waste, fraud, or abuse exists in the administration of programs, and for other purposes.

S. 1131

At the request of Mr. DANFORTH, the Senator from Florida (Mrs. HAWKINS) was added as a cosponsor of S. 1131, a bill to require the Federal Government to pay interest on overdue payments and to take early payment discounts only when payment is timely made, and for other purposes.

S. 1225

At the request of Mr. SPECTER, the Senator from Pennsylvania (Mr. HEINZ) was added as a cosponsor of S. 1225, a bill to require Federal agencies to include in a notice of proposed rulemaking estimates of the costs to State and local governments resulting from a proposed rule, an identification of sources of funds to pay such costs and a statement requesting comments from State and local governments on the costs to such governments resulting from the proposed rule.

S. 1288

At the request of Mr. DURENBERGER, the Senator from Pennsylvania (Mr. SPECTER), the Senator from Idaho (Mr. SYMMS), and the Senator from Connecticut (Mr. WEICKER) were added as cosponsors of S. 1288, a bill to amend the Internal Revenue Code of 1954 to encourage greater energy conservation by commercial businesses, and for other purposes.

S. 1326

At the request of Mr. SASSER, the Senator from New York (Mr. MOYNIHAN) was added as a cosponsor of S. 1326, a bill to amend title 38, United States Code, to authorize a service pension of up to $150 per month for veterans of World War I and for certain surviving spouses and dependent children of such veterans.

SENATE JOINT RESOLUTION 59

At the request of Mr. ROBERT C. BYRD, the Senator from Kentucky (Mr. FORD), and the Senator from Montana (Mr. BAUCUS) were added as cosponsors of Senate Joint Resolution 59, a joint resolution designating the square dance as the national folk dance of the United States.

SENATE RESOLUTION 65

At the request of Mr. DURENBERGER, the Senator from Vermont (Mr. LEAHY) and the Senator from New York (Mr. D'AMATO) were added as cosponsors of Senate Resolution 65, a resolution to promote alternative nonanimal testing procedures.

SENATE CONCURRENT RESOLUTION 22—CONCURRENT RESOLUTION HONORING DR. HOWARD A. RUSK

Mr. HATCH submitted the following concurrent resolution: which was referred to the Committee on the Judiciary:

S. CON. RES. 22

Whereas, Dr. Howard A. Rusk, during World War II was responsible for the development and institution in the Army Air Force of its rehabilitative convalescent programs for injured servicemen.

Whereas, Dr. Howard A. Rusk after World War II founded and continued until recently to direct the world-renowned Institute of Rehabilitative Medicine of the New York University Medical Center, the first institute of its kind, and still serves at age 80 as President of the World Rehabilitation Fund as well as Chairman of the National Council on the Handicapped.

Whereas, Dr. Howard A. Rusk is more responsible than any other individual for awakening the medical profession to the need to treat "the whole man," and for pioneering the techniques which led to the establishment of the medical specialty of "Physical Medicine and Rehabilitation," and

Whereas, the Congress and the Nation wish to recognize these achievements and express their thanks for a lifetime of clinical practice, teaching, and administration devoted to the alleviation of suffering around the world and the restoration to a productive life of those physically handicapped who before had no champion: Now, therefore, be it

Resolved by the Senate (The House of Representatives concurring), That the Congress of the United States hereby commends Dr. Howard Rusk for his tireless spirit of leadership, for his contribution to the development of modern medicine and to the training of generations of his fellows, for his example of professional excellence expressed in a career of service, for his humanity.

SECTION 2. The Secretary of the Senate shall transmit a copy of this Resolution to Dr. Howard A. Rusk.

DR. HOWARD A. RUSK

Mr. HATCH. Mr. President, I am pleased to submit today a concurrent resolution recognizing the accomplishments of Dr. Howard A. Rusk, a physician and humanitarian whose pioneering efforts in the field of rehabilitative therapy have brought not only hope, but miraculous clinical results for countless newly productive lives around the world.

Nominated for last year's Nobel Peace Prize, Dr. Howard has long been an international medical figure. Now aged 80, he has devoted decades of his life to training others, both here and abroad, in the techniques he developed.

As president of the World Rehabilitation Fund and chairman of the National Council on the Handicapped he has been an exemplar of the energetic public service upon which free societies depend.

As clinical practitioner, director of the Institute of Rehabilitative Medicine of the New York University Medical Center, and as an eloquent advocate both within his profession and beyond, he has broadened our medical perspective from treatment of the ill to treatment of the whole man. In so doing he has given generations of the physically disabled more than restored productivity and independence; he has given them self-respect and dignity.

This is truly a man of whom our nation can be proud. I ask your support in honoring him through this concurrent resolution.

SENATE RESOLUTION 152—RESOLUTION RELATING TO THE 1,300TH ANNIVERSARY OF BULGARIAN STATEHOOD

Mr. BOSCHWITZ (for himself, Mr. SARBANES, and Mr. PRESSLER) submitted the following resolution: which was referred to the Committee on Foreign Relations:

S. RES. 152

Whereas Bulgaria this year celebrates its 1300th year of statehood, making it the oldest surviving State in Europe to have kept its original name:

Whereas in 1943 the Government of Bulgaria resisted pressure from Nazi Germany to deport the country's 50,000 Jews to concentration camps; and

Whereas because of the protection afforded by their government, the Bulgarian Jews were the only Jewish community in the occupied territories to survive as a whole within their native country; Now, therefore, be it

Resolved, That it is the sense of the Senate that—

(1) the Bulgarian people be congratulated on their 1300th year of statehood; and

(2) they be further commended for their heroic and compassionate defense of the human rights of their Jewish community during the Nazi holocaust.

SEC. 2. The Secretary of the Senate shall transmit a copy of this resolution to the President with the request that he transmit such copy to the Ambassador of Bulgaria to the United States.

● Mr. BOSCHWITZ. Mr. President, today I, along with my colleagues Senators SARBANES and PRESSLER, am submitting a Sense-of-the-Senate resolution commemorating Bulgaria on this their 1,300th year of statehood.

Mr. President, Bulgaria is the oldest surviving state in Europe to have kept its original name. It is a country with a long and interesting history.

One of the most noteworthy chapters in Bulgarian history was the Bulgarian Government's refusal to deport the country's 50,000 Jews to Nazi concentration camps during World War II.

Because of the protection afforded by their government, the Bulgarian Jews were the only Jewish community in the occupied territories to survive as a whole within their native country.

Mr. President, the Senate should congratulate the Bulgarian people on their 1,300th year of statehood, and the Bulgarians should be further commended for their heroic defense of their Jewish community in the face of the Nazi holocaust.

Mr. President, I ask unanimous consent that articles on this matter from the Los Angeles Times, the Orange County Heritage, and the B'nai B'rith Messenger be printed in the RECORD.

There being no objection, the articles were ordered to be printed in the RECORD, as follows:

[From the Los Angeles Times, Jan. 24, 1981]

ARTIST SCULPTS HOLOCAUST MEMORIAL MODEL

On behalf of his church, an Orange County designer has sculpted a model for a bronze and stone memorial to be built in Bulgaria, where it will be a permanent reminder of that country's protection of 50,000 Jews from the Nazi Holocaust.

The artist is Don Winton of Corona del Mar, whose commercial work has been mostly Disney cartoon and Disneyland characters, and more recently miniature Star Wars figures and the Mickey Mouse and Snoopy telephones.

But several trips to Israel by Winton and his wife with members of the large Calvary Chapel of Costa Mesa also led him to make a solid bronze cast of the late Israeli Prime Minister Golda Meir, presented to her on her 80th birthday.

KING RESISTED NAZIS

Winton was asked by Rabbi Haim Asa of Fullerton, a native of Bulgaria, to sculpt a memorial for Bulgaria to commemorate the time in 1943 when King Boris resisted Nazi pressure to deport that country's Jews to concentration camps. Asa's father was instrumental in alerting Bulgarian Jewry and other countrymen to the deportation order.

Bulgaria, though a communist-ruled nation, is celebrating this year its 1,300th anniversary of statehood and is re-dedicating the restored Main Synagogue in Sofia in connection with Jewish observances.

The 2-by-3-foot clay model donated by Winton through his church reflects, he said, "our church's almost fanatical love for Israel and Jewish people."

Because the congregation led by the Rev. Chuck Smith is also evangelistically minded, Winton said, "We've developed a sensitivity to Jewish feelings." Rather than overt proselytizing, he said members like himself simply try to show "real love."

TEMPLE PAYS HOMAGE TO BULGARIA

(By J. Michael Kennedy)

The man in the charcoal-gray suit sat stiffly in the front row, his chiseled face expressionless, the unlikely object of homage.

His name was Stoyan Zhulev, the Bulgarian ambassador to the United States. The setting was the Sephardic synagogue Tifereth Israel in the Wilshire district of Los Angeles.

He was there Tuesday night because of a footnote in history, one of those bits of information seldom mentioned in the story of the Jewish Holocaust of World War II.

The 500 people who came to the temple, most of them with graying hair and the stoop of age, were there because Bulgaria saved its 50,000 Jews from Nazi extermination. While other nations are noted for their efforts to save their Jewish citizens, notably Denmark and Finland, Bulgaria efforts have gone virtually unnoticed.

So they came to the temple more than 35 years after the fact, with Zhulev as the symbol of their tribute. Many of those in the audience spoke Bulgarian. Many of them were the very Jews that Hitler had ordered off to the concentration camps of Treblinka and Auschwitz.

Before the program began, one survivor, Rabbi Haim Asa of Temple Beth Tikvah, stood in the back of the synagogue talking about Bulgaria's lack of recognition.

ALLY OF GERMANY

"Bulgaria is a very backward country," he said. "There was no public relations, no Madison Avenue. Nobody told them they were big heroes. They didn't know how to exploit a good story.

"I look upon this as a long overdue tribute to friendship and brotherhood."

Asa said the story of how the Jews of Bulgaria were saved is somewhat complicated, but that several factors were relevant in discussing what happened, beginning in 1943, when the Nazis began pressing for their deportation to concentration camps.

He said one was that because Bulgaria was an ally of Germany, it was in charge of its internal affairs and the country was still ruled by its own leader, King Boris.

He said that when the Nazis gave the orders for the roundup of the country's Jews, mass demonstrations against their impending deportation were staged. The Jewish community petitioned the leaders in the country, asking them not to cooperate. In the end, the pressure on King Boris was too great to ignore, and he did not sign the deportation order.

"If the king had signed the shipping order, we would have been on the train," Asa said.

"It was almost a paralysis of not taking action."

Asa was 13 years old at the time, but in a way, he was very close to the events that saved the Jewish community. His father was president of the Jewish community in Bulgaria. In 1943, an order for deportation was sent by the Nazis to the Bulgarian Department for Jewish Problems. The messenger mistakenly delivered the telegram to Asa's father, who began rallying the Jewish community to fight the deportation.

The furor that ensued was what stopped the king from signing the shipping orders, and other deportation attempts during the rest of the war failed miserably.

Asa and the rest of his family had to flee Bulgaria shortly after the telegram incident.

"My father was a marked man," he said.

Asa talked on. He had told the story many times before, including what he considered the highest praise ever bestowed on the Bulgarian people, praise inadvertently given in a report by a Nazi official stationed in Bulgaria to his foreign ministry:

"Having grown up with Greeks, Armenians, Turks, and Gypsies, the ordinary Bulgarian does not understand the significance of the struggle against the Jews because he doesn't have the capacity to recognize the concept of racial purity," the Nazi official wrote.

The program began. Rabbi Jacob Ott of the Sephardic Synagogue took the stage briefly, making it clear it was a non-political meeting, but at the same time saying it was a "gesture that was long overdue."

Zhulev was next on the stage. An old man, bewhiskered and leaning on a wooden cane, began shouting from the back of the room, his angry voice turning all eyes toward him.

Moments later, he was walked out the door as Zhulev continued his speech, one that in stiff formal English traced the history of Jews in Bulgaria.

"Let us work together with all peace loving people in this world," he said at the end of the speech.

[From the Orange County (Calif.) Heritage, Jan. 16, 1981]

DR. WIETZ TO HELP DEDICATE SYNAGOGUE

Dr. Martin M. Weitz, rabbi, professor at Saddleback College, author and world traveler, has been invited to participate as guest speaker in the international rededication of the ancient Main Synagogue in Sofia, Bulgaria, which was accidentally bombed by American forces during World War II in an action against Nazi forces.

Sofia's synagogue is the largest Sephardic synagogue in Europe, followed by synagogues in Florence and Amsterdam.

The June celebration will commemorate the 40th Anniversary of the saving of Bulgaria's 50,000 Jews from the Nazi Holocaust of World War II and Bulgaria's 1300th anniversary of statehood.

Weitz, a native of Denver, Colorado, is known for his works in Jewish literature. He has authored eight books and 20 booklets on Jewish and general themes, and more than 200 articles.

Weitz served congregations in Wisconsin, Iowa, New Jersey, Arkansas, North Carolina and Long Island.

Currently teaching at Saddleback College's North Campus and at National University, San Diego, Weitz directs "Campus on a Compass" tours for students wishing to supplement classroom lectures. He has traveled extensively and has led student tour to Europe, Mexico, the Mideast and the West Indies.

Dr. Weitz' invitation to Bulgaria is the basis of a study tour he is currently organizing through "Campus on a Compass" of seven European capitals, leaving June 7, to correspond with the main events in Sofia, Bulgaria, with an optional Israel pilgrimage. Also included will be: Britain, Czechoslovakia, Austria, Hungary, Romania, Yugoslavia, as well as Bulgaria.

For more information, call Dr. Weitz at National University, 563-0100, or for travel information call U.T.S.: (800) 432-7230.

[From the B'nai B'rith Messenger, Jan. 3, 1981]

CANTOR BULGARIA-BOUND TO DEDICATE TEMPLE

Cantor Isaac Behar of the Sephardic Temple Tifereth Israel will participate in the rededication ceremonies of the old, restored synagogue in Sofia, Bulgaria—the largest Sephardic synagogue in Europe.

Cantor Behar was invited by Bulgarian authorities to take part in these unique ceremonies commemorating the 40th anniversary of the saving of the entire Bulgarian Jewish community of 50,000 Jews from the nazi Holocaust. These commemorations are part of the 1300th anniversary celebrations of Bulgaria's statehood in 1981.

For Behar, a native of Bulgaria, this will be the first homecoming since 1946 when he left for Romania. He was ordained cantor in the synagogue and will play an instrumental part in its rededication. The synagogue was bombed by American bombers near the end of World War II as an action against the Nazi forces.

After leaving Bulgaria, Cantor Behar lived in Israel for 12 years. He then moved to Mexico City where he officiated as cantor and choir conductor in Yehuda Halevi Sephardic Temple. Behar was conductor of the Olympic Games choir in Mexico City and has made many television appearances.

For the past 11 years, Cantor Behar has associated with the Sephardic Temple Tifereth Israel in Los Angeles, and has made his mark as a singer, composer and conductor in that area.

Behar will lead a two-week tour, departing June 17, 1981, for Bulgaria, Israel and Turkey to specifically coincide with Bulgaria's special events and celebrations.

For information on Bulgaria's special 1300th anniversary events and the saving of Bulgaria's Jews, contact Cantor Behar at Tifereth Israel (213) 475-7311. For information call UTS 800-432-7230.

SENATE EXECUTIVE RESOLUTION 1—EXECUTIVE RESOLUTION AUTHORIZING THE RETURN OF THE EAST COAST FISHERY RESOURCES AGREEMENT BETWEEN THE UNITED STATES AND CANADA

Mr. PERCY, from the Committee on Foreign Relations, reported the following original executive resolution:

S. EX. RES. 1

Resolved, That the Secretary of the Senate is directed to return to the President of the United States, as requested in his message to the Senate under date of April 21, 1981, the Agreement Between the Government of the United States of America and the Government of Canada on East Coast Fishery Resources, signed at Washington on March 29, 1979 (Executive V, 96th Cong., 1st sess.).

AMENDMENTS SUBMITTED FOR PRINTING

HOSPITAL CARE AND MEDICAL SERVICES IN PUERTO RICO AND THE VIRGIN ISLANDS

AMENDMENT NO. 66

(Ordered to be printed and to lie on table.)

Mr. PRESSLER submitted an amendment intended to be proposed by him to the bill (S. 921) to amend title 38, United States Code, to extend authority to provide contract hospital care and medical services in Puerto Rico and the Virgin Islands, and for other purposes.

HEALTH HAZARDS AFFECTING VIETNAM VETERANS

● Mr. PRESSLER. Mr. President, during Senate consideration of S. 921, the veterans health care bill, I will offer an amendment which I am submitting today to make mandatory an expanded study of health hazards that may be affecting Vietnam veterans.

In addition to the herbicide agent orange, Vietnam veterans were exposed to other potential health detriments such as the herbicide agent blue which contains arsenic, chemicals, and other dangerous biological agents.

Although VA studies are currently underway regarding agent orange, little research is being conducted into the effects of these other dangerous elements.

Both the Veterans' Administration and the White House Interagency Work Group To Study the Possibly Long Term Health Effects of Phenoxy Herbicides and Contaminants (IAG) have recommended that the current agent orange epidemiological study be broadened to include other possible health problems that may be related to Vietnam service.

I am pleased that the committee-reported version of S. 921 broadens this study. My amendment, however, goes further by specifically requiring study of the physiological and psychological effects of delayed stress evolving from Vietnam service and readjustment therefrom.

Post traumatic stress disorders may account for some of the symptoms attributed to agent orange. This is a major problem affecting Vietnam veterans which requires additional research.

The amendment which I am proposing also requires the administration, concurrently with the epidemiological study, to conduct research, testing evaluation and literature reviews to determine the potential toxicological, mutagenic and physiological effect of possible health hazards affecting Vietnam veterans.

Additionally, my amendment would require research into the processes of how health hazards affect humans and their reproductive processes. It would require the VA to develop a testing and screening procedure to detect potential health hazards which affect Vietnam veterans or which may affect their unborn offspring.

The amendment would require the VA to recommend and develop treatment and therapeutic intervention programs in the case of substances found to be harmful.

The cost of this amendment would be absorbed within the VA's medical research budget and within the research budgets of other appropriate Federal agencies such as EPA and Health and Human Services.

Mr. President, I urge the support of my colleagues for this amendment which will help allay the fears of many Vietnam veterans and provide important new knowledge for the treatment of their ailments.

Mr. President, I ask unanimous consent that the text of the amendment be printed in the RECORD.

There being no objection, the amendment was ordered to be printed in the RECORD, as follows:

Strike all language from line 22, page 5 up to and including line 4, page 6, and insert in lieu thereof:

"(ii) In conducting the study provided for by division (i) of this subparagraph, the Administrator shall, as the Administrator deems appropriate, expand the scope of such study to include research and evaluation of the long-term adverse health effects in humans, and their natural children, which may result from service during the Vietnam era and/or readjustment therefrom including, but not limited to, exposure to other herbicides, chemicals, biological or hallucinogenic agents, medications, diseases, environmental hazards or conditions, and the psychological and physiological effects of delayed psychological stress evolving from such service or readjustment therefrom."

Line 14, page 6, strike the word "may" and insert in lieu thereof the word "shall".

Insert between lines 22 and 23, page 6, the following:

"(C) Concurrent with the carrying out of the provisions of (A) and (B), the Administrator shall conduct such studies, research, testing, evaluation and literature review as is necessary and appropriate to determine the pharmacokinetics and metabolic pathways, potential toxicological, biological, physiological, immunological, mutagenic, carcinogenic and/or psychological effects of potential health hazards in Vietnam and Vietnam era veterans; and means for detecting or screening potential health hazards in veterans and their unborn children, and means of treatment or therapeutic intervention.

Line 23, page 6, redesignate "(C)" as "(D)".

Strike line 25, page 6, and insert in lieu thereof: "of the literature studies, research, testing and evaluation provided for by subparagraphs (B) and (C), or all three.".●

CONVEYANCE TO THE STATES OF CERTAIN LANDS

AMENDMENT NO. 67

(Ordered to be printed and referred to the Committee on Energy and Natural Resources.)

Mr. HATCH submitted an amendment intended to be proposed by him to the bill (S. 1245) to provide for the cession of and conveyance to the States of federally unreserved, unappropriated lands, and to establish policy, methods, procedures, schedules, and criteria for such transfers.

PRESERVATION OF INDIAN TREATY RIGHTS

Mr. HATCH. Mr. President, as you know, on May 20 of this year, I introduced the Public Lands Reform Act of 1981 (S. 1245). Since that time, a number of organizations and individuals representing American Indian tribes have brought to my attention a serious concern on the part of many native Americans: State control of a large portion of the western public lands would lead to the abrogation of certain treaty rights which they currently have on Federal lands. While I was mindful of the general matter of preserving valid existing rights on the lands in the event of State transfer, I see now that the concerns of the tribes are sufficiently grave as to merit specific treatment.

Therefore, I would like to submit at this time an amendment to S. 1245 which, if adopted, would provide that explicit protection. I would also like the record to clearly reflect that the sponsors of this measure do not intend its passage to be anything but beneficial to all Americans, with the possible exception of those Interior Department and Agriculture Department employees whose livelihoods are directly dependent upon Federal ownership and management of the lands in question. We will continue to be receptive to positive changes in the bill which will insure that objective.

I would like to thank Mr. Walter Moffett of Kamiah, Idaho, and Mr. Bearhead Swaney of St. Ignatius for taking a firm hand in educating my staff in the realities of Indian interests in nontribal lands. Without their efforts this amendment would not have been possible.

NOTICES OF HEARINGS

SUBCOMMITTEE ON ENERGY AND MINERAL RESOURCES

Mr. WARNER. Mr. President, I would like to announce for the information of the Senate and the public, changes in the scheduling of public hearings before the Subcommittee on Energy and Mineral Resources.

The subcommittee hearing on S. 859, to amend the mineral leasing laws of the United States to provide for uniform treatment of certain receipts under such laws, previously scheduled for Thursday, June 25, has been rescheduled for Wednesday, July 8, beginning at 10 a.m. in room 3110 of the Dirksen Senate Office Building.

The subcommittee hearing on S. 1073, to amend section 21 of the Mineral Leasing Act of 1920, previously scheduled for Wednesday, July 8, has been rescheduled for Thursday, June 25, beginning at 9:30 a.m. in room 3110 of the Dirksen Senate Office Building.

Those wishing to testify or who wish to submit written statements for the hearing record should write to the Subcommittee on Energy and Mineral Resources, Committee on Energy and Natural Resources, room 3104, Dirksen Senate Office Building, Washington, D.C. 20510.

For further information regarding these hearings, you may wish to contact Mr. Roger Sindelar of the subcommittee staff at 224–4236.

AUTHORITY FOR COMMITTEES TO MEET

SUBCOMMITTEE ON SEPARATION OF POWERS

Mr. BAKER. Mr. President, I ask unanimous consent that the Subcommittee on the Separation of Powers of the Committee on the Judiciary be authorized to meet during the session of the Senate on Monday, June 15, to discuss the human life bill.

The PRESIDING OFFICER. Without objection, it is so ordered.

SPECIAL COMMMITTEE ON AGING

Mr. BAKER. Mr. President, I ask unanimous consent that the Special Committee on Aging be authorized to meet during the session of the Senate on Tuesday, June 16 from 2:30 until 4:30, to consider social security short term financial issues.

The PRESIDING OFFICER. Without objection, is is so ordered.

SUBCOMMITTEE ON NUCLEAR REGULATION

Mr. BAKER. Mr. President, I ask unanimous consent that the Subcommittee on Nuclear Regulation of the Committee on Environment and Public Works be authorized to meet during the session of the Senate on Tuesday, June 16 at 2 p.m., to consider mill tailings legislation.

The PRESIDING OFFICER. Without objection, it is so ordered.

ADDITIONAL STATEMENTS

RUBY LEE PIESTER

● Mr. TOWER. Mr. President, Mrs. Ruby Lee Piester, a native Texan and a professional social worker, was featured recently in People magazine for her work as executive director of the country's largest combined maternity home and adoption agency, the Edna Gladney Home in Fort Worth. It is my distinct pleasure to ask that this feature article from the May 18, 1981, issue of People magazine be printed in the RECORD at the conclusion of my remarks.

As the article points out, Mrs. Piester and her husband, Jim, have devoted their lives to helping young women who chose adoption as the best plan for the baby which is unwanted or unplanned in their lives. By working with thousands of adoptive parents and pregnant girls over 20 years at the Edna Gladney Home, Mrs. Piester is convinced that open adoption records would be disastrous for adoption because the privacy of all those involved is threatened. It was because of the open-records provision and other harmful provisions present in the proposed Model State Adoption Act, that Mrs. Piester and other adoption leaders across the country decided to form a national organization to promote adoption in a positive manner. This organization, the National Committee for Adoption, has as its vice president Mrs. Piester. Many of you know of my grave concerns with the Model Adoption Act proposed by an advisory panel to the Department of Health and Human Services last year. I continue to be concerned that the final Model State Adoption Act published by Secretary Schweiker is one which promotes adoption in a positive manner—especially for those children in foster care and institutions who are free for adoption.

Mrs. Piester is truly the first lady of adoption in Texas. She has been involved in child welfare services since her graduation from the University of Texas School of Social Work, having worked for the State Department of Public Welfare and having served on numerous committees at the local, State, and national levels. Under Mrs. Piester's leadership as the executive director of the Edna Gladney Home, client involvement has been a major focus. The young women at the home staff a hotline talk-

ing with young women who are faced with the crisis of an unwed pregnancy and also assist with their ideas for brochures and other materials used in outreach. Young adoptive parents are organized throughout the Nation reaching out into public schools, college campuses, medical groups, and service groups sharing the services of the home. An Adult Adoptee Association and the National Grandparents Association have also been formed under Mrs. Piester's guidance.

But Mrs. Piester's community activities are much broader than her own agency's activities. She promotes the social work field—and the positive "adoption option"—in every aspect of her endeavor through radio, television, and the printed media not only in Fort Worth and throughout the State of Texas, but nationally as well. I invite my colleagues to read Mrs. Piester's interview. In a few short pages, the real facts about adoption and high quality services to young, unmarried pregnant women are spelled out clearly by a Texas lady who has devoted her life to helping people from all over the Nation.

Thank you, Mr. President.

The article follows:

FOR RUBY LEE PIESTER, THE FIRST AND LAST WORD ON ADOPTION IS "CONFIDENTIAL"

Ten to one. In some areas of the U.S. that is the disproportionate ratio of couples seeking to adopt children as compared to the discouraging small number of babies available. So great is the demand from would-be parents that some young unwed mothers are being offered large sums of money—even a four-year college education—to turn over their newborn offspring. As if the statistics weren't bad enough, the tight adoption market is being complicated by "right to know" advocates, who assert that adoptive children should automatically be able to learn the identities of their natural parents upon request, thus ending the long-standing code of adoption confidentiality.

Few are more concerned about the problems of adoption than Ruby Lee Piester, 65, executive director for the past 18 years of the country's largest combined maternity center and adoption agency, the Edna Gladney Home in Fort Worth. A foundation-supported complex of 13 buildings set in a handsome campus of rolling lawns, the home has as many as 145 unwed young women "in residence" at any one time.

The childless Piester, like her husband, James (a retired real estate manager), is an opponent of abortion and a firm believer in adoption. Her commitment led her to become a founding mother of the National Committee for Adoption, the nation's first full-time lobby and clearinghouse for adoption issues. Earlier this month the NCA held its first annual conference in Washington. Shortly before, People's Kent Demeret spoke to Piester about her views on the current state of adoption in America.

Is there a crisis in adoption?

Yes, there is. Though thousands of children are put up for adoption each year, there simply aren't enough to meet the demand. The gap is widening as contraception and abortion whittle down the birthrate. At the Gladney Home last year, we had 352 babies up for adoption—and some 3,000 applications, most of them from childless couples unable to conceive themselves.

What is the current status of adoption legislation?

Most adoption law is handled at the state level with a variety of procedures. However, a new federally recommended code of practice called the Model State Adoption Act is being prepared by the Department of Health and Human Services. Besides trying to unify adoption methods with a set of proposed guidelines, the Act aims to spur the lagging adoption of older children and those with emotional or mental problems. Government subsidies would be offered to people who balk at adopting problem kids because of the high cost of caring for them.

What objections do you have to the Act?

One disturbing feature is that it recommends allowing the natural father to extend his veto power over adoption until after the child is born, rather than before the birth as is generally the case. Our experience is that some previously disinterested fathers, or their mothers, become anxious to keep a baby once it is born, especially if it's a boy. Such a practice can make things difficult for a mother favoring adoption.

How can so-called right-to-know clauses endanger the adoption process?

Such provisions, if they are ever enforced, could be disastrous for adoption because they threaten the privacy of those involved. The average age of the expectant mothers who come to Gladney is 17. Mostly, these are fine girls from all-American families who have had an unfortunate experience, and one of the first things they ask about is confidentiality. They are looking forward to the time when they can pick up their lives, get married and have more children. They see problems ahead if anyone can find out who they are.

And the adoptive parents?

They are just as concerned. They don't want to raise a child and have the natural mother or father try to take it away later.

What if the right to confidentiality is taken away?

More girls will get abortions; perhaps 50 percent of those who come to Gladney now would do so. Also, many girls who do give birth will lie about their backgrounds to protect themselves, and then we won't get the honest information we need to help the children.

What do you now tell adopters and the natural parents about each other?

Everything but their identity. Adoptive parents need to know if there is, say, diabetes in the natural family.

How do you answer the argument that both parents and child have a "right" to know each other's identity?

I have heard both adoptees and biological mothers say that while they appreciate each other's need for contact later in life, they would not want the other person to simply come to their house one day and ring the doorbell. I know of a 60-year-old woman who had had an illegitimate child when she was young. Now someone has managed to contact the mother, and she is terribly distraught by the experience. We've had girls at Gladney who have become prominent—one went on to be a Miss America, and several others married politicians. They should have the right to decide whether or not they want to be contacted.

What if their decision is yes?

Our new National Committee for Adoption has worked out a way of arranging contact discreetly, via a third party. Adoptees over 18 and mothers register with the agency. Then they are matched up if they desire, by the agency or some central organization.

If they do make contact, what's the usual result?

It varies. One woman told me that her hunt for her mother was beneficial because she finally knew her adoptive parents were the ones she truly identified with. She absolutely did not identify with her real parents, but she had to go through some painful experiences to find that out. I also know of a woman, who had a baby after being raped, and she is terrified that her identity will be traced.

How do you manage adoptions?

At Gladney, a mother never meets the people adopting her child, but we make certain she meets other adoptive parents, to reassure her about the kind of folks who will be bringing up her baby. All the applicants are carefully screened. We also try to match up physical characteristics. It helps a child as he grows up being told that he looks like his "parents"—even if he is eventually told, as he should be, he was adopted.

What if a woman decides to keep her child or abort it?

At Gladney, we don't press anyone. If they opt for an abortion, we have them talk to a doctor about how and where it can be done.

And if she opts for adoption?

Then we contact the natural father. If she won't tell us who he is, the courts won't allow the adoption. Sometimes, though—in rape cases or if the mother has been very promiscuous—that requirement can be waived. We also don't let the girl sign anything until at least four days after the baby is born. If she still wants adoption, she signs the releases and a judge then awards the baby to the parents we deem best. But the whole process isn't final for another six months, during which a follow-up investigation is conducted to make sure everything is going as it should.

What are the concerns of the mothers?

They want their child to have a good home and be raised like a natural child. They also stress the need for stability—and discipline.

And the adoptive parents?

They are not as threatened as people might think about losing their child's affections when it learns it has been adopted. But they are fearful that the child could be taken away from them after a few years. They want to know exactly how the mother feels about giving up the child, and want some assurance that she won't change her mind.

What kinds of prospective parents seek to adopt?

They are usually 25 to 35, active churchgoers, have a suburban home and an annual income averaging about $25,000, and have been trying to start a family of their own for many years. Interestingly, we find that about 25 percent of them do have a natural child within a year after adoption.

Where is the competition between adoption and abortion headed?

Right now, I'd guess that two-thirds of unwed pregnant girls never even consider adoption. Young people have tended to accept abortion as the current thing. But now, with all the debating on abortion, we see a trend away from it, especially among college girls. If the new law leaves confidentiality intact, more people will turn to adoption agencies. Then the number of adoptable babies will become more in line with the number of good homes available to put them in.●

ELIMINATION OF STRIKER PARTICIPATION IN FOOD STAMP PROGRAM

● Mr. LEVIN. Mr. President, while I voted yesterday for final passage of the food stamp bill, I am nevertheless deeply disturbed over the committee decision to bar a household from qualifying for food stamps or receiving increased benefits due to the participation of a household member in a strike.

I see no cause for such action. The change is wholly unnecessary and above all unfair.

Under current law, strikers must meet every eligibility requirement, including the income and assets tests and they

must seek and accept work in order to be eligible for food stamps, the same as any other recipient. If a household has liquid assets of $1,500 it is ineligible for the program—strike benefits are counted toward this $1,500 limit. Studies show that the vast majority of strikers do not receive food stamps. GAO has reviewed five recent time periods for which data on the participation of strikers in food stamps is available. In four of these periods, GAO found that 89 to 96 percent of all strikers did not receive food stamps. In the fifth period, which concluded with the 1978 coal strike, GAO found that 64 percent of all strikers did not participate in the food stamp program.

Mr. President, those members of the committee who supported this change in current law failed to recognized that workers are taxpayers. The benefits of tax-supported programs should not be denied them. Mr. President, there is a clear inconsistency here in the treatment of the parties involved in worker disputes.

The posture of neutrality certainly does not exist when comparing the committee's action with that of current tax laws. Businesses may claim net losses incurred during a strike not only for one tax year, but back 3 years and forward 5 years. This insures maximum tax deductibility for strike losses. Additionally, during a strike, a company can continue to take advantage of other income supporting provisions available to business such as depreciation allowances, government information and research, and other investment incentive programs.

Elimination of striker participation in the food stamp program will pose hardship for the poorest of the strikers. In many instances a striker may be out of work against his own personal wishes. The decision to strike is not made by an individual worker. The law compels a vote before a strike can be held, and the will of the majority prevails. There is no way of knowing which persons may or may not have voted to strike because the law also compels that the vote be by secret ballot. So, the committee chooses to penalize even those who voted against a strike, along with each of the members of that family.

Mr. President, the labor laws of this country protect the right to strike. Those workers who choose to exercise this right should not be singled out for denial of food stamp benefits if they otherwise qualify under the Act and program regulations.

Mr. President, I see absolutely no justification for the change proposed by the committee.●

STATUS REPORT ON THE BUDGET

Mr. DOMENICI. Mr. President, I submit to the Senate a status report on the budget for fiscal year 1981 pursuant to section 311 of the Congressional Budget Act. Since my last report the Congress has cleared for the President's signature H.R. 3512, the 1981 supplemental appropriation and rescission bill.

REPORT TO THE PRESIDENT OF THE U.S. SENATE FROM THE COMMITTEE ON THE BUDGET—STATUS OF THE FISCAL YEAR 1981 CONGRESSIONAL BUDGET ADOPTED IN H. CON. RES. 115

REFLECTING COMPLETED ACTION AS OF JUNE 10, 1981

[In millions of dollars]

	Budget authority	Outlays	Revenues
Revised 2d Budget Resolution level	717,500	661,350	603,300
Current level	715,178	661,065	611,900
Amount remaining	2,322	285	8,600

BUDGET AUTHORITY

Any measure providing budget or entitlement authority which is not included in the current level estimate and which exceeds $2,322 million for fiscal year 1981, if adopted and enacted, would cause the appropriate level of budget authority for that year as set forth in H. Con. Res. 115 to be exceeded.

OUTLAYS

Any measure providing budget or entitlement authority which is not included in the current level estimate and which would result in outlays exceeding $285 million for fiscal year 1981, if adopted and enacted, would cause the appropriate level of outlays for that year as set forth in H. Con. Res. 115 to be exceeded.

REVENUES

Any measure that would result in revenue loss exceeding $8,600 million for fiscal year 1981, if adopted and enacted, would cause revenues to be less than the appropriate level for that year as set forth in H. Con. Res. 115.●

PRELIMINARY NOTIFICATION PROPOSED ARMS SALES

● Mr. PERCY. Mr. President, section 36(b) of the Arms Export Control Act requires that Congress receive advance notification of proposed arms sales under that act in excess of $25 million, or in the case of major defense equipment as defined in the act, those in excess of $7 million. Upon receipt of such notification, the Congress has 30 calendar days during which the sale may be prohibited by means of a concurrent resolution. The provision stipulates that, in the Senate, the notification of proposed sales shall be sent to the chairman of the Foreign Relations Committee.

Pursuant to an informal understanding, the Department of Defense has agreed to provide the committee with a preliminary notification 20 days before transmittal of the official notification. The official notification will be printed in the RECORD in accordance with previous practice.

I wish to inform Members of the Senate that two such notifications were received on June 1, 1981.

Interested Senators may inquire as to the details of these preliminary notifications at the offices of the Committee on Foreign Relations, room 4229 Dirksen Building.

The notifications follow:

DEFENSE SECURITY ASSISTANCE AGENCY,
Washington, D.C., June 1, 1981.

Dr. HANS BINNENDIJK,
Professional Staff Member, Committee on Foreign Relations, U.S. Senate, Washington, D.C.

DEAR DR. BINNENDIJK: By letter dated 18 February 1976, the Director, Defense Security Assistance Agency, indicated that you would be advised of possible transmittals to Congress of information as required by Section 36(b) of the Arms Export Control Act. At the instruction of the Department of State, I wish to provide the following advance notification.

The Department of State is considering an offer to a Northeast Asian country tentatively estimated to cost in excess of $25 million.

Sincerely,

ERICH F. VON MARBOD,
Acting Director.

DEFENSE SECURITY ASSISTANCE AGENCY,
Washington, D.C., June 1, 1981.

Dr. HANS BINNENDIJK,

POWER, POLITICS, AND A SENSE OF HISTORY

● Mr. WEICKER. Mr. President, I commend to the attention of my colleagues the May 23 baccalaurate address of A. Bartlett Giamatti, president of Yale University, to the Yale class of 1981. Mr. Giamatti's impassioned call for citizen participation in the political process is compelling, as is his insistence that "high idealism" represents the essence of our democratic society. I respectfully urge my colleagues to consider the thoughtful conclusions of Mr. Giamatti's address, which apply to all Americans as well as to young adults. Therefore, Mr. President, I ask that the baccalaurate address of A. Bartlett Giamatti be printed at this point in the RECORD.

The address is as follows:

POWER, POLITICS AND A SENSE OF HISTORY

One of our most sensible commentators on education and society recently published a brief piece which was deeply disturbing for what it said, yet again, about America's confusion about ideas and power and the power of ideas in our national life. Briefly, this commentator, dismayed because Professor James Coleman had authored a report holding "that private high schools seemed to provide a better education than public ones," went to considerable lengths to chide social scientists for having or wishing to have an impact on the course and conduct of national life. Thinking about society is splendid, it seemed to be said, as long as the thinkers remain uninvolved in public policy and its creation. "Sociology gains in prestige and value when it keeps its distance from the political battles of the day" (New York Times, May 11, 1981, The Editorial Notebook).

Presumably, politicians, who fight the battles of the day, fight them better when they do not have the benefit of thinking. Why thoughtful people have chosen to join the gang on the crowded anti-social science bandwagon is a question I cannot answer.

Most disturbing to me is the idea that "If those who wield political power are to make use of sociological studies—and they should—the research should be neutral both in fact and appearance." I believe our commentator wants research that is nonpartisan, as do I. If he wants, however, social science research that is encouraged to believe itself free of values and disconnected from the world it studies, then he wants soulless, "academic" theorizing that will be of no use to anyone.

To wish a world where ideas are "value free," freeze-dried commodities, and political power is necessarily unconnected with reflection or analysis about society, is to wish for more of what we have at a time when we need much less of it. Our problem as a society is that we have fostered disconnectedness; we have created a false and falsifying separateness between social research and policy making, thinking and politics, ideas and power. At some point we became unmoored from that fundamental Western concept of a society where the leader and the system he energizes were meant to blend thought and action, ideas with force and forceful ethical behavior. Read Plato's Statesman, where the leader fosters education and education furthers the weaving of the web of the state, meshing as in a tapestry the various types of citizens; read Cicero's Republic, where the state is a harmonious orchestra, blending like musical tones the various classes, a concord aided by an idea of justice; read these, and whatever you think of them, you will not find a vision of a state where ideas and power can be distinct, where the power of ideas could ever be unconnected to a forceful public good.

I speak today to you, whose education has been for the purpose of directing ideas to a life of leadership and service to others; whose education has been to urge you to see and feel and think about the connectedness among things and how that connectedness must be fostered so that civilization is sustained. In speaking to you, I take as my theme power and a sense of history in our public life. What concerns me most today is the way we have disconnected ideas from power in America and created for ourselves thoughtful citizens who disdain politics and politicians when more than ever we need to value politics and what politicians do; when more than ever we need to recognize that the calling to public life is one of the highest callings a society can make. We need to recognize that if we do not summon and send forth from ourselves a few of the highest quality to lead, the many cannot hold together in civility and dignity.

If a society assumes its politicians are venal, stupid or self-serving, it will attract to its public life as an ongoing self-fulfilling prophecy the greedy, the knavish and the dim. If, as I will argue later, a culture like ours has wrongly persuaded itself that power is really mere force, and the use of power in its public or private life simply the exercise of force, then that culture will attract to leadership those who misunderstand power and who therefore cannot possibly use it correctly or well. How power is conceived in a society has the most to do with determining who is attracted to positions of power. A healthy society must never wish to have as its public servants people who only hunger to be in public life, who, thinking power is a natural force, believe they will become immortal if they can tap into its sheer, natural flow. The best way to avoid such people is to avoid such an idea of power.

Far better to think historically, to remember the lessons of the past. Thus, far better to conceive of power as consisting in part of the knowledge of when not to use all the power you have. Far better to be one who knows that if you reserve the power not to use all your power, you will lead others far more successfully and well, for to restrain power is in effect to share it. To share power is to give power to those who do not have it. Whoever knows how to restrain and effectively release power finds, if he is skilled and good, that power flows back to him. Power flows back to such a leader because from the sharing of power comes stability in a society, and stability is finally what humankind aches for, a stability that is just and equitable and humane.

On the other hand, those who think of power as simple force to be unleashed, force of personality, force of followers, force of might, force with no historical roots and no sense of consequence, invariably find that they exhaust their power, or are exhausted by it; they find that they only call forth their opposites and that then society inevitably swings, sickeningly, back and forth among those thoughtless enough to consume power because they will not share, and thus replenish, it. Under such leaders, the body politic suffers seizures but it never achieves stability. No one wins.

This layman's view of how power in a democracy ought to be construed depends for its efficacy upon those who are attracted to public life; it requires those who are impelled by talent for connectedness rather than by ambition for aggrandized private pleasure; its efficacy depends upon politicians who view the act of governing not as the exercise of sheer pressure, but as the assertion of compelling principle. I believe that we have a number of such people serving at the local and national level, and that we do not appreciate them as we should. I also believe we ought to be concerned by the spectacle of so many experienced and able elected officials, at all levels, retiring from public service because they will no longer put up with the casual unappreciation by the very people who elected them or with the gnawing of special-interest groups or with the constant high whine emitted by the herds of lobbyists. Finally, we must recognize that we have been so disdainful of or inattentive to our political system that it is increasingly difficult to find candidates who assume the need for any measure of professionalism as a prerequisite for public service.

By professionalism in politics I mean that one should serve an apprenticeship in how to serve, that women and men be encouraged and trained in how to be responsive in a democracy as well as responsible for democratic values. Increasingly we elect, on the basis of powerful advertising campaigns, people who do not know how to do anything for anybody, whether it is having a street light installed or protecting a citizen against loss of liberty. Increasingly we elect people who are governed by their staffs, whom no one elected. By professionalism, I mean we must find people who know how and when to subordinate personal obsession to the wishes or will of those they represent, wishes or will those politicians comprehend by returning to where they came from to talk to the people, not by counting editorials or by reading polls. People with professionalism believe politics is an ancient art, not a necessary trial in the world for secular saints nor a new game to be played after the rigors of making money are over. Professionalism in public life would never assume that you educate the citizenry to its needs by asserting over and over again that government is best done by dismantling the structures and purposes of government.

While it pleases some to repeat that politics is the art of the possible. I prefer to think that politicians must have the capacity for the impossible—for knowing in which direction their moral compass points and for being supple enough to persuade others of the moral rightness of the course they have set. They must be those who have a clear sense of how complex life is and be willing to make choices they can then convince other thinking people are the correct decisions. We are afflicted now, and have been for some time, with solo operators for whom nothing is complex, because nothing is connected to anything else; who believe the function of government is to impose moralistic schemes rather than to forge complex consensuses, and who treat government as an impediment to mandating purity rather than as a means of connecting, and negotiating among, legitimate needs and achieving a practical, equitable balance.

I am disheartened that for at least a decade we have been told by our shepherds that government or the other shepherds are the "enemy." Government is not the enemy, and neither are the people who elect governments. If we elect those who play on the forces that divide us, who play to our fears, we court a tradegy we may not be able to contain. And if we continue to elect those who denigrate what they pursue, who insist they are outsiders as they claw their way to the inside, we ought to ask if it is in our common interest to buy any more snake oil.

II.

Where did it all start in our culture, this worship of power as force, this contempt for restraining or complex connections, and the consequent devaluation of political life? I am not really sure but I choose to speculate it began in the middle of the last century, as America was collapsing into and struggling out of the ruins of the Civil War. I think it began with those who were positioned to bypass the Founders and to summon up the original strength of puritan America and to hurl that strength, naked, squalling as if newborn, into the gathering darkness. I believe it began with prophets of the secular religion that was the new America, like Emerson. In 1860, Emerson published his essay "Power" in The Conduct of Life.

In the dark pages of that powerful meditation on power, on the eve of the War, Emerson amply reflects a view of politics and politicians that is disdainful of the hurly-burly, the compromising and the dirtiness of it all. But Emerson makes it clear that he does not share those fastidious views. Those views, he says, are only held by the "timid man"; by the "churchmen and men of refinement," implicitly effete and bookish. Emerson was not for them. He was for the man who is strong, healthy, unfettered, the man who knows that nothing is got for nothing and who will stop at nothing to put himself in touch with events and their force. He is willing to say, because he believes it, that "Society is a troop of thinkers, and the best heads among them take the best places," but the metaphor of the mounted squadron, with the best jostling to the fore, means that this is a special kind of thinker.

He is, as the immediately preceding sentence says, one who knows "There is always room for a man of force, and he makes room for many." The "thinkers" Emerson really admires are those with "coarse energy,—the 'bruisers,' who have run the gauntlet of caucus and tavern through the county or the state,—" the politicians who despite their vices have "the good-nature of strength and courage." And what do the political bruisers know? They know what Emerson knows: the key to all ages is—Imbecility; imbecility in the vast majority of men at all times, and even in heroes in all but certain eminent moments; victims of gravity, custom, and fear. This gives force to the strong—that the multitude have no habit of self-reliance or original action.

With extraordinary literary skills at a crucial moment in our nation's life, it is Emerson who freed our politics and our politicians from any sense of restraint by extolling self-generated, unaffiliated power as the best foot to place in the small of the back of the man

in front of you and who promoted shoving as the highest calling abolitionist, moral New England could conceive.

Emerson was a potent figure in his time, and his influence in our culture is powerful to this day. You do not have to read the prophet to realize his ideas are all around us. Strangely enough, he lives in the popular imagination as the Lover of Nature, a sweet, sentimental, Yankee Kahlil Gibran. In fact, Emerson is as sweet as barbed wire, and his sentimentality as accommodating as a brick. There might have been no lasting harm in all this, no lasting harm in his hymns to the strong and to a strength deriving from a frenzied harmony with the higher laws of Nature; no great harm, though enough, from his wishing for a politics where energy, will and ferocious concentration were the royal roads to success; no real danger from his worship of "self-reliance and original action," except that, like all implacable saviors, Emerson knew where his people were most insecure and where he could best make his balm as indispensible as blood. His everlasting harm comes because he knew Americans would forever feel themselves colonists and thus forever feel themselves derived, or secondhand. And so his greatest contribution to our culture, and greatest disservice, lies in the assurances with which in subtle and obvious ways he justified jettisoning history.

Emerson found in our independent character, xenophobia, and he made it into a gospel. He managed to persuade generations that custom was a crutch, not a means of continuity; he assured everyman that he was his own pure source, and that every native strain in his character was a link with Higher Nature. He wished to sever America from Europe, and American culture and scholarship and politics from whatever humankind had fashioned before. And he thought he had done something good.

The result is that he infected American culture with a scorn of the past. The result is he encouraged America to shake loose from any constraint on our strength and then to call the resulting power miraculous because it had no moorings. Thus, to Emerson I believe we owe our worship of a politics which wishes for originality in all things: for a society in its origins pure, for solutions that are wondrously complete, for politicians whose sheer unthinking vigor will cleanse us forever. To Emerson we owe that spirit of puritan America that has survived to today, the smug, abstract moralism that is distrustful of any accommodation, that is always certain of its righteousness because it is merely self-regarding, that is scornful of any flexibility of spirit because it has never looked over its shoulder.

Emerson and those who followed him licensed that unstable strain in us that would have us begin all over again every morning, every morning to discover evil again in order every morning to focus the will in order to shove our way to noontime; that naive energy that legisimizes those gusts of moralistic frenzy masquerading as high principle that periodically seize us by the throat and that, while always comfortable with nostalgia, are never truly attentive to history. Emerson licensed our violent swings from extreme to extreme by insisting that whatever willful impulse sat in the throne of the heart, holds legitimate sway. In another creed, his self-reliance would be the sin of pride.

Rootless save for immersion in the rich soil of the endlessly admiring self, glowing with animal energy, completely devoid of any sense of our common past, a new technocrat of force, Emerson's figure of power formed more than the nineteenth and much of the twentieth centuries' view of the politician. It formed what became an acceptable public personality, and that view of power and its uses is still with us; and it still calls forth reactions to itself as extreme as it is. That is why I lay at Emerson's cottage door the encouragement to instability that is one of America's real afflictions.

Emerson's views are those of a brazen adolescent and we ought to be rid of them. The maturing of America will occur when we have absorbed, not rejected, our past, our past as various peoples from diverse cultures, not simply as entrepreneurs of the soul. We will mature fully when we require sense of history in those who lead up and reject those originals who believe, in whatever walk of life, that each of us is created afresh solely for the purpose of baying at every new, pure moon. The maturing of our politics, which is to say the fashioning of our national life as a work of art, will come when stability of society, not originality of action, is our goal.

To assume that civility, not success in forcing new purities, is the proper end of politics will begin to rid this country of the extraordinary savagery of spirit that is now abroad: the resentment at the advancement of others, the bitterness that begrudges everyone else everything, the increasing and deeply dangerous polarization of the races, the pustular eruptions of sexism, racism and of anti-Semitism whose stench now fills the air. These are all signs that some now feel licensed to shove again the less numerous, the weaker, the new, the exotic, the foreign. I smell that spirit in the air and read it in the papers, I see it in the mail I get, I read it spray painted on walls, I hear it in the jokes people tell, and it is imperative that all of us condemn and exorcise that spirit.

We must civilly but absolutely clearly reject a spirit that instinctively turns to boycott, instead of tough, reasoned debate, to express its disagreement. We must publicly reject the movement that once again cries to ban books in libraries. We must insist on law, not on rule by decree; we must insist that the principles of the Constitution be applied through the courts and resist the desire that the Constitution be endlessly amended. We must never lose sight of the need for a balanced, pluralistic society, where ideas compete and principles are adjudged by legislative processes and judicial forums. If the day is won by the neo-Puritans through those means, so be it. But those who simply, arrogantly assert that their morality is in the majority should not expect others who simply do not believe it to stand mute. A civil society can be shattered by the kind of coercion that now seeks to become commonplace.

These tensions and many others are the stuff of our local and national public life, and these tensions must be managed by our politicians and by the rest of us. We should honor those who are willing to confront these tensions and we must insist that they and we do not acquiesce to their divisive force. We must encourage a regard for those who manage our public needs and desires and if we do not find that regard justified, then we must find and encourage those in whom we can believe and who are worthy of our trust. We must insist that the goal of our politics is not punishment of some group or tendency, but healing, a healing of the wounds that the world will always inflict on us all; we must remember and insist that our leaders know that exclusion was never the purpose of our country's dream. We must remember America was not founded to create exiles.

Ladies and Gentlemen of the Class of 1981: America's founders intended that we manage, by an act of the will, competing as well as complementary freedoms, in the interests of forging a civil state and a free, generous people. That is not impossibly high idealism and we cannot let our public life fall to disconnected fragments by scorning its call, or by ignoring its imperatives. High idealism is America's most practical and durable product, our best native handicraft. Those who founded this Republic knew that and it is the obligation of our political leaders and of the rest of us who elect them to remember it too. It is our obligation to remember that the promise of our history lives in each of us a sacred trust. What a grand and precious gift, that legacy of competing freedoms all urging us to liberality of spirit and a decent public order. Women and men of Yale, as you lead, let that high idealism which is America's essence lead you.●

PROPOSED ARMS SALES

● Mr. PERCY. Mr. President, section 36(b) of the Arms Export Control Act requires that Congress receive advance notification of proposed arms sales under that act in excess of $25 million or, in the case of major defense equipment as defined in the act, those in excess of $7 million. Upon such notification, the Congress has 30 calendar days during which the sale may be prohibited by means of a concurrent resolution. The provision stipulates that, in the Senate, the notification of a proposed sale shall be sent to the chairman of the Foreign Relations Committee.

In keeping with my intention to see that such information is available to the full Senate, I submit for the RECORD at this point the notifications which have been received.

The notifications follow:

DEFENSE SECURITY ASSISTANCE AGENCY,
Washington, D.C., June 1, 1981.

Hon. CHARLES H. PERCY,
Chairman, Committee on Foreign Relations, U.S. Senate, Washington, D.C.

DEAR MR. CHAIRMAN: Pursuant to the reporting requirements of Section 36(b) of the Arms Export Control Act, we are forwarding herewith Transmittal No. 81-49 and under separate cover the classified annex thereto. This Transmittal concerns the Department of the Army's proposed Letter of Offer to Jordan for defense articles and services estimated to cost $60 million. Shortly after this letter is delivered to your office, we plan to notify the news media of the unclassified portion of this Transmittal.

Sincerely,

ERICH F. VON MARBOD,
Acting Director.

[Transmittal No. 81-49]

NOTICE OF PROPOSED ISSUANCE OF LETTER OF OFFER PURSUANT TO SECTION 36(b) OF THE ARMS EXPORT CONTROL ACT

(i) Prospective Purchaser: Jordan

(ii) Total Estimated Value:

[In millions]

Major Defense Equipment *	$57
Other	3
Total	60

* As included in the U.S. Munitions List, a part of the International Traffic in Arms Regulations (ITAR).

(iii) Description of Articles or Services Offered: Four AN/TPQ-36 mortar locating radars with support equipment.

(iv) Military Department: Army (VCT).

(v) Sales Commission, Fee, etc. Paid, Offered or Agreed to be Paid: None.

(vi) Sensitivity of Technology Contained in the Defense Articles or Defense Services Proposed to be Sold: See Annex under separate cover.

(vii) Section 28 Report: Included in report for quarter ending 31 March 1981.

(viii) Date Report Delivered to Congress: June 1, 1981.

POLICY JUSTIFICATION

JORDAN—ARTILLERY AND MORTAR LOCATING RADARS

The Government of Jordan (GOJ) has requested the purchase of four AN/TPQ–36 mortar locating radars and four AN/TPQ–37 artillery locating radars with support equipment at an estimated cost of $60 million.

The sale will further U.S. foreign policy objectives by assisting a friendly country to deter hostilities and defend itself in a region where it is vital to U.S. interests to reduce the probability of open conflict and to promote peace and stability. The sale will assist the GOJ in meeting its legitimate defense requirements and reaffirm to the Jordanian military and political leadership that the United States is responsive to the priority modernization objectives of the Jordanian Armed Forces. This modernization effort is consistent with U.S. views on Jordanian security needs, the regional military balance, and long-range peace and stability in the region.

The sale of the radars will provide Jordan an automated capability for locating mortars, short-range artillery, and high-angle fire weapons firing from multiple positions. The Jordanian Armed Forces will require training and logistical support for these weapon systems. The sale of the AN/TPQ–36 and AN/TPQ–37 radars will assist the Jordanian Armed Forces to offset in part the substantial artillery advantages held by neighboring countries.

The sale of this equipment and support will not affect the basic military balance in the region.

The prime contractor will be the Hughes Aircraft Corporation of Fullerton, California.

Implementation of this sale will require the assignment of four additional U.S. Government personnel to Jordan for approximately three weeks.

There will be no adverse impact on U.S. defense readiness as a result of this sale.

DEFENSE SECURITY ASSISTANCE AGENCY,
Washington, D.C., June 1, 1981.

Hon. CHARLES H. PERCY,
Chairman, Committee on Foreign Relations, U.S. Senate, Washington, D.C.

DEAR MR. CHAIRMAN: Pursuant to the reporting requirements of Section 36(b) of the Arms Export Control Act, we are forwarding herewith Transmittal No. 81–51, concerning the Department of the Navy's proposed Letter of Offer to Saudi Arabia for defense services estimated to cost $66 million. Shortly after this letter is delivered to your office, we plan to notify the news media.

Sincerely,

ERICH F. VON MARBOD,
Acting Director.

[Transmittal No. 81–51]

NOTICE OF PROPOSED ISSUANCE OF LETTER OF OFFER PURSUANT TO SECTION 36(b) OF THE ARMS EXPORT CONTROL ACT

(i) Prospective Purchaser: Saudi Arabia.
(ii) Total Estimated Value:

[In millions]

Major Defense Equipment*	60
Other	66
Total	66

*As included in the U.S. Munitions List, a part of the International Traffic in Arms Regulations (ITAR).

(iii) Description of Articles or Services Offered: Propulsion Engineering Training and in-country support for the U.S. Navy Chief of Naval Education and Training representatives for the Saudi Naval Expansion Program.

(iv) Military Department: Navy (LAP, Amendment 1).

(v) Sales Commission, Fee, etc. Paid, Offered or Agreed to be Paid: None.

(vi) Sensitivity of Technology Contained in the Defense Articles or Defense Services Proposed to be Sold: None.

(vii) Section 28 Report: Included in report for quarter ending 31 March 1981.

(viii) Date Report Delivered to Congress: June 1, 1981.

POLICY JUSTIFICATION

SAUDI ARABIA—PROPULSION ENGINEERING TRAINING AND TECHNICAL TRAINING SUPPORT SERVICES

The Government of Saudi Arabia has requested amendment of an existing foreign military sales agreement to provide Propulsion Engineering Training through May 1985, and to provide continued support for the U.S. Navy Chief of Naval Education and Training technical representatives in Saudi Arabia through May 1985 at an estimated cost of $66 million. Approval of this request will increase the cost of this sales agreement to $196 million.

This sale is consistent with the stated U.S. policy of assisting friendly nations to provide for their own self-defense by allowing the transfer of reasonable amounts of defense articles and services. It will demonstrate the continuing willingness of the United States to support the Saudi Arabian effort to improve the security of the country through modernization of Royal Saudi Naval Forces (RSNF). Enhancement of defensive capabilities of Saudi Arabia in a regional context will also contribute to overall Middle East stability.

Saudi Arabia is in the process of enlarging and improving its naval assets and operations through its Saudi Naval Expansion Program (SNEP) with the United States. This program started in 1972 and is scheduled to be completed in the mid-1980's. The SNEP includes the purchase of 29 ships and craft, shore facilities, equipment, and training. This purchase will provide for the training of RSNF personnel to insure the RSNF has the requisite numbers of trained personnel to operate and maintain the propulsion systems on the ships purchased from the United States.

The sale of this training and support services will not affect the basic military balance in this region.

The prime contractor will be Northrop Services, Incorporated of San Diego, California.

Implementation of this sale will require the assignment of two additional contractor personnel to Saudi Arabia.

There will be no adverse impact on U.S. defense readiness as a result of this sale.

DEFENSE SECURITY ASSISTANCE AGENCY,
Washington, D.C., June 1, 1981.

Hon. CHARLES H. PERCY,
Chairman, Committee on Foreign Relations, U.S. Senate, Washington, D.C.

DEAR MR. CHAIRMAN: Pursuant to the reporting requirements of Section 36(b) of the Arms Export Control Act, we are forwarding herewith Transmittal No. 81–52, concerning the Department of the Air Force's proposed Letter of Offer to Oman for defense articles and services estimated to cost $17 million. Shortly after this letter is delivered to your office, we plan to notify the news media.

Sincerely,

ERICH F. VON MARBOD,
Acting Director.

[Transmittal No. 81–52]

NOTICE OF PROPOSED ISSUANCE OF LETTER OF OFFER PURSUANT TO SECTION 36(b) OF THE ARMS EXPORT CONTROL ACT

(i) Prospective Purchaser: Oman.
(ii) Total Estimated Value:

[In millions]

Major defense equipment*	$14
Other	3
Total	17

*As included in the U.S. Munitions List, a part of the International Traffic in Arms Regulations (ITAR).

(iii) Description of Articles or Services Offered: One C–130H aircraft with support for two years and training.

(iv) Military Department: Air Force (SBA).

(v) Sales Commission, Fee, etc. Paid, Offered or Agreed to be Paid: None.

(vi) Sensitivity of Technology Contained in the Defense Articles or Defense Services Proposed to be Sold: None.

(vii) Section 28 Report: Included in report for quarter ending 31 March 1981.

(viii) Date Report Delivered to Congress: June 1, 1981.

POLICY JUSTIFICATION

OMAN—C–130H AIRCRAFT

The Government of Oman has requested the purchase of one C–130H cargo aircraft with support for two years and training at an estimated cost of $17 million.

This sale is consistent with the stated U.S. policy of assisting other nations to provide for their own self-defense by allowing the transfer of reasonable amounts of defense articles and services. Oman's strategic location at the entrance to the Persian Gulf closely links the national interests of Oman and the U.S. Along with the formal Access Agreement signed by the Governments of Oman and the United States in June 1980, this sale of a C–130H aircraft will enhance our country-to-country relationship.

This sale is designed to assist the Omani Air Force in modernizing and increasing its transport aircraft capability for the rapid movement of troops and military equipment within Oman and the resupply of ground forces. The sale of the C–130H aircraft does not introduce a new military capability into the region.

The sale of this equipment and support will not affect the basic military balance in the region.

The prime contractor will be the Lockheed Corporation of Marietta, Georgia.

Implementation of this sale will require the assignment of four additional U.S. Government and two contractor personnel for a minimum of one year.

There will be no adverse impact on U.S. defense readiness as a result of this sale.

DEFENSE SECURITY ASSISTANCE AGENCY,
Washington, D.C., May 29, 1981.

Hon. CHARLES H. PERCY,
Chairman, Committee on Foreign Relations, U.S. Senate, Washington, D.C.

DEAR MR. CHAIRMAN: Pursuant to the reporting requirements of Section 36(b) of the Arms Export Control Act, we are forwarding herewith Transmittal No. 81–53, concerning the Department of the Army's proposed Letter of Offer to Jordan for defense articles and services estimated to cost $27 million. Shortly after this letter is delivered to your office, we plan to notify the news media.

Sincerely,

ERICH F. VON MARBOD,
Acting Director.

(viii) Date Report Delivered to Congress: May 29, 1981.

POLICY JUSTIFICATION

JORDAN—M88A1 TRACKED RECOVERY VEHICLES

The Government of Jordan (GOJ) has requested the purchase of 30 M88A1 tracked recovery vehicles at an estimated cost of $27 million.

The sale will further U.S. foreign policy objectives by assisting a friendly country to deter hostilities and defend itself in a region where it is vital to U.S. interests to reduce the probability of open conflict and to promote peace and stability. The sale will assist the GOJ in meeting its legitimate defense requirements and reaffirm to the Jordanian military and political leadership that the United States is responsive to the priority modernization objectives of the Jordanian Armed Forces. This modernization effort is consistent with U.S. views on Jordanian security needs, the regional military balance, and long-range peace and stability in the region.

The sale of M88A1 tracked recovery vehicles will provide a tracked vehicle recovery capability to support Jordan's existing tank battalions. The Jordan Arab Army presently has the capability to absorb these vehicles with little or no additional training and logistical support. The sale of the M88A1 tracked recovery vehicles does not introduce a new capability into the region.

The sale of this equipment and support will not affect the basic military balance in the region.

The prime contractor will be the Bowen-McLaughlin-York Corporation of York, Pennsylvania.

Implementation of this sale will not require the assignment of any additional U.S. Government or contractor personnel to Jordan.

There will be no adverse impact on U.S. defense readiness as a result of this sale.●

MT. ST. CHARLES ACADEMY HOCKEY TEAM AGAIN RANKED TOPS IN UNITED STATES

● Mr. PELL. Mr. President, I wish to share with my colleagues news of a hockey team from Woonsocket, R.I., that has again been ranked the best high school team in this sport in the Nation.

High school hockey is "king" in Rhode Island. There are more youngsters playing hockey than baseball in the northern part of our State and Rhode Islanders follow the sport with great enthusiasm.

The Woonsocket team—Mt. St. Charles Academy—has been ranked the best high school hockey team in the Nation by the National Sports News Service. This is the second year in a row that the team has been top ranked and the first time any high school has earned this honor in consecutive years.

Mt. St. Charles Academy has captured the Rhode Island State Championship for the fourth straight season and, for the fifth straight time, has won the regular metropolitan A division title, this year with a 22–0–0 record. The team has 75 consecutive, undefeated, and untied victories in the metropolitan A division.

The team has compiled an incredible record of 91 consecutive, undefeated contests and finished the year with a 31–0–1 season. The team and its coach, Bill Belisle, are to be commended for their unmatched accomplishments and for the dedication and skill those accomplishments demonstrate.

I am sure that the school's excellent faculty and students, the residents of Woonsocket and all Rhode Islanders share my pride in the team's undefeated record and top honors.

Mr. President, I ask that an article from the Woonsocket (R.I.) Call of June 2, 1981 about the "Mounties" from Mt. St. Charles Academy be printed in the RECORD.

The article follows:

MAYOR, CITY COUNCIL HONOR KING MOUNTIES

(By Larry Berman)

How welcome were the Mounties made to feel at City Hall last night? Well, team captain Paul Guay sat himself down and ate his dinner at the mayor's desk.

The Mount St. Charles hockey team, named national champions for the second straight year by the National Sports News Service, were the guests of honor at a reception hosted by new Mayor Gaston A. Ayotte Jr. All the team members, coach Bill Belisle, and assistant Dave Belisle were served a buffet dinner.

The Mounties then were saluted by the City Council, which passed a resolution denoting their accomplishments. All seven councilmen gave the hockey kings a rousing standing ovation.

Belisle's stakers, who won their fourth straight Rhode Island championship and their fifth straight Metropolitan A Division title, were further congratulated as several councilmen addressed the well-dressed group.

"I've never met anyone in my life, until now, who can say that they are number one. To be the very best in the country is really special and I hope the whole state recognizes that," offered Francis L. Lanctot.

At the council's suggestion, a copy of the resolution will be sent to Governor J. Joseph Garrahy.

Councilman Maurice R. Bell had special praise for Belisle, the coach of the Mount dynasty. "You boys should consider yourself fortunate to have such a fine coach that has shown you how important playing together as a unit can be."

Mayor Ayotte also offered his congratulations, pointing out how proud Woonsocket is of the Mounties. "Whenever you hear that Mount is number one, they always say Mount St. Charles of Woonsocket, Rhode Island."

The final portion of the resolution perhaps summed it all up.

"This enviable record of achievements, team skill, fine team play and superb coaching has brought great honor and pride to Mount St. Charles Academy, the hockey team, their families and to the City of Woonsocket."

The following Mounties will have a copy of the resolution sent to their homes:

Marc Guay, Gary Fuoco, Jay Octeau, Brian Lawton, Paul Guay, Douglas Petrarca, James White, Billy Slaney, Tim LeBlanc, Rene Boudreault.

Robert Angell, Jody Demers, Chris Palin, Mike Hodson, Gregory Pratt, Joe Catalfano, Robert DiSandro, John Ursillo, Tom McComb, Billy Dean.

George Pisaruk, Paul Croteau, John Trimble, Steve D'Angelo, Todd Corkum, John Krim; head coach, Bill Belisle; assistant coach, David Belisle; managers, Brian Lefort, William Sieboda; moderator, Brother Roland Champagne.●

ISRAEL HAS THE RIGHT TO DEFEND ITSELF

Mr. PACKWOOD. Mr. President, the events of the last week in the Middle East, specifically the bombing by Israeli planes of a nuclear reactor in Iraq, have once again given supporters of Israel reason to rally around that beleaguered nation. I am particularly dismayed by the decision of the Reagan administration to delay the sale of additional F–16 planes that were scheduled for shipment to Israel this week.

As one Senator who recognizes the need for a strong Israeli defense, I must ask why people are unable to realize that the Israelis are motivated by self-defense and a justifiable preoccupation with security. It appears that the administration has already acted as both judge and jury in deciding that Israel was at fault in some way for their actions on Sunday, June 7, 1981 in attacking and destroying the Iraqi nuclear plant.

It was my hope that the administration would not have taken measures to delay the delivery of the F–16 planes, specially since an examination of news stories on the Iraq reactor would have revealed the extent to which Israel's attack was justified. To quote one example, from the October 4, 1980 edition of Al Tawrah, one of Baghdad's major newspapers:

The Iranian people should not fear the Iraqi nuclear reactor which is intended to be used against the zionist enemy.

To this end, one can understand why the Israelis moved so quickly—they were protecting their own survival. Israel can not afford to stand by and watch an enemy country build a nuclear bomb which, as Israel well knows, will be used against it. The Jewish people have already experienced one holocaust, and should not be condemned for insuring against another one. It is my belief, that we should know "all" of the facts first, before judging Israel.

The actions taken by this administration to delay the sale of the four F–16 fighter bombers to Israel, must be questioned.

GEORGE KENNAN AND NUCLEAR DISARMAMENT

● Mr. KENNEDY. Mr. President, on May 19, George F. Kennan, one of the wisest and most distinguished experts of our time in foreign policy, received the Albert Einstein Peace Prize for his substantive contributions over many years to the avoidance of nuclear war.

Throughout his long years of extraordinary public service, as Ambassador to Moscow, as counselor in the State Department, and as chief of the Department's policy planning staff, and in his eloquent and perceptive writing, Ambassador Kennan has earned an outstanding reputation for excellence and commitment, and I commend him for this well-deserved new recognition he has received.

In his address on receiving the Einstein Peace Prize, Ambassador Kennan calls for bold action by both the United States and the Soviet Union to break the relentless spiral of the nuclear arms build-up that threatens to engulf us in humanity's final war.

Mr. President, 35 years ago, at the dawn of the nuclear age, Bernard Baruch warned us that we must choose between the quick and the dead. Ambassador Kennan's address is a powerful and urgent new call to this task, and I request that his remarkable address be printed at this point in the RECORD.

The address follows:

ADDRESS BY THE HONORABLE GEORGE F. KENNAN

A person would have to be wholly insensitive, or perhaps selfless to the point of saintliness, in order not to be moved by such an honor as the Einstein Foundation is conferring on me today. I am neither of those things; so I am naturally deeply gratified and appreciative. On the other hand, I cannot help but have my doubts as to whether I have fully deserved it. And for that reason I can look on it only as a mark of confidence and of encouragement—encouragement to myself and to a great many other people—encouragement to continue to do what little may be in our power to assure that we of this generation, here and elsewhere, do not, in deference to our military fears, commit the supreme sacrilege of putting an end to the civilization out of which we have grown, the civilization which has made us what we are, the civilization without which our children and grandchildren can have no chance for self-realization, possibly no chance of life itself.

This as I see it, is the task to which the Einstein Foundation has devoted itself. Beside it, all personal considerations ought to fade into insignificance. I am grateful for the opportunity to associate myself publicly with this cause. And I am grateful for the admonition which the award implies: the admonition to neglect nothing—no effort, no unpleasantness, no controversy, no sacrifice—which could conceivably help to preserve us from committing this fatal folly.

What can we do?

Adequate words are lacking to express the full seriousness of our present situation. It is not just that we are for the moment on a collision course politically with the Soviet Union, and that the process of rational communication between the two governments seems to have broken down completely; it is also—and even more importantly—the fact that the ultimate sanction behind the conflicting policies of these two governments is a type and volume of weaponry which could not possibly be used without utter disaster for us all.

For over thirty years wise and far-seeing people have been warning us about the futility of any war fought with nuclear weapons and about the dangers involved in their cultivation. Some of the first of these voices to be raised were those of great scientists, including outstandingly that of Albert Einstein himself. But there has been no lack of others. Every president of this country, from Dwight Eisenhower to Jimmy Carter, has tried to remind us that there could be no such thing as victory in a war fought with such weapons. So have a great many other eminent persons.

When one looks back today over the history of these warnings, one has the impression that something has now been lost of the sense of urgency, the hopes, and the excitement that initially inspired them, so many years ago. One senses, even on the part of those who today most acutely perceive the problem and are inwardly most exercised about it, a certain discouragement, resignation, perhaps even despair, when it comes to the question of raising the subject again. The danger is so obvious. So much has already been said. What is to be gained by reiteration? What good would it now do? Look at the record.

Over all these years the competition in the development of nuclear weaponry has proceeded steadily, relentlessly, without the faintest regard for all these warning voices. We have gone on piling weapon upon weapon, missile upon missile, new levels of destructiveness upon old ones. We have done this helplessly, almost involuntarily: like the victims of some sort of hypnotism, like men in a dream, like lemmings heading for the sea, like the children of Hamlin marching blindly along behind their Pied Piper. And the result is that today we have achieved, we and the Russians together, in the creation of these devices and their means of delivery, levels of redundancy of such grotesque dimensions as to defy rational understanding.

I say redundancy. I know of no better way to describe it. But actually, the word is too mild. It implies that there could be levels of these weapons that would not be redundant. Personally, I doubt that there could. I question whether these devices are really weapons at all. A true weapon is at best something with which you endeavor to affect the behavior of another society by influencing the minds, the calculations, the intentions, of the men that control it; it is not something with which you destroy indiscriminately the lives, the substance, the hopes, the culture, the civilization, of another people.

What a confession of intellectual poverty it would be—what a bankruptcy of intelligent statesmanship—if we had to admit that such blind, senseless acts of destruction were the best use we could make of what we have come to view as the leading elements of our military strength! To my mind, the nuclear bomb is the most useless weapon ever invented. It can be employed to no rational purpose. It is not even an effective defense against itself. It is only something with which, in a moment of petulance or panic, you commit such fearful acts of destruction as no sane person would ever wish to have upon his conscience.

There are those who will agree, with a sigh, to much of what I have just said, but will point to the need for something called deterrence. This is, of course, a concept which attributes to others—to others who, like ourselves, were born of women, walk on two legs, and love their children, to human beings, in short—the most fiendish and inhuman of tendencies. But all right: accepting for the sake of argument the profound iniquity of these adversaries, no one could deny, I think, that the present Soviet and American arsenals, presenting over a million times the destructive power of the Hiroshima bomb, are simply fantastically redundant to the purpose in question.

If the same relative proportions were to be preserved, something well less than twenty per cent of these stocks would surely suffice for the most sanguine concepts of deterrence, whether as between the two nuclear superpowers or with relation to any of those other governments that have been so ill-advised as to enter upon the nuclear path. Whatever their suspicions of each other, there can be no excuse on the part of these two governments for holding, poised against each other and poised in a sense against the whole northern hemisphere, quantities of these weapons so vastly in excess of any rational and demonstrable requirements.

How have we got ourselves into this dangerous mess?

Let us not confuse the question by blaming it all on our Soviet adversaries. They have, of course, their share of the blame, and not later in their cavalier dismissal of the Baruch Plan so many years ago. They too have made their mistakes; and I should be the last to deny it. But we must remember that it has been we Americans who, at almost every step of the road, have taken the lead in the development of this sort of weaponry. It was we who first produced and tested such a device; we who were the first to raise its destructiveness to a new level with the hydrogen bomb; we who introduced the multiple warhead; we who have declined every proposal for the renunciation of the principle of "first use;" and we alone, so help us God, who have used the weapon in anger against others, and against tens of thousands of helpless non-combatants at that.

I know that reasons were offered for some of these things. I know that others might have taken this sort of a lead, had we not done so. But let us not, in the face of this record, so lose ourselves in self-righteousness and hypocrisy as to forget our own measure of complicity in creating the situation we face today.

What is it then, if not our own will, and if not the supposed wickedness of our opponents, that has brought us to this pass?

The answer, I think, is clear. It is primarily the inner momentum, the independent momentum, of the weapons race itself—the compulsions that arise and take charge of great powers when they enter upon a competition with each other in the building up of major armaments of any sort.

This is nothing new. I am a diplomatic historian. I see this same phenomenon playing its fateful part in the relations among the great European powers as much as a century ago. I see this competitive build-up of armaments conceived initially as a means to an end but soon becoming the end itself. I see it taking possession of men's imagination and behavior, becoming a force in its own right, detaching itself from the political differences that initially inspired it, and then leading both parties, invariably and inexorably, to the war they no longer know how to avoid.

This is a species of fixation, brewed out of many components. There are fears, resentments, national pride, personal pride. There are misreadings of the adversary's intentions—sometimes even the refusal to consider them at all. There is the tendency of national communities to idealize themselves and to dehumanize the opponent. There is the blinkered, narrow vision of the professional military planner, and his tendency to make war inevitable by assuming its inevitability. Tossed together, these components form a powerful brew. They guide the fears and the ambitions of men. They seize the policies of governments and whip them around like trees before the tempest.

Is it possible to break out of this charmed and vicious circle? It is sobering to recognize that no one, at least to my knowledge, has yet done so. But no one, for that matter, has ever been faced with such great catastrophe, such inalterable catastrophe, at the end of the line. Others, in earlier decades, could befuddle themselves with dreams of something called "victory." We, perhaps fortunately, are

denied this seductive prospect. We have to break out of the circle. We have no other choice.

How are we to do it?

I must confess that I see no possibility of doing this by means of discussions along the lines of the negotiations that have been in progress, off and on, over this past decade, under the acronym of SALT. I regret, to be sure, that the most recent SALT agreement has not been ratified. I regret it, because if the benefits to be expected from that agreement were slight, its disadvantages were even slighter; and it had a symbolic value which should not have been so lightly sacrificed. But I have, I repeat, no illusion that negotiations on the SALT pattern—negotiations, that is, in which each side is obsessed with the chimera of relative advantage and strives only to retain a maximum of the weaponry for itself while putting its opponent to the maximum disadvantage—I have no illusion that such negotiations could ever be adequate to get us out of this hole. They are not a way of escape from the weapons race; they are an integral part of it.

Whoever does not understand that when it comes to nuclear weapons the whole concept of relative advantage is illusory—whoever does not understand that when you are talking about absurd and preposterous quantities of overkill the relative sizes of arsenals have no serious meaning—whoever does not understand that the danger lies not in the possibility that someone else might have more missiles and warheads than we do but in the very existence of these unconscionable quantities of highly poisonous explosives, and their existence, above all, in hands as weak and shaky and undependable as those of ourselves or our adversaries or any other mere human beings: whoever does not understand these things is never going to guide us out of this increasingly dark and menacing forest of bewilderments into which we have all wandered.

I can see no way out of this dilemma other than by a bold and sweeping departure—a departure that would cut surgically through the exaggerated anxieties, the self-engendered nightmares, and the sophisticated mathematics of destruction, in which we have all been entangled over these recent years, and would permit us to move, with courage and decision, to the heart of the problem.

President Reagan recently said, and I think very wisely, that he would "negotiate as long as necessary to reduce the numbers of nuclear weapons to a point where neither side threatens the survival of the other." Now that is, of course, precisely the thought to which these present observations of mine are addressed. But I wonder whether the negotiations would really have to be at such great length. What I would like to see the President do, after due consultation with the Congress, would be to propose to the Soviet government an immediate across-the-boards reduction by fifty percent of the nuclear arsenals now being maintained by the two superpowers—a reduction affecting in equal measure all forms of the weapon, strategic, medium range, and tactical, as well as all means of their delivery—all this to be implemented at once and without further wrangling among the experts, and to be subject to such national means of verification as now lie at the disposal of the two powers.

Whether the balance of reduction would be precisely even—whether it could be construed to favor statistically one side or the other—would not be the question. Once we start thinking that way, we would be back on the same old fateful track that has brought us where we are today. Whatever the precise results of such a reduction, there would still be plenty of overkill left—so much so that if this first operation were successful, I would then like to see a second one put in hand to rid us of at least two thirds of what would be left.

Now I have, of course, no idea of the scientific aspects of such an operation; but I can imagine that serious problems might be presented by the task of removing, and disposing safely of, the radioactive contents of the many thousands of warheads that would have to be dismantled. Should this be the case, I would like to see the President couple his appeal for a fifty-percent reduction with the proposal that there be established a joint Soviet-American scientific committee, under the chairmanship of a distinguished neutral figure, to study jointly and in all humility the problem not only of the safe disposal of these wastes but also the question of how they could be utilized in such a way as to make a positive contribution to human life, either in the two countries themselves or—perhaps preferably—elsewhere. In such a joint scientific venture we might both atone for some of our past follies and lay the foundation for a more constructive relationship.

It will be said: this proposal, whatever its merits, deals with only a part of the problem. This is perfectly true. Behind it there would still lurk the serious political differences that now divide us from the Soviet government. Behind it would still lie the problems recently treated, and still to be treated, in the SALT forum. Behind it would still lie the great question of the acceptability of war itself, any war, even a conventional one, as a means of solving problems among great industrial powers in this age of high technology. What has been suggested here would not prejudice the continued treatment of these questions just as today, in whatever forums and under whatever safeguards the two powers find necessary. The conflicts and arguments over these questions could all still proceed to the heart's content of all those who view them with such passionate commitment. The stakes would simply be smaller; and that would be a great relief to all of us.

What I have suggested is, of course, only a beginning. But a beginning has to be made somewhere; and if it has to be made, it is best that it should be made where the dangers are the greatest, and their necessity the least. If a step of this nature could be successfully taken, people might find the heart to tackle with greater confidence and determination the many problems that would still remain.

It will be argued that there would be risks involved. Possibly so. I do not see them. I do not deny the possibility. But if there are, so what? Is it possible to conceive of any dangers greater than those that lie at the end of the collision course on which we are now embarked? And if not, why choose the greater—why choose, in fact, the greatest—of all risks, in the hopes of avoiding the lesser ones?

We are confronted here, my friends, with two courses. At the end of the one lies hope—faint hope, if you will—uncertain hope, hope surrounded with dangers, if you insist. At the end of the other lies, so far as I am able to see, no hope at all. Can there be—in the light of our duty not just to ourselves (for we are all going to die sooner or later) but of our duty to our own kind, our duty to the continuity of the generations, our duty to the great experiment of civilized life on this rare and rich and marvelous planet—can there be, in the light of these claims on our loyalty, any question as to which course we should adopt?

In the final week of his life, Albert Einstein signed the last of the collective appeals against the development of nuclear weapons that he was ever to sign. He was dead before it appeared. It was an appeal drafted, I gather, by Bertrand Russell. I had my differences with Russell at the time, as I do now in retrospect; but I would like to quote one sentence from the final paragraph of that statement, not only because it was the last one Einstein ever signed, but because it sums up, I think, all that I have to say on the subject. It reads as follows:

"We appeal, as human beings to human beings: Remember your humanity, and forget the rest."●

MISSING CHILDREN: THE NEED FOR A STRONGER FEDERAL ROLE

● Mr. PELL. Mr. President, the Department of Health and Human Services estimates that about 50,000 children under the age of 17 disappear each year in the United States. These children are not runaways, most of whom eventually return to their homes unharmed, or the objects of parental kidnapings inspired by custody battles. These children are the victims of abduction and crime, taken by adults who want children of their own, molested by other children or by sex offenders, or lured into prostitution or child pornography. Violence against children is not confined to the neighborhoods of Atlanta.

This dilemma affects every community in the country, rich and poor, black and white, from cities to suburbs to rural areas. Every community has its list of well-known cases, in which missing children have been the objects of intense local searches without ever being found. A major roadblock in most of these searches has been the lack of a central clearinghouse for information on missing children.

The fact is that no one really knows how many missing, murdered, and molested children there are in the United States. Although a national data bank in the Justice Department keeps tracks of stolen cars and other types of stolen property, no central clearinghouse for data on missing children exists in the United States today.

I am pleased to join Senator PAULA HAWKINS in introducing legislation to authorize the FBI to acquire and exchange information to assist local authorities in the identification of missing children.

This bill is identical to one introduced recently in the House by Congressman PAUL SIMON of Illinois, who has been in the forefront of those advocating a stronger Federal role in this area.

The Simon bill would authorize the Attorney General to use an existing computer in the FBI's National Crime Information Center to create a central data bank on missing children. Any child under the age of 17 who is reported missing for at least 48 hours, and who does not have a history of being a runaway child, would be listed on the computer, which has the capability of sending identifying information to some 50,000 police departments nationwide. The information would be kept on the computer until the case is solved.

This system would operate in the same fashion as the NCIC stolen car file, and for the first time would allow the FBI to keep accurate statistics on the problem to assist local police departments in identifying trends and following leads. I understand that the additional cost of the Simon bill would be approximately

$100,000 per year, for the use of existing computers.

Mr. President, I believe that if we can have a nationwide clearinghouse for information on stolen property, we ought to be able to use these existing computer facilities to maintain the same information on missing children. The lack of a central data bank for identifying information has seriously hindered the efforts of law enforcement in tracing missing children, and has contributed to the prolonged anxiety of their parents and friends. This legislation addresses a serious national problem with a relatively straightforward and workable solution, and I hope there will be early action on this bill.●

INFLATION

● Mr. HAYAKAWA. Mr. President, inflation is widely believed to be our No. 1 economic problem. The Reagan administration is supporting a four part program designed to end inflation by increasing the supply of goods and decreasing Government interference in the market place. However, many observers point to continued high interest rates and the depressed bond market as signs that the Nation's financial community does not believe that the program will work.

In a recent Washington Post article, Mr. Richard Whalen forcefully argues that the Government must earn the respect of Wall Street by refusing to rescue large corporations who find themselves in financial difficulty. While a large business failure will certainly cause short-term problems for individuals associated with the company, this may be a necessary price to pay for the restoration of our national economic health. It will also convince investors that Washington is serious about staying out of the free market, and that inflation will be stopped.

Mr. President, I ask that this article be printed in the RECORD.

The article follows:

[From the Washington Post, May 31, 1981]

HELP CURE INFLATION: LET A BIG BUSINESS GO BELLY UP SOON—CONVINCE THE MARKETS THERE'LL BE NO MORE "WELFARE" FOR THE RICH, EITHER

(By Richard J. Whalen)

Late one Friday afternoon this summer, after the financial markets close and the brokers and traders scatter, the Dow Jones ticker may carry an arcane-sounding item like this: "Armageddon Industries, one of the nation's largest corporations, has had its commercial paper sharply downrated by credit agencies and is conferring with its bankers." What this will mean, quite simply, is that debt-ridden Armageddon has run out of cash.

Over that summer weekend, anxious bankers will use the resourceful White House telephone operators to track down high officials, and they will impart this message: "Armageddon will go belly up on Monday morning, the banks are very shaky, the unions will raise hell at the layoffs, and the markets will panic—unless Washington does something right now."

Will the president, the Treasury secretary, the Federal Reserve chairman and a handful of powerful congressional committee chairmen have the political wisdom and courage to withstand such pleas? We may soon find out, for a major financial crisis, likely to be marked by spectacular bankruptcies, appears headed our way. What Washington should do when it strikes is simple: nothing.

Wall Street is not convinced that Washington has that kind of political will. That's largely why the Street remains skeptical of the Reagan administration's economic program. Important as the Reagan steps to date have been, painful budget cuts, promised tax reductions and tighter monetary and credit growth have been insufficient by themselves to dispel Wall Street's fear that larger doses of inflation lie ahead.

Thus when a major corporation or bank begins to totter, as will likely happen with the prime rate climbing above 20 percent, Wall Street believes Washington will pull back from the brink and uncork yet another inflationary wave of money and credit to bail out all the illiquid companies and financial institutions. Indeed, one banker reportedly told Fed chairman Paul Volcker recently that if one of his bank's riskier loans goes bad, the government will have no choice but to save his corporate client and his bank. The government needs to deal that welfare capitalist a rude awakening, just as it has been shaking up the rest of the comfortable but unaffordable American welfare state.

If Armageddon is not bailed out and goes bankrupt, it obviously will mean at least temporary suffering for some: The company will be reorganized and some of its assets sold, its incompetent executives and hapless employees will be out of work, stockholders will lose their investment, and the creditors and bankers most or all of their money. But, more important, a cleansing wave of fear will pass through the markets, flushing out similar debt-financed excesses that might have produced even worse suffering. This jolt of disinflation will create the sober expectation of more of the same, and prices and interest rates will soon reflect the new trend and the market's perception of it.

If, however, Armageddon proves to have helpful friends in Washington, prompting the Federal Reserve to open the discount window to the bankers and the Congress to push through an Emergency Loan Guarantee Act to "protect" all those jobs, financial panic may be averted. But it will be at the cost of a deepening cynical conviction that, in modern America, high inflation is forever.

If the economic system is again short-circuited by political intervention, the peril is that inflation soon will accelerate to hyperinflation, sending prices and interest rates soaring to once unimaginable levels. Would you believe a 35 percent prime rate? It sounds ridiculous. But, only a few years ago, the present 20 percent prime seemed impossible.

Americans today are paying the highest "real" interest rates (adjusted for inflation) in perhaps a century and a half. Bank interest rates have soared to former loan-shark levels because lenders demand an extra-large "inflation premium" to protect themselves. The memory of past inflation inspires apprehension of worse to come. And it blights the future health of our economy by destroying the predictability of future savings and investment returns.

It also strikes terror in the hearts of bond dealers. A bond is a debt instrument (usually issued in $1,000 denominations) paying a fixed interest rate and redeemable at its face value at maturity. Soaring interest rates have caused the market values of bonds to plummet. So demoralized is the bombed-out long-term bond market, according to traders, that everything bought in the past 40 years shows a loss.

It is no secret why key Reagan policymakers regard the bond market as a crucial barometer of the economic climate and of the administration's prospects. The bond market, which is much larger in terms of total investment values than the stock market, is the indispensable source of funds to finance all levels of government and the most creditworthy U.S. corporations.

If the bond market collapses permanently, as many observers now believe it has, we will experience increasing difficulty in turning over our astronomical public and private debts. To maintain our precariously balanced debt structure, we may be tempted to follow the example of other nations and resort to deliberate hyperinflation to defraud our creditors.

To encourage investors to buy bonds, the Federal Reserve must convince them that inflation is being brought under control. This of course, depends largely on the fiscal posture and borrowing requirements of the federal government. When confronted with chronic federal budget deficits and massive Treasury bond issues, the Fed's vaunted "independence" disappears.

Tradition and expediency dictate that the Fed must provide the markets with the liquidity required to accommodate the Treasury's needs and minimize the "crowding-out" of other borrowers. Such "monetarizing" of debt has been the driving force behind inflation since the mid-1960s.

Monetarist economists, led by Nobel Laureate Milton Friedman (a part-time Reagan adviser) and represented in the upper ranks of the administration by Treasury Undersecretary Beryl Sprinkel, are right to criticize the Fed for creating too much money in recent years. The grossly inflated statistics show an upward trend line as eloquent as Alps.

But the monetarists tend to become entangled in arcane technical and procedural arguments over day-to-day Fed management that obscure the demands of our situation of opportunity and peril. Even if the Fed succeeds in restoring a semblance of stability and predictability to closely watched weekly monetary statistics, this technical feat will not in itself alter the inflationary psychology of the bond market.

Because the root of our inflation is political, an act of political will in the face of crisis is needed—and there are encouraging signs that this need is recognized.

Fed chairman Volcker visited the White House the other day at his request to chat with President Reagan and his senior advisers. The unusual meeting bore witness to the policy concensus and political coordination that may soon bring a turning point in our economic history.

As Volcker remarks privately, for the past decade and a half a speculative bet on further inflation has been a sure thing, and he wants to upset that assumption. He also wishes to shake the complacency of bankers who once worried about their risky loans going bad but who now assume they can shift that burden to Volcker's shoulders if they get in serious trouble.

Ironically, the Fed's ability to protect or punish the imprudent is more limited than they imagine. Created in a much simpler political and financial environment 70 years ago, the Fed now lags behind the competitive and technical forces transforming the financial marketplace. Present-day markets are linked electronically on a global scale. The regulators are officially responsible, but scarcely in control.

When the New York Federal Reserve Bank's trading desk recently allowed the federal funds (interbank loan) rate to float freely, as the Fed had indicated it would, bank traders were shocked. "Mother wasn't there," says a top Fed official, "and the money markets panicked."

Panic, though frightening, can be therapeutic and profitable. The Rothschilds, who belong to the oldest school of banking, are said to have a family motto that sums up

their centuries-old strategy: "Buy to the sound of cannons, sell to the sound of trumpets."

In the debt-burdened, inflation-besieged U.S. economy, the guns of a major corporate bankruptcy might well cause a liquidity panic in the markets. But markets swing between excesses, and the therapy of fear would quickly yield to the therapy of greed. Institutional money managers, pension fund trustees and other fiduciaries would hear a flourish of trumpets summoning them to buy bonds offering the highest rates of return in U.S. history, rates that some observers thing might not be seen again in this century.

In the real world, a whiff of disinflation hangs over glutted markets for overpriced surplus commodities ranging from oil to suburban houses. To translate this trend into financial terms means knocking the inflation premium in half, and that will take more than supply-side rhetoric.

Washington is naive to suppose it can melt Wall Street's cynicism by offering attractively packaged promises, or even by devising a tax cut compromise featuring new investment incentives. All this could easily be undone, the Street suspects, and none of it marks an unmistakable end to inflationary business-as-usual.

There is only one certain way for Washington to gain Wall Street's attention and respect, and that is to scare the hell out of the sure-thing inflationary speculators and make them true-believing capitalists again. If Washington refuses the inevitable distress call, breaking the assumed bail-out pattern of more inflation, it will be rewarded with the biggest bond market rally in history.●

SOVIETS SEEM UNFAZED BY REAGAN'S "TOUGH" POLICY

● Mr. PELL. Mr. President, the Providence Sunday Journal of June 7, 1981. featured an analysis by Homer Metz of the Soviet Union's reaction to the Reagan administration's get tough policy. Mr. Metz, a distinguished editor of the Sunday Journal's News Perspective section, questioned whether the administration's anti-Soviet policy was working. He questioned whether the President and his advisers had succeeded in their attempt to persuade the Western world that the Soviet Union is its No. 1 enemy, and whether the United States, with its new plans to build up super military power, had intimidated or inhibited the Soviets. Mr. Metz concludes that the answer in both cases is a resounding no.

Mr. Metz points out that "nowhere in Europe, the Middle East or Latin America are conditions favorable to the President's 'get tough and halt the Soviets at all costs' policy." He emphasizes that nothing has occurred or been said since Reagan's inauguration that supports the administration's assumption that if we spend vast sums of money building up our military, the Soviets will give up and back out of an arms race. On the contrary, Mr. Metz argues convincingly that the Soviet Union, with its controlled economy and disciplined populace, could probably spend such sums on arms more easily than the United States.

Finally, Mr. Metz warns that world tensions are likely to rise as the administration persists in its effort to cow the Soviets rather than pursuing negotiations.

Mr. President, I ask that Mr. Metz's article, "Soviets Unfazed by Reagan's 'Tough' Policy," be printed in the RECORD.

The article follows:

SOVIETS UNFAZED BY REAGAN'S "TOUGH" POLICY

Is our anti-Soviet policy working?

Is the Reagan administration persuading the Western world that the Soviet Union is its Number 1 enemy?

Is the United States intimidating and inhibiting the Soviets with its plans for super military power?

The answers would appear to be no.

The Soviets have indicated that they respect America's armed might—present and potential—but they have given no sign that the Reagan administration's policies are sidetracking or slowing down the pursuit of their basic long-range objectives which they list as (1) to achieve a modus vivendi with the capitalist Western countries, and (2) to convince the rest of the world that Marxism under a Russian umbrella is the best way of life.

Nowhere in Europe, the Middle East or Latin America are conditions favorable to the President's "get tough and halt the Soviets at all costs" policy. The NATO allies aren't buying the Reagan strategy, nor are the Arabs, the Israelis or the Third World nations. The Latin Americans are either strongly opposed or, at best, only lukewarm to it.

Recent Soviet actions and statements hint that Moscow regards Mr. Reagan's foreign policy as compounded of bombast and uncertainty and as easier to cope with than the Carter administration's firm "counter punching," as exemplified by the grain embargo and the boycotting of the Olympic games after the Afghanistan invasion.

"Carter acted," Soviet Foreign Minister Andrei Gromyko told an Indian correspondent in Moscow recently. "The Reagan policy only polarizes things."

Mr. Reagan and his foreign affairs team headed by Secretary of State Alexander M. Haig Jr. continue to assume that they will be able to work out a better SALT II agreement and halt further Soviet adventuring if they spend untold billions in a new display of nuclear and conventional military strength.

Regardless of how this is viewed it amounts to an American-initiated arms race.

And arms races have never brought peace. They have, in fact, if pursued for any length of time, invariably led to conflict.

The President has said repeatedly that if we spend enough money on a new military machine the Soviets will become frightened and back out of an arms race.

Nothing that has occurred or been said by the Soviets since Mr. Reagan took office supports this assumption.

The Soviets may be having their economic and political troubles, both at home and in the outer reaches of "empire," but they are able and presumably willing to match whatever military expenditures we come up with.

The President wants to spend $1.5 trillion over the next five years for military purposes. This is a lot of money, but the Soviets with their controlled economy and their disciplined populace should be able to raise a similar sum without too much difficulty; easier perhaps than we can if inflation continues to soar.

The other day the Soviet news agency, Tass, quoted an authoritative Soviet magazine as saying, "The Soviet Union and the socialist community are capable of accepting and enduring any competition with imperialism in the military-economic field, although . . . they would prefer . . . to spend their resources on creative aims."

Moscow, meanwhile, is continuing its efforts to improve the East-West political climate and counter American activity in Europe.

Boris Ponomaryov, a non-voting member of the ruling Soviet Politburo, in a recent speech renewed a Soviet offer to hold unconditional talks with Western European leaders on limiting nuclear missile emplacements.

This goes considerably beyond Soviet President Leonid Brezhnev's recent suggestion that the number of medium-range missiles in Western Europe be frozen at current levels which Washington claims would merely cement the current Soviet advantage. Ponomaryov said the Soviets would reduce the number of missiles aimed at NATO capitals which they have emplaced in western Russia if the United States would drop its plans to deploy new missiles in Western Europe.

In making this offer, Ponomaryov said the Kremlin hopes to convince the Reagan administration that a nuclear arms buildup in Europe would only increase the threat of war and that it would be the better part of valor, and wisdom, for the United States to join in new strategic arms talks now.

"We are emphatically not intimidated by the American proposal to deploy new missiles in Western Europe by 1983," the official Soviet newspaper Pravda quoted Ponomaryov as saying, "but we hope the United States realizes that any argeement to limit strategic arms would be in its interest."

The United States obviously does realize this, but it also believes that the stronger it becomes the better an agreement it will be able to achieve. Therefore it intends to build up its power before it talks.

An unbiased observer might ask if such reasoning is valid in a nuclear age. Twenty American nuclear missiles might be capable of doing more damage than say 15 Soviet missiles. But how significant is this if a mere 10 Soviet projectiles are powerful enough to raze the northeastern seaboard of the United States, plus Washington and Baltimore? Which they are. Getting in the first strike would seem to be more important than comparative fire power.

In any case, recent events emphasize further Western Europe's concern with what it considers the Reagan administration's unwise belligerence toward the Soviet Union.

The Dutch elections were a definite setback to the American-sponsored NATO missile program and turned the Netherlands toward Moscow and away from Washington.

The activities of the Dutch anti-nuclear youth groups were an important factor in the voting. These groups are strongly opposed to any strengthening of the NATO defenses and do not believe the Soviets are intent upon expansionism in Western Europe. Neither, according to all indications, do the young anti-war elements, the so-called "mad youth," in West Germany, France, Belgium and other NATO countries.

In France, the victory of Socialist President Francois Mitterrand over conservative Valery Giscard d'Estaing, while it meant many things, was certainly not an endorsement of Mr. Reagan's policies toward the Soviet Union.

And still another indication of Europe's growing dissatisfaction with American policy generally came to light in recent talks in Brussels between President Reagan's new international economic team and European Common Market officials. The EC leaders reportedly objected strongly to the combative stance taken by the Americans on some key issues and said this could lead to a "trade war" between this country and Europe.

Which could lead one to ask whether containing the Soviets and higher profits for American business are not part of the same package?

In Latin America, meantime, the Soviets are pressing hard for better trade relations—and getting them. Argentina, for instance, is helping the Soviets overcome shortages in meat and grain supplies. And senior trade delegations from Brazil and Mexico are due in Moscow for trade talks in the next few weeks.

In view of all this, will the Reagan administration decide to take a new look at its "halt the Soviets" policy and perhaps become more amicable in its dealings with Moscow?

Don't bet on it.

There is every indication that Mr. Reagan, Secretary Haig and the rest of the Washington strategists will persist in their efforts to cow the Soviets—and talk later.

And world tensions can be expected to continue to rise.●

REMOVAL OF INJUNCTIONS OF SECRECY

Mr. BAKER. Mr. President, as in executive session, I ask unanimous consent that the injunction of secrecy be removed from three treaties transmitted to the Senate today by the President of the United States, to wit: Protocols to the 1971 Wheat Agreement (Treaty Doc. No. 97–9); Tax Convention with the Republic of Argentina (Treaty Doc. No. 97–10); and Mutual Legal Assistance Treaty with the Republic of Colombia (Treaty Doc. No. 97–11).

I ask that these treaties be considered as having been read the first time; that they be referred, with accompanying papers, to the Committee on Foreign Relations and ordered to be printed; and that the President's messages be printed in the RECORD.

The PRESIDING OFFICER. Without objection, it is so ordered.

The President's messages are as follows:

To the Senate of the United States:

With a view to receiving the advice and consent of the Senate to ratification, I transmit herewith the Protocols for the Extension of the Wheat Trade Convention, 1971 (WTC), and the Food Aid Convention, 1980 (FAC), which Conventions constitute the International Wheat Agreement, 1971. The Protocols were adopted by a conference which met in London on March 6, 1981 and were open for signature in Washington from March 24 through May 15, 1981. They were signed by the United States on May 8, 1981.

I transmit also, for the information of the Senate, the report of the Secretary of State with respect to the Protocols.

The Protocols extend both Conventions through June 30, 1983. They maintain the framework for international cooperation in wheat trade matters, continue the existence of the International Wheat Council, and extend the parties' commitments to provide minimum annual quantities of cereals aid to developing countries.

I ask that the Senate give early and favorable consideration to the two Protocols so that ratification by the United States can be effected at an early date. Doing so will demonstrate our continued commitment to cooperation on international wheat trade matters and to providing food aid to needy developing nations.

RONALD REAGAN.

THE WHITE HOUSE, *June 11, 1981.*

To the Senate of the United States:

I transmit herewith, for Senate advice and consent to ratification, a Convention between the Government of the United States of America and the Government of the Republic of Argentina for the Avoidance of Double Taxation and the Prevention of Fiscal Evasion with respect to Taxes on Income and Capital (the Convention), together with a related Protocol, signed at Buenos Aires on May 7, 1981. I also transmit the report of the Department of State on the Convention.

The Convention, based on the United States and OECD model income tax conventions published in 1977, is the first of its kind to be entered into by the United States with a Latin American country.

Argentina taxes all income derived in Argentina, but does not tax any income derived by residents of Argentina from foreign sources. Thus, the usual treaty practice of reciprocal reductions in withholding taxes at source on dividends, interest, and royalties paid to residents of the other country has little appeal to Argentina. Argentina is reluctant to reduce its own tax at source, incurring a revenue cost for which it sees no offsetting benefit. The negotiators believe that the Convention represents a fair and reasonable compromise between the Argentine position that tax should be imposed only at source and the broader view of the United States and most other countries that tax may also be imposed on the basis of residence.

I recommend that the Senate give early and favorable consideration to the Convention and related Protocol and give advice and consent to their ratification.

RONALD REAGAN.

THE WHITE HOUSE, *June 11, 1981.*

To the Senate of the United States:

With a view to receiving the advice and consent of the Senate to ratification, I transmit herewith the Treaty on Mutual Legal Assistance between the United States of America and the Republic of Colombia, together with a related exchange of notes, signed at Washington on August 20, 1980.

I transmit also, for the information of the Senate the report of the Department of State with respect to the treaty.

The treaty is one of a series of modern mutual assistance treaties being negotiated by the United States. The treaty is self-executing and utilizes existing statutory authority.

The new treaty provides for a broad range of cooperation in criminal matters. Mutual assistance available under the treaty includes: (1) executing requests relating to criminal matters; (2) taking of testimony or statements of persons; (3) effecting the production, preservation, and authentication of documents, records, or articles of evidence; (4) returning to the requesting Party any objects, articles, or other property or assets belonging to it or obtained by an accused through offenses; (5) serving judicial documents, writs, summonses, records of judicial verdicts, and court judgments or decisions; (6) effecting the appearance of a witness or expert before a court of the requesting Party; (7) locating persons; and (8) providing judicial records, evidence, and information.

I recommend that the Senate give early and favorable consideration to the treaty and give its advice and consent to ratification.

RONALD REAGAN.

THE WHITE HOUSE, *June 11, 1981.*

ORDER FOR RECESS UNTIL MONDAY, JUNE 15, 1981

Mr. BAKER. Mr. President, I ask unanimous consent that when the Senate completes its business today it stand in recess until 12 noon on Monday.

The PRESIDING OFFICER (Mr. PRESSLER). Without objection, it is so ordered.

ORDER OF RECOGNITION OF SENATORS ON MONDAY

Mr. BAKER. Mr. President, I ask unanimous consent that following the recognition of the two leaders under the standing order on Monday, June 15, the following Senators be recognized for not to exceed 15 minutes each: The senior Senator from Tennessee (Mr. BAKER), the senior Senator from Alaska (Mr. STEVENS), and the senior Senator from Idaho (Mr. MCCLURE).

The PRESIDING OFFICER. Without objection, it is so ordered.

NEXT SENATE VOTE AT NOON ON TUESDAY

Mr. BAKER. Mr. President, I announced earlier today, when the distinguished minority leader and I were discussing the program for Monday, that it was my intention to ask the Senate to agree that any votes ordered on Monday would go over until Tuesday at 12 o'clock and to occur back to back, with the first vote being 15 minutes and succeeding back-to-back votes to be 10 minutes each. Mr. President, I now make that request.

The PRESIDING OFFICER. Without objection, it is so ordered.

TWENTIETH ANNIVERSARY OF SENATE SERVICE BY SENATOR TOWER TO BE OBSERVED ON MONDAY

Mr. BAKER. Mr. President, a number of special orders have been entered for Monday. I might advise our colleagues that the purpose of those special orders, in part, is to call attention to the fact that Monday next will be the 20th anniversary of Senate service of our distinguished colleague from Texas, the senior Senator from Texas, Mr. TOWER. I believe we will have a fair amount of time, three special orders on that day of 15 minutes each, plus perhaps part of leader time. Any Members who wish to join in that colloquy, of course, will be welcome beginning at noon on Monday.

ORDER OF PROCEDURE

Mr. BAKER. Mr. President, I would inquire of the distinguished minority leader if there is any further business that he wishes to transact today? There is no further business on this side of the aisle that I am aware of.

Mr. ROBERT C. BYRD. Mr. President, I thank the distinguished majority leader. I know of no further business that is required on this side of the aisle.

RECESS UNTIL MONDAY, JUNE 15, 1981

Mr. BAKER. Mr. President, in that event, I move, in accordance with the order previously entered, that the Senate now stand in recess until the hour of 12 noon on Monday next.

The motion was agreed to; and, at 2:25 p.m., the Senate recessed until Monday, June 15, 1981, at 12 noon.

NOMINATIONS

Executive nominations received by the Senate June 11, 1981:

DEPARTMENT OF JUSTICE

Rex E. Lee, of Utah, to be Solicitor General of the United States, vice Wade Hampton McCree, Jr., resigning.

William Bradford Reynolds, of Maryland, to be an Assistant Attorney General, vice Drew S. Days III, resigned.

FEDERAL AVIATION ADMINISTRATION

Michael J. Fenello, of Florida, to be Deputy Administrator of the Federal Aviation Administration, vice Quentin Saint Clair Taylor.

NATIONAL AERONAUTICS AND SPACE ADMINISTRATION

Hans Michael Mark, of Virginia, to be Deputy Administrator of the National Aeronautics and Space Administration, vice Alan M. Lovelace, resigned.

NUCLEAR REGULATORY COMMISSION

Nunzio J. Palladino, of Pennsylvania, to be a Member of the Nuclear Regulatory Commission for the term of 5 years expiring June 30, 1986, vice Joseph Mallam Hendrie, term expiring.

CONFIRMATIONS

Executive nominations confirmed by the Senate, June 11, 1981:

DEPARTMENT OF STATE

Myer Rashish, of the District of Columbia, to be Under Secretary of State for Economic Affairs, vice Richard N. Cooper, resigned.

ORGANIZATION OF AMERICAN STATES

J. William Middendorf II, of Virginia, to be the permanent Representative of the United States of America to the Organization of American States, with the rank of Ambassador.

The above nominations were approved subject to the nominees' commitment to respond to requests to appear and testify before any duly constituted committee of the Senate.

DEPARTMENT OF HOUSING AND URBAN DEVELOPMENT

Antonio Monroig, of Puerto Rico, to be an Assistant Secretary of Housing and Urban Development, vice Sterling Tucker, resigned.

DEPARTMENT OF COMMERCE

Lawrence J. Brady, of New Hampshire, to be an Assistant Secretary of Commerce, vice Frank Alan Weil, resigned.

DEPARTMENT OF HOUSING AND URBAN DEVELOPMENT

Stephen J. Bollinger, of Ohio, to be an Assistant Secretary of Housing and Urban Development, vice Robert Campbell Embry, Jr.

Stephen May, of New York, to be an Assistant Secretary of Housing and Urban Development, vice Horace Dicken Cherry, resigned.

COUNCIL OF ECONOMIC ADVISERS

William A. Niskanen, Jr., of California, to be a Member of the Council of Economic Advisers, vice George C. Eads, resigned.

DEPARTMENT OF HOUSING AND URBAN DEVELOPMENT

Judith L. Tardy, of Virginia, to be an Assistant Secretary of Housing and Urban Development, vice William Antonio Medina, resigned.

HOUSE OF REPRESENTATIVES—*Thursday, June 11, 1981*

The House met at 10 a.m.

The Reverend Jack M. Copas, pastor, Andover United Methodist Church, Andover, N.J., offered the following prayer:

Lord God in Heaven and here on Earth, we acknowledge Your presence among us. We beseech You, as Ruler of all nations, to hear our prayer for peace and justice in the world.

Continue to help this, the 97th Congress, to respond as a governing body that honors You, in which and by which Your good news of love is proclaimed, and by which Your love for all people and Your concern for the last and the least are expressed. Help us to deeply believe that You can be trusted, come what may.

We thank You for the privilege to respond to that belief by doing Your work, challenging the power of evil, binding up the wounds of those who suffer, giving of ourselves in service, helping when others would not help, and caring when others fail to care.

May Your spirit remain our mandate to glorify You with our bodies, our souls, and our minds. Amen.

THE JOURNAL

The SPEAKER. The Chair has examined the Journal of the last day's proceedings and announces to the House his approval thereof.

Pursuant to clause 1, rule I, the Journal stands approved.

Mr. WALKER. Mr. Speaker, pursuant to clause 1, rule I, I demand a vote on agreeing to the Speaker's approval of the Journal.

The SPEAKER. The question is on the Chair's approval of the Journal.

The question was taken; and the Speaker announced that the ayes appeared to have it.

Mr. WALKER. Mr. Speaker, I object to the vote on the ground that a quorum is not present and make the point of order that a quorum is not present.

The SPEAKER. Evidently a quorum is not present.

The Sergeant at Arms will notify absent Members.

The vote was taken by electronic device and there were—yeas 342, nays 13, present 2, not voting 74, as follows:

So the Journal was approved.

The result of the vote was announced as above recorded.

MESSAGE FROM THE SENATE

A message from the Senate by Mr. Sparrow, one of its clerks, announced that the Senate had passed bills of the following titles, in which the concurrence of the House is requested:

S. 1033. An act granting the consent of Congress to the agreement between the States of North Carolina and South Carolina establishing their lateral seaward boundary; and

S. 1337. An act to provide for the temporary exclusion of foreign fishing support vessels from the internal waters of Alaska.

The message also announced that the Vice President, pursuant to Public Law 94-399, appointed Mr. D'AMATO as a member, on the part of the Senate, of the Temporary Commission on Financial Oversight of the District of Columbia, in lieu of Mr. LEAHY, resigned.

The message also announced that the Vice President, pursuant to Public Law 86-420, appointed Mr. PERCY (chairman), Mr. DODD (vice chairman), and Mr. THURMOND to attend, on the part of the Senate, the Mexico-United States Interparliamentary Conference, to be held in Manzanillo, Colima, Mexico, June 11 to 15, 1981.

THE REV. JACK M. COPAS

(Mr. COURTER asked and was given permission to address the House for 1 minute, and to revise and extend his remarks.)

Mr. COURTER. Mr. Speaker, it gives me great pleasure to mention the fact that the minister who gave the opening prayer this morning is a good friend of mine, Rev. Jack Copas.

Jack Copas lives in northwest New Jersey in Sussex County. He was educated at Dominican College in Orangeburg, N.Y. He then went to Drew University in Madison, N.J., and received his master of divinity, and at the present time Rev. Jack Copas is studying for his doctorate of ministry at Drew University in Madison, N.J.

Reverend Copas was the pastor at West Side United Methodist Church from April 1977 to June 1980. At the present time he is the pastor at Andover United Methodist Church at Andover, N.J.

Jack Copas is married to the former Paula Anne Casavis, and they have two children, John Anthony, age 4, and Jeremiah Paul, age 1½.

Jack Copas is an innovator. Not long ago he initiated a program of bringing the Gospel on radio in northwest New Jersey and conducts a radio program for about an hour each Sunday morning.

In October of last year I had a distinct pleasure, I gave the lay sermon at the United Methodist Church in Andover.

Mr. Speaker, I can report that that was one of my most memorable experiences during the last number of years.

Rev. Jack Copas has a strong, growing ministry in northwest New Jersey, with enthusiastic people in his community. They love him, and I do as well.

PERMISSION FOR COMMITTEE ON WAYS AND MEANS TO HAVE UNTIL MIDNIGHT, FRIDAY, JUNE 12, 1981, TO FILE REPORT ON H.R. 3850, BUDGET RECONCILIATION EXPENDITURE REDUCTIONS

Mr. PEASE. Mr. Speaker, I ask unanimous consent that the Committee on Ways and Means may have until midnight, Friday, June 12, 1981, to file its report on the bill (H.R. 3850) making expenditure reductions in accordance with the budget reconciliation process.

The SPEAKER pro tempore (Mr. FRANK). Is there objection to the request of the gentleman from Ohio?

There was no objection.

JOINT RE-REFERRAL OF H.R. 3723, HEALTH PROFESSIONS PERSONNEL AMENDMENTS OF 1981, TO COMMITTEE ON ENERGY AND COMMERCE AND COMMITTEE ON WAYS AND MEANS

Mr. PEASE. Mr. Speaker, I ask unanimous consent that H.R. 3723, the Health Professions Personnel Amendments of 1981, be re-referred jointly to the Committee on Energy and Commerce and to the Committee on Ways and Means. Section 32 of that legislation would amend the disclosure provisions of section 6103(m) of the Internal Revenue Code.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from Ohio?

Mr. WALKER. Mr. Speaker, reserving the right to object, may I ask the gentleman, has this request been cleared with the minority?

Mr. PEASE. Mr. Speaker, will the gentleman yield?

Mr. WALKER. I will be glad to yield to the gentleman from Ohio.

Mr. PEASE. Yes, Mr. Speaker, it has been cleared with the subcommittees of both the Committee on Energy and Commerce and the Committee on Ways and Means.

Mr. WALKER. Mr. Speaker, I thank the gentleman from Ohio (Mr. PEASE), and I withdraw my reservation of objection.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from Ohio?

There was no objection.

WORK REQUIREMENT

(Ms. OAKAR asked and was given permission to address the House for 1 minute and to revise and extend her remarks.)

Ms. OAKAR. Mr. Speaker, the administration proposes to increase the work requirement for disability insurance eligibility from 20 to 30 out of the past 40 quarters. This proposal has potentially disastrous consequences for working mothers in this Nation. The House Select Committee on Aging gives this example of the results of the administration plan: A woman, now 40 years old, worked under social security from age 17 to age 35, when she had a child. She left the labor force for 3 years at that time and returned to covered employment at the age of 38, just 3 years later. At 40 she developed multiple sclerosis and was completely incapacitated. Despite having worked for 20 years in employment covered under social security, this 40-year-old mother, along with her child, would not be eligible for disability insurance protection under the administration proposal because she had not been in the labor force for 7½ years out of the last 10 years.

Mr. Speaker, if the administration and Congress are serious about providing a true safety net, we cannot allow this direct attack on disability insurance protection to be enacted. Women who temporarily leave covered employment to have a child, a person forced to leave the workforce to care for a sick parent or child, and many others will lose the vital protection of disability insurance under the administration's plan. This proposal is simply cruel and unjust.

BREZHNEV DOCTRINE IS UNACCEPTABLE

(Mr. LANTOS asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. LANTOS. Mr. Speaker, the danger is profound that in a uniquely tragic way history will again repeat itself. Twenty-five years ago as the West was preoccupied with the Suez crisis, the world stood idly by as the Red army with its well-known brutality crushed the heroic uprising of the Hungarian people, for freedom and independence.

Today, as many are mesmerized over the destruction of the nuclear capability of the radical and irresponsible regime in Iraq, the Soviet Union is again poised on the brink of crushing the budding independence of Poland.

The Soviet Union's brazen intimidation of the Polish people must not be allowed to go unchallenged. I call upon President Reagan to publicly declare, without delay, that our Nation rejects the pernicious Brezhnev doctrine which arrogates to itself by the divine right of Communist imperialism the license to subjugate its neighbors in Afghanistan, in Poland, in Czechoslovakia, indeed everywhere.

We as Members of Congress have a supreme obligation to the American people to focus on the dangerous Soviet ball game and not become distracted by the momentary sideshow in the Middle East.

□ 1030

DAMAGE TO THE SOCIAL SECURITY SYSTEM

(Mr. DORGAN of North Dakota asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. DORGAN of North Dakota. Mr. Speaker, I am concerned about the damage that was done to the public confidence in the social security system as a result of the administration's proposal and subsequent discussions publicly last month. I think we have a special responsibility in Congress to repair the damage done to the confidence of that system.

The word security in the term social security is no accident. It should mean something special and it should mean something that people can depend on. People that I have talked to who are senior citizens, in the past several months indicate to me that they do not feel a great deal of security about that social security system.

It is true, certainly, that there are difficulties with the system. Each day 5,000 people turn 65 years of age. Each day 3,600 people die in this country. In the year 1900, we had 3 million people who were senior citizens. Today we have over 25 million who are senior citizens; so we do have some difficulties and some strains in that system.

The fact is that it is not whether we are going to solve that problem, it is how we are going to solve it. I think the message to the senior citizens of this country should be that the Congress is a body that you can depend on. The Congress is a body that will keep the American promise to senior citizens and we will have a social security system that is stable, fiscally healthy, and one in which we can have public confidence.

MEDICAL ONLY DETERMINATION OF DISABILITY

(Mr. FROST asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. FROST. Mr. Speaker, the administration's proposals to reduce the disability insurance protection for Americans is a direct attack on the disabled workers of this country. The administration proposes that we no longer take into account a person's age or employment prospects in determining eligibility for disability insurance, despite the fact that a person's physical disability prevents that person from finding another job because of the person's age or local employment conditions. According to 1978 figures from the Select Committee on Aging, this proposal would mean that nearly 350,000 disabled worker beneficiaries between the ages of 60 and 65 would lose benefits. It would be many more than that today. The effect of the administration's proposal is compounded by the proposal to reduce the benefits for the retirees in this age group. The Select Committee on Aging estimates that these unemployable disabled persons would suffer a permanent loss of benefits of up to 31 percent or more as the combined effect of the administration's proposals.

Mr. Speaker, the American people and the Congress should not allow such devastating proposals to be adopted. We all recognize the need to reform the social security system and I support the efforts of Chairman PICKLE and his subcommittee to structure a strong and equitable system. But we should not eliminate vital elements of the system, as the administration's disability insurance proposal would do, in our effort to strengthen that system.

NEEDLESS SLAP AT ISRAEL

(Mr. BINGHAM asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. BINGHAM. Mr. Speaker, I deplore the administration's decision to hold up the delivery of four F-16 fighter-bombers to Israel. This unprecedented action is a needless slap at our most important and reliable Mideast ally. It is ironic that the Reagan administration which came to office criticizing President Carter's alleged betrayal of key allies, has now chosen to punish Israel by withholding arms, a step President Carter never even suggested. Israel is being punished for denying pro-Soviet Iraq a nuclear arms capacity. This makes no sense.

I do not know what the administration hopes to accomplish by this action. They cannot believe that a delay in delivery of F-16's for a few weeks or months will mollify the Arab hardliners. It will not. The Arabs will not be appeased by anything less than a long-term arms embargo to Israel by the United States. I cannot believe that the administration would propose such a thing and I can safely say that Congress would not permit it either.

Mr. Speaker, I am growing weary of the hypocritical finger-waggling which is going on in this country and abroad over the Israeli raid on Iraq. Destruction of the Iraqi reactor has made the world a safer place, not only for Israel but for all Mideast nations—including those Arab States which are now protesting the loudest.

I trust the administration will quickly complete its review of the Israeli action, conclude that Israel's attack was a legitimate act of self-defense, and resume the sale of weapons. To do otherwise will be to shoot ourselves in the foot.

ISRAEL'S PREEMPTIVE STRIKE

(Mr. McHUGH asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. McHUGH. Mr. Speaker, given the potential threat to its survival as a nation, one can understand why the Israelis, a people surrounded by hostile forces, chose to eliminate the nuclear facility in Iraq. If we thought that our very existence were threatened by nuclear holocaust, would we have acted differently? Would any other nation?

Yet, this preemptive strike, while understandable as a short-term expedient, should be seen for what it is, an act of desperation, a reflection of the bankruptcy of the political process in the Middle East, a reflection of the bankruptcy of all prior efforts to stem nuclear proliferation.

What is required now is not more political posturing, more empty speeches in the United Nations, in Israel, in the Arab countries, in the United States. Time is running out.

Those who are truly interested in peace and stability must come to grips with the difficult questions which are at the heart of the political stalemate in the Middle East. We all know what those issues involve: The right of Israel to exist in peace within secure and recognized borders, and the need to provide the Palestinian people with some measure of political identity of their own.

These questions will not be resolved by nuclear capabilities or by preemptive strikes. They can be resolved only by political leaders having the initiative and courage to break new ground, the kind of initiative and courage exhibited by Sadat and Begin at Camp David.

Mr. Speaker, time is running out.

A SAD DAY FOR AMERICA'S COLLEGE STUDENTS

(Mr. PEYSER asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. PEYSER. Mr. Speaker, yesterday was a sad day for the United States and a day that I think college students and those about to go to college will remember as a Pearl Harbor for education, because yesterday, Mr. Speaker, under the mandate of the Gramm-Latta and the Reagan administration budget, the House Committee on Education and Labor was forced to make cuts of over $504 million in the guarantee student loan program, and to support that kind of a cut we had to reduce the eligibility so that any family in the United States having an income in excess of $25,000 would be eliminated from the guaranteed student loan program. Over 1 mil-

lion middle-income families, students from those families, are going to be eliminated from the guaranteed student loan program. This is going to bring about either a change in college for the students or a dropping out of higher education.

I think it is a tragic situation and one that hopefully on the floor of the House in the next couple of weeks we will be able to restore in an amendment to put back the money that is needed to restore this program.

AN UNMISTAKABLE SIGNAL TO BIG-TIME DRUG SMUGGLERS

(Mr. BENNETT asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. BENNETT. Mr. Speaker, I am today introducing legislation that will once again send a clear and unmistakable signal to the big-time drug smugglers that the Federal Government is committed to putting them out of business once and for all.

This important bill will provide much needed reform to the Federal bail laws by authorizing judges to deny bond under certain circumstances to those implicated in smuggling operations.

All too often, these drug traffickers look upon bail as simply the price of doing business. With the profits so high and risks so low, it is not uncommon for them to jump bails as high as half a million dollars. In south Florida alone, at least 90 percent of the current 369 no-show cases are drug related.

It is clear that these abuses must be stopped in their tracks. I am pleased to join with Senator CHILES in introducing this bill to amend the Drug Abuse Act of 1970 to allow judges to refuse bail for those persons arrested for a narcotics violation if they can be shown to—

Have been previously convicted of a narcotics felony;

Be on parole or probation for a felony narcotics offense;

Be an illegal alien;

Be in possession of a false passport; and

Be a fugitive from justice.

Mr. Speaker, the drug culture in our country grows stronger and more ominous each day. We can allow this growth to go unchecked no longer. We in the Congress must act quickly in enacting this urgent legislation before it becomes too late.

CONGRESSMEN BAFALIS AND PICKLE INTRODUCE NEW REVISION IN ESTATE AND GIFT TAX LAWS

(Mr. PICKLE asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. PICKLE. Mr. Speaker, in 1976, I worked very hard to get meaningful relief for our many family farms and small businesses for the high death taxes levied in this country. Joining me in that effort were many people, particularly my colleague from Florida, Congressman "SKIP" BAFALIS.

In 1976, we never dreamed that in the next 5 years, inflation would be at levels unknown in the history of this Nation. Because this is so, we still see high estate and gift taxes making the widow or family of the farmer, rancher, and small businessman selling the estate in order to pay death taxes.

I want to provide that the family owned farm or ranch is the most productive food and fiber unit in the history of man. The corporate operations just do not produce as efficiently. The small business is the one that hires the most people, and creates the most new jobs. The big public corporations are too good at cutting labor costs to really help out in curing the unemployment problem the way small businesses do.

Thus it does not make sense that we have death tax laws that break up family farms and small businesses.

Today, Congressman BAFALIS and I are introducing, with the support of the majority of the House Ways and Means Committee, a new revision in our estate and gift tax laws. This bill will protect the family farm and the small businesses by raising the exemption amount, raising the gift tax exemption, and most importantly providing better valuation for family farms and small businesses. A fuller explanation will be in today's RECORD.

Mr. Speaker, I am happy to join with Congressman BAFALIS on this bill, and I urge all Members to give this vital measure the highest priority.

CONGRESSMAN RHODES TAKES SIDE OF THE DEVILS

(Mr. RHODES asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. RHODES. Mr. Speaker, in Congress, when we take a stand on an issue, we all like to be on the side of the Angels, as the saying goes. Well, this time, I am delighted to be on the side of the Devils. Earlier this week, Arizona State University's baseball team, the Sun Devils, won their fifth college world series title—defeating Oklahoma State 7 to 4.

Sun Devil Stan Holmes set a record for the most runs batted in—in a single game, and for the entire series—earning him the Most Valuable Player Award.

This was Coach Jim Brock's second world series title—and he was named as the PAC-10 Coach of the Year.

Five ASU players made the all tournament team and five players were selected in the first and second rounds of the major league draft.

This was a sensational finale to an outstanding season for the Sun Devils, whose season record was 55 games won and 13 games lost. Only one other team has topped their world series winning record—and I wish Coach Jim Brock and all those great players on the championship Sun Devils team the best for continued future success.

Providing major league players is nothing new to Arizona State. Just three of the players whose names come to my mind who are graduates of the baseball program at Arizona State are Rick Monday, Sal Bando, and the incomparable Reggie Jackson. There are many more, some of whom played under Coach Brock, and others who were developed by his distinguished predecessor, Bobbie Winkles. I expect the five players going to the majors from the 1981 squad to be as outstanding as those fine ASU players who went before them.

PRESIDENT CARTER'S OUTRAGEOUS REQUEST FOR PX AND COMMISSARY PRIVILEGES

(Mr. PARRIS asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. PARRIS. Mr. Speaker, former President Jimmy Carter was honored with the highest office the citizens of this Nation can bestow on an individual and as such he is entitled to the privileges and respect that that office carries with it. However, when he left office, Mr. Speaker, he had estimated assets of $1.5 million. The citizens of this Nation provide him with $375,000 a year for staff. He has a pension of $70,000 a year for life.

I was therefore appalled, Mr. Speaker, to read in this morning's newspaper that he has "asked the White House to grant him PX and commissary privileges at military bases."

I submit that he can go buy his groceries from the taxpaying merchants of this Nation the same as all the rest of us do. To grant this request would be an absolutely unjustified abuse of the taxpayers' charity. This time he has gone too far.

I think the White House should summarily reject the request, Mr. Speaker, and I hope they do so. It is outrageous, unwarranted, and indefensible.

IN DEFENSE OF ISRAEL

(Mr. DORNAN of California asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. DORNAN of California. Mr. Speaker, I rise to briefly discuss the imaginative, surgical, daring, bold, and

controversial raid by the small State of Israel to destroy that controversial nuclear reactor in Iraq.

I believe the intelligence information is incontrovertible, all quibbling aside, that Iraq was definitely planning to assemble a nuclear weapon as soon as technically possible. When the Iraqis in print, and vocally, forcefully maintained that they planned to use an atomic weapon to destroy the small nation of Israel while assuring it was not to be used against their enemy in hot combat—Iran—the result was predictable.

Anyone who knows anything about the quality of Israeli intelligence knows that they not only have agents in Baghdad, but they most certainly had agents working at the Iraqi nuclear site itself.

Many Members know that China traditionally calls itself "the Central Kingdom" or the Middle Kingdom (Chunq-Kuo) and their world maps of course show China at the center of the world, as all of our world map mercator projections show the United States in the center of the world and the remainder of the planet proceeds west and east.

I think if we look at the Iraqi nuclear threat from inside Israel, from their viewpoint of the world where their maps place them as the center of a hostile Moslem sea, then, and only then, will we be reserved and properly thoughtful in our analysis. I do not criticize President Reagan's reaction, however. Our President has different responsibilities than any Member of this House or the other body and his devotion to the existence of the State of Israel, with secure and defensible borders, is beyond question.

REPRESENTATIVE BEARD INTRODUCES RESOLUTION TO DENOUNCE UNESCO EFFORTS TO ESTABLISH WORLDWIDE CENSORSHIP ORGANIZATION

(Mr. BEARD asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. BEARD. Mr. Speaker, you and the rest of my colleagues have surely been sickened by the gradual trend that has reduced the United Nations to little more than a mouthpiece for the Soviet bloc and an evergrowing family of Third World nations—many of them ruled by dictators or nonelected leaders.

Understanding that it is always in our best interests to maintain membership in any organization that allows a free forum for discussion, I would not suggest that this country withdraw from the U.N. I would, however, suggest that we should have limits as to what we will endure.

Today I am introducing a resolution that would denounce an effort on the part of the United Nations Educational, Scientific, and Cultural Organization—or UNESCO, as it is commonly called—to establish a worldwide censorship organization. Justification for this great leap backward is the alleged domination and victimization of the Third World by Western journalists.

Mr. Speaker, this should not be tolerated, and to show that we mean business, my resolution would call for the withdrawal of $49 million in funding for UNESCO unless this proposal is withdrawn.

I ask for the careful consideration and support of my resolution. Thank you.

VOLUNTARY METRIC SYSTEM

(Mr. RUDD asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. RUDD. Mr. Speaker, a cartoon in one of the newspapers this week drew attention to the problems that will be foisted upon us if metric measurement ever becomes the official U.S. way of weighing and measuring.

In the comic strip, called "Downtown," one character is saying, "You know the old saying, 'Give him 2.54 centimeters and he'll take 1.6093 kilometers.'" The other character looks blank and the first character says, "I'm thinking metric."

Well, Mr. Speaker, that is amusing and that is why it is in the comic strip. But what is behind this is not so amusing; that is, an insidious and illegal effort by the Metric Board to convince the American public that metric is the law of the land.

That is why I have introduced H.R. 1660, a bill to assure that metric conversion will be voluntary. There is nothing funny about the Metric Conversion Act and there is nothing funny about the way it is being administered.

In fact, a good-to-the-point comic strip based on the one I have recounted could characterize the Metric Board as being the one that, if you give them a foot, will take a mile.

BUCKEYE BOYS RANCH DEDICATION PROGRAM

(Mr. WYLIE asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. WYLIE. Mr. Speaker, on Sunday it was my privilege to participate in the dedication of the new E. P. Messham Center for Work Experience at the Buckeye Boys Ranch which is located in the congressional district I represent.

One of the most satisfying emoluments of the office which I hold is the opportunity to participate in events like the Buckeye Boys Ranch dedication program. The Buckeye Boys Ranch was founded in 1961 as a private residential treatment center for boys aged 10 to 18 with significant educational and behavioral problems, and was modeled after Boys Town, Nebr.

Since Buckeye Boys Ranch was established, some 700 boys have had the work experience offered by the ranch and 82 percent of them have become productive members of our society.

One of the aspects of the ranch which appeals to me is the fact that the ranch has been built and maintained without Federal money. The E. P. Messham Center for Work Experience, the money for which was donated by Mrs. Paula M. Watkins, the daughter of Mr. E. P. Messham, is an example of the remarkable generosity of many people in our community.

The executive director of the Buckeye Boys Ranch is Dr. Leslie Bostic, who has been invaluable to the ranch since its beginning. I was indeed proud to be a part of the dedication program.

EFFECT OF GRAMM-LATTA ON EDUCATION

(Mr. BIAGGI asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. BIAGGI. Mr. Speaker, as the ranking New York member on the Education and Labor Committee I witnessed yesterday, after 13 years of service in this Congress, an act that was compelled by the Gramm-Latta budget proposal. The Committee on Education and Labor with a budget of some $21 billion was required by virtue of the Gramm-Latta proposal to cut some $10 billion.

Those individuals responsible for and who were in support of the cruel Gramm-Latta measure should look to their consciences and to their political futures. Let me cite a few of those programs that were required to be virtually decimated.

Guaranteed student loans—legislation we enacted in previous Congresses in order to guarantee every aspiring student the opportunity to go to college—have been severely curtailed resulting in a throw back to a more regressive age where fiscal insufficiency denied hundreds of thousands the opportunity to pursue their education.

Nutrition to the elderly has been severely cut without regard for the disastrous consequences.

The Head Start program also suffers from this restricting proposal—notwithstanding the effectiveness of the program.

Vocational education programs have been severely cut giving no consideration to the success in real terms that this program enjoys.

Mr. Speaker, I would urge those who supported Gramm-Latta to contem-

plate seriously about the consequences of that questionable action. An action that reflects an insensitivity and disregard for the young, the old, and those in that developing stage of their lives that could importantly impact on the quality of life in our country in the decades ahead.

MARINE PROTECTION, RESEARCH, AND SANCTUARIES ACT, TITLE I, FISCAL YEAR 1982 AUTHORIZATION

Mr. JONES of North Carolina. Mr. Speaker, I ask unanimous consent to take from the Speaker's desk the Senate bill (S. 1213), to amend title I of the Marine Protection, Research, and Sanctuaries Act, as amended, and ask for its immediate consideration in the House.

The Clerk read the title of the Senate bill.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from North Carolina?

Mr. PRITCHARD. Mr. Speaker, reserving the right to object, and I will not object, I would ask the chairman to explain the bill.

Mr. JONES of North Carolina. Mr. Speaker, will the gentleman yield?

Mr. PRITCHARD. I yield to the gentleman from North Carolina (Mr. JONES).

Mr. JONES of North Carolina. Mr. Speaker, S. 1213 reauthorizes title I of the Marine Protection, Research, and Sanctuaries Act of 1972—commonly known as the Ocean Dumping Act. Title I of the act establishes a policy to prohibit or strictly limit the dumping of materials harmful to the marine environment.

All ocean dumping activities are under the regulation of the Environmental Protection Agency (EPA), except for dredged material disposal, which is regulated by the U.S. Army Corps of Engineers.

On March 26, an executive communication was transmitted to the House of Representatives and the Senate from the EPA requesting an increase over the present fiscal year 1982 funding level of $2 million. S. 1213 would authorize $4.213 million in appropriations for fiscal year 1982. The increase in funding is needed to continue a joint program between EPA and the corps to identify and designate suitable sites for the disposal of wastes in the ocean.

The Committee on Merchant Marine and Fisheries unanimously reported out H.R. 3319 which is identical to the Senate-passed bill.

I would urge my colleagues to support S. 1213 in order to continue the safe disposal of wastes in the ocean.

Mr. PRITCHARD. Mr. Speaker, I thank the gentleman for that explanation.

Mr. Speaker, I rise in support of the unanimous-consent request to take from the desk and consider S. 1213, the authorization bill for title I of the Marine Protection, Research, and Sanctuaries Act of 1972, as amended. This bill would increase the authorization level for fiscal year 1982 from $2 million to $4.213 million. Title I of the so-called Ocean Dumping Act is administered by EPA, and EPA has testified that it needs this additional authorization level in order to complete environmental impact statements which are necessary for the final designation of ocean dumpsites for the disposal of dredged materials.

Mr. Speaker, the need for additional ocean dumpsites for dredged materials stems primarily from the expansion of several port transshipment centers around the United States, many of which will be used for increased bulk cargo and coal shipments. EPA was required to accelerate the completion of the ocean dumpsite environmental impact statements as a result of an out-of-court settlement in a case arising from a National Wildlife Federation suit. Therefore, this additional money is necessary to recognize this accelerated completion schedule.

Mr. Speaker, the Subcommittee on Oceanography held 1 day of hearings on this additional administration request for title I, and the committee was satisfied that these moneys were to be used primarily for the completion of designations of ocean dumpsites for dredged materials. These designations are particularly important at this time as our Nation struggles to expand its exports and exporting facilities for coal ports around the country. The additional request is not that directly related to the ongoing controversy over the question of sewage sludge dumping. Therefore, Mr. Speaker, I would strongly urge that this bill be adopted at this time.

Mr. JONES of North Carolina. I might add in conclusion the EPA is under a court order to proceed in this fashion.

Mr. PRITCHARD. The gentleman is correct.

Mr. JONES of North Carolina. This request for further authorization has been made by the Reagan administration.

Mr. PRITCHARD. Mr. Speaker, I withdraw my reservation of objection.

● Mr. FORSYTHE. Mr. Speaker, S. 1213 will enable the Environmental Protection Agency to carry out their responsibilities under title I of the Ocean Dumping Act by providing an increase in the existing fiscal year 1982 authorization level. Under the act, EPA is responsible for developing environmental impact documents and designating ocean sites where industrial and municipal wastes and dredged materials may be disposed.

EPA has testified that the present authorization of $2 million will be inadequate to fulfill certain functions related to the disposal of dredge spoils which are necessary before site designations can be finalized. It is anticipated that the designation of sites for the disposal of dredged materials will be given increased emphasis in 1982 due to an out-of-court stipulation agreement entered into by EPA which requires that they meet established schedules for site designations. Emphasis must also be given to the growing need for the improvement of deep draft port facilities in order to provide for navigation which will accommodate increased movement in coal and energy products as well as allow for the expansion of our Navy equipment and operational activities.

The total authorization of $4.213 million provided for in S.1213 will allow EPA to continue with their site designation studies for dredged material disposal as well as their monitoring, evaluation and assessment activities to ascertain what impacts have resulted from ocean dumping—whether past or present.

Mr. Speaker, without these funds, EPA will be unable to provide the staff and support for studies necessary to carry out their very important responsibilities under the Marine Protection, Research and Sanctuaries Act. They anticipate that the additional $2.213 million will be expended for reviewing and finalizing environmental impact documents, surveying sites which have not yet been studied and preparing documents for newly studied sites. A small amount will also be used for monitoring and management of the sites to insure that any dumping activities will not result in unreasonable degradation of our marine environment.

For these reasons the enactment of S. 1213 is important and I want to urge my colleagues to join me in supporting this bill.●

● Mr. D'AMOURS. Mr. Speaker, I wish to state my support for the unanimous-consent request of my colleague from North Carolina. S. 1213 is identical to H.R. 3319, a bill taken up by the House Oceanography Subcommittee and unanimously reported out of the Merchant Marine and Fisheries Committee on May 13. It responds to an administration request for an increased authorization level for EPA's activities under title I of the Marine Protection, Research and Sanctuaries Act, commonly known as the Ocean Dumping Act. The administration is seeking to increase the $2,000,000 fiscal year 1982 authorization to $4,213,000.

EPA needs the increase in order to continue identification and designation of suitable ocean dumpsites and issuance of permits for ocean dumping. EPA and the U.S. Army Corps of Engineers indicate a growing need for ocean dumpsites that will be used for

the disposal of dredged material. Much of the increase in demand for ocean dumpsites stems from the expansion of U.S. ports. The funding increases will also be used to comply with a court settlement agreement which requires EPA to complete environmental impact statements that are necessary for the final designation of ocean dumpsites.

Mr. Speaker, the Ocean Dumping Act has recently received a great deal of attention as a result of the December 31, 1981, deadline for prohibition of sewage sludge dumping. I share the concerns of a number of my colleagues who anticipate attempts to alter or circumvent this congressionally mandated deadline. However, EPA has given this committee sufficient assurances that none of the additional authorizations contained in H.R. 3319 will be used to survey or evaluate any sewage sludge sites.●

The SPEAKER pro tempore. Is there objection to the request of the gentleman from North Carolina?

There was no objection.

The Clerk read the Senate bill, as follows:

S. 1213

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled, That section 111 of the Marine Protection, Research, and Sanctuaries Act, as amended (33 U.S.C. 1420), is amended by striking "and fiscal year 1982," and inserting in lieu thereof "and not to exceed $4,213,000 for fiscal year 1982,".

The Senate bill was ordered to be read a third time, was read the third time, and passed, and a motion to reconsider was laid on the table.

A similar House bill (H.R. 3319) was laid on the table.

□ 1100

GENERAL LEAVE

Mr. JONES of North Carolina. Mr. Speaker, I ask unanimous consent that all Members may have 5 legislative days in which to revise and extend their remarks on the Senate bill, S. 1213, just passed.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from North Carolina?

There was no objection.

ANNOUNCEMENT BY THE SPEAKER PRO TEMPORE

The SPEAKER pro tempore. Pursuant to the provisions of clause 5(b) of rule I, the Chair announces that he will postpone further proceedings today on each question of agreeing to resolutions or on ordering the previous question on resolutions reported from the Committee on Rules on which a recorded vote of the yeas and nays are ordered, or on which the vote is objected to under clause 4 of rule XV.

Such rollcall votes, if postponed, will be taken at the conclusion of debate on all such resolutions.

PROVIDING FOR CONSIDERATION OF H.R. 3413, NATIONAL SECURITY AND MILITARY APPLICATIONS OF NUCLEAR ENERGY AUTHORIZATION ACT OF 1982

Mr. DERRICK. Mr. Speaker, by direction of the Committee on Rules, I call up House Resolution 155 and ask for its immediate consideration.

The Clerk read the resolution, as follows:

H. RES. 155

Resolved, That upon the adoption of this resolution it shall be in order to move that the House resolve itself into the Committee of the Whole House on the State of the Union for the consideration of the bill (H.R. 3413) to authorize appropriations for the Department of Energy for national security programs for fiscal year 1982, and for other purposes, and the first reading of the bill shall be dispensed with. After general debate, which shall be confined to the bill and shall continue not to exceed one hour to be equally divided and controlled by the chairman and ranking minority member of the Committee on Armed Services, the bill shall be read for amendment under the five-minute rule by titles instead of by sections. At the conclusion of the consideration of the bill for amendment, the Committee shall rise and report the bill to the House with such amendments as may have been adopted, and the previous question shall be considered as ordered on the bill and amendments thereto to final passage without intervening motion except one motion to recommit.

The SPEAKER pro tempore. The gentleman from South Carolina (Mr. DERRICK) will be recognized for 1 hour.

Mr. DERRICK. Mr. Speaker, for purposes of debate only I yield the customary 30 minutes to the gentleman from Missouri (Mr. TAYLOR) pending which I yield myself such time as I may consume.

Mr. Speaker, House Resolution 155 provides for the consideration of the bill H.R. 3413, to authorize appropriations for the Department of Energy for national security programs for fiscal year 1982, and for other purposes. The rule provides 1 hour of general debate to be equally divided between the chairman and the ranking minority member of the Committee on Armed Services. This is a straight open rule, allowing any germane amendment to be offered under the 5-minute rule and there are no waivers of points of order. The bill shall be read by titles instead of by sections. Upon conclusion of consideration of the bill, one motion to recommit will be in order.

Mr. Speaker, H.R. 3413 authorizes appropriations of $5.06 billion in fiscal year 1982 for the national security functions of the Department of Energy. These activities include research, development, testing, production, data collection, evaluation, and nuclear safeguards in support of the Armed Forces; the production of strategic and critical materials; and the military applications of nuclear energy.

Section 101 of title I of the bill authorizes $3.78 billion for operating expenses for DOE defense programs. Section 102 authorizes $1.27 billion for plant and capital equipment. The Committee on Armed Services recommends a total authorization which is $68.1 million above the President's budget request.

In title II of the bill which pertains to general provisions, the committee adopted an amendment to prohibit the expenditure of funds for the preparation of any environmental impact statement in connection with the operation of the Pantex nuclear weapons plant at Amarillo, Tex., or at any other DOE defense facility unless such preparation is required by statute.

Mr. Speaker, I know of no opposition to this rule and I urge its adoption so that we may proceed to the consideration of this very important legislation.

Mr. TAYLOR. Mr. Speaker, I yield myself such time as I may require.

Mr. Speaker, House Resolution 155 is an open rule providing 1 hour of general debate for the consideration of the Energy Department's national security program authorization bill for 1982.

The rule provides that the bill, H.R. 3413, will be read for amendment under the 5-minute rule by titles instead of by sections. As pointed out by the gentleman from South Carolina (Mr. DERRICK), the rule provides one motion to recommit.

There are no waivers on points of order and no restrictions on amendments in this rule.

The bill made in order under the rule authorizes $5.06 billion for the Department of Energy's military nuclear programs for fiscal year 1982, which include the development of nuclear weapons and naval powers units, and the manufacture and testing of nuclear weapons.

Mr. Speaker, the authorization bill recommended by the Committee on Armed Services for the Department of Energy's defense programs reverses the trends of recent years and substantially increases support for the Nation's strategic and theater nuclear weapons programs.

President Reagan requested approximately $5 billion in fiscal year 1982 authorizations for this purpose, an increase of about 25 percent over the 1981 budget request of the previous administration.

The Republican floor manager of the bill will be the gentlelady from Maryland (Mrs. HOLT), a cosponsor of

the bill and the ranking minority member of the Armed Services Subcommittee on Procurement and Military Nuclear Systems.

The Committee on Armed Services reported the bill by a recorded vote of 39 to 2, and the Committee on Rules reported this rule by a voice vote.

Mr. Speaker, I support the bill made in order by the rule, and urge adoption of the rule so that the House may proceed to consider this important legislation.

Mr. DERRICK. Mr. Speaker, I move the previous question on the resolution.

The previous question was ordered.

The resolution was agreed to.

A motion to reconsider was laid on the table.

PROVIDING FOR CONSIDERATION OF H.R. 3023, NAVAL PETROLEUM RESERVES AUTHORIZATION FOR FISCAL YEAR 1982

Mr. HALL of Ohio. Mr. Speaker, by direction of the Committee on Rules, I call up House Resolution 156 and ask for its immediate consideration.

The Clerk read the resolution, as follows:

H. RES. 156

Resolved. That upon the adoption of this resolution it shall be in order to move that the House resolve itself into the Committee of the Whole House on the State of the Union for the consideration of the bill (H.R. 3023) to authorize appropriations to the Department of Energy for fiscal year 1982 for conservation, exploration, development, production, sale, and use of the naval petroleum reserves and naval oil shale reserves, and the first reading of the bill shall be dispensed with. After general debate, which shall be confined to the bill and shall continue not to exceed one hour, to be equally divided and controlled by the chairman and ranking minority member of the Committee on Armed Services, the bill shall be read for amendment under the five-minute rule. At the conclusion of the consideration of the bill for amendment, the Committee shall rise and report the bill to the House with such amendments as may have been adopted and the previous question shall be considered as ordered on the bill and amendments thereto to final passage without intervening motion except one motion to recommit.

The SPEAKER pro tempore. The gentleman from Ohio (Mr. HALL) is recognized for 1 hour.

Mr. HALL of Ohio. Mr. Speaker, I yield the customary 30 minutes to the gentleman from Missouri (Mr. TAYLOR) for purposes of debate only, pending which I yield myself such time as I may consume.

Mr. Speaker, House Resolution 156 is an open rule providing for the consideration of H.R. 3023, the naval petroleum reserves authorization for fiscal year 1982.

The rule provides for 1 hour of general debate to be equally divided and controlled by the chairman and ranking minority member of the Committee on Armed Services.

The rule also states that the bill shall be read for amendment under the 5-minute rule. House Resolution 156 further provides for one motion to recommit.

Mr. Speaker, H.R. 3023 authorizes appropriations for fiscal year 1982 for the Department of Energy for conservation, exploration, development, production, sale, and use of the naval petroleum reserves and oil shale reserves and for other purposes, in accordance with section 660 of the Department of Energy Organization Act.

The naval petroleum reserves authorization for fiscal year 1982 authorizes a total of about $228.5 million, of which $225.9 million is authorized for the naval petroleum reserves and $2.6 million for the naval oil shale reserves.

This legislation was requested by the Department of Energy and is in accordance with the President's program.

Mr. Speaker, I urge my colleagues to adopt House Resolution 156 so that we may proceed to the consideration of H.R. 3023.

Mr. TAYLOR. Mr. Speaker, I yield myself such time as I may require.

Mr. Speaker, House Resolution 156 is an open rule providing 1 hour of general debate for the consideration of the naval petroleum reserves authorization bill for 1982.

The notable thing about this rule is that it contains no waivers on points of order and no restrictions on amendments.

The bill will be read for amendment under the 5-minute rule. As the gentleman from Ohio (Mr. HALL) has mentioned, one motion to recommit is provided for.

H.R. 3023 authorizes some $228.5 million in funding for the Department of Energy to operate, maintain, explore, develop, and use the naval petroleum and oil shale reserves and to sell the production from the naval petroleum reserves.

Mr. Speaker, of the amount authorized by H.R. 3023, $225.9 million is for operation of the naval petroleum reserves and $2.6 million is for continuation of the Government's naval oil shale program. These amounts are identical to the President's request for 1982, and the administration supports enactment of H.R. 3023.

The Republican floor manager of H.R. 3023 will be the gentleman from Tennessee (Mr. BEARD), the ranking minority member of the Armed Services Subcommittee on Investigations.

The Committee on Armed Services reported the bill by a recorded vote of 39 to 0, and the Committee on Rules reported the rule by a voice vote.

Mr. Speaker, I support the rule so that the House may proceed to consider the bill.

Mr. Speaker, I have no further requests for time.

Mr. HALL of Ohio. Mr. Speaker, I yield 3 minutes to the gentleman from Oregon (Mr. WEAVER) for purposes of debate only.

Mr. WEAVER. Mr. Speaker, I thank my colleague for yielding to me.

Mr. Speaker, I rise in support of the rule as well as the bill. My involvement in Elk Hills Naval Petroleum Reserve is a long one. In my freshman term in the Congress, the committee on which I serve, the Committee on Interior and Insular Affairs, brought out a bill to take Elk Hills out of the naval petroleum reserves. I opposed this. I believed strongly that we needed to continue our military oil reserves, and I worked with and commend the Committee on Armed Services for doing what it could at that time to try to maintain the reserve as a naval reserve.

The reason I support the bill is that, in effect, much of the oil from Elk Hills is now going into our strategic reserve, the salt domes in Louisiana and Texas. This is a proper place for the oil. It will help us meet immediate emergencies which may occur.

I do have, however, an amendment to the bill, and I want to say that the primary purpose for my amendment is to set up a study to see and determine the adequacy of our national security oil reserves in the ground. We have no such reserves anymore on the mainland of the United States. I think this is a grave, grave situation.

I am talking now about 30 or 40 years down the pike.

There is one other element in my amendment, however, that of designating one area off the coast of California for the study because that area may be subject to immediate leasing for development. I appeared before the Committee on Rules in order to ask that my amendment contain language which would mandate that that oil and gas area not be leased for the succeeding year. However, the amendment that I will offer is considered germane. It does not mandate the nonleasing of this area, and I believe its effect will be much the same, and if the House sees fit to pass my amendment, we will set up a study of the adequacy of our military reserves. Also I would be confident that such areas off the coast of California might not be leased for the coming year so that they could be considered for part of the reserve.

□ 1115

Mr. HALL of Ohio. Mr. Speaker, I have no further requests for time, and I move the previous question on the resolution.

The previous question was ordered.

The resolution was agreed to.

A motion to reconsider was laid on the table.

PROVIDING FOR CONSIDERATION OF H.R. 2614, DEPARTMENT OF DEFENSE SUPPLEMENTAL AUTHORIZATION ACT, 1981

Mr. FROST. Mr. Speaker, by direction of the Committee on Rules, I call up House Resolution 154 and ask for its immediate consideration.

The Clerk read the resolution, as follows:

H. RES. 154

Resolved, That upon the adoption of this resolution it shall be in order to move, section 402(a) of the Congressional Budget Act of 1974 (Public Law 93-344) to the contrary notwithstanding, that the House resolve itself into the Committee of the Whole House on the State of the Union for the consideration of the bill (H.R. 2614) to authorize supplemental appropriations for fiscal year 1981 for procurement of aircraft, missiles, naval vessels, and tracked combat vehicles and for research, development, test, and evaluation for the Armed Forces and to increase the authorized personnel end strengths for military and civilian personnel of the Department of Defense for fiscal year 1981, and the first reading of the bill shall be dispensed with. After general debate, which shall be confined to the bill and shall continue not to exceed one hour, to be equally divided and controlled by the chairman and ranking minority member of the Committee on Armed Services, the bill shall be read for amendment under the five-minute rule. It shall be in order to consider the amendment in the nature of a substitute recommended by the Committee on Armed Services now printed in the bill as an original bill for the purpose of amendment under the five-minute rule, and said substitute shall be read for amendment by titles instead of by sections. At the conclusion of the consideration of the bill for amendment, the Committee shall rise and report the bill to the House with such amendments as may have been adopted, and any Member may demand a separate vote in the House on any amendment adopted in the Committee of the Whole to the bill or to the committee amendment in the nature of a substitute. The previous question shall be considered as ordered on the bill and amendments thereto to final passage without intervening motion except one motion to recommit with or without instructions. After the passage of H.R. 2614, it shall be in order to consider, section 402(a) of the Congressional Budget Act of 1974 (Public Law 93-344) to the contrary notwithstanding, the bill S. 694 in the House, and it shall then be in order in the House to move to strike out all after the enacting clause of the said Senate bill and to insert in lieu thereof the provisions contained in H.R. 2614 as passed by the House.

The SPEAKER pro tempore. The gentleman from Texas (Mr. FROST) is recognized for 1 hour.

Mr. FROST. Mr. Speaker, for purposes of debate only, I yield the customary 30 minutes to the gentleman from Ohio (Mr. LATTA), pending which I yield myself such time as I may consume.

Mr. Speaker, House Resolution 154 provides for the consideration of H.R. 2614, the Department of Defense Supplemental Authorization Act for Fiscal Year 1981. The rule provides for 1 hour of general debate to be equally divided between the chairman and ranking minority member of the Committee on Armed Services. This is a straight open rule, allowing any germane amendment to be offered under the 5-minute rule and the committee amendment in the nature of a substitute is made in order as an original bill to be read for amendment by titles instead of by sections. Upon conclusion of consideration of the bill, one motion to recommit with or without instructions will be in order.

House Resolution 154 waives section 402(a) of the Congressional Budget Act against consideration of the bill. Section 402(a) prohibits consideration of any bill which authorizes enactment of new budget authority for a fiscal year unless that bill has been reported on or before May 15 preceding the beginning of such fiscal year. Various sections of the bill as introduced and reported would directly authorize enactment of supplemental new budget authority in fiscal year 1981 for weapons procurement, military construction, and for other purposes. Since the bill was not reported by May 15, 1980, it would be subject to a point of order. This waiver is something of a technicality, since funds authorized by this bill were included in the Supplemental Appropriations and Rescission Act of 1981 which was enacted on June 5.

After passage of H.R. 2614, the rule provides for consideration of the Senate companion bill, S. 694 and waives section 402(a) of the Budget Act against consideration of the Senate bill.

Mr. Speaker, H.R. 2614 authorizes appropriations of $2.641 billion, approximately $400.5 million below the administration's request. This authorization covers the DOD procurement, research and development, military construction, test and evaluation programs for the remainder of the fiscal year.

Mr. Speaker, this rule was unanimously agreed to by the Rules Committee; I know of no opposition to it. I urge adoption of House Resolution 154 so that the legislation may be considered.

Mr. LATTA. Mr. Speaker, I yield myself such time as I may consume.

Mr. Speaker, this rule provides 1 hour of general debate for the consideration of H.R. 2614. The bill will be open to amendment.

The only unusual features in this rule are the Budget Act waivers.

Section 402(a) of the Budget Act prohibits consideration of an authorization for a fiscal year unless that bill has been reported by May 15 preceding the beginning of the fiscal year. Since this bill includes authorizations for fiscal year 1981, it would have had to have been reported by May 15, 1980, in order to comply with the Budget Act requirement. Since this bill was not reported until April 9, 1981, the Budget Act waiver is required in order to consider the bill.

The rule also provides that after passage of the House bill, it will be in order to insert the House-passed language in the Senate bill. The same Budget Act waiver is required in order to allow consideration of the Senate bill.

Mr. Speaker, the bill made in order by this rule, provides supplemental authorizations for the Department of Defense for fiscal year 1981. It authorizes an additional $2,641,462,000. This is approximately $400 million less than the administration's request.

Mr. Speaker, this bill was reported out of the Armed Services Committee by a vote of 36 to 1. The rule was reported by a voice vote.

Mr. Speaker, the scheduling for this bill is also a little unusual. The supplemental appropriation bill for 1981 has already been passed by the House and signed into law. And now we are following along with the supplemental authorization.

Mr. Speaker, I yield back the balance of my time.

Mr. FROST. Mr. Speaker, I have no requests for time, and I move the previous question on the resolution.

The previous question was ordered.

The resolution was agreed to.

A motion to reconsider was laid on the table.

PROVIDING FOR CONSIDERATION OF H.R. 3480, LEGAL SERVICES CORPORATION ACT AMENDMENTS OF 1981

Mr. FROST. Mr. Speaker, by direction of the Committee on Rules, I call up House Resolution 148 and ask for its immediate consideration.

The Clerk read the resolution, as follows:

H. RES. 148

Resolved, That upon the adoption of this resolution it shall be in order to move that the House resolve itself into the Committee of the Whole House on the State of the Union for the consideration of the bill (H.R. 3480) to amend the Legal Services Corporation Act to provide authorization of appropriations for additional fiscal years, and for other purposes, and the first reading of the bill shall be dispensed with. After general debate, which shall be confined to the bill and shall continue not to exceed one hour, to be equally divided and controlled by the chairman and ranking minority member of the Committee on the Judiciary, the bill shall be read for amendment under the five-minute rule. It shall be in order to consider the amendment in the nature of a substitute recommended by the Committee on the Judiciary now printed in the bill as an original bill for the purpose of amendment under the five-minute rule. No amendment to the bill or to said substitute shall be in

order except germane amendments printed in the Congressional Record at least two legislative days before their consideration. At the conclusion of the consideration of the bill for amendment, the Committee shall rise and report the bill to the House with such amendments as may have been adopted, and any Member may demand a separate vote in the House on any amendment adopted in the Committee of the Whole to the bill or to the committee amendment in the nature of a substitute. The previous question shall be considered as ordered on the bill and amendments thereto to final passage without intervening motion except one motion to recommit with or without instructions.

The SPEAKER pro tempore. The gentleman from Texas (Mr. FROST) is recognized for 1 hour.

Mr. FROST. Mr. Speaker, for purposes of debate only, I yield 30 minutes to the gentleman from Ohio (Mr. LATTA), pending which I yield myself such time as I may consume.

Mr. Speaker, House Resolution 148 is an open rule providing for the consideration of H.R. 3480, the Legal Services Corporation Act Amendments of 1981. The rule provides for 1 hour of general debate to be equally divided and controlled by the chairman and ranking minority member of the Committee on the Judiciary. In addition, the rule makes in order an amendment in the nature of a substitute recommended by the committee, which is now printed in the bill, as an original bill for the purpose of amendment under the 5-minute rule.

During consideration of the bill for amendment, no amendment to the bill or the substitute shall be in order except germane amendments printed in the CONGRESSIONAL RECORD at least 2 legislative days prior to the consideration of H.R. 3480. The Rules Committee adopted this provision in the rule because of the comprehensive nature of this law. This is not an unusual practice; in fact, the Rules Committee has adopted procedures of this nature in the past in order to allow all the Members of the House, not just members of the committee or those Members who are particularly interested in the bill, to be fully aware of what the amendments to such comprehensive laws are and exactly what it is they mean. I should point out to my colleagues that those amendments that have been printed in the RECORD and thus are eligible for consideration are all subject to germane amendments when they are considered under the 5-minute rule.

Upon conclusion of the consideration of the bill for amendment, the committee shall rise and report the bill to the House with such amendments as may have been adopted and the rule provides that any Member may demand a separate vote in the House on any amendment adopted in the Committee of the Whole to the bill or to the committee amendment in the nature of a substitute. The rule also provides one motion to recommit with or without instructions.

Mr. Speaker, H.R. 3480 is a bill that allows continued authorization for a program that provides the poor of this Nation with an access to the legal system of this country that those citizens might not otherwise have available to them. The Committee on the Judiciary, recognizing that we must cut the costs of the Federal Government has reduced the authorization level for the Legal Services Corporation over the next 2 years by 20 percent to $260 million for each of fiscal years 1982 and 1983. This important program, which was reported unanimously from the Subcommittee on Courts, Civil Liberties, and the Administration of Justice and was reported by a vote of 22 to 6 from the committee on the Judiciary, represents a bipartisan effort—it represents bipartisan support for the continuation of the Legal Services Corporation. We all know that the President has recommended that Legal Services be abolished and that the need for legal services for the poor be met solely by the private bar and through social services block grants to the States. While I recognize that the President is making every effort to contain the costs of Federal spending programs, I firmly believe that the President is making a tragic error by recommending that this program be abolished. The Legal Services Corporation was established in a bipartisan manner and its continued existence has been the result of bipartisan support for the availability of legal services to the poor and indigent of this Nation.

As I am sure the Committee on the Judiciary will more fully explain, the Legal Services Corporation is a program that has the overwhelming support of the people of the United States. A recent New York Times poll around the Nation showed that 83 percent of those polled favored increases in legal services or agreed that the funding for legal services should remain the same. Only 13 percent of those polled wanted decreases. In addition, over 60 national organizations and 200 bar groups support the continuation of the Corporation. I know from personal experience that the Legal Services Corporation and the hundreds of lawyers throughout the country not otherwise have access to the legal system have provided an invaluable service to our country.

This bill is a demonstration of bipartisan support for the continuation of the program. Over the years of its existence, there have been reported abuses by individual legal services programs, and the committee fully believes that the amendments they are recommending in H.R. 3480 will cure most, if not all, of those problems. I support the efforts of the Judiciary Committee and I fully support the continued authorization for the Legal Services Corporation.

I would find it hard to justify abolition of this program in a time when the poor of this country are being asked to make many other sacrifices in the name of fiscal responsibility. Mr. Speaker, I would urge my colleagues to support the rule and I would further urge them to support the bill. It would be a tragic mistake to abolish a program that assures equal access to justice for the poor in the name of fiscal austerity.

Mr. LATTA. Mr. Speaker, I yield myself such time as I may consume.

Mr. Speaker, this will be the first opportunity for this House to show the American people they meant business when they voted on May 7 for the President's budget which attempts to restrain the growth of Federal spending.

The President recommended that Legal Services Corporation be terminated and consolidated into a block grant program. As a matter of fact, LSC has been without authorization for some time. Why they are bringing it forward now I cannot say, other than perhaps to make a test of wills between the Legal Services Corporation, which apparently wants to become the fourth branch of Government, and the President of the United States.

□ 1130

As a matter of fact, I have a clipping from the Washington Post of Monday, March 30, 1981, entitled, "Legal Services Corporation Suits Itself, Waves Red Flag at Reagan."

I think this is what it is all about. Do we have a President of the United States to follow or are we going to follow the advocates of the Legal Services Corporation?

I think the American people not only want the Members of this House of Representatives to follow the dictates of their conscience, but also to indicate whether or not they meant what they said when they voted to retrain the growth of Federal spending on May 7, just a few weeks ago.

We have had this matter before the Congress for quite a number of years and each time it comes up, we have the Committee on the Judiciary or the members on that committee who support Legal Services Corporation continuously coming in with amendments trying to perfect its charter as they are doing now. I think the committee has already indicated there are 17 or 18 substantive amendments already added to this bill in an attempt to plug the holes in the LSC dike. This is not new, it has been done before.

The next time we would have this matter up for reauthorization, if it continues, they would be here with a host of other amendments saying,

well, we know there are shortcomings in the program and we have to correct them.

Well, what is wrong with this program is the basic structuring of the program itself and this restructuring is not provided for. We have a Legal Services Corporation, funded with taxpayers money, answerable to no one and this is wrong. I have contacted individuals supposedly running the program on the national level, about Legal Services Corporation personnel in my district and they say, we cannot do anything about the personnel running the program.

Well, after all, they are spending taxpayers money. Somebody ought to be able to do something about their activities. That is one of the reasons the President of the United States has proposed to give the legal services to the poor through a block grant program so that we can be assured that the truly needy will get some services.

What I oppose mostly is that some in this corporation want to take over the direction of the operations of various agencies of the Government by filing lawsuit after lawsuit against them whenever someone thinks it should be operated differently.

I could read from now to doomsday about the reported abuses out of this corporation. If you do not know anything about them now, you had better become acquainted with what they are doing in your respective districts.

All we hear everytime this program comes up is: We have to do something for the poor. They, LSC, uses this as an excuse for its existence, not a reason. If we are truly interested in legal services for the poor, we can get it cheaper and more effectively through block grants, to meet the problem.

There are about 6,200 attorneys and 9,800 others employed. The committee is asking for $260 million. This is not a small sum. First time the Legal Services Corporation wanted a third of a billion dollars. But now they come in and say, "We are cutting our request down to $260 million."

I see this as a question of whether or not we are going to follow the advice of the President of the United States and go the block grant route or whether we are going to follow the advice of the Legal Services Corporation.

Oh, I know the American Bar Association is all for this. I can recall, and I am a member of the bar, when we as attorneys felt we had a responsibility to the poor ourselves. As soon as the Congress dreamed up the LSC which gets the poor people out of our offices, many said we no longer had that responsibility. I think we still have that responsibility and so do the bar associations in my district.

In my district, for example, the bar associations in almost every county have written me over the years indicating that they are not for the Legal Services Corporation and are still ready, able, and willing to perform those services.

Look at the type lawsuits LSC has been filing. When I was practicing law, we were not supposed to be filing lawsuits just to be filing a lawsuit. We were not soliciting cases at that time. But if there has not been solicitation going on by the Legal Services Corporation, I am not standing here. Everybody knows they do.

Let me say also that everybody knows they have been breaking the law including the Comptroller General as he wrote the gentleman from Wisconsin (Mr. SENSENBRENNER) on May 1, 1981, as follows: I am not going to read his very lengthy letter, but let me just quote:

> After reviewing this material, we have concluded that the LSC has itself engaged and allowed its grant recipients to engage in lobbying activities prohibited by Federal law.

They know it is illegal to lobby, but they dare you to do anything about it.

I think it is time to pay attention to the President of the United States, follow his recommendation and send back to the States the block grant money so that each and every State can take care of the poor. There is no reason for us to continue to debate this authorization bill. We ought to decide now that LSC ought to be terminated and defeat the rule rather than take the time of the House of Representatives in debating this issue.

Mr. Speaker, I yield 10 minutes to my friend, the gentleman from Wisconsin (Mr. SENSENBRENNER).

Mr. SENSENBRENNER. Mr. Speaker, I urge my colleagues to vote against the rule providing for the consideration of H.R. 3480, a bill to reauthorize the Legal Services Corporation.

The November 1980 elections indicated our citizens wanted change. Included in this demand for change is a return to federalism, a return to local decisionmaking mechanisms which reflects the soundness of allowing people to make their own decisions.

There is not room within this concept for continuation of a centralized system for dispensing legal services which, through its power to fund grantees, has the inherent power to impose a prevailing ideology upon its funded programs.

Aside from this consideration, since its inception the Legal Services Corporation has found itself embroiled in the myriad of controversial activities. Everytime Legal Services Corporation or appropriation legislation comes before Congress, amendments have been passed to place reins and redirect the focus of its activities. But these restrictions have been steadily and repeatedly ignored. There is little indication that the new restrictions placed in H.R. 3480 will be treated any differently than the restrictions that have been enacted into law in the past.

Take, for example, lobbying activities. The LSC and its grantees were found by the Comptroller General of the United States to have engaged in illegal grassroots lobbying activities. The activities were conducted despite prohibitions in both the appropriations and authorizing legislation and repeated warnings from the General Accounting Office.

While H.R. 3480 attempts to address the grassroots lobbying problem, I am not confident that these activities will be restricted. Recent statements on the importance of lobbying by Legal Services Corporation personnel indicate the importance the Corporation itself has placed on this advocacy tool. In a recent published interview with Dan Bradley, President of the Legal Services Corporation, it was made clear that the coming decade would see lobbying substantially replace courtroom efforts as the LSC mode of fulfilling what it believes to be its mission.

Mr. Bradley says:

> In the 1980's, many of our attorneys may elect the legislative and administrative agency route, rather than go through the long, exhaustive, uncertain judicial process. It is certainly my observation that legislative and not administrative activities is as important, if not more important than some of the long judicial appeals.

Aside from lobbying, LSC attorneys have found a preference for engaging benchmark litigation on various entitlement programs in social litigation. Recent statements by LSC officials drill this point home harder. For example, LSC President Dan Bradley publicly announced that the LSC was an integral part of the traditional public interest movement and defined his major goal in these terms:

> If I could but mobilize my 5,500 full-time attorneys and my 17,000 full-time employees HEW would not stand a chance, HUD would not stand a chance.

Mr. LATTA. Mr. Speaker, will the gentleman yield?

Mr. SENSENBRENNER. I would be delighted to yield to my colleague from Ohio.

Mr. LATTA. I wonder if the gentleman would just reread the statement he just made.

Mr. SENSENBRENNER. This is Dan Bradley, the President of the Legal Services Corporation speaking:

> If I could but mobilize my 5,500 full-time attorneys and my 17,000 full-time employees, HEW would not stand a chance, HUD would not stand a chance.

That means he is saying that he is going to be suing the agencies of Government to do what he wants to do, to increase entitlements, to increase taxpayer funding and that means increased inflation and increased unemployment.

Ms. FIEDLER. Mr. Speaker, will the gentleman yield?

Mr. SENSENBRENNER. I yield to the gentlewoman from California.

Ms. FIEDLER. I thank the gentleman for yielding.

Along that line I have with me just a brief description of a few of the cases they have been involved in. When the gentleman talks about their suing the Government, not only are we paying for their services for the privilege of being sued, but let me give a few examples.

One was a case of litigation to compel payment of SSI benefits to alcoholics. Another one was litigation to compel the New York City Transit Authority to hire former heroin addicts. Another piece was a successful Federal district court suit to compel New York to pay State welfare benefits to illegal alien parents and the list goes on and on and on.

Not only are the taxpayers picking up the bills on one end, but also at the other end.

Mr. SENSENBRENNER. I am delighted that the gentlewoman from California brought those out. But to drive the point home even further on what the intent of the Legal Services Corporation is, even with the restrictions contained in this legislation, I would like to read another comment, a postelection memo from Alan Houseman, who is the Director of the Legal Services Corporation's Research Institute:

> Far more is at stake than the survival of Legal Services Corporation. Many social benefit and entitlement programs that have developed during the sixties and seventies to provide concrete benefits to poor people are threatened. As we proceed in our fight, we must take all the steps necessary at the National, local and State levels to assure the continuation of other social benefit and entitlement programs.
>
> It is essential that we join with others in preventing cutbacks in these programs and preventing changes in other Federal policies, such as affirmative action, which are essential to the continued development of poor people and minorities in this country. At no time must we let our own concerns override the more basic concerns of poor people.

Thus it is quite evident that the LSC sees itself as the principal means of increasing the already mushrooming entitlement programs of the Federal budget. Federal funds will continue to be used for the LSC's brand of social reform despite any restrictions that are placed on the Legal Services Corporation's activities.

As to representation of the poor, the abolition of the Legal Services Corporation will allow the poor to receive more skilled and vigorous legal representation. The American Bar Association's Code of Professional Responsibility requires that: Every lawyer, regardless of professional prominence or professional workload, find time to participate in serving the disadvantaged. Federal funding of the LSC has lured the private bar into a false sense of security in believing that the LSC is providing enough indigent representation. The abolition of the LSC will force the private bar to develop better and adequate programs of representation for the poor.

□ 1145

It is difficult to understand how a practicing bar with 575,000 members, whose gross income exceeded $20 billion, cannot substantially support a legal services program it is obligated by its own code of ethics to provide. Furthermore, it is also questionable whether LSC attorneys are providing quality legal representation. Supporters of the LSC argue that there is a need for poverty law experts. It is argued that private practitioners do not have the expertise in poverty law. A good case can be made that the LSC attorneys do not have it either. An unpublished 1977 study of the problem indicated that one out of every three LSC lawyers leaves the program each year, and that the average level of expertise is a little over 2 years.

A February 1981 LSC fact book indicates the average staff attorney experience has steadily declined from 3.6 years to 2.4 years between 1978 and 1981. Not only did the average experience of staff attorneys decrease, but the average experience of managing and supervising attorneys dropped from 6.3 to 4.6 years, while the average experience of program directors went from 9.1 to 6.9 years. The impact of so great a rate of turnover on the quality of legal services in the legal aid cases mostly handled by staff attorneys is of obvious consequence.

In conclusion, H.R. 3480 does not make a serious effort to redirect the Corporation toward the type of representation the poor and indigent want and need. Corporate grantees will continue to selectively choose causes which animate them and find clients to serve as the means for the advancement of such causes. This is all to the detriment of the poor, whose interests will be subsumed by the political agendas of their alleged proponents.

The underlying premise of this bill is mistakenly founded on the premise that the States cannot be trusted to provide legal representation for the poor. There is no basis for the assumption that States and localities have any objection to the provision of legal services on a traditional, individual basis. Legal Services can, and if properly offered will, compete within States and localities for a fair share of bloc grant funds, but only if offered on a nonpolitical basis. A bloc grant approach will work better to achieve the result than the most strongly worded package of reform legislation.

Mr. Speaker, H.R. 3480 is a sham. It will not address the substantial problems that have been raised in the management of the Legal Services Corporation. If it passes, its proponents will be back with another fix-up bill when the authorization expires. The time to do away with the Legal Services Corporation is now. Let the bar dispose of their professional responsibilities and let the States have a nonpolitical legal services program.

Mr. FROST. Mr. Speaker, I yield 4 minutes to the gentleman from New York (Mr. PEYSER).

Mr. PEYSER. Mr. Speaker, I thank the gentleman for yielding this time to me. As I have listened to this debate and listened to the vehemence with which the Legal Services Corporation has been attacked, it was as though this were some evil legislation that somehow the Congress has mistakenly passed over the years, and now is the time to purge ourselves of this terrible program.

But, the contrary is really true, and the record is quite amazing. The appropriate committee in the Judiciary Committee has approved the continuation of Legal Services overwhelmingly, the Republican-controlled Senate has also approved the continuation of Legal Services, and the statement that was made that this would be an opportunity to decide whether the President of the United States was going to be the leader in this country, or whether Legal Services was going to be the leader is certainly very strange thinking. I am sure that if President Reagan were here today, he would not want his leadership to be hanging on the vote that is about to take place in a few minutes on this rule, and if there is no vote on the rule, on the vote that is going to take place on the Legal Services legislation itself when it reaches the floor, because we then would lose the leadership of President Reagan.

There is no doubt in anybody's mind who has been following this legislation that Legal Services is going to continue in this country, and that this legislation and this rule will be passed. So, I would like to say that whether I support all of President Reagan's programs or not, I think it should be clearly stated that this is not going to be a test of his leadership, because it would go down very early in his career as President.

The President's record on Legal Services is also quite clear. In California, the then Governor of California tried very desperately to eliminate Legal Services, and once again that effort was rejected, as it should have been. So, I would like to say to my colleagues that: First, for the good of the President, let us not say that this is a test of his leadership; second, for the good of the country and for the poor people in this country who we still have an obligation to, and still most of

us in this Congress feels are entitled to this type of protection, let us vote very clearly, as I am sure we will—let us vote overwhelmingly for not only the rule but for the obvious need for the continuation of Legal Services.

Mr. BUTLER. Mr. Speaker, will the gentleman yield?

Mr. PEYSER. I will be glad to yield to my friend from Virginia.

Mr. BUTLER. Mr. Speaker, I thank the gentleman for yielding. I would just make the point, since he has raised some questions about the President's involvement in this, he recognizes, I am sure, as the Members must, that the President of the United States—this President—has within his power to appoint the entire Board of the Legal Services Corporation, so that the power to correct the course and direction and the lack of supervision from the top is now available to this administration. Apropos of that, of course, the two members of the staff which the gentleman from Wisconsin mentioned——

The SPEAKER pro tempore. The time of the gentleman from New York has expired.

Mr. FROST. Mr. Speaker, I yield 1 additional minute to the gentleman from New York.

Mr. BUTLER. Of course, it is within the power of the new Board, it would be within the power of the new Board to discharge the two members of the staff that were mentioned by the gentleman from Wisconsin, and indeed we are told that they have seen the handwriting on the wall and expect to leave very shortly.

All of these things indicate to me that this administration can place its imprint on the direction of Legal Services Corporation and bring it back to the basis I had in mind when I voted for it earlier. Of course, if the gentleman will yield further, the legislation which is before us has a number of amendments—I believe the number is in the neighborhood of 16—each of which is designed to respond to an objection which has been raised by a Member of this body in the committee when we considered it.

So, I think that we have tailored the new Legal Services legislation to meet the objections that have been made, and with the course and direction that it will receive in the new administration, we can anticipate that Legal Services will do what it was contemplated it would do.

Mr. PEYSER. I thank the gentleman for his comment and leadership in this matter.

Mr. LATTA. Mr. Speaker, I yield myself 30 seconds.

Mr. Speaker, let me just say that everybody is aware of the fact that the President will make these appointments, but the President does not restructure the program. That is up to the Congress, and the Congress has failed to do this.

The SPEAKER pro tempore. The time of the gentleman from Ohio has expired.

Mr. LATTA. Mr. Speaker, I yield 5 minutes to the gentleman from North Carolina (Mr. JOHNSTON).

Mr. JOHNSTON. Mr. Speaker, 20 years ago I had the privilege of being admitted to the bar of the State of North Carolina. It was a particular privilege for me, because my own father swore me in, and that day when he permitted me to come within the bar of that court, he granted me a great privilege. But, concomitant with that privilege, he also granted me a lot or responsibility.

The issue today is not whether poor people are entitled to legal services. The issue today is whose responsibility is it to provide them. For 15 years the Congress of the United States has been trying to give people rights and take away their responsibilities. The issue today is whether or not the legal business is a profession or a trade; whether or not members of the bar have an obligation to do pro bono work.

One of the greatest deans of any law school ever in this country was Dean Carroll Weathers, and he spent many months in our senior year at Wake Forest Law School instilling in us the history of the legal profession since the days of the Greek city-states; how advocacy was originally not something one pursued for gain or profit, because an advocate was not paid; he was granted an honorarium.

But, our legal profession wants to get rid of its responsibilities to the poor and have the American taxpayer assume those responsibilities because it is beneath the dignity or not in the economic interests of the wealthy Wall Street lawyers to take their time pursuing the interests of the poor and the indigent.

Well, actually we are doing the organized bar a great disservice by taking this responsibility away from them, because once we do it, then they become merely purveyors of their minds and their souls at the highest hourly rate, because they have no responsibility that enures to their profession. Somehow or another, I do not think we will have done them a favor in the long run by taking away this responsibility. We will have denied them something special, something that comes with being a professional.

I do not think any doctor in this country would deny a person needing an operation this operation because he could not pay for it. If so, they do not warrant the recognition that the Hippocratic oath grants them. But one thing is for sure, if the legal profession does not pick up and assume the responsibilities to the poor, the indigent, it should not be the burden of the taxpayers of the United States to take up their responsibilities. If we take it over, they will never regain it, and what was once a great and noble profession will degenerate into a mere craft.

Mr. LATTA. Mr. Speaker, I yield 2 minutes to the gentleman from Illinois (Mr. RAILSBACK).

Mr. RAILSBACK. Mr. Speaker, may I first also begin by complimenting the previous speaker, and indicate that if the legal community of this country had recognized the responsibility that this one Member, I believe, has toward the idea of providing on a pro bono basis legal services for the poor, then to be quite candid, we would not be here today.

The facts are that by reason of a number of circumstances, that occurred before we ever served in Congress; namely, the settlement of certain poorer areas, disadvantaged areas, ghettos in some cases, where frankly there were not even enough lawyers to serve the people and to meet the needs of the residents of those particular areas, a legal service program was needed. If the private bar had met its responsibility with lawyers contributing of their time, then we would not be here today. Frankly, if everyone in the country could afford legal services, how desirable that would be. Unfortunately, there are many Americans that simply do not have the resources to be able to hire a lawyer, not necessarily for litigation purposes, but, frankly, for some very basic, fundamental legal requirements.

□ 1200

It could be divorces, it could be child abuse, it could be separations, or it could be family problems, which, by the way, make up 30 percent of the caseload of the legal services community.

The SPEAKER pro tempore. The time of the gentleman from Illinois (Mr. RAILSBACK) has expired.

Mr. FROST. Mr. Speaker, I yield 4 minutes of our time to the gentleman from Illinois (Mr. RAILSBACK).

Mr. RAILSBACK. Now, Mr. Speaker, what has happened, reviewing very quickly the history of the Legal Services Corporation, is that some Members of the minority, including the three members who sat on the subcommittee, favor a continuation of the Legal Services Corporation. It started out back in the early 1970's, when President Richard Nixon providing leadership and recognized a responsibility, supported and advocated the establishment of a Legal Services Corporation.

That Corporation has not always operated free of controversy, and I concede that. There have been plenty of problems, and we on the subcommittee proposed and adopted something like

18 amendments designed to make the thing operate in a better fashion.

But having said that, I am not going to be defensive about it, because I believe there is a genuine need that does exist. The Legal Services Corporation, as has been mentioned, is going to be completely under the control of President Reagan's appointees—and I think that is very significant.

I would like to quote a comment by a very strong conservative commentator, James J. Kilpatrick, who had this to say:

> If there is one concept that our Nation cherishes more than any other, it is the commitment that is carved in stone at the Supreme Court. The legend reads: "Equal justice under the law." Year by year we creep a little closer toward that distant goal.
>
> That cheerful observation is prompted by a report from the Legal Services Corporation, marking its first 5 years of operation. The Corporation has come a long way from those angry days in 1973 and 1974 when many of us on the conservative side fought like bobcats against its very creation.
>
> In the nature of things, poor families can accept the realities of being poor; they are not going to have the food, clothing, housing, and higher education and material amenities of the rich. What they cannot accept is the sense of being unfairly ground down by the millwheels of the law.

Mr. Speaker, I hope that we have many Republican Members and many Members on both sides of the aisle supporting a continuation of Legal Services at this substantially reduced rate.

Mr. SENSENBRENNER. Mr. Speaker, will the gentleman yield?

Mr. RAILSBACK. I yield to the gentleman from Wisconsin.

Mr. SENSENBRENNER, Mr. Speaker, will the 11 Members President Reagan appoints to the Board, be able to control the activities of the grants? But how can they do so when the legislation the gentleman is supporting does not give the Legal Services Board the right to sue a grantee for specific performance of its grant contract?

Mr. RAILSBACK. Mr. Speaker, actually one of the amendments that was adopted gives much greater control of the Corporation at any point in time to actually defund particular recipient grantees. That was very controversial. Some of the Members thought that we ought to have hearings. We were able to get that amendment adopted.

In my opinion, the safeguards that have been enacted are good. There are many Members who think we have gone too far. My feeling is that we have a legal services authorization that can be supported by conservatives, because, as I said, there have been 18 amendments designed to tighten up the standards.

Mr. FROST. Mr. Speaker, I yield 6 minutes to my distinguished colleague on the Committee on Rules, the gentleman from Florida (Mr. PEPPER).

Mr. PEPPER. Mr. Speaker, I think we are engaged in a very serious discussion as we consider this rule.

I am sure that there is not a Member of this House who would not proudly acclaim his loyalty to and support of the Constitution of the United States. The Constitution says that all citizens of this country are entitled to the due process of law. The Constitution says that all citizens of this country are entitled to equal protection of the law. But neither of those constitutional provisions is self-executing.

We do not get due process of law except in the protections of the courts. We do not get equal protection in the law except as the judicial system of the country affords it to us, and we do not get the advantages of the judicial system deciding due process or equal protection in our favor unless we can in a lawful way get into the courts.

We cannot stop a judge on the street and say, "Judge, I have got a case." We cannot buttonhole a Supreme Court Justice and say, "Judge, I want you to protect my rights."

We have a judicial system in this country, a court system, so that if we are going to get redress of our constitutional rights, we have got to go in the orderly way through those courts. And except in a small claims court, where we do not have technicalities involved, the only man or woman qualified to represent a citizen who is trying to protect his rights is a lawyer.

That is the way our system works. If we deny a person access to a lawyer, the services of a lawyer, we might just as well tell him he does not have any constitutional rights that will be protected, because only the lawyers in the courts of the land are able to protect his rights.

Last year, as this report ably shows, there were 1,500,000 cases handled for people, and that meant something very important to those people. They were handled by the lawyers in this Legal Services Corporation.

We have set up this organization. It has functioned well. If it has made mistakes, they are in the process of being corrected by the procedures that have now been adopted, by the amendments that have now been accepted.

The present administration will appoint a majority of the Board that runs this Corporation, so this will not be a past administration holdover run by somebody else.

In addition to that, an amendment has provided that the organization of the system and the direction of it shall be from Washington, not from the local community, where there may be error in the policy that may be determined. So we have afforded protection in the administration of the program, because it will be run from Washington; it will be run by a Board appointed by the President of the United States at the present time, and we will be able to show the advantages of doing what has been done in the past perhaps in a more effective and efficient way.

So why should we deny people the right to have a lawyer? Some say, "Well, let the law profession do it."

Well, as a matter of fact, the lawyers have only their services to sell. They pay taxes like everybody else. We cannot expect a law firm that is busy with its own clients, making a living for the members of that firm, to give more than a relatively small amount of its time to the public interest. After all, why not let everybody do it? Why should the lawyers have to provide all of the opportunity for the poor to get the legal services they need? Why not have everybody do it? We should let the lawyers just pay their share of the cost of doing it.

Mr. JOHNSTON. Mr. Speaker, will the gentleman yield?

Mr. PEPPER. I will gladly yield to the able gentleman from North Carolina.

Mr. JOHNSTON. Mr. Speaker, according to the Census Bureau, about 10 percent of the population of this country is now impoverished. Would it not be reasonable to ask a group of people to whom we grant a peculiar privilege, an attorney-client privilege, to hold sacred these communications?

Mr. PEPPER. Mr. Speaker, I can only say to my distinguished friend, as I did a moment ago, that the right way to do this is to completely administer a responsible legal organization composed of lawyers dedicated to the service of the people who cannot have their legal rights protected in any other way.

When we are supporting this proposal, I think we are defending the constitutional rights, the Americanism rights, of the people of this country. Let the poor man have access to the courts, as the rich man is able to have access to the courts.

We pride ourselves that America has impartiality in the administration of the law and in the protection of the rights of all the people, but if we are really going to protect them, we have got to have lawyers working under an effective instrumentality like this Corporation under this bill we are considering.

Mr. Speaker, I hope that the rule will be approved.

Mr. LATTA. Mr. Speaker, I yield 2 minutes to the gentleman for Illinois (Mr. MCCLORY).

Mr. McCLORY. Mr. Chairman, I thank the gentleman for yielding this time to me.

Mr. Speaker, I certainly do not think anybody who is opposing the rule or opposing this legislation is against providing legal services for rich, poor, and middle class or anyone else. We do guarantee legal representation of all

persons involved in criminal proceedings. This is a constitutional right which is provided and administered in the States and in the communities without the involvement of any Federal corporation or Federal agency.

It seems to me that what we are undertaking to do at this time, consistent with the general overall domestic programs and policies that are being advanced by this administration is to return responsibility and authority to the States and to the local communities. We are trying to divorce ourselves from the philosophy that the only way to carry out a program of benefit to the people is to have it established and administered in Washington, D.C. The people have rejected that philosophy, and I am in the position now where, after supporting this legislation in the past, I am going to oppose it, at this time.

There is no reason why we cannot have a legal aid program supported under a block grant program, supported at the local level, and supported at the State level and even through the volunteers and legal aid committees of the various bar associations, as it traditionally has been done. We had legal aid for the poor before we had this program, and I think we will have it afterward, too.

The fact that this legislation is defective should be suggested by the fact that it took on 18 amendments. There was something wrong with it, and it needed a lot of correction. There is a lot of dissatisfaction and there is a lot of distortion of what we intended in this attempt to provide equal justice for all. It seems to me that we will establish better programs of legal aid by rejecting this rule.

I might say that the rule requires a 48-hour advance filing of an amendment. That requirement may deprive Members from bringing to the floor of this House their amendments designed to improve this legislation but who would be denied that opportunity because of the rule that is offered here today. My advice is that we reject the rule.

Mr. LATTA. Mr. Speaker, I yield 2 minutes to the gentleman from Missouri (Mr. TAYLOR).

Mr. TAYLOR. Mr. Speaker, about 2 years ago the Legal Services Administration decided to put in a staff attorney system in my district. We had a great deal of controversy, and our local bar decided, having served the people voluntarily without charge for years, that they would prefer, if we had anything, to have the judicare system.

So we had a hearing on the situation at Joplin, Mo. The legal services people came down. A member of the National Board came, and among the witnesses we had was a witness from the Missouri Division of Family Services, which handles all of the welfare for the people in the State of Missouri and does a good and a creditable job.

The testimony of the lady who was there was that the local bar in southwest Missouri had done an adequate job through the voluntary system that they had set up, and that the lawyers had provided adequate legal services for all the poor people with whom she worked, and her suggestion was that Federal legal services probably was not needed in our area, but if it was needed, it should be handled by the local bar through the judicare procedure.

Also attending the meeting was a member of the National Board, who got up and said:

I can understand why the Missouri Division of Family Services is against this program—because they are the ones we are going to be suing.

□ 1215

Well, now, friends, have we come to the place where we unleash the wrath of the Federal Government on local government and volunteers that is doing an adequate job in providing legal services for the people who need it in order to create even another expensive bureaucracy at the expense of the American taxpayer?

As I was campaigning in my first term for Congress, I well remember going through Taney County one day and campaigning. An old gentleman there that was 92 years old said:

Gene, I'm going to support you, but when you get up there and they bring up some of these expensive social tinkering programs, I want you to ask yourself two questions. No. 1, do we need it? No. 2, can we afford it? And if the answer to both of them is no, and it generally will be, then ask yourself this question, "How in tarnation have we done without it all these years?"

I believe that the legal services program falls within the catagory of one of the programs that we do not need and can well do without.

I suggest that this rule should be defeated.

Mr. LATTA. Mr. Speaker, I yield back the balance of my time.

Mr. FROST. Mr. Speaker, I yield myself such time as I may consume.

I would only remind my colleagues that we are voting on the rule today. It is an open rule. There is no question this is a matter of some controversy. It should have the opportunity to be heard on the floor, scheduled for next week. There is the opportunity for amendments at that time. There are a number of improvements that were made by the committee and we should have the opportunity to vote on this very important program.

Mr. Speaker, I yield back the balance of my time.

Mr. Speaker, I move the previous question on the resolution.

The previous question was ordered.

The SPEAKER pro tempore. The question is on the resolution.

The question was taken; and the Speaker pro tempore announced that the ayes appeared to have it.

Mr. SENSENBRENNER. Mr. Speaker, I object to the vote on the ground that a quorum is not present and make the point of order that a quorum is not present.

The SPEAKER pro tempore. Evidently a quorum is not present.

The Sergeant at Arms will notify absent Members.

The vote was taken by electronic device, and there were—yeas 303, nays 88, not voting 40, as follows:

[Roll No. 72]

□ 1230

The Clerk announced the following pairs:

Mr. Addabbo with Mr. Derwinski.
Mr. Chappell with Mr. Parris.
Mr. Reuss with Mr. Porter.
Mr. Conyers with Mr. Skeen.
Mr. Lundine with Mr. Pursell.
Mr. Zablocki with Mr. Quillen.
Mr. Lowery of California with Mr. Weber of Ohio.
Mr. Shelby with Mr. Erlenborn.
Mr. Hawkins with Mr. Dannemeyer.
Mr. Biaggi with Mr. Collins of Texas.
Mrs. Collins of Illinois with Mr. Broyhill.
Mr. Clay with Mr. Benedict.
Mr. John L. Burton with Mr. McKinney.
Mr. Breaux with Mr. Edwards of Alabama.
Mr. Aspin with Mr. Nelligan.
Mr. Whitley with Mr. Kemp.
Mr. Young of Missouri with Mr. Neal.
Mr. Jones of Oklahoma with Mr. Huckaby.
Mr. Holland with Mr. Roe.

Mr. SMITH of New Jersey changed his vote from "nay" to "yea."

So the resolution was agreed to.

The result of the vote was announced as above recorded.

A motion to reconsider was laid on the table.

MSGR. GENO C. BARONI

(Mr. ANNUNZIO asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. ANNUNZIO. Mr. Speaker, this Sunday, June 14, my good friend Msgr. Geno C. Baroni celebrates the 25th anniversary of his ordination as a Catholic priest. Monsignor Baroni was, until January of this year, the Assistant Secretary of the Department of Housing and Urban Development for Neighborhoods, Voluntary Associations and Consumer Protection. He was the first Catholic priest to be appointed by a President to a sub-Cabinet position of policy responsibility. Prior to his service at HUD, Monsignor Baroni was the founder and the head of the National Center for Urban Ethnic Affairs. Geno Baroni is the driving force in setting up the Campaign for Human Development on behalf of the U.S. Catholic Conference and was the director of urban affairs of the Catholic Archdiocese of Washington in the late 1960's and associate pastor of Saints Paul and Augustine Church in Washington, D.C.

Geno Baroni was born in the Pennsylvania coal fields of a coal mining family. His mother and father were born in Italy, and like many other Italian-Americans, experienced ethnic discrimination while growing up. Monsignor Baroni is one of the strong proponents of ethnic identity and ethnic pride, urging ethnic groups to appreciate differences rather than fighting over them.

Monsignor Baroni was one of the founding members, along with myself, of the National Italian American Foundation. He has been my good friend over a long period of time and I join with all of his friends in wishing him many more years of priestly service.

NAVAL PETROLEUM RESERVES AUTHORIZATION FOR FISCAL YEAR 1982

Mr. WHITE. Mr. Speaker, I move that the House resolve itself into the Committee of the Whole House on the State of the Union for the consideration of the bill (H.R. 3023) to authorize appropriations to the Department of Energy for fiscal year 1982 for conservation, exploration, development, production, sale, and use of the naval petroleum reserves and naval oil shale reserves.

The SPEAKER pro tempore. The question is on the motion offered by the gentleman from Texas (Mr. WHITE).

The motion was agreed to.

IN THE COMMITTEE OF THE WHOLE

Accordingly the House resolved itself into the Committee of the Whole House on the State of the Union for the consideration of the bill, H.R. 3023, with Mr. PEYSER in the chair.

The Clerk read the title of the bill.

The CHAIRMAN. Pursuant to the rule, the first reading of the bill is dispensed with.

Under the rule, the gentleman from Texas (Mr. WHITE) will be recognized for 30 minutes, and the gentleman from Tennessee (Mr. BEARD) will be recognized for 30 minutes.

The Chair recognizes the gentleman from Texas (Mr. WHITE).

Mr. WHITE. Mr. Chairman, I yield myself such time as I may consume.

Mr. Chairman, H.R. 3023 is a bill to authorize appropriations for the conservation, exploration, development, production, sale, and use of the naval petroleum and oil shale reserves for fiscal year 1982.

Before discussing the provisions of the bill, I believe that a brief summary of the history of the naval petroleum and oil shale reserves would be helpful.

Between 1912 and 1924 four naval petroleum reserves were established: No. 1 at Elk Hills, Calif.; No. 2 at Buena Vista Hills, Calif.; No. 3 at Teapot Dome, Wyo.; and No. 4 in Alaska. In addition, three naval oil shale reserves, Nos. 1 and 3 in Colorado and No. 2 in Utah, were set aside for the Navy between 1916 and 1924. The Elk Hills reserve is presently estimated to contain approximately 1 billion barrels of oil, while Teapot Dome is estimated at approximately 42 million barrels. In terms of remaining recoverable reserves, Elk Hills ranks fourth in the United States.

After a brief period in the early 1920's, when the reserves were under the administration of the Department of Interior and were leased to several oil companies, administration of the reserves was returned to the Department of the Navy where it remained until 1977. For about 2½ years, during World War II, the reserves were produced in order to supply petroleum for national defense needs. Except for those two brief periods of production, the management of the reserves was geared to conservation of the oil so that it would be available when needed by the Armed Forces.

As a result of the 1973 oil embargo, the Congress sought to bring all available domestic fields into production. Legislation was introduced in the 94th Congress to authorize production of the naval petroleum reserves at the maximum efficient rate of production (MER); that is, the maximum rate which could be achieved without detriment to the ultimate recovery of the fields. That legislation was opposed by our committee, which proposed that the reserves would be produced, but only at the level necessary to provide funding for their complete exploration and development and put them in condition to be produced, on short notice, in the event of a national defense need. Unfortunately, the majority of the House favored maximum production of the reserves. The result was the Naval Petroleum Reserves Production Act of 1976, Public Law 95-258. That law directed production of the reserves at the maximum efficient rate for a period of 6 years, with an option for extension of the production period if the President found such a necessity and neither House of Congress disapproved the continued production.

The 1976 act also took Naval Petroleum No. 4 in Alaska from the Navy, redesignated it the national petroleum reserve, and transferred it to the Department of the Interior. That reserve, which is adjacent to the Prudhoe Bay Field in Alaska, is estimated to contain from 10 to 33 billion barrels of oil. The loss of that reserve, which is owned completely by the Government and is largely unexplored and undeveloped, dealt a serious blow to the concept of providing a ready source of petroleum to the Armed Forces in time of crisis.

In accordance with the Naval Petroleum Reserves Production Act, production of the reserves began on July 3, 1976. Between that time and March 1981, 216 million barrels of oil have been produced at the naval petroleum reserves. Until recently all of that production was sold for consumption by the civilian economy. Those sales of oil and associated liquid products have realized more than $3.7 billion in revenues which have been deposited in the general funds of the U.S. Treasury.

At the time of our committee hearings in 1975, it was estimated that the maximum efficient rate of production for the Elk Hills reserve would be 300,000 barrels of oil per day when the field was fully developed. That estimate was based on the assumption that production would be minimal until the field was fully developed. Since production was begun before development of the field was completed and has been going on for almost 5 years, the estimated MER has been reduced. During our hearing in April, the Department of Energy witness estimated that later this year the peak MER of about 190,000 barrels daily would be reached. I should point out that figure does not reflect any reduction in the estimated ultimate recovery from the field, which is about 1 billion barrels, but only the rate at which the oil can be produced without detriment to the ultimate recovery.

Production at Elk Hills in April 1981 averaged 170,000 barrels of oil daily. The production at Teapot Dome at that time averaged 3,600 barrels daily. I should point out that two-thirds of the land within Naval Petroleum Reserve No. 2 at Buena Vista Hills, Calif., is privately owned. As a result of that large private ownership, the Government has been required to produce its portion of the field in order to prevent its oil from being drained by adjacent landowners. The Government's current royalty on that production amounts to about 300 barrels per day. Consequently, Buena Vista Hills is now a reserve in name only.

The Elk Hills Reserve, which became the largest producing oil field in the United States with the exception of Alaska, is still under development. For example, 64 development wells were drilled during fiscal year 1980. All were productive. Forty-five more development wells are scheduled for fiscal year 1981. Gas recovery plants and other facilities are also being constructed. This continued development of the field resulted in fiscal year 1980 in an increase of 15,000 barrels of oil daily over the prior fiscal year. Meanwhile, exploration of this reserve is continuing. Since production began in 1976, approximately 126 million barrels of additional proven reserve have been identified at Elk Hills. Approximately 20 percent of Elk Hills remains to be explored.

The naval oil shale reserves are estimated to contain 22 billion barrels of shale oil. Approximately 2 to 5 billion barrels are considered economically recoverable using current technology. Activity at those reserves, however, is limited to completion of a predevelopment plan at Oil Shale Reserve No. 1 to evaluate its shale resources and to evaluate underground water supplies, identification and evaluation of surface water supplies, and initiation of an air quality monitoring capability. The predevelopment plan began in June 1978 and is scheduled for completion in late fiscal year 1982.

One final item on the history of the reserves is that administration and jurisdiction was transferred from the Department of the Navy to the Department of Energy by the Department of Energy Organization Act, Public Law 95-91, on August 4, 1977. Since that time the uniformed personnel of the Navy have been detailed to the Department of Energy to staff the Office of Naval Petroleum Reserves which carries out the management of the reserves. The witnesses testified that it is the intention of the Department of Energy to continue to use uniformed naval officers in the management of the reserves.

That brief history of the naval petroleum reserves should help to place in context the actions of the Committee on Armed Services on H.R. 3023.

The purpose of H.R. 3023 is to authorize funding for the Department of Energy for the naval petroleum and oil shale reserves during fiscal year 1982. This funding is required to carry out the provisions of the Naval Petroleum Reserves Production Act of 1976. The bill was reported pursuant to section 660 of the Department of Energy Organization Act, Public Law 95-91, which provides that "appropriations to carry out the provisions of this act shall be subject to annual authorization".

Mr. Chairman, I would like briefly to outline the principal features of the bill. First, it authorizes a total of $225.9 million for conservation, exploration, development and use of the naval petroleum reserves; $202 million of that amount is allocated for operation and maintenance, development drilling, development facilities, exploration drilling, and program direction at Elk Hills. More than half the funding will be applied to operation and maintenance of the reserve. The bill provides $22.869 million for the Teapot Dome Naval Petroleum Reserve for the same purposes. In addition to providing funds for completion of the development of the Teapot Dome Field, this funding would also provide for a pilot secondary recovery program employing chemical and thermal processes to extract additional oil from the field. If this program is successful, production at Teapot Dome could be substantially increased in the mid-1980's. Funding of $2.5 million is provided for the naval oil shale reserves. This funding will allow completing a predevelopment plan for Naval Oil Shale No. 1 in Colorado. The balance of the authorization, approximately $1 million, is for headquarters funding. This element provides overall direction, management, and coordination for the reserves program.

Mr. Chairman, I should also point out that since late 1980 a substantial portion of the Government's share of the production from the naval petroleum reserves has been stored in the strategic petroleum reserve (SPR). Presently 103,365 barrels per day of Elk Hills production is being exchanged for other crude oil which is being stored in the SPR storage facilities. The balance of the Government's daily share of production, 34,000 barrels, is being sold directly to small refineries.

I should also point out, Mr. Chairman, that this authorization assumes that production at the petroleum re-

serves will continue throughout fiscal year 1982. The 6-year production period authorized by the Naval Petroleum Reserve Production Act of 1976, Public Law 95-258, will expire on April 5, 1982. That act, however, provides that the production period may be extended for 3 years if the President, after an investigation, determines the necessity for continued production, reports to the Congress certifying that necessity, and if neither House of Congress adopts a resolution of disapproval within 90 days after receipt of the report. During our hearing in April the witnesses testified that the investigation to determine the necessity for continued production was in progress and should be completed in June. If a production extension is recommended by the President, it will, of course, be carefully examined. While it is possible that such a recommendation might not be approved by the Congress, we believed it would be unwise to authorize appropriation for only the first half of the fiscal year. Even if the production extension were disapproved the operation and maintenance requirements at the petroleum reserve would be reduced by approximately $29 million. Shutting in the fields to a maintenance level of production, however, would require extensive work and involve expenses which would approach the amount presently allocated for operation and maintenance.

Mr. Chairman, this is a relatively simple bill. It authorizes funding for one of the Government's most profitable operations. It is estimated that the naval petroleum reserve will generate approximately $1.8 billion for fiscal year 1981. Those funds are all deposited in the general funds of the Treasury. The production and sale of naval petroleum reserve oil has had a favorable impact on our national budget as well as in our international balance of payments since 1976.

Mr. Chairman, I urge my colleagues to join in support of H.R. 3023.

□ 1245

Mr. BEARD. Mr. Chairman, I yield myself such time as I may consume.

I rise in support of H.R. 3023 and urge my colleagues to support this bill.

The naval petroleum reserves are one of the most valuable natural assets possessed by our Government. Naval Petroleum Reserve No. 1 at Elk Hills, Calif., is one of the largest producing oilfields in the United States, currently producing at a rate of 170,000 barrels of oil daily. In terms of remaining recoverable reserves, it ranks fourth in the United States. Reserve No. 3 at Teapot Dome, Wyo., while in no way comparable to Elk Hills, will produce about 4,000 barrels of oil daily during the current fiscal year.

Since production at the maximum efficient rate was decreed in the 1976 Naval Petroleum Reserves Production Act, over 200 million barrels of oil have been produced at the reserves. Sales of that oil and the associated liquid products have produced revenues in excess of $3.7 billion. Those revenues, which are deposited in the general fund of the Treasury, have made a substantial contribution to reducing the Federal budget deficit. Moreover, production of the reserves has reduced our dependency on foreign oil imports and has a substantial effect on our international balance of payments. Since late 1980 most of the Government's share of Elk Hills production has been exchanged for oil which is stored in the strategic petroleum reserve. While that strategic reserve is not exclusively for military use, it will provide military fuels in the event of a national petroleum emergency.

While the current production of the naval petroluem reserves is not in consonance with the intent of our earlier leaders who established them, it is accomplishing several important national goals. Presently the administration is conducting an examination to determine whether the production period should be extended for an additional 3 years as provided by the 1976 Naval Petroleum Reserves Production Act. Assuming that continued production will be recommended, the Congress will have an opportunity later this year to express its will in that matter.

Although the production period has depleted these critical national defense reserves, it has provided an opportunity for completion of the development of the fields. As you may recall, when our committee examined the reserves almost a decade ago, we found that extensive work, both in drilling of development wells and in the construction of production facilities, was essential if the reserves were to be available for production in the event of a national defense emergency. This period has also been utilized for continuation of the exploration program at Elk Hills. Today that exploration program is 80 percent complete. As an example of the benefits of that continuing exploration program, reservoirs containing more than 125 million barrels of oil have been located recently at Elk Hills.

The funding proposed by this bill, $228,463,000, will provide for operation and maintenance of the reserves, the construction of development facilities, development drilling, exploration drilling, an enhanced oil recovery program at Teapot Dome, completion of a predevelopment plan at oil shale reserve No. 1, and for program management and direction.

Mr. Chairman, the Nation has received an excellent return on its earlier investment in the naval petroleum and oil shale reserves, and I am confident that the fiscal year 1982 funding will continue to add to the value of these extremely valuable national assets.

Mr. Chairman, this is a good bill, and I urge all my colleagues to join me in supporting it.

Mr. WHITE. Mr. Chairman, I yield 5 minutes to the gentleman from Oregon (Mr. WEAVER).

Mr. WEAVER. I would like to thank the distinguished chairman of the subcommittee for yielding me time. I would like to commend the Committee on Armed Services for bringing out this bill. I would like to say that I stood with them 5 years ago when they did, as the chairman said, hope to keep Elk Hills in the naval petroleum reserve and simply make it ready for production instead of opening it up and producing the oil that is in it. However, since that time we are now putting a majority of the oil into the strategic reserve and, therefore, as that is what the oil is for, I will support the bill. I can think of nothing more important to the security of the United States of America and to the functioning of the armed services than that there be set aside reserves of fuel for the long-term use of the military.

Yet today on the mainland United States we have no such reserve set aside for the military. None—none. What are we thinking about? What are we and our children going to be doing when 20 and 30 years down the road our oil wells in this country begin to run dry?

When the Soviet Union and the People's Republic of China have vast reserves left, and we do not have the oil to fuel our military capacity, much less produce the food we need in this Nation.

Therefore, I can think of no more important thing that we can do here today than to commence setting into reserves fields in our public lands which will be set aside for the long-term use of the military.

Let me make a very important distinction, a critical distinction. There are two kinds of reserves. One, the strategic reserve now being filled in Louisiana and Texas salt domes, and that kind of reserve would come into use if there were an immediate emergency. If there were a cut-off of foreign oil and we needed the oil immediately to run our economy and our military, we could begin pumping that out tomorrow. That is an essential kind of reserve. I fully support it and the maintenance of it.

The reserve I am talking about here today and the one with which the amendment that I will be offering to the bill will deal is a completely different kind of reserve. It is not a reserve set aside for a specific national emergency, for a military emergency. It is a reserve set asided so that 10 or 20 or 30 or 40 years down the road when we

perceive that we will not have oil in the years to come, when our wells will be running dry, there will be these reserves then that we can look to to make sure that our planes and our ships and tanks have the fuel to run them in the next 20 or 30 years or more.

The kind of reserves I am taking about here today would not be immediately taken out 20 years from now or 10 years from now and produced; it would be only when we perceive 20 or 30 years from now that we were not gong to have enough oil that we would begin exploring and developing these reserves for the next 20 or 30 years. So that is the kind of reserve I am talking about. Such reserves would be the last wells we have left. It is the kind of reserve that Elk Hills was originally set up for.

So I want to define in my amendment the words "national security." Again I want to repeat national security here is not the emergency kind of national security but the national security that means we are going to have far into the foreseeable future oil set aside exclusively for our military capacities. That is the kind of national security I am talking about.

I would like to ask my colleagues in the House, what happens 20 or 30 years from now if we do nothing, when our wells start going dry? What will happen then? Of course, I know what will happen then. We will then at that time set aside the few oil fields there are left for national security. Why not do that today? Why not set them aside today?

I repeat, there are no reserves left in mainland America.

Mr. BEARD. Mr. Chairman, I have no further requests for time.

Mr. WHITE. Mr. Chairman, I yield 4 minutes to the gentleman from Kansas (Mr. GLICKMAN).

Mr. GLICKMAN. Mr. Chairman, I come to the floor on an issue today for which I apologize for not bringing to the committee's attention before, but it is one that I think is very important in terms of our national security. That relates to how does the Elk Hills Naval Petroleum Reserve relate to the strategic petroleum reserve? Under present law there is a mandated fill rate at SPRO, the strategic petroleum reserve, of 100,000 barrels a day, and to assure that that rate is reached, that we get this 100,000 barrels a day, production from Elk Hills is restricted to meeting that fill rate, if it is not met from another source. So, for example, if we only fill the SPRO at 80,000 barrels a day, we can use Elk Hills as a so-called safety net.

In the 1980 Interior Appropriations Committee report, a higher fill rate of 300,000 barrels was urged. Amendments to the strategic petroleum reserve law which have been reported by the Senate Natural Resources Committee would mandate 300,000 barrels a day to the strategic petroleum reserve. However, the Senate bill does not tie the Elk Hills commitment to the higher fill rate. It is my understanding that our own Energy and Commerce Committee has not decided exactly what to do with this issue.

But regardless of what that committee decides to do to meet the fill rate, to make the fill rate effective, there needs to be a matching section. If we stay at 100,000 barrels a day minimum on the fill rate for the SPRO, Elk Hills stays exactly where it is. But what happens if we go to 300,000 barrels a day on the SPRO, and we are only able to come up with 220,000 barrels a day in the spot market or elsewhere we buy that oil.

Under current law, Elk Hills would not be required to be used at all because we would have reached 100,000 barrels a day under current law.

What I am saying is that we are buying more oil for the SPRO, and if we exceed that 100,000 barrels a day minimum on the strategic petroleum reserve, there is no requirement that our own domestically produced oil by the U.S. Government on its land is required to fill the strategic petroleum reserve.

Action on the SPRO amendments will very likely be part of the budget reconciliation bill, and while we do not know at this point, it is likely that we are going to have a restricted rule which will not allow an amendment to that bill.

Presently SPRO has 142 million barrels of the 1 billion barrel goal. That is a shortfall of 858 million barrels. That makes increasing the fill rate exceedingly responsible. We are going to increase that fill rate. And given the circumstances of recent trends in the Middle East, it is likely to assume that our petroleum purchasing capabilities are not going to get any better.

So basically I bring this to the attention of the House. I may offer an amendment to insure that we tie the fill rate used for the Elk Hills Naval Petroleum Reserve to what we are requiring the SPRO to be filled.

□ 1300

If we are going to increase the strategic petroleum reserve to 300,000 barrels a day but we keep Elk Hills safety net, so to speak, at 100,000 barrels a day, it means that if we are only able to fill half the SPR at 150,000 barrels a day, zero oil will be required to be taken from the Elk Hills Naval Petroleum Reserve.

And I suppose what I am saying is, if we are serious about filling the SPR and if we are serious about increasing the fill rate of the SPR but if we keep Elk Hills safety net at its current level, then we have an illusory safety net that will, in effect, mean that we will not be able to fill more than 100,000 barrels a day if we have a Mideast crisis. And after the Iraqi-Israeli crisis, and after Kuwait has now suggested that perhaps they embargo oil sales to the United States, I would just suggest that matching the fill rate between the SPR and the fill rate safety net on the Elk Hills Naval Petroleum Reserve ought to be a prudent thing to do.

Mr. WHITE. Mr. Chairman, I have no further requests for time, and I yield back the balance of my time.

Mr. BEARD. Mr. Chairman, I yield back the balance of my time.

The CHAIRMAN. The Clerk will read.

The Clerk read as follows:

H.R. 3023

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled, That there is authorized to be appropriated to the Department of Energy for fiscal year 1982 for conservation, exploration, development, production, sale, and use of the naval petroleum reserves and the naval oil shale reserves under chapter 641 of title 10, United States Code, the sum of $228,463,000, of which—

(1) $225,903,000 shall be available for the naval petroleum reserves; and

(2) $2,560,000 shall be available for the naval oil shale reserves.

Mr. WHITE (during the reading). Mr. Chairman, I ask unanimous consent that the bill be considered as read, printed in the RECORD, and open to amendment at any point.

The CHAIRMAN. Is there objection to the request of the gentleman from Texas?

There was no objection.

AMENDMENT OFFERED BY MR. WEAVER

Mr. WEAVER. Mr. Chairman, I offer an amendment.

The Clerk read as follows:

Amendment offered by Mr. WEAVER: Change lines 2 and 6 to read as follows: Line 2, after "development," insert "study,".

Line 6, strike "$225,903,000" and insert "$225,703,000".

And, add additional paragraphs, beginning on line 10, to read as follows:

"(3) $200,000 shall be available for the study of existing or new naval petroleum reserves to determine the adequacy of naval petroleum reserves for the long-term national security; in particular the tracts of "Department of Interior OCS Sale Numbered 53" which lie in and north of the area which is designated Tier N-809 by the Bureau of Land Management.

"(4) The study shall be completed and the Secretary shall report his findings to the Congress 90 days from the date of enactment of this Act."

Mr. WEAVER. Mr. Chairman, the Elk Hills Naval Petroleum Reserve has a long history with me. As a freshman Member of the Congress, the Interior Committee on which I serve brought out a bill taking Elk Hills out of the naval petroleum reserve. I was one of the few Members to oppose that very strongly. I believe now, as I did then, that we must have military oil reserves in the mainland United States.

I have offered amendments in previous Congresses to restore Elk Hills as a naval petroleum reserve.

I no longer offer such an amendment to this bill, for the simple fact that much of the Elk Hills oil is now going into our strategic petroleum reserve. That is the reserve in Louisiana and Texas salt domes that can be used immediately for a national emergency.

My amendment here asks for a study, a 90-day study, requiring no new money and just $200,000 which is taken from the amounts available in the bill for a study of the adequacy of the existing and new petroleum reserves.

I would hope out of this study would come the impetus for legislation, because I tell my colleagues, and I tell my very dear friend, the chairman of the subcommittee, the gentleman from Texas, we have no reserves, long-term strategic reserves in the ground, reserves for our military today in the mainland United States.

As the chairman so ably demonstrated in his exposition of the bill, the former Pet-4 reserve in Alaska, with 10 billion to 30 billion barrels of oil, has been changed to the National Petroleum Reserve Alaska, is under the Interior Department, and also, very simply, it is not on the mainland; that oil must pass through some of the most precarious transportation systems, pipelines, ships, ports, in order to get to the mainland.

What we need are reserves in the ground in the mainland United States of America for the long term.

I want again to emphasize the national security situation I am discussing in this amendment is not the national emergency that might happen tomorrow. That is where the strategic petroleum reserve that can be pumped out tomorrow comes in. I am talking about 30 years down the pike, when our wells begin running dry, and we will scurry around then trying to lock up a little oil for our planes and ships and tanks. I am saying: Why not do it now?

This amendment simply says, "Let's study it." And I would hope, after the 90-day study, that legislation then could emerge, either from the Interior Committee or the Armed Services Committee, or I would like both committees, that would set up some long-term strategic reserves.

I point out to the Members a very simple fact, and that is that if foreign oil were cut off from us today—we are pumping 8 million barrels a day in this country—it would hurt our economy terribly, but we would still have the oil for our ships and planes and tanks. But what happens 30 years from now when we have just a couple of million barrels a day domestic production? What happens then, when our oil is cut off? What do we have to fuel our ships and planes and tanks with then?

And I ask also: What happens when the People's Republic of China and the Soviet Union have vast oil reserves still available to them 30 years from now and we do not? Will we become a third-rate nation?

I do not want my children living in a nation so devoid of the fundamental fuel to run our military machine that we must quake and quiver. Now is the time to set it aside, Now is the time to study. I ask the Members and I would hope the committee would consider accepting this amendment and then out of it we could proceed with hearings and legislation.

Mr. WHITE. Mr. Chairman, I rise in opposition to the amendment.

Mr. Chairman, I want to commend the gentleman for his sincerity and his objectivity in attempting to develop and preserve the defense of this Nation.

I want to point out to the membership that, as in all committees, this committee has tried to carefully tailor the authorization amounts within the capabilities of our Nation and within the purview of the budget system.

We have determined that $1 million was absolutely necessary for that. Well, the gentleman originally asked for $1 million, but the amount of money we requested is essential to pursue the program as mandated by law.

Now, what the gentleman is seeking is to divert $200,000 from essential spending, which we have determined is important, to what may be called nonessential spending.

Now, I can assure the gentleman that his objective is right, but we can probably get that same information by request now, without an expenditure or diversion of any of the money in this bill.

I pledge to the gentleman that as chairman of the Investigations Subcommittee we shall ask for all information available within the Defense Department, within the Interior Department, or within the Department of Energy, in order to try to acquire sufficient background to determine whether further legislation is necessary.

But within a 90-day span of time, and with $200,000, I do not think you are going to accomplish a great deal. I think we should first determine whether or not we can get that information, which I pledge we shall pursue.

Mr. WEAVER. Mr. Chairman, will the gentleman yield? I have a very important point to make here.

Mr. WHITE. I yield to the gentleman from Oregon.

Mr. WEAVER. The gentleman agrees that we should study the issue in the legislative committees that have jurisdiction?

Mr. WHITE. Absolutely, of course.

Mr. WEAVER. And would the gentleman agree that he will undertake such a study? And I will try to get it in my own committee.

Mr. WHITE. I have already issued instructions to the counsel to draw up sufficient letters to try to solicit this information from the respective departments.

Mr. WEAVER. In that event, Mr. Chairman, I ask unanimous consent to withdraw my amendment.

The CHAIRMAN. Is there objection to the request of the gentleman from Oregon?

There was no objection.

Mr. WHITE. I thank the gentleman.

AMENDMENT OFFERED BY MR. GLICKMAN

Mr. GLICKMAN. Mr. Chairman, I offer an amendment.

The Clerk read as follows:

Amendment offered by Mr. GLICKMAN: On page 2, after line 9, add the following: "Notwithstanding any other provision of law, no portion of the United States share of crude oil in Naval Petroleum Reserve Numbered 1 (Elk Hills) may be sold or otherwise disposed of other than the strategic petroleum reserve (either directly or by exchange) during any fiscal year, except as provided in 42 U.S.C. 6240(d)(2) unless—

"(A) the quantity of oil in storage within the strategic petroleum reserve is at least 500,000,000 barrels; or

"(B) acquisition, transportation and injection activities for the reserve are being undertaken for that fiscal year at a level sufficient to assure that crude oil in storage in the strategic petroleum reserve will be increased at an average daily rate at least equal to that amount of crude oil required to be acquired, transported and injected into the strategic petroleum reserve pursuant to 42 U.S.C. 6240(c)(1), as amended, or any other provision of law."

Mr. GLICKMAN (during the reading). Mr. Chairman, I ask unanimous consent that the amendment be considered as read and printed in the RECORD.

The CHAIRMAN. Is there objection to the request of the gentleman from Kansas?

There was no objection.

Mr. GLICKMAN. Mr. Chairman, I raised this question during the general debate, but I think it is important enough to raise it again, and I realize I am bringing the issue for the first time now; so I will abide by the wishes of this Whole House. But it is a serious issue.

Here is basically the issue: The naval petroleum reserve, the Elk Hills Reserve, which is basically owned by the United States of America, is required to be used as a safety net to fill the strategic petroleum reserve, which of course is mandated right now at 100,000 barrels a day, and to the extent that we cannot buy that 100,000 barrels a day from spot market or other sources, the Elk Hills reserves, which produces about 140,000 barrels a day, is available to the strategic petroleum reserve.

That is, if we can only get 70,000 barrels a day to fill our reserve and the spot market, or from wherever else we buy it, we can go to Elk Hills to fill the rest.

In fact, we have been using about 100,000 barrels a day from Elk Hills, I believe, for the SPR.

Now, the Senate is considering mandating a raise in the minimum fill rate from 100,000 barrels a day to 300,000 barrels a day. That is in the McClure-Warner bill, S. 998, which has been reported by the Senate Energy Committee and is soon to be considered in the other body in the full body.

In addition to that, last year, in the Department of the Interior appropriations bill—I do not know exactly what the section number is—but under the section "Strategic Petroleum Reserve," the committee recommends that the President undertake to increase the average annual rate to 300,000 barrels a day.

So what we are saying here is that fill rate on the SPR is going up to 300,000 barrels a day, conceivably, and probably likely, but the safety net of the Elk Hills Naval Reserve is staying at 100,000 barrels a day.

Let me give the Members a hypothetical problem. Let us say that we have more Middle East problems and Kuwait cuts us off, and we are required to go on the spot market to buy oil for the reserve, and let us assume for the moment that we are up to 300,000 barrels a day, which I think we probably will be, and all we can get is 200,000 barrels a day in the spot market, and we need 100,000 barrels a day to fill the SPR.

Under current law, the naval petroleum reserve would not be required to fill even 1 barrel of oil into the SPR because its limit under current law is only activated if less than 100,000 barrels a day is filled in the SPRO. Thus, 105,000 barrels of oil are filled in the SPRO, these spot market purchases, and it is mandated by law to have 300,000 barrels a day, under current law Elk Hills would not serve as a required safety net under the SPRO for even 1 barrel of oil.

And so the purpose of this amendment—it does not change anything in current law other than what it says—is that to the extent that the mandatory fill rate in the SPR is upped, the safety net of the Elk Hills Naval Petroleum Reserve is also upped in order to see that SPR is filled.

Now, the argument has been made, two things. First is that, well, there is only so much that the naval petroleum reserve can produce.

My argument is that the troublesome area of the SPR is the last barrels of oil to be filled, not the first barrels of oil, and knowing that the safety net of the naval petroleum reserve will be there to fill that last 50,000, 60,000, or 70,000 barrels of oil surely must be important for the security of the United States.

Second of all, the argument has been made, well, we are going to start giving a set-aside to national defense, which I think is very important.

But the Energy Security Act right now, in subsection D(2) of the Energy Security Act—and this is in section 42 U.S.C. 6240—it provides that Elk Hills is not required to be used where national defense purposes are indicated pursuant to an authorization of Congress under that section during the preceding 9-month period. And that is in the Energy Security Act of 1980.

I suppose my whole point is this again, and I will not repeat myself: I endorse efforts to increase the fill rate of the strategic petroleum reserve. We do not seek here to make any determination regarding the fill rate. If the fill rate is not changed from current law, then my amendment does not change current law. But if the congressionally mandated fill rate for the strategic petroleum reserve is raised, my amendment makes certain that the present Elk Hills safety net is kept at corresponding levels. Otherwise I think that, with the problems in the Middle East, and increasing the effort we want to provide in the strategic petroleum reserve, we will have a totally illusory reserve.

And so, Mr. Chairman, I offer this amendment for discussion at this time, hoping that the committee will respond to it favorably.

□ 1315

Mr. WHITE. Mr. Chairman, I move to strike the requisite number of words and I rise in opposition to the amendment.

I want to commend the gentleman from Kansas (Mr. GLICKMAN) again, as I did the gentleman from Oregon (Mr. WEAVER) in his desire to insure that we have adequate oil supplies in reserve for any future emergencies that may arise.

I want to point out though that in the gentleman's amendment—and I just obtained a copy of the amendment—it says that—

Notwithstanding any other provision of the law, no portion of the United States crude oil in Naval Petroleum Reserve No. 1, Elk Hills, may be sold or otherwise disposed of to other than the Strategic Petroleum Reserve.

I want to point out that for the very first time, this coming July, the armed services will be able to purchase some of that Elk Hills oil, starting first with 3,500 barrels and going up to something like 35,000 barrels. In other words, under the amendment, the reserve that was intended for the use of the military would be denied for the use of the military. The oil would be going to the strategic petroleum reserve.

We want to fill the strategic reserve, but not at the expense of the military because they have daily operational requirements.

Further than that, as I understand it at present, Elk Hills can produce something in the nature of 170,000 barrels per day. Now the requirement that the gentleman is seeking to fill is something like 300,000 barrels per day. In order to fulfill a commitment that his amendment would mandate, they could find themselves overproducing and if you reach a certain level engineers tell you if you exceed the maximum amount than is conducive to the best operation of that well, you can in fact impede the eventual total production because of loss of pressures and other matters.

So, I would urge the House not to accept this amendment. We will certainly take up this matter before the committee as we have already said that we would do with the amendment of the gentleman from Oregon (Mr. WEAVER) because I think that both matters are highly important.

Mr. GLICKMAN. Mr. Chairman, will the gentleman yield?

Mr. WHITE. I yield to the gentleman from Kansas.

Mr. GLICKMAN. I see that the issue is confusing enough and perhaps not discussed enough in the legislative process. Therefore, I am going to withdraw the amendment, but I would make a couple of points before I do that.

In the first place, this amendment does not require Elk Hills to increase its production one iota. What it basically says is if the SPR is required to increase a maximum fill rate, then whatever is being produced from Elk Hills ought to meet that increased SPR fill rate.

Under current law that is 100,000 barrels a day limit on the Elk Hills safety net that can be used to fill the SPRO if necessary. And if the SPR fill rate authority goes up to 300,000 barrels a day and all the SPR management can find is 240,000 barrels a day on the spot market, under current law you could not get 1 barrel of oil out of Elk Hills, because all Elk Hills is obligated to contribute to the SPR is enough oil to complete the first 100,000 barrels that SPR needs.

My second point would be I would hope the hearings would explore the relationship between the strategic petroleum reserve and national defense purposes as an abstract matter because it is my understanding in reading the legislation that created the strategic petroleum reserve, national defense was the highest priority function in the strategic petroleum reserve.

So, Mr. Chairman, given the assurances of the chairman of this subcommittee that he will approach this issue in hearings, I ask unanimous consent

that I may be able to withdraw the amendment at this time.

The CHAIRMAN. Is there objection to the request of the gentleman from Kansas (Mr. GLICKMAN)?

There was no objection.

Mr. STRATTON. Mr. Chairman, I move to strike the requisite number of words.

Mr. Chairman, I want to rise for just a few moments because as a former chairman of this committee and as a member of the committee and one who was concerned for a long time with the naval petroleum reserve, I think the gentleman from Kansas (Mr. GLICKMAN), as well as the gentleman from Oregon (Mr. WEAVER) do not perhaps fully appreciate the purpose of a naval petroleum reserve. The purpose of the naval petroleum reserve, which goes back many, many years and were long protected by the late Carl Vinson, the distinguished chairman of our committee, was to provide the necessary fuel for the armed services. The idea of a strategic petroleum reserve is a very fine one. It is something that should be done.

But the purpose of the naval petroleum reserve is to provide fuel for the armed services. The amendment that the gentleman from Kansas very wisely withdrew would have tapped virtually all of the oil available out of the only operating naval reserve, not for the purposes of the military, but for the general purposes of the Government itself. Many people say, well, if you have an emergency, obviously the Armed Forces of the United States will be first in line.

But the fact of the matter is that that is not the case. Back in 1973, with the oil embargo, we found that it took an incredible 8 months between the time that the Defense Production Act priority for the military was invoked until the fuel that it required was actually delivered to the installation where it was needed.

So if we listen to the gentleman from Kansas (Mr. GLICKMAN) and put all of this oil into the strategic reserve, we will run into exactly the same problem. There will be all kinds of reasons then why the oil ought to go into this function or that function. I am afraid that is what we are still in the process of doing, but what we should be doing is to keep that oil reserve available specifically and exclusively for the Armed Forces. We should not be pumping that oil out at 100,000 barrels a day or even 130,000 barrels a day.

Our purpose was to bring production at Elk Hills up to its peak, and then to turn off the spigot. Thus the reserve would be sitting there available if a new conflict should arise or a new emergency.

The proposal of the gentleman from Kansas, well intentioned as it is, is in direct contradiction to the basic purpose of these reserves. The gentleman from Oregon (Mr. WEAVER) also, I think, does not fully understand the situation because he says there is a lot of oil available in our public lands and maybe we ought to set those areas apart and not touch them until 30 or 40 years from now.

But a reserve is no good unless it is something you can go to and turn on when the emergency occurs. There may be a lot of water under the ground, but if you do not have a hydrant there and a wrench to turn that hydrant on, there is not going to be any water to put out the fire.

What we need for our armed services is the development of a really vast reserve. That reserve exists today in Alaska in Naval Petroleum Reserve No. 4 which the Congress misguidedly, back in 1976, turned over to the Department of the Interior; and they have not touched it since then.

I sympathize with the gentleman from Oregon (Mr. WEAVER). We ought to have a much greater reserve. But to get Pet-4 in Alaska into being an effective reserve does not mean shunting it aside and letting the flora and fauna flourish on top. Rather it means to put down wells there, get the oil out, and then have the spigot available to be turned on in the event of an emergency.

The CHAIRMAN. The time of the gentleman from New York (Mr. STRATTON) has expired.

(At the request of Mr. GLICKMAN and by unanimous consent, Mr. STRATTON was allowed to proceed for 2 additional minutes.)

Mr. GLICKMAN. Mr. Chairman, will the gentleman yield?

Mr. STRATTON. I yield to the gentleman from Kansas.

Mr. GLICKMAN. Mr. Chairman, my colleague has much more background on the origins of the naval petroleum reserve. I would only reply that for a long time now we have been producing that oil from the naval reserve and selling it to third parties to anybody else who wants it.

Therefore, the oil nor the money from the sales of the oil have not been going in anybody's pocket, not the Army, the Navy, the Air Force, or the Government of the United States. The money has been going into the general treasury. One would hope that money would be used to purchase more oil for the strategic petroleum reserve.

But it is not even doing that. It is just a nice credit balance in the treasury. I suppose that as long as we are producing this oil and selling the oil and not doing what the gentleman wants, I just wanted to make sure it was used to fill the SPR. That was my own purpose.

Mr. STRATTON. I am well aware of what the gentleman says. If the Congress had listened to me and to the Subcommittee on Investigations of the Committee on Armed Services a couple of years ago, that oil would have been going directly to the Department of Defense, and that action would have reduced their fuel bill over at the Pentagon by several billions of dollars.

The gentleman is absolutely correct. The only reason we have been producing oil from Elk Hills in the last couple of years is so that we could get the field up to its maximum capability and then turn it off. In the event of another emergency, God forbid, we would then be able to turn it back on and have that fuel supply available totally for the military.

So, I hope the gentleman will support us in another year or so when we are going to have to make a decision on whether we should set Elk Hills aside from then on exclusively for the military.

Mr. GLICKMAN. I suppose my last point, if the gentleman will yield further, is neither administration, Republican or Democrat, wants to spend the bucks to fill the reserve for SPR, period. So we are being naive to think that we are going to be able to continue to fill it in any meaningful fashion over the next several years. I suppose one of the points I meant to make in the amendment that I withdraw was that while I may agree with the gentleman from New York's rationale on the merits, I feel this may be one of the only ways realistically and financially to fill the SPR.

Mr. STRATTON. The fact of the matter is that we have a SPR in Elk Hills. We do not have to fill it. As long as its oil is ready to come out, we can leave it there until we need it. I think that is the best way to handle it.

Mr. THOMAS. Mr. Chairman, I move to strike the last word.

Mr. Chairman, fully understanding that this amendment has been withdrawn, one of the concerns that I have in this continuing argument over Elk Hills is the assumption that we have an immediately usable strategic petroleum reserve in Elk Hills. The whole purpose of the salt domes in Texas was to be able to extract that oil in a relatively short period of time. At Elk Hills, you simply cannot do that. In addition we have a tremendous amount of drilling going on in Elk Hills and Elk Hills happens to be in my district in California.

One of the things that the sale of the Elk Hills oil has done is to continue to spur additional drilling in the surrounding areas of the Elk Hills, producing a tremendous increase in the quantities of heavy crude. The Elk Hills oil has been used in blending the heavy crude to increase California production. A simple example of that is that currently Kern County, one county in California, produces better than 600,000 barrels of oil a day. This

includes the portion from Elk Hills. If we subtracted the Kern County portion of oil from California, Kern County, that single county, would be No. 3 in the United States in oil production of States, behind only Alaska and Texas.

So, while we certainly ought to be filling the strategic petroleum reserve so that we can extract that oil in a very quick manner and certainly we should be making sure that Elk Hills has the potential to produce whenever we need to, to its maximum capacity, one of the things I think many Members of Congress really ought to do is come out to my district and take a look at the amount of oil that is actually available and the amount of oil that continues to be discovered in the immediate proximity of Elk Hills largely because of the stimulus provided by the Elk Hills oil for blending purposes. So when we consider the picture of what to do with Elk Hills, I urge my colleagues to look at the entire picture in terms of the amount of heavy oil being produced that would not be produced without the benefit of the blending possibilities from the Elk Hills crude.

So when we look at this picture of petroleum, of energy and of the strategic petroleum reserve, we have to also look at it in the terms of Elk Hills' ability to stimulate the production of oil in the surrounding area.

The CHAIRMAN. Are there other amendments to the bill?

If not, under the rule, the Committee rises.

Accordingly the Committee rose; and the Speaker pro tempore (Mr. WEISS) having assumed the Chair, Mr. PEYSER, Chairman of the Committee of the Whole House on the State of the Union, reported that that Committee, having had under consideration the bill (H.R. 3023) to authorize appropriations to the Department of Energy for fiscal year 1982 for conservation, exploration, development, production, sale, and use of the naval petroleum reserves and naval oil shale reserves, pursuant to House Resolution 156, he reported the bill back to the House.

The SPEAKER pro tempore. Under the rule, the previous question is ordered.

The bill was ordered to be engrossed and read a third time, was read the third time, and passed, and a motion to reconsider was laid on the table.

□ 1330

GENERAL LEAVE

Mr. WHITE. Mr. Speaker, I ask unanimous consent that all Members may have 5 legislative days within which to revise and extend their remarks and to include extraneous matter on the bill just passed.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from Texas?

There was no objection.

PERMISSION FOR COMMITTEE ON ARMED SERVICES TO HAVE UNTIL MIDNIGHT TOMORROW TO FILE REPORT ON H.R. 3454, INTELLIGENCE AUTHORIZATION ACT FOR FISCAL YEAR 1982

Mr. WHITE. Mr. Speaker, I ask unanimous consent that the Committee on Armed Services may have until midnight, Friday, June 12, 1981, to file a report on the bill (H.R. 3454) intelligence authorization, 1982.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from Texas?

There was no objection.

DEPARTMENT OF ENERGY SECURITY AND MILITARY APPLICATIONS OF NUCLEAR ENERGY AUTHORIZATION ACT OF 1982

Mr. STRATTON. Mr. Speaker, I move that the House resolve itself into the Committee of the Whole House on the State of the Union for the consideration of the bill (H.R. 3413) to authorize appropriations for the Department of Energy for national security programs for fiscal year 1982, and for other purposes.

The SPEAKER pro tempore. The question is on the motion offered by the gentleman from New York (Mr. STRATTON).

The motion was agreed to.

The SPEAKER pro tempore. The Chair designates the gentleman from West Virginia (Mr. RAHALL) as Chairman of the Committee of the Whole, and requests the gentleman from Connecticut (Mr. RATCHFORD) to assume the Chair temporarily.

IN THE COMMITTEE OF THE WHOLE

Accordingly the House resolved itself into the Committee of the Whole House on the State of the Union for the consideration of the bill, H.R. 3413, with Mr. RATCHFORD, Chairman pro tempore, in the Chair.

The Clerk read the title of the bill.

The CHAIRMAN pro tempore. Pursuant to the rule, the first reading of the bill is dispensed with.

Under the rule, the gentleman from New York (Mr. STRATTON) will be recognized for 30 minutes, and the gentlewoman from Maryland (Mrs. HOLT) will be recognized for 30 minutes.

The Chair recognizes the gentleman from New York (Mr. STRATTON).

Mr. STRATTON. Mr. Chairman, I yield myself such time as I may consume.

Mr. Chairman, this bill, H.R. 3413, is the annual appropriation authorization bill for the defense program of the Department of Energy. While the total authorizations in the bill are but 2 percent of the total amount requested for defense in fiscal year 1982, and also represent a much smaller percentage of the gross national product, this bill is, of course, of tremendous importance to our national defense and security because, without the annual appropriations authorized by bills such as this, the strategic and tactical nuclear deterrent forces of the United States would soon disappear; important research work would be discontinued; and the radioactive wastes resulting from previous defense efforts could not continue to be effectively managed.

I can assure all the Members that, like other Members of this House, I truly wish that this bill were unnecessary. I wish that this world was as it should be and not as it actually is, and I wish that the safety of the United States could in fact be entrusted in these dangerous days to quiet diplomacy and the concept of the Golden Rule as many well-intentioned people feel that it should be, but realistically we know this is not the case.

It is true, Mr. Chairman, that the Soviet Union for more than a decade has been building up the largest peacetime nuclear and conventional military forces in modern times. This buildup, which is much greater than that needed for Soviet defenses, and which incidentally exceeds in overall destructive capacity the nuclear forces of the United States, has not been influenced in the slightest degree by détente or by restraint on the part of the United States.

As my good friend, the former Secretary of Defense, Harold Brown, used to say—although I did not always agree with everything he said—"We build and they build; we show restraint, they build."

So, whether we like it or not, the conventional weapons advantage shifted in favor of the Soviet Union some time ago, and if it has not already occurred—and I believe it has occurred—the nuclear advantage is also shifting to the Soviets. These are the facts as today's world exists.

Another fact of today's world is the reality that creeping Soviet adventurism shows a tendency now toward galloping adventurism. Whether this is due to a perception of American military weakness, which many feel has been the case, or of a failure of American will to protect our interests and those of our allies, neither perception must be allowed to persist.

So this bill, along with fiscal year 1982 defense authorization bill, H.R. 3519, will, I am convinced, begin a slow and tedious but effective defense recovery effort by the United States recommended by both President Carter and President Reagan.

At this point I would like to commend the ranking minority member of our Subcommittee on Procurement and Military Nuclear Systems, Mrs. HOLT, and all of the other members of the committee who have worked so diligently on this bill, who so faithfully have attended the hearings on H.R. 3415, and who, although they did not always support the chairman, did at least work together to be able to report out a bill that had broad bipartisan support, and which the Armed Services Committee supported by the unprecedented vote of 39 to 2.

The subcommittee, Mr. Chairman, recommends a total authorization of $5,064.55 million, which is $68.15 million above the request of $4,996.4 million from the administration.

Running quickly through some of the details of the legislation, section 101 would authorize $3.8 billion in appropriations for operating expenses, an increase of $55.9 million. The plant and capital equipment request in section 102 was increased by $12.25 million to $1.3 billion.

The other major categories are for naval reactors development—that is Admiral Rickover's program that we all subscribe to, of course; defense inertial confinement fusion; weapons activities, and that of course is the guts of the program; verification and control technology; defense nuclear materials production; management of defense materials byproducts; defense nuclear materials safeguards and security; and finally, security investigations.

For two of these programs, security investigations and verification and control technology, the committee recommends no changes from the Department request.

Now, let me touch on the other items where we have made changes. The request that came from Admiral Rickover in connection with the naval reactors contained $15 million to start architectural-engineering design, site preparation, and long leadtime item purchases for a new Government facility to be a second source of nuclear fuel for the reactors used in the naval nuclear propulsion systems. This work is now being done by a commercial plant, but Admiral Rickover felt that it was imperative that we have a second source because, with the increasing size of our nuclear Navy, if by any chance this single source were to be eliminated temporarily, the naval nuclear program could be very seriously damaged. So, the committee agreed with the admiral that this is worth looking into. We reduced the amount to $3 million, which will allow initiation of architect-engineering studies, and also a study that will demonstrate the need more specifically for a second source and also come up with the estimated total cost of that facility.

Current estimates range from $100 million to over $300 million, and our committee wisely felt that before we get going down the road on some expenditure that could cost $300 million, we had better know darn well what it is going to be and why we need it.

Congress has also for many years given a great deal of support to the inertial confinement fusion program. We have appropriated more than $1.2 billion over the past 4 years for this program, which offers a significant opportunity of a new energy source, and also for dramatic improvements in the development of nuclear weapons. Three major laboratory systems are now nearing completion in this program. Until these systems are completed and the experiments conducted, there is going to be no precise way to measure the contributions that this program can make to our nuclear weapons program or to our energy supply.

The Department requested only $106 million for inertial confinement fusion this year, which incidentally is $34 million below fiscal year 1981 appropriations for this very important and dramatic program, and almost $51 million below the funding needed just to maintain the current level of effort in fiscal year 1982. The sum of $106 million would almost appear to be a guarantee of a failure of a program that has a really remarkable prospect for the future, so the committee has recommended that $50.6 million—a very small sum as Washington goes—be added to the request to permit an orderly continuation of the research and development programs on glass and gas lasers, and also particle beam fusion systems. The committee knows of no reason why these established programs should not be funded to completion so that the full-scale experiments can be undertaken.

In the field of weapons activities, the committee recommends that operating expenses for weapons research and development be increased by $4 million to $590 million, a very modest increase, which would permit additional operating time of a weapons neutron facility at the Los Alamos National Laboratory, and also permit initiation of a study on the feasibility of installing a power reactor at the Los Alamos National Laboratory to provide electricity for the laboratory and for other Federal facilities in the area; and incidentally also to provide tritium as a byproduct for the weapons program.

The plant and capital equipment request for research and development and testing is recommended for an increase of $60 million, which would allow a start on the replacement of old structures that would require very large expenditures to maintain; refurbishing of obsolete laboratories, and replacement of data-recording equipment at the Nevada weapons test site. These, incidentally, were strongly recommended by Dr. Teller, the distinguished and revered father of the H-bomb.

Deferrals totaling $72 million are recommended in the request for additional production facilities for the MX and cruise missile warheads. Certain problems and uncertainties are associated with both programs, and additional authorization in fiscal year 1983 will provide ample time to complete these manufacturing and assembly facilities as they are needed for the two systems, assuming the problems and uncertainties are resolved. They just have not gotten their act together yet in the Department of Defense as to what warheads they really want to use.

With respect to defense nuclear materials, we are recommending an increase of $8.2 million in operating expenses, and $21.2 million for construction, which would be used to advance the special isotopes separation program to the demonstration phase.

□ 1345

This program can alleviate a possible critical shortage of plutonium which has been forecast for the post-1985 period. The isotopes separation program could be the fastest and most economical way to prevent that shortage.

With regard to nuclear byproducts, the total dollar changes recommended by our commitee for this program are small—the addition of $100,000 to operating expenses and $15 million for plant and capital equipment—but the consequences of the program changes are of significance.

The committee recommends $10 million for an increase in funding for the defense waste processing facility at the Savannah River plant to keep it on schedule, and $6.2 million was cut out of the program for decontamination and decommissioning to delay the initiation of a multibillion dollar cleanup program that may well be based upon unrealistic regulatory standards.

Incidentally, the subcommittee hearings on this matter, which I understand are of concern to several Members of the House, will be begun in a few days. There is no point in our embarking on a big decontamination and cleanup program until we know, first of all, exactly what the threat is and exactly what the costs might be, because they could run into the billions of dollars.

A program is recommended also to provide a method to use nuclear materials—a byproduct of nuclear materials, namely, radioactive cesium—to irradiate, disinfect, and sterilize such diverse materials as sewage sludge and citrus fruits.

Another byproduct, palladium, can be used in automobile catalytic converters and in petroleum plants as a catalyst for converting oil to gasoline and other products. These materials are now classified as radioactive wastes, but they can, as I pointed out, do an important job, particularly in making sewage sludge more desirable for those areas that have to receive it.

Finally, an additional $1.3 million is recommended for the waste isolation pilot plant project operating expenses to keep them in reasonable balance with the requested construction funds. This, I think, is an enormously important program, because it represents a significant step forward in the direction of doing something about collecting our nuclear waste products, transporting them to where they should be buried, and getting them buried. We have waited all too long to undertake that responsibility, which is technologically doable but which up until now nobody has wanted to undertake because of the responsibility of it.

With respect to safeguards and security for defense nuclear materials, the committee believes that this program has too long been heavily oriented toward long-term research on nuclear materials accounting and too little concerned with existing standards and security problems at DOE installations like Los Alamos, for example. So we have reduced this program by $7 million, which would require the termination of the least useful of these theoretical programs, and also the reduction of foreign and domestic travel in support of these programs. We found that some of the individuals involved were traveling so much that they were not available for security assignments in their own bailiwick.

Mr. Chairman, there are 11 general provisions contained in title II of the bill. The first nine of these are administrative provisions requested by the administration, and the committee is recommending two additional provisions—sections 210 and 211.

Section 210 would amend the Atomic Energy Act in order to clarify the arrest authority of persons authorized to carry firearms under that act. Since most of the security functions at the Department of Energy's nuclear installations are performed by contractor personnel, the Department believes that there ought to be a clear and unambiguous authority for those persons to make arrests without a warrant for apparent criminal violations of the Atomic Energy Act—if they cannot make any arrests, they are not doing much good on that job—for other Federal criminal offenses committed in their presence, for which they could also make arrests, and for felonies recognized by the laws of the United States.

Section 211 is one on which I anticipate there will be some discussion, and I may want to expand on this at a later time. It prohibits the obligation or expenditure of appropriations authorized in this bill for the purpose of preparing an environmental impact statement at a nuclear weapons plant near Amarillo, Tex., and at all other Department of Energy defense facilities unless such statements are required by statute. There is a great deal of concern within the Department of Energy and among those of us who are supportive of the nuclear program that several vital programs to our national defense—the MX, the Trident warhead, and these other programs—may be unduly delayed by legal harassment on environmental grounds.

If there is going to be any delay in these programs, the brave attempt of the Reagan administration to try to catch up with the Soviets and to close the gap between us in military power can be delayed, and I cannot think of anything that would be more damaging to the security of our country.

The chairman of the committee received a letter from the chairman of the Appropriations Subcommittee on Energy and Water Development the other day expressing his concern about the fact that the Department of Energy is spending large amounts of money in preparing environmental impact statements for public relations purposes when those statements are not actually required by statute. Let me read that letter to the committee before I conclude my statement. This was addressed by Chairman BEVILL of the Subcommittee on Energy and Water Development on May 5, 1981, the Hon. James Edwards, Secretary of the Department of Energy:

DEAR MR. SECRETARY: I learned yesterday—via the Washington Post—

Which is a source that most of us learn things from first—

of the Department of Energy's plan to prepare an environmental impact statement for its operations in assembling nuclear weapons at the Pantex plant near Amarillo, Tex. According to the Post, this extensive process would include both classified and unclassified meetings with various parties, including discussion with several groups opposed to nuclear weapons production.

I am at a loss to understand the Department's rationale for this effort. Pantex has been in operation since early in the 1950's. We have funded some upgrading of the facility and some expansion of capacity, but I am unaware of any major modification in its role in the weapons complex which would require an environmental impact statement under NEPA.

It appears to me that the balance between "doers" and "watchers" at DOE may need further review. Could I have your comments at an early date?

This was sent to me and to the chairman of the full committee, and, of course, we recognize that trying to prevent this kind of thing could not be done in an appropriation bill since traditionally—although it is a tradition that is frequently honored in the breach rather than the observance—appropriation bills cannot contain legislation, and we realized that if there was anything to be done by the doers, it would have to be done by our subcommittee and by our full committee. Therefore, section 211 has been placed in the bill to prevent the kind of delay and harassment that would be represented in what is an extremely vital assembly plant for nuclear weapons at Amarillo, Tex. That is the purpose of the section, to keep people working there without the interference and delays and even the possibility, as the DOE statement indicated, of an entire transfer of that facility to a location in Burlington, Iowa.

Mr. Chairman, I will include in the RECORD also the letter from Chairman BEVILL of the Subcommittee on Energy and Water Development to me, dated May 5, 1981, as follows:

MAY 5, 1981.

Hon. SAMUEL S. STRATTON,
Chairman, Subcommittee on Procurement and Military Nuclear Systems, Committee on Armed Services, 2120 RHOB, Washington, D.C.

DEAR MR. CHAIRMAN: Attached is a letter I have sent to Secretary Edwards regarding the Department's plans to prepare an Environmental Impact Statement for its operations at the Pantex plant near Amarillo, Texas.

Since the final resolution of such activity could affect several ongoing projects now underway at Pantex, and those proposed for fiscal year 1982, I would hope that your committee could consider this matter in connection with the fiscal year 1982 authorizing legislation for the Department.

Sincerely,

TOM BEVILL,
Chairman, Subcommittee on Energy and Water Development.

Mr. HIGHTOWER. Mr. Chairman, will the gentleman yield?

Mr. STRATTON. I would be very glad to yield to my friend, the gentleman from Texas.

Mr. HIGHTOWER. Mr. Chairman, I thank the gentleman for yielding.

The gentleman just read a few minutes ago a letter that expressed some concern about the information that might become available that would be classified. Is that part of the gentleman's concern, I will ask the gentleman from New York (Mr. STRATTON)?

Mr. STRATTON. Well, this is the concern that the gentleman from Alabama (Mr. BEVILL) indicated.

Mr. HIGHTOWER. I wanted to point out that there are procedures that protect classified information in institutions like this. I am reading from the Code of Federal Regulations, section 1507.3(c), as follows:

Agency procedures may include specific criteria for providing limited exceptions to the provisions of these regulations for classified proposals. They are proposed actions which are specifically authorized under criteria established by an Executive order or statute to be kept secret in the interest of national defense or foreign policy and are in

fact properly classified pursuant to such Executive order or statute * * * environmental impact statements which address classified proposals may be safeguarded and restricted from public dissemination in accordance with the agency's own regulations applicable to classified information.

So I wanted to put the gentleman's mind at ease, if that was part of the concern that prompted this amendment.

Mr. STRATTON. Mr. Chairman, I appreciate the gentleman's statement. I do not think it was that primarily which precipitated our concern, although I think, as often happens in these matters, there may be a slip between the cup and the lip and the regulations may provide for certain restrictions, but when we have got a lot of people milling around expressing their disapproval of nuclear weaponry, anything could happen.

What concerned us was the fact that this environmental impact statement, as described in the Washington Post and in the Federal Register, by the Department of Energy could involve a shutdown of the Pantex plant at the very time when we need its capabilities to meet the increased need of the MX and the Trident and all these new nuclear developments that we are forced to proceed with to catch up with the Soviet Union.

Mr. HIGHTOWER. Mr. Chairman, if I may, I would like to comment later on my own time on that subject, but to make it perfectly clear, as the gentleman is wont to do, I am very much for the facility at Amarillo. We are very proud to have it there. We want to do everything we can to make it a strong agency of the Department of Energy and to carry out its mission in the production of atomic weaponry.

So our difference of opinion is not based on any philosophical idea of mine as being opposed to nuclear weapons, because I am very much pronuclear, but it is out of the same concern and desire for the quick, efficient, productive operation there that I am going to oppose this particular action.

Mr. STRATTON. Mr. Chairman, I thank the gentleman from Texas (Mr. HIGHTOWER).

□ 1400

Mrs. HOLT. Mr. Chairman, I yield myself such time as I may consume.

Mr. Chairman, I want to commend my subcommittee chairman, Mr. STRATTON, for his leadership in the development of H.R. 3413, and I associate myself with his remarks. As Chairman STRATTON stated, this is a bipartisan bill and is of much greater importance than the amount of authorizations might indicate.

I also want to commend the members of the Subcommittee on Procurement and Military Nuclear Systems for their faithful attendance and many contributions during the work up of H.R. 3413. I believe that the bill represents a considerable improvement over the request.

Mr. Chairman, while I commend the Reagan administration for the general thrust of the budget request for DOE defense programs, I agree that there were a few discrepancies. This is particularly true with respect to the inertial confinement fusion research program. In all three of the nuclear weapons research laboratories—in Sandia and Los Alamos in New Mexico and in Livermore, Calif.—the research is most impressive, and I believe that it would be the shame of modern times to fail to fund these research efforts. I support the recommended increase of $50 million above the request for this program. This addition is required just to stay even with inflation.

As Chairman STRATTON has pointed out, it is this bill that provides the "teeth" for the "tail" contained in the DOD authorization bill. Without the authorization carried by this bill, the MX, cruise missile, Trident, and other strategic and tactical weapons requested by both Presidents Reagan and Carter would be useless.

This bill includes several modest, but important initiatives, while supporting the President's request. The committee has recommended increases for special nuclear materials supply programs, modernization of laboratory facilities, for terminal waste storage programs, and for waste processing facilities. We are determined to push ahead with an environmentally sound radioactive waste management program. Our efforts can also be the precursor to the solution to the commercial waste disposal program.

Another committee initiative, Mr. Chairman, would encourage the Department of Energy to look into the development of ways to beneficially use radioactive materials that are now classified as wastes. I am sure that we all remember the days when useful products such as sawdust, metal filings, and even used oil, were thrown away as waste products. This is no longer the case.

Useful products are contained in so-called radioactive wastes that can contribute to the economy and welfare. Sewage sludge can be rendered harmless. Fruits and vegetables, meats and other products can be preserved against insects and bacteria. The modest increases recommended by this bill can make a beginning on these programs while providing the potential of hundreds of millions in savings on the treatment and disposal of defense nuclear wastes.

This year the committee also recommends an increased authorization for the special isotopes separation program to advance the experimental programs at Los Alamos and Lawrence Livermore National Laboratories to the pilot plant stage. Both programs now appear promising. While the specifics of the special isotopes separation program are classified, I will state that the committee believes that these programs have the potential to save billions of dollars over the years.

The last item I would mention is the reduction the committee recommends in the so-called decontamination program. Efforts have been started to clean up or remove uranium ore residue piles under the assumption that the low levels of residual radiation in the piles may pose a threat to public health. In the 70 years or so that some of these piles have existed in the United States, there is no evidence that any person has developed any disease because of proximity to such piles.

The GAO, in a January 1981 report to the Congress, pointed out the difficulties and uncertainties in assessing risks from sources of low-level radiation. The GAO stated that: "The uncertainties in this area pose particular problems for Federal agencies in deciding how to best spend limited research dollars." The committee has not received adequate justification for this program, nor have we received adequate cost estimates. Our subcommittee will begin hearings on this subject this month.

In my opinion, Mr. Chairman, H.R. 3413 was carefully drafted to provide appropriate authorization and administrative authority to the Department of Energy to utilize most effectively the $5 billion recommended for authorization.

I join the chairman in his recommendation for the passage of this bill without amendment.

Mr. Chairman, I yield 5 minutes to the gentleman from California (Mr. HUNTER).

Mr. HUNTER. Mr. Chairman, I rise to support and applaud the statements of my chairman and of the ranking minority member.

I think it is important to know that while we were marking up this bill, we were facing a situation in which our strategic testing level was roughly 60 percent of what it was in 1969. We are faced with a very large backlog of construction requirements and a severe deficiency in equipment support.

Our committee recognized this year that our R.D.T. & E. of nuclear weapons in many cases is being carried out with 1950's equipment. I am referring to the oscilloscopes, the cranes, the computers that were utilized not only in Los Alamos and Livermore, but also at the Nevada testing facility. Because of the increased spending, we are going to be able to replace these oscilloscopes, cranes, and computers. We are going to be able to make some headway with the facilities that we desperately need at Los Alamos and at Livermore. I am speaking of the tri-

tium facility, the high explosive facility for Livermore and several others.

I think that it is important to know that the nuclear research and development program that we are undertaking right now is going to be the cornerstone of America's strategic deterrent in the 1980's.

In my estimation, the expenditures contained in this bill are absolutely critical to the security of this Nation.

Mr. STRATTON. Mr. Chairman, I yield 2 minutes to the distinguished gentleman from South Carolina (Mr. DERRICK).

Mr. DERRICK. Mr. Chairman, I rise in support of H.R. 3413, the Department of Energy Security and Military Applications of Nuclear Energy Authorization Act of 1981 and commend the chairman and members of the Armed Services Committee for their excellent work in drafting this proposed legislation.

This bill goes a long way toward improving our Nation's military capabilities, particularly relating to the research and development, testing and production of nuclear weapons for the U.S. Armed Forces.

I particularly am pleased to see that the committee has recommended the funding of $20 million for the defense waste processing facility for the Savannah River Plant in Aiken, S.C., which I am privileged to represent. These funds will allow for construction design activities to take place in advance of what I hope will be a fiscal 1983 authorization for construction of a facility to solidify the 20 million gallons of high level radioactive waste presently stored in tanks at the plant, as well as future waste that will be generated. With the construction of this waste processing facility, we will have taken the first major step toward the disposal of the waste which will ultimately be placed in a permanent repository.

The committee should also be commended for the inclusion of funds for the upgrading of the "L" reactor at the Savannah River Plant. With the ultimate restarting of this reactor expected to take place in 2½ years, the delivery of nuclear weapons will be able to remain on schedule.

Also, as the members of the Armed Services Committee have recognized, the Savannah River Plant is an aging facility and funding has been made available in recent years to upgrade the plant and equipment. The bill before the House today provides for continued efforts in this regard, and I feel this is necessary and prudent action.

Mr. Chairman, at the time that the Federal Government announced its decision to locate the Savannah River Plant in Aiken, S.C., then-U.S. Senator Olin Johnston stated:

> The location of this plant in South Carolina will mean my people will have an opportunity to contribute even more to the defense of our nation. And I am sure South Carolinians will cherish this opportunity.

Today, 30 years after that announcement, I believe South Carolinians are still willing to help our Nation meet its military obligations.

With passage of H.R. 3413, I believe that we can make great strides toward the improvement of our military capabilities, and I would urge my colleagues to support this measure.

Mrs. HOLT. Mr. Chairman, I yield 5 minutes to the gentlewoman from Colorado (Mrs. SCHROEDER).

Mrs. SCHROEDER. Mr. Chairman, I thank the gentlewoman from Maryland for yielding.

I take this time to have a discussion with the subcommittee.

I chair the Civil Service Subcommittee and was very, very interested in the hearings that this subcommittee held in January of this year out in New Mexico about the problem faced by the security guards at the Los Alamos facility.

I can find nothing in the bill about the contracting out of the guard function at Los Alamos, which was the subject of Chairman PRICE's letter of the hearings.

I must say that I am terribly concerned. We have had many concerned people come to our office talking about this. As you know, the guards have always been Federal employees. A couple years ago the President decided the guard function was so crucial that a Government union could not represent them. There is no longer a Government union representing the guards.

Then, as you know, OMB through its wonderful circular A-76 decided that these would be the boys they were going to contract out.

Now, this I think is absolutely shocking. I think the chairman's letter, which is on page 55 of the report, proves that out. Chairman PRICE wrote to the Secretary of Energy saying that he really wondered why we were contracting out these very, very vital jobs. This is our most important nuclear facility. There are over 40,000 acres of very rough terrain.

We really have no control over contracted out employees. I can tell you that as the chair of the Civil Service Committee. We have been through this over and over again. All the Government can do when the contract comes up next time is try and get a better deal.

I remind you also in that report there are some very interesting things about what happened with the security guards at the National Aeronautics and Space Administration. Those, too, were contracted out and they have now been called the highest paid rent-a-cops in the country. As you know, their union threatened to call a strike which could have stopped the Space Shuttle last spring.

Now, as you know, this new group that they will be contracting out to at Los Alamos are also unionized. They will be able to strike, becuase they will not be considered Federal employees. They will be contract employees, of course.

So I wonder if the subcommittee chairman looked into this issue. I know the gentlewoman from Maryland looked into it very intently. Is there any way you can get language in this bill to stop this kind of contracting out of some of the most vital services the Federal Government has?

Mr. STRATTON. Well, if the gentlewoman will yield, I am certainly delighted that she shares our concern; and no one is more concerned about this matter than I am. In fact, our subcommittee did look into it very closely. I do not think that it is any surprise that the problem in this particular case is the same problem that we have usually encountered—The Director of the Office of Management and Budget, our beloved former colleague, Mr. Stockman. In order to get the Federal employees to carry out the necessary and extremely vital security functions at our laboratories, Los Alamos and elsewhere, we would have to increase the number of Government employees and Mr. Stockman, with his plenipotentiary powers has declined to provide us with that authority. We are reduced to using the contract employees, as the gentlewoman indicates, and that is the reason that we wanted them at least to have the authority to arrest people for crimes against the United States.

Mrs. SCHROEDER. But we know that those authorities will do absolutely no good if they should decide to strike. There is little we can do until that contract comes up for renewal.

I would hope that the subcommittee would offer an amendment prohibiting this. I think it is time we tell the Director of OMB that there are a lot of other Federal jobs we could contract out before the most important security guards in the whole country. We could contract out OMB, as far as I am concerned, and it would not be as much of a problem as this could possibly be.

I think it is really sad that we have not done something besides just expressing our concern. It begins to sound like the churchwomen's group. We really should write some legislation, I think.

Mr. STRATTON. Well, the gentlewoman is more knowledgeable in that field than I am; but I would hope perhaps that she could use her persuasive powers on our former colleague.

Mrs. SCHROEDER. Well, all I can say, the one way to do it is to legislate, saying that they cannot spend funds

for this, like we have done in other bills. I would hope somebody would write that amendment and offer it.

Mrs. HOLT. Mr. Chairman, I yield 1 further minute to the gentlewoman and ask her to yield to me.

Mrs. SCHROEDER. I would be delighted to yield.

Mrs. HOLT. I think that the problem is the OMB Circular A-76 provision that we are caught in. We fought very hard. We did take a delegation out to Los Alamos and argue it. We took testimony on the subject.

I am convinced that this is one of the most serious mistakes that we have ever made. I certainly will continue my efforts to turn it around; but I think we are caught in that provision of the OMB circular where they can show that contracting out will be more cost effective.

Mrs. SCHROEDER. Well, I think the problem is they can only show it for the short term.

The other side of A-76 is that it does not say they have to contract out these functions. It says that you should not contract things out that would jeopardize national security.

Mrs. HOLT. Well, I certainly agreed.

Mrs. SCHROEDER. I think both of us would think this would be the one thing that could really jeopardize national security, not because we like the way the world is now, but because of the way the world is.

Mrs. HOLT. Well, if the gentlewoman would yield further, the minority members of the committee agree with the gentlewoman wholeheartedly. We will continue our efforts to turn this around.

A letter contract is let now, as I understand it, but we can continue our efforts to change it.

Mrs. SCHROEDER. I thank the gentlewoman.

Mr. STRATTON. Mr. Chairman, I yield myself such time as I may consume.

Let me just say, in addition to what the gentlewoman from Maryland has said, it is our understanding that the entire New Mexico delegation of Members of Congress and Senators, all of the same party as the Director of OMB, went to him on exactly the same basis and he still declined to yield; so as I say, I think perhaps the combined efforts of the gentlewoman from Maryland and the gentlewoman from Colorado are about all that the House has left.

Mr. Chairman, I have no more requests for time. I yield back the balance of my time.

Mrs. HOLT. Mr. Chairman, I yield back the balance of my time.

□ 1415

The CHAIRMAN. All time having expired, pursuant to the rule, the Clerk will now read the bill by titles.

The Clerk read as follows:

H.R. 3413

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled, That this Act may be cited as the "Department of Energy National Security and Military Applications of Nuclear Energy Authorization Act of 1982".

TITLE I—NATIONAL SECURITY PROGRAMS

OPERATING EXPENSES

SEC. 101. Funds are hereby authorized to be appropriated to the Department of Energy for fiscal year 1982 for operating expenses incurred in carrying out national security programs (including scientific research and development in support of the armed services, strategic and critical materials necessary for the common defense, and military applications of nuclear energy and related management and support activities) as follows:

(1) For the naval reactors development program, $279,500,000, including $9,500,000 for program management.

(2) For the defense inertial confinement fusion progam, $156,600,000 to be allocated as follows:

(A) For glass laser experiments, $82,100,000.

(B) For gas laser experiments, $42,800,000.

(C) For pulsed power experiments, $18,400,000.

(D) For supporting research and experiments, $12,000,000, none of which may be used for the research, development, or demonstration of the use of heavy ion devices as drivers for defense inertial confinement fusion experiments and defense inertial confinement fusion systems.

(E) For program management, $1,300,000.

(3) For Weapons activities, $2,352,300,000, to be allocated as follows:

(A) For research and development, $590,100,000.

(B) For weapons testing, $369,000,000.

(C) For production and surveillance, $1,351,800,000.

(D) For program management, $41,400,000.

(4) For verification and control technology, $48,900,000, including $1,800,000 for program management.

(5) For defense nuclear materials production, $624,400,000, to be allocated as follows:

(A) For production reactor operations, $280,630,000.

(B) For processing of defense nuclear materials, $148,650,000.

(C) For special isotopes separations research, $30,000,000.

(D) For supporting services, $163,320,000.

(E) For program management, $1,800,000.

(6) For defense nuclear materials byproducts management, $262,128,000, to be allocated as follows:

(A) For interim waste management, $181,084,000.

(B) For long-term waste management technology, $59,400,000.

(C) For byproducts beneficial uses, $5,000,000.

(D) For terminal waste storage, $5,000,000.

(E) For decontamination and decommissioning, $4,000,000.

(F) For transportation research and development, $6,067,000.

(G) For program management, $1,577,000.

(7) For nuclear materials security and safeguards technology development program (defense programs), $37,300,000, including $1,985,000 for program management.

(8) For security investigations, $23,600,000.

PLANT AND CAPITAL EQUIPMENT

SEC. 102. Funds are hereby authorized to be appropriated to the Department of Energy for fiscal year 1982 for plant and capital equipment (including planning, construction, acquisition and modification of facilities, land acquisition related thereto, and acquisition and fabrication of capital equipment not related to construction) necessary for national security programs, as follows:

(1) For naval reactors development:

Project 82-N-100, general plant projects, various locations, $4,000,000.

Project 82-N-111, naval fuels processing facility, Savannah River Plant, South Carolina, (A-E only), $3,000,000.

(2) For weapons activities:

Project 82-D-100, general plant projects, various locations (research, development, and testing), $25,800,000.

Project 82-D-103, general plant projects, various locations (production and surveillance), $16,300,000.

Project 82-D-104, new weapons production installations, various locations, $5,000,000.

Project 82-D-106, weapon assembly facilities, Pantex Plant, Texas, $23,500,000.

Project 82-D-107, utilities and equipment restoration, replacement and upgrade, Phase III, various locations, $87,500,000.

Project 82-D-108, nuclear weapons stockpile improvements, various locations, $15,000,000.

Project 82-D-109, 155-millimeter artillery-fired atomic projectile, varius locations, $35,000,000.

Project 82-D-110, exhaust plenum modifications, Rocky Flats Plant, Colorado, $12,000,000.

Project 82-D-111, interactive graphics system, Bendix Plant, Missouri, $9,000,000.

Project 82-D-142, North Las Vegas Atlas facility, Nevada, $3,600,000.

Project 82-D-144, simulation technology laboratory, Sandia National Laboratories, New Mexico (AE only), $1,200,000.

Project 82-D-146, weapons production and support facilities, various locations, $8,000,000.

Project 82-D-147, pressure test facility, Savannah River Plant, South Carolina, $3,500,000.

Project 82-D-150, weapons material research and development facility, Lawrence Livermore National Laboratory, California, $5,000,000.

Project 82-D-151, high explosives applications facility, Lawrence Livermore National Laboratory, California, $10,000,000.

Project 82-D-152, new detonator facility, Los Alamos National Laboratory, New Mexico, $8,000,000.

Project 82-D-153, tritium facility, Los Alamos National Laboratory, New Mexico, $5,000,000.

Project 82-D-154, weapons laboratory building, Sandia National Laboratory, Livermore, California, $7,000,000.

Project 81-D-106, weaponization facilities, Lawrence Livermore National Laboratory, California, $1,000,000.

Project 81-D-108, reactor support facilities, Sandia National Laboratories, New Mexico, $1,000,000.

Project 81-D-115, MX warhead production facilites, various locations, $30,000,000.

Project 81-D-116, utilities and equipment restoration, replacement and upgrade, various locations, $10,000,000.

Project 81-D-120, control of effluents and pollutants, Y-12 Plant, Tennessee, $3,400,000.

Project 81-D-133, earthquake damage restoration, Lawrence Livermore National Laboratory, California, $6,300,000.

Project 81-D-134, earthquake damage restoration, Sandia National Laboratories, California, $1,700,000.

Project 79-7-o, universal pilot plant Pantex Plant, Texas, $5,200,000.

Project 78-16-a, cruise missile production facilities, various locations, $44,000,000.

Project 78-17-d, steam plant improvements, Y-12 Plant, Tennessee, $1,500,000.

Project 78-17-e, high explosives machining, Pantex Plant, Texas, $5,600,000.

Project 77-11-c, 8-inch artillery-fired atomic projectile production, $3,600,000.

(3) For defense nuclear materials production:

Project 82-D-116, general plant projects, various locations, $23,000,000.

Project 82-D-117, plant engineering and design, various locations, $3,000,000.

Project 82-D-118, N-reactor plant security, Richland, Washington, $4,000,000.

Project 82-D-124, restoration of production capabilities, various locations, $126,000,000.

Project 82-D-126, reactor safety and reliability, various locations, $42,900,000.

Project 82-D-127, safeguards improvements, Savannah River Plant, South Carolina, $34,600,000.

Project 82-D-128, plant perimeter security systems upgrade, Idaho Fuels Processing Facility, Idaho National Engineering Laboratory, Idaho, $4,400,000.

Project 82-D-136, fuel processing facilities upgrade, Idaho Fuels Processing Facility, Idaho National Engineering Laboratory, Idaho, $40,000,000.

Project 81-D-126, pollution abatement facilities, Richland, Washington, $4,300,000.

Project 81-D-128, restoration of production capabilities, various locations, $14,400,000.

Project 81-D-142, steam transfer headers, Savannah River Plant, South Carolina, $1,000,000.

Project 81-D-143, L-reactor upgrade, Savannah River Plant, South Carolina, $66,000,000.

Project 81-T-502, advanced isotopes separation laboratory, Lawrence Livermore National Laboratory, California, $21,200,000.

Project 80-AE-3, steam generation facilities, Idaho Fuels Processing Facility, Idaho National Engineering Laboratory, Idaho, $5,000,000.

Project 77-13-a, fluorinel dissolution process and fuel receiving improvements, Idaho Fuels Processing Facility, Idaho National Engineering Laboratory, Idaho, $50,000,000.

(4) For defense nuclear materials byproducts management:

Project 82-N-101, general plant projects, various locations, $11,400,000.

Project 82-N-103, waste handling and isolation facilities, Richland, Washington, $34,450,000.

Project 82-N-104, waste transfer facilities, Richland, Washington, $6,750,000.

Project 82-N-107, rail replacement, Handford Railroad, Richland, Washington, $12,000,000.

Project 82-BU-1, byproducts beneficial uses demonstration plants, various locations, $5,000,000.

Project 81-T-105, defense waste processing facility (DWPF), Savannah River Plant, South Carolina, $20,000,000.

Project 77-13-f, waste isolation pilot plant, New Mexico, $8,600,000.

(5) For capital equipment not related to construction:

(A) For naval reactors development, $28,000,000,

(B) For defense inertial confinement fusion, $11,000,000,

(C) For weapons activities, $199,250,000,

(D) For verification and control technology, $1,100,000,

(E) For defense nuclear materials production, $73,600,000,

(F) For defense nuclear materials byproducts management, $24,472,000,

(G) For nuclear materials safeguards and security, $3,700,000.

Mr. STRATTON (during the reading). Mr. Chairman, I ask unanimous consent that title I be considered as read, printed in the RECORD, and open to amendment at any point.

The CHAIRMAN. Is there objection to the request of the gentleman from New York?

There was no objection.

AMENDMENT OFFERED BY MR. WEISS

Mr. WEISS. Mr. Chairman, I offer an amendment.

The Clerk read as follows:

Amendment offered by Mr. WEISS: Page 11, after line 20, insert the following new section:

PROHIBITION ON USE OF FUNDS FOR ENHANCED RADIATION WEAPONS

SEC. 103. None of the funds appropriated pursuant to an authorization of appropriations in sections 101 or 102 may be obligated or expended for production or research and development of an enhanced radiation weapon (or for any component of any such weapon) or for any component or item to be used to convert nonenhanced radiation nuclear weapons into enhanced radiation weapons.

Mr. WEISS. Mr. Chairman, since the first atomic bombs were dropped in the summer of 1945 the world and its people, all of humanity has been living on a razor's edge. While war througout all of history has been terrible and terrifying, it is safe to say that no war in the past could possibly approach in its horror and in the broad swath of destruction of humanity that would ensue if a war were to break out in which nuclear weapons were used.

It has been estimated reliably and conservatively that if there were a full-scale nuclear exchange between the United States and the Soviet Union that minimally 100 million Americans and 100 million citizens of the Soviet Union would perish immediately, and probably many millions more would die in the following days and weeks and months. So the prevention of the breakout of nuclear war I think must take the top place in the agenda of this Congress and its Members and, indeed, of all nations and governments across the face of this plant.

One of the reasons that the danger has increased is that as time goes by the impact of what happened in Hiroshima and Nagasaki fades from memory. More and more of us both in this country and elsewhere in the world were not alive at the time that those bombs were dropped and do not have the personal recollection of at least 100,000 people perhaps as many as 200,000, being immediately obliterated in Hiroshima. The horror and the extent of the destruction of humanity, which will happen in an outbreak of nuclear war become less and less immediate. We must, as an act of will remind ourselves, constantly, that the next war will, in all likelihood, be the last war.

We have to be very concerned that we do not unwittingly, accidentally, unintentionally, gradually, move to a position where it is more and more likely that a nuclear war will break out.

The amendment I am offering today is an effort, a small but I think very significant effort, to try to place the prospect and consequences of nuclear war at the top of our consciousness; to lessen the possibility that the difference between conventional war and nuclear war will be so diminished that imagining ourselves to be engaged in a conventional war we can drift across the threshold into an all-out nuclear war.

Enhanced radiation weapons, the so-called neutron bombs, are in essence small hydrogen bombs intended to be used as tactical field weapons, as artillery shells, if you will, to stop the onslaught of tanks. The danger, of course, is that even though this is supposed to be a clean bomb, and by "clean" the meaning is not that it does not destroy humanity; quite to the contrary, it kills more people by radiation than the so-called dirty bombs, but it is supposed to be clean: First, because there is supposed to be less fallout; and second, because it is supposed not to have all of the messy problems involved in the vast destruction of property.

But, of course, even assuming that there is more limited damage done by the neutron bomb than by standard nuclear weapons, the fact is that the theory works only if both sides to such a conflict agree that they are going to utilize small, tactical, enhanced radiation weapons.

The CHAIRMAN. Time of the gentleman from New York (Mr. WEISS) has expired.

(By unanimous consent Mr. WEISS was allowed to proceed for 5 additional minutes.)

Mr. WEISS. But the Russians have already said, that as far as they are concerned they draw no distinctions between the use of small nuclear weapons and large nuclear weapons. Indeed, our own arms control and military people confirm that the likelihood is that if, we were to use the neutron bomb, the Russians would retaliate with full-scale tactical nuclear weapons of larger size, and that inevi-

tably what we would have would be an escalation to the full use of large scale nuclear weapons on both sides and all-out nuclear war.

Our allies in Europe, recognizing that it is on their land and with their people as the potential victims, that this exchange would take place have been very clear in indicating in some instances their concern, in most instances their outright opposition to the use of the neutron bomb and its deployment on their territory. Indeed, there was such an outcry in 1977 when it seemed for a while as if this Nation was going to commit itself to the deployment in Europe of neutron bombs, that President Carter and his administration reversed its position; since April of 1978 we have not really had any discussion about the deployment of nuclear bombs until February of this year when Secretary of Defense Weinberger inadvertently suggested that, the issue was at the top of the Reagan administration agenda, only to be contradicted by Secretary of State Haig.

So now we face the opportunity, and I think the obligation, to adopt this amendment which would prevent the production of either the weapon itself or any of the components thereof, or items which could be used to convert standard nuclear weapons to enhanced radiation weapon capability.

It seems to me, Mr. Chairman, that it is absolutely essential that we do this if we are concerned about keeping the spectre of nuclear war a little bit further removed than it would otherwise be.

The danger I do not think can be overstated. It seems to me that it is better at this point, since there is nothing really to be gained by the use of these weapons, that could not otherwise be done with conventional artillery shells, to reject their development for the sake not only of this Nation, but for the sake of all humanity.

Mr. STRATTON. Mr. Chairman, I rise in opposition to the amendment.

Mr. Chairman, this is a field that we have been over on a number of occasions. I must say that I am impressed by the way in which the debate on this subject has been distorted to a kind of Alice-in-Wonderland category.

When the so-called neutron bomb, the enhanced radiation weapon, was first proposed, the Soviet Union went into one of the most extensive propaganda campaigns we have seen in history and convinced people that somehow this was an even more horrendous weapon than the weaponry which they have in their SS-18 and their SS-18's, and their SS-20's targeted into Europe. They have done a job, there is no question about it.

However, I wish my friend from New York had read the editorial that appeared the other day in the International Herald Tribune on the subject of the enhanced radiation weapon, the editorial made a lot of sense. That newspaper, of course, is supported by the New York Times and the Washington Post, papers to which both of us subscribe.

Let me point out just a little bit of the history. This, of course, is essentially a defensive weapon. It is designed, as the gentleman from New York (Mr. WEISS) has said, to try to break up the massed tank attacks that the Soviet Union, in all probability, would undertake if it decided to move into Western Europe and against our NATO forces. We do not have the tanks to oppose the Russians. They have four times as many tanks as we have.

The advantage of this particular type of weapon is that it enables someone who is fighting on his home soil to destroy the tankers in those tanks without also destroying his own home and the homes of his neighbors and the community around.

I do not suppose there are many gradations of distress in terms of nuclear weaponry. But if we do not employ the neutron weapon in a defensive mode, the only other thing that we have are the tactical nuclear weapons which we have had in Europe for years and which the gentleman from New York (Mr. WEISS) never objected to, or all of these people who are suddenly becoming experts on the enhanced radiation weapon ever objected to.

I can assure my colleagues that the devastation, the damage, and the casualties that would be inflicted upon the people of Germany and on the people of the NATO forces who are defending their home ground, would be infinitely greater from tactical nuclear weaponry that we have had in NATO forces for years than this particular weapon.

Let me make another point. The Soviet propaganda campaign has done its job. I had the honor, along with the distinguished chairman of our committee, the gentleman from Illinois (Mr. PRICE) and the gentleman from Alabama (Mr. DICKINSON) to attend the North Atlantic Assembly meeting in Venice in May. It is perfectly clear that if the nuclear weapon issue is raised in Europe we will never even get the modernized theater nuclear force implanted in our NATO position to counter the Soviet SS-20. So for good or evil, the enhanced radiation weapon is a long way from any kind of deployment.

But the Congress last year wrote into law the stipulation, and President Carter signed Public Law 96-540 which states in section 22 that—

> The Secretary of Energy shall produce and stockpile the nuclear materials and the warhead components necessary to enable the rapid conversion of the W70-3 and W79-1 warheads to an enhanced radiation capability.

□ 1430

The propaganda has had its effect, and the people of Europe, who do not really understand this situation, are calling upon their councils of fear rather than their heads in rejecting it.

The CHAIRMAN. The time of the gentleman has expired.

(By unanimous consent, Mr. STRATTON was allowed to proceed for 2 additional minutes).

Mr. STRATTON. But at least we are going to continue to make the components of this weapon available in case we might have to use them against some massive Soviet breakthrough. President Reagan has made no decision to employ the weapon and made no decision to combine various elements, but we would be criminally negligent if we did not at least get these various parts manufactured so that we would have them available to assemble in the event of an emergency. I hope the amendment is rejected.

Mr. WEISS. Will the gentleman yield to me?

Mr. STRATTON. I will be glad to yield to my colleague from New York.

Mr. WEISS. I thank my distinguished colleague for yielding to me. Is it not a fact that the Reagan administration and, indeed, the Department of Energy itself, when it appeared before the subcommittee, indicated that this matter appears in the legislation before us not at their request, that is, the funding for it, but that they were simply reacting to the legislation adopted last December; and that as far as the Reagan administration is concerned, they have not yet taken a position on the production or the deployment of the neutron bomb? Is that not correct?

Mr. STRATTON. That is absolutely correct.

Mr. WEISS. I thank the gentleman.

Mr. McCURDY. Mr. Chairman, will the gentleman yield?

Mr. STRATTON. I yield to the gentleman from Oklahoma.

Mr. McCURDY. I thank the gentleman for yielding.

As the chairman indicates, I think as a new member of the committee that I, like many people, did not exactly understand the concept of the enhanced radiation weapon. I believe it is a misnomer when we call it a neutron bomb. I agree that the propaganda statement calling it a bomb, a neutron bomb, exudes much more fear than if you are talking about the technical information or the facts about this weapon.

The CHAIRMAN. The time of the gentleman has expired.

(At the request of Mr. McCURDY, and by unanimous consent, Mr. STRATTON was allowed to proceed for 2 additional minutes.)

Mr. McCURDY. If the gentleman will continue to yield, I believe if the

Members who are offering this amendment had had the opportunity to grill the Department of Defense and Department of Energy officials as I had in trying to understand the general concept, they would perhaps have a different position today, because I was a skeptic as to the deployment of the neutron bomb or the enhanced radiation weapon as they refer to it. I believe that if they had had that opportunity and had taken the time to get into the details—and it took time; many members of the committee were confused and we had to go over it a number of times to really get down to the basic concept—I believe if they had a better understanding of this concept and would refer to it in the technical sense, they would have a different position on this amendment. I support the development of this weaponry, not so much for the further deployment in that area, but I think it gives us a technical edge. I think we need to move forward in this development.

Again, I believe that if the individuals concerned would take the time to get into the details of this weaponry, they would have a different position.

I hope our colleagues would reject this amendment.

Mr. STRATTON. I thank the gentleman for his statement. I think the reason, of course, for the intense Soviet effort to propagandize this misunderstanding is because a defensive weapon does not do them any good; it only does us good. We are not attacking the Soviet Union, but they have got their forces poised along the Warsaw line to move into Western Europe far beyond anything required for their own defense.

Mr. WEISS. Mr. Chairman, will the gentleman yield on that point?

Mr. STRATTON. I will be glad to yield if I still have the time.

Mr. WEISS. I thank my colleague for yielding. Does the gentleman recollect that somewhere in the early 1950's the Soviet Union in fact was the first to develop what in fact was an enhanced radiation weapon?

The CHAIRMAN. The time of the gentleman from New York (Mr. STRATTON) has expired.

(At the request of Mr. WEISS, and by unanimous consent, Mr. STRATTON was allowed to proceed for 1 additional minute.)

Mr. WEISS. If the gentleman will continue to yield, does the gentleman recall that at the time as distinguished a Member of the U.S. Congress as the late Senator Dodd referred to the fact that the Soviet Union produced what in fact was an enhanced radiation weapon as a defensive weapon?

Mr. STRATTON. No, I do not recall that. I do not think the Soviets developed one. The French developed one, but the gentleman does not seem to be criticizing our French allies.

Mr. WEISS. If the gentleman would yield further, what I have suggested is that nobody deploy or use a weapon which has a tendency to be mistaken as a coventional weapon when in fact it can start all-out nuclear war.

Mr. STRATTON. In other words, the gentleman is against defending ourselves against the Soviet superiority with the SS-18's and SS-19's. I am surprised.

Mr. WEISS. The gentleman recalls that in 1973 there was an Israeli-Arab war, and that during the course of that war when there were massive numbers of tanks wiped out by the Israelis, they did so with the use of conventional weapons, not with the use of nuclear weapons. Does the gentleman remember that?

Mr. STRATTON. I certainly hope that we do not have to use nuclear weapons, but the best way not to use them is to be prepared to use them against the other side. I add at this point an editorial from the International Herald Tribune relevant to this discussion.

[From the International Herald Tribune, June 9, 1981]

ONCE MORE, THE NEUTRON BOMB

The question of whether to deploy neutron warheads in Europe is too important to be influenced by emotional arguments about the morality of a weapon that is kinder to property than it is to people. The simple fact is that conventional nuclear warheads kill as efficiently by heat and blast as neutron weapons do by radiation. If neutron warheads don't destroy structures, so much the better for the people who survive. It is important that Western European leaders instruct their electorates accordingly so that the legitimate debate on neutron-weapons deployment will be rational and informed.

Like all other discussion about nuclear armaments, the neutron bomb debate is conducted in the context of the overwhelming need for arms limitation by the two superpowers, both of which have nuclear arsenals large enough to obliterate the globe. But until the United States and the Soviet Union find an approach to arms control that is sufficiently balanced to allow real reductions in stockpiles, the West's policy of deterrence remains the only sensible response to the steady and substantial increase in Soviet strategic and tactical power. That brings us back to neutron warheads, which are in the news again because the United States has decided to set aside the tritium needed to convert standard Lance battlefield warheads to neutron warheads.

Stated as simply as possible, the neutron warhead is the best weapon to use against massed tanks in Central Europe. That is important because the Warsaw Pact has almost four times as many tanks as NATO. NATO also lacks enough close ground support aircraft to make up the difference. Neutron weapons deployed in Western Europe would close the gap. That is why the Soviet Union has campaigned so actively against their deployment.

Proponents of the neutron weapons argue that because they destroy less property they would be more likely to be used and are therefore a better deterrent. Opponents turn that argument on its head and say that because they are more likely to be used they increase the possibility of an escalation to strategic nuclear warfare. Who is right? Nobody can be sure. But there is no such thing as risk-free deterrence. No one can predict what the Soviet Union will do at each stage of military escalation. The point is to avoid conflict by persuading Moscow that any conventional or tactical nuclear assault in the European theater can be contained in that theater at an unacceptable cost to the Red Army and its Warsaw Pact allies. If the only potentially effective response NATO can make is a doomsday response by the United States, the Soviet leaders might well conclude that the West would surrender rather than opt for global holocaust.

Successive U.S. administrations have bungled the politics of the neutron bomb. As a result, it has become extremely difficult for leaders such as West German Chancellor Helmut Schmidt to prepare their populations for a weapon designed specifically for use on European soil. Nevertheless, the United States is right to keep its options open in case the mood in Europe shifts and the weapon becomes acceptable.

Mr. DELLUMS. Mr. Chairman, I rise in support of the amendment.

Mr. Chairman, just a moment ago as my two colleagues from New York were exchanging thoughts, one of my colleagues indicated that we ought to cease debate because we are not going to convince each other. Therein lies the tragedy of this moment.

Mr. Chairman, I would like to attempt to underscore for the purpose of emphasis the argument made by my distinguished colleague, the gentleman from New York (Mr. WEISS), the author of the amendment before the body. It would seem to me, Mr. Chairman, that when a generation of people develop the capacity to destroy all life—and we have done that with the development of nuclear capability—it then becomes a moral imperative that we take every single precaution to preclude the possibility of the eradication of life as a result of the technical capacity that we have developed.

Simply stated, we should do every single thing in our power to preclude the possibility of a nuclear war.

The argument that my distinguished colleague from New York was attempting to make is that the eradication of the potential of nuclear war has the highest priority of any matter that we can address at this point in history—the highest priority. The argument we make is that the enhanced radiation warhead blurs the distinctions between conventional and nuclear war capability, thus making the use of nuclear weapons in combat an easier thing to do.

If we were interested in preserving the planet Earth for ourselves and our children and our children's children, then we should never ever cross the intellectual threshold to make nuclear war a thinkable concept. We have big, dirty bombs at this moment. The only rationale for the development of

small, clean bombs is to make nuclear war an easier thing to do. The enhanced radiation warhead makes nuclear war thinkable, acceptable, possible, and potentially inevitable. Any of my colleagues on this floor who truly believe that we can confine the enhanced radiation warhead exchange to some kind of absurd notion of limited nuclear war is living in an absurd reality.

Mr. Chairman, once we start down that road, we cannot turn it around. We must not make nuclear war thinkable. For those of us who come to this body committed to preserving human life, we must exhaust every opportunity to preclude that possibility, not to make nuclear war an easier thing to do. So I underscore my colleague's argument that if we, indeed, are united by one thing, irrespective of our race, creed, color, national origin, or whatever, that one thing is the planet itself, and the planet Earth is in danger at this moment from the proliferation of nuclear weapons.

It would seem to me that we should not further endanger the planet by making nuclear war thinkable, so let us not cross that threshold, and that is precisely what this weapon does.

There is one other set of arguments to rationalize the deployment of the so-called neutron bomb that in some way we need to deploy this weapon in Europe. I have asked, Mr. Chairman, people in the Pentagon and the appropriate agencies, what do you perceive to be the probability by a mathematical calculation—not the possibility but the probability—of the Soviet Union, the Warsaw Pact, and NATO going to war in Europe, on a scale of 1 to 10? The response was somewhere between zero and one. So where is the great danger? We are not exchanging bombs at this moment, and why? We are not because of the simple notion that deterrence is already working.

So why do we want to introduce a weapon that would alter the delicate balance of deterrence, Mr. Chairman?

The CHAIRMAN. The time of the gentleman has expired.

(By unanimous consent, Mr. DELLUMS was allowed to proceed for 2 additional minutes.)

Mr. DELLUMS. Why do we want to introduce a weapon that would alter nuclear policy to bring us close to the potential of nuclear disaster?

A couple of years the President of the United States put this absurd, dangerous, and insane weapon on the shelf. It is my hope that this President, beyond ideology and beyond parochialism to a level of sanity, will understand on a rational basis that we should not go forward with the development and the deployment of the enhanced radiation warhead.

People in Europe do not want this weapon. We do not need the weapon. History will not serve us well, Mr. Chairman, if we deploy this weapon. I would suggest that it moves us closer to nuclear war.

In conclusion, the past events of the last few days in the Middle East ought to make every single person in this body shudder with the potential danger of the proliferation of nuclear weapons. We have given an ugly example to the world by saying to every nation, if you are going to be powerful, you have to have a nuclear bomb, and you might as well buy it from us, because you can buy it from someone else.

So we have not assumed a role of peaceful leadership in the world to stop the proliferation of nuclear weapons. In fact, we have contributed to the expansion of nuclear weapons. I would suggest that another message we will be sending to the world and to Third World countries that they ought to have a bomb is to not accept this amendment and go forward with the development and the deployment of the enhanced radiation warhead.

Mr. WEISS. Mr. Chairman, will the gentleman yield to me?

Mr. DELLUMS. I certainly yield to the gentleman from New York.

Mr. WEISS. I thank the gentleman for yielding and compliment him on that very eloquent and powerful statement. In the course of the colloquy that I had with my distinguished and good friend, the gentleman from New York (Mr. STRATTON), the one point that he did not respond to was, what would happen if the NATO armed forces were to utilize the enhanced radiation weapon in an effort to stop those Soviet tanks coming across the Polish border?

The CHAIRMAN. The time of the gentleman has expired.

(At the request of Mr. WEISS, and by unanimous consent, Mr. DELLUMS was allowed to proceed for 3 additional minutes.)

Mr. WEISS. The gentleman did not respond to that point because he knows and would have to agree that once our side used the enhanced radiation weapon, the other side, would have no alternative except to respond in kind with heavier nuclear weapons.

□ 1445

There has been some suggestion in the course of the comments from the gentleman from New York (Mr. STRATTON) that, our allies have been following the councils of fear and they do not really understand what this issue is all about; that in some way they are being brainwashed by Russian propaganda; and that perhaps the rest of us, too, are being brainwashed by Russian propaganda.

It might be instructive if we noted that there are some very good military people, American military people, who take basically the same position that the gentleman in the well and I have been enunicating.

I have, for example, a copy of a magazine called Arms Control Today, put out by the Arms Control Association, dated June 1978. It includes an article by retired Gen. Arthur S. Collins, Jr., whose last assignment was as Deputy Commander in Chief of the U.S. Army in Europe. Listen to what he says:

War games and studies have repeatedly shown that where there is careful and discreet first use of nuclear weapons, the side that initiated the nuclear attack is overwhelmed by a sudden and massive enemy nuclear response.

He goes on to say:

Ask any U.S. commander what he would do if his units were hit by a few small nuclear weapons. The response would be a request for all the nuclear firepower he could get. Are the Russians likely to be more restrained in similar circumstances?

I think there is no question about it. Once you start down the path of an exchange of utilization of nuclear weaponry, you are in for an all-out nuclear war.

Mr. DELLUMS. Mr. Chairman, I think the gentleman is absolutely correct.

Mr. Chairman, I would like to remind my colleagues that a while back I asked the Pentagon this exact question:

In your estimation, do you believe that a war can be contained in Europe even if it started as a conventional war? Could it be contained?

It was the wisdom of those in the Pentagon, their response was:

It is our estimation that no war could be contained in Europe; that even if the war started as a conventional war, it is our opinion that within a relatively short period of time that war would escalate to global strategic nuclear war—

Which underscores the point that the gentleman makes very powerfully and very effectively. If any of our colleagues are willing to do it, they can go back to the record of the Armed Services Committee and they can see the answer that was given.

The CHAIRMAN pro tempore. The time of the gentleman from California (Mr. DELLUMS) has expired.

(By unanimous consent, Mr. DELLUMS was allowed to proceed for 1 additional minute.)

Mr. DELLUMS. Mr. Chairman, after I asked the question of whether or not a conventional war could be contained in Europe and the response was no, it would escalate to global strategic nuclear war, the follow-on question was: "Is this the assessment of the Soviet Union?" The response was: "Yes."

Then I said, "Do you believe that the knowledge on both sides that a conventional war could not be contained, that it would escalate to global strategic war, nuclear war, that that fact, in and of itself, is enough of a deterrent for both sides coming to war?"

The response was, "That is a reasonable conclusion that the gentleman draws."

So the point is, we are not fighting at this moment. Why, then, are we placing a weapon in that situation: First, that the people in Europe do not want; and second, a weapon that brings us closer to the use of nuclear capability rather than further away?

Mr. McCURDY. Mr. Chairman, will the gentleman yield?

Mr. DELLUMS. I yield to the gentleman from Oklahoma.

Mr. McCURDY. Mr. Chairman, I agree with the gentleman when he says that nuclear war is unthinkable. Tactical nuclear war is unthinkable.

Mr. DELLUMS. I think any kind of nuclear war is unthinkable.

The CHAIRMAN pro tempore. The time of the gentleman from California (Mr. DELLUMS) has again expired.

(At the request of Mr. McCURDY and by unanimous consent, Mr. DELLUMS was allowed to proceed for 1 additional minute.)

Mr. DELLUMS. Mr. Chairman, I yield to my colleague from Oklahoma (Mr. McCURDY).

Mr. McCURDY. Mr. Chairman, I believe, however, that the proper forum for this debate should have been in committee a month ago, 2 months ago. There was a unique opportunity there, when dealing with those officials from that department to go into some of the policy decisions as opposed to taking it up today on the floor when we have already got the bill before us. I welcome the opportunity to get into a debate, into a colloquy on this type of issue. I welcome it. Let us do that. But I am just saying that today and now is not the place to do it. We should have taken up that opportunity before.

I welcome the debate. Let us get into it. Let us bring some of those officials over here, my distinguished colleague, and I ask the gentleman to do that. I believe there are many of us that would like to get into that debate, but today is not the time to do it.

Mr. DELLUMS. Mr. Chairman, if I may reclaim my time, I would simply suggest to my colleague that if we follow the gentleman's suggestion that only members of committees debate these critical questions, I would remind my colleague there are 435 Members of the House of Representatives, and the overwhelming majority of us do not serve on the committee presenting the bill on the floor.

The CHAIRMAN pro tempore. The time of the gentleman from California (Mr. DELLUMS) has again expired.

(By unanimous consent, Mr. DELLUMS was allowed to proceed for 30 additional seconds.)

Mr. DELLUMS. If we cannot debate on the floor of Congress these critical issues, then we cannot debate anywhere. The gentleman from Oklahoma (Mr. McCURDY) fully knows there is an ideological slant on the Armed Services Committee. We know that. If we are going to have any opportunity to debate these questions in some atmosphere of openness, you certainly have to bring these matters to the floor of the U.S. Congress.

There is only one person that voted against the military authorization bill for fiscal year 1982, and it was this gentleman in the well, and 40 other members of the Armed Services Committee went the other way. So if you have a debate, you have it on the floor.

The CHAIRMAN pro tempore. The time of the gentleman from California (Mr. DELLUMS) has again expired.

(By unanimous consent, Mr. DELLUMS was allowed to proceed for 1 additional minute.)

Mr. WASHINGTON. Mr. Chairman, will the gentleman yield?

Mr. DELLUMS. I yield to the gentleman from Illinois.

Mr. WASHINGTON. Mr. Chairman, I did not have the opportunity to debate this matter before the committee because I am not on the committee, but I welcome this opportunity and I commend the gentleman from New York (Mr. WEISS) for availing me this opportunity to briefly express my feelings about the neutron bomb.

I wish to join both of my colleagues, the gentleman from California (Mr. DELLUMS) and the gentleman from New York (Mr. WEISS), in support of this amendment, which should be so noncontroversial as to be adopted overwhelmingly by this body. There is no justification whatsoever for any appropriation for the construction of neutron weapons.

We are talking about a weapon which is specifically and explicitly designed to kill people. We are talking about a weapon which many of our European allies, the people it is ostensibly to protect, simply don't want to have anything to do with. We are talking about a military expenditure which could weaken our Nation's credibility in the community of nations by allowing our foes to claim that the United States is responsible for elevating the arms race to new heights of cruelty.

The CHAIRMAN pro tempore. The time of the gentleman from California (Mr. DELLUMS) has again expired.

(At the request of Mr. WASHINGTON and by unanimous consent, Mr. DELLUMS was allowed to proceed for 1 additional minute.)

Mr. DELLUMS. Mr. Chairman, I yield further to my colleague, the gentleman from Illinois.

Mr. WASHINGTON. Mr. Chairman, I rise in support of Mr. WEISS' amendment also because he and I yesterday suffered together through what was the most painful single moment in my career in public life, as the committee cut more than $13 billion from vital programs under the jurisdiction of the Education and Labor Committee. The money we would spend on building and stockpiling this murderous weapon, the neutron bomb, should be spent instead on the living. A Congress which will be drastically curtailing the programs which feed meals to low-income schoolchildren should not be squandering the taxpayers' money on one of the most horrible weapons ever invented. A Congress which wields the budgetary ax against vocational education, against public service employment, against programs for the handicapped should show at least equal diligence when it comes to controlling military spending.

Mr. MOFFETT. Mr. Chairman, I move to strike the requisite number of words, and I rise in support of the amendment.

Mr. Chairman, there have been references made in this debate to the committee, and I want to say that I think the gentleman from California (Mr. DELLUMS) would agree with this: None of our remarks with regard to the committee are in any way personal. The chairman of the full committee, the gentleman from Illinois (Mr. PRICE), is sitting here. I think all of us in this body have great respect for the gentleman and, of course, for our colleague and neighbor, the gentleman from New York State (Mr. STRATTON) we also have great respect.

One of the things I have found in my—I can not say few years any more—my 8 years in this body is that colleagues almost without exception want to do the right thing. So this debate is not about one group saying we want to do the right thing and we are the only ones who are pure and sacred here and the rest of you who disagree with us do not want to do the right thing, you are being very destructive. It is not that kind of assertion we are making in opposing this weapon.

I say this to our colleague, the gentleman from Oklahoma (Mr. McCURDY): It might just be as the gentleman from California (Mr. DELLUMS) suggested, that there is an overwhelming mind-set on the Armed Services Committee. It is a specialized committee, as it should be. It is not a committee that is charged or that sees its responsibilities necessarily with obtaining peace in the shortest possible time. One might say that peace through strength will get us there, but by and large the committee is charged with trying to figure out the kind of defense that we will have. We know that that is not an easy job.

One of my problems with the system as it works, however, is we are talking about the destruction of the planet here. There are 2, 4, 6, 8, 12, 14, 16, 18, maybe 20 Members on the floor right

now. We all know when citizens come to watch us in action they probably look at the House in a situation like this and they say, "My goodness, the House is discussing possible destruction"—is how we would characterize it, some of us—"and there are only 20 people on the floor."

We all know and we try to explain they are in committees, at their offices, and so forth. We are the same way. We do not always make it for every debate, so we are not pointing fingers. But it is a commentary, is it not, that we are debating such a deadly weapon, such a weapon of overwhelming destruction, and we are not debating with a large number of Members present and participating.

It is very important that the Committee of the Whole and the full House have an opportunity to debate these issues, because this one Member's view is that we are not seeing a debate go on in terms of what our priorities should be. The perception that some of us have is that the Armed Services Committee, frankly, ends up looking at a vast array of military options and picking all of them.

It bothers us. We know again it is done with the best of intent and with the country first in mind; but where will the tremendous pressure for a world that is less fully armed and, therefore, less damaging and potentially destructive come from? Where is it going to come from?

We have a citizens' petition now in my own State with tens of thousands of signatures of people, not only people who would be characterized as liberal but business people as well, who have signed a petition saying we should not have unilateral disarmament but we must move swiftly for a kind of disarmament that goes in lock step with the other major powers.

I know that might sound naive to the gentleman from New York (Mr. STRATTON). I see him smiling. He is much more versed in this than I am. I ask the gentleman, and I ask rhetorically. Where does it end? Where does it end?

Does the gentleman or any of the gentlemen or gentlewomen on the committee picture a day when the Soviet Union will say, "OK, we give up, we give up. The Armed Services Committee has been persistent in the House of Representatives and we give up"?

Is that what is going to happen? Or are we handing a legacy to our children, and asking our allies to carry out a good portion of it in terms of the threat to them, which just keeps us in a never-ending spiral that leads to the kind of destruction that the gentleman from California (Mr. DELLUMS) is talking about?

I had no intention of being involved in this bill until I realized the gentleman from New York (Mr. WEISS) was offering the amendment, and I thank him for doing that. I suggest to my colleagues who have spoken in favor of this amendment, let us resolve—although it may be bad news to some of our dear friends on the committee—that we will join together on the floor to discuss these matters not less but more. I would say to the gentleman from Oklahoma (Mr. MCCURDY), we have not done enough of this. That is our fault.

The CHAIRMAN. The time of the gentleman from Connecticut (Mr. MOFFETT) has expired.

(By unanimous consent, Mr. MOFFETT was allowed to proceed for 2 additional minutes.)

Mr. MOFFETT. Mr. Chairman, we should be here discussing this on every weapons bill. I know the gentleman from New York (Mr. STRATTON) cares about survival and has his view of how we obtain it, but I also know there are some of us who have a different view of how we obtain it; and I cannot believe that anyone in this body would suggest that we would not discuss those differing points of view.

I want to raise in my final moment a rather provocative question. That is, can we in this body stand the thought, can we stand the thought that we might be ahead of the Russians in most areas? Is that something we can live with? How does it make us feel or does it in a way totally destroy our reason for being?

It is a very, very useful question. I think that their society is a failure. So much of what they build is a failure. We so often end up bowing down and paying deference to the wonderful machinery of the Soviet Union, it seems to me, and spreading fear across our land about how we are in jeopardy because of what the Soviets are doing. I know there are threats from the Soviets. I believe it when the distinguished members of the Armed Services Committee tell us that there are threats. Of course there are threats.

But I urge the committee to give us the real picture on where the threats come from. They are not coming from every direction with every weapon that the Soviets have, from every nook and cranny, from every part of the Soviet Union. It cannot possibly be. We are a better country. We are a stronger country. We build things better. We do not have to build everything to counter the Soviet threat.

□ 1500

I ask, can we stand the thought that we might in fact be ahead and not have to build the neutron bomb?

Mr. MCCURDY. Mr. Chairman, will the gentleman yield?

Mr. MOFFETT. I yield to the gentleman from Oklahoma.

Mr. MCCURDY. I thank the gentleman for yielding.

The gentleman raises a good point. The gentleman says, where does it all end. Let met ask the gentleman a question. Where does it begin?

I can tell the gentleman where it begins. Yes, there is a philosophical bent on that committee. It is primarily because people are concerned to be on that commitee. I contend there is a philosophical bent on the Committee on Education and Labor.

The CHAIRMAN pro tempore (Mr. FASCELL). The time of the gentleman from Connecticut (Mr. MOFFETT) has expired.

(At the request of Mr. MCCURDY and by unanimous consent, Mr. MOFFETT was allowed to proceed for 2 additional minutes.)

Mr. MCCURDY. If the gentleman would yield further, I believe there is a philosophical bent. But do not just assume—as I stated to my friend from California—do not just assume that just because a person is on that committee they are either on one side or the other. The place one begins is that committee, let us get that debate in that committee. The way one solves this problem, the way one turns this around is one does the work there.

The gentleman knows as well as anybody here that the effective work done in this body is done in committee. If we do not get people who are concerned about spending on that committee and if we do not get people on that committee who are concerned about nuclear proliferation, we are not going to solve this problem.

Mr. MOFFETT. I agree with the gentleman. Let me just say that nothing that I have said, I hope, has given the impression that I think that these ideas are not allowed a fair hearing on the committee. The Chairman is the fairest member one could find. The subcommittee chairmen are extremely nice people as far as I am concerned and I am sure give a hearing to every point of view. That is not what we are talking about.

I would like to see this Chamber filled with the membership for a period of 5 or 6 days or a week or 2 or 3 weeks while we discuss the number one issue on the planet, as the gentleman is saying. That is what we are talking about. That does not in any way diminish the specialized kind of work that the committee does, but maybe the committee cannot look overall at the issue in the way the full House can.

Mr. MCCURDY. If the gentleman will continue to yield, I would submit in this body that when we sit through a class 5 or secret briefing looking at aerial photographs, I wish everyone in this body would be there to observe that. People are notified of these things. They do not take the time or the interest to look at those things.

If you ask about threat, take the time to come to committee and you will see threat. That is all I am asking. It riles us, it makes us made to sit there time and time again through committee and the biggest opponents are not there. You talk about threat, you will see it if you come to the committee.

The CHAIRMAN. The time of the gentleman from Connecticut (Mr. MOFFETT) has again expired.

(At the request of Mr. DELLUMS and by unanimous consent, Mr. MOFFETT was allowed to proceed for 2 additional minutes.)

Mr. DELLUMS. Mr. Chairman, will the gentleman yield?

Mr. MOFFETT. I yield to the gentleman from California.

Mr. DELLUMS. First, in response to the last comment the gentleman makes, clearly the perception of risk is a debatable issue. What the gentleman may perceive as risk may not be what the gentleman and I may perceive as risk. So the gentleman is stating the notion as if there is an absolute definition of risk. That is an absurdity.

We ought to be debating what is the level of the threat. What is the risk? I think that what this debate calls into question is the serious issue that American people ought to be debating not only on the floor of this Congress, but in every community throughout this country and that is the simple notion: What is the role of nuclear weapons in modern life? It is a powerful question and it is a question that we do not discuss. It is an issue that we do not raise. It is a debate that we do not engage in.

I would suggest that if the gentleman answered the question, "What is the role of nuclear weapons in modern life?" that it is to use those weapons, then, in fact, we are all dead.

But if the notion is for nuclear weapons to be used for deterrence, then I would suggest that we already have deterrence and what we ought to be moving for is not further down the road toward a greater arms race, toward greater nuclear capability, but to move back within the confines of an arms control environment and really begin to negotiate moving back from the brink of disaster.

Mr. MOFFETT. I thank the gentleman for his remarks.

I say in my final seconds that this body has many great traditions. One of those great traditions is having sometimes a very small minority in the body raise issues that later on it turns out they were absolutely right on. Whether it is five of us or four or three or two or one, as long as one of us gets reelected to come back and raise these issues, I think we should continue to do that.

I appreciate the indulgence of the gentleman from New York and I yield back the balance of my time.

Mr. SEIBERLING. Mr. Chairman, I move to strike the requisite number of words, and I rise in support of the amendment.

Mr. Chairman, I had not planned to speak on this amendment. But this debate reminds me of a debate some years ago in this House when, I believe it was John Moss, who was standing in this spot and one of the folks from the minority side and he were having a very hot debate.

At one point John said:

> I am not going to talk any longer because I see the gentleman does not want to have a serious debate.

The gentleman on the other side rose up and said, with some indignation, "Well, I want to have serious debate, but this is not the place for it."

Well, if this is not the place for debate on serious issues, I do not know what is. Surely the floor of the House of Representatives is the prime forum for discussing issues of great national importance, and we should be discussing them here much more than we do at times.

Now we all remember the famous remark by the Army major in Vietnam during the Vietnam war, who made the statement, "we had to destroy the village in order to save it."

I suggest to my colleagues that the Europeans are beginning to get the idea that maybe that is what we have planned for them. The neutron weapon is one example of the kind of weapon that might give them that impression. It is designed to destroy people but leave the facilities more or less intact. More or less, I say, because it really is a small nuclear bomb, but with a much wider radiation effect.

Now the Carter administration, and this Congress, went through this same debate several years ago, about 3 years ago, as I recall. On the basis of the facts that were brought out then, the Carter administration decided to drop the idea. It did so partly because it is a poor military weapon. There were articles in scientific magazines pointing out, for example, that while it would eventually kill the crew of Soviet tanks, they would live long enough to continue the battle for 48 hours or so.

So it had its drawbacks from a military standpoint.

But, more important, the previous administration dropped the neutron weapon because it would be a political disaster. The Director of the National Security Council came back from Europe a month or so ago and expressed horror that, "neutralism" is abroad in Europe and that people are raising again the dreadful slogan "better Red than dead."

Well, if my colleagues want to help that movement toward pacification or neutralization, or whatever we want to call it, in Europe, just go ahead and deploy this neutron weapon and watch the results. That is something to think about again.

Unfortunately, these weapons programs seem to develop a life of their own. Every time we think we have disposed of one of them, whether it is the B-1 bomber or neutron warhead, a new crowd comes along and wants to raise it all over again. But fortunately, there are some of us in this House who are willing to take the job of educating the younger Members and some of the senior ones, I am sorry to say, all over again, and I hope also the man who is sitting in the White House.

Now there has been a brilliant speech recently by the gentleman who invented the containment policy, Mr. George Kennan. It was printed in the Washington Post a couple of weeks ago. I just want to read part of what he had to say.

He said:

> Look at the record. Over all these years the competition in development of nuclear weaponry has proceeded steadily, relentlessly without the faintest regard for all the warning voices. We have gone on piling weapon upon weapon, missile upon missile, new levels of destructiveness upon old ones. We have done this helplessly, almost involuntarily, like the victims of some sort of hypnotist, like men in a dream, like lemmings headed for the sea.
>
> The result is that today we have achieved, we and the Russians together, in the number of these devices and their means of delivery and their destructiveness levels a redundancy of such grotesque dimensions as to defy rational understanding.

The trouble with the so-called tac nukes and the neutron weapon is that they may delude some people and particularly military commanders like the famous General LeMay who wanted to "nuke Hanoi," for example, into thinking that there are some cases where we can cross that nuclear threshold without causing a general nuclear exchange.

As Kennan said:

> Once people begin to accept that a given war is inevitable, they behave in ways that make it inevitable, whether they were right in their initial assumption or not.

The CHAIRMAN pro tempore. The time of the gentleman from Ohio (Mr. SEIBERLING) has expired.

(By unanimous consent, Mr. SEIBERLING was allowed to proceed for 2 additional minutes.)

Mr. SEIBERLING. Mr. Chairman, the world, and this Congressman personally, were shocked and staggered when we read a couple of days ago about the Israeli bombing of the Iraqi nuclear plant. Yet, there was a certain logic to that, a preemptive strike. While I personally deplore that kind of tactic and I have yet to see it adequately justified, there is one thing one can say for the Israelis. If any of my colleagues did not see that ABC News special documentary, "Near Armageddon" that was shown on the House TV yesterday, I recommend

that colleagues look at it tomorrow when it is going to be shown again. As the film, which deals with the nuclear weapons race in the Middle East, shows, there was a certain grim logic to the Israeli action. But whether it was justified or not, the Israeli action may serve a useful purpose if it makes us face the fact that, unless something is done to end the competition among both superpower and Third World states to acquire nuclear weapons, then we are truly, all of us, in for a holocaust that will make all of the horrors of the holocaust that the Nazis conducted seem tame by comparison and that will affect every living person on this Earth.

I suggest, that the Third World countries are not going to give up this competition to acquire nuclear weapons as long as the United States and Russia continue to pile them up. This is a very good place to begin by forswearing the neutron weapon. If we build it, it will not be long before Qaddafi or some other person whom we consider to be totally irresponsible, will do everything in his power to acquire the same thing.

Mr. WEISS. Mr. Chairman, will the gentleman yield?

Mr. SEIBERLING. I am glad to yield to the gentleman from New York and I commend him for offering this amendment.

Mr. WEISS. I thank the gentleman for yielding. I want to compliment him because over the years he has been perhaps the most consistent Member of this body in focusing on the great danger of nuclear war.

The CHAIRMAN pro tempore. The time of the gentleman from Ohio (Mr. SEIBERLING) has expired.

(At the request of Mr. WEISS and by unanimous consent, Mr. SEIBERLING was allowed to proceed for 2 additional minutes.)

Mr. WEISS. If the gentleman will continue to yield, the gentleman has focused on the great peril we and the rest of humanity face unless we keep in mind the destructive capacity which the major powers now possess and, indeed, some of the smaller powers now have as well.

The gentleman made a comment earlier to the effect that the neutron bomb has less capacity to destroy physical objects, as distinguished from human beings. One of the reasons why it is suggested that the neutron bomb would destroy less property is due to the assumption that only one such weapon would be used at a time. But interestingly, the Army's own manuals have pointed out—and I cite Army Field Manual 100-5 and 101-3-1—that packages of warheads would be used.

In other words, one would end up having just as much physical damage as one does with the larger tactical nuclear weapons. The amount of damage that it would do to human beings is so horrendous that there have been suggestions that it may in fact violate the ban on the use of chemical warfare because that is exactly the manner in which this weapon is used.

So again, I thank the gentleman for his contribution to this debate and for his constant involvement in calling attention to the danger that we face.

Mr. SEIBERLING. I thank the gentleman, and I yield back the balance of my time.

Mr. EDWARDS of California. Mr. Chairman, I would like to take this opportunity to thank my colleague, Representative WEISS, for introducing an amendment opposing the authorization of funds for the construction of the neutron bomb. I share his views and would like to take this opportunity to make my opposition known to my colleagues.

Rather than get bogged down in discussion of the reduced collateral damage caused by a bomb which kills through radiation rather than blast and heat effects, I think the effects of this weapon need to be portrayed in more human terms. I have found a Congressional Quarterly piece from 1977 which should help illustrate. The article quotes from an Army field manual published in July 1976. I commend it to my colleagues:

> The immediate incapacitation radiation level is 8,000-18,000 rads (unit of measurement for radiation) but an active soldier suddenly exposed to 3,000 rads could become incapacitated within 3-5 minutes. He may recover to some degree in about 45 minutes, but due to vomiting, diarrhea, and other radiation sickness symptoms, he would be only partially effective until he dies within a week. A soldier exposed to 650 rads initially shows no symptoms, but loses some of his effectiveness in about two hours and can be expected to die in a few weeks under battlefield conditions. Exposure in the 100 rad region usually has little effect. Accordingly, in conventional-nuclear combat it would be prudent to subject front-line enemy to 3,000-8,000 rads or more, enemy to the rear to 650-3,000 rads, and avoid subjecting friendly forces and civilians to an unacceptable dose level (100 or more rads).

Obviously, unarmed civilians would often be exposed to doses of radiation exceeding the acceptable level. It is clear that the use of this weapon could result in battlefields and cities littered by human ghosts awaiting their inevitable death. The nation of Japan is still haunted by survivors from Hiroshima and Nagasaki who bear scars from the effects of radiation. The use of neutron weapons in Europe would add greatly to this human tragedy.

The suffering caused by a weapon as inhumane as the neutron weapon, a weapon which kills by attacking the cellular processes of living things, should be beyond the consideration of a civilized nation as great as ours.

The peculiar attributes of the neutron weapon make it a desirable weapon in the limited perspective of military planning. These warheads would be much more precise in their application and result in less property damage than nuclear devices. However, these same attributes make the weapon a nightmare on a broader level. Because the weapon is so much more limited, precise, and usable than previous warheads, it would dangerously lower the threshold at which conflicts could escalate from conventional to nuclear weapons. This may not bother strategists who believe in the concept of a winnable nuclear war, but it presents a grave threat to the lives and security of our citizens.

Our decision to produce these weapons is not made in a vacuum. One element which must be considered in this decision is the reaction of our allies. The debate which occurred at the beginning of this year between the Secretaries of Defense and State on this weapon helped to underscore European reaction. Immediately after Secretary Weinberger indicated his support for an enhanced radiation weapon, Secretary Haig launched his rebuttal. As the Secretary of State indicated, our allies do not support the notion of our deploying these weapons on their soil. As the New York Times indicated on February 5 of this year, the West Germans have revealed that they no longer have public support for the use of neutron bombs. The position of the new French President on these weapons is not clear yet, but it is safe to assume that France will not welcome these weapons either. The development of a more vocal opposition party in England will make the deployment of these weapons on British soil difficult also.

Finally, our development and deployment of these weapons will seriously undermine any future efforts toward a new arms limitation agreement. We already have enough bargaining chips to bring to the table in these negotiations; we do not need this additional threat. The development of these weapons will only increase bellicosity on both sides and thereby slow any progress toward a much needed agreement.

I urge my colleagues to vote in favor of the Weiss amendment.

The CHAIRMAN. The question is on the amendment offered by the gentleman from New York (Mr. WEISS).

The question was taken; and the Chairman announced that the noes appeared to have it.

RECORDED VOTE

Mr. WEISS. Mr. Chairman, I demand a recorded vote.

A recorded vote was ordered.

The vote was taken by electronic device, and there were—ayes 88, noes 293, not voting 50, as follows:

[Roll No. 73]

□ 1530

The Clerk announced the following pairs:

Mr. Richmond for, with Mr. Chappell against.

Mr. Conyers for, with Mr. Shelby against.

Messrs. CAMPBELL, NELSON, and STARK changed their votes from "aye" to "no."

Messrs. SIMON, EDWARDS of California, and FORSYTHE changed their votes from "no" to "aye."

So the amendment was rejected.

The result of the vote was announced as above recorded.

Mr. VOLKMER. Mr. Chairman, I move to strike the last word.

Mr. VOLKMER. Mr. Chairman, I rise to inquire of the chairman of the subcommittee in regard to the amount of funds that are provided in the bill for decontamination and decommissioning. I might say for those Members who are not interested in what I am about to say that I suggest that in order for the chairman of the subcommittee to hear me, perhaps I can at least speak very quietly and maybe he can hear me then, because this, although it may not be important to other Members, is very important to me or else I would not be here nor would I be taking the time of the committee.

Mr. Chairman, in the past we have had numerous sites used in this country for production of nuclear weapons. One of those sites is located within my district and is known as Weldon Spring. It presently consists of approximately 272 acres of buildings, a quarry with water in it, and some pits. It contains many tons of radioactive material, much of which is highly radioactive.

I noticed, Mr. Chairman, that the amount that was provided originally for decontamination and decommissioning by the administration has been reduced by the committee from $10.5 million to $4 million, and this concerns me and, I am sure, others who are trying to find ways to decontaminate these highly radioactive sites throughout our country.

I for one plan in the future to have a meeting with the military, the Department of the Army officials, with DOE officials, with the EPA, and with the Nuclear Regulatory Commission people in order to try to come up with some type of plan whereby we can decontaminate the Weldon Spring area.

I would like to know, I will ask the subcommittee chairman, whether he feels the $4 million provided in the bill will provide for the necessary decontamination for these numerous sites that we have within the country.

Mr. STRATTON. Mr. Chairman, will the gentleman yield?

Mr. VOLKMER. I yield to the gentleman from New York.

Mr. STRATTON. Mr. Chairman, the gentleman from Missouri (Mr. VOLKMER) is asking a question which I think may be of interest to other Members in the Chamber. He is asking, what about these sites which may be contaiminated with uranium filings or something of that kind?

There are some 300 of them around the country, so there may be other Members who are concerned, as the gentleman from Missouri is.

Let me just say in response to the gentleman from Missouri that I would like to assure him, to put his mind at ease, that the Weldon Spring site in Missouri is specifically mentioned as a former DOE defense facility that will receive attention. I quote briefly from the DOE fiscal year budget submission:

> This program for decontamination and decommissioning provides for the safe management and disposition of surplus radioactive contaminated DOE facilities originally used in supportive defense programs.

All facilities were originally used for this purpose: the New Brunswick laboratory in New Jersey, the Niagara Falls storage site in New York, and the Weldon Spring site in Missouri. Maintenance and management of these

facilities is necessary until they can be decommissioned or decontaminated.

So the gentleman's district will be covered. The problem our subcommittee was concerned with was to learn what the safe level is and how that can be determined.

We received testimony during the hearings on the proposed remedial action at the former uranium storage site where it was pointed out to the Members that there is no danger to the public from this site, but DOE said they were prepared to spend $29 million for remedial action.

The standards established by the Nuclear Regulatory Commission and the EPA for decontamination should be based on established needs for public health and safety. In the interest of economy, these two agencies should justify their standards on a cost-risk-benefit basis, and this has not been done. There is no clear indication of how much it will cost to decontaminate to their proposed standards, but it could be in the tens of billions of dollars at a time when billions of dollars are getting a little bit harder to come by. Even the resources of the Federal Government are not sufficient to correct every insult to the environment.

The CHAIRMAN. The time of the gentleman from Missouri (Mr. VOLKMER) has expired.

(By unanimous consent, Mr. VOLKMER was allowed to proceed for 2 additional minutes.)

Mr. STRATTON. Mr. Chairman. if the gentleman will yield further, in every case there has to be a cost-benefit/risk-benefit factor involved. A major issue in this regard is the concept of the return of land to unrestricted use, and many factors have to be considered. The assessment of all these factors unfortunately has not always been based on facts but on emotionalism.

We do not believe that sufficient data are available, and for that reason we intend to start hearings in our subcommittee on June 23 to try to learn from the experts in the Nuclear Regulatory Commission, the EPA, and the Department of Energy just what is safe, what may not be safe, and how much is safe enough.

So, Mr. Chairman, I thank the gentleman for raising this point and for providing me with the opportunity to advise the House in this regard.

Mr. VOLKMER. Mr. Chairman, I thank the subcommittee chairman, and I look forward, as he does, I know, to the hearings on June 23. I believe that the gentleman and I are probably agreed that the criteria presently established may be too much in the ultimate or may be unachievable, but yet we need to look to other possible solutions for decontamination of these sites.

Mr. Chairman, I thank the subcommittee chairman.

Mr. STRATTON. I thank the gentleman from Missouri (Mr. VOLKMER).

The CHAIRMAN. Are there further amendments to title I?

If not, the Clerk will read.

The Clerk read as follows:

TITLE II—GENERAL PROVISIONS

REPROGRAMMING

SEC. 201. Except as otherwise provided in this Act—

(1) no amount appropriated pursuant to this Act may be used for any program in excess of 105 percent of the amount authorized for that program by this Act or $10,000,000 more than the amount authorized for that program by this Act, whichever is the lesser, and

(2) no amount appropriated pursuant to this Act may be used for any program which has not been presented to, or requested of, the Congress,

unless a period of thirty calendar days (not including any day in which either House of Congress is not in session because of adjournment of more than three calendar days to a day certain) has passed after receipt by the appropriate committees of Congress of notice from the Secretary of Energy (hereinafter in this title referred to as the "Secretary") containing a full and complete statement of the action proposed to be taken and the facts and circumstances relied upon in support of the proposed action, or unless each committee before the expiration of such period has notified the Secretary it has no objection to the proposed action.

LIMITS ON GENERAL PLANT PROJECTS

SEC. 202. (a) The Secretary may carry out any construction project under the general plant projects provisions authorized by this Act if the total estimated cost of the construction project does not exceed $1,000,000.

(b) If at any time during the construction of any general plant project, the estimated cost of the project is revised due to unforeseen cost variations and the revised cost of the project exceeds $1,000,000, the Secretary shall immediately furnish a complete report to the appropriate committees of Congress explaining the reasons for the cost variation.

(c) In no event may the total cost of all general plant projects carried out under this Act exceed by more than 10 percent the total amount authorized to be appropriated for such projects under this Act.

LIMITS ON CONSTRUCTION PROJECTS

SEC. 203. (a) Whenever the current estimated cost of a construction project which is authorized by section 102 of this Act, or which is in support of national security programs of the Department of Energy and was authorized by any previous Act, exceeds by more than 25 percent of the higher of (1) the amount authorized for the project, or (2) the amount of the total estimated cost for the project as shown in the most recent budget justification data submitted to Congress, the project may not be started or additional obligations incurred in connection with the project above the total estimated cost, as the case may be, unless a period of thirty calendar days (not including any day in which either House of Congress is not in session because of adjournment of more than three days to a day certain) has passed after receipt by the appropriate committees of Congress of written notice from the Secretary containing a full and complete statement of the action proposed to be taken and the facts and circumstances relied upon in support of the action, or unless each committee before the expiration of such period has notified the Secretary it has no objection to the proposed action.

(b) Subsection (a) shall not apply to any construction project which has a current estimated cost of less than $5,000,000.

FUND TRANSFER AUTHORITY

SEC. 204. To the extent specified in appropriation Acts, funds appropriated pursuant to this Act may be transferred to other agencies of the Government for the performance of the work for which the funds were appropriated, and funds so transferred may be merged with the appropriations of the agency to which the funds are transferred.

AUTHORITY FOR CONSTRUCTION DESIGN

SEC. 205. (a) Within the amounts authorized by this Act for plant engineering and design, the Secretary may carry out advance planning and construction designs and may obtain architectural and engineering services in connection with any proposed construction projects.

(b) In the case in which the estimated design cost for any construction project is in excess of $400,000, the Secretary shall notify the appropriate committees of Congress in writing of the details of the project at least thirty days before any funds are obligated for design services for the project.

FUNDS AVAILABLE FOR ALL NATIONAL SECURITY PROGRAMS OF THE DEPARTMENT OF ENERGY

SEC. 206. Subject to the provisions of appropriation Acts, amounts appropriated pursuant to this Act for management and support activities and for general plant projects are available for use, when necessary, in connection with all national security programs of the Department of Energy.

AUTHORITY FOR EMERGENCY CONSTRUCTION DESIGN

SEC. 207. In addition to the advance planning and construction design authorized by section 102, the Secretary may perform planning and design utilizing available funds for any Department of Energy defense activity construction project whenever the Secretary determines that the design must proceed expeditiously in order to meet the needs of national defense or to protect property or human life.

ADJUSTMENTS FOR PAY INCREASES

SEC. 208. Appropriations authorized by this Act for salary, pay, retirement, or other benefits for Federal employees may be increased by such amounts as may be necessary for increases in such benefits authorized by law.

AVAILABILITY OF FUNDS

SEC. 209. When so specified in an appropriation Act, amounts appropriated for "Operating Expenses" or for "Plant and Capital Equipment" may remain available until expended.

ARREST AUTHORITY FOR PERSONS AUTHORIZED TO CARRY FIREARMS UNDER THE ATOMIC ENERGY ACT OF 1954

SEC. 210. Section 161 k. of the Atomic Energy Act of 1954 (42 U.S.C. 2201(k)) is amended by striking out the semicolon and inserting in lieu thereof a period and the following: "A person authorized to carry firearms under this subsection may, while in the performance of, and in connection with, official duties, make arrests without war-

rant for any offense against the United States committed in that person's presence or for any felony cognizable under the laws of the United States if that person has reasonable grounds to believe that the individual to be arrested has committed or is committing such felony. A person granted authority to make arrests by this subsection may exercise that authority only in the enforcement of (1) laws regarding the property of the United States in the custody of the Department of Energy, the Nuclear Regulatory Commission, or a contractor of the Department of Energy or Nuclear Regulatory Commission, or (2) any provision of this Act that may subject an offender to a fine, imprisonment, or both. The arrest authority conferred by this subsection is in addition to any arrest authority under other laws;".

RESTRICTION ON ENVIRONMENTAL IMPACT STATEMENT PREPARATION

SEC. 211. No funds appropriated pursuant to an authorization of appropriations contained in this Act may be obligated or expended for the purpose of preparing any environmental impact statement with respect to the operation of the Pantex Nuclear Weapons Plant at Amarillo, Texas, or at any other defense facility of the Department of Energy unless the preparation of such statement is required by statute.

COMMITTEE AMENDMENT

The CHAIRMAN. The Clerk will report the committee amendment.

The Clerk read as follows:

Committee amendment: Page 16, after line 23, add the following new section:

RESTRICTION ON ENVIRONMENTAL IMPACT STATEMENT PREPARATION

SEC. 211. No funds appropriated pursuant to an authorization of appropriations contained in this Act may be obligated or expended for the purpose of preparing any environmental impact statement with respect to the operation of the Pantex Nuclear Weapons Plant at Amarillo, Texas, or at any other defense facility of the Department of Energy unless the preparation of such statement is required by statute.

□ 1545

Mr. STRATTON. Mr. Chairman, on the committee amendment, I understand that I have 5 minutes available in support of the committee amendment.

The CHAIRMAN. The gentleman is correct.

Mr. STRATTON. Mr. Chairman, this is an amendment that has caused some controversy and some misunderstanding. I think it is important for all of the Members to understand exactly what is involved.

As I said earlier in my remarks, the committee received a letter from the chairman of the Appropriations Energy Subcommittee back in May pointing out that he had learned from the Washington Post that an environmental impact study was going to be conducted at the Pantex nuclear weapons plant at Amarillo, Tex. That is the plant at which all of our nuclear weapons are assembled.

The fact of the matter is that, as we are aware, in the nuclear field we have turned the corner under this present administration. The United States has undertaken a major program to increase our nuclear weaponry. Under both President Carter and President Reagan, we have begun to move to close the gap between ourselves and the Soviets in nuclear weaponry. I refer to the MX, the air-launched cruise missile, the ground- and sea-launched cruise missile, the Pershing II, and the Lance nuclear artillery weapons. We are trying to close a window of vulnerability that will probably continue for another 4 or 5 years.

The role of the Department of Energy in this process is to provide the weapons and specifically the warheads for these weapons that we require. This is going to involve the expenditure of a great deal of Federal money and, more importantly, if we are going to close this window quickly, the Department of Energy is going to have to meet very exacting time schedules. Over the next few years the Department will have to retire thousands of old weapons and recover the nuclear material in them and then provide material for new weapons and produce thousands of new weapons. This involves a very extensive expansion.

One of the major concerns expressed by witnesses from the Department of Energy was that their schedule for weapons deliveries could easily be delayed because of the impact of the National Environmental Policy Act type lawsuits. The provisions of NEPA would appear to apply under the law only to major Federal actions that affect the environment and that took place after 1970, the effective date of that act.

Clearly, Congress did not intend for the Government to go backward and go into NEPA policies on things that have been in operation prior to that point.

But during the past administration, it became fashionable to sue the Federal Government over environmental impact statements and in South Carolina and at Oak Ridge, Tenn., both installations which predated the NEPA, EPA was actually encouraging local citizens to bring suit against other agencies of the Government.

Environmental impact statements take a long time to complete and they cost millions of dollars. If the enlargement and refurbishment of weapons facilities is going to have to wait for this environmental impact statement process, the defense of the Nation is going to suffer very definitely.

We are in a bind with this particular amendment. If the enlargement proposed for the Pantex plant in Texas is going to have to wait for completion of the environmental impact process to be carried out, the national defense is certainly going to be delayed, as much as 2 years. If, however, the impact statement that has been agreed to is going to be carried on at the same time that the construction work at Pantex goes along, then there is no real point in having an environmental impact statement at all. The end result is already predetermined.

The committee amendment would, therefore, prohibit the use of any funds in this bill for developing environmental impact statements at vital defense energy establishments.

The CHAIRMAN. The time of the gentleman from New York has expired.

(By unanimous consent, Mr. STRATTON was allowed to proceed for 3 additional minutes.)

Mr. STRATTON. I hope that we can have order, Mr. Chairman, not because I am enchanted with the sound of my own voice, but only because this is a rather complicated subject and one that is I think of vast concern to the defense of the Nation.

The section in controversy provides that pursuant to an authorization of appropriation, no funds may be obligated or expended for the purpose of preparing any environmental impact statement with respect to the operation of the Pantex nuclear weapons plant at Amarillo, Tex., or at any other defense facility of the Department of Energy unless the preparation of that statement is required by statute.

It is not of course required by statute in the case of the Pantex plant which was in operation long before NEPA was enacted. This case came immediately to the attention of the subcommittee because of the agreement of the Department of Energy to go ahead with an environmental impact statement anyway, even though it was not required.

As I previously said, we undertook to put this section in our bill at the suggestion of the chairman of the Subcommittee on Energy of the Appropriations Committee, the gentleman from Alabama (Mr. BEVILL).

Mr. Chairman, I will be very happy to yield to the gentleman from Alabama (Mr. BEVILL).

Mr. BEVILL. Mr. Chairman, I thank the gentleman for yielding. I commend him and his committee for addressing this very important issue. As we know, the Council on Environmental Quality and the Environmental Protection Agency have expanded their jurisdiction through their own regulations.

Mr. Chairman, I rise in support of the committee amendment and wish to commend this committee for its foresightedness in addressing this issue. The unnecessary application of EIS requirements not required by statute could slow down the manufacture of some very important, highly classified weapons. The decision to prepare an EIS after a facility has been operating over 30 years is certainly out of place. It is something that this coun-

try just cannot afford to get into, slowing down and bogging down the production of these very important, highly classified weapons.

So I just want to commend the subcommittee chairman, his committee and subcommittee, that offered this amendment. I rise in support of it.

Mr. DINGELL. Mr. Chairman, I rise to strike the requisite number of words.

Mr. Chairman, I find this an interesting amendment. I would like the attention of the chairman of the subcommittee or the author of the amendment, or one of my colleagues to try to understand exactly what is done here.

As I gather, there is an attempt here to limit funds, or rather, to be expended for the preparation of environmental impact statements; is that correct?

Mr. STRATTON. The gentleman is correct, that none of the funds contained in this authorization can be obligated or expended for the purpose of preparing any environmental impact statement with respect to the operation of the Pantex nuclear weapons plants at Amarillo, Tex., or any other defense facility of the Department of Energy unless the preparation of such statement is required by statute.

Mr. DINGELL. I see.

Mr. STRATTON. That is in the bill and it is available for anybody that can read, actually.

Mr. DINGELL. What I am trying to figure out, what this says, though, is that if preparation of an environmental impact statement is required by statute, that funds will then be available for the preparation of such impact statement; is that correct?

Mr. STRATTON. That is correct; yes.

Mr. DINGELL. I see. I thank the gentleman, because I point out that under section 102(2)(C) of NEPA, if a matter is determined to be a major Federal action, and so forth, then NEPA itself—which is, of course, a statute—requires preparation of an EIS. This is understood under longstanding and numerous court decisions concerning NEPA. Many of those decisions also make it clear that NEPA applies to actions that took place prior to its enactment in 1970 as well as those that took place after 1970. The gentleman's explanation of the language is quite helpful in explaning the meaning of the provision. If the determination is made under NEPA, then funds shall be used to prepare the EIS. I just wanted to emphasize all this as the chief author of NEPA. I thank the gentleman.

Mr. HIGHTOWER. Mr. Chairman, I move to strike the requisite number of words. I rise in opposition to the amendment.

Mr. Chairman, I rise in opposition to section 211 of the bill, H.R. 3413, for precisely the same reasons that Chairman STRATTON says that the provision is made. This involves the preparation of an environmental impact statement for the Pantex nuclear weapons plant at Amarillo, Tex., and other DOE defense facilities.

The Pantex nuclear weapons plant in my district is the only facility in the United States which assembles nuclear weapons. For national security reasons, it is vital that this plant be allowed to continue to operate.

The House Armed Services Committee recognizes this when it says in its report that the Department of Energy must provide the necessary nuclear warheads before the MX, the cruise missile, Trident, and other nuclear weapons achieve an initial operating capability.

Unless action is taken, a serious shortage of nuclear materials will occur within the 1980's. Of course, Chairman STRATTON wants and I want action to prevent this; but let me go ahead with the background behind this amendment. Because of the growing number of nuclear weapons being assembled at the Pantex plant and the anticipation that more capacity will be needed, it was decided that the Pantex operations would be expanded. The authorization for this expansion is contained in this bill before us today.

In June of last year, suit was brought by a group of concerned, respected citizens in my district, claiming that the expansion of the Pantex plant violated the environmental impact statement requirements of the National Environmental Policy Act.

The Department of Energy negotiated with this group and agreed to do an environmental impact statement on the plant expansion. In exchange for this promise of preparation of the impact statement, the group bringing the suit agreed to terminate the lawsuit and give up the right to request an injunction to halt the Pantex expansion.

In other words, the Department of Energy entered into a contractual obligation to do the environmental impact statement.

There are a number of reasons for going ahead with the DOE impact statement at the Pantex plant. For one thing, DOE has done an environmental impact statement on nearly every other major nuclear facility. I say this particularly for the benefit of my friend and colleague on the Appropriations Committee, Chairman BEVILL.

□ 1600

Rockie Flats, Los Alamos, Sandia, most have had full-blown environmental impact statements done by the Department of Energy. There is no reason why the Pantex facility should be singled out to be exempt from a study that has been done in all other nuclear facilities.

A second reason is that if DOE fails to live up to its contractural obligations with the plaintiffs in the former suit, my colleagues can count on the plaintiffs reopening that suit in the court, something that I do not want to happen.

I have been assured by the attorney for the plaintiffs that an injunction to halt Pantex's expansion will be sought. We must not let that happen.

If this injunction is granted, then expansion of the Pantex facility, this very critical facility that the Armed Services Committee report says is critical to our national defense security needs, could be delayed indefinitely. Under the present agreement, construction is going on. Nothing is being delayed.

What could have been a very difficult situation has been ironed out. In a settlement we put the cap or put a lid on a troubled situation that could have caused difficulty. But we have an environment in our community of wanting that facility. We do not want it moved, but we want it operated safely and for the protection of everybody, and that is all that anybody, any Member of this House would want.

But another good reason for allowing DOE to continue with its statement is simply that the agency has promised it would do so. It was negotiated in good faith. It is a mistake to retroactively terminate DOE's ability to make good its promise. These studies have already begun. Hearings have already begun on the impact statement.

The CHAIRMAN. The time of the gentleman from Texas has expired.

(By unanimous consent, Mr. HIGHTOWER was allowed to proceed for 5 additional minutes.)

Mr. HIGHTOWER. Section 211 makes no sense no matter how one looks at it, and I am not the only one who believes this.

On June 8 of this year the Office of Management and Budget issued a position statement:

> Although the administration supports House passage of H.R. 3413, it urges deletion of section 211 which concerns the application of the environmental impact statement to DOE defense facilities. Section 211 is unnecessary and could lead to needless litigation.

This document I have just quoted from was signed by officials from the Office of Management and Budget, the Department of Energy, the Council on Environmental Quality, the Environmental Protection Agency, and the Department of Justice. The administration's position is that this provision should not be in the bill.

Mr. Chairman, the only opposition to allowing the Pantex environmental statement to be completed seems to be coming from the committee itself. I believe the committee has misread the situation. I had one DOE official say

to me, "If people think they are helping us by passing section 211, they are not. They are hurting us."

I strongly urge my colleagues in the House to pay attention to the comments of the executive agencies and vote to delete this committee amendment from the body of the bill.

I yield back the balance of my time.

Mr. STRATTON. Mr. Chairman, I move to strike the requisite number of words.

Mr. Chairman, I think we ought to understand just how significant this whole issue is. The gentleman from Texas (Mr. HIGHTOWER) and I are both in agreement that we want the development of nuclear weapons to continue and we want the development of nuclear weapons to continue at Pantex in Amarillo where 2,000 people are involved.

But the problem is that if you have an environmental impact statement underway, there is no assurance that the operations of the installation which is being environmentally examined can continue. We have a number of court decisions on the books to demonstrate that. The whole purpose of an environmental impact statement is to take a look at the environment where a particular activity is going on and see whether the environmental circumstances there are such as to protect the health and welfare of the people and the flora and fauna or whatever it may be.

The gentleman from Texas (Mr. HIGHTOWER) has pointed out that the group which was opposing the Pantex plant and had brought a suit against the Government, agreed to cease and desist and allow the operations of the Pantex plant to continue while the environmental impact statement was in preparation.

But the fact of the matter is that some other environmental group can still go to court and demand that the operations be suspended in line with prior Supreme Court decisions. In this particular case at Pantex the Federal Register outlines exactly what the environmental statement is going to be looking for as far as Pantex is concerned. They say they intend to analyze a range of alternatives to the operations presently taking place at Pantex.

Alternatives which they identified were continued operation and new facilities at Pantex; relocation of some or all of Pantex's operations to existing facilities elsewhere; and even relocation of all operations to new facilities at another site near Burlington, Iowa.

Well, if there is a chance that the EIS would require the transfer of the operations of Pantex to Burlington, Iowa, or if we are going to close them down because they are not safe enough, it so happens that there is $28 million in this bill to proceed with new construction at Pantex. What is the point of proceeding with any new construction there if these people in DOE are going to come up after the EIS has been developed and say, "No, we ought to move this to Burlington, Iowa."

The United States Code Annotated, title 42 on environmental policy in section 4332 notes that a Supreme Court decision indicates that—

> Balancing of the equities required that work on proposed New Melones Dam project be permitted to continue but that the actual construction not be permitted to continue while the environmental impact statement was being supplemented to deal with tentative alternative uses to which conservation yield might be put.

Another case in Hawaii states:

> Even if particular segments of a project have no appreciable effect on the environment, work on such segments cannot be allowed to go forward, absent showing of irraparable injury from delay.

This means that the Federal Government, in other words, if somebody wants to go to court and cite these cases, they will be able to stop the operations at Pantex, regardless of what the gentleman from Texas has said, regardless of what the peace organizations there have agreed to do, and regardless of what the Department of Energy says until the environmental impact statement has been completed.

So it simply is a question whether this House thinks seriously enough about building up our nuclear arsenal to match the Russians, and thus enable us to go to a SALT negotiation from a position of strength, or whether we are willing to tie up the whole nuclear weapon schedule by permitting these unneeded environmental impact statements to continue.

The CHAIRMAN. The time of the gentleman from New York has expired.

(At the request of Mr. HIGHTOWER, Mr. STRATTON was allowed to proceed for 5 additional minutes.)

Mr. HIGHTOWER. Will the gentleman yield?

Mr. STRATTON. I yield to the gentleman from Texas (Mr. HIGHTOWER).

Mr. HIGHTOWER. In the first place, we are talking about construction that is going ahead. As was pointed out, the agreement was, in the dismissal of the lawsuit, that they go ahead with the construction.

In addition to what has already been authorized and already been appropriated, there are plans in future years for the construction of about $35 million more. Certainly we should go ahead and do what we ought to do, but have we really been wise, have we spent the taxpayers' dollars correctly if, after we have built all of this, we find that we do not have the water resources to support that new construction?

What we want to do is go ahead with the plans that have already been made, with the authorized money which has already been appropriated. We believe there is no question about that. I hope the environmental impact statement will say that there are going to be water resources there that will take care of the future planned expansion. But if there is not, we have wisely planned now instead of waiting at some future time and saying, "Well, we made a mistake, we did not have the water to do it; we are sorry, we are going to have to go somewhere else." If some other decision is going to have to be made, let it be made properly. Let it be made in the time frame that we will have to do it and not sit back and say we are not even going to look at that until it is too late.

Mr. STRATTON. If the gentleman wants the environmental impact statement to go forward and if the environmental impact statement ultimately finds there is not enough water or not enough something else and says "No, you cannot properly carry out additional construction at Pantex, and you will have to move to Burlington, Iowa," then what is the point of our having spent $23 million in this bill for construction in Texas?

You either have to wait until the results of the environmental impact statement are in or else the whole exercise is a phony.

Mr. HIGHTOWER. No; we believe we have everything we need for now.

Mr. STRATTON. The gentleman believes that, but——

Mr. HIGHTOWER. That is right.

Mr. STRATTON. But the purpose of the environmental impact statement is for the Government to determine that fact, not guess at it.

Mr. HIGHTOWER. The previous study was done and should not the Government find out, should they not know how they are going to spend the $55 million.

Mr. STRATTON. But why should we spend the money if the gentleman says everything is OK now. If it is OK, why inquire at all? This is the thing we object to, having the Department of Energy yield to these groups and spend $2 million or $3 million of the Government's money to try to find out something when that effort is not required by statute, and when the Congressman from the district is certain that all of the requirements are met. We are wasting the taxpayers' money, are we not?

Mr. HIGHTOWER. If I was not certain, I would say so. But the thing is we should do things orderly and we have worked out an agreement. We have a good situation. We should abide by the agreement. What we are doing here is saying it does not make any difference what the court said, and the Department of Energy is not just caving in. They do not just cave in. The Department of Justice and the Department of Energy said that there

should be an environmental statement. If they needed one at Los Alamos and Sandia and other places, why not have one at Amarillo?

Mr. STRATTON. The gentleman from Alabama (Mr. BEVILL) in the letter I read earlier, has indicated that the Department of Energy has been caving in on these matters for some time. Maybe it is all right in some areas. But when it comes to trying to build nuclear warheads for the MX and the Trident missiles, an air-launched cruise missile, I do not think we can afford the risk of the kind of interruptions and uncertainty that this environmental study inevitably entails. Someone has got to have the guts to stand up and support our defense program and not let the people down in the DOE give everything away.

I urge that the committee amendment be adopted.

AMENDMENT OFFERED BY MR. HIGHTOWER AS A SUBSTITUTE FOR THE COMMITTEE AMENDMENT

Mr. HIGHTOWER. Mr. Chairman, I offer an amendment as a substitute for the amendment.

The Clerk read as follows:

Amendment offered by Mr. HIGHTOWER as a substitute for the committee amendment: Strike all of section 211 and insert the following:

RESTRICTION ON ENVIRONMENTAL IMPACT STATEMENT PREPARATION

SEC. 211. No funds appropriated pursuant to an authorization of appropriations contained in this Act may be obligated or expended for the purpose of preparing any environmental impact statement not already in the process of preparation with respect to the operation of any defense facility of the Department of Energy unless the preparation of such statement is required by statute.

Mr. HIGHTOWER. Mr. Chairman, what this does is just take the Amarillo situation out. If they want to require an environmental impact statement at future installations, that is fine; I have no problem with that. But we have an agreement here. We have a situation that requires it.

I think we have not really served our constituents, my constituents or yours, any taxpayers if we say that we are not going to pay any attention to what the natural resource requirements are for a particular facility.

I am as much a proponent of my district as any chamber of commerce man there, but I would not stand up and ask that we put a shrimp-packing plant in Amarillo, Tex., because we do not have the shrimp and we do not have the water, and we are not going to get it.

If we do not have the natural resource requirements, why should we close our eyes and say we want to build it there?

□ 1615

I want us to go ahead and build or expand on what we have. After careful studies, the authorization was granted; the money has been appropriated; let us go ahead. But before we do anything else, we will have this environmental impact statement. Under the present authorizations, under the present appropriations, we are all right, and we want to go ahead and proceed, but we do not want to be precluded from not going further down the line if we can. And we want to do it.

Mr. SEIBERLING. Mr. Chairman, will the gentleman yield?

Mr. HIGHTOWER. I will be happy to yield to the gentleman from Ohio.

Mr. SEIBERLING. I thank the gentleman for yielding. I would just like to ask the gentleman something. As I understand it, the Department of Energy agreed in the settlement of a lawsuit to prepare an environmental impact statement; is that correct?

Mr. HIGHTOWER. That is correct.

Mr. SEIBERLING. So what the committee amendment would do is to say that you have to carry every case through to litigation and you cannot settle it because if you settle it, you have agreed to it, and someone can argue that it was not required by statute because you voluntarily agreed; is that not right?

Mr. HIGHTOWER. That is my understanding, and contrary to the idea of Mr. STRATTON's about it, I do not think that this is going to keep us out of the courts. If this amendment were to pass as it is, not my substitute, but the amendment to the bill, I am afraid that we will be right back into court because of the agreement having been abrogated, and that we might run into a situation where we would have some kind of injunction. We have got a good situation. We have a good local situation. Let us not disturb it. We want to go ahead. We want to fulfill the mission of the Pantex plant. We want to build those nuclear weapons, and we want to build them in an orderly and sensible way.

Mr. SEIBERLING. If the gentleman will yield further, I think he makes a very persuasive argument in this case. What disturbs me about the committee amendment, though, quite apart from his case, is that it would mean that the Government could not settle litigation involving an environmental impact statement. They would always have to pursue them all the way to a final court judgment, which could actually end up costing more and taking more time.

Mr. HIGHTOWER. We might be accused of caving in.

Mr. SEIBERLING. I thank the gentleman.

Mr. STRATTON. Mr. Chairman, will the gentleman yield?

Mr. HIGHTOWER. I will be glad to yield to the gentleman from New York.

Mr. STRATTON. I thank the gentleman for yielding. I certainly understand the gentleman's interest in his own district and in continuing production in his district. But I think that his amendment really boils down to saying that we will stop all of the environmental impact statements except the one at Amarillo, Tex. This is a little bit like somebody on a diet saying, well, I will eat this chocolate mousse tonight and I will begin the diet tomorrow.

I will predict that if this amendment, this substitute amendment, succeeds, you are going to see environmental groups not only at Amarillo, but you are going to see them at Los Alamos and Livermore; and all the antinuclear people are going to be encouraged because they are going to know that Congress has backed up the Department of Energy and said, let them go ahead with delays on any production at any nuclear plant, even though it is not required by statute. I hope the substitute amendment will be rejected.

Mr. HIGHTOWER. If I might reply to that, what we have said in the substitute amendment is this would cut off all environmental impact statements not already in the process of preparation, which would make it possible for us to go ahead and complete the situation at Amarillo, but in every other respect, Mr. Chairman, it would be exactly as you have it.

Mr. STRATTON. I just hope we do not appropriate this $23 million and then have the Texas plant end up at Burlington, Iowa. That is my concern.

Mr. HIGHTOWER. I do not want to do that either. That is why I am working at this point.

Mr. McCURDY. Mr. Chairman, will the gentleman yield?

Mr. HIGHTOWER. I will be glad to yield to the gentleman from Oklahoma.

The CHAIRMAN. The time of the gentleman has expired.

(At the request of Mr. McCURDY, and by unanimous consent, Mr. HIGHTOWER was allowed to proceed for 2 additional minutes.)

Mr. McCURDY. If the gentleman will yield, does he have a time frame? Has there been an agreement as to when this environmental impact statement is due?

Mr. HIGHTOWER. Yes; the final is supposed to be in 1982. I believe it is October 1982. But in the meantime construction is proceeding. It is not slowing up anything. Nobody is waiting. That was part of the agreement we got when we settled the lawsuit.

Mr. McCURDY. Is that a written agreement?

Mr. HIGHTOWER. Yes; it is approved by the Federal court.

Mr. McCURDY. All right. I am on the subcommittee that handled that.

At the time we were discussing this, this, of course, was not presented. We did not have that information.

Mr. HIGHTOWER. I regret that.

Mr. McCURDY. All right. I tend to support the gentleman's amendment in this particular situation, provided that it is something that is in the court record. The gentleman has some confirmation of an agreement that there is going to be a set time frame and, hopefully, we can get this thing resolved.

Mr. HIGHTOWER. Yes.

The CHAIRMAN. The question is on the amendment offered by the gentleman from Texas (Mr. HIGHTOWER) as a substitute for the committee amendment.

The question was taken; and on a division (demanded by Mr. HIGHTOWER) there were—ayes 38, noes 28.

RECORDED VOTE

Mr. STRATTON. Mr. Chairman, I demand a recorded vote.

A recorded vote was ordered.

The vote was taken by electronic device, and there were—ayes 233, noes 122, not voting 76, as follows:

[Roll No. 74]

□ 1630

The Clerk announced the following pairs:

On this vote:

Mr. Hollenbeck for, with Mr. Nelligan against.

Mr. Paul for, with Mr. Quillen against.

Mr. Porter for, with Mr. Trible against.

Mr. Roberts of South Dakota for, with Mr. Vander Jagt against.

Mr. Rudd for, with Mr. Hartnett against.

Mr. Skeen for, with Mr. Derwinski against.

Mr. Wylie for, with Mr. Kramer against.

Messrs. DANNEMEYER, SMITH of Oregon, HUNTER, SILJANDER, DANIEL B. CRANE, COLEMAN, ROUSSELOT, KEMP, and FOUNTAIN changed their votes from "aye" to "no."

Messrs. FRANK, MOFFETT, BARNARD, and DOWNEY, Ms. OAKAR, Mr. JAMES K. COYNE, Mrs. FENWICK, Mr. GILMAN, and Mr. LONG of Maryland changed their votes from "no" to "aye."

So the amendment offered as a substitute for the committee amendment was agreed to.

The result of the vote was announced as above recorded.

The CHAIRMAN. The question is on the committee amendment, as amended.

The committee amendment, as amended, was agreed to.

AMENDMENT OFFERED BY MRS. SCHROEDER

Mrs. SCHROEDER. Mr. Chairman, I offer an amendment.

The Clerk read as follows:

Amendment offered by Mrs. SCHROEDER: Page 16, line 4, insert "(a)" after "SEC. 210.".

Page 16, after line 23, add the following:

(b)(1) No funds appropriated pursuant to an authorization of appropriations contained in this Act may be obligated or expended for the purpose of contracting for, or of fulfilling obligations under any previously existing contract for, the performance of security and protective functions at the Los Alamos National Laboratory.

(2) Nothing in paragraph (1) shall prevent the Secretary of Energy from obligating or expending funds for the purpose of terminating, as rapidly as possible after the date of the enactment of this Act, any existing contract for the performance of security and protective functions at the Los Alamos National Laboratory.

(3) Notwithstanding the provisions of the Office of Management and Budget Circular A-76, "Policies for Acquiring Commercial or Industrial Products and Services Needed by the Government", the security and protective functions at the Los Alamos National Laboratory shall be performed by Government personnel and shall not be subject to performance by contract.

Mrs. SCHROEDER (during the reading). Mr. Chairman, I ask unanimous consent that the amendment be considered as read and printed in the RECORD.

The CHAIRMAN. Is there objection to the request of the gentlewoman from Colorado?

There was no objection.

Mr. STRATTON. Mr. Chairman, will the gentlewoman yield?

Mrs. SCHROEDER. I yield to the gentleman from New York, to whom I have shown the amendment.

Mr. STRATTON. I thank the gentlewoman for yielding.

Mr. Chairman, we on this side have had an opportunity to review the amendment offered by the gentlewoman from Colorado. We have no objection to the amendment and we are prepared to accept it.

Mrs. SCHROEDER. I thank the gentleman from New York for his comments.

Mrs. HOLT. Mr. Chairman, will the gentlewoman yield?

Mrs. SCHROEDER. I yield to the gentlewoman from Maryland.

Mrs. HOLT. I thank the gentlewoman for yielding, and I want to commend the gentlewoman for offering this amendment.

This was a subject of hearings in Los Alamos. I think it is absolutely essential that we have Federal guards at this facility, so I am very pleased to say that I accept the amendment.

Mrs. SCHROEDER. I thank the gentlewoman.

Mr. LUJAN. Mr. Chairman, will the gentlewoman yield?

Mrs. SCHROEDER. I yield to the gentleman from New Mexico.

Mr. LUJAN. I thank the gentlewoman for yielding.

Mr. Chairman, the entire congressional delegation from New Mexico is concerned because we are proud of our laboratories and would certainly not want to see anything happen here.

There are a number of issues that I wish to address this morning:

First and foremost, it is my feeling that under a contract arrangement, security would suffer. For example, the ground force today cannot go on strike, a contract guard force can.

As a matter of fact, the Los Alamos guard force has been used as a backup when strikes have occurred in Las Vegas. It is essential that we keep such a force in Los Alamos to fill in in sensitive areas during strikes.

Where does this stop? The next thing we hear is a contract fire department.

The guard force is composed 100 percent of veterans. There is no veteran's preference requirements in the contract.

Cost: The claim is made that the cost under a contract arrangement will be less. While money is important, security is paramount. But, what I cannot understand is if the contractor can save $3 million why the Department of Energy cannot do the same through better management.

The figures are suspect. For example: $1 million per year is now allocated to overhead and $264,000 for general administrative expense under a Government operation, but only $176,000 for contract administration and $13,000 for general and administrative expense under contract. Can a cost-plus contract really be cheaper?

What about the employees? What happens to those that have paid in several years to a retirement plan?

Let me point out that there are about 150 positions. The need is for 250. If the 250 are hired under contract, what happens to the 150 positions now authorized? I suspect that they will be distributed throughout DOE to be used in other areas.

There is no question that there is a need to beef up security in Los Alamos but the solution is to authorize an additional 100 slots in the guard force.

Mrs. SCHROEDER. I thank the gentleman.

Mr. Speaker, since the Members know what the amendment is all about, I yield back the balance of my time.

The CHAIRMAN. The question is on the amendment offered by the gentlewoman from Colorado (Mrs. SCHROEDER).

The amendment was agreed to.

Mr. HERTEL. Mr. Chairman, I move to strike the last word.

□ 1645

Mr. Chairman, I rise to address the bill as amended at this point. I think we have an inconsistency in the bill at this time. The Hightower amendment to the committee amendment now states in the bill that aside from one project in Texas, all other defense facilities in the DOE will be exempted from the National Environmental Protection Act, unless there is a latter statute or another statute on the books that specifically says they shall come under NEPA. I do not think that is the intent of this body. I opposed that amendment in the committee for this very reason. I do not think that any of us in our States or districts wants to automatically say that Department of Energy defense facilities will be exempted from NEPA. So, I opposed that amendment.

I think the Hightower amendment shows the great inconsistency in the fact that that can happen to any one of us in our districts or in our States, too, to be in that very same problem of saying they are exempted from NEPA.

Mr. STRATTON. Mr. Chairman, will the gentleman yield?

Mr. HERTEL. I yield to the gentleman from New York.

Mr. STRATTON. I certainly would not quarrel with the gentleman's point of view, but I think the record ought to be absolutely clear that there is nothing in the amendment which the House has adopted which exempts anybody from NEPA. It simply says that none of the funds in the act shall be expended for environmental impact statements of defense facilities that are not required by statute.

Mr. HERTEL. I thank the gentleman for the clarification and I agree. But then how could things proceed with NEPA if those facilities cannot be defended with funds either in this act in that way? What then is the purpose of the committee amendment?

Mr. STRATTON. The only thing that NEPA covers are those things that are required by the statute.

Mr. HERTEL. Mr. Chairman, I reluctantly arise at this late hour, but I felt I did have to be consistent. I did feel there was some misunderstanding amongst the Members of the House.

Mr. LEVITAS. Mr. Chairman, will the gentleman yield?

Mr. HERTEL. I yield to the gentleman from Georgia.

Mr. LEVITAS. I thank the gentleman for yielding.

I would like to ask the gentleman this question: It is my understanding that the amendment has the effect that the gentleman has indicated, but that in terms of environmental concerns it was an improvement over the language that was in the committee bill as reported to the House.

Would the gentleman care to comment on that?

Mr. HERTEL. I would disagree. I think clearly the aim is to get away from NEPA. That was the aim of the committee amendment. I think the Hightower substitute shows the need in fact not to have this committee amendment.

Mr. LEVITAS. If the gentleman would yield further, did the committee position in the bill as reported, did it require environmental impact statements for these same projects?

Mr. HERTEL. There is a question as counsel to the committee points out, as to whether something is a major change in an existing facility and therefore whether NEPA should be brought in or not. That might be alluded to in the amendment where it talks about referring to other statutes at the end of the substitute amendment as it is before the House now.

My point is that as I read the committee amendment as substituted and as previous to the discussion, it says that NEPA will not operate when there is a defense facility under DOE.

Mr. LEVITAS. If the gentleman will yield further, it seems to me that whatever the merits or demerits, that the Hightower amendment may be less damaging than the committee position.

I thank the gentleman.

Mr. HERTEL. The Hightower amendment I think just clearly shows the problem with the committee amendment itself because what it does is allow the gentleman from Texas to exempt one facility from the damage that we do to NEPA and the law.

Mr. ROEMER. Mr. Chairman, will the gentleman yield?

Mr. HERTEL. I yield to the gentleman from Louisiana.

Mr. ROEMER. I thank the gentleman for yielding.

The gentleman agrees then that the Hightower amendment does less than the damage committed by the committee in the original amendment; is that not true?

The CHAIRMAN. The time of the gentleman from Michigan (Mr. HERTEL) has expired.

(By unanimous consent Mr. HERTEL was allowed to proceed for 1 additional minute.)

Mr. HERTEL. Very briefly, what it does is just say the plant from Texas is exempted, only that plant. So it only improves it for that gentleman's district, yes. But it points out that some of us might have that problem in the future just as the gentleman brought it to the floor in substituting the committee's amendment. I think my point is clear.

The CHAIRMAN. Are there further amendments to the bill?

If not, under the rule, the Committee rises.

Accordingly the Committee rose, and the Speaker having resumed the chair, Mr. RAHALL, Chairman of the Committee of the Whole House on the State of the Union, reported that that Committee, having had under consideration the bill (H.R. 3413) to authorize appropriations for the Department of Energy for national security programs for fiscal year 1982, and for other purposes, pursuant to House Resolution 155, he reported the bill back to the House with sundry amendments adopted by the Committee of the Whole.

The SPEAKER. Under the rule, the previous question is ordered.

Is a separate vote demanded on any amendment? If not, the Chair will put them en gros.

The amendments were agreed to.

The bill was ordered to be engrossed and read a third time, was read the third time, and passed, and a motion to reconsider was laid on the table.

PARLIAMENTARY INQUIRY

Mr. JOHN L. BURTON. Mr. Speaker, I have a parliamentary inquiry.

The SPEAKER. The gentleman will state his parliamentary inquiry.

Mr. JOHN L. BURTON. Mr. Speaker, I was on my feet asking for the yeas and nays.

Mr. SPEAKER. The request comes too late. The motion to reconsider has been laid on the table.

AUTHORIZING CLERK TO MAKE CHANGES IN SECTION NUMBERS, CROSS-REFERENCES, PUNCTUATION, AND OTHER TECHNICAL CORRECTIONS IN ENGROSSMENT OF H.R. 3413

Mr. STRATTON. Mr. Speaker, I ask unanimous consent that the Clerk, in the engrossment of the bill, H.R. 3413, be authorized and directed to make such changes in section numbers, cross references, punctuation, and other technical corrections as may be required.

The SPEAKER. Is there objection to the request of the gentleman from New York?

There was no objection.

GENERAL LEAVE

Mr. STRATTON. Mr. Speaker, I ask unanimous consent that all Members may have 5 legislative days in which to revise and extend their remarks and to include extraneous matter on the bill, H.R. 3413, just passed.

The SPEAKER. Is there objection to the request of the gentlemen from New York?

There was no objection.

LEGISLATIVE PROGRAM

(Mr. LOTT asked and was given permission to address the House for 1 minute.)

Mr. LOTT. Mr. Speaker, I ask for this 1 minute for the purpose of inquiring as to the legislative schedule for next week.

Mr. FOLEY. Mr. Speaker, will the gentleman yield?

Mr. LOTT. I yield to the distinguished majority whip, the gentleman from Washington (Mr. FOLEY).

Mr. FOLEY. I thank the distinguished Republican whip.

Mr. Speaker, the program for next week is as follows:

The House will meet at noon on Monday and will consider the Consent Calendar. There are no suspensions.

The House will then consider H.R. 2614, the Department of Defense Supplemental Authorization Act of 1981, an open rule, with 1 hour of general debate. The rule has been adopted, but we will consider the bill for general debate only. It is not anticipated that there will be any votes on Monday next.

Tuesday, the House will meet at noon and we will have the call of the Private Calendar.

Again there will be no suspensions.

The House will take up H.R. 3480, the Legal Services Corporation Act. The rule was adopted today. It is a 1-hour rule. It is subject to amendments printed in the RECORD 48 hours in advance.

Wednesday and the balance of the week, the House will continue consideration of H.R. 3480, the Legal Services Corporation Act, and will complete consideration, and also consider H.R. 2614, the Department of Defense Supplemental Appropriations Act, on which we adopted the rule today. We would then consider H.R. 3238, the Public Broadcasting Act amendments, under an open rule, with 1 hour of debate.

I would like to advise, Mr. Speaker, all Members, that there is a possibility of a Friday session next week. We intend to complete the business scheduled for Wednesday and the balance of the week and that may well involve a Friday session. So Members should be put on notice that at this time there is a possibility of a Friday session next week.

Mr. LOTT. I would like to ask a series of questions, if I could. First of all, I would like to again inquire—there will be no business tomorrow?

Mr. FOLEY. The gentleman is correct. When the House adjourns tonight, it will be my purpose to ask unanimous consent to adjourn until Monday next.

Mr. LOTT. And no votes on Monday?

Mr. FOLEY. There are no votes planned on Monday because the House will only be taking up general debate. Obviously all Members are advised that procedural votes could occur. It is the hope on both sides that they do not, but it is always possible.

Mr. LOTT. I note on here that there are no anticipated suspensions either on Monday or Tuesday, however sometimes suspensions do have a way of appearing on the schedule on short notice. Do we have any feel about suspensions?

Mr. FOLEY. At the present time we do not have any plans to bring matters before the House on suspension. It is certainly always a possibility.

Mr. LOTT. Now on Tuesday I take it that the amendments would be in order and we probably will have votes on Tuesday on amendments to the Legal Services Corporation; is that correct?

Mr. FOLEY. It is anticipated that we will have amendments considered on Tuesday, that is correct.

Mr. LOTT. As I look at the schedule here for Wednesday and the balance of the week, I see only three bills. It is possible, I presume, that we could finish that on Thursday and if we do finish it on Thursday, then we might not have a session on Friday; is that correct? Although there is a possibility.

Mr. FOLEY. If the gentleman will yield further, if we complete the business which I have announced for Wednesday and the balance of the week by Thursday afternoon, it would not be the plan to meet on Friday, but it depends on how expeditiously the House proceeds with the schedule

which is announced for Wednesday and the balance of the week.

Mr. LOTT. Just one final question: I see that reconciliation is not on the schedule for next week. Do we have any idea at this point when the reconciliation matter would be considered on the floor?

Mr. FOLEY. We anticipate it will be the following week.

The SPEAKER. May the Chair respond to that? The leadership had intended to bring up the reconciliation on Thursday and Friday of next week. As the gentleman knows, the document may be quite large, possibly with a report of over 4,000 pages. In view of the fact that it cannot be printed in sufficient time to be available to the Committee on Rules, consideration will be postponed. The minority may well be also offering a document and the majority may be offering a document. So after the Rules Committee reports a rule, the leadership might schedule the bill so that sometime—be available for Members to study the bill.

So it is doubtful that the bill can be scheduled the week after next. But if it is possible, the leadership will do that. It will be scheduled as quickly as it possibly can.

Mr. LOTT. I thank the Speaker and I yield to the gentleman from New York (Mr. SOLOMON).

Mr. SOLOMON. To the Republican whip or the majority leader, I would like a clarification on the Legal Services Corporation legislation.

Do I understand we will be allowed to file amendments with the desk on Monday and that will consititue 48 hours, being 2 working days, Monday and Tuesday?

Mr. LOTT. I yield to the gentleman from Washington (Mr. FOLEY) if he would care to respond to that.

The SPEAKER. The Chair will answer that the bill will be up on Tuesday for general debate and for amendments. It is not anticipated, in view of the interest in the bill, that the House will be able to complete the bill on that day.

□ 1700

So, any amendment that would be offered on Tuesday would have to be filed today. Any amendment filed on Monday could be offered on Wednesday if offered to a portion of the bill not yet read.

The chairman of the Judiciary Committee is present. The Chair is sure he can answer the question.

Mr. SOLOMON. Would the distinguished minority whip yield further?

Mr. LOTT. I would be glad to yield to the gentleman further.

Mr. SOLOMON. If I understood the Speaker correctly, he said that we have to file amendments today that would be allowed on Tuesday on the Legal Services Corporation.

Mr. LOTT. That is correct.

Mr. SOLOMON. That is outrageous.

Mr. LOTT. I might say, of course, he did go on to say that if we did not complete consideration on Tuesday, amendments filed in the RECORD on Monday would be in order, but if we do finish it on Tuesday the gentleman is right, they would have to be in here today. That is why I voted against the rule, one of the reasons. We do not do it ordinarily, but I felt there was a possibility that some Members could have difficulties as a result of the rule.

Mr. SOLOMON. For those Members that made the mistake of voting for that rule, I think they understand why most of us voted against that rule, for that very reason.

Mr. LOTT. I yield to the gentleman from Washington.

Mr. FOLEY. I do not have anything to add. I think it is only fair to say that the rule was adopted by the House under considerations which required a 48-hour notice, and the gentleman should not be surprised by that. That was in the rule.

Mr. LOTT. Could we have some assurance, perhaps, that this bill will go over until Wednesday?

Mr. FOLEY. I cannot give the gentleman assurance that the bill will go over until Wednesday. I think it is the assumption of almost everybody in the House that the bill would require 2 days. But, I believe the rule requires that the bill be read by section, and so if there are any amendments to the early sections they would probably have to be filed tonight.

Mr. LOTT. Well, it does put a burden on the Members.

Mr. FOLEY. The bill is to be read by section, but if there are amendments to early sections of the bill, they would have to be offered either by filing them tonight, if the bill comes up as it is planned Tuesday, or by substitute proposal at the end of the section.

Mr. LOTT. Again, I say it does put a burden on the Members in that, because we are not going to be in session on Friday, that they would have to get their amendments in now, which could preclude some Members from having that 1 additional day or the weekend to draft amendments.

I do wish we could get some sort of agreement that we would go over until Wednesday to give Members that opportunity to at least have Monday to file their amendments.

The SPEAKER. In response to the gentleman, the Chair would hope there would be no objections to a unanimous-consent request to have until midnight tomorrow night to file the amendments.

Mr. LOTT. If it would be in order, I would like to make that request.

The SPEAKER. Is there objection to the request of the gentleman from Mississippi?

Mr. ECKART. Mr. Speaker, I object.

The SPEAKER. Objection is heard.

Mr. SOLOMON. Mr. Speaker, will the gentleman yield further?

Mr. LOTT. I yield to the gentleman.

Mr. SOLOMON. If the gentleman insists on objecting on that point, I just might object to not having a session tomorrow and laying it over until Monday.

Mr. LOTT. I would like to, if I could, Mr. Speaker, ask if the chairman of the Judiciary Committee would have any comment. I would be glad to yield to him at this point.

Mr. RODINO. Mr. Speaker, I would like to state that the House has been well advised as to what the rule was, and the rule has been voted on. It was voted on substantially, and I believe that we ought to proceed with the business as proposed in the rule.

Mr. LOTT. Well, I am raising this question because there is a possibility that Members on this side of the aisle and on both sides might start objecting on procedural points, and I would hope that we would not get into that. I think it really has just come to Members' attention because of the schedule being announced that they would be precluded from perhaps having amendments in order on Wednesday, or being able to print them on Monday. I am just trying to have some way of getting away from those procedural amendments.

Mr. RODINO. I merely state, I think that the Members want to act responsibly. I think the Committee on the Judiciary, which had a responsibility to go before the Rule Committee, discussed that rather adequately in the rule that was granted, and I do not see any need unless the Members want to now resort to some unusual procedure, and it is permissible, fine with me.

Mr. FOLEY. Mr. Speaker, will the gentleman yield?

Mr. LOTT. I yield to the gentleman.

Mr. FOLEY. Mr. Speaker, I think the gentleman from New York indicated that he would like to object to the unanimous-consent request that we adjourn to Monday next. That would create a pro forma session tomorrow, so if the gentleman would yield to me for this purpose, I would make the unanimous-consent request at this time and the gentleman from New York can exercise his privilege of objection.

REQUEST TO ADJOURN TO MONDAY NEXT

Mr. FOLEY. Mr. Speaker, I ask unanimous consent that when the House adjourns today, it adjourn to meet on Monday next.

The SPEAKER. Is there objection to the request of the gentleman from Washington?

Mr. SOLOMON. Mr. Speaker, I object.

The SPEAKER. Objection is heard.

Does the gentleman from Washington desire to offer a motion?

Mr. FOLEY. Mr. Speaker, I think at this time that I would advise the Republican whip that we would meet tomorrow for a pro forma session rather than any business schedule, and the gentleman can then have until the time of the conclusion of the session tomorrow to file the necessary amendments.

Mr. LOTT. I think that helps our problem, and I thank the distinguished majority whip for doing so.

The SPEAKER. Under the circumstances, the House will meet in pro forma session at 10 o'clock tomorrow morning.

Mr. LOTT. I thank the Speaker.

DISPENSING WITH CALENDAR WEDNESDAY BUSINESS ON WEDNESDAY NEXT

Mr. FOLEY. Mr. Speaker, I ask unanimous consent that the business in order under the Calendar Wednesday rule be dispensed with on Wednesday next.

The SPEAKER. Is there objection to the request of the gentleman from Washington?

There was no objection.

HOUR OF MEETING ON WEDNESDAY, JUNE 17, 1981

Mr. FOLEY. Mr. Speaker, I ask unanimous consent that when the House meets on Wednesday, June 17, 1981, it meet at 12 o'clock noon.

The SPEAKER. Is there objection to the request of the gentleman from Washington?

There was no objection.

ADMINISTRATION WITHOUT AN ADVOCATE FOR THE ELDERLY

(Mr. RATCHFORD asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. RATCHFORD. Mr. Speaker, as the reconciliation process winds down, it now becomes quite clear that the administration-endorsed budget will necessitate significant cuts in many programs designed to meet the special needs of our Nation's 25 million older Americans. Both the administration and the Congress have undertaken the unenviable task of determining just where such cuts must be made, and what programmatic changes are necessary to improve the efficiency of many health and human service programs. Of course, all this has come much easier for an administration not quite as sensitive to the special of the elderly and not quite as committed to retaining the critical "safety net" programs that serve them. Despite earlier assurances to the contrary, this has proven to be an administration bent on deep cuts even into the most essential of services to the elderly. I can only suspect that this unfortunate posture is the result of the fact that we have an administration without an effective and central advocate for the elderly within its ranks.

Throughout this difficult process, the legislative branch has benefited from the advocacy role assumed by the House Select Committee on Aging under its able Chairman CLAUDE PEPPER of Flordia. It is indeed unfortunate that the administration has been so unwilling to select its new Commissioner of the Administration on Aging—the one individual in the administration charged with oversight of key Older American Act programs and advocacy for our Nation's elderly as national priorities are established. In the House, the select committee has served as an effective advocate for a burgeoning elderly population by extending expert technical assistance and advice on the impact of proposed cuts and programmatic changes on services to the elderly. Importantly, the select committee has also urged the standing committees of the House to exercise restraint in subjecting critical aging programs to the budget cutting ax.

The Older Americans Act is the only categorical, Federal social service program for the elderly. The Administration on Aging has experienced great difficulty in the past in coordinating with other Federal and State agencies in managing Older Americans Act programs. When the Administration on Aging was created in 1965, many senior citizens felt that for the first time their particular concerns and needs would receive special attention within the execution branch. Since that time, the Commissioner of AOA has intentionally been buried in the dark recesses of the HHS policymaking bureaucracy and the Commissioner has proven incapable of serving as an effective administrator and an aggressive advocate for the Nation's elderly.

At the same time, Older Americans Act programs have grown from a $6.5 million commitment at its inception in 1965 to a program now approaching $100 in Federal funding each year. Particularly during this period of priority-setting, 25 million Americans over the age of 60 cry out for the selection of a new Commissioner with the knowledge, administrative skills, compassion, and creativity that such a critical national advocacy role requires.

Joined by my distinguished colleagues on the Aging Committee, Chairman PEPPER and Human Services Subcommittee Chairman BIAGGI, I today sent an urgent plea to the President that he submit the name of his AOA Commissioner-designate to the Senate for timely approval. To wait even longer in filling this key position would be to heighten further the anxiety that many elderly now fill. Without a new Commissioner, the Administration acts in a vacuum as major program changes are debated and advice in a number of policy areas, such as the future of the social security system, is required.

CONGRESSMAN OBERSTAR INTRODUCES LEGISLATIVE ALTERNATIVE TO ELIMINATE LOCAL SERVICE AIR CARRIER SUBSIDIES

(Mr. OBERSTAR asked and was given permission to address the House for 1 minute and to revise and extend his remarks and include extraneous matter.)

Mr. OBERSTAR. Mr. Speaker, today I am introducing a legislative alternative to the Reagan administration's proposal to completely eliminate section 406 local service carrier subsidies available under the Airline Deregulation Act of 1978. My proposal will ease the clearly predictable disruption of air service to the 80 to 90 small, generally rural communities, which will be affected by the abrupt termination of subsidies. My bill will continue the 406 subsidies at a reduced rate while providing a much smoother transition toward complete airline deregulation than the administration's plan.

The Public Works and Transportation's Aviation Subcommittee, on which I serve, has scheduled hearings for June 18 and 25 on this issue. I fully expect a thorough and comprehensive review of the impact of the President's recommendations during these hearings. This bill offers a good starting point in the development of substitute legislation which provides greater assurance of adequate air service to smaller communities while achieving necessary budgetary savings.

The Airline Deregulation Act of 1978 intended to increase marketplace competition in the passenger airline industry by gradually removing Federal controls over route designation and fare rates. The legislation liberalized market entry provisions, provided greater fare flexibility and instituted a phaseout of the activities of the Civil Aeronautics Board (CAB). Under the act, smaller communities were given the guarantee that existing 1977 levels of service would continue for a 10-year period.

Today, almost 3 years after enactment, airline deregulation is playing to mixed reviews. In 1978, the traveling public saved over $2.5 billion in air fares, while the industry realized over $1 billion in net profits. However, during 1979, earnings of the major domestic trunk airlines were down sharply and the decrease in earnings has

continued into 1980 and 1981. The overall negative national economic situation and the dramatic rise in operating costs have contributed to the industry's financial troubles. Air fares, initially well below the Consumer Price Index during the early months of deregulation, have surpassed the inflation rate by a considerable margin.

Service between the smaller and medium sized communities and the larger hubs have suffered. Airlines have abondoned these communities to move to more profitable routes out of large metropolitan areas. According to the CAB, as of November 1, 1979, 169 communities had either lost a major carrier, or had a termination notice pending before the Board.

Airlines receive Federal subsidies to provide air service to certain rural communities. There are two types of subsidies. The Federal Aviation Act of 1958 established rates of compensation for transportation of mail by aircraft. The authority to set the rates was given to the CAB under section 406 of the act. Payments are currently made to airlines for service to about 150 cities in 36 States. The Deregulation Act of 1978 requires 406 subsidy to be paid for service comparable to the character and quality of service to the community in 1977 until the end of 1985 when the section expires.

To take the place of section 406, Congress created a new section (419) which guaranteed at least some air service to communities threatened with loss of air service. This essential air service, generally defined as two round trips to the nearest large city in commuter type aircraft, is guaranteed until October 24, 1988.

In 1980, approximately $120 million in Federal subsidies were paid to commercial airlines: $110 million under section 406 and $10 million under section 419.

President Reagan has proposed termination of payments under section 406 on September 30, 1981, rather than the current statutory deadline of January 1, 1986. The administration has increased the amount budgeted for section 419 service by $22 million to help provide hold-in compensation until the conversion from 406 to 419 subsidies.

The CAB estimates that airlines will file notice for suspension of service at 80 to 90 communities as a result of the elimination of 406 subsidies. For 40 to 50 of these communities, the Board predicts 419 subsidies will be paid to a replacement carrier. The remainder 35 to 40 points will be left to free market forces, but will probably receive service from commuter airlines not requiring 419 subsidies.

The deregulation process, which originally began at a gradual pace, will become, by virtue of the President's recommendation, a sudden plunge into chaos. The communities which are the most adversely affected are the ones which are presently hurting under deregulation—the small- and medium-sized cities. These communities can expect significant reductions in the level and quality of air service as a result of the President's recommendations.

The prospect of reduction or total loss of air service has a devastating impact on any small town or city. Finding a replacement carrier can be a difficult and time consuming chore. Adequate air service is essential to the economic development of a community and region. Commuter airlines are expected to fill this void, despite the industry-wide shortages of aircraft and aviation fuel. I have a very real concern about the ability of commuter aircraft to meet the unique needs of a community. The northern mining towns in my district depend heavily on the freight carrying capability of the DC-9. This freight capacity is lost with commuter equipment.

These problems are added to the expected administrative backlog at the CAB which will cause longer delays and expenditures greater than anticipated. In the 2½ years since deregulation, the CAB has processed 419 replacements in 65 cases of which 55 required subsidy rates. The elapsed time required to process these cases has been usually 9 to 15 months. At the present time, the CAB has a backlog of 44 section 419 cases. By the CAB's own estimates, it will be fiscal year 1983 before most communities receive replacement service, should the President's proposal become law. I would suggest in light of significant staff cutbacks at CAB this process will be delayed even further. In the meantime, the affected communities remain stranded with carriers which have already filed notice to terminate service.

My legislation makes significant reductions without the widespread havoc caused by total elimination of the subsidies. The bill denies any subsidies to those points enplaning more than 100 passengers daily, a level that will not cause extensive withdrawal of service should be subsidy be eliminated. This would be a savings of approximately $40 million. It prohibits the addition of any new points or the restoration of any points to the program, once they have been removed. Secondly, the subsidy would be partially offset by the profits a carrier earned at its nonsubsidized points, based on the formula previously used by the CAB but prohibited by the 1978 legislation. The level of compensation will be determined by the rate in effect as of December 31, 1980. This would rollback the amount of subsidies by an additional $10 million. Finally, the starting date for involuntary replacement of section 406 carriers by more efficient section 419 carriers offering better service would be advanced from January 1, 1983, to the effective date of the legislation.

I believe my proposal to be a reasonable approach to the quality of air service while reducing spending. It will allow adequate air service to continue at a subsidized rate in communities which have the greatest potential for eventually becoming self-sufficient. This legislation is necessary from the standpoint of both sound transportation policy and responsible economic development policy.

A section-by-section analysis of my bill follows:

SECTION-BY-SECTION ANALYSIS OF THE AIRLINE SUBSIDY REDUCTION BILL

Section I—"Airline Subsidy Reduction Act of 1981."

Section II—A. Eligibility for Subsidy

(1) cuts subsidies off to carriers for any points enplaning more than 100 passengers daily

(2) allows for orderly transfer of Alaskan carriers from 406 subsidies to 419 subsidies

TOTAL SAVINGS ESTIMATED AT $40 MILLION

B. Determination of Rate of Compensation

(1) sets ceiling rate at that in effect as of December 31, 1980

(2) subsequent rates shall take into account all other revenues from nonsubsidized points of the carrier

TOTAL SAVINGS ESTIMATED AT $10 MILLION

Section III—Amends Section 419 of the Federal Aviation Act of 1958 to advance the date for the start of involuntary "bumping" of Section 406 carriers by 419 carriers from January 1, 1983 to the date of enactment of this bill.

Section IV—Exempts the carriers from the revenue offset provision stipulated in Section II during the period a carrier is forceably held-in a point beyond the expiration of the 90 day suspension notice.

Section V—Directs the Secretary of Transportation to submit a report and/or recommendations to Congress with respect to subsidies disproportionate to carrier revenues for any point.

Section VI—The effective date of the Act shall be on the first day of the first month beginning more than 10 days after enactment.

KEY REDUCTIONS MADE BY THE BILL

1. Cuts off subsidies to all those points enplaning more than 100 passengers daily.[1]

2. Prohibits addition of any new points or the restoration of any points to the program, once they have been removed.

3. Rolls back the ceiling on the rate of compensation to that in effect as of December 31, 1980.

4. Institutes a profit offset provisions into the subsidy rate computation.

5. Permits the immediate bumping of a 406 carrier by a carrier which can provide an improvement in service at no subsidy or at a lesser subsidy under 419.

[1] CAB estimates that this is the level that elimination of 406 will not cause extensive withdrawal of service.

□ 1045

FAMILY ENTERPRISE ESTATE AND GIFT TAX EQUITY AND REDUCTION ACT

(Mr. BAFALIS asked and was given permission to address the House for 1 minute and to revise and extend his remarks and include extraneous matter.)

Mr. BAFALIS. Mr. Speaker, my colleague from Texas, Mr. PICKLE and I—joined by a majority of the membership of the House Ways and Means Committee—are today introducing a bipartisan bill to protect family enterprises, be they businesses, farms, or ranches, from the destructive effects of our current, confiscatory estate tax policy.

This package—which has the support of a myriad of national organizations representing agriculture small business, the construction industry, and the financial industry—is designed to allow family enterprises to pass from one generation to another intact.

As the Members of this body know all too well, our current estate and gift tax laws actually promote the dissolution of family enterprises. Farms and ranches end up being sold to developers, small businesses are sold to conglomerates, and sons and daughters are kept from benefiting from their parents' lifetime of labor—all because our current tax laws force so many enterprises onto the selling block.

For that reason, Mr. PICKLE and I and a majority of the Ways and Means Committee and other Members are today introducing the Family Enterprise Estate and Gift Tax Equity and Reduction Act.

A key proposal in this legislation is a provision providing for a 50-percent reduction in valuation for small businesses to protect the heirs from having to sell out in order to satisfy the estate tax. In addition, this proposal protects the family farm and ranch by modifying and expanding the special valuation, increases the unified credit, and provides an unlimited marital deduction.

A short summary of the Family Enterprise Estate and Gift Tax Equity and Reduction Act follows:

SUMMARY OF FAMILY ENTERPRISE—ESTATE AND GIFT TAX EQUITY AND REDUCTION ACT

The Family Enterprise Estate and Gift Tax Equity and Reduction Act would make significant changes in the estate and gift tax rules. In general, these changes would reduce the Federal estate and gift tax burdens and would make it much easier for a farm or small business to be transferred from the owner to other members of his family.

REDUCES RATES

The bill would make substantial reductions in the estate and gift tax rates effective this year. These rates currently range from 18 percent to 70 percent. Under the bill, the rates would range from 8 percent to 50 percent.

INCREASES CREDIT TO RESULT IN $600,000 EXEMPTION

The bill also increases the unified credit against estate and gift taxes from $47,000 to $103,500 over a four-year period beginning in 1982. This means that an estate would incur no estate tax liability if the taxable state (including prior taxable gifts) was no more than $300,000 in 1982, $400,000 in 1983, $500,000 in 1984, and $600,000 in 1985 and thereafter.

PROVIDES UNLIMITED MARITAL DEDUCTION

Under the bill, all of the present dollar and percentage limitations on the gift tax and estate tax marital deductions would be repealed, and the marital deduction would be allowed on an elective basis for certain gifts or bequests of a life estate or other terminable interest (but, in such cases, the property would be included in the surviving spouse's estate).

INCREASES ANNUAL GIFT TAX EXCLUSION TO $10,000

Under the bill, the annual $3,000 per donee gift tax exclusion is increased to $10,000.

MODIFIES AND EXPANDS SPECIAL VALUATION FOR FARMS AND RANCHES

The bill would make a number of changes in the provisions allowing special use valuation of real property used in farming or other closely held businesses. Among the most significant of these changes are the repeal of the $500,000 limitation on the reduction in value due to special use valuation, expansion of the provision to cover woodlands, and revisions in the rules for valuing eligible property. The bill also would revise a number of statutory provisions and administrative interpretations which have resulted in the unavailability of special use valuation in a number of situations.

PROVIDES 50 PERCENT REDUCTION IN VALUE FOR SMALL BUSINESSES

The bill would add to the tax law a new special valuation provision for interests in closely held businesses. Under this new provision, the executor of an estate could elect to value an interest in a closely held business at 50 percent of its fair market value (determined without regard to this provision). If the decedent's heirs dispose of their interests in the business or it is merged into a publicly held company within 10 years after the decedent's death, the benefits of this special valuation would be recaptured. This provision would not be available to an estate if real property used in the business is valued under the provisions allowing special use valuation of real property used in farming or other closely held businesses.

LIBERALIZES EXTENDED PAYMENT AND STOCK REDEMPTION PROVISIONS FOR CLOSELY HELD BUSINESSES

The tax law currently contains provisions allowing an extended period of time to pay estate taxes and favorable income tax treatment of stock redemptions to pay estate taxes where a large portion of the estate consists of an interest in a closely held business. The bill would coordinate, liberalize and simplify these provisions. It would also make it easier for control of a closely held business to be transferred from one generation to another by liberalizing the rules governing when the proceeds of stock redemptions are entitled to capital gains treatment (rather than dividend treatment) and by allowing a closely held corporation to accumulate funds during the lifetime of a shareholder (without application of the accumulated earnings tax) for the purpose of redeeming stock from the shareholder's estate (rather then being forced to accumulate funds only after the shareholder's death).

MAKES OTHER SIMPLIFYING CHANGES

The bill would make several other changes to simplify the administration of the estate and gift tax laws and provide more certainty for taxpayers. For example, gifts made within three years of death are valued as of the date of the gift for estate tax purposes rather than as of the date of the decedent's death. Also, gifts made within three years of death which were not taxable when made by reason of the annual per donee exclusion and the rule allowing one half of the gift to be treated as made by the donor's spouse would not be included in the decedent's estate. Another provision would allow the value of a gift to be determined (even though it would not nomally be taxable by reason of the unified credit) by allowing the taxpayer to forgo the immediate use of the unified credit and pay gift taxes. (This rule would assure that a reevaluation of the gift after the donor's death could not affect the estate tax liability of his estate.) Finally, the bill would recognize the effectiveness of a disclaimer which meets the standards of the tax law even if State law does not treat it as a disclaimer.

FORMER PRESIDENT CARTER'S REQUEST FOR MILITARY EXCHANGE AND COMMISSARY PRIVILEGES AN AFFRONT TO THE AMERICAN PEOPLE

(Mr. KRAMER asked and was given permission to address the House for 1 minute and to revise and extend his remarks and include extraneous matter.)

Mr. KRAMER. Mr. Speaker, this week's copy of Navy Times contains an interesting article. It seems that former President Jimmy Carter has asked for permission to shop at military exchanges and commissaries, presumably so he can use the facilities at Fort Benning, Ga. This request is an affront to every American taxpayer and I would urge the Pentagon to deny it without delay. Not only did Mr. Carter leave us a legacy of double-digit inflation and the highest taxes in American history, now he appears to be saying he cannot get along on the $69,630 a year he draws in retirement pay while he writes his memoirs.

And this is only the beginning. As a former Chief Executive, he also receives $150,000 a year for staff salaries, $35,000 a year in travel allowances, and the Government picks up the tab for his office equipment, rent, utilities, supplies, printing costs, and telephone bills. I ask you, "Is it too much to ask that he should have to pay what everyone else does for groceries or a pair of shoes?" At a time when we are asking Americans from all walks of life to make sacrifices, this request is ludicrous on the surface. During his 4 years in the White House, I often felt Mr. Carter was out of touch with reality. I see that things

have not changed now that he is out of office.

[From the Navy Times, June 13, 1981]

CARTER SEEKING PERMISSION TO USE STORES, EXCHANGES

(By Tom Philpott)

WASHINGTON.—Former President Jimmy Carter has asked the Reagan administration for permission to shop at military exchanges and commissaries, Navy Times has learned.

Phillip J. Wise, Carter's staff director in Plains, Ga., confirmed that an inquiry has been made at the former President's request to see if he would be eligible for the discount shopping based on his seven years in the Navy and his four-year tour as Commander-in-Chief.

Pentagon sources said Carter's request is under consideration by the Defense Department General Counsel but is expected to be denied.

Carter, now retired from public office and working on his memoirs in Plains, was graduated from Annapolis in 1946 and served on active duty until 1953. As a former chief Executive he draws $69,630 in retirement plus $150,000 a year for staff salaries. He's also provided $35,000 a year in travel allowances and the government pays for his office equipment, rent, utilities, supplies, printing costs and telephone bills.

Nothing in the law, however, entitles a former President to exchange and commissary privileges on military installations, Pentagon sources said. Title 10 of the U.S. Code says the services can sell food and other stores to certain "civilian officers and employees of the United States" when they live near a military installation outside the United States or on a military installation in the United States.

Carter made few public comments on the military commissaries and exchanges during his presidency. On a talk show in Los Angeles in May 1977, however, he said "it's not unreasonable for the taxpayers to demand that the military at least pay enough for goods they buy to cover operating expenses."

Wise said if Carter was granted shopping privileges he probably would use the facilities at Fort Benning, located about 40 miles away.

LEGAL SERVICES CORPORATION SHOULD NOT BE REFUNDED

(Mr. SENSENBRENNER asked and was given permission to address the House for 1 minute and to revise and extend his remarks and include extraneous matter.)

Mr. SENSENBRENNER. Mr. Speaker, next week the House will consider H.R. 3480, a bill to reauthorize the Legal Services Corporation. The Chamber of Commerce of the United States of America has taken the position in opposition to this legislation. In a letter to me from Hilton Davis, vice president for legislative and political affairs of the U.S. chamber, he states:

The Legal Services Corporation was intended to help the poor when they unavoidably become entangled in our complex legal system, but, too often, legal aid lawyers are using poor people as guinea pigs in an effort to bring about fanciful views of social justice and undertake illegal lobbying efforts.

I hope the House will join with the chamber of commerce, the administration, and myself in rejecting H.R. 3480.

I insert Mr. Davis' letter in the RECORD at this point:

CHAMBER OF COMMERCE OF THE UNITED STATES OF AMERICA,
Washington, D.C., June 9, 1981.

Hon. JAMES J. SENSENBRENNER, Jr.,
House of Representatives, Cannon House Office Building, Washington, D.C.

DEAR MR. SENSENBRENNER: I want to take this opportunity to confirm the U.S. Chamber's complete support for President Reagan's Economic Recovery Program and, in particular, the effort to stop reauthorization of the Legal Services Corporation. The record of the Corporation justifies its elimination; however, the states and localities should be allowed the option of providing legal services as part of a comprehensive social services strategy under the block grant approach proposed by the President.

The Legal Services Corporation is a clear example of a well-intentioned concept run amok. Time after time, the Corporation has wasted its resources on ideologically motivated class action suits, and failed to assist citizens and business people in resolving their immediate problems. For example, the Corporation-funded group, California Rural Legal Assistance, has sued in the federal courts to stop research to improve agricultural productivity studies because this research may reduce the need for farm labor. This type of suit benefits no one but those interested in promoting inefficiency and unnecessary increases in food prices.

The Legal Services Corporation was intended to help the poor when they unavoidably become entangled in our complex legal system—but too often legal aid lawyers are using poor people as guinea pigs in an effort to bring about fanciful views of social justice and undertake illegal lobbying efforts.

On behalf of the 135,000 members of the U.S. Chamber of Commerce, I urge you to support President Reagan's entire program for economic recovery. Adoption of the Administration's package of spending and tax reductions represents a major step in returning the nation to economic health. As proposed by the President, consolidation of many of the grants provided to state and local government into more efficient and flexible block grants will allow for a reduction in federal spending, while continuing support for services that have high local priority.

Sincerely,

HILTON DAVIS.

ISRAELI STRIKE ON OSIRAK

(Mr. SCHEUER asked and was given permission to address the House for 1 minute and to revise and extend his remarks and include extraneous matter.)

Mr. SCHEUER. Mr. Speaker, it is time we stopped talking abut penalizing the State of Israel for taking decisive action to provide for its own defense against terrorists who operate in tiny bands as well as terrorists who head governments. It is time we stopped hesitating to support our only ally in the Middle East and one of our firmest allies anywhere. It is time we faced up to the fact that talk is not always sufficient to cope with international blackmail. Sometimes it is necessary to take strong, decisive, and responsible action. Israel's attack on that Iraqi reactor was just such an action.

The weapons we provide to Israel are, by agreement, to be used only in Israel's self-defense. It is proper, of course, for our Government to determine whether the Israelis did act in self-defense when they bombed the reactor; but how can Sunday's raid be characterized in any other way?

In 1962, our own President considered just such a preemptive strike in self-defense to knock out missiles being sited in Cuba. The chairman of the Senate Foreign Relations Committee, J. William Fulbright, joined with other responsible American leaders in urging that course of action. In the end, a bombing raid was not needed, but a blockade of Cuba (an act of war) was indeed undertaken, and with the same success Israel achieved on Sunday.

Israel is at war with Iraq and has been since 1948. Iraq has never agreed to an armistice. Iraq has long been one of the most reckless and irresponsible governments on Earth, training, equipping, and financing terrorist attacks on Israel and supporting international terrorism wherever and whenever it suits Iraq's supposed interests.

Mr. Speaker, Israel faced a simple choice: Sit back and wait for Iraq to build the bombs to slaughter millions of Israeli men, women, and children, or eliminate that capability swiftly, boldly, and with minimal casualties on either side.

I submit that this was no choice at all. I submit that we will make a great mistake if we in any way penalize Israel for doing a job that had to be done—in our interests and in the interests of world peace, as well as in Israel's own.

Mr. Speaker, of all of the comments that have been made about the Osirak strike by the Israelis against that threatening nuclear plant in nearby Iraq, the most pungent, the most eloquent, and the one with the most panache was from yesterday's editorial in the Washington Star. Just in the event any of my colleagues have missed it, I recommend it for your attention.

I would just quote one paragraph:

We cannot imagine, whatever the cries of outrage, that in Riyadh, in Amman and Cairo, in Damascus and the Persian Gulf states and in Tehran, there is not a sense of relief today. People in authority in the Middle East may condemn Israel by day, but by night they will all sleep a bit better.

The entire editorial follows:

[From the Washington Star, June 10, 1981]

THE OSIRAK STRIKE

Time and events will tell, more clearly than we can, whether it was wisdom or folly for Israel to send its strike force to obliterate Iraq's nuclear facility at Osirak, near Baghdad.

There is no shortage of cries that it is folly. There is no shortage of sermonizing, much of it pertinent, on such appropriately civilized themes as the sacredness of national boundaries and air space, the iniquity of surprise attack, the rude surprising of friends and allies—especially the U.S. and Anwar Sadat. Unilateral military action is rarely without untoward consequences for the perpetrator. Iraq is far from Israel, not a country that has much bothered Israel militarily in recent years; and the sword that Israel drew may well be double-edged.

Certainly it must be said that Mr. Begin's timing was awkward, to say the least, on the morrow of his first meeting with President Sadat in 17 months and while the U.S. is trying to use its good offices to settle the dispute over Syrian missiles in Lebanon. It is tainted with the suspicion of electioneering on his own behalf. Be all this as it may, there are times in this treacherous and tragic world when nations must embrace lesser dangers and evils, and risk some scorn, to combat ultimate dangers. Israel did so in the Entebbe raid. The U.S. did so nearly 20 years ago in confronting Nikita Khrushchev over his attempt to make a nuclear-missile striking platform of Cuba—a confrontation, incidentally, in which air strikes were held in readiness if suasion and naval blockades failed. Many condemned these operations, as propriety demanded, but felt safer afterward.

We have no doubt that the Middle East is today a safer place for all nations—not merely for Israel—than it was a few days ago, before the operation at Osirak. The Iraquis were moving steadily toward putting into operation, by late summer or early autumn, a nuclear facility that could produce weapons-grade fuel. And although Iraq had hypocritically signed the international nuclear non-proliferation agreement, her gates were shut until a short time ago against international inspection. There is almost no doubt on anyone's part that Iraq meant to make atomic weapons.

There was little pretense to the contrary. Only last year, the Iraqi government brazenly stated that these nuclear possibilities were not for Iran to worry about (notwithstanding that she was at war with that nation) but Israel's worry entirely. This is surely a provocative thing to say in any circumstances to anyone, idly or not. And given the Israelis' vocal campaign of many months to stop the establishment of a weapons-grade nuclear facility it was one stroke more than could be tolerated.

Whether the threat was idle boasting, or seriously intended, it constitutes the ultimate terrorism to menace another nation with nuclear attack. If there were nothing else to be said for Israel's pre-emptive attack, it would have to be said that there is some value in demonstrating that such threats carry a high price.

Indeed, we cannot imagine, whatever the cries of outrage, that in Riyadh, in Amman and Cairo, in Damascus and the Persian Gulf states and in Tehran, there is not a sense of relief today. People in authority in the Middle East may condemn Israel by day, but by night they will all sleep a bit better. It is, of course, equally true that their sense of peace would be greater without an Israeli nuclear capability in the neighborhood. But that is a separate reality.

Obviously diplomacy, not sudden air attack, is the proper way to contain the threat of nuclear proliferation. That must be the unswerving preference of a world that rejects anarchy. It seems to us that our friends in France bear a special part of the blame. They remained heedless of the danger signals over many months. They have seemed bent on driving, regardless of consequences, the Faustian bargain of delivering provocative nuclear goods to Iraq in return for life-sustaining oil.

But when diplomacy fails—and the most strenuous and persistent protests by the Israelis and others had not shaken the foolhardy resolve of the French to barter high nuclear technology to an unstable and aggressive regime, or of that regime to menace Israel with it—what is left? Is the nation confronted by such a nightmare to sit idly by waiting and hoping, like Mr. Micawber, that something will turn up?

Certainly the air strike at Osirak is not a thing to be condoned or applauded. But neither is it a fit subject for tiresome sermonizing in an international community whose will to contain nuclear proliferation is paralyzed by fear, palsied by diplomatic minuets, and not a little corrupted by the fearful but profitable commerce in deadly weapons and oil.

ANNIVERSARY OF GENOCIDE DAY

The SPEAKER. Under a previous order of the House, the gentleman from Pennsylvania (Mr. DOUGHERTY) is recognized for 60 minutes.

Mr. DOUGHERTY. Mr. Speaker, I have requested today a special order to commemorate the anniversary of a sad day in the history of the Baltic States: June 14, 1941. It was on this date, known as Genocide Day, that the Soviet Union removed thousands of Baltic people from their homes and sent them to slave labor camps in northern Russia and Siberia. In each Baltic State, over 30,000 men, women, and children were deported from their homelands to the camps. How many of these people were ever seen again by friends and relatives? Very few, I would imagine.

At the same time, the German Nazis were invading the Baltic States and put a premature end to the deportation plans of the Soviets. So what did the Soviets do before they made their retreat? They executed more than 5,000 Lithuanian political prisoners in cold blood. The unfortunate Baltic people saw control of their countries being transferred from the Soviets to the Nazis—not an encouraging change. Needless to say, the harsh treatment under the Nazi regime resulted in the death and deportation of more Baltic persons, including the majority of the region's Jewish population.

Three years later, as the Allied Forces gained momentum in the war against Germany, troops from the U.S.S.R. retook the Baltic region and retained control of it at the end of World War II. Not surprisingly, the nation guilty of genocide on June 14, 1941, did not grant independence to the three deserving states of Lithuania, Latvia, and Estonia. Instead, the states were incorporated into the Soviet Union against their will and have been under Soviet domination since World War II.

These days it is too easy to dismiss past Soviet crimes as typical and then accept them as a fact of life. But how do we explain this to the Lithuanians, Estonians, and Latvians around the world, many of them in the United States, who have had relatives taken away on June 14, 1941, never to be seen again? How do we explain to them that their whole nation has been taken away, and that many other people accept it as a fact of life? I cannot explain it, nor accept it, Mr. Speaker.

To remember these courageous people in the Baltic States, we in Congress have formed an Ad Hoc Congressional Committee on the Baltic States and Ukraine. My distinguished colleague from Massachusetts, Mr. DONNELLY, and myself urge as many Members as possible to join this group to concentrate our efforts in helping our Baltic friends. The committee will be meeting with representatives from several major Baltic groups to establish a working relationship with them, and to better learn the dominant concerns and attitudes of the Baltic people here in the United States.

One such group is the Joint Baltic American National Committee, which is celebrating its 20th anniversary this year. The committee, under the chairmanship of Maido Kari, represents the Estonian American National Council, the American Latvian Association, Inc., and the Lithuanian American Council, Inc. Surely it must be proud of the hard work it has accomplished over the years on behalf of Baltic Americans. I am very grateful for the job they have done because it is through their organization and the many others in the United States like it that attention remains focused on the unjustifiable occupation of Latvian, Estonian, and Lithuanian territory by the Soviets. I am sure that there will be many more anniversaries for the committee in the future. As for today, we in Congress, along with the hundreds of thousands of Baltic Americans in the United States, can lament the actions taken by the U.S.S.R. on June 14, 1941, and pray that such an act of violence may never occur against any people again.

□ 1715

Mr. DONNELLY. Mr. Speaker, will the gentleman yield?

Mr. DOUGHERTY. I am pleased to yield to my colleague, the gentleman from Massachusetts.

Mr. DONNELLY. Mr. Speaker, I thank my good friend from Philadelphia, Pa., for yielding, and I would like to join him today in commemorating the 40th anniversary of the tragic and brutal annexation of Lithuania, Latvia, and Estonia, by the Soviet Army. Many thousands of men, women, and children were slain or deported in that supremely cowardly attack.

Our presence here today means that the suffering of those innocent souls was not in vain and will not be forgotten. More than 40 years of Communist domination have not extinguished the fire of freedom that burns in the hearts of the people of the Baltic States. That spirit will never die. We will work together to keep it alive.

The criminal annexation of the legitimate States of Lithuania, Latvia, and Estonia has not broken the desire for self-determination there. Instead, that yearning grows even stronger with each passing day, and we must do everything we can to keep it alive.

The Congress of the United States has a deep and abiding concern for the plight of the brave patriots of the Baltic States. The herioc struggle of the Polish workers has indeed added renewed interest in the fight for freedom within the Iron Curtain.

We have recently formed an Ad Hoc Committee on the Baltic States and the Ukraine. We will focus national attention to, and support for, the quest for freedom in these captive nations, remembering that their cause is the same that ignited our forefathers' revolt against foreign domination. Let us together pledge our untiring commitment to their difficult pursuit of liberty.

In conclusion, Mr. Speaker, let me congratulate my dear friend, the gentleman from Pennsylvania (Mr. DOUGHERTY), for the untiring work that he has done in behalf of the captives in the Baltic States and in the Ukraine. It is through his outspoken efforts that this caucus has been put together. I have the pleasure of cochairing it with him, and through our determination and the efforts of many Members of this body, we will be able to keep that flame and spirit of freedom alive in those captive nations so that some day those people will have the same rights of self-determination that we in this Nation have, because those are rights that belong to the human race and ought not to be and cannot be extinguished by any army.

Mr. DOUGHERTY. Mr. Speaker, I thank my colleague, the gentleman from Massachusetts (Mr. DONNELLY), for his comments.

I think it is most appropriate that we say to the Soviets, in case they are listening, that is has been 40 years and the people of the Baltic States have not forgotten, and that those of us in the Congress who have just organized this committee want the Soviets to understand that we are not only not going to forget about what happened but we are going to try to raise the issue on a more constant basis.

Mr. DORNAN of California. Mr. Speaker, will the gentleman yield?

Mr. DOUGHERTY. I am happy to yield to the gentleman from California.

Mr. DORNAN of California. Mr. Speaker, I appreciate the gentleman's yielding.

It is an honor to join my two colleagues and others, particularly these two of Irish-American descent, who understand something about a long struggle for freedom.

I would like to add a few historical facts to the ones the gentleman has already given on this 40th anniversary of yet another day of genocide.

On that day in 1920, when Lenin's Soviet Russia—he still had 4 years to live—concluded the peace treaties with the Baltic States, he renounced, through his emissaries, in perpetuity all sovereign rights to these three states, in spite of the fact—and probably because of the fact—that the "Latvian Rifles," as they called them, had been his own personal guard when he went back into the revolutionary city of Petrograd, soon to become Leningrad.

In 1939, after 19 glorious years of breathing free, the people of the Baltic nations were confronted with Germany and Russia signing what became the Molotov-Ribbentrop Treaty. Just to say the names of these two people indicates what a strange—and yet not so strange—relationship that was of two totalitarian powers coming together and arbitrarily dividing into spheres of influence free people in that part of the world. Russia got Estonia and Latvia, and Germany got Lithuania, which was then principally a Catholic nation, developed with an atheistic Hitler gang, just as the others on the side were also developed with atheism and totalitarianism.

In 1940 the red army, breaking a treaty that was written in deceit anyway, occupied all three states, including that area within Germany's sphere of influence, which helped to send all the continent of Europe and England in a disastrous war which took almost 50 million lives.

Russian domination has never left that area since. The mass arrest, deportation, and extermination of Estonians, Latvians, and Lithuanians, was carefully planned and carried out by the Soviets, similar to the Katyn Forest massacre in Poland.

In November 1940, the Soviets issued an order mandating an accounting of all people who were members of anti-Soviet political parties and groups, nationalistic parties and groups, former policemen, former army officers, employees of foreign firms, persons having contact with people or institutions abroad, former workers for the Red Cross, if you will, former noblemen, merchants, bankers, and even anyone who employed domestic help or hired help in a small store or a cottage industry shop.

Then the next year, 1941, an order of the People's Commissar for State Security of the Lithuanian SSR, a Red Gestapo, if you will, was issued to purge that Baltic State of "hostile and criminal and socially dangerous elements."

In June of 1941, an important month, as it turns out by the end of that month, mass deportations to Siberia and the Arctic began. Between June 14 and June 21, 1941, 34,260 Lithuanians alone were deported. And it was a cruel fate that those deportations were finished on that date, because on the very next day, June 22, Operation Barbarossa started and the Russians were paid in kind for their deceit by a sneak attack across the borders of Poland by German Panzer divisions into Russia.

They were slow in starting because they had to divert to Greece to rescue Mussolini, and even though they reached Moscow's outskirts on the day of our Pearl Harbor, their advance might have been even swifter if it had not been for the delay in their Greek campaign.

In 1948–49, one-tenth of Lithuania's population was driven to Siberia for resisting forceable collectivism of land. Obviously, many of those who were deported died, and those who became sick or handicapped along the way were not aided; they were only left to die and torture was not uncommon. All the things that this Nation was confronted with took place some 11 months later, and the Bataan Death March took place after that.

In closing, Mr. Speaker, I would like to ask my colleagues to keep in mind that we still recognize to this day, 40 years after the Soviet Baltic occupation, governments in exile for these three tragic nations. If anyone in this Chamber or the other body or any citizen has any need to contact one of these legations or read this RECORD and this comes to their attention, I submit for the RECORD their addresses, as follows:

The Latvian Legation, 4325 17th Street NW., Washington, D.C. 20011;

The Estonian Consul General, 9 Rockefeller Plaza, New York, N.Y. 10020; and

The Lithuanian Legation, 2622 16th Street NW., Washington, D.C. 20009.

Mr. Speaker, I just want to conclude by saying that on a visit to Riga in Latvia last year to meet the dissidents there, some Christians, some Jews, I was invited by the Intourist guides to go to the cathedral for a songfest one

evening. I went there, and it had been a Catholic Church; it was still a consecrated Catholic Church, if you believe in the theology of Christendom as I do.

They had all the chairs reversed, and instead of facing the altar, we were facing a beautiful organ, and all the Stations of the Cross were up, the vestments were there, and the beautiful art going back 700 years was there.

As the Lithuanian choir began to sing many hymns in their own language, then there came a moment when they sang "All Through the Night" in English. Then that was followed by "Silent Night," and even though this was the summertime, I felt like it was Christmas and I could feel the snow.

I deliberately turned my chair around and faced the altar, and I thought to myself, "hope springs eternal." They will never, even after a thousand years of occupation, take the faith out of those great people of Estonia, Lativia, and Lithuania.

Mr. Speaker, I was convinced that evening in Riga, Latvia, that the youngest Member of this House and the oldest Member of this House will live yet to see these great Baltic nations free again.

Mr. Speaker, I thank the gentleman from Pennsylvania (Mr. DOUGHERTY) again for the honor of allowing me to join in his special order.

Mr. DOUGHERTY. Mr. Speaker, I want to thank my distinguished colleague, the gentleman from California (Mr. DORNAN), for his contribution to this special order.

I want to reemphasize what he has said so eloquently, and that is despite everything the Soviets do, they cannot kill the spirit of these people, and they cannot destroy the hope of the Americans of Latvian, Lithuanian, Estonian, and Ukrainian nationalities in believing and working and striving to indeed see these nations free one day.

Mr. MAVROULES. Mr. Speaker, will the gentleman yield?

Mr. DOUGHERTY. I yield to my good friend and distinguished colleague, the gentleman from Massachusetts.

Mr. MAVROULES. Mr. Speaker, I thank my dear friend, the gentleman from Pennsylvania, very much for yielding to me.

Let me first commend the gentleman and congratulate him on his remarks. I would like to associate myself with those remarks at this time.

I commend and congratulate also the gentleman from Massachusetts (Mr. DONNELLY) for helping to put together this caucus which met at 3 o'clock this afternoon.

Just very, very briefly, I am very supportive of what the gentleman from Pennsylvania (Mr. DOUGHERTY) and his colleagues are trying to do.

Let me just simply state that the unyielding spirit of the people of the states we are referring to will certainly be felt in the caucus that is now being put together in the Congress of the United States.

Mr. Speaker, again I thank the gentleman for this opportunity to join in this special order.

Mr. DOUGHERTY. Mr. Speaker, I thank the gentleman from Massachusetts (Mr. MAVROULES). I am very pleased that he will be joining us in an active role in the caucus, and I appreciate his support and participation today.

Mr. ECKART. Mr. Speaker, will the gentleman yield?

Mr. DOUGHERTY. I am happy to yield to my friend, the gentleman from Ohio.

Mr. ECKART. Mr. Speaker, I too, would like to join with the gentleman from Pennsylvania (Mr. DOUGHERTY) and associate myself with his remarks today.

I believe the spirit that symbolizes the people of Latvia, Estonia, and Lithuania is reflected very strongly in this country. The effort that the gentleman and his colleagues have made to bring this matter to the floor, further accentuating the need for a continuation of the preservation of the spirit of freedom that we enjoy and want to see our friends, our brothers and sisters in the Baltic and Ukrainian parts of the world, enjoy, is meritorious.

I associate myself with the gentleman's remarks and congratulate him for taking time for this special order. I urge all our colleagues in the House to once again join in a renewed spirit of single-minded purpose, so that once and for all we can tell the Soviets that we have not forgotten and we know that these proud people have not forgotten.

Mr. DOUGHERTY. Mr. Speaker, I thank the gentleman from Ohio (Mr. ECKART) very much for his comments and for his participation.

Mr. Speaker, it is rather ironic that the Soviets, even to this day, cannot completely control these nations. The Soviets to this day still must persecute people in order to achieve whatever they are trying to achieve in these states.

We had a recent experience—in fact, it happened today in my office—where people in my district tried to reach some refuseniks in the Soviet Union, and it was most ironic, after the phone call went through, that we were advised there were two men who had participated in a demonstration in Kishinev, a very peaceful demonstration, against what they considered to be unjust Soviet activities and a denial of their basic human rights.

□ 1730

According to Soviet law, Mr. Speaker, these people could only be held for 10 days without being formally charged. This incident occurred on May 30. As of today, the Soviet Union has not charged these two people, nor have they released them, nor will they admit as to where they are, nor will they allow a telephone call to be completed to determine the location and the well-being of these two refuseniks.

I think it is a good commentary on just how bad the Soviets are, how guilt-ridden they are, how impossible they are, how they realize that freedom is one of the one thing they do not know how to live with and they cannot handle, that they would allow these things to happen against their own citizens and in violation of their own laws.

In discussing today this special order with some of my friends who are Ukrainian-Americans, they pointed out a very interesting thing to me and that is that the Soviet Union today still says there is such a concept as dual citizenship. If you were born in the Ukraine and came to the United States and married and had a child and your child had children and, therefore, these were your grandchildren, according to Soviet law these grandchildren born in the United States are Soviet citizens, and should they choose to travel to Eastern Europe they would be subjected to being drafted into the Soviet Army and, indeed, required to comply with Soviet law.

It is pretty bad off when a nation like the Soviet Union has to go to the third generation to try to claim people as citizens. I think it is rather a very honest commentary on the Soviets that they simply are a scourge in the society of decent men, that they are afraid of the truth, that they are afraid of an openness in society, that they do not want to allow people the right to political self-determination.

We would like to put the Soviets on notice that this committee which we have created, that those in this Nation who are citizens of the United States, but whose heritage is in Eastern Europe, we would like the Soviets to know that we will not forget. The issues will not go away. We will not be quiet. We will not tolerate this deprivation of basic human dignity and decency and that we will be back again and again and again to raise on the floor of the Congress of the United States, and hopefully in the minds and hearts of the American people, the idea that, indeed, there are three nations in the Baltic area, Latvia, Lithuania, and Estonia, that there is a nation called Ukraine, whose people do not desire to live under Soviet domination, whose people desire to be free. We are going to do whatever we can to see that the determination and the fire and the hope prevails, continues, and God willing, succeeds.

● Mr. ANDERSON. Mr. Speaker, it has been 40 years since Soviet troops entered the Baltic States of Estonia, Latvia, and Lithuania. The troops moved quickly to establish a Stalinist rule of terror, deporting tens of thousands of Balts to Siberia. At first the deportees were the obvious ones to go in such situations, the educated, the civil servants, and the military personnel. This destruction of three nations' elite is a terrible thing in itself; but totalitarian terror necessarily spares no one, and soon every citizen was afraid that he or she might arbitrarily be chosen for the next train east. This is a situation we in the United States have never known, and I pray to God that we never do.

All of this—coming as it did in the midst of the horror and turmoil of the Second World War—was noticed and condemned by most of the world and then rather quickly forgotten. Quickly forgotten; that is, by all except the Balts, for the Soviet troops did not leave at the end of the war. And they have not left in the succeeding decades, as the Soviet occupation became the Soviet annexation, an artificial expansion of borders with no legitimate cultural or historical basis. Much has happened throughout the world during these past four decades, and the Soviet invasion has receded further into our memories; but I hope we never forget the distinct nationalities of Estonia, Latvia, and Lithuania.●

● Mr. RUSSO. Mr. Speaker, we are here today to pay tribute to the freedom loving people of the Baltic States of Lithuania, Latvia, and Estonia. The courage and spirit of these people has not only withstood Soviet domination in the last 40 years, but has been strengthened in the face of it.

Though this is a tragic observance, calling to mind the terrors of war, displacement, and forced occupation, it should kindle in all of us the spirit of hope and renewed dedication to the struggle for freedom.

We must not let the past and present sufferings of these oppressed states recede into the shadows of memory.

The perseverance of these brave people serves only to underscore their fierce loyalty to and love of their culture, faith, and homeland.

Let our remarks serve as a sign of support to the Baltic peoples. Their continued resistance and dissent indicates that they will not be passively subdued.

I am proud to acknowledge today, their continuing efforts to rightfully determine their own destiny.●

● Mr. BONKER. Mr. Speaker, time and time again I have tried to alert this body to the continuing acts of repression, torture, detention without charge and the hideous phenomenon of disappearances in many nations around the world. These acts of madness seem more and more to have become the rule rather than the exception.

This month we commemorate the 40th anniversary of the "Baltic Holocaust." It was 1941 when the Soviet regime embarked on its first mass deportation of the peoples of Estonia, Latvia, and Lithuania. This was designed to Sovietize these three Baltic countries.

Herded like cattle into railroad cars, the prisoners were transported to slave labor camps in Siberia to disappear forever in the vast Gulag of the Communist regime. Many died from the cold and hunger before finishing their long journey. More met their death due to severe conditions which were exemplified by disease, harsh treatment and at times summary executions.

Those who were the greatest threat to the Soviet regime—the educated and those in government or military service—were the first to be arrested. Later, anyone remotely suspected by the Soviet authorities became victims of the repression.

In 1941, over 100,000 of the Baltic people were displaced. By 1949, over 850,000 people had been deported to Siberia, a total which was equivalent to 10 percent of the population of the Baltic States.

I applaud the efforts of the Joint Baltic American National Committee, representing millions of Estonians, Latvians, and Lithuanian Americans and concur with their statement:

Today the Soviets continue to repress indigenous national, cultural and religious movements, Baltic and others * * * we ask America's leaders to persevere in their efforts to fight oppression throughout the world, and to encourage humane, civilized and representative forms of government. America has tremendous power to influence the countries of the world and their policies. In the name of all those who died 40 years ago—in an environment which still exists today—we ask that this country never forget its role as the world leader in the cause of freedom.●

● Mr. ANNUNZIO. Mr. Speaker, 41 years ago on June 14-15, 1940, the army of the Soviet Union invaded the Baltic countries of Estonia, Latvia, and Lithuania, and ever since the history of that region has been shattered and scarred by that terrible experience.

The Soviets were bent on the systematic destruction of these three countries and demanded their complete subservience. In order to insure the success of their intentions, the Soviets ordered massive deportations and executions.

First, the intellectuals and those who were politically inclined were executed, then efforts were concentrated against the peasants and others who asked for nothing but to be left alone to live in peace. The deportations continued from mid-1940 into 1941. By June 1941, Soviet designs became quite clear when Estonia, Latvia, and Lithuania were targeted for major depopulation efforts.

During the period of June 14 through 16, 1941, the Russians concentrated and intensified their efforts to break the will of the people to resist communism. Inhabitants of entire villages—including men, women, and even little children—were rounded up, herded together under miserably overcrowded and unsanitary conditions, and shipped in railroad boxcars east to the Soviet Union.

The genocidal deportations only stopped with the German invasion of the three Baltic States in June 1941, but in 1944, when the Red Army regained control, the deportations began again and lasted through the rest of the decade of the 1940's. Ethnic Russians were resettled in the three Baltic States which continues to this day, and efforts also continue to destroy the languages, literatures, cultures, and religions of the people of these three helpless nations.

Excerpts follow from the book entitled, "The First Guidebook to Prisons and Concentration Camps of the Soviet Union" on the brute slave state being run by the Communists in the three Baltic nations:

ESTONIA

Our knowledge of this part of the Soviet Union is incomplete and imprecise. We know of only five camps, two prisons, and one psychiatric hospital.

In Tallinn (republican capital; formerly called Reval; pop. 420,000), there is an ordinary-regime camp (no. ITK-5) for 1,000 to 1,200 prisoners at Tisleri Street 31-32. Camp commander is Major Kitaev. This is a camp for ordinary criminals, but there are also Estonian and other dissidents here (ask, for example, about Viktor Matveyuk, a political prisoner) as well as those arrested for their belief in God. The prisoners of the camp are assigned to work in industrial construction.

There are two prisons in Tallinn. One is a pre-trial detention facility for approximately 1,000 inmates; it is known for its brutal regimen, its isolation cells (which are penetrated by moisture from the sea), and its special cells, in which thugs, incited by the K.G.B., beat up political prisoners and extract confessions from them. Located in the vicinity of Kaubasadam on Suur-Patarei Street the prison may be reached by tram nos. 1 and 2.

The other prison is housed in the K.G.B. building, formerly the stock exchange, at Pagari Street 2 and can hold 500 to 600 inmates. Only political prisoners are incarcerated here.

In Tartu (formerly called Dorpat; located in the southeast of the republic), there is a strict-regime camp for 800 to 900 prisoners assigned to the construction of military installations. Camp commander is Major Kapustin.

South of Tartu, there is a psychiatric hospital (in fact, a psychiatric prison) in which Estonian nationalists involved in the struggle for the independence of their country and against the Soviet occupation of it are confined. Konstantin Past, the former president of independent Estonia, recently died here.

In Vasalemma, 50 kilometers southwest of Tallinn, there are two camps: an ordinary-regime facility in which approximately 1,500 prisoners produce spare parts in an excavator plant; a strict-regime camp for 600 to 800 prisoners who work in a quarry or in a lime pit. Work conditions here are extremely severe.

In Harku, about 30 kilometers southeast of Tallinn, 300 to 400 prisoners in a women's camp manufacture and grind buttons. The work is very damaging to the lungs.

On Paldiski Bay, prisoners from a forced-labor facility (mentioned on our list of death camps) are assigned to clean the exhaust nozzles of atomic submarines at a naval base. The work eventually leads to the radioactive contamination and death of the prisoners.

At the State University of Tartu, Professor Juri Saarma, a K.G.B. expert on the delivery of dissidents to the psychiatric prison, has been developing new "medications"—neuroleptic drugs—that turn his victims into indifferent idiots.

This is how the peaceful and friendly Estonia would appear to the tourist, if he knew what the Soviet state concealed behind the mask of its "economic achievements".

LATVIA

1. Ventspils.—Men's camp for about 800 prisoners assigned to construction work; transit prison for about 600 inmates.

2. Dalbuti.—Prison for about 500 inmates.

3. Jelgava.—Two men's camps, each with about 1,000 prisoners; prison for 1,000 inmates.

4. Valmiera.—Two men's camps (an intensified-regime and a strict-regime facility), each with 1,000 prisoners; prison for 500 to 600 inmates.

5. Cesis.—Children's camp for 1,800 prisoners used for the manufacture of kitchen furniture and boxes.

6. Rezekne.—Men's camp for 1,200 prisoners; prison for 500 inmates.

7. Daugavpils.—Men's special-regime camp for 800 to 1,000 prisoners; prison no. 24 (1,000 inmates).

8. Brasa.—Men's camp no. OTs-78/9 (1,800 prisoners).

Those who have seen these camps and prisons have prolifically commented on the cruelty of the guards and K.G.B. personnel. Here is an excerpt of one such testimony.

Ya. R., who was a prisoner in camp no. OTs-78/7 (Riga, Krustpils Street 53), reports: "Colonel Aleksei Antonov was camp commander, though we rarely saw him. He ran the camp from his office. His low visibility, however, was compensated for every day by the cruelty of his assistants. Aleksandr Denisov, responsible for maintaining camp discipline, was a good example. A sly and malicious person, Denisov would order the prisoners thrown into the isolation cell for the slightest transgression, such as failing to remove their caps in his presence or not sitting on their own plank-beds in the barracks. Worst of all was K.G.B. Captain Elmar Zaul, head of the operations section at the camp. A real Gestapo type, his aim was to humiliate people. In his office, he had rubber hoses, boxing gloves, and even handcuffs attached to electrical wiring. All this was mere pretense, but there were times when he dropped all pretence to frighten those prisoners who refused to collaborate with the K.G.B. by informing on their fellow inmates. Those who could not be intimidated were thrown into the isolation cell. Zaul thus often beat the prisoners himself; it was not unusual to hear the cries of his victims from his office.

"One of Captain Zaul's deputies was Alfred Berzins. He was two meters tall, drank constantly, beat the prisoners, and carried two medals on his chest—'Outstanding Worker of the K.G.B.' and 'Outstanding Worker of the Ministry of Interior'.

LITHUANIA

In Lithuania, an independent country until its occupation by the Soviet Union in 1939, the tourist can visit eleven concentration camps and seven prisons. There were only two prisons in independent Lithuania. We have no knowledge of any camps.

Four prisons and three concentration camps—one of them for children—may be found in the capital city of Vilnius. In Lukiškés Prison (in Russian: Lukishk), women are confined with their infant children. See the special map of Vilnius for details on how to find the penal facilities of the city.

In Panevežys northwest of Vilnius, you can visit a large women-and-children's camp. More than 2000 women prisoners there work in a sewing factory (army uniforms, tank covers, cartridge pouches).

If you take the train or drive for 60 kilometers from Vilnius in the direction of Kaunas, you will see provinishki (Lithuanian name: Pravieniškes) on the right-hand side. Along the railroad tracks is a zone guarded by soldiers and watchtowers, where prisoners unload lumber transported here for processing at the furniture factory or the woodworking plant. These two enormous and profitable plants are manned by prisoners from two large camps located about one kilometer from the railroad tracks. Some 3000 inmates work themselves to exhaustion in the production of upholstered furniture, elegant yachts, and carved hunting rifle butts (see map of these two camps).

On approaching Provinishki, the tourist will be able to spot atomic rocket warheads above the trees about one kilometer from the tracks. The silos were dug by the prisoners.

In Siauliai, in northern Lithuania, two camps, each with more than 1500 prisoners, provide labor for construction projects and for production in the local industry. More than 1000 prisoners in Alytus in southern Lithuania are used for the same purposes.

In Jonava, 30 kilometers from Kaunas, more than 5000 prisoners are being used to construct a chemical plant. Female prisoners have been assigned to auxiliary tasks in a separate zone there.

As you can see, Lithuania is covered with camps and prisons, although there are fewer of them here than in Siberia. The local population, however, will tell your that in almost every Lithuanian family, at least one person has served in a Siberian camp, participated in the construction of mine shafts in Vorkuta and Noril'sk, mined gold in Kolyma or coal in Kazakhstan, or sawn wood in the taiga forest of Krasnoyarsk or Irkutsk.

Mr. Speaker, 41 years have passed since the Baltic States were overrun by the Communists. The sad fate and memory of these victims are very much alive today and it is my privilege to join with Americans of Latvian, Lithuanian, and Estonian descent in the 11th Congressional District of Illinois, which I am honored to represent, in the city of Chicago, and all over this Nation, in the observance of the 41st anniversary of Soviet aggression against these three small nations.

It will also be my privilege to receive the Baltic Freedom Award from the Joint Baltic American National Committee later today, and I shall accept this award as a tribute to the blessed memory of those who have given their lives for religious, cultural, and political freedom in the Baltic nations. The legitimate aspirations and the perseverance of the Baltic peoples for independence and the right to reside again in their historic lands will ultimately triumph over communism, and freedom will someday be restored to these nations.●

● Mr. DERWINSKI. Mr. Speaker, it has now been 41 years since the three Baltic States of Estonia, Lithuania, and Latvia, were seized by the Soviet Union. Many Americans have little knowledge of the fate of these heroic Baltic peoples. However, this forcible occupation and incorporation of hundreds of thousands of Lithuanians, Latvians, and Estonians to Siberian concentration camps remains a constant reminder of the true attitude of the Soviet Union toward basic human rights.

Before the conquest of these three nations, there was a short yet progressive period of free government in these lands. After World War I, Latvia, Lithuania, and Estonia all declared their independence and enjoyed democratic governments until 1939. With the advent of the Second World War, Estonia, Latvia, and Lithuania lost their freedom when they were, in accordance with a Nazi-Soviet pact, allocated to the U.S.S.R.

Toward the end of World War II, when Soviet troops reoccupied the Baltic States, the U.S.S.R. illegally incorporated these three small countries into its huge empire. The end of World War II found the Communists in undisputed and complete control.

Tens of thousands of the Baltic peoples were killed and over a million were deported to slave labor camps in Siberia and other areas of the Soviet Union. Hundreds of thousands of Estonians, Latvians, and Lithuanians, were transported from their homelands, to be replaced by peoples from other parts of the Soviet empire. This exchange of population has substantially altered the ethnic composition of the Baltic nations.

In addition, the Baltic people have suffered from the collectivization of their farms and the nationalization of their industries. They have suffered religious persecution and their children have been subject, through Soviet educational institutions, to Communist brainwashing.

However, throughout the free world, the peoples of Estonian, Latvian, and Lithuanian origin have maintained their traditional civic, cultural, and church organizations and bravely continued their efforts on behalf of the

enslaved compatriots held captive within the U.S.S.R.

The Soviet Union has blatantly ignored the human rights provisions of its own constitution; the provisions of the human rights in the United Nations Charter; and most recently, it has ignored the implementation of the provisions of the final act of the Helsinki accords and the Belgrade Conference.

As a nation, we stand for freedom and the right to self-determination. I believe that this is a universal principle and not one that should be applied selectively. As this is not the case for those held captive of communism, it is important for us to bring global attention to their plight.

In past Congresses, we have recorded our denunciation of the Soviet annexation of the Baltic nations and the iron-fisted control to which they are subjected by Soviet totalitarianism.

As a member of the Ad Hoc Congressional Committee on the Baltic States and Ukraine, I believe that we should continue to draw attention to this tragic anniversary and recognize that it is the duty of the United States to support the cause of freedom for the Baltic peoples. We must continue our policy of nonrecognition of the Soviet Union's forcible annexations; and further demand the release of political prisoners of Estonian, Latvian, and Lithuanian nationalities from Soviet incarceration; and return the right of self-determination and territorial integrity to the Baltic nations.

The legitimate aspirations of the Baltic peoples will be fulfilled only with the end of political repression, religious persecution, and cultural genocide. The perseverance of the Baltic peoples to independence and the right to again reside in their historic lands will ultimately triumph over communism.

The Baltic and other captive nations continue to yearn for independence. They are among America's best allies against the Kremlin. History has shown us that great empires can disintegrate overnight. In the Soviet Empire, there are already cracks visible in the wall.●

● Ms. FERRARO. Mr. Speaker, June 14 marks the 40th anniversary of Genocide Day. We commemorate this day to remind the world of the tragic brutalities which have occurred in Estonia, Latvia, and Lithuania in the past, and which continue today.

These three countries were invaded in 1940 and occupied by Soviet forces. In 1941, thousand of innocent men, women, and children were sent off to be eliminated in Siberian concentration camps. Few ever returned.

Nearly 40 years of oppression have not destroyed the strength of the Estonian, Latvian, and Lithuanian people. Their homes have been taken and they have had to seek refuge in foreign countries, but they have never given up the hope for freedom. The spirit of these noble people and their unfailing resistance to tyranny are an inspiration to all people; but perhaps even more so to the American people, for we too struggled for freedom.

The plight of all Baltic people may only be bettered by the continued attention of the free world leaders and press. Only when Soviet policies are revealed and repudiated by the rest of the civilized world will these authorities make concessions to humanitarian principles.

The U.S. Government has never recognized the occupation of these Baltic States. The United States has never relinquished its support for principles of political freedom and self-determination for the Baltic States. American support for Baltic is traditionally important and right.

The Soviet occupation of the Baltic States must end. The Soviet Union must be made to realize that it will be held accountable for its denial of basic human rights in the Baltic States. As Americans we must support the successful efforts of the Baltic people to resist russification policies. We must support the struggle of the Baltic people to reachieve independence.

I am asking all my colleagues, therefore, to recognize the plight of all the people of Estonia, Latvia, and Lithuania, to stop for a moment to remember that we, as Americans and as compassionate people, have a commitment to independence and freedom.●

● Mrs. FENWICK. Mr. Speaker, in the dark hours of the morning on June 14, 1941, one of the saddest incidents in human history began to unfold. On that morning, while the citizens of Lithuania, Latvia, and Estonia slept, Soviet trucks and motorcars emerged from their hiding places and began to execute a carefully designed plan to deport hundreds of thousands of anti-Soviet elements from these Baltic States.

The deportees, seized in the night, given less than an hour to gather their belongings, separated from their families, were herded into the trucks, and then into railroad cattle cars, and sent off to the Soviet Union. Thousands of them, including many children, died en route because of the inhuman conditions. Those who did survive were brought to the slave labor camps in Siberia and Vorkuta, or, if they were women, to the collective farms or the forest lumbering camps or the fishing industry at the mouth of the Lena River. In all cases, they were used as cheap and expendable labor under the harshest of conditions.

By the end of 1941, well over 100,000 inhabitants of the Baltic States had been deported, and by the end of the decade, more than 850,000—more than 10 percent of the population of Lithuania, Latvia, and Estonia—had been deported.

These mass deportations were a later major step—a brutal vicious step—in the larger Soviet design to rob the Baltic countries of their independence. That Soviet design has been made clear when Molotov and von Ribbentrop signed the Nazi-Soviet pact 2 years earlier, on August 27, 1939. This infamous agreement, which cleared the way for the Nazi invasion of Poland only 1 week later, placed Estonia, Latvia, and, after further negotiations in September 1939, Lithuania, in the Soviet sphere of influence. By June 14, 1940—1 year before the mass deportations began, and the same day that German troops rolled into Paris—Estonia and Latvia had been forced, by threat of outright invasion, to sign "Treaties of Mutual Assistance," with the Soviets and the Lithuanian Minister of Foreign Affairs was in Moscow facing the same ultimatum. By the time the mass deportations began, the russification of the Baltic States was in full steam—the armies were taken over by the Soviets, and all sources of national pride were banned.

The deportations themselves had been planned weeks or even months in advance, with detailed instructions prepared which clearly demonstrate the cruelty of the Soviet plan. Soviet Order No. 001223, the secret "Instructions Regarding the Procedure for Carrying out the Deportation of Anti-Soviet Elements from Lithuania, Latvia, and Estonia," contained the following directions:

> . . . It is essential that the removal of the members of the deportee's family and of the head of the family shall be carried out simultaneously, without notifying them of the separation confronting them . . .

and

> Care must be taken that the operations are carried out without disturbances or panic, so as to avoid any demonstrations and other troubles . . .

Mr. Speaker, care may have been taken to avoid disturbances during this evil exercise, but the world has noticed. It is the duty of those of us who are so fortunate as to live in free countries, so fortunate that we can determine our own future, to take note of this tyranny. We must speak out against it, we must call the attention of the world to the actions of those who would violate human rights and silence the voices of freedom.

So, I am honored to speak here today on behalf of the many who could not speak, and I urge my colleagues to remember June 14, 1941, when they speak of freedom and bravery and courage, and when they deal with those who would seek to deny them.

Thank you.●

● Mr. GEJDENSON. Mr. Speaker, it is with great pleasure that I rise today

to join my colleagues in commemorating the 40th anniversary of Genocide Day. I find this day in Baltic history to be a particularly moving one as members of my own family suffered deportation at the hands of the Soviet Union in the early 1940's. Along with over 300,000 other Lithuanians, they were taken from their homes and forcibly sent to Siberia. Many of these people were never to see their beloved homeland again.

Lithuania had experienced an all too brief 30 years of independence between the two World Wars. During that period the Lithuanians industriously improved the country's agricultural productivity, land distribution and developed an industrial base. Substantial progress was also made in labor and education. This progress was brutally interrupted with the advent of World War II. Via the infamous Molotov-Ribbentrop pact of 1939, the sovereign nations of Eastern Europe were divided between Nazi Germany and the Soviet Union. The subsequent illegal annexation of Lithuania in 1940 by the Russians was the precursor to a systematic campaign of terror marked by the mass deportations of 1941. The Soviet Union had smashed the independence of this small Baltic State and proceeded through the next 40 years to attempt, by every means possible, to crush the national identity of the Lithuanian people. It is this continued brutality that so disturbs us as we commemorate Genocide Day.

On behalf of the Lithuanian Americans of the second district of Connecticut, I wish today to speak out against the Soviet Union's ceaseless domination of Lithuania. They are concerned, as I am, with the ongoing struggle that the Lithuanians face. I feel very strongly that the United States and its citizens should not forget the love of freedom and the sense of national pride these people share with America despite the decades of repression that they have endured.

It is a great privilege for me to join my colleagues today in speaking out against the great tragedy that has befallen Lithuania. It is with a great sense of honor that I identify myself with the Lithuanian people in their fight for true independence from the Soviet Union.●

● Mr. SOLOMON. Mr. Speaker, this month, June 14 to be precise, marks the 40th anniversary of one of the cruelest human endeavors ever perpetrated by one government upon the citizens of another country. I am referring to the forced deportation of thousands of Latvians, Lithuanians, and Estonians from their homelands in June 1941, and subsequent dispersal of these peoples to all corners of the Soviet empire, in many cases to the forced labor camps of Siberia.

These nations, Mr. Speaker, had been free and prosperous since the end of World War I, to say nothing of their national and cultural identities that have existed for centuries. But no sooner had the czarist yoke been thrown off with the fall of the Russian Empire in 1917, than did the leaders of the Soviet state to the east, unable to bear the sight of free and prosperous nations contrasting with the misery of communism, begin to scheme to annex the Baltic States. Aided by the Nazi threat in Europe, the political and moral paralysis of the Western democracies, and a tiny fifth column of Soviet sympathizers, the Red army overran the Baltic States in June 1940, and thus embarked upon a campaign to eradicate any form of resistance by the conquered peoples. The mass deportations were but one example of this campaign, which included murder, intimidation, elimination of the free press, and the subjugation of all political, religious, and education institutions to the will of the all-powerful Soviet police state.

I would also point out that the policy of deportation was reinstituted in 1944 and again in 1948, as Stalin sought to tighten his grip on his conquests.

All in all, hundreds of thousands of men, women, and children were forcibly uprooted from their homelands and driven into the vast archipelago of Soviet prisons and labor camps. Those few who were fortunate enough to survive and return were, of course, greeted by that particular form of misery that communism inflicts upon any society, especially on those that have previously known freedom and prosperity.

Mr. Speaker, it is probably superfluous to mention that Soviet persecution of the Baltic nations continues to this very day. Soviet control of its captive nations, by its very nature, depends upon intimidation and terror. In Latvia, Lithuania, and Estonia, national and religious leaders are systematically subjected to imprisonment, exile, psychiatric incarceration, and other forms of persecution. In order to further repress and weaken the fiber of Baltic nationalism, the Soviet Government continues its notorious policy of russification in the Baltic countries, forcing upon an unwilling people the Russian language, Russian culture, appointing ethnic Russians to high positions in industry, education, the judiciary, and, it goes without saying, government.

Mr. Speaker, I have stated in the past that it is to our credit that the United States does not recognize the puppet governments established by the Soviet Union in Latvia, Lithuania, and Estonia. I call upon Congress and our national leaders to focus attention upon the injustices that I have mentioned and the struggle of the Baltic peoples for their freedom and national identity. We, as a nation, pride ourselves on our love for democracy and free political institutions. Let us work together so that these values are returned to the captive nations of Latvia, Lithuania, and Estonia.●

● Mr. FASCELL. Mr. Speaker, among the events etched in living memory which serve as an eternal lesson to the Western World of the expansionist intentions and brutal practices of the Soviet Union are the forcible annexation of the free nations of Estonia, Latvia and Lithuania 41 years ago this month on June 14 and 15, 1940, and the inhumane mass deportations to Siberia of approximately 100,000 Balts beginning 1 year later. Sadly, Moscow's practice of invading, occupying, and forcibly absorbing whole nations and ethnic homelands into the so-called Soviet Union or sphere of influence did not begin nor did it end with the Baltic countries.

The history of the U.S.S.R.'s formation, the postwar Soviet domination of Eastern Europe and the Soviet invasions of Hungary in 1956 and Czechoslovakia in 1968 are other notorious examples of such aggression. The fate of Afghanistan and the recent ominous Soviet messages to the Polish leadership plainly indicate that the Soviet Government has never abandoned its efforts to violate the internationally proclaimed rights of peoples to freely determine their own destinies. Therefore, marking the anniversary of the forcible seizure of the Baltic nations, annually condemning the illegality of this act of aggression and refusing to reorganize Soviet claims to sovereignty over these peoples has been and must remain the policy of the United States and other free world countries. Even though we can point to fresh instances of Soviet aggression, our indignation over earlier Soviet acts of violence against sovereign peoples must grow, not diminish, with time.

The tragic June anniversaries teach a bitter lesson about the nature of the Soviet regime. But, the Estonian, Latvian and Lithuanian peoples teach the West another kind of lesson—a lesson of courage and dignity which has survived 41 years of oppression. In 1941, the Soviet Government tried physically to obliterate resistance in the Baltic countries to the forcible annexations by means of mass deportation. For more than four decades, Moscow has attempted to culturally and linguistically russify and "sovietize" the Baltic peoples. Estonian, Latvian, and Lithuanian rights activists are still sent to prisons, labor camps and into internal exile far from their homelands, while non-Balts are encouraged to settle in the Baltic lands. Through it all, the Estonian, Latvian, and Lithuanian peoples have preserved a sense of national identity and have not capitulat-

ed spiritually to overwhelming Soviet force.

That they cling to their dream of independence and refuse to forfeit their national, political, cultural, religious, and linguistic rights despite terrible odds is exemplified by the men and women of the Lithuanian Helsinki Monitoring Group, which was formed in November 1976. Currently, six members of the group are serving long terms of imprisonment—Victoras Petkus, Vytautas Skuodys, Algirdas Statkevicius, Balys Gajauskas, and the recently arrested new group members, Mecislovas Jurevicius and Vytautas Vaichiunas. As of April 1981, remarkably, there are 16 identifiable samizdat journals in Lithuania representing various persuasions and interests. The oldest of these is the Chronicle of the Lithuanian Catholic Church, which came into existence in March 1972. Last year, five contributors to the Chronicle, two of them women, were arrested and tried. In all, in 1980, five Lithuanian women have been sentenced.

In late March 1981, we learned of the tragic death of 41-year-old Estonian human rights activist Yuri Kukk. He died in a Soviet labor camp far away from his homeland. A fellow Estonian human rights defender, biologist Mart Niklus, is presently serving a 10-year term in special regimen labor camp to be followed by 5 years of internal exile. Niklus has been on a hunger strike, his current whereabouts are unknown and his parents are concerned for his welfare. Estonian dissidents Veljo Kalep, engineer, and Tiit Maddison, worker, were sentenced in March and May, respectively, to 4 years labor camp each on charges of "anti-Soviet agitation and propaganda." Three schoolboys have recently been found guilty of burning Soviet flags in Tallinn on the 1980 anniversary of the October Revolution. For this "malicious hooliganism" two of the students, Alle Kermo and Janis Surva, were sent to labor camps for 3 and 2½ years, respectively. The third student, Andrus Mizit, was given a 3-year suspended sentence.

In Latvia, the trial of Yuris Bumeister, an engineer, commenced on May 25. Bumeister was charged in connection with his alleged membership in the outlawed Latvian Social Democratic Party. The results of his trial are known.

These are but a few of the numerous testaments we could make to the indomitable spirit of the Baltic peoples—a spirit which has survived unceasing Soviet attempts to break it.

As a Member of Congress and as Chairman of the Commission on Security and Cooperation in Europe, I stand resolved, together with our colleagues in the Congress, every year to mark the infamous June anniversaries of the forced annexations and mass deportations, to monitor the arrests and trial of Baltic activists and to speak out against continuing Soviet efforts to suppress the national, political, cultural, religious and linguistic rights of Estonians, Latvians, and Lithuanians. We will do so for as long as it takes to see Estonia, Latvia, and Lithuania counted once again among the world's free nations.●

● Mr. ROE. Mr. Speaker, this month marks one of the saddest events in the history of civilized man, the infamous Baltic holocaust.

It was 40 years ago that the Soviet Armies stormed across the borders of Estonia, Latvia, and Lithuania and began a mass deportation of the Baltic people to slave labor camps in Siberia.

No Baltic family in that region was left untouched by the Soviet rape of June 14 and 15 in 1941. The tragic deportation program undertaken by the Russians brutually ended the years of national freedom and sovereignty which had begun in 1918 for Estonia, Latvia, and Lithuania.

The aim of the Soviets in this purge was clear; the elimination of all who might provide resistance to Russian domination over the Baltic area. The first to go were the government leaders, the educated, and military personnel. Later, the deportations spread to relatives of the original victims and those whom the Soviets simply distrusted.

No segment of Baltic society was protected from the ravages of the Soviet purge including the young and old and the rich and poor.

It was not unusual for the deportees to be herded into railroad cattle cars for the arduous journey to Siberia. Many lost their lives to the ravages of malnutrition and exposure.

Estimations are that in 1941, some 100,000 Baltic persons were deported. By 1949, that total had reached 850,000.

Mr. Speaker, to this day the Soviets continue to suppress individual thought and freedom of national, cultural, and religious thought among the Baltic people. The Russian aggression against Afghanistan proved the Soviets have not changed their aim of controlling freedom-loving people by brute force.

The 40th anniversary of the Baltic holocaust should serve as a strong reminder to the American people that our Nation continues to serve as the bastion of human rights for all the repressed nations of the world.●

● Mr. SMITH of New Jersey. Mr. Speaker, 41 years ago an act of aggression was perpetrated. The Baltic States—against their will—were forcibly incorporated into the Soviet Union.

This occurred a week before Hitler marched into Paris. Yet the incorporation of these nations was the direct result of the Hitler-Stalin Pact made the previous August, the infamous pact that made World War II certain.

By the terms of the Nazi-Soviet Pact—and later agreements between Moscow and Berlin made after the partition of Poland—the territory of the Baltic States was made the sphere of the Soviet Union. Thus did two dictators callously decide the fate of millions of people.

Hitler is dead. But the Soviet regime—a regime Hitler admired, and copied—lives on. The successors of Stalin rule from the Kremlin. Afghanistan has been only the most recent victim of Soviet aggression and deceit.

We are using this special order to ask this country to continue its policy of nonrecognition of the annexation of the Baltic States. We urge the United States to raise the issue of the Baltic States in international conferences and at the United Nations. We demand the wanton destruction of the Baltic peoples stop.

The Soviet Union has deliberately sent millions of Lithuanians, Estonians, and Latvians into forced exile in Siberia. Others have been callously murdered.

The persecution goes on to this day. I protest—with my other colleagues in this special order—against the terrible persecution the Catholic Church is suffering in Lithuania. Because the Lithuanians hold true to their ancient faith they find priests deported, churches closed, their nation subjected to a reign of terror.

Mr. Speaker, the storm clouds are again gathering over Eastern Europe. Poland is now threatened with invasion. At this hour it is well we remember Baltic States and their people, as the Poles struggle for freedom.

Let us stand together with all free peoples of the world. Let the voice of the United States not be silenced or lowered till the Baltic nations are again free and are again restored to their rightful place among the nations of the world.●

● Mr. CARNEY. Mr. Speaker, June 14 commemorates a tragic anniversary for the people of Estonia, Latvia, and Lithuania. On this date in 1941, over 100,000 people were sent to Siberia by the Soviet authorities. The Soviet Union had occupied the Baltic States illegally since the previous year.

The Baltic holocaust was a terrifying time in the history of these countries. Thousands of midnight arrests occurred in each country. The people never were told where they were going or for what reason. Given moments to pack their belongings, they were taken from their homes, many for the last time.

The victims of the deportations were taken to Siberia under the worst conditions. Traveling in cattle cars, many

people died from malnutrition and exposure. Many more would die in the frozen wasteland through illness, mistreatment or execution. So many lives were uprooted. So many families were separated and never reunited. So many people perished. The irrational campaign of terror affected every segment of Baltic society. No family was untouched by the outrage of the holocaust. By the end of 1949, over 850,000 Estonians, Latvians, and Lithuanians—over 10 percent of the population—had met this terrible fate.

Mr. Speaker, the environment which produced this Soviet campaign of terror still exists today. The Gulag Archipelago, the prisons and psychiatric hospitals still operate and are filled with innocent and free-thinking people. The recent death of Estonian dissident Juri Kukk attests to the commitment of the Soviet authorities to eradicate any elements of spiritual, cultural and political freedom in the Baltic States and throughout the Soviet Union. On this, the 40th anniversary of the tragic event, we join with Americans of Baltic descent to express our sorrow and indignation. I ask that we reaffirm our commitment to Baltic independence and to human rights for all people under Soviet domination.●

● Mr. FORSYTHE. Mr. Speaker, it is with great solemnity that I join my distinguished colleagues in commemorating the 40th anniversary of Genocide Day. Forty years ago the Soviet Union initiated a ruthless and brutal campaign of deporting innocent people from the Baltic nations of Lithuania, Latvia, and Estonia to slave labor camps in Siberia. About 30,000 people from each nation were deported to these camps as a result of this Soviet effort to eradicate Baltic nationalism and force an alien culture on the people of Lithuania, Latvia, and Estonia.

It is particularly important on this memorative day that we pay tribute to these Baltic people and their determination to preserve their heritage in the face of the horrifying treatment they have received and continue to receive from the Soviet Union. It should be particularly meaningful for us, a people established under an undying belief in freedom, to witness the strength of the Baltic people in refusing to surrender their identity in the face of years of repression.

I believe the spiritual battle of these Baltic nations is an effort we should never forget as we stand true to our commitment to freedom. We salute the continuing struggle of the Baltic people to preserve and protect their national heritage.●

● Mr. RITTER. Mr. Speaker, June is a lovely time of the year. However, for many people of Lithuanian, Estonian, and Latvian descent the month of June is time to look back with sadness to June of 1941. On June 14, 1941, the Soviet Union began a campaign of terror throughout the Baltic States making midnight arrests, separating families, and forcing thousands into exile. It was a purge of broad scope, designed to eradicate all elements who might impede the Sovietization of these three countries. In the wake of this wholesale terror, virtually no Baltic family was left untouched by the tragedy.

The Baltic peoples have a rich and cultured history. Lithuania, the largest of the three Baltic States was, during the middle ages, a strong European state whose people protected Europe from the Mongol and Tartar invaders and whose government furnished a power behind which the East Slavs could live in peace and freedom. Both Latvia and Estonia were prosperous states whose deep water ports provided a strong mercantile trade for the many merchants who lived there. Both the Estonian capital of Tallinn and the Latvian capital of Riga were members of the highly prestigous Hanseantic League. The architecture, religion, and people of these small states reflect a truly European culture, a culture totally alien to Soviet communism.

At the beginning of the 20th century all three Baltic States were under the domination of the Russian Empire. However with the demise of the Russian autocracy, during World War I, the Baltic States found themselves independent and by 1922 were recognized as sovereign states. During this short lived period of history, Baltic culture took on new forms of expression and nationalism grew to unprecedented heights.

However, as Europe began to gird for World War II, the Baltic States found themselves caught between the scissors of Nazi aggression and Soviet communism. Although espousing neutrality, one by one the Baltic States were swallowed up by the Soviet Union. The Soviet occupation was brutal. Those who served in the military, the government, or who were members of the educated elite were subject to arrest and sent into labor camps or to exile in Siberia. For example, some 30,000 members of the Lithuanian intelligentsia were deported to Siberia on the night of June 14, 1941, and 5,000 political prisoners were executed when the Soviet forces hastily retreated under German attack. Death from malnutrition, exposure, and disease claimed thousands more during this perilous year. It is estimated that 100,000 Baltic people were forced to emigrate during the Soviet occupation which lasted only 8 days.

On June 22, 1941, the Nazis, entered the Baltic region and began a similar form of repression. During their 3-year occupation, the Nazis succeeded in executing or placing into labor camps all Baltic people of Jewish descent. With the decline of Germany's power, the Baltic States returned not to independence but to Soviet domination. During the Second World War and reentrenchment of Soviet power the population of the Baltic nations was reduced massively by 850,000 or 10 percent.

We cannot change what has already happened, but we can reflect on the inhumanity that men and nations have lowered themselves to, so as to reduce the chance for genocide to occur again. We must persevere in our struggle against the oppression and inhumanity which is occurring now.

Mr. Speaker, today marks the 40th anniversary of the Baltic tragedy. With solemnity, I rise with my colleagues to pay tribute to the many Lithuanians, Latvians, and Estonians whose lives were taken by the hand of oppressors.●

● Mr. ATKINSON. Mr. Speaker, I rise today to salute the people of Lithuania whose nation was forcibly incorporated into the Soviet Union by the Red Army 40 years ago next week.

During their brief independence beginning July 12, 1921, the Lithuanian people espoused a similar spirit of freedom that was manifested during our own drive for independence.

As a nation which was founded upon the principles of individual freedom and national sovereignty, the United States must not let the plight of Lithuania and her sister States of Latvia and Estonia be forgotten.

Even though the Iron Curtain continuously attempts to extinguish it, we must foster the flame and spirit of independence and keep it burning brightly.

The Lithuanians have a rich language and culture that has contributed much to the world including the United States.

Also, let us not forget the contributions of the more than 500,000 Lithuanians who have immigrated to our shores. They have contributed to all facets of our heritage. The descendants of these people have included sports stars Johnny Unitas, Dick Butkis, and Johnny Podres, comedians David Brenner and Walter Mathau.

We carry Lincoln "cents" designed by Victor D. Brenner, another descendant of Lithuanian heritage.

I endorse continuation of the U.S. policy of refusing to recognize the Soviet occupation of Lithuania, and maintenance of our independent diplomatic relations with them.

Further I urge a renewed effort in seeking to enforce the principles agreed upon by many countries in the Helsinki agreement of 1975, to which the U.S.S.R. was a signatory.

We must not fail those who seek freedom for themselves and their homelands.●

● Ms. FIEDLER. Mr. Speaker, today we mark the 40th anniversary of the start of the mass deportations and totalitarian repression of the peoples of the three Baltic Republics—Estonia, Latvia, and Lithuania. While we remember and honor those who suffered and perished, we also reaffirm our recognition, our support and our great respect for our sister republics and their people, and we take this opportunity to say to the world that these things shall not be diminished by the passing of time, nor any adversity, nor the acts of any aggressor.

Through American's long-standing commitment to the freedom and independence of Estonia, Lativa, and Lithuania, we stand irrevocably opposed to armed invasion and conquest. We believe, in the end, that right will triumph over might. To believe in the freedom and independence of these nations is also to believe in the deep and abiding power of freedom. The cause of these nations is that of human rights and dignity, and throughout history we have seen how many diverse tyrants have found that these things do not die, go away, or conveniently remove themselves. Rights may be abrogated, they may be eclipsed, they may be put under the strongest of armed guard, but they have a way of outlasting their oppressors. This lesson—of the importance and immortality of freedom—is one that we may all gladly learn from the Baltic Republics and their brave people.

The strength and power of the spirit of freedom is still with the people of Estonia, Latvia, and Lithuania, both here in the United States and in their original homeland. That this spirit should remain undiminished through the years of adversity should be a source of pride not only to the citizens of these nations and Baltic-Americans, but to all those who believe in freedom.●

● Mr. BLANCHARD. Mr. Speaker, I would like to take this opportunity to join my colleagues, in commemorating the 40th anniversary of "Genocide Day"—when hundreds of thousands of Lithuanian, Latvian, and Estonian citizens were taken from their homes and deported to the slave labor camps of Siberia and other places in the Soviet Union.

Genocide Day is an important one in Baltic history, for it keeps fresh in our mind the tragic fate of the nations of Lithuania, Latvia, and Estonia. It serves to remind us of the despicable treatment of the captive nations and their peoples by the Soviet Union.

The Baltic nations were forcibly annexed by the Soviets in 1940, and their genocide began in earnest the following year. Through our delegation in Madrid, through an active and outspoken human rights policy, and through action we take in Congress, the United States must continually speak out against the egregious violations of human rights by the Soviet Union, toward the men, women, and children in the Baltic States.●

● Mr. MOAKLEY. Mr. Speaker, today marks the 40th anniversary of the mass terror the Soviet Union inflicted upon Lithuania, Latvia, and Estonia.

Thousands of men, women, and children lost their lives and many more were taken from their homes and deported to the inhuman conditions of Soviet slave labor camps. Equally tragic, even today, the brave people of the Baltic nations face injustice and deprivation of basic human rights by Soviet occupation forces.

All Americans should stand by the people of Lithuania, Latvia, and Estonia, for they yearn for the basic freedoms we cherish. As Members of Congress, we should speak out against the terrible acts of inhumanity by the Soviet Union and support the rightful independence of the Baltic States.

Forty years have passed since the Soviets began their campaign of destruction of the way of life in the Baltics without undergoing any basic changes. Also unchanged is the determination of these people to regain their freedom and independence.●

● Mr. LENT. Mr. Speaker, it is with great solemnity that I join my distinguished colleagues in commemorating the 40th anniversary of Genocide Day, the forced deportation of hundreds of thousands of persons in the Baltic nations of Lithuania, Latvia, and Estonia which occurred on June 14, 1941.

Mr. Speaker, not only were they forced into labor camps during this deportation but thousands of these innocent people were executed by the Soviets who were retreating from the invading armies of Hitler's Germany. This was indeed one of the darkest days in the history of civilized man. Seldom has the world been witness to such terrible acts of inhumanity. Sadly, the Soviets' abuse of human rights continues to this day.

For more than four decades, the Soviets have continuously disregarded the human rights provisions of both the United Nations Charter and the Helsinki accords. They have also ignored the stipulations of the Belgrade Conference.

But the Soviet Union's numerous acts of political repression, religious persecution, and cultural genocide have not stopped the proud and determined peoples of Latvia, Estonia, and Lithuania in their resistance to the Soviets. These courageous people have refused to succumb to this repression and have preserved their unique languages, culture, and religious heritage.

Mr. Speaker, as we commemorate the 40th anniversary of Genocide Day, let us continue to preserve and protect the precious freedoms and liberties we Americans enjoy, and seek to extend these same liberties and freedoms to the repressed peoples of the Baltic whose freedom has been taken by force. Aggression against a free people will never be condoned and as a free nation, we should challenge this aggression at every opportunity.

On this day, the 40th anniversary of Genocide Day, it is appropriate that we renew our pledge to aid in restoring freedom to those who seek for its rewards. We must pledge to continue our support for the people of Latvia, Estonia, and Lithuania in this struggle for the freedoms they have been denied for too many years.●

● Mr. McDONALD. Mr. Speaker, June 14 marks a sad day in Baltic history when the Soviet Union started a series of forced deportations from Latvia, Lithuania, and Estonia just prior to the Nazi invasion of June 22, 1941. The Baltic countries had the great misfortune to be invaded three times during World War II, twice by the Red Army and once by the German Army. Deportations and executions of these Baltic citizens continued right up until the Wermacht tanks rolled into the Baltic nations later in the month. When the Baltic nations were reoccupied, the brave people of those nations resisted heroically. From roughly 1944 to 1947 they fought pitched battles with regular Red Army troops, but mainly with MVD formations. All during this period the forced deportations continued and there are photographs available of some of these infamous happenings to prove what took place. An inordinate number of Balts came to populate the forced labor camps. Those who lived to be released from the camps were never permitted to return to their native lands, but were forced to live in Central Asia and other areas foreign to them. By the end of 1949 a grand total of 850,000 people have been removed from their native lands—or roughly 10 percent of the population of the countries involved.

From the Soviet point of view, this was a logical move. They exterminated or removed most of the opposition to their rule, or so they thought, the clergy, military officers, and intellectuals. However, the resistance continues to this day and there are even forced labor camps on Baltic soil today. As part of their overall plan, the Soviets moved Great Russians and reliable Communists steadily into the Baltic nations to act as a check on local nationalistic tendencies, but they have always remained outsiders. We who live in freedom can only wish Lithuania, Latvia, and Estonia well in their struggle against Soviet oppression and try to nourish the hope that they may someday again be free.●

● Mr. PEPPER. Mr. Speaker, once again I feel it is my sad duty to help keep alive the memory of the Baltic

genocide under Soviet occupation during World War II and after.

Hundreds of thousands perished because their fatherlands were occupied in the name of the war effort, their countries seized, their relatives taken away never to be seen again. This heinous act shows the kind of neighbor the Soviet Union is to so many insecure and fearful countries on its boundary: a neighbor who rings the doorbell and puts a foot inside, who lifts the chain and enters saying he will protect your home from thieves. Then he says he needs your living room to hear the noise of doors being opened, he must put iron gates over your windows to prevent unauthorized entrance and then he puts you down into your basement and locks the door so you will be safe from harm. Then you realize that nothing could be worse harm to you than that neighbor, but it is too late. What kind of a neighbor is that?

Lithuania, Estonia, Latvia, Poland, the Ukraine, Armenia, Azerbaidjan, and many other small or medium nations have made this discovery and are now sitting bound and gagged in the Soviet basement. I hope and pray that someday they will live in freedom and happiness once again and let us remember that they exist in bondage all the while.●

● Mr. HOLLENBECK. Mr. Speaker, June 14 marks a day of sober reflection for individuals living in the Baltic States and throughout the world. On this day in 1941, the midst of a world conflagration, hundreds of thousands of persons in Lithuania, Latvia, and Estonia were taken from their homes and deported—many of them being sent to slave labor camps in Siberia. Thousands of others were mercilessly executed by the ruthless Soviet forces.

Oppressed for centuries because of their vulnerable geographic location, the Baltic States have suffered invasions from the East by the Russians and from the West by the Teutonic knights. They have demonstrated incredible spiritual and ethnic fortitude by surviving these repeated onslaughts.

Ever since these gallant Baltic countries were forcibly incorporated into the Soviet Union by the Russians, the inhabitants of these states have struggled to cast off the chains of their oppressors. Thousands of these freedom fighters have sacrificed their lives in an attempt to secure freedom and liberty for their beleaguered nations. From 1944 to 1952 alone, some 50,000 Lithuanian freedom fighters gave their lives as part of a grassroots resistance movement. However, the cessation of armed guerrilla warfare has not resulted in the end of resistance against Soviet domination. Rather, it has fostered the introduction of nonviolent protest on a massive scale.

Even today, Lithuanians, Latvians, and Estonians are risking their lives in outright defiance of the Communist regime. The protests of these proud people against the denial of their right to self-determination and religious and political freedom continues despite Soviet oppression. With this in mind, we must attempt to match the courage of Lithuania, Latvia, and Estonia by redoubling our efforts to secure self-determination and human rights for all.

It is our duty to confront the Soviet Government with the fact that despite being cosigners of the Helsinki accords, they have willfully ignored many of the provisions guaranteeing basic human rights. We must continue to speak out against the infringement of human rights and not succumb to any temptation to condone the inhumane treatment of those less fortunate throughout the world.

June 14 marks a grim reminder for all of us as to the extent of man's inhumanity to man. I am convinced that it is only appropriate that we pause and reflect on the events that transpired in June of 1941. By doing so, we can only reinforce our convictions to ease the plight of those held under Soviet domination in the Baltic States.●

● Mr. BAILEY of Pennsylvania. Mr. Speaker, this month marks the anniversary of a disastrous and inhuman castastrophe committed by the Soviets against the Baltic States some 40 years ago. The consequences and the suffering of the Estonian, Latvian, and Lithuanian people are still sharply felt. The persecution, oppression, and injustice inflicted upon these people by the Soviets when they marched into and seized their countries was a tragedy that struck virtually every Baltic family. The human suffering and loss of lives was an atrocity and this country must strive to prevent the chance of such a holocaust ever happening again on the face of this Earth.

Our country was built by a nation of strangers—that is a fact. From hundreds of places all over the world, people poured into an empty land joining and blending into one irresistible wave. And the land flourished because it was fed from so many sources because it was nurtured by cultures, traditions, and people who placed their love for freedom, peace, dignity, and respect for their fellow man above and beyond all other goals.

When the earliest settlers landed here, there was no one to ask them from where they came. The only questions asked of them was were they strong enough, strong enough to make the journey, strong enough to clear the land, enduring enough to make a home for freedom and brave enough to die for liberty if necessary?

We must never neglect the freedoms and basic rights granted to us as citizens of the United States. Neither can we neglect to promote our democratic principles abroad. Human rights, self-dignity, and the value of each human life can never be cast aside. These matters, especially in countries where their existence is threatened, must be supported and promoted by nations such as ours. We must use our strength to benefit those who, through no fault of their own, cannot control their own destiny. Oppression and persecution become their fate. This is not right. This is not just. We, as a nation have never and should never accept it. We can only become more dedicated to our conviction to fight such injustices.

Unfortunately, the Soviets to this day continue to repress the national, cultural, and religious movements of the Baltics and others. It is with great hope for the eventual decline of such practices that I join the Joint Baltic American National Committee and Baltic communities throughout the country to continue to strengthen our efforts to combat oppression throughout the world, and to encourage humane, civilized, and representative forms of government.●

● Mr. ADDABBO. Mr. Speaker, I join the Committee on Baltic States and Ukraine in commemorating the tragic genocide in Lithuania, Latvia, and Estonia in 1941. The people and culture of these states have been scapegoats to the feuding of governments stronger than themselves in a way the United States has never even had to fear. The 1939 secret pact, dividing Eastern Europe between Germany and the Soviet Union, is still a symbol of East European oppression. The memory of the 1941 genocide is an all-too-real reminder of the Baltic victims of the 20th century.

In the years before the Second World War, the Baltic States struggled to maintain their new-found independence, their allegiances to European nations constantly shifting. By the end of the war, many of the Baltic people were deported or killed and the society they had begun to rebuild in the interwar period was more splintered than ever. The states never lost the national culture and unity they had fought for, but they were never granted their sovereign right to self-government and self-determination.

What are the proposed courses of action on the problem of the Baltic States? A Chicago Tribune article quotes a Latvia resident as saying:

> We are not ripe for revolution, I am afraid . . . All we can reasonably hope for is preservation of our national identity and some degree of self-determination.

The signers of the 1979 Baltic amendment were not so accepting. They stated that—

> In the given historical situation, the question of self determination of Lithuania,

Latvia and Estonia must be decided by means of a referendum, conducted in each one of these countries under conditions which provide for a free expression of the people.

Whether we believe the goal is referendum or national identity, we cannot give up on freedom for the Baltic people. We must constantly reemphasize to the Soviet Union our strong disapprobation of their denial of Baltic self-determination.●

● Mr. BAILEY of Missouri. Mr. Speaker, on this 40th anniversay of "Genocide Day," I wish to read a statement written by my constituent, Mrs. Eve Straumanis:

I, Eve Straumanis, wish to clarify for you Congressman Bailey, the little part of history that I lived and am still living. I am Latvian by birth: small as that land may be and small as the number of Latvians may be, it does not make us less human nor less entitled to freedom and self-determination on our own soil that God gave us thousands of years ago.

The year of "horrors" started on the basis of the Molotov-Ribbentrop secret agreement on June 17, 1940. Soviet armed troops invaded and occupied Latvia. This occupation violated all previous non-aggression treaties signed by both countries and was preceded in 1939 by a Soviet ultimatum that forced the Latvian Government to allow Soviet military bases on Latvian territory.

At 2:30 on the morning of June 14, 1941, Martin and I were awakened by banging on the door of our two story house in Riga, Latvia. Five armed military men gave us a document in Russian entitled "ma bacceresive" which translated meant resettlement for my sister and her three children, the oldest under four years of age. My sister and family lived on the first floor of our house: but had left June 13, to visit grandma for the summer. By God's grace, they were saved from the fate of thousands who during that night were torn away from their homes, families, and freedom into the distant regions of Siberia. Age meant nothing; those even under one year and people beyond 90 were not spared. My sister's husband lived a true horror's year, for eleven times he was sought to be arrested at our home as well as others. He managed to escape the endeavors of the Soviet occupied troops.

By order of Moscow on July 15, 1941, the Soviets held a general mock election in Latvia. Only Communist candidates were allowed. It was an enforced casting of votes; 99 percent of the population was said to have voted. A short time later in August, Moscow announced the decision of Latvians to have their dear little native land incorporated into the Soviet Union.

I take heart in the firm stand of the United States for never having recognized the illegal incorporation of the Baltic States into the Soviet Union.●

● Mr. LEBOUTILLIER. Mr. Speaker, this month marks the 40th anniversary of the tragic Baltic holocaust. On June 14, 1941, the Soviet armies marched into the Baltic States of Estonia, Latvia, and Lithuania under the banner of Stalin's "Sovietization" policies. Inhabitants of these three countries were unjustly forced to leave their homeland, and many were never to return.

The Russians stated that only those who could have provided resistance to Soviet rule were exiled. In reality, members from all spheres of society, regardless of their political views, were cruelly herded into railroad cars and transported to slave labor camps in Siberia. Unfortunately, by the end of 1949, a total of 850,000 or more than 10 percent of the population of these nations had suffered this fate at the hands of the Soviet Government.

In these violent times, people around the world are still subjected to oppression, terrorism, and inhumane treatment. Americans can feel proud of the fact that we live in a nation where individual rights and dignitites are respected.

I think that it is important, in our role as a world leader in the cause for freedom, to commemorate this memorable day in Baltic history. Hopefully, by reminding people of these tragic events, the day will come when individuals throughout the world will live in an environment where their rights and freedom are truly respected.●

● Mr. FROST. Mr. Speaker, I join my colleagues in taking this time to remind us all of the tragedy that occured 40 years ago this month. June 14, 1941, which we now remember as Genocide Day, represents one of the bleakest chapters in the history of the Baltic States. But through remembrances such as their special order, we are able to show the world that we will not forget the terrible chain of events that led to Genocide Day and which still keep Latvia, Lithuania, and Estonia in bondage to the Soviet Union.

I am especially pleased to join this ceremony because my maternal family heritage is Lithuanian. I am grateful that my Lithuanian ancestors were able to emigrate to the United States and prosper in our free society. But I am saddened at the knowledge that today's citizens of Lithuania and the other Baltic States still live under the domination of a totalitarian state dedicated to eradicating all semblance of freedom.

I commend the Ad Hoc Congressional Committee on the Baltic States and Ukraine in taking this time to keep the memory of Genocide Day fresh in the minds of the Congress and the people of the United States. Perhaps only by our commemoration of Genocide Day can we ever hope to join the people of the Baltic States in celebrating that most precious of gifts—freedom.●

GENERAL LEAVE

Mr. DOUGHERTY. Mr. Speaker, I ask unanimous consent that all Members may have 5 legislative days in which to revise and extend their remarks in the RECORD on this issue.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from Pennsylvania?

There was no objection.

PERMISSION FOR COMMITTEE ON GOVERNMENT OPERATIONS TO HAVE UNTIL MIDNIGHT FRIDAY, JUNE 12, 1981, TO FILE SUNDRY REPORTS

Mr. BROOKS. Mr. Speaker, I ask unanimous consent that the Committee on Government Operations may have until midnight Friday to file sundry reports.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from Texas?

There was no objection.

SAVINGS AND LOAN INSTITUTIONS

The SPEAKER pro tempore. Under a previous order of the House, the gentleman from Missouri (Mr. EMERSON) is recognized for 10 minutes.

Mr. EMERSON. Mr. Speaker, as many of my colleagues are aware, the savings and loans institutions throughout the country have been faced with unprecedented hardships in recent years as a result of the double-digit inflation produced by Federal Government policies. According to recent reports, some 400 S. & L.'s are technically bankrupt under the FSLIC's net worth requirements, since their equity is less than 4 percent of deposits. Across the country, profits for S. & L.'s fell 75 percent in 1980, and the Nation's 4,700 S. & L.'s are expected to lose approximately $4 billion in 1981.

It is important for those of us in this body to realize that in many instances these conditions have developed far beyond the control of those who manage the savings and loans. This is not a case of mismanagement on an unprecedented scale. The many thousands of managers who built and have administered the multibillion-dollar savings and loan industry have not fallen into some sort of collective negligence. No, the problems that confront the S. & L.'s were manufactured here in Washington; and the answers devised by Washington to the S. & L.'s problems have been too slow and many times too late.

In the weeks and months to come, I intend to actively participate in the search for the solution to the problems confronting the thrift industry; and I invite all my colleagues to join in this effort to save the industry that has allowed so many Americans to fulfill the dream of owning their own home. As a first step, I would like to insert into the RECORD a brief narrative about the industry and the problems it faces. This description was prepared for me by Mr. David Patterson,

president of the Colonial Federal Savings and Loan in Cape Girardeau, Mo. I believe his remarks are well worth noting for anyone who is concerned about the continued stability of the financing for homebuilding and who wishes to assist the savings and loans out of a crisis that Congress and Federal regulations made for them. His remarks follow:

A SHORT HISTORY OF SAVINGS AND LOANS

(By Mr. David Patterson)

From its inception in 1831 in a little town near Philadelphia, the savings and loan industry has served primarily two purposes. One to provide a safe depository for savings, principally family savings, and the other to lend funds to provide for homeownership.

The business entity was only mutual in nature for many, many years; hence the name "Association" rather than "Corporation", and to this day, by law, is a mutual association in approximately twenty-two states—Missouri being one of them. This concept means, of course, that the savings depositors own the company and vote for its directors just as does a mutual insurance company. Stock chartered associations came into being not too many years ago and are allowed in several states, the principal one being California, and the stockholders elect directors in that case.

There are, other than the stock ownership and the mutual ownership, two charters available for the conduct of business. One a state charter authorized by state of domicile and the other a federal charter authorized by the federal government. This parallels the banking setup wherein banks with the name "National" incorporated in the name are chartered by the federal government and those without the name "National" are state chartered. Federal associations are not allowed to be stock associations. State chartered associations may be stock chartered only if their state of domicile has the proper enabling legislation. Missouri has no such law.

Without the advantage of the stock ownership, a mutual savings and loan such as Colonial Federal, is limited to the attraction of savings deposits for its capital, being unauthorized to issue stock. Remember, about one-half of the states, including Missouri, are in this same position.

Savings and loans can be credited for the fact that the American public has attained such a high level of homeownership—a level which outstrips any other nation in the world. It is our reason for being, and we have succeeded greatly in fulfilling the mandates of our charters until fairly recently. Savings and loans, as an industry, have financed more homes than all other financial institutions put together. Of course, the success years came during those years of low inflation and stable interest rates. The norm for many, many years was to pay 6 percent on savings and charge 8 percent on a home loan. Before that there were several years of 6 percent home loans and 4 percent savings. In fact, many states, including Missouri, had a usury limit of 8 percent until only five or six years ago when it was raised to 10 percent, and with interest rates increasing fast, had to be raised again within just a couple of years—when, finally, about one year ago state usury limits were so restrictive that the federal government issued preemptive regulations taking all state usury laws off the books, unless they were reinstated by state legislation within three years. This action was absolutely necessary in order for savings and loans to compete for money, because inflation and volatile interest rates made it impossible to attract money at low rates any more—much less earn a profit margin by lending at the old low rates.

The real troublesome aspect of savings and loan operations is that our savings base is on a short term, almost demand, basis whereas our mortgages are generally written for thirty years at fixed rates. This means that we have to live with our old low contracted rates on the earnings side but must pay current market rates on the cost side. Virtually all, at least 95 percent, of the savings and loans in the country are losing money rapidly right now. We do not have the ability to roll over the old fixed rate mortgages into higher rates—and this situation was mandated by government, both state and federal.

The business, through its national trade association, and directly, clamored for years for a variable rate mortgage such as has been used in Canada and Britain for decades—to no avail. We were required to deal in fixed rate mortgages only, with perhaps the exceptions of state chartered associations in a very few states, notably California.

In the first half of 1980, merely one year ago, the Federal Home Loan Bank Board which governs savings and loans through twelve district Federal Home Loan Banks (a similar setup with the Federal Reserve Board for banks) authorized the usage of a variable rate mortgage, but with such restrictions that it was of absolutely no help at this time, and, of course, could only affect newly written mortgages. This VRM allowed an interest rate change only at the end of a three-year period and then only by ½ percent per year. In the meantime, we saw interest rates go from 9 percent to 20 percent, then reduce somewhat, and are now climbing again. It has forced us to sustain old low rate notes at high cost money.

Finally, just about three week ago, the Federal Home Loan Bank Board authorized an adjustable rate mortgage for usage with no increase limitation whatsoever. If this tool had been available years ago when we demanded it, we would not be in the loss situation that we are in today. Even this tool will take (assuming the homebuying public will use it) another six to eight years to amass enough such mortgages on the books to again be in a profitable position.

Our association, just like thousands of others, currently has over half of its earning assets in fixed rate mortgages of 9 percent and under. These mortgages will stay on the books, many of them for their remaining terms of twenty years, but we would expect that about 70 percent would be changed within eight years simply by the action of a home sale.

About two years ago Congress created a Depository Institutions Deregulation Committee (DIDC) composed of the Secretary of the Treasury, the Chairmen of the Federal Reserve Board, Federal Deposit Insurance Corporation, Federal Home Loan Bank Board, and the National Credit Union Administration Board. This committee, which is stacked against the savings and loans, stipulates the rates to be paid for family savings. Since no institutions other than savings and loans are strapped with old low rate mortgages, we are the only ones to suffer from the high rates as authorized. Banks and credit unions can call their notes and raise their lending rates accordingly as costs increase—savings and loans cannot.

Assistance must be forthcoming, since savings and loans all over the country will be in default and will have to be either merged (which is merely a delaying action) or taken over by the FSLIC, which has only about 2 percent reserves—in other words, only 2 percent of the total of the entire savings of the country. This, of course, is the organization, along with the FDIC for banks, that, for an insurance premium which we pay, insures all savings, time, and demand accounts in the country to a maximum of $100,000 per account.

It is clear, therefore, that the FSLIC does not have the cash, and some plan such as an exchange of low-yielding mortgage loans for FSLIC issued notes, must be adopted soon. Senator Moynihan of New York has introduced a bill similar to this plan. New York, by the way, had to live with artificially low usury limits for far too long, just as did Missouri.

It appears that Secretary of the Treasury Regan, the former head of Merrill-Lynch, has absolutely no sympathy for savings and loans. By his statements he acts as if savings and loans are in this shape because of poor management and that they, like many other small businesses, are expendable and should experience a big shakeout through failures and mergers—because in his opinion housing takes too much capital anyway. He doesn't think of the millions of savers who would be affected or the panic it might cause.

In the meantime, the mutual money market funds of which Merrill-Lynch has the largest, attracts money away from savings and loans with high rates and invests more than half of it in Euro-dollars and foreign investments. Yet they cry that savings and loans are remiss by not paying the highest rates possible to the poor saver; rates, of course, which we cannot afford anyway because we are not allowed by law to make the types of investments allowed to mutual money market funds. By law, we must follow our charters and invest principally in mortgages, although recently we were allowed personal consumer financing, an avenue of investment that can only practically amount to 1 percent to 2 percent of our total assets.

Even if we were allowed to make investments such as the mutual money market funds can make, we would be years in overcoming the burden of our portfolio of low yielding mortgages. Even if this were to happen, you can see that mortgage money to finance the homes for the American public would completely dry up.

JUST A WARNING

The SPEAKER. Under a previous order of the House, the gentleman from New York (Mr. FISH) is recognized for 5 minutes.

Mr. FISH. Mr. Speaker, the real question facing this Nation and the world community is not whether Israel acted properly or improperly in its raid against the Iraqi nuclear reactor. Rather, the question is why we in the technologically advanced West have permitted advanced nuclear technology, with the capability of producing nuclear weapons, into an area as volatile as the Middle East, and especially to nations as irresponsible as Iraq and, possibly in the near future, Libya.

France and Italy, in their efforts to maintain a secure supply of oil, by introducing nuclear technology which would result in the construction of nuclear weapons, may have resulted in making the area even more dangerous and unstable.

Mr. Speaker, the failure was not in the Israeli action, but in the steadfastness of the French and Italians in refusing to alter their reckless course of supplying Iraq with this technology—this despite intense diplomatic and public pressure.

I believe that Israel has provided all of us in the Western world a second chance, and opportunity to reexamine policies of providing advanced nuclear technology to unstable areas of the world in a wholesale manner. For that, she should be thanked and not condemned.

Mr. Speaker, I would also like to briefly address the question of the Israeli action itself. We in the United States should realize that the action by Israel differs very little from our action in the early sixties to prevent a nuclear threat from Cuba by the Soviet Union. We acted at that time as Israel acted this past week, to protect our essential and vital interests as a nation.

Mr. Speaker, if someone threatens to burn down your house, and you do whatever is possible to prevent that person from doing so, is that considered an aggressive act, or one to protect the safety of your family. The answer should be quite obvious. Well, Iraqi President Sadaam Hussein threatened several times to develop nuclear weapons with the sole intent of destroying Israel. The evidence is not all in. But it appears Israel had exhausted all other possible peaceful remedies. Her last recourse, with the very tight time frame she had to work with, was to use military action.

We should also note the extraordinary precautions Israel took to limit injury of innocent people. The possible consequences, had the reactor gone "critical," would have been far more devastating. Israel's action was as responsibile as one could expect, given the circumstances I have described.

POSTAL SERVICE SHOULD FIND OTHER MEANS OF REDUCING EXPENDITURES THAN CLOSING LOCAL POST OFFICES

The SPEAKER pro tempore. Under a previous order of the House, the gentleman from Iowa (Mr. BEDELL) is recognized for 5 minutes.

● Mr. BEDELL. Mr. Speaker, on Wednesday the Post Office and Civil Service Committee reluctantly acted to comply with budget reductions imposed upon the Congress by reporting out legislation that instructs the Postmaster General to cut $100 million over the next 3 years by closing or consolidating up to 10,000 of our Nation's smallest post offices. Because that action will likely be included in an omnibus reconciliation package that will not afford Members of Congress the opportunity to express their opposition on this specific proposal, I am today introducing a resolution expressing the sense of the Congress that the Postmaster General of the United States should give priority consideration to means other than closing large numbers of local post offices as a method of reducing expenditures by the U.S. Postal Service.

Mr. Speaker, I believe it would be a tragic mistake for this Congress to pass legislation that would result in the Postmaster General closing up to one-third of our Nation's post offices. Even the Post Office and Civil Service Committee recognized the disastrous effects of this action when they recommended that the full House not approve this measure.

I am sure that most Members of Congress recognize that the Postal Service could realize some savings by closing or consolidating some very small post offices without impacting upon the mail service of this country. Clearly, this resolution does not prohibit or discourage the Postmaster General from using his authority to close or consolidate inefficient, duplicative, or marginal post offices in communities which could receive satisfactory postal service from another post office or contract post office. However, this resolution does express the sense of the Congress that the closing of up to 10,000 post offices would be unwise and irresponsible.

Mr. Speaker, yesterday I spoke with members and staff of the Post Office and Civil Service Committee and learned that in their views, up to 10,000 of the Nation's 30,304 post offices could be closed by the Postmaster General if the committee action is adopted by the Congress. The committee action calls upon the Postmaster General to save $100 million over the next 3 years by closing or consolidating inefficient post offices. The committee received information from the Postal Service that the estimated savings of closing a small post office is $10,000. While the savings may be greater over the 3-year period, it is possible that up to one-third of our country's post offices would be closed to accomplish a $100 million savings if the average savings is $10,000 per post office.

This action would have repercussions which will be felt by industry, institutions, small business, and many of the 230 million Americans, especially those in rural areas. Postal service is viewed by most Americans as a service as essential as fire, police, and health protection. We have become a nation reliant upon a responsive, expedient, and convenient postal service. This service is essential to the livelihood of many businesses and individuals for their everyday life.

I think that it is going to be very difficult to explain to an elderly or handicapped person why the Congress would instruct the Postmaster General to initiate a wholesale action to close thousands of small post offices. This action would not be because the service could be performed equally well by another post office or because detailed study and careful examination could show equivalent service in a different fashion. But because the reconciliation package calls for a savings of $100 million by closing of small post offices.

I am greatly disturbed by this proposal and I urge my colleagues to join me in support of this resolution. Adopting this policy in response to President Reagan's budget proposal must be termed reckless and irresponsible. The Congress must respond to the desire of the American people to control Federal spending in a responsible fashion. Let us join together in this resolution to instruct the Postmaster General to take a more responsible course of action:

H. RES. 147

Whereas the Congress has recognized the need to eliminate waste in the Federal budget; and

Whereas the budget reductions imposed upon the Congress are requiring substantial decreases in the level of Federal funding provided to the United States Postal Service; and

Whereas local postal service is viewed by many communities as a service as essential as fire, police and health protection; and

Whereas many businesses and individuals are dependent on a reliable, expedient and convenient postal service to maintain their livelihood; and

Whereas the burden imposed by the closing of small post offices is likely to impact disproportionately on the rural sector of our economy; and

Whereas the closing of large numbers of this country's smallest post offices would result in hardship for millions of elderly, handicapped, and other citizens which presently benefit from the service of small local post offices: Now, therefore, be it

Resolved, That the House of Representatives calls upon the Postmaster General of the United States to give priority consideration to means other than closing local post offices as a method of reducing expenditures by the United States Postal Service.●

OLYMPIC COMMEMORATIVE SILVER DOLLAR BILL INTRODUCED

The SPEAKER pro tempore. Under a previous order of the House, the gentleman from Illinois (Mr. ANNUNZIO), is recognized for 5 minutes.

● Mr. ANNUNZIO. Mr. Speaker, today I am introducing the Olympic Commemorative Silver Dollar Act. This bill authorizes the mint to strike

up to 25 million full size 90 percent silver dollars to commemorate the 1984 Summer Olympics to be held in Los Angeles, Calif. The sale of these coins will help provide funds to train our athletes for the Olympics as well as reduce the national debt. The House this month passed a bill that would authorize the minting of commemorative coins for the first time in over 25 years in honor of George Washington's 250th anniversary. The Olympic commemorative silver dollar bill follows in the footsteps of that bill.

I believe that the minting of commemorative coins is a tradition that needs to be revived in America. Most American coin collectors are especially interested in using U.S. coins, but are limited to collecting our regular issue coinage. Collectors who seek something special are forced to purchase commemorative coins from foreign governments.

The minting of commemorative coinage was halted in this country because of a number of abuses connected with those programs. The bill I am introducing today, like the George Washington Commemorative Coin Act, addresses those problems in a manner that has gained widespread acceptance.

This bill authorizes the issuance of a single coin for a limited period of time. There will not be a multitude of different coins. Multiple issues are confusing and discouraging to collectors and are a burden on the production capacity of the mint.

The coins would be struck only for 3 years, from 1983 through 1985. This avoids the problems of the past in which commemorative coins were issued for years after the event being commemorated was over.

The timing of the coin also fits nicely with that of the George Washington commemorative. The sales program will begin just as the Washington program is winding down in 1983. Since the coins will not compete with one another, collectors will not be forced to choose which one to purchase.

The marketing and sales of the coin will be conducted exclusively by the Bureau of the Mint. Coin collectors have high regard for the ethical, fair and efficient manner in which they have been treated. Past abuses by private marketers of commemorative coins is avoided.

The coin commemorates a significant national event of interest to all Americans. The Olympics are not solely of local or regional interest, but are national and even international in scope. There can be no doubt that the Olympic games are a meaningful occurrence in American life. One needs only recall the excitement last year of Eric Heiden's five gold medal victories and the glorious triumph of the U.S. hockey team.

Money from the sale of these coins will be used to train our Olympic athletes, but the money will be disbursed by the Treasury. The Government will have the right to audit the books of the U.S. Olympic Committee to assure that the money is used properly. Furthermore, I intend to request that such an audit is performed and I will make the results of that audit public.

Finally, but hardly least of all, this coin will be another round fired in my war on the national debt. Half the profits from the sale of these coins will be earmarked to reduce the national debt. That money can be used for no other purpose.

Our national debt has reached nearly $1 trillion. We must begin to attack that debt and get the taxpayer out from under the dark shadow it casts upon our economic well-being. It is extremely important that every bill that this Congress considers that generates receipts to the Government contain a provision earmarking a portion of those receipts to reduce the crushing burden of our national debt.

Mr. Speaker, this bill benefits America in three ways. It provides funds to train our athletes so that they may best represent America at the Olympics. It raises money to reduce our national debt. It commemorates the U.S. participation in, and the hosting of, a significant international event. I urge all my colleagues to join with me in cosponsoring this legislation.

A copy of the legislation and summary of the bill follow:

SHORT SUMMARY OF H.R. 3879, THE OLYMPIC COMMEMORATIVE SILVER DOLLAR ACT

Sec. 1. The short title of the bill is the "Olympic Commemorative Silver Dollar Act".

Sec. 2. The bill amends the Coinage Act of 1965 to provide for the minting of up to 25 million full-size 90 percent silver dollars. The coins would be legal tender. Each coin would contain .7734 ounce of silver. The coins would commemorate the 1984 Summer Olympics to be held in Los Angeles. None could be minted after 1985.

The coins would be sold to the public at a price equal to the cost of manufacture plus at least a 25 percent surcharge. One half of the surcharge would be given to the United States Olympic Committee to train athletes for the Olympics. The other half of the surcharge would be used solely to reduce the national debt.

The Comptroller General would have the right to audit the books of the Olympic Committee to assure that the money was used for training athletes.

Sec. 3. The Act takes effect on October 1, 1982.

H.R. 3879

A bill to provide for the minting of silver dollars with a design emblematic of the 1984 Summer Olympic games which are to be held in Los Angeles, California

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled, That this Act may be cited as the "Olympic Commemorative Silver Dollar Act".

SEC. 2. Title I of the Coinage Act of 1965 (31 U.S.C. 391 et seq.) is amended by inserting after section 104 the following:

"Sec. 104A. (a)(1) Notwithstanding any other provision of law, the Secretary shall mint and issue one-dollar coins pursuant to this section in such quantities as are necessary to meet the needs of the public, except that such quantity shall not exceed 25 million coins.

"(2)(A) The one-dollar coins minted pursuant to this section shall weigh 26.73 grams, have a diameter of 1.50 inches, and be minted in accordance with the standard established in section 3514 of the Revised Statutes (31 U.S.C. 321).

"(B) The Secretary shall determine the design of such one-dollar coin. Such design shall be emblematic of the 1984 Summer Olympic games which are to be held in Los Angeles, California. On each such one-dollar coin there shall be a designation of the value of the coin, an inscription of the year '1984', and the inscriptions of the words 'Liberty', 'In God We Trust', 'United States of America', and 'E Pluribus Unum'.

"(C) All one-dollar coins minted pursuant to this section shall be legal tender as provided in section 102 of this title (31 U.S.C. 392).

"(b)(1) Notwithstanding any other provision of law, all one-dollar coins minted pursuant to this section shall be sold to the public by the Secretary under such regulations as he may prescribe and at a price equal to the cost of minting such one-dollar coins (including labor, materials, dies, use of machinery, and overhead expenses) plus a surcharge, established by the Secretary, of not less than 25 percent of such cost.

"(2) An amount equal to one half of the amount of all surcharges which are received by the Secretary from the sale of such one-dollar coins shall be promptly paid by the Secretary to the United States Olympic Committee. Such amounts shall be used to train United States athletes for participation in the Olympic games.

"(3) An amount equal to one half of the amount of all surcharges which are received by the Secretary from the sale of such one dollar coins shall be desposited in the general fund of the Treasury and shall be used for the sole purpose of reducing the national debt.

"(4) The Comptroller General of the United States shall have the right to examine such books, records, documents, and other data of the United States Olympic Committee as may be related to the expenditure of amounts which are paid to the United States Olympic Committee pursuant to paragraph (2).

"(c) No one-dollar coins shall be minted pursuant to this section after December 31, 1985.

"(d) There are authorized to be appropriated such sums as may be necessary to carry out the provisions of this section.".

SEC. 3. The amendment made by the first section of this Act shall take effect on October 1, 1982.●

THE 40TH ANNIVERSARY OF GENOCIDE DAY

The SPEAKER pro tempore. Under a previous order of the House, the gentleman from Michigan (Mr. FORD) is recognized for 5 minutes.

● Mr. FORD of Michigan. Mr. Speaker, this month, Americans of Estonian, Latvian, and Lithuanian descent will commemorate the 40th anniversary of the Baltic Holocaust. The days of June 14 and 15 marked the beginning of a mass deportation effort conducted in the Baltic States 40 years ago by the Soviet regime. In the wake of this campaign of terror, virtually no Baltic family was left untouched by the tragedy.

Occupation and genocide are still being repeated by the U.S.S.R. with the most recent example being in Afghanistan. Indeed, during its entire 63 years in power, Communist Russia has remained an ideologically dogmatic, politically repressive state which has exploited every opportunity to control its weaker neighbors.

It is up to us in the West to continue to focus world attention on the Soviet Union's blatant disregard of human rights and fundamental freedoms. The Soviet Union must be made to realize that it will be held accountable for its denial of basic human rights in the Baltic States and other captive nations. America must persevere in its efforts to fight oppression throughout the world, and to encourage human, civilized and representative forms of government.●

SMALL BUSINESS AND MILITARY READINESS—HEARING ANNOUNCEMENT

The SPEAKER pro tempore. Under a previous order of the House, the gentleman from New York (Mr. LAFALCE) is recognized for 5 minutes.

●Mr. LAFALCE. Mr. Speaker, the United States is experiencing a massive military buildup today. We are seeing a doubling of the defense budget over the next few years from $161 billion in fiscal 1981 to $343 billion in fiscal 1986. We will be seeing a surge in orders for new military equipment, spare parts, and ammunition. There will be a greater need for industrial capacity to handle defense work.

Can our industrial base meet this challenge? I do not know. That is an unsettling answer given the unsettling international conditions our Nation faces. But the truth is that the U.S. defense industrial base has been weakened over the past decade to the point where some experts doubt whether we have the capacity in industrial plant and skilled manpower to handle the increased volume of defense work.

The most serious problems arise in the small business sector of our economy. Many small businesses have stopped seeking and handling defense work because it has been undependable. Yet small business is a key part of our defense industrial base. According to economist Gail Schwartz:

Small firms are pivotal in the defense production chain because they produce the highly specialized tools and equipment often in very small runs that make sophisticated weapons systems work. They are subcontractors to the larger firms which assemble the planes, missiles and vehicles themselves. There may be as many as five tiers of subcontractors involved in one final product. They provided $8 billion worth of shipments to the Department of Defense in 1978.

Let me add that small businesses are prime contractors in many instances.

I have long been concerned about the need to strengthen the small business component of the U.S. defense industrial base. I have also been interested in assuring that small business is utilized to its fullest ability in rebuilding U.S. military capabilities and receives a fair share of the new defense contracts. Giving small business its fair—and proper—share not only helps strengthen the economy; it means competition. And we have found that greater competition for defense contracts means lower costs to the taxpayer.

The House Small Business Oversight Subcommittee, which I Chair, plans to hold hearings on June 18, 23, and 25 on the broad issue of small business and Government procurement. The subcommittee will be paying close attention not only to defense procurement and the problems small business faces but to small business and civilian procurement. In our concentration on defense spending today, we must not forget that $28 billion is spent on procurement by the civilian sector of the Government. The General Services Administration, are the major civilian buyers. To examine the problems small business experiences, I have invited the following witnesses:

JUNE 18, 1981, ROOM 2359A, RHOB, 9:30 A.M.

Dr. Gail Schwartz, visiting professor of Public Policy, Johns Hopkins University;

Terry Ford, assistant to the president, Gould's Ocean Systems Division, Cleveland, Ohio;

Pat Lee, president, Enidine Inc., Buffalo, N.Y.;

Herman Director, editor—Bidders Early Alert Message System, Washington, D.C.;

Paul Seidman, Esq., Washington, D.C., former assistant Chief Counsel for Procurement, Office of Advocacy, SBA;

Lola Dickerman, Esq., Boston, Mass.;

Daniel Barry, director, Labor Surplus Area Small Business Outreach Program, Buffalo, N.Y.;

JUNE 23, 1981, ROOM 2359A, RHOB, 10:30 A.M.

Michael Cardenas, Administrator, Small Business Administration;

Gerald Carmen, Administrator, General Services Administration;

Donald Sowles, Administrator-Designate, Office of Federal Procurement Policy.

JUNE 25, 1981, ROOM 2359A RHOB, 9:30 A.M.

Dr. Richard DeLauer, Under Secretary for Research and Engineering, Department of Defense.

I am also inserting in the CONGRESSIONAL RECORD three recent articles that are required background reading on the problems we face in rebuilding U.S. military readiness and the contribution small business should be making in that effort. The articles appeared in the Washington Star of May 22, 1981, Newsweek of June 8, 1981, and the Washington Post of June 7, 1981.

[From the Washington Star, May 22, 1981]

INDUSTRY COULDN'T FULFILL SUDDEN WEAPONS DEMAND

(By Gail Garfield Schwartz)

The U.S. economy could not respond to a sudden demand for weapons and equipment to fight a prolonged, conventional war. Further nothing being considered in Congress and/or by the Defense Department to deal with this recognized problem will make any substantial difference.

The American defense industrial base, which is almost totally owned and operated by the private sector, is in turbulence. Serious bottlenecks and choke points adversely affect the Defense Department's ability to procure military equipment in a timely, efficient and economical manner. These difficulties have resulted in a dramatic increase in the time lags for defense procurement, to as long as 120 weeks in many instances, according to the House Committee on Armed Services.

SPECIAL PROBLEMS

A major reason for the lack of a surge capacity is that small firms, which comprise one-fourth of all firms producing for the Defense Department, face special problems, and these problems cannot be solved by the Defense Department alone.

Small firms are pivotal in the defense production chain because they produce the highly specialized tools and equipment, often in very small runs, that make sophisticated weapons systems work. They are subcontractors to the larger firms which assemble the planes, missiles, and vehicles themselves. There may be as many as five tiers of subcontractors involved in one final product. They provided $8 billion worth of shipments to the Department of Defense of 1978.

There are some 92 industries involved in defense production. But the primary contributors at the subcontractor level are in the machinery sector and the electronics sector. The former produces tools, moulds, dies needed for making weapons parts. The latter makes the control elements that make these sophisticated systems work. Small firms in both these sectors make up over 53 per cent of all firms in the sector producing for defense.

WOES OF SMALL FIRMS

Small firms in these sectors face two crucial difficulties: They have a hard time getting capital; and they have a hard time hiring and retaining highly skilled workers.

Equity capital is hard to come by because many small firms are high risks and privately owned. Debt financing is hard to obtain because the firms limited assets often put them at a disadvantage for collateralized loans.

Small firms have trouble competing for specialized personnel in a tight labor market. They cannot offer the wage-fringe package that many large firms provide. Worse, they cannot afford to pay well during what may be long learning periods as workers master new equipment that is constantly changing.

Why does this matter? It matters for four reasons.

First, the inability of small domestic firms to produce the parts needed, on time, at planned costs, means that their customers look overseas for those parts. It does not augur well for the nation's military or political independence to rely on Japanese or German or Swedish suppliers for weaponry. In time of war, this overseas dependence could be catastrophic.

Second, if the United States tries to become more self-sufficient in defense production, and small firms cannot deliver the needed products on time, large firms may have to produce them. But, this may be more costly to the economy as a whole. It is inefficient for large firms to retain on line highly specialized capacity that is only occasionally used.

Third, defense production has beneficial spin-offs for small firms, as it expands their technological know-how.

And last, improving capacity in these sectors would help revitalize the economies of states in deep economic trouble. Illinois, Michigan, Indiana, New York, New Jersey, and many other states would benefit, along with the larger defense-related states of California and Texas.

SPECIAL CREDIT NEEDED

What is needed is a public-private effort to strengthen the competitive position of small firms in the key sectors that feed the defense industrial capacity. These efforts must go beyond changes in procurement practices or bidding systems now under consideration by Congress. Such adjustments may ease the pressure on small firms by improving their cash flow.

But high rates of inflation—which make even accelerated depreciation for new equipment of little use when cash is needed to replace it—and tight money put small firms at a great disadvantage. Special credits could be offered to small firms to enable them to buy materials and equipment needed for defense production.

The nation also needs a crash program to train machinists and engineers. Job tax credits could be made available to small firms so that they could match the pay scale of larger firms.

The nation's defense needs should trigger efforts to strengthen small machinery and electronics firms. This would send beneficial ripples through every region of the country. It could also determine the outcome of any war or police action in which we might find ourselves.

[From Newsweek, June 8, 1981]

CAN UNITED STATES INDUSTRY DELIVER?

The Ohio, the nation's first Trident submarine, will be delivered to the U.S. Navy in December—two and a half years late and $280 million over budget. Since construction started in 1976, the sub's builder, the Electric Boat Division of General Dynamics Corp., has weathered problems ranging from strikes to shoddy workmanship to defective government-supplied parts. Steel that may have been used in up to 126,000 locations didn't conform to specifications. Technicians had to rebalance the ship's service turbine generators, then rip out and replace the main turbine rotors. Management fired 3,000 workers. There have been so many delays and disputes that Navy Secretary John Lehman Jr. warned he might have a foreign contractor build the giant sub. His frustration was understandable, but the threat was laughable. Only one other country now has the capacity to build the Trident: the Soviet Union.

On the eve of one of the biggest defense buildups in peacetime history, there is serious doubt that the nation's defense industry can deliver the goods on time and within budget. After years of dampened military spending, the U.S. defense industry has dwindled substantially. More than 2,000 aerospace subcontractors left the field between 1968 and 1976, for example, and 240 forging foundries have closed. There are scattered shortages of men and material and many firms have cut capacity. The lead time for aluminum aircraft forgings, twenty weeks in 1976, has stretched to 120 weeks. An F-16 fighter that took 120 weeks to build in 1977 now takes 180 weeks. Delays mean higher price tags; and if the huge cost overruns in the Trident program are any example, the Pentagon's shopping list could easily bust even a swelled defense budget—and with it the Reagan Administration's hopes of eliminating the Federal deficit.

Hardware: To minimize potential problems, the Pentagon will spend slowly in the first few years. Defense Secretary Caspar Weinberger has asked Congress for an additional $32.6 billion in defense-spending authority for fiscal 1981 and 1982—but the Pentagon will spend only $5.8 billion of it right away. The rest is for long-range procurement programs that won't show up in actual appropriation bills for several years (chart). Still, the Reagan Administration proposes to double defense spending—to $343 billion—by 1986, and much of that money will go for hardware. Plans call for more spare parts and ammunition, a host of new fighters for the Air Force, Navy and Marines, more submarines, helicopters, tanks and cruise missiles, a new version of the B-1 bomber—and the MX missile, which alone could cost up to $56 billion.

Industry analysts say the nation's prime defense contractors do have the capacity to fill the new orders—at least in the short run. In the aerospace industry, for example, the military buildup will simply take up slack left by declining orders for commercial jets in recent years. But the squeeze may well be felt at the subcontractor level. Bottlenecks are inevitable, defense experts warn, because so many smaller firms have left the defense business for more dependable commercial contracts. The dwindling number of subcontractors has forced the Pentagon to work with many "sole suppliers." Only one plant makes a special steel used in air-to-air missiles; only one makes a special valve needed for submarines. A monopoly manufacturer, notes Adam Klein, a staff member of the House Armed Services Committee, "can sell at whatever price he chooses."

Shortages—of manpower, materials and manufacturing capacity—are already occurring in some areas, substantially driving up defense costs. Some key raw materials must be imported from politically unstable countries. The price of cobalt—used in the engines of F-15 and F-16 fighters—shot up 246 percent after the 1978 rebellion in Shaba Province in Zaire, for example, and now each engine costs an additional $18,000. A shortage of 30,000 aerospace and electrical engineers in the Los Angeles area has led to a bidding war, boosting labor costs. Shipbuilders can't find enough pipe fitters and welders. By one estimate, defense-related industries will be short 10,000 workers by 1985. Ironically, if the Reagan Administration's "supply-side economics" does stimulate the private sector, a serious crunch could come "five years down the road—when the economy and the military are both booming," says Michael Derchin, a defense analyst for Oppenheimer & Co., Inc.

In the scramble to win defense contracts, many large firms are working around the problems. To avoid subcontractors, for example, Pratt & Whitney Aircraft, which manufactures the engines for F-15 and F-16 fighters, is building factories to supply its own turbine airfoils, compressor blades and discs. To escape the engineering crunch in California, some plants have relocated. But many manufacturers say the shortages will not stop until the Federal government ends the piecemeal production cycle of defense spending. Contractors have often tooled up to meet an order only to have Congress cut the appropriation—or the Administration change plans. "If the subcontractors gear up for 1,400 F-18 fighters and Congress cuts it back to 200 or 300," says Oppenheimer's Derchin, "these guys will be left out on a limb."

Electric Boat's experiences building the Trident—and simultaneously the SSN 688 attack submarine—illustrate other contractor laments. Officials at the Groton, Conn., shipyard blame the government for much of the Trident's cost overruns. In 1979 and 1980 they submitted 8,000 complaints about defects in government-furnished parts that required "750,000 man-hours to correct" says general manager P. Takias Veliotis. In 1978 the firm threatened to stop work completely on the attack sub unless the government paid for $544 million worth of claims caused, company officials say, by 35,000 Navy-ordered design changes. Part of the problem was the Navy's policy of "concurrency"—beginning construction before the design was firmly set. "You finish a job 50 per cent through, then rip it out and put in a lot of revisions they come up with," grumbled one Groton draftsman. Adm. Hyman Rickover, however, has charged Electric Boat with underestimating bids to win contracts, then inflating costs.

Glitches: "Concurrent testing" was a complication for Chrysler Corp., builder of the Army's sleek new M-1 Abrams tank. The Army accelerated the tank's production schedule from ten years to seven, effectively skipping one testing stage. "The law of averages says you're going to uncover problems—that's why you do testing," says Chrysler spokesman John W. Day. The result: embarrassing glitches such as faulty gears and a tendency to throw tracks. Corrections to the M-1—together with inflation—have pushed the first model's price tag to $2.5 million, according to some estimates—four times the original cost in 1973.

Delays and cost overruns also seem inevitable in the gigantic MX missile project. If the Administration approves the plan to base the MX underground in Utah and Nevada, constructing the 4,600 shelters along with 8,000 miles of road would require digging up as much dirt as was excavated for the Panama Canal and pouring twice as much cement as was used in the Grand Coulee Dam. Critics warn that one key shortfall might be in obtaining enough water just to pour the cement.

Beyond the sheer scope of such projects, "gold plating"—using ever more sophisticat-

ed gadgetry in new weapons systems—further complicates construction and raises costs. Many last-minute design changes stem from the Pentagon's penchant for the most advanced technology—from precision-guidance systems to "all weather" capabilities. The resulting complexities mean fewer interchangeable parts—and more opportunities for production foul-ups and delays. Still, most defense contractors welcome—even foster—gold plating. "Sophisticated weapons," says Derchin, "are more lucrative because of constant, built-in obsolescence."

"Lower Risk": Such criticisms are hardly new, but Pentagon planners are taking a long, hard look at them in an effort to increase industrial efficiency. Deputy Defense Secretary Frank Carlucci has instructed the services to step back from the cutting edge of technology and plan for "lower risk" systems. Weinberger has announced plans to purchase more weaponry in quantity to cut unit production costs. Despite some Congressional opposition, he also hopes to issue multiyear contracts to defense manufacturers, replacing year-by-year appropriations that fluctuate with the political wind. The big buildup is bound to be dogged by technical hitches, bottlenecks and cost overruns, but sustained, well-planned spending is what it will take to to revitalize the defense industry.

[From the Washington Post, June 7, 1981]

REAGAN'S AUGUST GUNS: CRITICS SHOUT THEIR WARNING CRIES

(By Art Pine)

The Reagan administration has begun a major new buildup of the nation's defense forces that could have profound implications for the overall economy. If the president has his way, over the next five years military outlays will more than double to $336 billion, from $158.6 billion this year.

Administration figures show that between fiscal 1982 and 1986, the defense budget will surge an average 11.1 percent a year after adjustment for inflation, outpacing both the 6 percent growth that former President Carter envisioned and the 10 percent annual rate achieved during the Vietnam war buildup.

The increase will begin slowly but will speed up significantly in later years. Over the full five-year period, defense outlays would grow by $177.4 billion under Reagan's proposed budget, compared with $135.7 billion under Carter's plan. And the new president seems likely to get what he's asking.

Can the defense industry—and the economy—seriously cope with this kind of outpouring? Or will the increase, as some analysts argue, overwhelm the industry's production capacity, exacerbate shortages in labor and materials and send inflation soaring even farther?

The industry's current readiness has set off warning cries from some critics. A House Armed Services Committee report last December asserted the U.S. industrial base has deteriorated sharply and questioned whether the Pentagon will be able to spend the money it's seeking in an "economic manner."

Thomas S. Hahn, former counsel to the armed services panel, points to a steady decline in the number of defense contractors over the past few years, aging facilities and shortages of skilled labor and critical materials. He also warns that the increasing complexity of new weapons has lengthened production time.

The issue is important because of the potential impact of this size increase on the overall economy. In the Vietnam war buildup, for example, the spurt in defense spending overheated the economy, created bottlenecks in key industries and sent prices skyrocketing. It was the beginning of the current inflation spiral.

But how serious is the prospect of a repeat performance this time around? How critical are the shortages and bottlenecks likely to be? And how effectively will the defense industry be able to gear itself up to meet the military's new needs?

Ralph Doggett, defense specialist for Data Resources Inc., the Cambridge, Mass.-based research firm, joins a sizable group or analysts who concede that the short answer is that "nobody can really tell for sure" yet, "There's been very little hard analysis," Doggett admits.

Although experts on both sides can argue heatedly over whether the industry can cope with the new outpouring, the government has only just begun a detailed survey of the defense industry's current capacity and ability to expand. And private analysts seem no better grounded.

While defense analysts concede some bottlenecks will occur no matter what, the impact is likely to depend largely on how quickly the new budget decisions will be translated into actual spending and how rapidly the overall economy will perform over the next several years.

Unlike the case in the Vietnam era, the defense outlays being pondered now would not go primarily for ordnance, where dollars are dumped quickly into the pipeline, but for new long-term weapons systems, which often require years before production contracts actually are let.

Economists say if the Pentagon and Congress can manage the defense pot effectively, the industry may be able to squeak by with a minimum of bottlenecks in a few, albeit important, sectors. But if the money simply is "dumped" into the economy, serious strains could result.

A rundown by several knowledgeable defense analysts produces this sketch of the industry's current state:

The major prime contractors, particularly in aerospace and communications, are in relatively good shape and should have no trouble meeting the new push. Unlike the situation during the Vietnam war, the commercial aircraft market is on the decline, making it easy for companies to switch to military production.

Edward E. Hood Jr., vice chairman of General Electric Co., one of the nation's largest defense contractors, says the impact is "hard to assess until we see" how the defense budget actually breaks down. But private consultant Hahn notes that "as far as floor space is concerned, we've got a lot of it."

The picture for subcontractors isn't nearly as bright. After years of on-and-off budget cuts before Reagan's newly announced buildup, many subs and suppliers have gone out of business or switched to more lucrative civilian work. To attract them back would require costly and long-term guarantees.

There's a serious problem in the nation's foundry capacity, where shrinking markets and increasingly stiff environmental regulations have forced some 240 shutdowns in recent years, virtually wiping out the industry's ability to handle any major new increase in production demands.

The United States currently has only two major foundries large enough to be able to make the huge forgings needed for aircraft and other weapons. There's also a shortage of bearings for jet engines. And supplies of semiconductors, which are crucial to military electronics systems, are becoming increasingly scarce.

More ominously, many of these items, particularly forgings, require lead times of two years or more just for normal production. As a result, in many cases manufacturers couldn't boost their output rapidly no matter how much the government was willing to pay.

The shipbuilding industry is in a mess, partly because of its own bad management practices, and some experts are expecting more closings within the next few months. The quality of U.S. yards has been so low, the Navy has considered buying warships from British producers. Can the remaining yards cope?

There are critical labor and materials shortages to take into account. The aerospace and electronics industries already are unable to find the engineers and technicians they need, and many categories of skilled workers also are in short supply. As a result, wage pressures easily could mount.

There's also a potential for serious shortages in strategic metals, such as titanium, cobalt and chromium, that are needed for the production of aircraft and jet engines. Many already are in short supply, and despite new government efforts to rebuild stockpiles, inventory levels remain low.

Admittedly, at least some of these hitches are offset by economic factors. Compared to historical levels, defense spending right now is relatively low.

Government figures show the nation now is spending only 5.6 percent of its gross national product on defense. Reagan's budget would push this to slightly more than 7 percent by 1986, still well below the 8-to-9 percent that prevailed before Vietnam.

Besides the aerospace industry, the segments apt to feel the strains the most are shipbuilding, missile construction, the forgings and castings industries, tank production and general armaments manufacturing. No doubt there also will be some spillover into related areas.

What can the government do to prevent the defense time bomb from exploding?

Experts offer these steps:

First: Improved management of the entire military procurement process to make sure all purchases are coordinated to avoid undue strain on individual industries. Experts argue that some orders ought to be delayed, if necessary, to avoid overloading the industry's capacity.

Second: A switch to multiyear contracting on defense procurement to guarantee subs and suppliers a long-term market and to make it attractive for them to stay in defense production. Also possible: Increased incentives, such as loan guarantees and price floors.

Defense consultant Hahn reflects a widely held view in the industry: "Under current procedures, our defense industry doesn't know how to plan. How many people were all lined up to build the B1 bomber when Jimmy Carter backed away?"

Third: A step-up in stockpiling of strategic materials so reserves can be rebuilt now while supplies are still moderately good. Until recently, the United States has regularly sold off its stockpiles as a price-dampening measure. Defense considerations have been put aside.

Finally, a good many analysts are urging the military to settle for less complexity on new weapons and stick with proven systems

that cost less and provide more bang for the buck. "More money alone just isn't the solution," says a former congressional defense expert. "There must be some reforms."

The difficulty is, how to manage all these components without setting off a new price spiral that could spread throughout the economy. To some analysts, that means not only skillful manipulation of the defense side, but a firm hold on nondefense spending as well.

Albert M. Wojnilower, economist for First Boston Corp., notes that, because sharp boosts in defense programs require such large capital spending increases, the current push could provide a bigger spur to the economy than most analysts are predicting, particularly on top of the Reagan tax cuts.

"When the military is spending more it makes everyone else spend more . . . without making anybody else spend less," Wojnilower says. "So its multiplier effect, to use that jargon, is far greater than that of either the spending cuts or the tax cuts." The prospect clearly worries Wall Street.

For the moment, policymakers may have some respite. Given the usual lags between the time a president proposes any spending increase and the time it's actually pumped into the economy, the first serious pressures shouldn't begin to show up until 1983 or 1984.

In the meantime, the defense boost, which actually began in earnest during the final year of the Carter administration, already is under way and threatens to loom even larger as Congress continues to out-Reagan the president on defense. How well the nation can swallow that increase remains to be seen.●

GETTING SERIOUS ABOUT BOMBS

The SPEAKER pro tempore. Under a previous order of the House, the gentleman from New York (Mr. BINGHAM) is recognized for 5 minutes.

● Mr. BINGHAM. Mr. Speaker, earlier this week I issued a statement in response to the Israeli attack on Iraq's nuclear facilities underscoring the urgent need for a tough and responsible U.S. nuclear nonproliferation policy. Since then, this call has been echoed very thoughtfully by a number of newspaper editorials. The essential point is that the need for a preemptive Israeli strike against sensitive Iraqi nuclear installations would not have arisen had the world community acted responsibly earlier to prevent the spread of nuclear weapons-usable technology. Instead, the United States and its allies have made half-hearted efforts at nuclear restraint, put far too much faith in international safeguards, and totally ignored the military implications of these actions. Israel could not afford to ignore them—the entire country of Israel could be virtually destroyed by two or three nuclear weapons. After Sunday's events, the Reagan administration can not afford to wait any longer to enunciate an effective nuclear nonproliferation strategy.

I urge my colleagues to read the following Washington Post, Wall Street Journal, Baltimore Sun, and The Washington Star editorial comment:

[From the Washington Post, June 10, 1981]

GETTING SERIOUS ABOUT BOMBS

Maybe the trouble is the term. "Nuclear nonproliferation" is a mind-numbing agent, an eye-glazing property, a bore. Ask anyone. Or, better yet, try to get anyone who is in office and on a busy track, either in this government or those of our dearest friends and allies, to talk about it. Then you will find out: There are—always have been—other more pressing matters; and besides, to try to hold back the inevitable is stupid; and anyhow, to irritate Country X or Country Y on such a hopeless, long-term issue would be a real time-waster, even an act of irresponsibility when we have so much more urgent, high-stakes business to negotiate with them; and how can we ask other countries to forgo the nuclear option while we and the Russians continue our own nuclear arms buildup—how arrogant can you *get*?—and, in truth, it's just a little research reactor Country Y is building for Country Z (don't ask about the weapons-grade fuel this reactor will use, it would be rude) . . . and . . . and . . . and . . .

And what? And this: it all adds up to Sunday's raid by the Israelis on the French- and Italian-built Iraqi nuclear installation near Baghdad, the very model of the kind of panic-generated first-strike action that the literature warning against the spread of nuclear weapons has always foreseen as the predictable result. The introduction of nuclear weapons in conflict-ridden regions, even the strong suspicion that they are about to be introduced, will function as an incentive to such an action by those with the means to act. We all got off relatively easy this time. Yes, people were killed and danger was courted and the prospectively harmful consequences of the raid have not all been felt. But it was a pale version of what can yet come when installations that are further advanced (say after the fuel has been emplaced, not right before) are determined to be mortal threats by some country's neighbor that may or may not itself have some kind of nuclear weapons potential.

The Carter administration can be faulted for an on-again, off-again uneven effort in this field. Its commitment to discourage the spread of nuclear weapons around the world never enjoyed the degree of administration-wide support that could have made it at once smoother and less prone to swings between overstatement and negligence—in short, more consistent and effective. And it ended with the dismal decision to resupply the Indian reactor at Tarapur despite India's refusal to renounce use of U.S. exports for future nuclear bombs. But even with all those failings, it began as a right policy that represented a right instinct; it had some notable successes, and the people who have subsequently been deriding it as one of the Carter government's exercises in amateurism and futility need to understand that they are really making a bad joke. The cynical, worldly wise, what-the-hell alternative, that has gained such currency in Washington since then represents, in our view, the truly disastrous choice.

If you explore the upper reaches of the Reagan administration on the question of commitment and action designed to stop or even to impede the spread of nuclear weapons to new proprietors, you will find first that there is deep disagreement concerning both the priority of the worry and the possibility of doing much about it. A lot of the objections are familiar and have some plausibility—but the same is not true of the conclusions drawn from them. For example, it may be true that the anti-proliferators, King Canutelike, wish to stop an inexorable trend of technology that is destined to bring nuclear weapons to ever more governments. But does this mean that we should do nothing to discourage or inhibit or slow down this trend, especially as it creates new and terrible dangers in particular regions of the world?

Just about everyone will answer no to that—but actions, ah, that's something else again. A second Reagan administration idea on this seems to be that "universalism," as it has been called (the attempt to deal with nuclear proliferation on a kind of planet-wide, blanket basis via U.N. treaties and so on, with one general policy approach to all) is a bummer. Why deal with Liechtenstein and Zimbabwe and Cyprus and Ireland as if they were the same place? Why deal with some of them—hardly potential bomb-builders or buyers—at all? Wouldn't a wise nuclear nonproliferation policy be discriminating and deal with those specific countries and regions and international relationships that are likely to be the cause or setting of nuclear spread? Sure it would—now, where is it?

Here you reach the heart of the matter, the temporizing and sophistry that mark the 1980s approach of the Western industrial countries in general to this subject. The French will tell you that since certain Third World countries are going to get into these things, it is better—is it not?—that they be on hand as suppliers and technicians to keep an eye out for the dangers. How was this valuable in Iraq, where an effort was clearly being made, in their presence and with their assistance, to create an installation that could easily have produced quick bombs? Likewise, where is this discriminating program of which some in the Reagan administration speak? If, as they argue, the point is to act in ways that will strengthen the sense of countries like, say, Pakistan or South Korea, that they do not need to seek an independent deterrent, where is the evidence that a conscious effort in this regard is being made?

Mr. Reagan has, among his own appointees in the State Department and high up at Defense, some of the soundest and most stalwart and intelligent critics there are of the mindless export of nuclear materials and other actions that have created so much danger already. What he needs is a commitment, a policy, a determination to put the prospective spread of nuclear weapons into the national security context where it belongs. This is not some goo-goo, do-good preoccupation, some bath of idealism wallowed in by the naive of the world. Ask the Iraqis, if you don't believe that. Ask the Israelis.

[From the Wall Street Journal, June 9, 1981]

MOURNING THE BOMB

An atom bomb for Iraq, we have learned in the last 24 hours, has become the latest great cause celebre of world opiniondom. Various governments, including our own, and a lot of pundits have been busily condemning Israel's raid on Iraq's nuclear reactor. Our own reaction is that it's nice to know that in Israel we have at least one nation left that still lives in the world of reality.

What is going on here: Iraq, awash in cheap crude oil, wants a big nuclear reactor. It rebuffs French suggestions to give up the original design and substitute one that does not need weapons-grade uranium. It has been buying raw uranium, which is not sutiable for use in reactors, but dandy if you want to use the reactor to breed plutonium for weapons. Faced with this evidence, the conclusion of world opinion has been—everything's OK, Iraq has signed the nuclear non-proliferation treaty.

This kind of silliness has a mysterious power to blind most who man foreign ministries, think tanks and editorial sanctums. Of course Iraq was building a bomb. Of course its intended target was Israel. Of course, given the Iraqi reputation for political nuttiness reaffirmed again in its starting a war with Iran, its atom bomb would also have been a danger to all its neighbors. We all ought to get together and send the Israelis a vote of thanks.

Israel, which is assumed to have its own atom bomb but not to have conducted a test explosion, was not acting out of some abstract concern with non-proliferation. It was pursuing its own national interest, and in its timing also no doubt Prime Minister Begin's political interest in the impending elections. Its pre-emptive strike was strong medicine.

This would not have been necessary, though, if the reality that marked the Israeli decision had been present in the United States' non-proliferation policy this last decade or so. These efforts more or less went out the window when the U.S. refused to take sanctions against India's "peaceful nuclear device," exploded in violation of an agreement with the U.S. After this show of irresolution, the U.S. could hardly expect to persuade, say, the French to pass up sales to Iraq. Soon the whole non-proliferation question was lost in the fog of international negotiation.

To give the worriers about Israel their due, there is always reason to be concerned that any military act could prove to be the spark in the tinderbox of the Middle East. But we have been under the impression that the Middle East wasn't a very peaceful place even before last Sunday. People were being blown up on the beaches of Beirut and in the redoubts of western Iran. To judge the extent of the silliness, notice that among the governments objecting is Iran, locked in war with Iraq. Is there any reason to doubt that there were sighs of relief in the Saudi palaces on learning that Iraq won't have a bomb soon.

Being concerned about the peace of the Middle East does not make it necessary to be easily deceived about the necessary components for peace. Without a doubt, the ability of Israel and Egypt to come to terms has contributed mightily to that end, and President Carter's role in aiding that agreement was a major foreign policy achievement. But Lebanon has become a madhouse and the Soviet Union, through its surrogate, Syria, seems intent on keeping it that way to keep the Middle East pot boiling.

In such a situation, it is not entirely impausible for the United States to send a shuttle diplomat to try to damp down the passions and seek out possiblities for a modus vivendi. But the best chances for peace, to the extent they exist, depend far more heavily on balance of power perceptions in the area itself.

The Israelis are not infallible, but their security for 33 years now has depended on making careful power judgments. They know that their best chances for avoiding bloodshed lie in frequently reminding their neighbors that they are strong and that their wishes are not to be taken lightly.

The Israeli approach to non-proliferation is limited and direct. But their outlook on the world and on what it takes to earn the world's respect offers a few lessons we ourselves could profitably learn.

[From the Baltimore Sun, June 9, 1981]

MIDEAST'S NUCLEAR NIGHTMARE

Despite public denunciations of Israel for its attack on Iraq's nuclear research facility, many nations must be privately thankful that Baghdad has been set back in its bid for regional dominance. Iraq is a menace. It is a menace to Iran, having invaded that country a year ago. It is a menace to Saudi Arabia, which has clashed repeatedly with Baghdad over the use of oil power. It is a menace to Syria, its feud with Damascus only temporarily mended because of the situation in Lebanon. Above all, is it a menance to Israel—the stated target of Iraq's threatened nuclear capability.

Of course, the Middle East is too volatile a region for a military strike to be taken lightly. The United States is correct in condemning Israel's use of American-made jets despite restrictions on the use of such equipment in "offensive" operations. Washington has invested too much in the Camp David peace process, and it has too much at stake in insuring the flow of Persian Gulf oil, to acquiesce in this bellicose move by Israel. Prime Minister Menachem Begin may have seriously compromised U.S. Senators who were prepared to oppose the Reagan administration's plan to supply AWACS surveillance aircraft to Saudi Arabia.

Yet justified as the U.S. criticism of Israel may be, France must bear the onus for its highly irresponsible course of supplying a 70-megawatt research reactor to Iraq. Under the Paris-Baghdad agreement, France was to supply 70 kilograms of 92-percent enriched uranium. This is weapons-grade material. When France, under U.S. pressure, tried to get Iraq to accept a new fuel enriched to only 10 percent, Baghdad dismissed the offer. And France, eager as ever to placate its Mideast oil suppliers, quickly went along.

Dean Fischer, the State Department spokesman, made much of the fact yesterday that Iraq had adhered to its commitments as a signatory of the Non-Proliferation Treaty and International Atomic Energy Agency safeguards. But this ignores the political leverage Iraq would gain if it became the first Arab nation with the potential to build nuclear weapons. And it ignores the warning in a Brookings Institution study last year that "nations can possess nuclear explosive materials without violating the NPT-IAEA safeguards."

With the Israeli strike at Iraq, the world has entered a new nuclear phase. This was the first time something nuclear had been directly involved in hostilities since American atomic bombs fell on Japan. The fact that something nuclear was the target rather than the projectile is beside the point. Israel, one of the most beleaguered of nations, saw the Osirak reactor as the possible source of its destruction. Believing that, Israel took action to preclude the nightmare prospect of having to use its nuclear weapons to survive.

There are many lessons in this grave affair. One is that a country like Israel, with its very being at stake, will act when confronted with a nuclear threat. Another is that nuclear-supplier countries, such as France, should be more careful in the future about supplying nuclear facilities to a country that can provoke severe regional reactions. Still another lesson is that nuclear facilities are inviting targets not only to unfriendly governments but to terrorist groups, especially terrorist groups operating in unstable countries.

All nations should come out of this experience more determined than ever to strive for tighter controls over the spread of nuclear weapons. The initiative—and the example—must come from the superpowers. So long as the United States and the Soviet Union continue to pile up nuclear arsenals, smaller nations will be tempted to follow suit as they pursue regional ambitions.

[From the Washington Star, June 10, 1981]

THE OSIRAK STRIKE

Time and events will tell, more clearly than we can, whether it was wisdom or folly for Israel to send its strike force to obliterate Iraq's nuclear facility at Osirak, near Baghdad.

There is no shortage of cries that it is folly. There is no shortage of sermonizing, much of it pertinent, on such appropriately civilized themes as the sacredness of national boundaries and air space, the iniquity of surprise attack, the rule surprising of friends and allies—especially the U.S. and Anwar Sadat. Unilateral military action is rarely without untoward consequences for the perpetrator. Iraq is far from Israel, not a country that has much bothered Israel militarily in recent years; and the sword that Israel drew may well be double-edged.

Certainly it must be said that Mr. Begin's timing was awkward, to say the least, on the morrow of his first meeting with President Sadat in 17 months and while the U.S. is trying to use its good offices to settle the dispute over Syrian missiles in Lebanon. It is tainted with the suspicion of electioneering on his own behalf. Be all this as it may, there are times in this treacherous and tragic world when nations must embrace lesser dangers and evils, and risk some scorn, to combat ultimate dangers. Israel did so in the Entebbe raid. The U.S. did so nearly 20 years ago in confronting Nikita Khrushchev over his attempt to make a nuclear-missile striking platform of Cuba—a confrontation, incidentally, in which air strikes were held in readiness if suasion and naval blockades failed. Many condemned these operations, as propriety demanded, but felt safer afterward.

We have no doubt that the Middle East is today a safer place for all nations—not merely for Israel—than it was a few days ago, before the operation at Osirak. The Iraqis were moving steadily towards putting into operation, by late summer or early autumn, a nuclear facility that could produce weapons-grade fuel. And although Iraq had hypocritically signed the international nuclear non-proliferation agreement, her gates were shut until a short time ago against international inspection. There is almost no doubt on anyone's part that Iraq meant to make atomic weapons.

There was little pretense to the contrary. Only last year, the Iraqi government brazenly stated that these nuclear possibilities were not for Iran to worry about (notwithstanding that she was at war with that nation) but Israel's worry entirely. This is surely a provocative thing to say in any circumstances to anyone, idly or not. And given the Israelis' vocal campaign of many months to stop the establishment of a weap-

ons grade nuclear facility it was one stroke more than could be tolerated.

Whether the threat was idle boasting, or seriously intended, it constitutes the ultimate terrorism to menace another nation with nuclear attack. If there were nothing else to be said for Israel's pre-emptive attack, it would have to be said that there is some value in demonstrating that such threats carry a high price.

Indeed, we cannot imagine, whatever the cries of outrage, that in Riyadh, in Amman and Cairo in Damascus and the Persian Gulf states and in Tehran, there is not a sense of relief today. People in authority in the Middle East may condemn Israel by day, but by night they will all sleep a bit better. It is, of course, equally true that their sense of peace would be greater without an Israeli nuclear capability in the neighborhood. But that is a separate reality.

Obviously diplomacy, not sudden air attack, is the proper way to contain the threat of nuclear proliferation. That must be the unswerving preference of a world that rejects anarchy. It seems to us that our friends in France bear a special part of the blame. They remained heedless of the danger signals over many months. They have seemed bent on driving, regardless of consequence, the Faustian bargain of delivering provocative nuclear goods to Iraq in return for life-sustaining oil.

But when diplomacy fails—and the most strenuous and persistent protests by the Israelis and others had not shaken the foolhardy resolve of the French to barter high nuclear technology to an unstable and aggressive regime, or of that regime to menace Israel with it—what is left? Is the nation confronted by such a nightmare to sit idly by waiting and hoping, like Mr. Micawber, that something will turn up?

Certainly the air strike at Osirak is not a thing to be condoned or applauded. But neither is it a fit subject for tiresome sermonizing in an international community whose will to contain nuclear proliferation is paralyzed by fear, palsied by diplomatic minutes, and not a little corrupted by the fearful but profitable commerce in deadly weapons and oil.●

NATIONAL ORGANIZATIONS SUPPORT LEGAL SERVICES

The SPEAKER pro tempore. Under a previous order of the House, the gentleman from California (Mr. DANIELSON) is recognized for 5 minutes.

● Mr. DANIELSON. Mr. Speaker, it is my understanding that next week, H.R. 3480, providing for the reauthorization of the legal services program, will be on the floor for our consideration. I would like my colleagues to know that there are approximately 80 national organizations supporting the reauthorization of this vital program including the Leadership Council on Aging Organizations that represents 22 national organizations for the aging. I would like to submit, for the RECORD, the Leadership Council's statement in support of the legal services reauthorization:

STATEMENT BY THE LEADERSHIP COUNCIL OF AGING ORGANIZATIONS IN SUPPORT OF THE RODINO BILL (H.R. 3480) TO PROVIDE FOR A REAUTHORIZATION OF THE LEGAL SERVICES CORPORATION, JUNE 4, 1981

The Leadership Council represents the 22 undersigned national organizations concerned with the well being of elderly Americans.

We strongly urge your support for H.R. 3480, which provides for the reauthorization of the legal services program—a program which is of major importance to millions of older Americans.

As Congressman Peter W. Rodino, Jr., Chairman of the House Judiciary Committee, has pointed out, in 1980 alone more than one-half million elderly persons who otherwise would have been denied access to justice were provided with legal assistance through federal programs. This assistance was essential in order to enforce the legal rights of elderly persons in a wide variety of areas, including: housing, food, Social Security, Medicare, Medicaid, age discrimination in employment, and fuel assistance, as well as disagreements concerning taxes, regulations for nursing homes, and retirement benefits. The need to represent the elderly poor in all of these highly specialized areas, areas which are usually not within the normal scope of practice of members of the private bar, is indisputable.

In our view, H.R. 3480, as approved by the House Judiciary Committee, embodies a series of constructive compromises designed to allow this important program to continue its necessary work. We note with gratification that this measure has strong bi-partisan support and was reported with unanimity by the Subcommittee that originally considered it.

Under the circumstances we strongly encourage your active support for H.R. 3480 as reported by the House Judiciary Committee.

American Association of Homes for the Aging; AFL-CIO/Social Security Department; Asociacion Nacional Pro Personas Mayores; Association for Gerontology in Higher Education; Concerned Seniors for Better Government; Gerontological Society; Gray Panthers; Legal Research and Services for the Elderly.

National Association of Area Agencies on Aging; National Association of Mature People; National Association of Retired Federal Employees; National Association of State Units on Aging; National Association of Nutrition and Aging Services Programs; National Center/Caucus on the Black Aged; National Council on the Aging; National Council of Senior Citizens.

National Indian Council on the Aging; National Retired Teachers Association-American Association of Retired Persons; National Senior Citizens Law Center; United Auto Workers/Retired Membership Department; Urban Elderly Coalition; Western Gerontological Society.●

REINTRODUCING LEGISLATION TO REMOVE THE EXISTING LIMITATION ON LIABILITY FOR NUCLEAR POWERPLANT ACCIDENTS

The SPEAKER pro tempore. Under a previous order of the House, the gentleman from New York (Mr. WEISS) is recognized for 5 minutes.

● Mr. WEISS. Mr. Speaker, more than 2 years after the worst commercial nuclear accident in history no one is certain about the extent of damage done. Cleanup at Three Mile Island is expected to continue for another 7 or 8 years and cost more than $1 billion. Yet in spite of the potential for environmental and social devastation that could result from a nuclear powerplant accident, we continue to rely on an antiquated provision, the Price-Anderson Act, to make compensation available to those who might suffer in the event of such an accident.

I am today reintroducing legislation to amend the Price-Anderson Act, the 1957 law which limits liability for utilities in the possible occurrence of a major nuclear accident. My bill would remove the act's $560 million compensation ceiling and would require all atomic plant licensees to arrange a combination of individual private policies and an industry-financed insurance pool to cover the balance of claims resulting from a nuclear accident.

There are two primary reasons for these changes. Those people whose businesses, homes, and lives would be unalterably damaged by a nuclear accident currently could receive a total of no more than the $560 million limit as compensation, but the Nuclear Regulatory Commission has estimated that a serious accident could do as much as $14 billion damage. The Price-Anderson Act, in its current form, therefore prevents fair compensation for damages done.

Price-Anderson also results in an unjustified competitive economic advantage for nuclear utilities by protecting them from full financial responsibility for operation of their plants. Under the legislation I am introducing, the true costs of atomic energy generation would no longer be artificially deflated through an arbitrary and inequitable cutoff of claim payments.

The current $560 million figure consists of: First, the amount of private coverage available to a particular plant—about $160 million; second, a formula based on the number of plants operating, currently 71, which provides $355 million; and third, $45 million in Federal payments. The liability limit was set in 1957 and has never subsequently been adjusted for inflation.

My legislation would amend Price-Anderson in the following ways:

Stipulate that each licensee must obtain the maximum coverage available from private insurers;

Provide that in the event of an accident at a particular plant, insurance on the facility would be the first source of payment;

State that if the judgment against a given facility exceeds available private insurance coverage, the plant would then be liable up to the total of its assets;

Require that if a court determines that the plant's assets are insufficient to meet the full judgment, the industry pool shall cover the balance of outstanding claims;

Mandate that industry pool participants shall contribute to the cost of the judgment according to a formula based on each licensee's generating capacity, its degree of risk, its total assets, and other factors;

Provide that should a court determine that a given utility cannot meet its proportional share to the pool, that plant would then become eligible for long-term Federal loans to be secured against the plant's assets;

Make explicit that each licensee shall be liable for any incident at its facility resulting in injury to persons and/or damage to property; and,

Waive the 20-year statutory limitation on claims resulting from a nuclear accident.

Unlike the current Price-Anderson Act, which mandates a Federal subsidy for nuclear powerplant insurance, my bill would entail use of Federal funds only in the event of a major catastrophe where victims' claims exceed a plant's private insurance coverage, the plant's total assets, and the proportional contribution toward an industrywide pool. Even then, Federal money would be used only to provide interest-bearing loans.

This act was enacted as a means of encouraging private industry to accelerate nuclear power development. That was 24 years ago, and since then more than 70 nuclear plants have come on line in our country. The time is long overdue for nuclear power to stand or fall on its own merits. No other energy source enjoys this type of liability limitation, and it is Congress duty to end this unfair underwriting of the nuclear power industry.

Proponents of nuclear power insist that it is a safe source of energy. The nuclear industry certainly should be able to obtain policy coverage far in excess of the current $160 million level, on the basis of this argument. The industry also should be made to back up its claims by financing a pool to cover the costs of a possible accident which they say never will occur.

I urge my colleagues to join me in this important effort. A copy of the legislation follows:

H.R. 3915

A bill to amend the Atomic Energy Act of 1954 to modify certain statutory limitations on the amount of financial protection required with respect to nuclear incidents, to remove the statutory limitations on the aggregate liability for a single nuclear incident, to limit the financial obligations of the United States with respect to such incidents, and for other purposes

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled, That this act may be cited as the "Nuclear Incident Liability Reform Act of 1981".

SEC. 2. (a) Section 170 a. of the Atomic Energy Act of 1954 is amended by striking out the second sentence thereof.

(b)(1) The first sentence of section 170 b. of such Act is amended to read as follows: "The amount of financial protection required shall be the maximum amount of liability insurance available from private sources. Such amount shall be redetermined periodically by the Commission on the basis of the cost of living (including the cost of health care).

(2) The third sentence of such section 170 b. is amended to read as follows: "All licensees required to maintain financial protection under this section shall also be required, without regard to the manner in which they obtained other types or amounts of financial protection, to participate in an industry retrospective rating plan. Such plan shall provide for premium charges deferred in whole or in major part until public liability from a nuclear incident exceeds or appears likely to exceed the sum of—

"(1) the level of primary financial protection required of the licensee involved in the nuclear incident, and

"(2) the amount otherwise available from such licensee for the satisfaction of such liability (including all real and personal property of the licensee and any amounts available pursuant to applicable bankruptcy proceedings).

The deferred premium which shall be charged following any nuclear incident under such a plan shall be such amount as is required under rules promulgated by the Commission not later than sixty days after the date of the enactment of the Nuclear Incident Liability Reform Act of 1981. Such amount required under such rules shall be determined according to a formula based on—

"(A) the licensee's generating capacity,

"(B) the degree of risk of nuclear incident associated with the licensee,

"(C) the licensee's total assets, and

"(D) such other factors as the Commission deems appropriate.".

(3) Such 170 b. is further amended by striking out the fifth sentence and all that follows and substituting: "If any licensee is unable to meet any assessment of deferred premiums within a reasonable time following any nuclear incident without impairing the provision of electric utility service by such licensee, the Commission may loan such licensee the amount by which such assessment exceeds the amount which the licensee is able to pay without such impairment. The loan shall be made upon such terms and conditions as may be established by the Commission except that such loan shall be secured by the liens on assets of such licensee and on the revenues derived therefrom and shall bear interest at a rate determined by the Secretary of the Treasury on the basis of the current average market yield on outstanding marketable obligations of the United States of comparable maturities during the month preceding the making of such loan.".

(c) Subsection c. of section 170 of such Act is hereby repealed.

(d) Subsection d. of such section 170 is amended by striking out ", in the amount of $500,000,000" and all that follows down to the period at the end thereof.

(e) Subsections e., f., g., and h. of such section 170 are hereby repealed.

(f) Subsection i. of such section 170 is amended by striking out "which will probably require" and all that follows down through "560,000,000".

(g) Subsections k. through m. of such section 170 are hereby repealed.

(h) Paragraph (1) of subsection n. of such section 170 is amended to read as follows:

"(1) With respect to any nuclear incident with respect to which financial protection is required under this section and which—

"(a) arises out of, or results from, or occurs in the course, of the construction, possession, or operation of a production or utilization facility, or

"(b) arises out of, or results from, or occurs in the course of transportation of, source material, byproduct material, or special nuclear material to or from a production or utilization facility, or

"(c) during the course of the contract activity arises out of, or results from the possession, operation, or use by a Commission contractor or subcontractor of a device utilizing special nuclear material or byproduct material.

the Commission shall require provisions to be incorporated in insurance policies or contracts furnished as proof of financial protection, which waive (i) any issue or defense as to conduct of the claimant or fault of persons required to obtain financial protection, (ii) any issue or defense as to charitable or governmental immunity, and (iii) any issue or defense based on any statute of limitations if suit is instituted within three years from the date on which the claimant first knew, or reasonably could have known, of his injury or damage and the cause thereof. The waiver of any such issue or defense shall be effective regardless of whether such issue or defense may otherwise be deemed jurisdictional or relating to an element in the cause of action. When so incorporated, such waivers shall be judicially enforcible in accordance with their terms by the claimant. Such waivers shall not preclude a defense based upon a failure to take reasonable steps to mitigate damages, nor shall such waivers apply to injury or damage to a claimant or to a claimant's property which is intentionally sustained by the claimant or which results from a nuclear incident intentionally and wrongfully caused by the claimant.".

(i) Paragraph (2) of subsection n. of such section 170 is amended by striking out "extraordinary nuclear occurrence" each place it appears and substituting "nuclear incident".

(j)(1) The section heading for section 170 is amended to read as follows:

"SEC. 170. LIABILITY FOR NUCLEAR INCIDENTS.—".

(2) The item relating to section 170 in the table of contents is amended to read as follows:

"Sec. 170. Liability for nuclear incidents.".

SEC. 3. Section 53 e. of the Atomic Energy Act of 1954 is amended by striking out paragraph (8), by striking out "; and" in para-

graph (7) and substituting a period, and by inserting "and" at the end of paragraph (6).

SEC. 4. Section 2 i. of the Atomic Energy Act of 1954 is amended by striking out ", and may limit the liability of those persons liable for such losses".

SEC. 5. (a) Section 11 t. of the Atomic Energy Act of 1954 is hereby repealed.

(b) Section 11 m. of such Act is amended by striking out "; and (3)" and all that follows down to the period at the end thereof and by inserting "and" before "(2)".

(c) Section 11 w. of such Act is amended by striking out "indemnified" and substituting "required to obtain financial protection under section 170".

(d) Section 11 p. of such Act is amended by striking out "as the term is used in subsection 170 l., it shall include any such occurrence outside the United States: *And provided further,*".

SEC. 6. The amendments made by this Act shall take effect on the date sixty days after the date of the enactment of this Act and shall apply with respect to all contracts referred to in section 170 d. of the Atomic Energy Act of 1954 and to all licenses referred to in section 170 a. of such Act without regard to whether such contracts were entered into, or such licenses were issued, before, on, or after the date of the enactment of this Act.●

LEAVE OF ABSENCE

By unanimous consent, leave of absence was granted to:

Mr. CHAPPELL, for today, on account of official business.

SPECIAL ORDERS GRANTED

By unanimous consent, permission to address the House, following the legislative program and any special orders heretofore entered, was granted to:

(The following Members (at the request of Mr. DOUGHERTY) to revise and extend their remarks and include extraneous material:)

Mr. SMITH of Alabama, for 60 minutes, July 17.

Mr. GINGRICH, for 60 minutes, today.

Ms. FIEDLER, for 60 minutes, July 17.

Mr. EMERSON, for 10 minutes, today.

Mr. HUNTER, for 5 minutes, today.

Mr. FISH, for 5 minutes, today.

(The following Members (at the request of Mr. DONNELLY) to revise and extend their remarks and include extraneous material:)

Mr. BEDELL, for 5 minutes, today.

Mr. AUCOIN, for 5 minutes, today.

Mr. GONZALEZ, for 15 minutes, today.

Mr. ANNUNZIO, for 5 minutes, today.

Mr. FORD of Michigan, for 5 minutes, today.

Mr. CROCKETT, for 5 minutes, today.

Mr. LAFALCE, for 5 minutes, today.

Mr. BINGHAM, for 5 minutes, today.

Mr. DANIELSON, for 5 minutes, today.

Mr. WEISS, for 5 minutes, today.

EXTENSION OF REMARKS

By unanimous consent, permission to revise and extend remarks was granted to:

Mr. EDWARDS of California, prior to the vote on the Weiss amendment to H.R. 3413, in the Committee of the Whole today.

Mr. STRATTON, and to include extraneous matter on the Weiss amendment to H.R. 3413.

(The following Members (at the request of Mr. DOUGHERTY) and to include extraneous matter:)

Mr. COURTER.

Mr. MCCLOSKEY in three instances.

Mr. LEBOUTILLIER in two instances.

Mr. FIELDS.

Mr. HORTON.

Mr. CAMPBELL.

Mr. MCGRATH in three instances.

Mr. DERWINSKI

Mr. LOWERY of California.

Mr. FINDLEY in two instances.

Mr. DORNAN of California in two instances.

Mr. BAILEY of Missouri in two instances.

Mr. LENT.

SENATE BILLS REFERRED

Bills of the Senate of the following titles were taken from the Speaker's table and, under the rule, referred as follows:

S. 1033. An act granting the consent of Congress to the agreement between the States of North Carolina and South Carolina establishment their lateral seaward boundary; to the Committee on the Judiciary; and

S. 1337. An act to provide for the temporary exclusion of foreign fishing support vessels from the internal waters of Alaska; to the Committee on Merchant Marine and Fisheries.

ADJOURNMENT

Mr. ECKART. Mr. Speaker, I move that the House do now adjourn.

The motion was agreed to; accordingly (at 5 o'clock and 41 minutes p.m.), the House adjourned until tomorrow, Friday, June 12, 1981, at 10 a.m.,

EXECUTIVE COMMUNICATIONS, ETC.

Under clause 2 of rule XXIV, executive communications were taken from the Speaker's table and referred as follows:

1571. A letter from the Acting Assistant Secretary of the Air Force (Research, Development and Logistics), transmitting notice of the proposed conversion to contractor performance of the commissary shelfstocking and custodial services function at Chanute Air Force Base, Ill, pursuant to section 502(b) of Public Law 96-342; to the Committee on Armed Services.

1572. A letter from the Assistant Attorney General (Antitrust Division), transmitting the annual report for fiscal year 1980 on voluntary agreements between government and private industry under the Defense production Act of 1950, as amended, pursuant to section 708(k) of the act; to the Committee on Banking, Finance and Urban Affairs.

1573. A letter from the Chairman, Council of the District of Columbia, transmitting District of Columbia Act 4-44, "To amend the District of Columbia Campaign Finance Reform and Conflict of Interest Act to clarify its provisions concerning persons required to file Financial Disclosure Statements," pursuant to section 602(c) of Public Law 93-198; to the Committee on the District of Columbia.

1574. A letter from the Chairman, Council of the District of Columbia, transmitting District of Columbia Act 4-45, "To amend the District of Columbia Nonprofit Corporation Act to permit a director's attendance at meetings of boards of directors by means of telephonic or other communications equipment," pursuant to section 602(c) of Public

Law 93-198; to the Committee on the District of Columbia.

1575. A letter from the Chairman, Council of the District of Columbia, transmitting District of Columbia Act 4-46, "To amend the regulation establishing standards for ambulances and emergency medical personnel; to provide for the certification of a new category of emergency medical personnel (intermediate paramedics); and for other purposes," pursuant to section 602(c) of Public Law 93-198; to the Committee on the District of Columbia.

1576. A letter from the Chairman, Council of the District of Columbia, transmitting District of Columbia Act 4-47, "To amend the Rental Housing Act of 1980, by authorizing the Mayor to lift the ban on demolition of housing accomodations or rental units for nonresidential uses other than hotels, motels, inns, or other transient residential occupancy," pursuant to section 602(c) of Public Law 93-198; to the Committee on the District of Columbia.

1577. A letter from the Chairman, Council of the District of Columbia, transmitting District of Columbia Act 4-48, "To amend the Rental Housing Conversion and Sale Act of 1980 to subject those persons who began the conversion process prior to September 10, 1980, to relocation and housing assistance requirements," pursuant to section 602(c) of Public Law 93-198; to the Committee on the District of Columbia.

1578. A letter from the Secretary of State, transmitting a report that a substantial violation of the Mutual Defense Assistance Agreement of July 23, 1952, may have occurred in Israel's air attack against a nuclear reactor under construction in Iraq on June 7, 1981, pursuant to section 3(c)(2) of the Arms Export Control Act; to the Committee on Foreign Affairs.

1579. A letter from the Under Secretary of State for Security Assistance, Science and Technology, transmitting changes in the previously submitted arms sales proposal for fiscal year 1981, pursuant to section 25(d)(2) of the Arms Export Control Act, as amended; to the Committee on Foreign Affairs.

1580. A letter from the Administrator of General Services, transmitting a followup report on the recommendations contained in the 1979 annual report to the President of the Federal Council on the Aging, pursuant to section 6(b) of the Federal Advisory Committee Act; to the Committee on Government Operations.

1581. A letter from the Secretary of the Interior, transmitting notice of the proposed refund of $14,416.07 in excess royalty payments to Shell Oil Co., and Amax Petroleum Co., pursuant to section 10(b) of the Outer Continental Shelf Lands Act of 1953, as amended; to the Committee on Interior and Insular Affairs.

1582. A letter from the Executive Director, United States Olympic Committee, transmitting the annual report and audit of the committee for calendar year 1980, pursuant to section 113 of the act of September 21, 1950, as amended, and section 3 of Public Law 88-504, respectively; to the Committee on the Judiciary.

1583. A letter from the Vice Chair, Merit Systems Protection Board, transmitting the annual report for fiscal year 1980 on the Board's processing of appeals of Federal employees of personnel actions taken or denied by Government agencies, pursuant to 5 U.S.C. 1205(a)(3); to the Committee on Post Office and Civil Service.

1584. A letter from the Acting Comptroller General of the United States, transmitting a report on opportunities for cost savings at Public Health Service hospitals (HRD-81-62, June 10, 1981); jointly, to the Committees on Government Operations and Energy and Commerce.

1585. A letter from the Acting General Counsel of the Navy, transmitting a report on results of an investigation of the allegations against Mr. John B. Cunningham, pursuant to 5 U.S.C. 1206(b)(5)(a); to the Committee on Post Office and Civil Service.

REPORTS OF COMMITTEES ON PUBLIC BILLS AND RESOLUTIONS

Under clause 2 of rule XIII, reports of committees were delivered to the Clerk for printing and reference to the proper calendar, as follows:

Mr. WHITTEN: Committee on Appropriations. H.R. 3603. A bill to provide price and income protection for farmers, assure consumers an abundance of food and fiber at reasonable prices, continue food assistance to low-income households, and for other purposes (Rep. No. 97-106, Pt. 2). Ordered to be printed.

Mr. ADDABBO: Committee on Appropriations. H.R. 3380. A bill to increase the pay and allowances of members of the Armed Forces; with amendment (Rep. No. 97-109, Pt. 2). Referred to the Committee of the Whole House on the State of the Union.

Mr. BROOKS: Committee on Government Operations. Report on air traffic control computer failures (Rep. No. 97-137). Referred to the Committee of the Whole House on the State of the Union.

Mr. RODINO: Committee on Judiciary. Report on allocation of budget totals by subcommittee (Rep. No. 97-138). Referred to the Committee of the Whole House on the State of the Union.

Mr. WHITTEN: Committee on Appropriations Report on subdivision of budget totals agreed to in first concurrent resolution on the budget (H. Con. Res. 115) for fiscal years 1981 and 1982 (Rep. No. 97-139). Referred to the Committee of the Whole House on the State of the Union.

Mr. DINGELL: Committee on Energy and Commerce. Report pursuant to section 302(b)(2) of the Congressional Budget Act of 1974 (Rep. No. 97-140). Referred to the Committee of the Whole House on the State of the Union.

Mr. NICHOLS: Committee on Armed Services. H.R. 3807. A bill to make technical corrections in the Defense Officer Personnel Management Act (Rep. No. 97-141). Referred to the Committee of the Whole House on the State of the Union.

SUBSEQUENT ACTION ON A BILL SEQUENTIALLY REFERRED UNDER TIME LIMITATIONS

Under clause 5 of rule X, the following action was taken by the Speaker:

The Committee on Agriculture and the Committee on Interior and Insular Affairs consideration of the bill (H.R. 3432) extended for an additional period ending not later than July 17, 1981.

PUBLIC BILLS AND RESOLUTIONS

Under clause 5 of rule X and clause 4 of rule XXII, public bills and resolutions were introduced and severally referred as follows:

By Mr. ANNUNZIO:

H.R. 3879. A bill to provide for the minting of silver dollars with a design emblematic of the 1984 Summer Olympic Games which are to be held in Los Angeles, Calif.; to the Committee on Banking, Finance and Urban Affairs.

By Mr. ANTHONY:

H.R. 3880. A bill to amend the Internal Revenue Code of 1954 to provide estate and gift tax equity and family enterprises, and for other purposes; to the Committee on Ways and Means.

H.R. 3881. A bill to direct the Secretary of Agriculture to release on behalf of the United States a reversionary interest in certain lands conveyed to the Arkansas Forestry Commission, and to direct the Secretary of the Interior to convey certain mineral interests of the United States in such lands to such Commission; jointly, to the Committees on Agriculture, and Interior and Insular Affairs.

By Mr. BAFALIS (for himself, Mr. PICKLE, Mr. ARCHER, Mr. CONABLE, Mr. PHILIP M. CRANE, Mr. DUNCAN, Mr. FRENZEL, Mr. GRADISON, Mr. HANCE, Mr. HEFTEL, Mr. HOLLAND, Mr. JENKINS, Mr. JONES of Oklahoma, Mr. MARTIN of North Carolina, Mr. MOORE, Mr. ROUSSELOT, Mr. SCHULZE, Mr. VANDER JAGT, Mr. LOEFFLER, Mrs. SMITH of Nebraska, Mr. ROBERTS of Kansas, and Mr. NOWAK):

H.R. 3882. A bill to amend the Internal Revenue Code of 1954 to provide estate and gift tax equity and reductions for family enterprises, and for other purposes; to the Committee on Ways and Means.

By Mr. BENNETT:

H.R. 3883. A bill to tighten the conditions of release on bail for drug offenders; jointly, to the Committees on the Judiciary and Energy and Commerce.

By Mr. DELLUMS (for himself, Mr. CONYERS, Mr. FORD of Tennessee, Mr. MITCHELL of Maryland, Mr. RICHMOND, Mr. ROSENTHAL, Mr. ADDABBO, Mr. WEISS, Mr. SAVAGE and Mr. WASHINGTON):

H.R. 3884. A bill to establish a U.S. Health Service to provide high quality health care and to overcome the deficiencies in the present system of health care delivery; jointly, to the Committees on Energy and Commerce, Armed Services, Banking, Finance and Urban Affairs, the District of Columbia, Education and Labor, the Judiciary, Post Office and Civil Service, Veterans' Affairs, and Ways and Means.

By Mr. DOWNEY:

By Mr. ERTEL:

H.R. 3886. A bill to amend the Internal Revenue Code of 1954 to increase the amount of the deduction for individual savings and for contributions to Keogh plans, and for other purposes; to the Committee on Ways and Means.

By Mr. EVANS of Delaware:

H.R. 3887. A bill to provide for the establishment of a veterans' cemetery in the State of Delaware; to the Committee on Veterans' Affairs.

By Mr. EVANS of Indiana:

H.R. 3888. A bill to amend the National Manufactured Housing Construction and Safety Standards Act of 1974; to the Committee on Banking, Finance and Urban Affairs.

By Mr. GUARINI:

H.R. 3889. A bill to provide that Memorial Day be celebrated as a legal public holiday on May 30 of each year; to the Committee on Post Office and Civil Service.

By Mr. GUARINI (for himself, Mr. JACOBS, Mr. BAILEY of Pennsylvania, and Mr. HOLLAND):

H.R. 3890. A bill to amend the Internal Revenue Code of 1954 to allow the investment tax credit for theatrical productions; to the Committee on Ways and Means.

By Mr. HAGEDORN:

H.R. 3891. A bill to amend the Internal Revenue Code of 1954 to eliminate the estate and gift tax on interspousal transfers, to make the estate tax farm valuation provisions applicable to the gift tax, and for other purposes; to the Committee on Ways and Means.

H.R. 3892. A bill to provide that the interest rates applicable for purposes of sections 482 and 483 of the Internal Revenue Code of 1954 shall not exceed the interest rates applicable for such purposes on August 1, 1980; to the Committee on Ways and Means.

By Mr. HAMMERSCHMIDT:

H.R. 3893. A bill to amend the Internal Revenue Code of 1954 to increase to $10,000 the amount of savings interest which may be excluded from gross income by individuals and to make such exclusion permanent; to the Committee on Ways and Means.

H.R. 3894. A bill to amend the Internal Revenue Code of 1954 to increase the allowable contributions to individual retirement plans and to allow employees a deduction for savings contributions to employer retirement plans or to individual retirement accounts; to the Committee on Ways and Means.

H.R. 3895. A bill to amend the Internal Revenue Code of 1954 to provide for the exclusion from taxation of interest earned on deposits which are used for residential mortgage lending purposes; to the Committee on Ways and Means.

H.R. 3896. A bill to amend the Internal Revenue Code of 1954 to clarify certain requirements which apply to mortgage subsidy bonds; to the Committee on Ways and Means.

By Mr. LUJAN:

H.R. 3897. A bill to amend title 38, United States Code, to reestablish educational assistance benefits for veterans under chapter 34 of such title; to the Committee on Veterans' Affairs.

H.R. 3898. A bill to authorize the Secretary of Agriculture to convey certain National Forest System lands, and for other purposes; jointly, to the Committees on Agriculture and Interior and Insular Affairs.

By Mr. McGRATH:

H.R. 3899. A bill to establish an Interagency Committee on Arson Control to coordinate Federal antiarson programs, and for other purposes; to the Committee on the Judiciary.

By Mr. MICA:

H.R. 3900. A bill to amend the Internal Revenue Code of 1954 to allow certain partnerships and partners to continue to report income on the cash method; to the Committee on Ways and Means.

By Mr. OBERSTAR:

H.R. 3901. A bill to reduce airlines subsidies, and for other purposes; to the Committee on Public Works and Transportation.

By Mr. OTTINGER:

H.R. 3902. A bill to amend title V of the National Energy Conservation Policy Act relating to Federal employee parking; to the Committee on Public Works and Transportation.

H.R. 3903. A bill to amend the Ethics in Government Act of 1978 to require reporting of the exact value of items required to be disclosed; jointly, to the Committees on Armed Services, the Judiciary, Post Office and Civil Service, and Rules.

H.R. 3904. A bill to reform the laws relating to former Presidents; jointly, to the Committees on Government Operations, House Administration, the Judiciary, and Post Office and Civil Service.

H.R. 3905. A bill to establish a system of regional Presidential primaries administered by the Federal Election Commission, and for other purposes; to the Committee on House Administration.

By Mr. PETRI:

H.R. 3906. A bill to provide that areas which are urbanized areas on the basis of the 1970 decennial census will not lose their status as urbanized areas under the Urban Mass Transportation Act of 1964 by population reductions on the basis of the 1980 decennial census; to the Committee on Public Works and Transportation.

By Mr. RITTER:

H.R. 3907. A bill to amend the Internal Revenue Code of 1954 to increase the investment tax credit for qualified rehabilitation expenditures; to the Committee on Ways and Means.

By Mr. SAWYER:

H.R. 3908. A bill to amend the Internal Revenue Code of 1954 to increase the limitations on the deduction for individual retirement savings and to allow individuals covered by employer plans to qualify for such deduction; to the Committee on Ways and Means.

By Mr. SAWYER (by request):

H.R. 3909. A bill to amend section 376 of title 28, United States Code, in order to reform and improve the existing program for annuities for survivors of Federal Justices and judges; to the Committee on the Judiciary.

By Mrs. SCHNEIDER (for herself and Mr. MARKEY):

H.R. 3910. A bill to amend the Internal Revenue Code of 1954 to encourage energy efficiency improvements of commercial and residential property; to the Committee on Ways and Means.

By Mr. STARK:

H.R. 3911. A bill to amend the Internal Revenue Code of 1954 to permit individuals to establish housing accounts in certain financial institutions and to provide that interest on such accounts will be exempt from taxation; to the Committee on Ways and Means.

By Mr. THOMAS:

H.R. 3912. A bill to amend the Internal Revenue Code of 1954 to redefine heavy oil for purposes of the windfall profit tax on domestic crude oil; to the Committee on Ways and Means.

H.R. 3913. A bill to amend the Internal Revenue Code of 1954 to exempt heavy oil from the windfall profit tax on domestic crude oil; to the Committee on Ways and Means.

By Mr. WALGREN:

H.R. 3914. A bill to amend the Internal Revenue Code of 1954 with respect to the tax treatment of oil and gas income; to the Committee on Ways and Means.

By Mr. WEISS:

H.R. 3915. A bill to amend the Atomic Energy Act of 1954 to modify certain statutory limitations on the amount of financial protection required with respect to nuclear incidents, to remove the statutory limitations on the aggregate liability for a single nuclear incident, to limit the financial obligations of the United States with respect to such incidents, and for other purposes; to the Committee on Interior and Insular Affairs.

By Mr. ANDREWS:

H.J. Res. 282. Joint resolution authorizing and requesting the President of the United States to issue a proclamation on Independence Day, July 4, of each year calling upon Government officials and the people of the United States to display the flag of the United States and to participate in appropriate ceremonies in recognition of their liberty and independence; to the Committee on Post Office and Civil Service.

By Mr. BEARD:

H.J. Res. 283. Joint resolution to oppose efforts by the United Nations Educational, Scientific, and Cultural Organization to attempt to regulate news content and to formulate rules and regulations for the operation of the world press; to the Committee on Foreign Affairs.

By Mr. ERDAHL:

H.J. Res. 284. Joint resolution proposing an amendment to the Constitution changing the term of Office of the President and Vice President and amending the length of time a person may serve as President or Vice President of the United States; to the Committee on the Judiciary.

By Mr. LEVITAS:

H.J. Res. 285. Joint resolution to designate the week of October 5, through October 11, 1981, as "National Productivity Improvement Week"; to the Committee on Post Office and Civil Service.

By Mr. SHANNON (for himself and Mr. DOUGHERTY):

H.J. Res. 286. Joint resolution relating to the hunger strike in Northern Ireland; to the Committee on Foreign Affairs.

By Mr. ZABLOCKI (for himself, Mr. OBEY, Mr. CONTE, Mr. BINGHAM, Mr. BONKER, Mr. SOLARZ, Mr. BARNES, Mr. WOLPE, Mr. GILMAN, Mr. PRITCHARD, Mr. LEACH of Iowa, Mr. ERDAHL, Mr. HARKIN, Mr. MARKEY, Mr. OBERSTAR, Mr. SIMON, Mr. BONIOR of Michigan, Mr. GORE, Mr. FAZIO, Mr. WYDEN, Mr. FISH, Mr. SHANNON, and Mr. DENARDIS):

H.J. Res. 287. Joint resolution in support of the implementation of the World Health Organization voluntary code on infant formula; to the Committee on Foreign Affairs.

By Mr. PARRIS:

H. Con. Res. 148. Concurrent resolution to deny the request of former President Carter for commissary privileges; to the Committee on Armed Services.

By Mr. BEDELL:

H. Res. 157. Resolution calling upon the Postmaster General of the United States to give priority consideration to means other than closing local post offices as a method of reducing expenditures by the U.S. Postal Service; to the Committee on Post Office and Civil Service.

By Mr. BIAGGI (for himself Mr. GILMAN, Mr. PEYSER, Mr. ROE, Mr. HOLLENBECK, Mr. WALGREN, Mr. ADDABBO, Mr. FAUNTROY, Mr. ZEFERETTI, Mr. MITCHELL of Maryland, Mr. RATCHFORD, Mr. RUSSO, Mr. McGRATH, Mr. SCHEUER, Mrs. COL-

LINS of Illinois, Mr. FORSYTHE, Mr. FOGLIETTA, Mr. BINGHAM, Mr. CROCKETT, Mr. WEISS, Mr. LENT, Mr. LEBOUTILLIER, Mr. CARNEY, Mr. MOLINARI, Mr. RANGLE, Mr. MAVROULES, Mr. LEE, Ms. FERRARO, Mrs. SCHROEDER, Mr. HOWARD, Mr. ATKINSON, Mr. ALBOSTA, Mr. BRODHEAD, Mr. EDGAR, Mr. OTTINGER, Ms. OAKER, Mr. MOAKLEY, Mr. RICHMOND, Mr. GEJENDSON, Mr. NOWAK, Mr. GRAY, Mr. RINALDO, Mr. FISH, Mr. SAVAGE, Mr. MOTTL, Mr. FRANK, Mr. MCKINNEY, Mr. SCHUMER, Mr. ANNUNZIO, Mr. SWIFT, and Mr. YATRON):

H. Res. 158. Resolution to express the sense of the House of Representatives that the hunger strike in Northern Ireland be settled; to the Committee on Foreign Affairs.

By Mr. ZABLOCKI (for himself and Mr. BROOMFIELD):

H. Res. 159. Resolution expressing the strong support of the House of Representatives for diplomatic efforts to resolve the current crisis in Lebanon and congratulating special envoy Philip C. Habib on his tireless efforts to resolve that crisis; to the Committee on Foreign Affairs.

PRIVATE BILLS AND RESOLUTIONS

Under clause 1 of rule XXII, private bills and resolutions were introduced and severally referred as follows:

By Mr. ALEXANDER:

H.R. 3916. A bill for the relief of Kurt Perwolf, his wife Hilda Perwolf, and his son Christian Perwolf; to the Committee on the Judiciary.

By Mr. HILER:

H.R. 3917. A bill for the relief of the administrators and beneficiaries of the Chrapliwy-Uniroyal Settlement Fund; to the Committee on the Judiciary.

By Mr. LEATH;

H.R. 3918. A bill for the relief of Ursula Grubusch Oldham; to the Committee on the Judiciary.

ADDITIONAL SPONSORS

Under clause 4 of rule XXII, sponsors were added to public bills and resolutions as follows:

H.R. 116: Mr. BAFALIS, Mr. JONES of North Carolina, and Mr. YOUNG of Alaska.

H.R. 478: Mr. DYSON.

H.R. 881: Mr. VENTO and Mr. MCKINNEY.

H.R. 917: Mr. ROBERTS of South Dakota, Mr. HUBBARD, Mr. JONES of Tennessee, Mr. BEARD, Mr. SNYDER, Mr. HAMMERSCHMIDT, Mr. TRIBLE, Mr. DORNAN of California, Mr. CLAUSEN, Mr. CORCORAN, Mr. PERKINS, Mr. SKELTON, Mr. DICKINSON, Mr. GOLDWATER, Mr. HUNTER, Mr. LUJAN, Mr. FORSYTHE, Mr. MCDADE, Mr. DANNEMEYER, Mr. HORTON, Mr. BROYHILL, Mr. FISH, Mr. MITCHELL of New York, and Mr. SAM HALL, JR.

H.R. 1005: Mr. SHUMWAY, Mr. COURTER, and Mr. CRAIG.

H.R. 1176: Mr. BEILENSON, Mr. GIBBONS, Mr. JOHNSON, Mr. KRAMER, Mr. WHITEHURST, Mr. PEPPER, Mr. GLICKMAN, Mr. EDGAR, Mr. GRISHAM, Mr. FRENZEL, Mr. FORSYTHE, Mr. BEDELL, Mr. MCCLOSKEY, Mrs. FENWICK, Mr. BENEDICT, Mr. BEARD, Mr. JAMES K. COYNE, Mr. HARKIN, and Mr. SIMON.

H.R. 1177: Mr. LANTOS.

H.R. 1200: Mr. DECKARD.

H.R. 1301: Mr. MOLINARI and Mr. LOEFFLER.

H.R. 1302: Mr. MOLINARI and Mr. LOEFFLER.

H.R. 1325: Mr. SHAW, Mr. FOUNTAIN, Mr. PHILIP M. CRANE, Mr. NAPIER, Mr. MCCLOSKEY, Mr. SILJANDER, and Mr. GRISHAM.

H.R. 1336: Mr. KOGOVSEK, Mr. BEILENSON, Mr. PEPPER, and Mr. BONIOR of Michigan.

H.R. 1339: Mr. DECKARD.

H.R. 1340: Mr. DECKARD.

H.R. 1400: Mr. KOGOVSEK, Mr. FISH, Mr. DYSON, and Mr. MINETA.

H.R. 1409: Mr. BROWN of Colorado.

H.R. 1430: Mr. KOGOVSEK, Mr. EDGAR, Mr. MURPHY, Mr. ROBINSON, Mr. SIMON, and Mr. JAMES K. COYNE.

H.R. 1431: Mr. COELHO, Mr. PETRI, Mr. KOGOVSEK, Mr. EDGAR, Mr. MURPHY, Mr. ROBINSON, Mr. SIMON, and Mr. JAMES K. COYNE.

H.R. 1541: Mr. SHAW.

H.R. 1597: Mr. FLORIO, Mr. BEILENSON, Mr. KASTENMEIER, Mr. YATRON, Mr. TRAXLER, Mr. EDGAR, Mr. VENTO, Mr. KOGOVSEK, Mr. BEREUTER, Mr. SIMON, Mr. BEARD, Mr. SHAMANSKY, and Mr. NEAL.

H.R. 1605: Mr. MURPHY, Mr. CROCKETT, Mr. GORE, Ms. FERRARO.

H.R. 1658: Mr. KOGOVSEK, Mr. NICHOLS, Mr. VENTO, Mr. BEARD, Mr. WHITTAKER, and Mr. SABO.

H.R. 1778: Mr. DREIER.

H.R. 1779: Mr. DREIER.

H.R. 1852: Mr. LANTOS.

H.R. 1867: Mr. GOLDWATER.

H.R. 1868: Mr. GOLDWATER.

H.R. 1873: Mrs. FENWICK.

H.R. 1918: Mrs. CHISHOLM.

H.R. 2129: Mr. DWYER.

H.R. 2440: Mr. GARCIA, Mr. HUGHES, Mr. WOLPE, and Mr. STOKES.

H.R. 2533: Mr. GUNDERSON, and Mr. TRIBLE.

H.R. 2564: Mr. SHUMWAY.

H.R. 2605: Mr. JEFFRIES, Mr. SHELBY, Mr. GUNDERSON, Mr. BAILEY of Missouri, and Mr. LEE.

H.R. 2793: Mr. WAXMAN.

H.R. 2812: Mr. GRADISON.

H.R. 2910: Mr. LANTOS, Mr. MCKINNEY, and Mr. MINETA.

H.R. 2974: Mr. HILER and Mr. WAXMAN.

H.R. 3003: Mr BURGENER, Mrs. SMITH of Nebraska, Mr. DAUB, Mr. FORSYTHE, Mr. JOHNSTON, Mr. KINDNESS, Mr. GINGRICH, Mr. LEBOUTILLIER, Mr. LAGOMARSINO, Mr. MORRISON, Mr. NAPIER, Mr. PARRIS, Mr. SOLOMON, Mr. SILJANDER, Mr. WILSON, and Mr. WHITTAKER.

H.R. 3019: Ms. FERRARO.

H.R. 3039: Mr. MOAKLEY, Mr. WHITEHURST, Ms. FERRARO, Mr. FOGLIETTA, Mr. OBERSTAR, Mr. FORSYTHE, Mr. MITCHELL of Maryland, Mr. PEPPER, Mr. IRELAND, Mr. BEILENSON, Mr. FAUNTROY, Mr. AKAKA, Mr. LEHMAN, Mr. HUTTO, Mr. ERDAHL, Mr. HOWARD, Mr. HANSEN of Idaho, Mr. EDWARDS of California, Mr. STARK, Mr. SEIBERLING, Mr. FROST, Mr. KILDEE, Mr. LAGOMARSINO, Mr. HOLLENBECK, Mr. LOWRY of Washington, Mr. SOLARZ, Ms. OAKAR, Mr. FAZIO, Mr. FRANK, Mr. FISH, and Ms. MIKULSKI.

H.R. 3091: Mr. FISH, Mr. TAUKE, Mr. FAZIO, Mr. DIXON, and Mr. SILJANDER.

H.R. 3092: Mr. BEREUTER.

H.R. 3117: Mr. CLINGER, Mr. DELLUMS, Mr. BARNES, Mr. WAXMAN, and Mr. CONABLE.

H.R. 3227: Mr. MARKS, Mr. STANTON of Ohio, Mr. DOWNEY, Mr. MOTTL, Mr. ZEFERETTI, and Mr. RITTER.

H.R. 3236: Mr. HUCKABY.

H.R. 3268: Mr. WALKER, Mr. DYSON, Mr. NAPIER, Mr. FAZIO, Mr. HUTTO, and Mr. BARNARD.

H.R. 3269: Mr. HEFNER, Mr. STUMP, Mr. DASCHLE, Mr. MITCHELL of New York, and Mr. ZEFERETTI.

H.R. 3416: Mr. BAFALIS, Mr. ERTEL, Mr. FUQUA, Mr. GIBBONS, Mrs. HOLT, Mr. HUTTO, Mr. MCCOLLUM, Mr. PEPPER, and Mr. SMITH of Alabama.

H.R. 3440: Mr. ATKINSON, Mrs. COLLINS of Illinois, Mr. STOKES, and Mr. FOGLIETTA.

RUDD, Mr. STANGELAND, Mr. PHILIP M. CRANE, and Mr. ROBERT W. DANIEL, JR.

H.J. Res. 279: Mr. SYNAR, Mr. WATKINS, Mr. MCCURDY, Mr. ENGLISH, Mr. TRAXLER, Mr. BIAGGI, Mr. PEPPER, Mr. LOEFFLER, Mr. LATTA, Mr. YOUNG of Alaska, Mr FARY, Mr. FOGLIETTA, Mr. LANTOS, Mr. DANNEMEYER, Mr. FAUNTROY, Mr. LAGOMARSINO, Mr. BONIOR of Michigan, Mr. PURSELL, Mr. FOWLER, Mr. MURPHY, Mr. BURGENER, Mr. EVANS of Delaware, Mr. CAMPBELL, Mr. DENARDIS, Mr. THOMAS, Ms. OAKAR, Mr. PASHAYAN, Mr. JONES of Tennessee, Mr. MOAKLEY, Mr. ALEXANDER, Mr. SAM B. HALL JR., Mr. SOLARZ, Mr. MARKEY, Mr. BEILENSEN, Mr. DASCHLE, Mr. WHITTAKER, Mr. COURTER, Mr. PICKLE, Mr. LUKEN, Mr. BLANCHARD, Mr. KRAMER, Mr. COATS, Mr. ROEMER, Mr. MORRISON, Mr. BAILEY of Missouri, Mr. NAPIER, Mr. MADIGAN, Mrs. FENWICK, Mr. DE LA GARZA, Mr. FAZIO, Mrs. HOLT, Mr. LENT, Mr. BEVILL, Mr. LOWERY of California, Mr. BOLAND, Mr. JOHN L. BURTON of California, Mr. CHAPPELL, Mr. SOLOMON, Mr. MOTTL, Mr. NICHOLS, Mr. SPENCE, Mr. CONTE, Mr. ADDABBO, Mr. PRICE, Mr. DANIEL B. CRANE, Mr. STENHOLM, Mr. SWIFT, Mr. UDALL, Mr. LUNGREN, and Mr. STANGELAND.

H. Con. Res. 74: Mr. YATRON, Mr. MOTTL, Mr. OBERSTAR, Mr. D'AMOURS, Mr. HOLLENBECK, Mr. BARNARD, Mr. MURPHY, Mr. VENTO, Mr. SEIBERLING, Mr. WON PAT, Mr. DAN DANIEL, Mr. FAZIO, Mr. COELHO, Mr. DORGAN of North Dakota, Mr. SABO, Mr. LUNDINE, Mr. CLAY, Mr. FROST, Mr. HUGHES, Mr. JEFFORDS, Mr. MARKS, Mr. WILSON, Mr. LAFALCE, Mr. BONKER, Mr. BEARD, Mr. ROSENTHAL, Mr. EVANS of Georgia, Mr. WEBER of Minnesota, Mr. ECKART, Mr. PORTER, Mr. PATTERSON, Mr. BONIOR of Michigan, Mr. BEREUTER, Mr. MINETA, Mr. RITTER, Mr. GRAY, Mr. SMITH of New Jersey, and Mr. GARCIA.

H. Con. Res. 139: Mr. LEBOUTILLIER, Mr. MARTIN of New York, Mr. NAPIER, Mr. ZEFERETTI, Mr. SMITH of New Jersey, and Mr. GOODLING.

H. Res. 79: Mr. BUTLER.

H. Res. 150: Mr. MORRISON, Mr. BROWN of Colorado, Mr. FIELDS, Mr. WEBER of Minnesota, Mr. MCEWEN, Mr. WEBER of Ohio, Mr. HILER, Mr. DUNN, Mr. HANSEN of Utah, and Mr. SKEEN.

AMENDMENTS

Under clause 6 of rule XXIII, proposed amendments were submitted as follows:

H.R. 3480

By Mr. ASHBROOK:

—Page 12, line 16, strike out "or" after the semicolon.

Page 12, line 19, strike out the two periods and closed quotation marks and insert in lieu thereof "; or".

Page 12, insert the following after line 19:

"(13) to provide legal assistance in any litigation in which a local board of education responsible for the administration of public elementary or secondary schools, or any of its employees acting in an official capacity and within the scope of his or her authority, is a defendant.".

—Page 12, strike out lines 4 and 5 and insert in lieu thereof the following:

(3) by amending paragraph (9) to read as follows:

"(9) to provide legal assistance with respect to any proceeding or litigation relating to the desegregation of any elementary or secondary school or school system;";

By Mr. PHILIP M. CRANE:

—On page 13, line 8, strike the period and replace it with the following: ", except that nothing in this title shall be construed to allow a recipient to represent anyone other than an otherwise eligible individual person.".

By Mr. FRANK:

—Page 6, strike out lines 1 through 4 and insert in lieu thereof the following:

(d) Section 1006(b)(5) of such Act is amended in the first sentence—

(1) by striking out "(A)";

(2) by striking out "; and (B) no such employee shall, at any time," and inserting in lieu thereof the following: "; except that, in connection with such employee's own employment situation, should an impasse in collective bargaining occur, no employee may engage in a strike unless the labor organization involved has given notice of the dispute to the Federal Mediation and Conciliation Service, and unless 60 days has elapsed after such notice is given. After receiving the notice, the Federal Mediation and Conciliation Service shall use its best efforts to bring the parties to agreement. The Corporation shall also insure that no such employee shall, at any time, including but not limited to when acting in connection with such employee's own employment situation,";

(3) in clause (iii) by striking out "or" after the comma;

(4) by striking out "(i)", "(ii)", "(iii)", and "(iv)", and inserting in lieu thereof "(A)", "(B)", "(C)", and "(D)", respectively; and

(5) by inserting immediately after "1007(a)(6)" the following: ", or (E) any conduct which would violate his or her professional responsibilities".

By Mr. KASTENMEIER:

—Page 3, strike out lines 19 through 25 and all that follows through page 4, line 14, and insert in lieu thereof the following:

SEC. 3. Section 1007(c) of the Legal Services Corporation Act (42 U.S.C. 2996f(c)) is amended by striking out the last sentence and inserting in lieu thereof the following: "The Corporation shall also insure that a majority of the attorney members of the governing body be appointed by the bar association or associations in the area in which the recipient is to provide legal assistance. Any attorney, while serving on such board, shall not receive compensation from a recipient.".

—Page 11, insert the following after line 3 and redesignate succeeding sections accordingly:

ALLOCATION OF FUNDING

SEC. 11. Section 1007(a) of the Legal Services Corporation Act, as amended by sections 8, 9, and 10 of this Act, is further amended—

(1) in paragraph (12) by striking out "and" after the semicolon;

(2) in paragraph (13) by striking out the period and inserting in lieu thereof "; and"; and

(3) by adding at the end thereof the following:

"(14) unless minimum access to legal assistance is available or provided in all parts of the country, allocate basic field grants so as to insure that no greater level of access to legal assistance funded by the Corporation is available or provided to any part or area of the country than is available or provided to all parts of the country, consistent with available funding and other provisions of the Legal Services Corporation Act and regulations.".

By Mr. KAZEN:

—Page 12, strike out lines 10 through 16 and insert in lieu thereof the following:

"(11) to provide legal assistance for or on behalf of any alien who has not been lawfully admitted for permanent residence in the United States unless the residence of the alien in the United States is authorized by the Attorney General; or

By Mr. KRAMER:

—Page 6, strike out line 20 and all that follows through line 21 on page 7 and insert in lieu thereof the following:

"(5) insure that no funds made available to any recipient are used, directly or indirectly, to pay for any personal service, advertisement, telegram, telephone communication, letter, printed or written matter, or other device, intended or designed to influence any decision by a Federal, State, or local agency, except where legal assistance is provided by an employee of a recipient to an eligible client on a particular application, claim, or case, which directly involves the client's legal rights and responsibilities, or to influence any Member of Congress or any other Federal, State, or local elected official to favor or oppose any Acts, bills, resolutions, or similar legislation, or any referendum, initiative, constitutional amendment, or any similar procedure of the Congress, any State legislature, any local council, or any similar governing body, except that this subsection shall not preclude such funds from being used in connection with communications to Federal, State, or local elected officials, upon the formal request of such officials through proper official channels, pertaining to the authorization or appropriations of funds or oversight measures directly affecting the operation of the program involved;".

—Page 13, insert the following after line 8 and redesignate succeeding sections accordingly:

BUDGET REVIEW

SEC. 13. (a) Section 1005(e) of the Legal Services Corporation Act (42 U.S.C. 2996d(e)) is amended in paragraph (1)—

(1) by striking out "(1)"; and

(2) by striking out the period at the end thereof and inserting in lieu thereof the following: ", except that the President and the Office of Management and Budget shall have the same authorities with respect to the review and submission of the budget of the Corporation as the President and the Office of Management and Budget have with respect to the review and submission of the budgets of all departments and agencies of the Government, including the authority regarding rescission of budget authority and deferrals of budget authority provided in sections 1012 and 1013, respectively, of the Congressional Budget and Impoundment Control Act of 1974 (31 U.S.C. 1402 and 1403).".

(b) Such section is further amended by striking out paragraph (2).

By Mr. MCCOLLUM:

—Page 11, line 5, insert "(a)" after "SEC. 11.".

Page 12, strike out lines 10 through 16 and insert in lieu thereof the following:

"(11) to provide legal assistance for or on behalf of any alien unless the alien is a resident of the United States and is—

"(A) an alien lawfully admitted for permanent residence as an immigrant as defined by sections 101(a)(15) and 101(a)(20) of the Immigration and Nationality Act (8 U.S.C. 1101(a)(15), (20));

"(B) an alien who is either married to a United States citizen or is a parent or an unmarried child under the age of 21 years of such a citizen and who has filed an applica-

tion for adjustment of status to permanent resident under the Immigration and Nationality Act and such application has not been rejected;

"(C) an alien who is lawfully present in the United States pursuant to an admission under section 207 of the Immigration and Nationality Act (8 U.S.C. 1157, relating to refugee admissions;) or who has been granted asylum by the Attorney General under such Act; or

"(D) an alien who is lawfully present in the United States as a result of the Attorney General's withholding of deportation pursuant to section 243(h) of the Immigration and Nationality Act (8 U.S.C. 1253(h)), or

Page 12, after line 19, insert the following new subsection:

(b) An alien who is lawfully present in the United States as a result of being granted conditional entry pursuant to section 203(a)(7) of the Immigration and Nationality Act (8 U.S.C. 1153(a)(7)) before April 1, 1980, because of persecution or fear of persecution on account of race, religion, or political opinion or because of being uprooted by catastrophic natural calamity shall be deemed, for purposes of section 1007(b)(11) of the Legal Services Corporation Act, to be an alien described in subparagraph (C) of such section.

By Mr. McDONALD:

—Page 11, insert the following after line 3 and redesignate succeeding sections accordingly:

RESTRICTIONS ON FUNDS

SEC. 11. Section 1006 of the Legal Services Corporation Act (42 U.S.C. 2996e) is amended by adding at the end thereof the following:

"(g) No funds made available to carry out this title may be used (1) to provide legal assistance to promote, defend, or protect homosexuality, or (2) to promulgate or enforce the proposed rules of the Corporation which were published in the Federal Register on March 23, 1981 (46 F.R. 18055; 45 C.F.R. 1624), or any substantially similar rules which the Corporation may promulgate, to the extent that such rules pertain to homosexuality.".

By Mr. MOFFETT:

—Page 5, lines 1 and 2, strike out "Or by the President of the Corporation".

By Mr. SENSENBRENNER:

—Page 5, strike out line 4 and all that follows through "Corporation" on line 8.

Page 5, line 9, strike out "(1)".

Page 5, strike out lines 11 through 14.

By Mr. VOLKMER:

—Amend H.R. 3480 by adding after the word "States" on page 3, line 25 "and which nonprofit organization is to provide service to clients in an area which includes a political subdivision with a minimum population of 100,000 persons,".

—On page 13 strike lines 15 and 16 and insert in lieu thereof: "$200,000,000 for the fiscal year 1982.".

By Mr. WATKINS:

—Page 13, add the following after line 23:

(c) Section 1010 of such Act is amended by adding at the end thereof the following:

"(e) Not less than 30 per centum of the amounts appropriated pursuant to subsection (a) for the fiscal year 1982 or any fiscal year thereafter shall be made available only for nonmetropolitan areas. For purposes of this subsection, the terms "nonmetropolitan area" and "nonmetropolitan areas" shall mean any area outside a Standard Metropolitan Statistical Area, as established by the Department of Commerce, or any area which, as determined by the Board, after consultation with the Secretary of Agriculture, is rural in character.

By Mr. WILSON:

—Page 8, lines, 2 and 3, strike out "except in accordance with policies or regulations adopted by the Board".

EXTENSIONS OF REMARKS

THE CHANGE THAT HAS TO HAPPEN—HOW TO GET ALCOHOL OFF THE HIGHWAYS

HON. MICHAEL D. BARNES

OF MARYLAND

IN THE HOUSE OF REPRESENTATIVES

Thursday, June 11, 1981

● Mr. BARNES. Mr. Speaker, the drinking driver continues to pose the No. 1 highway traffic safety problem, resulting in 26,000 deaths and 1 million injuries in the United States every year. I submit for the attention of my colleagues a superb article from the latest issue of Family Circle magazine on the needless human suffering caused by persons who abuse their driving privilege in this most egregious manner.

The article describes the emergence of a movement that has formed, spurred by public outrage and led by victims of drunk drivers, and other concerned citizens, to combat this threat to the health and safety of all citizens on our highways.

The Family Circle article follows:

THE CHANGE THAT HAS TO HAPPEN—HOW TO GET ALCOHOL OFF THE HIGHWAYS

(By Eugene L. Meyer)

It happened at midday on Saturday, November 10, 1979, on a rolling country road outside Washington, D.C. Cindi Lamb, shopping-bound with her five-month-old baby Laura belted in beside her, was approaching the crest of a hill when an oncoming car veered across the center line and smashed into her pickup head-on. The driver was drunk.

The 25-year-old mother was pulled from the wreckage with a dozen broken bones, which were soon to heal, but Laura suffered irreparable injuries to her spinal column and will be paralyzed for life. After six months of intensive care, she was sent home from the hospital with braces on her legs and body and a tube in her throat so that mucus could be suctioned from her lungs. Although she could move her arms, she had no sensation in them nor in any other part of her body. Because she could feel no pain, she had chewed one hand bloody and had to wear mittens. She must still wear them.

"I remember the last time Laura felt a hug," Cindi Lamb says. "I remember the last time she moved her fingers and her hands and her legs and feet. Now she doesn't feel any hugs. She doesn't feel anything from her shoulders down."

For Cindi Lamb and her husband, life would never be the same. Within months the round-the-clock strain of caring for Laura had placed a fatal burden on their troubled marriage and Alan Lamb moved out. Cindi had no choice but to quit her two jobs (selling Tupperware and teaching the deaf) and rely on welfare and Medicaid to keep herself and Laura alive.

And what happened to the person who was responsible for all this? He turned out to be a man who was out on parole for armed robbery at the time of the Lamb accident. In addition, he was found to have been driving without a license and to be a repeat drunk-driving offender. On the day of sentencing, the judge—the same man who had sentenced him for armed robbery—returned him to prison for violating his parole. He then tacked on a mere two years for the smash-up that crippled Laura Lamb. Locking the man up longer, the judge said, would accomplish little since sooner or later he would return to society to drink and drive again.

Even the offender was shocked by the judge's attitude. "Sure, what I did was wrong," he said later from his jail cell. "But it really was the judge's fault too for not keeping me off the street."

Alcohol on the highways is responsible for killing at least 25,000 persons a year in the U.S. and for gravely injuring at least a million others. Every day nearly 70 persons die—about one death every 23 minutes—and an additional 2,750 are maimed or seriously hurt. It is estimated that one out of every two Americans will be involved in an alcohol-related car crash during his or her life. Yet, up to now, the general public and our criminal justice system have managed to turn their backs on the problem, letting most drunk drivers literally get away with murder and showing little concern for their surviving victims.

"It is a national outrage," says an official with the National Highway Traffic Safety Administration. In spite of the sobering facts, "Our society continues to accept drinking and driving as a normal part of daily life." Small wonder then that many of the frustrated victims of what is, after all, a criminal offense, turn bitter.

Cindi Lamb did no such thing. Instead she turned crusader. Determined that Laura's tragedy should not be in vain, she now directs her considerable energies and talents toward forcing lawmakers, the courts and the public at large to move in on the problem of getting alcohol off the highways. And thanks to her efforts—and to those of other strong-minded survivors—headway is at last being made.

"Laura used to have the strongest, sturdiest little legs," the Unionville, Md., mother remembers. "She was just beginning to crawl at the time of the accident. Now she can't move at all. But she can move people."

Last summer, mother and daughter descended on their state capital to confront a roomful of legislators who were considering whether to toughen Maryland's drunk-driving laws by lowering the permissible alcohol content in the blood from Maryland's then 15% to 10%, which is the standard in all other states. Under the law then in effect (it has since been changed), a man who weighed 150 pounds would have had to bolt down six shots of liquor within an hour in order to be found legally drunk. Reformers, including, of course, Cindi Lamb, regarded the standard as ludicrous, but many legislators disagree. "You are wrong, dead wrong," Cindi told the stand-pat lawmakers. "My daughter is living proof of how wrong you are."

The lawmakers sat impassively through her testimony. After the hearing, a man who was being blamed for blocking the reform measure explained his reasons. "I want to get laws that will work," he said, "but I don't know what they should be. If I did, I'd certainly be the first to push for passage." He and like-minded legislators argue that the tougher the standards, the more likely drunk drivers would be to wriggle off the hook by hiring high-pressure lawyers, pleading guilty to lesser offenses (reckless driving, for example) and generally impeding justice.

Still, legislators notwithstanding, Cindi Lamb sticks by her guns. It is posssible, she insists, to reduce drunk driving by establishing a deterrent which will be tough enough and well-enough enforced to make drinkers think twice before climbing behind a wheel. Highway safety experts agree. Says one Federal offical: "You've got to scare hell out of people." But, he adds, you've also got to persuade everyone involved in criminal justice to work together. Unless judges, prosecutors, policemen and penologists are equally determined to clamp down on offenders, no deterrent will work. And that requires pressure from the general public.

"Our son was killed June 17, 1972, when a drunk driver was passing at a non-passing yellow line coming over a hill," a Springfield, Iowa, couple wrote Cindi Lamb. "He was charged with manslaughter. Judge and lawyers worked out a sentence of three years' probation and said that if after that time he hadn't been in trouble, his case would be sealed and be wouldn't have to say he'd ever been convicted of a felony. A little more than three years later, we noticed in the paper that he'd been arrested for drunk driving. They said he'd be tried as a first offender. Now we've just given up at the hopelessness of it all."

But there are more and more outraged victims who refuse to give up. Candy Lightner, for example, is a Fair Oaks, Calif., mother whose 13-year-old daughter, Cari, was run over and killed while walking to church. It was the second time Cari Lightner has been hit by a driver who'd been drinking. This time, the driver turned out to be a man who'd been out on bail for only two days after a previous hit-and-run drunk-driving arrest.

As soon as she could pull herself together, Candy Lightner, as she says, "went public" and formed Mothers Against Drunk Drivers (MADD). Last year she joined forces with Cindi Lamb and staged a Washington protest and press conference. "We can put on pressure. We can lay the blame where blame belongs," Lightner says.

In addition to MADD, there are other "survivor groups" across the country. They include RID (Remove Intoxicated Drivers, which has 15 local chapters) and PARKIT (Prevent Alcohol Related Killings and Injuries in Tompkins County, N.Y.). As angry and determined as their names imply, they are all working to make authorities accountable by monitoring courtrooms, lobbying among legislators and holding media events.

The emergence of these citizen-activist groups is a new and hopeful element in an old and frustrating story. For decades Euro-

pean and British governments have been grappling with the problem of drunk driving, but with no great success. As soon as laws were toughened, in Britain, Norway, Sweden and the Netherlands, the rate of alcohol-related accidents dropped but then it began creeping up again. Today there is no hard evidence the problem has been solved anywhere in Europe.

The U.S. government plunged into the field in the 1970's pouring $88 million into 35 Alcohol Safety Action Programs across the land. Here, too, the results were disappointing. Even though the overall number of arrests more than doubled, there was a significant reduction in nighttime accidents in only one-third of the programs. As for dramatic success stories—only one stands out: In Hennepin County, Minn., arrests almost tripled between 1971 and 1974, and alcohol involvement in fatal accidents dropped from 63% in 1972 to 38% four years later.

One reason many programs have misfired is that treatment for alcohol misuse, which was meant to supplement punishment, has often ended up replacing it. Challenging the conventional wisdom of the alcoholic treatment professionals, Federal experts have concluded that there is "no firm evidence rehabilitation is effective in reducing the number of repeat offenders."

But there is an important lesson in the combined experience of governments here and abroad: a well-publicized crackdown with tough laws can and will work, but only so long as potential offenders believe they will be caught and jailed. Once word gets around that the chances of apprehension and punishment are slim, drinkers will once more flaunt the law.

"It is a peculiar form of crime, in that it is one frequently committed by citizens who have no history of convictions of any other criminal offense," the Chief Judge of Maryland's District Court asserted in answering a letter from Cindi Lamb and her husband complaining about the judge in Laura's case. "In drunk driving cases, more than in any other type of case, the argument is made to judges that 'we are dealing with an illness, not a crime.' Our judges are constantly asked to use charges of this kind to rehabilitate a person suffering from this sickness, to restore him to the ranks of healthy, law-abiding, self-sufficient citizens." Clearly the response fitted neither the crime nor the criminal.

Similarly, the man responsible for Cari Lightner's death cited his alcoholism as a mitigating circumstance and was allowed to plead "no contest" to manslaughter while all other charges were dropped. The prosecutor asked for a three-year prison sentence. The judge sentenced the man to two. "I was appalled," said Candy Lightner.

The sentence would not have surprised Federal officials in charge of the Alcohol Safety Programs. They found repeatedly that "many judges believe that most defendants deserve to avoid the loss of license or increased insurance penalties, and they will protect these individuals by such devices as encouraging a plea to a non-alcohol-related offense, refusing to convict, avoiding a record of conviction or notification of conviction."

"My 26-year-old son is the victim of a young man who had been drinking and had a terrible driving record," a Kentfield, Calif., woman says. "My son suffered serious brain injury. He is alive, but his life is ruined. The system is far too lenient on drunken drivers. It is almost as though nobody cares. The man who hit my son had had 200 moving violations and five accidents in less than four years, but he carried a valid driver's license."

The effect of such lenience on those charged with arresting drunk drivers is devastating. "It's a waste of time," said a policeman in suburban Montgomery County, Md.: "Nothing happens. Unless a drunk gives me a hard time, I simply give him a ride home or call someone to pick him up. If judges and prosecutors aren't going to do anything, the hell with it!"

Although legislation has been introduced in Congress to force states to get tough or forfeit U.S. highway safety funds, Federal officials would prefer to have local efforts carry the ball. "The Federal role," says John Moulden, head of the Alcohol Safety Programs, "is to catalyze, facilitate and stimulate action in the local community." To that end, Moulden's agency is this year sponsoring workshops around the country on the subjects of drunk driving and auto safety restraints.

To tell the locals how to do it, the government has hired, among others, a freelance investigative reporter named Sandy Golden who has worked closely with both Lamb and Lightner. "Drunk driving is a political problem and it succumbs to political pressure," he believes. "The trouble is that most people don't know how to fight City Hall."

That's precisely what the survivor groups are learning to do. And the pressure they're bringing is already beginning to achieve dramatic results:

Three months after her daughter's death, Candy Lightner, under the aegis of MADD, appealed to California Governor Jerry Brown to appoint a task force. He did so and he named her a member.

"MADD is hitting right on target," says Sacramento Judge Lorenzo Patino, who was named task-force chairman. "At judges' meetings we always used to talk about standardized sentencing, but there was no pressure before Lightner's group got to work." Beginning last January the Sacramento judges agreed to accept reduced charges only for first offenders. If a second violation comes in less than two years after the first, the drunk driver will be sent to jail for 40 days.

A governor's task force was also formed in Maryland, following extensive publicity over the Laura Lamb tragedy and an appeal by the Lambs to Governor Harry H. Hughes. The panel came down with six major recommendations, which have for the most part been enacted. In addition, the chief county prosecutor directed his assistants to stop plea bargaining in most drunk driving cases. "The recent public hue and cry has made me examine the issue again," he says.

"My daughter Debbie was killed at the age of 23," a Monticello, Minn., mother wrote Candy Lightner. "Also her husband and the baby they were soon to have. It was 1979, the day after Thanksgiving, which we all spent in Debbie and Mike's home. Next day the kids set off in their car for Wisconsin and a second honeymoon before the baby came. A 27-year-old man, drunk, hit their van head-on, taking both their lives. He was sentenced to one year of nights and week-ends in the county jail. This man had a record of DWI (Driving While Intoxicated) arrests in 1975, 1976 and 1978. He killed Debbie and Mike in 1979."

As things now stand, a drunk driver's chances of getting caught are reckoned at one in 2,000. For those who are arrested, the chances of being punished at all are no more than one in two. And punishments tend to be benign. Drinkers who drive are apparently willing to accept these risks.

Why do so many drunk drivers get off scot-free?

Because many judges jealously, guard their right to "judicial discretion"—that is, their right to mete out unequal justice.

Because defense lawyers are quick to make use of plea bargaining, reducing the severity of the charges.

Because in some states civil libertarians oppose laws setting objective, measurable blood and breath standards for intoxication.

Because bar owners lobby against bills that would hold them liable for what their patrons do when they get on the highways.

Because U.S. jails are already so overcrowded, many penologists agree they might burst their seams if drunk drivers were added to the prison population.

Because by and large prosecutors still take the view that driving while drunk is a relatively minor offense.

For example, last December two judges in Belleview, Wash., agreed to postpone for 90 days sending drunk drivers to jail for one day, as required by Washington state law. The judges acted at the request of the city prosecutor, in the hope that jail conditions would improve in three months. "It is hard to believe," the prosecutor wrote the judges, "that the Legislature intended that otherwise responsible citizens be subjected to the physical conditions or atmosphere of fear that now exists in the King County jail."

If that strikes you as a curious position for a prosecutor, it is none the less widespread. Even in fatal accidents, offenders are treated as "otherwise responsible citizens" who somehow must be shielded from the very indignities that might deter them from driving while drunk.

In New York State, RID was largely responsible for the passage in 1980 of drunk driving laws that had been sitting on the legislative back burner for several sessions. The new laws virtually end the practice of plea bargaining from an alcohol to a non-alcohol related offense such as reckless driving. They also shorten the lengthy process of taking away an offender's driver's license.

"We were told the bills couldn't possibly pass because of constitutional problems and because half the legislators were lawyers who earned fees from plea bargaining people out of alcohol," said Doris Aiken, a Schenectady, N.Y., mother of three who founded RID when two teenage children of an acquaintance were killed by a drunk driver.

Playing hardball, RID warned the lawmakes, "Defense attorneys doubling as legislators with a possible conflict of interest should abstain from voting on these bills. RID with the help of the media and supporters will alert the public in the district of such legislators who put the rights of the public second to their own interests." RID's memo was denounced as "reckless and without merit" by some lawmakers, but ultimately 200 of 210 voted in favor of the measures.

Farther down the road, the battle against drunk driving will cost money—lots of it—for more prosecutors, police, judges and jails. Nowadays, fines paid for driving while intoxicated are not earmarked for that purpose, but are added to "general funds," big pots of revenue up for grabs by all agencies of government. But even if fines were available for the battle, additional monies would probably be needed. One suggestion comes from Forest Lowery, coordinator of Minne-

sota's alcohol program. His proposal: That a new five-cents-a-drink tax be imposed for liquor served in bars and that proceeds be used to keep drunks out of drivers' seats.

The bottom line, however, is attitude. Charles Hayes, a Washington state traffic official, sees a parallel between the issue of driving while drunk and the issue of smoking. "It's now become socially wrong to smoke in public," he says. "I used to think I couldn't stop, but then peer disapproval began to get to me. Every time I went into a meeting, I used to find ashtrays. But after the public's attitude changed, the ashtrays disappeared. After that, I managed to stop smoking."

Attitudes toward drunk driving could change, too. But not soon enough for Laura Lamb. As Cindi Lamb says, "The sun rises, the sun sets, Laura's still paralyzed. And that's the way it's going to be."

WHAT YOU CAN DO ABOUT DRUNK DRIVING

It's going to take a lot of pressure from the general public to get alcohol off the highways and keep it off. Here's how you can help:

1. Discourage everyone you know from driving after drinking. One way is never to ride in a car driven by anyone who's high. That must include everyone—even spouses, family and friends.

2. When someone in your town is arrested for drunk driving, make it your business to follow up on the disposal of the case (if the police won't give you the facts, the courts are obligated to do so by law). If you think the punishment doesn't fit the crime, write a protest letter for publication in your local newspaper, or for airing on your local TV station.

3. To find out what else needs doing and how to go about doing it, write to one of the many citizen action groups that are springing up across the country (please enclose a stamped, self-addressed envelope). Two t. 12301. For those starting their own survivor groups, RID has how-to-do-it kits. They include fact sheets, a speaker's outline, buttons and bumper stickers, a "Dear judge" letter, petitions, court monitoring forms and a training manual. These items, RID points out, are all "tools to involve people on a local level in getting the drunk driver off the road."

4. The National Highway traffic Safety Administration, which is an arm of the Federal Government, can also be helpful. Its address: 400 Seventh St., S.W., Washington, D.C. 20590.●

EARLY RETIREMENT PLAN DISASTER

HON. LES AuCOIN

OF OREGON

IN THE HOUSE OF REPRESENTATIVES

Thursday, June 11, 1981

● Mr. AuCOIN. Mr. Speaker, I do not think any one here is willing to support the President's plan to reduce basic retirement benefits for those who retire early by 30 percent. I doubt that there are many in the administration that still think it is a good idea. I know that 18 million people planning to retire over the next 5 years are scared and angry.

It is unfair and irresponsible to tell several generations that their careful planning for their retirement years has been for naught. We are changing the rules in the last few seconds of a game in which there is no instant replay.

They have been told that if they wait until next year to retire early, they only get 55 percent of their full benefit for the rest of their lives—their spouses get 27.5 percent. That is an average reduction of $126 each month for a population that is already the fastest growing poverty group in America. For the average worker who retires early in 1987, it means $42,000 less during their retirement years than under present law.

Eighty percent of our workers retire early—most of them not by choice, but because of poor health and job loss. Only 22 percent voluntarily leave the work force. Oregon, with an unemployment rate averaging 10 percent, is no exception.

The Republican National Committee's senior Republican newsletter proclaimed "President Reagan keeps promise, retirement benefits go untouched." They must be using the new math.●

NATIONAL HISTORICAL PUBLICATIONS AND RECORDS COMMISSION

HON. GLENN ENGLISH

OF OKLAHOMA

IN THE HOUSE OF REPRESENTATIVES

Thursday, June 11, 1981

● Mr. ENGLISH. Mr. Speaker, on May 19, the House rejected H.R. 2979, a proposal to extend the authorization of appropriation for the National Historical Publications and Records Commission for 2 years at $3 million per year. The bill was simply a reauthorization proposal involving no funding, per se. Moreover, the $3 million figure approved by the Committee on Government Operations represents a 25-percent cut from the currently authorized level of funding. Rather than examine the merits of the program, opponents of the bill argued that, as a Great Society program, the Commission exemplifies why we have been unable to restrain Federal growth and that authorizing this particular program would bust the budget.

The Members of the Senate were undoubtedly aware of these arguments by House opponents. Nonetheless, last week the Senate approved by unanimous consent S. 1050, a companion to the bill rejected by the full House. Now, one could conclude that the Senate favors unrestrained growth and budget busting; or, perhaps, that the Members of the other body found the views of House opponents to be specious. Having recently received a letter from the Coalition To Save Our Documentary Heritage that takes issue with the arguments of House opponents, I am inclined to believe that the Senate found the views of the House opponents to be less than convincing. I commend the letter to my colleagues:

COALITION TO SAVE OUR DOCUMENTARY HERITAGE,
June 1, 1981.

Hon. GLENN ENGLISH,
Chairman, Subcommittee on Government Information and Individual Rights, House of Representatives, Washington, D.C.

DEAR MR. CHAIRMAN: In his speech of May 18 (printed as an extension of remarks in the CONGRESSIONAL RECORD of May 19), Congressman William Dannemeyer made several misleading statements about the National Historical Publications and Records Commission.

He began: "When we examine this history of this organization . . . , we can really see a little of what has happened to our Government, the Federal Government, in the course of the last 47 years." This statement suggests, if not implies, that the NHPRC is a superfluous program which has grown without proper supervision, like some self-perpetuating bureaucracy.

Although the NHPRC was created in 1934, the National Archives did not staff the Commission until 1950. Congressman Dannemeyer considers the NHPRC to be "one of those great society programs," since federal grant funding was first authorized in 1964. But what the Congressman fails to point out was that funds were provided to both stimulate and match private dollars to demonstrate a serious and long-term commitment to the preparation of the papers of the Founding Fathers and other Americans who contributed significantly to this country's development.

Interestingly, those who urged the involvement of Federal funds, whom Mr. Dannemeyer calls "the proponents of this project [who] got the idea that we must stimulate the gathering of this data," included Associate Justices of the U.S. Supreme Court John M. Harlan and Felix Frankfurter and Senator Leverett Saltonstall.

In 1972, when the funding level for the Publications Program was increased from $500,000 to $2,000,000, this legislation was co-sponsored by Senator WILLIAM V. ROTH, JR., who, in his remarks of August 15 which are printed in the CONGRESSIONAL RECORD, claimed:

"The Commission has been able to undertake such an extensive program despite a very limited budget because these projects have attracted outside contributions from universities, foundations, charitable organizations and other groups."

He continued:

"The Commission's activities assisting in the collecting, describing, editing, and publishing of documentary sources important to American history are likely to have a lasting influence on the way in which we interpret our country's history and traditions."

The NHPRC has been a model Government-funded program. The Publications Program has produced an impressive body of work: 319 volumes, 5,450 reels of microfilm and 1,005 microfiches. This has been accomplished at a funding level that has never been over $2,000,000 a year—a figure that has not been adjusted for inflation in the last seven (7) years.

The NHPRC has been able to compile this impressive record because it has been extremely successful at leveraging private dollars. In fiscal year 1980, for example, federal funding for fourteen representative publications projects, was at a level of 43.6 percent of operating budget, while private contributions and institutional/sponsor support was 56.4 percent.

The increase in the funding of the Publications Program was signed into law by President Richard M. Nixon (Public Law 92-546). And his successor, President Gerald R. Ford, created the Records Program in 1974, by signing Public Law 93-536. The NHPRC's achievements are the product of strong bipartisan effort and can hardly be called simply "one of those great society programs."

Although the NHPRC's programs will be severely curtailed by the 25 percent reduction in authorized grant funding, the Coalition to Save Our Documentary Heritage accepts this cut as necessary in this time of budget austerity. But any further reduction or the complete elimination of Federal funding as proposed by OMB would cripple the Publications Projects of the NHPRC and annihilate the Records Program.

During the last seventeen years, the NHPRC has proven to be a strikingly effective Government-funded program. Congressman Dannemeyer has misrepresented this program by calling it "just a microcosm of what has happened to our Federal Government in the last 47 years. They start out with a good idea and it just grows and grows and grows."

What is particularly disturbing to those who are concerned about America's future and interested in having access to the records and documents of the past is Congressman Dannemeyer's willingness to permit the Office of Management and Budget to make a determination about the survival of the NHPRC, not by examining the record or judging the accomplishments of the program, but by the simple act of eliminating Federal funding from the budget.

H.R. 2979 asks for reauthorization for fiscal year 1982 in order to seek a fair hearing on the future of NHPRC. Because of this action we are accused by President Reagan's supporters of busting the budget. The $3,000,000 represents 4.2 one-millionths of the fiscal year 1982 budget. How can members of the Coalition be convinced that this program was given serious and thoughtful review by OMB? The automatic response that private funds can support the entire effort fails to consider the proven record of the NHPRC. Without a strong federal financial involvement this essential fundamental research could not survive. We are advocating nothing more than the continuation of a program which collects and transmits the primary records of America's past.

For all these reasons, we believe Congressman Dannemeyer's contention—that the National Historical Publications and Records Commission and its grant programs is a great society project gone awry—is incorrect.

Sincerely,

MICHAEL RICHMAN,
CHARLENE N. BICKFORD,
Coordinators for the Coalition.●

A FATHER AND SENATOR HELMS

HON. PAUL N. McCLOSKEY, JR.

OF CALIFORNIA

IN THE HOUSE OF REPRESENTATIVES

Thursday, June 11, 1981

● Mr. McCLOSKEY. Mr. Speaker, in the Washington Post of June 5, 1981, a good and thoughtful man, Tom Braden, wrote of his decision to obtain an abortion for his daughter after she was brutally and repeatedly raped. This might give some of us pause, particularly after our vote of 329 to 70 last May 13, denying Federal funds for abortions for rape victims.

Time after time, we in the House have voted to deny women the right to control perhaps the most personal of their decisions—whether or not to bring a child into the world. But the unwanted child of an unknown rapist seems too much to ask a woman to bear.

We, of course, are predominantly men. How would we feel if a Congress made up of a majority of women were to vote a mandatory vasectomy for all men who had sired two or more children?

I suspect most of us, faced with the problem Mr. Braden faced, would have made the same decision.
